FEDERAL REGISTER

Vol. 82 Friday,

No. 125 June 30, 2017

Book 1 of 3 Books

Pages 29699–30008

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 82, No. 125
Friday, June 30, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

BILLING CODE 1301–00–D

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 709

RIN 3133–AE41

Safe Harbor

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: The NCUA Board (''Board'') is issuing this final rule to amend its regulations regarding the treatment by the Board, as liquidating agent or conservator (''liquidating agent'' or ''conservator,'' respectively) of a federally insured credit union (''FICU''), of financial assets transferred by the credit union in connection with a securitization or a participation. The final rule replaces NCUA's current safe harbor for financial assets transferred in connection with securitizations and participations in which the financial assets were transferred in compliance with the existing regulation, and defines the conditions for safe harbor protection for securitizations and participations for which transfers of financial assets would be made after the effective date of this rule.

DATES: The effective date for this rule is July 31, 2017.

FOR FURTHER INFORMATION CONTACT: John Nilles, Senior Capital Markets Specialist, Office of Examination and Insurance, at (703) 518–1174; or John H. Brolin, Senior Staff Attorney, Office of General Counsel, at (703) 518–6438; National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314.

SUPPLEMENTARY INFORMATION:

I. Background

In 2000, when it adopted a regulation codified at 12 CFR 709.10,[1] the Board clarified the scope of its statutory authority as conservator or liquidating agent to disaffirm or repudiate contracts of an FICU with respect to transfers of financial assets by a FICU in connection with a securitization or participation. Current § 709.10 provides that a conservator or liquidating agent will not use its statutory authority to disaffirm or repudiate contracts to reclaim, recover, or recharacterize as property of a FICU or the liquidation estate any financial assets transferred by the FICU in connection with a securitization or in the form of a participation, provided that such transfer meets all conditions for sale accounting treatment under generally accepted accounting principles (''GAAP'').[2] Current § 709.10 also provides a ''safe harbor'' by confirming ''legal isolation'' if all other standards for off balance sheet accounting treatment, along with some additional conditions focusing on the enforceability of the transaction, were met by the transfer in connection with a securitization or a participation. Satisfaction of ''legal isolation'' is vital to securitization transactions because of the risk that the pool of financial assets transferred into the securitization trust could be recovered in bankruptcy or in a credit union liquidation. Generally, to satisfy the legal isolation condition, the transferred financial assets must have been presumptively placed beyond the reach of the transferor, its creditors, a bankruptcy trustee, or in the case of a FICU, NCUA as conservator or liquidating agent. Thus, current § 709.10 addresses only purported sales which meet the conditions for off balance sheet accounting treatment under GAAP. The implementation of accounting rules since 2000, however, has created uncertainty for loan participation and potential securitization participants.

A. Modifications to GAAP Accounting Standards

In 2009, the Financial Accounting Standards Board (''FASB'') finalized modifications to GAAP through Statement of Financial Accounting Standards No. 166, (now codified in FASB Accounting Standards Codification (ASC) Topic 860, Transfers and Servicing) and Statement of Financial Accounting Standards No. 167 (now codified in FASB ASC Topic 810, Consolidation) (together, the ''2009 GAAP Modifications''). The 2009 GAAP Modifications made changes that affect whether a special purpose entity (''SPE'') must be consolidated for financial reporting purposes, thereby subjecting many SPEs to GAAP consolidation requirements. These accounting changes could require a FICU to consolidate an issuing entity to which financial assets have been transferred for securitization on to its balance sheet for financial reporting purposes primarily because an affiliate of the FICU retains control over the financial assets. Given the 2009 GAAP Modifications, legal and accounting treatment of a transaction may no longer be aligned. As a result, the safe harbor provision of the 2000 Rule may not apply to a transfer in connection with a securitization that does not qualify for off balance sheet accounting treatment.

FASB ASC Topic 860 also affects the treatment of participation interests transferred by a FICU, in that it defines participating interests as pari-passu, pro-rata interests in financial assets, and subjects the sale of a participation interest to the same conditions as the sale of financial assets. FASB ASC Topic 860 provides that transfers of

[1] 65 FR 55442 (Sept. 14, 2000).

[2] In the Proposal, NCUA stated that the agency had not previously stated that federal credit unions (''FCUs'') have the authority to issue asset-backed securities (''ABS'') and that its understanding was that no FCU had done so. NCUA also does not believe that any federally insured, state-chartered credit unions (''FISCUs'') have issued ABS. Therefore, the securitization aspect of the 2000 Rule has not been applied. In connection with this final rule updating the 2000 Rule, the Office of General Counsel recently published a legal opinion letter on NCUA's Web site, which finds that the securitization of assets is a power incidental to the operation of FCUs. Accordingly, if an FCU (or a FISCU if permitted by state law) issues ABS, these amendments to § 709.10 are necessary to preserve the safe harbor for investors.

participation interests that do not qualify for sale treatment will be viewed as secured borrowings. While the GAAP modifications have some effect on participations, most participations are likely to continue to meet the conditions for sale accounting treatment under GAAP.

B. FCU Act Changes

In 2005, Congress enacted Section 207(c)(13)(C)[3] of the Federal Credit Union Act (the ''FCU Act'').[4] This paragraph generally provides that no person may exercise any right or power to terminate, accelerate, or declare a default under a contract to which the FCU is a party, or obtain possession of or exercise control over any property of the FCU, or affect any contractual rights of the FCU, without the consent of the conservator or liquidating agent, as appropriate, during the 45-day period beginning on the date of the appointment of the conservator or the 90-day period beginning on the date of the appointment of the liquidating agent. If a securitization is treated as a secured borrowing, section 207(c)(13)(C) could prevent the investors from recovering monies due to them for up to 90 days. Consequently, securitized assets that remain property of the FCU (but subject to a security interest) would be subject to the stay, raising concerns that any attempt by securitization investors to exercise remedies with respect to the FCU's assets could be delayed. During the stay, interest and principal on the securitized debt could remain unpaid. This 90-day delay could cause substantial downgrades in the ratings provided on existing securitizations and could prevent planned securitizations for multiple asset classes, such as credit cards, automobile loans, and other credits, from being brought to market.

