POLICY JUSTIFICATION

Canada—AIM-120D Advanced Medium Range Air-to-Air Missiles (AMRAAM)

The Government of Canada has requested a Letter of Offer and Acceptance for the procurement of up to thirty-two (32) AIM-120D Advanced Medium-Range Air-to-Air Missiles (AMRAAMs), up to eighteen (18) AMRAAM Captive Air Training Missiles (CATMs); up to four (4) AMRAAM Non-Development Item—Airborne Instrumentation Unit (NDI-AIU); up to two (2) AMRAAM Instrumented Test Vehicles (ITV); up to seven (7) spare AMRAAM guidance units; up to four (4) spare AMRAAM control sections for use on their F/A-18 aircraft. Included in the sale are containers; storage and preservation; transportation; aircrew and maintenance training; training aids and equipment, spares and repair parts; warranties; weapon system support and test equipment; publications and technical documentation; software development, integration, and support; system integration and testing; U.S. Government and contractor engineering, technical, and logistics support; and other related elements of logistics and program support. The estimated total cost is \$140 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by

helping to improve the security of a NATO ally which has been, and continues to be, a key democratic partner of the United States in ensuring peace and stability. The missiles will be used on Royal Canadian Air Force (RCAF) fighter aircraft.

This proposed sale of defense articles and services is required to enable RCAF fighters to optimally fulfill both North American Aerospace Defense (NORAD) and NATO missions and also meets the U.S. Northern Command's goals of combined air operations interoperability and standardization between Canadian and U.S. forces. The RCAF will have no difficulty absorbing these missiles into its inventory.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Raytheon Missile Systems, Tucson, AZ. The Government of Canada has advised that it will negotiate offset agreements in conjunction with this sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Canada.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17-57

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-120D Advanced Medium Range Air-to-Air Missile (AMRAAM) hardware, including the missile guidance section, is classified CONFIDENTIAL. State-of-the-art technology is used in the missile to provide it with unique beyond-visual-range capability. The increase in capability from the AIM-120C-7 to AIM-120D consists of a two-way data link, a more accurate navigation unit, improved High-Angle Off-Boresight (HOBS) capability, and enhanced aircraft-to-missile position handoff.

2. AIM-120D features a target detection device with embedded electronic countermeasures, and electronics unit within the guidance section that performs all radar signal processing, mid-course and terminal

guidance, flight control, target detection, and warhead burst point determination.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Canada can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary to further the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed on this transmittal are authorized for release and export to Canada.

NOV 17 2017

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 17-59, concerning the Army's proposed Letter(s) of Offer and Acceptance to the Government of Georgia for defense articles and services estimated to cost \$75 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

Charles W. Norjes
Lieutenant General, USA
Director

BILLING CODE 5001-06-C

Transmittal No. 17-59

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Georgia

(ii) *Total Estimated Value:*

Major Defense Equipment*	\$50 million
Other	\$25 million
Total	\$75 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):
Four-hundred ten (410) Javelin Missiles
Seventy-two (72) Javelin Command Launch Units (CLUs) (includes two

(2) Javelin Block 1 CLUs to be used as spares)

Non-MDE:

Also included are ten (10) Basic Skills Trainers (BST); up to seventy (70) simulated rounds; United States Government (USG) and contractor technical assistance, transportation, and other related elements of logistics and program support.

(iv) *Military Department:* Army

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex

(viii) *Date Report Delivered to Congress*: November 17, 2017

* As defined in Section 47(6) of the Arms Export Control Act.

Policy Justification

Georgia—Javelin Missile and Command Launch Units

The Government of Georgia has requested to purchase four hundred and ten (410) Javelin Missiles, and seventy-two (72) Javelin Command Launch Units (CLUs) (includes two (2) Javelin Block 1 CLUs to be used as spares). Also included are ten (10) Basic Skills Trainers (BST); up to seventy (70) simulated rounds; U.S. Government and contractor technical assistance; transportation; and other related elements of logistics and program support. The total estimated cost is \$75 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the security of Georgia. The Javelin system will provide Georgia with increased capacity to meet its national defense requirements. Georgia will have no difficulty absorbing this system into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Raytheon/Lockheed Martin Javelin Joint Venture of Orlando, Florida, and Tucson, Arizona. However, these missiles are being provided from U.S. Army stock and the CLUs will be obtained from on-hand Special Defense Acquisition Fund (SDAF)-purchased stock. There are no known offset agreements proposed in conjunction with this potential sale.

Implementation of this proposed sale will require the assignment of approximately one (1) U.S. Government and two (2) contractor representatives to Georgia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17–59

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The Javelin Weapon System is a medium-range, man portable, shoulder-launched, fire and forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. They system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and/or direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor thus decreasing its detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, which are a reusable Command Launch Unit (CLU) and a round contained in a disposable launch tube assembly. The CLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in a stand-alone mode for battlefield surveillance and target detection. The CLU's thermal sight is a second generation Forward Looking Infrared (FLIR) sensor. To facilitate initial loading and subsequent updating of software, all on-board missile software is uploaded via the CLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in either the top attack or direct fire modes (for target undercover). An onboard flight computer guides the missile to the selected target.

5. The Javelin Missile System hardware and the documentation are UNCLASSIFIED. The missile software which resides in the CLU is considered SENSITIVE. The sensitivity is primarily in the software programs which instruct the system how to operate in the presence of countermeasures. The overall hardware is also considered sensitive in that the infrared

wavelengths could be useful in attempted countermeasure development.

6. If a technologically advanced adversary obtains knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Georgia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary to further the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed on this transmittal are authorized for release and export to the Government of Georgia.
