disability to operate, or ride as a passenger in, the motor vehicle. Each motor vehicle repair business who has submitted required information shall keep its entry current, accurate and complete by submitting revised information not later than 30 days after the relevant changes in the business occur.”

This requirement is a one-time submission unless changes are made to the business as described in paragraph (b).

Affected Public: Businesses that modify vehicles, after the first retail sale, so that the vehicle may be used by persons with disabilities.

Estimated Total Annual Burden: 1,475 hours and $50.04.

Estimated Number of Respondents: 765.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is most effective if OMB receives it within 30 days of publication.

Raymond R. Posten,
Associate Administrator for Rulemaking.

Reports, Forms and Record Keeping Requirements; Agency Information Collection Activity Under OMB Review

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collections and their expected burden. The Federal Register Notice with a 60-day comment period was published on September 8, 2017 (82 FR 42571). The agency received no comments.

DATES: Comments must be submitted on or before January 5, 2018.

ADDRESSES: Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention NHTSA Desk Officer.

SUPPLEMENTARY INFORMATION:
National Highway Traffic Safety Administration

Title: 49 CFR part 583—Automobile Parts Content Labeling.

OMB Number: 2127–0573.

Type of Request: Request for public comment on a previously approved collection of information.

Abstract: Part 583 establishes requirements for the disclosure of information relating to the countries of origin of the equipment of new passenger motor vehicles. This information will be used by NHTSA to determine whether manufacturers are complying with the American Automobile Labeling Act (49 U.S.C. 32304). The American Automobile Labeling Act requires all new passenger motor vehicles (including passenger cars, certain small buses, all light trucks and multipurpose passenger vehicles with a gross vehicle weight rating of 8,500 pounds or less), to bear labels providing information about domestic and foreign content of their equipment. With the affixed label on the new passenger motor vehicles, it serves as an aid to potential purchasers in the selection of new passenger motor vehicles by providing them with information about the value of the U.S./Canadian and foreign parts of each vehicle, the countries of origin of the engine and transmission, and the site of the vehicle’s final assembly.

NHTSA anticipates approximately 20 vehicle manufacturers will be affected by these reporting requirements. NHTSA does not believe that any of these 20 manufacturers are a small business (i.e., one that employs less than 500 persons) since each manufacturer employs more than 500 persons.

Manufacturers of new passenger motor vehicles, including passenger cars, certain small buses, and light trucks with a gross vehicle weight rating of 8,500 pounds or less, must file a report annually.

Affected Public: Vehicle manufacturers.

Number of Respondents: 20.

Total Annual Burden: 2,522 hours per respondent.

Estimated Total Annual Burden: NHTSA estimates that the vehicle manufacturers will incur a total annual reporting hour and cost burden of 50,440 hours and $3,716,740 respectively. The amount includes annual burden hours incurred by multi-stage manufacturers and motor vehicle equipment suppliers.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is most effective if OMB receives it within 30 days of publication.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: 49 CFR Part 564—Replaceable Light Source Dimensional Information Collection.

OMB Number: 2127–0563.

Type of Request: Request for public comment on a previously approved collection of information.

Abstract: The information to be collected is in response to 49 CFR part 564, “Replaceable Light Source Dimensional Information.” Persons desiring to use newly designed replaceable headlamp light sources are required to submit interchangeability and performance specifications to the agency. After a short agency review to assure completeness, the information is placed in a public docket for use by any person who would like to manufacture headlamp light sources for highway motor vehicles. In Federal Motor Vehicle Safety Standard No. 108, Lamps, reflective devices and associated equipment, “Part 564 submissions” are referenced as being the source of information regarding the performance and interchangeability information for legal headlamp light sources, whether original equipment or replacement equipment. The submitted information about headlamp light sources becomes the basis for certification of compliance with safety standards.

NHTSA anticipates approximately 7 bulb manufacturers will be affected by these reporting requirements. NHTSA does not believe that any of these manufacturers are a small business (i.e., one that employs less than 500 persons) since each manufacturer employs more than 500 persons.

Affected Public: Businesses or other profit organizations.

Estimated Total Annual Burden: NHTSA estimates that the manufacturers will incur a total annual reporting hour of 28 hours.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is most effective if OMB receives it within 30 days of publication.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration

Title: 49 CFR part 571.125—Warning Devices Information Collection.

OMB Number: 2127–0506.

Type of Request: Request for public comment on a previously approved collection of information.

Abstract: 49 U.S.C. 30111, 30112 and 30117 of the National Traffic and Motor Vehicle Safety Act of 1966 as amended (“the Safety Act”), authorized the issuance of Federal Motor Vehicle Safety Standards (FMVSS). The Secretary is authorized to issue, amend, and revoke such rules and regulations as she/he deems necessary. Using this authority, the agency issued FMVSS No. 125, “Warning Devices” which applies to devices, without self-contained energy sources, that are designed to be carried in buses and trucks that have a Gross Vehicle Weight Rating (GVWR) greater than 10,000 pounds. These devices are used to warn approaching traffic of the presence of a stopped vehicle, except for devices designed to be permanently affixed to the vehicles. NHTSA anticipates approximately 3 Warning Device manufacturers will be affected by those reporting requirements. NHTSA does not believe that any of these manufacturers are a small business (i.e., one that employs less than 500 persons) since each manufacturer employs more than 500 persons.