C. Notice of Proposed Rulemaking

In response to the changes outlined above, on June 26, 2014, the Board issued a notice of proposed rulemaking (Proposal) to revise the agency's safe harbor provisions.[5] The Proposal was prompted in part by the Federal Deposit Insurance Corporation's (FDIC's) decision in 2010 to issue a final rule to resolve the issues raised by the 2009 GAAP modifications and parallel 2005 changes to the Federal Deposit Insurance Act.[6] To avoid unnecessary complexity and assure loan participants and securitization investors, the Proposal was modeled on the FDIC's safe harbor rule, which is codified at 12 CFR 360.6, Treatment of Financial Assets Transferred in Connection with a Securitization or Participation.

The Proposal sought to address concerns of securitization investors and loan participants regarding the impact of the 2009 GAAP Modifications on the eligibility of transfers of financial assets for safe harbor protection by clarifying the position of the conservator or liquidating agent under established law. Under section 207(c)(12) of the FCU Act, the conservator or liquidating agent cannot use its statutory power to repudiate or disaffirm contracts to avoid a legally enforceable and perfected security interest in transferred financial assets ''except where such an interest is taken in contemplation of the credit union's insolvency or with the intent to hinder, delay or defraud the credit union or the creditors of such credit union.''[7] This provision applies whether or not a securitization or participation transaction meets the conditions for sale accounting. The Proposal sought to clarify that, prior to any monetary default or repudiation, the conservator or liquidating agent would consent to the making of required payments of principal and interest and other amounts due on the securitized obligations during the statutory stay period.

In addition, the Proposal stated that, if the conservator or liquidating agent decides to repudiate the securitization transaction, the payment of repudiation damages in an amount equal to the par value of the outstanding obligations on the date of liquidation will discharge the lien on the securitization assets.

Following issuance of NCUA's Proposal, the FDIC issued two additional rules revising its securitization safe harbor rule to (1) be consistent with regulations required under Section 15G of the Securities and Exchange Act, 15 U.S.C. 78a *et seq.* pursuant to section 941(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act;[8] and (2) clarify that the documents governing a securitization transaction need not require an action prohibited under Regulation X (12 CFR part 1024).[9] The Board has reviewed these changes and believes they are within the scope of the Proposal; consistent with current accepted standards and practices within the securitization industry; and uncontroversial enough in nature so that the public would not reasonably benefit from being given an additional opportunity to provide comments on these minor changes. Accordingly, the Board has amended the original proposed language to incorporate those conforming amendments into § 709.10(b)(5)(i) and (b)(3)(ii)(A) of this final rule. The amendments are discussed in more detail below.

II. Comments on the Proposal

NCUA received seven comments on the Proposal to continue the safe harbor for financial assets transferred in connection with securitizations and participations in which the financial assets transferred in connection with the securitization. All the commenters supported the Proposal, stating that investors would have no interest in pursuing securitizations without the safe harbor protections. Two commenters, however, did question the proposed limit of six tranches in a securitization. One commenter also questioned the proposed limits on external credit enhancements. These comments are discussed in more detail below. Based on the rationale previously set forth, the commenters overwhelming support, and for the reasons explained in more detail below, the Board has decided to finalize the Proposal with only the slight modification mentioned above to § 709.10(b)(5)(i).

III. Final Rule

A. General Considerations

Consistent with the Proposal, this final rule replaces current § 709.10 of NCUA's regulations. Section 709.10(a) of the rule sets forth definitions of terms used in the rule. It retains many of the definitions used in the current § 709.10(a), but modifies or adds definitions to the extent necessary to accurately reflect current industry practice in securitizations. Pursuant to these definitions, the safe harbor does not apply to certain government sponsored enterprises (''Specified GSEs''), affiliates of certain such enterprises, or any entity established or guaranteed by those GSEs. In addition, the rule is not intended to apply to the Government National Mortgage Association (''Ginnie Mae'') or Ginnie Mae-guaranteed securitizations. When Ginnie Mae guarantees a security, the mortgages backing the security are assigned to Ginnie Mae, an entity owned entirely by the United States government. Ginnie Mae's statute contains broad authority to enforce its contract with the lender/issuer and its ownership rights in the mortgages backing Ginnie Mae-guaranteed

[9] 81 FR 41422 (June 27, 2016).

securities. In the event that an entity otherwise subject to the rule issues both guaranteed and non-guaranteed securitizations, the securitizations guaranteed by a Specified GSE are not subject to the rule.

Section 709.10(b) of this final rule imposes conditions to the availability of the safe harbor for transfers of financial assets to an issuing entity in connection with a securitization. These conditions make a clear distinction between the conditions imposed on residential mortgage-backed securities (RMBS) from those imposed on securitizations for other asset classes. In the context of a conservatorship or liquidation, the conditions applicable to all securitizations will improve overall transparency and clarity through disclosure and documentation requirements, along with ensuring effective incentives for prudent lending by requiring that the payment of principal and interest be based primarily on the performance of the financial assets and by requiring retention of a share of the credit risk in the securitized loans.

The conditions applicable to RMBS are more detailed and include additional capital structure, disclosure, documentation and compensation requirements, as well as a requirement for the establishment of a reserve fund. These requirements are intended to address the factors that caused significant losses in RMBS securitization structures as demonstrated in the 2007–2008 financial crisis. Confidence can be restored in RMBS markets only through greater transparency and other structures that support sustainable mortgage origination practices and require increased disclosures. These standards respond to investor demands for greater transparency and alignment of the interests of parties to the securitization. In addition, they are generally consistent with industry efforts, while taking into account legislative and regulatory initiatives.

