[Docket Number FRA-2017-0111]

Notice of Application for Approval To Discontinue or Modify a Railroad Signal System

Under part 235 of Title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this provides the public notice that on September 20, 2017, the Union Pacific Railroad (UP) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA-2017-0111.

Applicant: Union Pacific Railroad, Mr. Kevin D. Hicks, AVP Engineering—Design, 1400 Douglas Street, MS 0910, Omaha, NE 68179

Union Pacific seeks to discontinue the automatic block signals (ABS) on the Utah Service Unit, Montana Subdivision, in the cities of Pocatello, Chubbuck, Fort Hall, Blackfoot, Firth, Shelley and Idaho Falls in the state of Idaho.

There are 43 active Highway-Rail Grade Crossings and 2 hot-box and dragging equipment detectors in the area which will remain as currently installed.

The reason for the discontinuance of the ABS is that the condition of the signal system would require complete replacement to avert safety issues and FRA defects, and the amount of traffic on the subdivision does not warrant the cost of replacement.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. [Docket Number FRA-2017-0116]

Petition for Waiver of Compliance

Under part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that on November 1, 2017, BNSF Railway (BNSF) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain

provisions of the Federal railroad safety regulations contained at Title 49 Code of Federal Regulations (CFR) part 231. FRA assigned the petition Docket Number FRA-2017-0116.

Pursuant to 49 CFR 231.35, BNSF seeks relief from AAR Standard S-2044, Appendix D1, the approved industry standard for safety appliances for flatcars with full decks. BNSF requests permission to alter Boeing aircraft fuselage flatcars and idler cars by modifying the transverse end and side handhold arrangement at the BL and AR corners of the flatcars. In order to transport the aircraft fuselages safely, the BR and AL side and end handholds will be positioned six (6) inches above the deck of the flatcar which will allow employees to safely utilize the handholds. BNSF states that ergonomic analysis of this arrangement indicates this modification does not compromise rail safety.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590.
