Abstract of proposed collection: The US President's Emergency Plan for AIDS Relief (PEPFAR) was established through enactment of the United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 (Pub. L. 108-25), as amended by the Tom Lantos and Henry J. Hyde United States Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008 (Pub. L. 110-293) (HIV/AIDS Leadership Act) to support the global response to HIV/AIDS. In order to improve program monitoring, the interagency Finance and Economics Work Group supporting PEPFAR has added reporting of expenditures by program area to the current routine reporting of program results for the annual report. Data are collected from implementing partners in countries with PEPFAR programs using a standard tool (DS-4213) via an electronic web-based interface into which users directly input data. These data are analyzed to produce mean and range in expenditures by partner per result/achievement for all PEPFAR program areas. These analyses then feed into partner and program reviews at the country level for monitoring and evaluation on an ongoing basis. Summaries of these data provide key information about program costs under PEPFAR on a global level. Applying expenditure results will improve strategic budgeting, identification of efficient means of delivering services, accuracy in defining program targets, and will inform allocation of resources to ensure the program is accountable and using public funds for maximum impact.

Methodology: Data will be collected in a web-based interface available to all partners receiving funds under PEPFAR. To minimize the respondents' reporting burden and need for information technology investment, a new module capturing expenditure data was added to an already functional system. System upgrades now allow collection of the same information but no longer require uploading and downloading of spreadsheet templates. This approach has minimized U.S. government start-up costs for the technology and will make

the data collection processes more efficient.

Max L. Aguilar,

Deputy Coordinator for Management, Budget, and Operations, Office of the U.S. Global AIDS Coordinator and Health Diplomacy, Department of State.