B. Capital Structure and Financial Assets

The benefits of this final rule should be available only to securitizations that are readily understood by the market, increase liquidity of the financial assets, and reduce consumer costs. Consistent with the Security and Exchange Commission's (''SEC's'') Regulation AB, the documents governing the securitization must provide financial asset level disclosure as appropriate to the securitized financial assets for any re-securitizations (securitizations supported by other securitization obligations). These disclosures must include full disclosure of the obligations, including the structure and the assets supporting each of the underlying securitization obligations, and not just the obligations that are transferred in the re-securitization. This requirement applies to all re-securitizations, including static re-securitizations as well as managed collateralized debt obligations.

All securitizations. Consistent with the Proposal, this final rule provides that securitizations that are unfunded or synthetic transactions are not eligible for expedited consent. To support sound lending, the documents governing all securitizations must require that payments of principal and interest on the obligations be primarily dependent on the performance of the financial assets supporting the securitization and that such payments not be contingent on market or credit events that are independent of the assets supporting the securitization, except for interest rate or currency mismatches between the financial assets and the obligations to investors.

RMBS only. In formulating the rule, the Board sought to permit innovation and accommodate financing needs, and thus attempted to strike a balance between permitting multi-tranche structures for RMBS transactions and promoting readily understandable securitization structures and limiting overleveraging of residential mortgage assets.

For RMBS only, the Proposal limited the capital structure of the securitization to six or fewer tranches to discourage complex and opaque structures. The most senior tranche could include time-based sequential pay or planned amortization and companion sub-tranches, which are not viewed as separate tranches for the purpose of the six tranche requirement. This condition would not have prevented an issuer from creating the economic equivalent of multiple tranches by re-securitizing one or more tranches, so long as they meet the conditions set forth in the rule, including adequate disclosure in connection with the re-securitization. In addition, RMBS could not include leveraged tranches that introduced market risks (such as leveraged super senior tranches). Although the financial assets transferred into an RMBS would have been permitted to benefit from asset level credit support, such as guarantees (including guarantees provided by governmental agencies, private companies, or government-sponsored enterprises), co-signers, or insurance, the RMBS could not benefit from external credit support at the issuing entity or pool level. The Proposal intended that guarantees permitted at the asset level include guarantees of payment or collection, but not credit default swaps or similar items. The temporary payment of principal and interest, however, could be supported by liquidity facilities. These conditions were designed to limit both the complexity and the leverage of an RMBS and therefore the systemic risks introduced by them in the market. In addition, the Proposal provided that the securitization obligations could be enhanced by credit support or guarantees provided by Specified GSEs. However, as noted in the discussion on the definitions in the Proposal, a securitization that was wholly guaranteed by a Specified GSE would not have been subject to the rule and thus would not have been eligible for the safe harbor.

Public Comments on the Proposal

Two commenters expressed concern that codifying a limit of six credit tranches in a securitization may have the unintended consequence of limiting a FCU's ability to access the market or issuing a securitization at the best possible price. The commenter recommended that, because there is no empirical evidence that structures with more than six tranches create materially more risk than those with less than six, the Board should eliminate this requirement from the safe harbor. In addition, one commenter urged elimination of the prohibition on external credit enhancements for RMBS.

Discussion

The Board disagrees with the commenter's recommendations. As previously stated, the rule was intentionally modeled on § 360.6 of the FDIC's regulations to encourage a market for securitization participants and help assure investors. The limiting language in § 709.10(b)(1)(ii)(A) and (B) of the Proposal is nearly identical [10] to the language in § 360.6(b)(1)(ii)(A) and (B) of FDIC's regulation. Retaining the six credit tranche limitation and the prohibition on external credit enhancements will not disadvantage FICUs relative to banks, and will help limit the complexity of assigning a value to securities in the event of liquidation. Accordingly, the Board has decided to retain the proposed language in

[10] The text of the provision in NCUA's rule uses the word ''must'' instead of the word ''shall,'' which is used in the FDIC rule, the provisions are otherwise identical. No material difference is intended by the use of the word must instead of the word shall in NCUA's rule.

§§ 709.10(b)(1)(ii)(A) and (B) in the final rule without change.

C. Disclosure

For all securitizations, disclosure serves as an effective tool for increasing the demand for high quality financial assets and thereby establishing incentives for robust financial asset underwriting and origination practices. Consistent with the Proposal, this final rule increases transparency in securitizations by enabling investors to decide whether to invest in a securitization based on full information with respect to the quality of the asset pool and thereby provide additional liquidity only for sustainable origination practices.

The data must enable investors to analyze the credit quality for the specific asset classes that are being securitized. The documents governing securitizations must, at a minimum, require disclosure for all issuances to include the types of information required under current Regulation AB or any successor disclosure requirements with the level of specificity that applies to public issuances, even if the obligations are issued in a private placement or are not otherwise required to be registered.

The documents governing securitizations that qualify under the rule must require disclosure of the structure of the securitization and the credit and payment performance of the obligations, including the relevant capital or tranche structure and any liquidity facilities and credit enhancements. The disclosure must be required to include the priority of payments and any specific subordination features, as well as any waterfall triggers or priority of payment reversal features. The disclosure at issuance must include the representations and warranties made with respect to the financial assets and the remedies for breach of such representations and warranties, including any relevant timeline for cure or repurchase of financial assets, and policies governing delinquencies, servicer advances, loss mitigation and write offs of financial assets. The documents must also require that periodic reports provided to investors include the credit performance of the obligations and financial assets, including periodic and cumulative financial asset performance data, modification data, substitution and removal of financial assets, servicer advances, losses that were allocated to each tranche and remaining balance of financial assets supporting each tranche as well as the percentage coverage for each tranche in relation to the securitization as a whole. Where appropriate for the type of financial assets included in the pool, reports must also include asset level information that may be relevant to investors (*e.g.,* changes in occupancy, loan delinquencies, defaults, etc.). NCUA recognizes that for certain asset classes, such as credit card receivables, the disclosure of asset level information is less informative and, thus, will not be required.

