POLICY JUSTIFICATION

Poland—AIM–120C–7 Advanced Medium Range Air-to-Air Missiles (AMRAAM)

The Government of Poland has requested to purchase up to one hundred fifty (150) AIM–120C–7 Advanced Medium Range Air-to-Air Missiles (AMRAAM). Also included are missile containers, weapon system support, spare and repair parts, support and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, technical and logistics support services, and other related elements of logistical and program support. The estimated cost is \$250 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally. Poland continues to be an important

force for political stability and economic progress in Central Europe.

This potential sale would support Poland's F–16 fighter program and enhances Poland's ability to provide for its own territorial defense and support coalition operations. Poland previously purchased the AIM–120C–7 missile and will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Raytheon Missile Systems, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The AIM–120C–7 Advanced Medium Range Air-to-Air Missile (AMRAAM) is a guided missile featuring digital technology and micro-miniature solid-state electronics. The AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets. The AMRAAM is classified CONFIDENTIAL. The major components and subsystems range from UNCLASSIFIED to CONFIDENTIAL and technical data and other documentation are classified up to SECRET.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Poland can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary to further the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed on this transmittal are authorized

for release and export to the Government of Poland.
