contest an initial Finding of Violation by providing a written response to OFAC.

[2] Deadline for response; Default determination. A response to an initial Finding of Violation must be made within 30 days as set forth in this paragraph (b). The failure to submit a response within 30 days shall be deemed to be a waiver of the right to respond, and the initial Finding of Violation will become final and will constitute final agency action. The violator has the right to seek judicial review of that final agency action in Federal district court.

(i) Computation of time for response. A response to an initial Finding of Violation must be postmarked or date-stamped by the U.S. Postal Service (or foreign postal service, if mailed abroad) or courier service provider (if transmitted to OFAC by courier) on or before the 30th day after the postmark date on the envelope in which the initial Finding of Violation was served. If the initial Finding of Violation was personally delivered by a non-U.S. Postal Service agent authorized by OFAC, a response must be postmarked or date-stamped on or before the 30th day after the date of delivery.

(ii) Extensions of time for response. If a due date falls on a Federal holiday or weekend, that due date is extended to include the following business day. Any other extensions of time will be granted, at the discretion of OFAC, only upon specific request to OFAC.

(3) Form and method of response. A response to an initial Finding of Violation need not be in any particular form, but it must be typewritten and signed by the alleged violator or a representative thereof, must contain information sufficient to indicate that it is in response to the initial Finding of Violation, and must include the OFAC identification number listed on the initial Finding of Violation. A copy of the written response may be sent by facsimile, but the original also must be sent to OFAC by mail or courier and must be postmarked or date-stamped in accordance with paragraph (b)(2) of this section.

(4) Information that should be included in response. Any response should set forth in detail why the alleged violator either believes that a violation of the regulations did not occur and/or why a Finding of Violation is otherwise unwarranted under the circumstances, with reference to the General Factors Affecting Administrative Action set forth in the Guidelines contained in appendix A to part 501. The response should include all documentary or other evidence available to the alleged violator that supports the arguments set forth in the response. OFAC will consider all relevant materials submitted in the response.

(c)(1) Determination. If, after considering the response, OFAC determines that a final Finding of Violation should be issued, OFAC will issue a final Finding of Violation that will inform the violator of its decision. A final Finding of Violation shall constitute final agency action. The violator has the right to seek judicial review of that final agency action in Federal district court.

(2) Determination that a Finding of Violation is not warranted. If, after considering the response, OFAC determines a Finding of Violation is not warranted, then OFAC will inform the alleged violator of its decision not to issue a final Finding of Violation.

Note to paragraph (c)(2): A determination by OFAC that a final Finding of Violation is not warranted does not preclude OFAC from pursuing other enforcement actions consistent with the Guidelines contained in appendix A to part 501 of this chapter.

(d) Representation. A representative of the alleged violator may act on behalf of the alleged violator, but any oral communication with OFAC prior to a written submission regarding the specific alleged violations contained in the initial Finding of Violation must be preceded by a written letter of representation, unless the initial Finding of Violation was served upon the alleged violator in care of the representative.

Subpart H—Procedures

§ 584.801 Procedures.

For license application procedures and procedures relating to amendments, modifications, or revocations of licenses; administrative decisions; rulemaking; and requests for documents pursuant to the Freedom of Information and Privacy Acts (5 U.S.C. 552 and 552a), see part 501, subpart E, of this chapter.

§ 584.802 Delegation by the Secretary of the Treasury.

Any action that the Secretary of the Treasury is authorized to take pursuant to the Magnitsky Act; Presidential Memorandum of April 5, 2013: Delegation of Functions Under Section 404 and 406 of Public Law 112–208 (78 FR 22761, April 16, 2013); or any Executive orders or further Presidential action relating to the Magnitsky Act, may be taken by the Director of OFAC or by any other person to whom the Secretary of the Treasury has delegated authority so to act.

Subpart I—Paperwork Reduction Act

§ 584.901 Paperwork Reduction Act notice.

For approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3507) of information collections relating to recordkeeping and reporting requirements, licensing procedures, and other procedures, see § 501.901 of this chapter. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

John E. Smith,
Director, Office of Foreign Assets Control.
Sigal P. Mandelker,
Under Secretary, Office of Terrorism and Financial Intelligence, Department of the Treasury.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Arkansas; Revisions to the Definitions for Arkansas Plan of Implementation for Air Pollution Control: Volatile Organic Compounds

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a portion of the revision to the Arkansas State Implementation Plan (SIP) submitted by Arkansas Department of Environmental Quality (ADEQ) on March 24, 2017. The revision updates the definition of “volatile organic compounds” (VOC). Specifically, the submitted revision will incorporate the EPA’s latest definition of VOC on the basis that these compounds make negligible contribution to tropospheric ozone formation. This action is being taken pursuant to the Clean Air Act (CAA or Act).

DATES: This direct final rule is effective March 21, 2018, unless EPA receives relevant adverse comments by January
I. Background

Tropospheric ozone, commonly known as smog, is formed when VOCs and nitrogen oxides (NO\textsubscript{x}) react in the atmosphere in the presence of sunlight. Because of the harmful health effects of ozone, the EPA and state governments limit the amount of VOCs that can be released into the atmosphere. VOCs are those organic compounds of carbon (excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate) that form ozone through atmospheric photochemical reactions. Different VOCs have different levels of reactivity. That is, they do not react to form ozone at the same speed or do not form ozone to the same extent. Some VOCs react slowly or form less ozone; therefore, changes in their emissions have less and, in some cases, very limited effects on local or regional ozone pollution episodes. It has been the EPA's policy that organic compounds with a negligible level of reactivity should be excluded from the regulatory VOC definition so as to focus VOC control efforts on compounds that do significantly increase ozone concentrations. The EPA also believes that exempting such compounds creates an incentive for industry to use negligibly reactive compounds in place of more highly reactive compounds that are regulated as VOCs.

The EPA periodically revises the list of negligibly reactive compounds to add or delete VOCs from regulation on the basis that these compounds make a negligible contribution to tropospheric ozone formation. Section 302(s) of the CAA specifies that the EPA has the authority to define the meaning of “VOC” and hence what compounds shall be treated as VOCs for regulatory purposes. The policy of excluding negligibly reactive compounds from the VOC definition was first set forth in the “Recommended Policy on Control of Volatile Organic Compounds” (42 FR 35314, July 8, 1977) and was supplemented most recently with the “Interim Guidance on Control of Volatile Organic Compounds in Ozone State Implementation Plans” (Interim Guidance) (70 FR 54046, September 13, 2005). The EPA used the reactivity of ethane as the threshold for determining whether a compound has negligible reactivity. Compounds that are less reactive than, or equally reactive to, ethane under certain assumed conditions may be deemed negligibly reactive and therefore suitable for exemption from the regulatory definition of VOC. Compounds that are more reactive than ethane continue to be considered VOCs for regulatory purposes and therefore are subject to control requirements. The selection of ethane as the threshold compound was based on a series of smog chamber experiments that underlay the 1977 policy.

The EPA lists compounds that it has determined to be negligibly reactive in its regulations as being excluded from the definition of VOC. (40 CFR 51.100(s)). The Arkansas submittal will update its SIP to be consistent with current EPA definitions to provide clarity and consistency for owners and operators of sources subject to ADEQ rules regarding VOC control.

The specific organic compounds that will be excluded from ADEQ’s definition of VOC that is in the SIP with this revision include: trans-1,3,3,3-tetrafluoro- propane; 2,3,3,3-tetrafluoro- propane; 1 HCF\textsubscript{2}OCF\textsubscript{3}F\textsubscript{2} (HFE-134); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{3}H (HFE-236cal2); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{3}H (HFE-338pcc13); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}H (H-Galden 1040x or H-Galden ZT 130 (or 150 or 180)); 2 trans 1-chloro-3,3,3-trifluoroprop-1-ene; and 2-amino-2-methyl-1-propanol. 4