The securitization documents must also require disclosure to investors of the nature and amount of compensation paid to any mortgage or other broker, the servicer(s), rating agency or third-party advisor, and the originator or sponsor, and the extent to which any risk of loss on the underlying financial assets is retained by any of them for such securitization. The documents must require disclosure of changes to this information while obligations are outstanding. This disclosure should enable investors to assess potential conflicts of interests and how the compensation structure affects the quality of the assets securitized or the securitization as a whole.

For RMBS, consistent with the Proposal, this final rule requires the sponsor to disclose loan level data as to the financial assets securing the mortgage loans, such as loan type, loan structure, maturity, interest rate and location of property. Sponsors of securitizations of residential mortgages will be required to affirm compliance in all material respects with applicable statutory and regulatory standards for origination of mortgage loans. None of the disclosure conditions should be construed as requiring the disclosure of personally identifiable information of obligors or information that would violate applicable privacy laws. The rule requires sponsors to disclose a third-party due diligence report on compliance with standards and representations and warranties made about the financial assets.

Finally, this final rule, consistent with the Proposal, specifies that the securitization documents require disclosure by servicers of any ownership interest of the servicer or any affiliate of the servicer in other whole loans secured by the same real property that secures a loan included in the financial asset pool. This provision does not require disclosure of interests held by servicers or their affiliates in the securitization securities. This provision is intended to give investors information to evaluate potential servicer conflicts of interest that might impede the servicer's actions to maximize value for the benefit of investors.

D. Documentation and Recordkeeping

For all securitizations, this final rule, consistent with the Proposal, requires operative agreements to use available standardized documentation for each available asset class. It is not possible to define in advance when use of standardized documentation will be appropriate, but when there is general market use of a form of documentation for a particular asset class, or where a trade group has formulated standardized documentation generally accepted by the industry, such documentation must be used.

Consistent with the Proposal, the rule also requires that securitization documents define the contractual rights and responsibilities of the parties, including but not limited to representations and warranties, ongoing disclosure requirements and any measures to avoid conflicts of interest. The documents are required to provide authority for the parties to fulfill their rights and responsibilities under the securitization contracts.

Consistent with the Proposal, additional conditions apply to RMBS to address a significant issue that has been demonstrated in the mortgage crisis by requiring that servicers have authority to mitigate losses on mortgage loans consistent with maximizing net present value of the mortgages. Therefore, for RMBS, contractual provisions in the servicing agreement must provide servicers with authority to modify loans to address reasonably foreseeable defaults and to take other action to maximize the value and minimize losses on the securitized financial assets. The documents must require servicers to apply industry best practices related to asset management and servicing.

The RMBS documents may not give control of servicing discretion to a particular class of investors. The documents must require that the servicer act for the benefit of all investors rather than for the benefit of any particular class of investors. Consistent with the forgoing, the documents must require the servicer to commence action to mitigate losses no later than ninety days after an asset first becomes delinquent unless all delinquencies on such an asset have been cured. A servicer must be required to maintain sufficient records of its actions to permit appropriate review of its actions.

In January 2013, the Consumer Financial Protection Bureau (''CFPB'') adopted mortgage loan servicing requirements that became effective on

January 10, 2014. One of the requirements, set forth in Subpart C to Regulation X, at 12 CFR 1024.41, generally prohibits a servicer from commencing a foreclosure unless the borrower's mortgage loan obligation is more than 120 days delinquent. This section of Regulation X also provides additional rules that, among other things, require a lender to further delay foreclosure if the borrower submits a loss mitigation application before the lender has commenced the foreclosure process, and requires a lender to delay a foreclosure for which it has commenced the foreclosure process if a borrower has submitted a complete loss mitigation application more than 37 days before a foreclosure sale.[11]

In response to this change, the Board is now making minor amendments in this final rule to clarify that the 90-day loss mitigation requirement does not conflict with the foreclosure commencement delays mandated by the CFPB under Regulation X. In particular, § 709.10(b)(3)(ii)(A) retains the original language proposed, but now includes additional language stating that the loss mitigation action requirement thereunder ''will not be deemed to require that the documents include any provision concerning loss mitigation that requires any action that may conflict with the requirements of Regulation X. . . .''

In addition, NCUA believes that a prolonged period of servicer advances in a market downturn misaligns servicer incentives with those of the RMBS investors. Servicing advances also serve to aggravate liquidity concerns, exposing the market to greater systemic risk. Occasional advances for late payments, however, are beneficial to ensure that investors are paid in a timely manner. To that end, consistent with the Proposal, the servicing agreement for RMBS must not require the primary servicer to advance delinquent payments of principal and interest by borrowers for more than three payment periods unless financing or reimbursement facilities to fund or reimburse the primary servicers are available. However, such facilities shall not be dependent for repayment on foreclosure proceeds.

E. Compensation

Consistent with the Proposal, the compensation requirements of this final rule apply only to RMBS. Due to the demonstrated issues in the compensation incentives in RMBS, the rule seeks to realign compensation to parties involved in the rating and servicing of residential mortgage securitizations.

The securitization documents are required to provide that any fees payable credit rating agencies or similar third-party evaluation companies must be payable in part over the five-year period after the initial issuance of the obligations based on the performance of surveillance services and the performance of the financial assets, with no more than 60% of the total estimated compensation due at closing. Thus, payments to rating agencies must be based on the actual performance of the financial assets, not their ratings.

A second area of concern is aligning incentives for proper servicing of the mortgage loans. Therefore, the documents must require that compensation to servicers must include incentives for servicing, including payment for loan restructuring or other loss mitigation activities, which maximizes the net present value of the financial assets in the RMBS.

