revision of confidentiality pledges
under the Confidential Information
Protection and Statistical Efficiency Act.

for Health Statistics (NCHS) is
announcing revisions to the
confidentiality pledge(s) it provides to
its respondents under the Confidential
Information Protection and Statistical
Efficiency Act (44 U.S.C. 3501)
(CIPSEA). These revisions are required
by the passage and implementation of
provisions of the Federal Cybersecurity
Enhancement Act of 2015 (H.R. 2029,
Division N, Title II, Subtitle B, Sec.
223), which permit and require the
Secretary of the Department of
Homeland Security (DHS) to provide
Federal civilian agencies' information
technology systems with cybersecurity
protection for their Internet traffic. More
details on this announcement are
presented in the **SUPPLEMENTARY
INFORMATION** section below.

DATES: These revisions become effective
January 19, 2017.

should be addressed to the Information
Collection Review Office, Centers for
Disease Control and Prevention, 1600
Clifton Road NE., MS-D74, Atlanta,

SUPPLEMENTARY INFORMATION: Federal
statistics provide key information that
the Nation uses to measure its
performance and make informed
choices about budgets, employment,
health, investments, taxes, and a host of
other significant topics. The
overwhelming majority of Federal
surveys are conducted on a voluntary
basis. Respondents, ranging from
businesses to households to institutions,
may choose whether or not to provide
the requested information. Many of the
most valuable Federal statistics come
from surveys that ask for highly
sensitive information such as
proprietary business data from
companies or particularly personal
information or practices from
individuals. The CDC's National Center
for Health Statistics (NCHS) protects all
data collected under its authority under
the confidentiality provisions of section
308(d) of the Public Health Service Act
(42 U.S.C. 242m). Strong and trusted
confidentiality and exclusively
statistical use pledges under the
Confidential Information Protection and
Statistical Efficiency Act (CIPSEA) and
similar statistical confidentiality
pledges are effective and necessary in
honoring the trust that businesses,
individuals, and institutions, by their
responses, place in statistical agencies.

Under CIPSEA and similar statistical
confidentiality protection statutes, many
Federal statistical agencies make
statutory pledges that the information
respondents provide will be seen only
by statistical agency personnel or their
sworn agents, and will be used only for
statistical purposes. CIPSEA and similar
statutes protect the confidentiality of
information that agencies collect solely
for statistical purposes and under a
pledge of confidentiality. These acts
protect such statistical information from
administrative, law enforcement,
taxation, regulatory, or any other non-
statistical use and immunize the
information submitted to statistical
agencies from legal process. Moreover,
many of these statutes carry criminal
penalties of a Class E felony (fines up to
\$250,000, or up to five years in prison,
or both) for conviction of a knowing and
willful unauthorized disclosure of
covered information.

As part of the Consolidated
Appropriations Act for Fiscal Year 2016
signed on December 17, 2015, the
Congress included the Federal
Cybersecurity Enhancement Act of 2015
(H.R. 2029, Division N, Title II, Subtitle
B, Sec. 223). This Act, among other
provisions, permits and requires the
Secretary of the Department of
Homeland Security (DHS) to provide
Federal civilian agencies' information
