SUPPLEMENTARY INFORMATION:

I. Application for a Preemption Determination

NORA has applied to PHMSA for a determination whether Federal hazardous material transportation law, 49 U.S.C. 5101 *et seq.*, preempts the State of Oregon's Administrative Rule (OAR), OAR 340-100-0002(1)¹, as it is applied to transporters. Specifically, NORA states that the Oregon Environmental Quality Commission (OEQC) interprets the Oregon regulation, which adopts the United States Environmental Protection Agency's regulation, 40 CFR 263.20(a)(1), as imposing a strict liability standard on transporters of hazardous waste.² According to NORA, under Oregon law, "the transporter exercising reasonable care may not rely on the information provided by the generator and instead must be held to a strict liability standard." (emphasis omitted).

NORA presents three main arguments for why it believes Oregon's hazardous waste regulation should be preempted. First, NORA contends that it is not possible to comply with both the Oregon rule and the federal requirements because the "HMTA regulation requires the transporter to exercise reasonable care" while Oregon's strict liability interpretation does not. Next, NORA argues that

¹ The Oregon regulation adopts by reference the United States Environmental Protection Agency's rules and regulations governing the management of hazardous waste, including its generation, transportation, treatment, storage, recycling and disposal, as prescribed in 40 CFR parts 260 to 268, 270, and 273, and subparts A and B of part 124. See OAR 340-100-0002(1).

² NORA states that this issue is being litigated and is presently under consideration by the Oregon Supreme Court.