F. Origination and Retention Requirements

As discussed above and consistent with the Proposal, this final rule imposes conditions addressing origination and retention requirements for all securitizations to provide further incentives for quality origination practices. Because the regulations required under Section 15G of the Securities Exchange Act, 15 U.S.C. 78a *et seq.,* added by Section 941(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act have now gone into effect,[12] the Board has amended this final rule to eliminate the references to the retention requirements for securities issued prior to the effective dates of that rulemaking. Accordingly, the final rule now provides that for any securitization, the documents creating the securitization shall require retention of an economic interest in the credit risk of the financial assets in accordance with the regulations required under Section 15G of the Securities Exchange Act, 15 U.S.C. 78a *et seq.,* added by Section 941(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, including restrictions on sale, pledging and hedging set forth therein.

The Board continues to believe that requiring the sponsor to retain an economic interest in the credit risk relating to each credit tranche or in a representative sample of financial assets will help ensure quality origination practices. A risk retention requirement that did not cover all types of exposure would not be sufficient to create an incentive for quality underwriting at all levels of the securitization. The recent economic crisis made clear that, if quality underwriting is to be assured, it will require true risk retention by sponsors, and that the existence of representations and warranties or regulatory standards for underwriting will not alone be sufficient.

G. Additional Conditions

Consistent with the Proposal, § 709.10(c) of this final rule includes general conditions for securitizations and the transfer of financial assets. These conditions also include requirements that are consistent with good financial institution practices.

The transaction should be an arms-length, bona fide securitization transaction and the documents must limit sales to credit union service organizations in which the sponsor credit union has an interest (other than a wholly-owned credit union service organization consolidated for accounting and capital purposes with the credit union), and insiders of the sponsor. The securitization agreements must be in writing, approved by the board of directors of the credit union or its loan committee (as reflected in the minutes of a meeting of the board of directors or committee), and have been, continuously, from the time of execution, in the official record of the credit union. The securitization must have been entered into in the ordinary course of business, not in contemplation of insolvency and with no intent to hinder, delay or defraud the credit union or its creditors.

The rule applies only to transfers made for adequate consideration. The transfer and/or security interest need to be properly perfected under the Uniform Commercial Code (UCC) or applicable state law. NCUA anticipates that it will be difficult to determine whether a transfer complying with the rule is a sale or a security interest, and therefore expects that a security interest will be properly perfected under the UCC, either directly or as a backup.

The governing documents must require that the sponsor separately identify in its financial asset data bases the financial assets transferred into a securitization and maintain an electronic or paper copy of the closing documents in a readily accessible form, and that the sponsor maintain a current list of all of its outstanding securitizations and issuing entities, and the most recent SEC Form 10–K or other

[11] *See* 12 CFR 1024.41(f) and (g).

[12] 79 FR 77602 (Dec. 24, 2014) (Providing that the effective dates for under the Section 15G Regulations is December 24, 2015 for residential mortgage securitizations and December 24, 2016 for all other securitizations.).

periodic financial report for each securitization and issuing entity. The documents must also provide that if acting as servicer, custodian or paying agent, the sponsor is not permitted to commingle amounts received with respect to the financial assets with its own assets except for the time necessary to clear payments received, and in event for more than two business days. The documents must require the sponsor to make these records available to NCUA promptly upon request. This requirement will facilitate the timely fulfillment of the conservator's or liquidating agent's responsibilities upon appointment and will expedite the conservator's or liquidating agent's analysis of securitization assets. This will also facilitate the conservator's or liquidating agent's analysis of the credit union's assets and determination of which assets have been securitized and are therefore potentially eligible for expedited access by investors.

In addition, the rule requires that the transfer of financial assets and the duties of the sponsor as transferor be evidenced by an agreement separate from the agreement governing the sponsor's duties, if any, as servicer, custodian, paying agent, credit support provider or in any capacity other than transferor.

H. The Safe Harbor

Consistent with the Proposal, § 709.10(d)(1) of the rule continues the safe harbor provision that was provided by the 2000 Rule with respect to participations so long as the participation satisfies the conditions for sale accounting treatment set forth by generally accepted accounting principles. In addition, last-in first-out participations are specifically included in the safe harbor, provided that they satisfy requirements for sale accounting treatment other than the pari-passu, proportionate interest requirement that is not satisfied solely as a result of the last-in first-out structure.

Consistent with the Proposal, § 709.10(d)(2) of the Rule addresses transfers of financial assets made in connection with a securitization for which transfers of financial assets are made after the effective date of this rule or securitizations from a master trust or revolving trust established after the date of adoption of this rule, that (in each case) satisfy the conditions for sale accounting treatment under GAAP in effect for reporting periods after November 15, 2009. For such securitizations, NCUA as conservator or liquidating agent will not, in the exercise of its statutory authority to disaffirm or repudiate contracts, reclaim, recover, or recharacterize as property of the institution or the liquidation estate any such transferred financial assets, provided that such securitizations comply with the conditions set forth in paragraphs (b) and (c) of the rule.

Consistent with the Proposal, § 709.10(d)(3) of the Rule addresses transfers of financial assets in connection with a securitization for which transfers of financial assets were made after the effective date of this rule or securitizations from a master trust or revolving trust established after the date of adoption of the rule, that (in each case) satisfy the conditions set forth in paragraphs (b) and (c), but where the transfer does not satisfy the conditions for sale accounting treatment under GAAP in effect for reporting periods after November 15, 2009.

Consistent with the Proposal, § 709.10(d)(3)(i) provides that if the conservator or liquidating agent is in monetary default due to its failure to pay or apply collections from the financial assets received by it in accordance with the securitization documents, and remains in monetary default for ten business days after actual delivery of a written notice to the conservator or liquidating agent requesting exercise of contractual rights because of such default, the conservator or liquidating agent consents to the exercise of such contractual rights, including any rights to obtain possession of the financial assets or the exercise of self-help remedies as a secured creditor, provided that no involvement of the conservator or liquidating agent is required, other than consents, waivers or the execution of transfer documents reasonably requested in the ordinary course of business in order facilitate the exercise of such contractual rights. This paragraph also provides that the consent to the exercise of such contractual rights shall serve as full satisfaction for all amounts due.