II. The EPA’s Evaluation

On March 24, 2017, ADEQ submitted SIP revisions to EPA for review and approval. A portion of the submitted revision update the definition of VOC found at the Arkansas Pollution Control & Ecology Commission’s (Commission of APC&EC) Regulation No. 19, Regulations of the Arkansas Plan of Implementation for Air Pollution Control. Specifically, the revision adds trans-1,3,3,3-tetrafluoro- propane; 2,3,3,3-tetrafluoro- propane; 1 HCF\textsubscript{2}OCF\textsubscript{3}F\textsubscript{2} (HFE-134); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{3}H (HFE-236cal2); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{3}H (HFE-338pcc13); HCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}OCF\textsubscript{2}H (H-Galden 1040x or H-Galden ZT 130 (or 150 or 180)); trans 1-chloro-3,3,3-trifluoroprop-1-ene; and 2-amino-2-methyl-1-propanol to the list of compounds excluded from the VOC definition on the basis that these compounds make a negligible contribution to the tropospheric ozone formation. These changes are consistent with EPA’s definition of VOC at 40 CFR 51.100(s), section 110 of the CAA and meet the regulatory requirements pertaining to the SIPs. 5 Pursuant to CAA section 110(l), the Administrator shall not approve a revision of a plan if the revisions would interfere with any applicable requirement concerning attainment and reasonable further

---

1 See 78 FR 62451, October 22, 2013—Exclusion of trans-1,3,3,3-tetrafluoro- propane.
2 See 78 FR 59823, February 12, 2013—Exclusion of group of four Hydrofluoropolethryers (HPEPs).
4 See 78 FR 17017, March 27, 2014—Exclusion of 2-amino-2-methyl-1-propanol.
III. Final Action

Pursuant to section 110 of the CAA, EPA is approving the revision to the Arkansas SIP as defined by Arkansas Regulation No. 19, Chapter 2: Progress (as defined in CAA section 110[l]) because it reflects changes to the aforementioned compounds are federal regulations based on findings that the compounds are negligibly reactive.6

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act.

Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

• Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
• Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
• Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-41);
• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 20, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Samuel Coleman was designated the Acting Regional Administrator on December 15, 2017 through the order of succession outlined in Regional Order R6–1110.13, a copy of which is included in the docket for this action.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations,
Reporting and recordkeeping requirements.

Samuel Coleman,
Acting Regional Administrator, Region 6.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULATION OF IMPLEMENTATION PLANS

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[82 FR Doc. 2017–27458 Filed 12–20–17; 8:45 am]

BILLING CODE 6560–50–P

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is finalizing an approval of revisions to the Louisiana State Implementation Plan (SIP) submitted by the State of Louisiana through the Louisiana Department of Environmental Quality (LDEQ) that address regional haze for the first planning period. LDEQ submitted these revisions to address the requirements of the Clean Air Act (CAA) and the EPA’s rules that require states to prevent any future and remedy any existing anthropogenic impairment of visibility in mandatory Class I areas (national parks and wilderness areas) caused by emissions of air pollutants from numerous sources located over a wide geographic area (also referred to as the “regional haze program”). To address the Best Available Retrofit Technology (BART) requirement for sulfur dioxide (SO2), oxides of nitrogen (NOx) and particulate matter (PM), the EPA is finalizing approval of source-by-source BART determinations for certain electric generating and non-electric generating units. To address the BART requirement for NOx for electric generating units, we are finalizing our proposed determination that Louisiana’s participation in the Cross-State Air Pollution Rule’s (CSAPR) trading program for ozone-season NOx qualifies as an alternative to BART.

DATES: This rule is effective on January 22, 2018.

ADDRESSES: The EPA has established docket for this action under Docket ID No. EPA–R06–OAR–2016–0520 for non-electric generating units and Docket ID No. EPA–R06–OAR–2017–0129 for electric generating units (EGUs). All documents in the docket are listed on the http://www.regulations.gov website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through http://www.regulations.gov or in hard copy at the EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Jennifer Huser, 214–665–7347.

SUPPLEMENTARY INFORMATION: Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

A. The Regional Haze Program

Regional haze is visibility impairment that is produced by a multitude of sources and activities that are located across a broad geographic area and emit fine particulates (PM2.5) (e.g., sulfates, nitrates, organic carbon (OC), elemental carbon (EC), and soil dust), and their precursors (e.g., sulfur dioxide (SO2), nitrogen oxides (NOx), and in some cases, ammonia (NH3) and volatile organic compounds (VOCs)). Fine
