Specifically, Denver Water proposes to increase the height of the project’s Gross Dam by 131 feet, from 340 to 471 feet. The normal maximum elevation of Gross Reservoir would be raised by 124 feet, from 7,282 to 7,406 feet mean sea level. This would increase the normal maximum surface area of the reservoir from 418 to 842 acres, and increase its maximum storage volume from 41,811 to 118,811 acre-feet. Denver Water proposes to install a pressure reduction valve to maintain the project’s existing authorized installed capacity, but the proposal would increase the project’s annual generation by approximately 4.4 gigawatt hours. Denver Water’s proposal includes the addition, to the project boundary, of 12 acres of privately owned land, 3 acres of Forest Service land, and 40 acres of its own land while removing 321 acres of Forest Service land and 68 acres of its own land. Denver Water also proposes changes to certain license articles and mandatory license conditions. Denver Water also requests a 10-year extension to the term of the project license.