Consistent with the Proposal, § 709.10(d)(3)(ii) provides that, if the conservator or liquidating agent gives a written notice of repudiation of the securitization agreement pursuant to which assets were transferred and does not pay the damages due by reason of such repudiation within ten business days following the effective date of the notice, the conservator or liquidating agent consents to the exercise of any contractual rights, including any rights to obtain possession of the financial assets or the exercise of self-help remedies as a secured creditor, provided that no involvement of the conservator or liquidating agent is required other than consents, waivers or the execution of transfer documents reasonably requested in the ordinary course of business in order facilitate the exercise of such contractual rights. Paragraph 3(d)(ii) also provides that the damages due for these purposes shall be an amount equal to the par value of the obligations outstanding on the date of liquidation less any payments of principal received by the investors through the date of repudiation, plus unpaid, accrued interest through the date of repudiation to the extent actually received through payments on the financial assets received through the date of repudiation, and that upon receipt of such payment all liens on the financial assets created pursuant to the securitization documents shall be released.

In computing amounts payable as repudiation damages, consistent with the FCU Act, the conservator or liquidating agent will not give effect to any provisions of the securitization documents increasing the amount payable based on the appointment of as the conservator or liquidating agent.[13] The rule clarifies that repudiation damages will be equal to the par value of the obligations as of the date of liquidation, less payments of principal received by the investors to the date of repudiation, plus unpaid, accrued interest through the date of repudiation to the extent actually received through payments on the financial assets received through the date of repudiation. The rule also provides that the conservator or liquidating agent consents to the exercise of remedies by investors, including self-help remedies as secured creditors, in the event that NCUA repudiates a securitization transfer agreement and does not pay damages in such amount within ten business days following the effective date of notice of repudiation. Thus, if NCUA repudiates and the investors are not paid the par value of the securitization obligations, plus unpaid, accrued interest through the date of repudiation to the extent actually received through payments on the financial assets received through the date of repudiation, they will be permitted to obtain the asset pool. Accordingly, exercise by the conservator or the liquidating agent of its repudiation rights will not expose investors to market value risks relating to the asset pool.

[13] 12 U.S.C. 1787(c)(13).

I. Consent to Certain Payments and Servicing

Consistent with the Proposal, § 709.10(e) provides that prior to repudiation or, in the case of monetary default, prior to the effectiveness of the consent referred to in § 709.10(d)(3)(i), the conservator or liquidating agent consents to the making of, or if acting as servicer agrees to make, required payments to the investors during the stay period imposed by 12 U.S.C. 1787(c)(13)(C). The rule also provides that the conservator or liquidating agent consents to any servicing activity required in furtherance of the securitization (subject to its rights to repudiate the servicing agreements), in connection with securitizations that meet the conditions set forth in paragraphs (b) and (c) of § 709.10 of the rule.

J. Miscellaneous

Consistent with the Proposal, § 709.10(f) requires that any party requesting consent pursuant to paragraph (d)(3), provide notice to the conservator or liquidating agent, together with a statement of the basis upon which the request is made, together with copies of all documentation supporting the request. This includes a copy of the applicable agreements (such as the transfer agreement and the security agreement) and of any applicable notices under the agreements.

Consistent with the Proposal, § 709.10(g) provides that the conservator or liquidating agent will not seek to avoid an otherwise legally enforceable agreement that is executed by a FICU in connection with a securitization solely because the agreement does not meet the ''contemporaneous'' requirement of 12 U.S.C. 1787(b)(9) and 1788(a)(3).

Consistent with the Proposal, § 709.10(h) of the rule provides that the consents set forth in the rule will not act to waive or relinquish any rights granted to NCUA, the conservator, or the liquidating agent, in any capacity, pursuant to any other applicable law or any agreement or contract except as specifically set forth in the rule, and nothing contained in the section will alter the claims priority of the securitized obligations.

Consistent with the Proposal, § 709.10(i) provides that except as specifically set forth in the rule, the rule does not authorize, and shall not be construed as authorizing the attachment of any involuntary lien upon the property of the conservator or liquidating agent. The rule should not be construed as waiving, limiting or otherwise affecting the rights or powers of NCUA, the conservator, or the liquidating agent to take any action or to exercise any power not specifically mentioned, including but not limited to any rights, powers or remedies of the conservator or the liquidating agent regarding transfers taken in contemplation of the FICU's insolvency or with the intent to hinder, delay or defraud the FICU, or the creditors of such FICU, or that is a fraudulent transfer under applicable law.

The right to consent under 12 U.S.C. 1787(c)(13)(C) may not be assigned or transferred to any purchaser of property from a conservator or liquidating agent, other than to a conservator or bridge credit union. The rule can be repealed by NCUA upon 30 days' notice provided in the **Federal Register**, but any repeal will not apply to any issuance that complied with the rule before such repeal.

III. Regulatory Procedures

1. Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis of any significant economic impact any proposed regulation may have on a substantial number of small entities (primarily those under $100 million in assets).[14] The final rule will apply only to the largest credit unions, as they are the only ones with the infrastructure and resources to securitize assets. Accordingly, the Board certifies it will not have an economic impact on any small credit unions.

2. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to rulemakings in which an agency by rule creates a new paperwork burden on regulated entities or increases an existing burden.[15] For purposes of the PRA, a paperwork burden may take the form of a reporting or recordkeeping requirement, both referred to as information collections. The changes to part 709 impose new information collection requirements.

Estimated PRA Burden: The information collection requirements are related to federal security filings. As discussed above, because this final rule is based on 12 CFR 360.6, the NCUA has also based its information collection requirements on the information collection estimates provided under that regulation. According, NCUA's burden estimates for the applications are as follows:

1. 10K Annual Report

Non Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 1 time per year.
Average Time per Response: 27 hours.
Estimated Annual Burden: 54 hours.
Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 1 time per year.
Average Time per Response: 4.5 hours.
Estimated Annual Burden: 9 hours.

