The encryption keys shall be generated, maintained, and controlled in a Department data center by the Department key management authority. Deviations from these encryption requirements must be approved in writing by the Authorizing Official. Data in Email Archive Management Records categorized at a high FISMA impact risk level will additionally be subject to continual auditing and monitoring, multifactor authentication mechanisms utilizing PKI, NIST 800-53 controls concerning virtualization, servers, storage and networking as well as stringent measures to sanitize data from the cloud service once the contract is terminated.
