SUPPLEMENTARY INFORMATION:

Title: Importation of Tomatoes From France, Morocco, Western Sahara, Chile, and Spain.

OMB Control Number: 0579-0131.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. As authorized by the PPA, the Animal and Plant Health Inspection Service regulates the importation of fruits and vegetables into the United States from certain parts of the world as provided in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-80).

In accordance with § 319.56-28, fresh tomatoes from France, Morocco, Western Sahara, Chile, and Spain may be imported into the United States under certain conditions to prevent the introduction of plant pests into the United States. These conditions require the use of certain information collection activities including greenhouse, production site, and treatment facility registration; a trust fund agreement; documented quality control program; box labeling; application for import permit; appeal of denial or revocation of a permit; notice of arrival; emergency action notification; and recordkeeping. Also, each consignment of tomatoes must be accompanied by a phytosanitary certificate issued by the national plant protection organization

(NPPO) or similar agency of the country of origin with an additional declaration stating that the provisions of § 319.56-28 for that country have been met.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.064 hours per response.

Respondents: Growers and importers of tomatoes from France, Morocco, Western Sahara, Chile, and Spain; and the NPPO or similar agency for these countries.

Estimated annual number of respondents: 20.

Estimated annual number of responses per respondent: 2,240.

Estimated annual number of responses: 44,809.

Estimated total annual burden on respondents: 2,867 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 25th day of October 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Importation of Plants for Planting; Establishing a Category for Plants for Planting Not Authorized for Importation Pending Pest Risk Analysis.

OMB Control Number: 0579-0380.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to take such actions as may be necessary to prevent the introduction and spread of plant pests and noxious weeds within the United States. The Secretary has delegated this authority to the Animal and Plant Health Inspection Service (APHIS).

The regulations contained in "Subpart-Plants for Planting" (7 CFR 319.37 through 319.37-14) prohibit or restrict, among other things, the importation of living plants, plant parts, and seeds for propagation. These regulations are intended to ensure that imported plants for planting do not serve as a host for plant pests, such as insects or pathogens, which can cause damage to U.S. agricultural and environmental resources.

In accordance with § 319.37-2a, the importation of certain taxa of plants for planting poses a risk of introducing quarantine pests into the United States. Therefore, the importation of these taxa is not authorized pending the completion of a pest risk analysis, except as provided in the regulations. Requests to remove a taxa from the category of plants for planting whose importation is not authorized pending the completion of a pest risk analysis must be made in accordance with § 319.5. These requests contains information collection activities that include information about the requesting party, the commodity proposed for importation into the United States, shipping information, a description of the pests and diseases associated with the commodity, current practices for risk mitigation or management, and any additional information listed in § 319.5 that may be necessary for APHIS to complete a pest risk analysis.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 3.13 hours per response.

Respondents: National plant protection organizations of exporting countries and importers of plants for planting into the United States.

Estimated annual number of respondents: 16.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 16.

Estimated total annual burden on respondents: 50 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 25th day of October 2017.