2. 8K Annual Report

Non Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 2 time per year.
Average Time per Response: 27 hours.
Estimated Annual Burden: 108 hours.
Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 2 time per year.
Average Time per Response: 4.5 hours.
Estimated Annual Burden: 18 hours.

3. 10D Annual Report

Non Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 5 time per year.
Average Time per Response: 27 hours.
Estimated Annual Burden: 270 hours.
Reg AB Compliant:
Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 5 time per year.
Average Time per Response: 4.5 hours.
Estimated Annual Burden: 45 hours.

4. 12b–25 Notification

Estimated Number of Respondents: 2.
Affected Public: NCUA-insured credit unions.
Frequency of Response: 2 time per year.
Average Time per Response: 2.5 hours.
Estimated Annual Burden: 10 hours.

3. Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to

[14] 5 U.S.C. 603(a); 12 U.S.C. 1787(c)(1).
[15] 44 U.S.C. 3507(d); 5 CFR part 1320.

consider the impact of their actions on state and local interests. NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order to adhere to fundamental federalism principles. This final rule does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. NCUA has therefore determined that this final does not constitute a policy that has federalism implications for purposes of the executive order.

4. Assessment of Federal Regulations and Policies on Families

NCUA has determined that this rule will not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act, 1999, Public Law 105–277, 112 Stat. 2681 (1998).

5. Small Business Regulatory Enforcement Act Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) (SBREFA) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where NCUA issues a final rule as defined by Section 551 of the Administrative Procedure Act.[16] NCUA does not believe this final rule is a ''major rule'' within the meaning of the relevant sections of SBREFA. As required by SBREFA, NCUA has filed the appropriate reports so that this final rule may be reviewed.

List of Subjects in 12 CFR Part 709

Credit unions, Liquidations.

By the National Credit Union Administration Board, on June 23, 2017.

Gerard Poliquin,

Secretary of the Board.

For the reasons discussed above, the National Credit Union Administration amends 12 CFR part 709 as follows:

PART 709—INVOLUNTARY LIQUIDATION OF FEDERAL CREDIT UNIONS AND ADJUDICATION OF CREDITOR CLAIMS INVOLVING FEDERALLY INSURED CREDIT UNIONS IN LIQUIDATION

■ 1. The authority citation for part 709 continues to read as follows:

Authority: 12 U.S.C. 1757, 1766, 1767, 1786(h), 1787, 1789, 1789a.

■ 2. Revise § 709.10 to read as follows:

[16] 5 U.S.C. 551.

§ 709.10 Treatment of financial assets transferred in connection with a securitization or participation.

(a) *Definitions.*

Financial asset means cash or a contract or instrument that conveys to one entity a contractual right to receive cash or another financial instrument from another entity.

Investor means a person or entity that owns an obligation issued by an issuing entity.

Issuing entity means an entity that owns a financial asset or financial assets transferred by the sponsor and issues obligations supported by such asset or assets. Issuing entities may include, but are not limited to, corporations, partnerships, trusts, and limited liability companies and are commonly referred to as special purpose vehicles or special purpose entities. To the extent a securitization is structured as a multi-step transfer, the term issuing entity would include both the issuer of the obligations and any intermediate entities that may be a transferee. Notwithstanding the foregoing, a Specified GSE or an entity established or guaranteed by a Specified GSE does not constitute an issuing entity.

Monetary default means a default in the payment of principal or interest when due following the expiration of any cure period.

Obligation means a debt or equity (or mixed) beneficial interest or security that is primarily serviced by the cash flows of one or more financial assets or financial asset pools, either fixed or revolving, that by their terms convert into cash within a finite time period, or upon the disposition of the underlying financial assets, and by any rights or other assets designed to assure the servicing or timely distributions of proceeds to the security holders issued by an issuing entity. The term may include beneficial interests in a grantor trust, common law trust or similar issuing entity to the extent that such interests satisfy the criteria set forth in the preceding sentence, but does not include LLC interests, partnership interests, common or preferred equity, or similar instruments evidencing ownership of the issuing entity.

Participation means the transfer or assignment of an undivided interest in all or part of a financial asset, that has all of the characteristics of a ''participating interest,'' from a seller, known as the ''lead,'' to a buyer, known as the ''participant,'' without recourse to the lead, pursuant to an agreement between the lead and the participant. ''Without recourse'' means that the participation is not subject to any agreement that requires the lead to repurchase the participant's interest or to otherwise compensate the participant upon the borrower's default on the underlying obligation.

Securitization means the issuance by an issuing entity of obligations for which the investors are relying on the cash flow or market value characteristics and the credit quality of transferred financial assets (together with any external credit support permitted by this section) to repay the obligations.

Servicer means any entity responsible for the management or collection of some or all of the financial assets on behalf of the issuing entity or making allocations or distributions to holders of the obligations, including reporting on the overall cash flow and credit characteristics of the financial assets supporting the securitization to enable the issuing entity to make payments to investors on the obligations. The term ''servicer'' does not include a trustee for the issuing entity or the holders of obligations that makes allocations or distributions to holders of the obligations if the trustee receives such allocations or distributions from a servicer and the trustee does not otherwise perform the functions of a servicer.

Specified GSE means each of the following:

(1) The Federal National Mortgage Association and any affiliate thereof;

(2) Federal Home Loan Mortgage Corporation and any affiliate thereof;

(3) The Government National Mortgage Association; and

(4) Any Federal or State sponsored mortgage finance agency.

Sponsor means a person or entity that organizes and initiates a securitization by transferring financial assets, either directly or indirectly, including through an affiliate, to an issuing entity, whether or not such person owns an interest in the issuing entity or owns any of the obligations issued by the issuing entity.

Transfer means:

(1) The conveyance of a financial asset or financial assets to an issuing entity; or

(2) The creation of a security interest in such asset or assets for the benefit of the issuing entity.

(b) *Coverage.* This section applies to securitizations that meet the following criteria:

(1) *Capital structure and financial assets.* The documents creating the securitization must define the payment structure and capital structure of the transaction.

