Atlantic Highly Migratory Species; Individual Bluefin Quota Program; Accountability for Bluefin Tuna Catch

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments and notice of public hearing.

SUMMARY: NMFS proposes to modify the Atlantic highly migratory species (HMS) regulations to require vessels in the pelagic longline fishery to account for bycatch of bluefin tuna (bluefin) using Individual Bluefin Quota (IBQ) on a quarterly basis instead of before commencing any fishing trip with less than the minimum required IBQ balance or with quota debt. Specifically, vessels would be allowed to fish with an IBQ balance below the minimum amount currently required to depart on a fishing trip with pelagic longline gear, or with quota debt incurred by exceeding their IBQ balance, during a given calendar quarter; however, vessels would be required to reconcile quota debt and satisfy the minimum IBQ requirement prior to departing on a pelagic longline fishing trip in the subsequent calendar quarter. The action will further optimize fishing opportunity in the directed pelagic longline fishery for target species such as tuna and swordfish and improve the functionality of the IBQ Program and its accounting provisions, consistent with the objectives of Amendment 7 to the 2006 Consolidated HMS Fishery Management Plan (FMP).
