Needs and Uses: The Federal Communications Commission (Commission) received approval for a revision of OMB Control No. 3060-0508 from the Office of Management and Budget (OMB). The purpose of this revision was to obtain OMB approval of rules applicable to part 22 800 MHz Cellular Radiotelephone (“Cellular”) Service licensees and applicants, as adopted by the Commission in a *Second Report and Order and Report and Order (Second Report and Order)* on March 23, 2017 (WT Docket Nos. 12-40 and 10-112; RM Nos. 11510 and 11660; FCC 17-27). By the *Second Report and Order*, the Commission revised or eliminated certain licensing rules and modernized outdated technical rules applicable to the Cellular Service. Specifically, in addition to rule revisions that do not affect this information collection, the Commission revised the Cellular radiated power

rules, giving licensees the option to comply with effective radiated power limits based on power spectral density (PSD), and giving licensees the additional option to operate at PSD limits above a specified threshold (Higher PSD Limits) so long as certain conditions are met. One of these conditions, set forth in a new provision of the Cellular rules, is a requirement for written advance notification to public safety entities within a specified radius of the cell sites to be deployed at the Higher PSD Limits. This third-party disclosure requirement is an important component of the Commission's approach to protecting public safety entities from increased potential for unacceptable interference to their communications. Also of relevance to this information collection, the Commission eliminated the requirement for filings for certain changes to cell sites in a Cellular system.

The information collected is used to determine, on a case-by-case basis, whether or not to grant licenses authorizing construction and operation of wireless telecommunications facilities to common carriers. Further, this information is used to develop statistics about the demand for various wireless licenses and/or the licensing process itself, and occasionally for rule enforcement purposes.

Total Annual Burden: 222,055 hours.

Total Annual Cost: \$71,306,250.

Nature and Extent of Confidentiality: In general there is no need for confidentiality with this collection of information.

Privacy Act Impact Assessment: Yes.

Needs and Uses: FCC Form 601 is a consolidated, multi-part application form that is used for market-based and site-based licensing for wireless telecommunications services, including public safety licenses, which are filed through the Commission's Universal Licensing System (ULS). FCC Form 601 is composed of a main form that contains administrative information and a series of schedules used for filing technical and other information. This form is used to apply for a new license, to amend or withdraw a pending application, to modify or renew an existing license, cancel a license, request a duplicate license, submit required notifications, request an extension of time to satisfy construction requirements, or request an administrative update to an existing license (such as mailing address change), request a Special Temporary Authority or Developmental License. Respondents are encouraged to submit FCC Form 601 electronically and are required to do so when submitting FCC Form 601 to apply for an authorization for which the applicant was the winning bidder in a spectrum auction.

The data collected on FCC Form 601 includes the FCC Registration Number (FRN), which serves as a "common link" for all filings an entity has with the FCC. The Debt Collection Improvement Act of 1996 requires entities filing with the Commission use an FRN.

On November 7, 2014, the Federal Communications Commission (Commission) released a Report and Order and Further Notice of Proposed Rulemaking (FCC 14–181) in WT Docket No. 12–40 to reform its rules governing the 800 MHz Cellular Radiotelephone (Cellular) Service (see 79 FR 76268). Subsequently, on March 24, 2017, the Commission released a *Second Report and Order* (FCC 17–27) in that same proceeding, revising certain technical and licensing rules applicable to the Cellular Service (see 82 FR 17570). In addition to rule revisions that do not affect this information collection, in the *Second Report and Order*, the Commission adopted revised radiated power rules, giving Cellular licensees the option to comply with effective radiated power limits based on power spectral density (PSD), and it made conforming changes to related technical provisions to accommodate PSD. The Commission retained, as an option, the existing radiated power limits (non-

PSD) and related technical requirements for Cellular licensees that either cannot or choose not to use a PSD model. The Commission also revised the definition and filing requirements for permanent discontinuance of operations, consistent with transitioning the Cellular Service from a site-based regime to one that is geographic-based.

The Commission received approval from OMB for revisions to its currently approved collection of information under OMB Control Number 3060–0798 to permit the collection of PSD-related technical information (in lieu of certain non-PSD technical information) for Cellular Service licensees that opt to use a PSD model for their systems, pursuant to the *Second Report and Order*. The OMB approval under this same Control Number 3060–0798 included a revised FCC Form 601, most notably a revised Schedule F of the Form, implementing the technical rule changes adopted in the *Second Report and Order* and thereby allowing licensees to use the Form to make filings regarding their licenses based on PSD operations. The revisions did not have any impact on the burden to complete FCC Form 601, including Schedule F of the Form.

Schools and Libraries Universal Service Support Mechanism

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission adopts, on an emergency basis, temporary rules to provide immediate relief to schools and libraries contending with the devastation caused by Hurricanes Harvey, Irma, and Maria, which struck the United States and its territories in August and September 2017. These temporary rules make available targeted support to schools and libraries that are forced to rebuild facilities and replace equipment damaged by the Hurricanes, and provide increased flexibility for eligible services to be restored through service substitutions. The rules also provide support for schools that have