(i) *Requirements applicable to all securitizations.* (A) The securitization may not consist of re-securitizations of

obligations or collateralized debt obligations unless the documents creating the securitization require that disclosures required in paragraph (b)(2) of this section are made available to investors for the underlying assets supporting the securitization at initiation and while obligations are outstanding; and

(B) The documents creating the securitization must require that payment of principal and interest on the securitization obligation will be primarily based on the performance of financial assets that are transferred to the issuing entity and, except for interest rate or currency mismatches between the financial assets and the obligations, will not be contingent on market or credit events that are independent of such financial assets. The securitization may not be an unfunded securitization or a synthetic transaction.

(ii) *Requirements applicable only to securitizations in which the financial assets include any residential mortgage loans.* (A) The capital structure of the securitization must be limited to no more than six credit tranches and cannot include ''sub-tranches,'' grantor trusts or other structures. Notwithstanding the foregoing, the most senior credit tranche may include time-based sequential pay or planned amortization and companion sub-tranches; and

(B) The credit quality of the obligations cannot be enhanced at the issuing entity or pool level through external credit support or guarantees. However, the credit quality of the obligations may be enhanced by credit support or guarantees provided by Specified GSEs and the temporary payment of principal and/or interest may be supported by liquidity facilities, including facilities designed to permit the temporary payment of interest following appointment of the NCUA Board as conservator or liquidating agent. Individual financial assets transferred into a securitization may be guaranteed, insured, or otherwise benefit from credit support at the loan level through mortgage and similar insurance or guarantees, including by private companies, agencies or other governmental entities, or government-sponsored enterprises, and/or through co-signers or other guarantees.

(2) *Disclosures.* The documents must require that the sponsor, issuing entity, and/or servicer, as appropriate, will make available to investors, information describing the financial assets, obligations, capital structure, compensation of relevant parties, and relevant historical performance data set forth in this paragraph (b)(2).

(i) *Requirements applicable to all securitizations.* (A) The documents must require that, on or prior to issuance of obligations and at the time of delivery of any periodic distribution report and, in any event, at least once per calendar quarter, while obligations are outstanding, information about the obligations and the securitized financial assets will be disclosed to all potential investors at the financial asset or pool level and security level, as appropriate for the financial assets, to enable evaluation and analysis of the credit risk and performance of the obligations and financial assets. The documents must require that such information and its disclosure, at a minimum, complies with the requirements of Securities and Exchange Commission Regulation AB, or any successor disclosure requirements for public issuances, even if the obligations are issued in a private placement or are not otherwise required to be registered. Information that is unknown or not available to the sponsor or the issuer after reasonable investigation may be omitted if the issuer includes a statement in the offering documents disclosing that the specific information is otherwise unavailable.

(B) The documents must require that, on or prior to issuance of obligations, the structure of the securitization and the credit and payment performance of the obligations will be disclosed, including the capital or tranche structure, the priority of payments, and specific subordination features; representations and warranties made with respect to the financial assets, the remedies for, and the time permitted for cure of any breach of representations and warranties, including the repurchase of financial assets, if applicable; liquidity facilities and any credit enhancements permitted by this rule, any waterfall triggers, or priority of payment reversal features; and policies governing delinquencies, servicer advances, loss mitigation, and write-offs of financial assets.

(C) The documents must require that while obligations are outstanding, the issuing entity will provide to investors information with respect to the credit performance of the obligations and the financial assets, including periodic and cumulative financial asset performance data, delinquency and modification data for the financial assets, substitutions and removal of financial assets, servicer advances, as well as losses that were allocated to such tranche and remaining balance of financial assets supporting such tranche, if applicable, and the percentage of each tranche in relation to the securitization as a whole.

(D) In connection with the issuance of obligations, the documents must disclose the nature and amount of compensation paid to the originator, sponsor, rating agency or third-party advisor, any mortgage or other broker, and the servicer(s), and the extent to which any risk of loss on the underlying assets is retained by any of them for such securitization be disclosed. The securitization documents must require the issuer to provide to investors while obligations are outstanding any changes to such information and the amount and nature of payments of any deferred compensation or similar arrangements to any of the parties.

(ii) *Requirements applicable only to securitizations in which the financial assets include any residential mortgage loans.* (A) Prior to issuance of obligations, sponsors must disclose loan level information about the financial assets including, but not limited to, loan type, loan structure (for example, fixed or adjustable, resets, interest rate caps, balloon payments, etc.), maturity, interest rate and/or Annual Percentage Rate, and location of the property.

(B) Prior to issuance of obligations, sponsors must affirm compliance in all material respects with applicable statutory and regulatory standards for the underwriting and origination of residential mortgage loans. Sponsors must disclose a third-party due diligence report on compliance with such standards and the representations and warranties made with respect to the financial assets.

(C) The documents must require that prior to issuance of obligations and while obligations are outstanding, servicers will disclose any ownership interest by the servicer or an affiliate of the servicer in other whole loans secured by the same real property that secures a loan included in the financial asset pool. The ownership of an obligation, as defined in this regulation, does not constitute an ownership interest requiring disclosure.

(3) *Documentation and recordkeeping.* The documents creating the securitization must specify the respective contractual rights and responsibilities of all parties and include the requirements described in paragraph (b)(3) of this section and use as appropriate any available standardized documentation for each different asset class.

(i) *Requirements applicable to all securitizations.* The documents must define the contractual rights and responsibilities of the parties, including but not limited to representations and

warranties and ongoing disclosure requirements, and any measures to avoid conflicts of interest; and provide authority for the parties, including but not limited to the originator, sponsor, servicer, and investors, to fulfill their respective duties and exercise their rights under the contracts and clearly distinguish between any multiple roles performed by any party.

(ii) *Requirements applicable only to securitizations in which the financial assets include any residential mortgage loans.* (A) Servicing and other agreements must provide servicers with authority, subject to contractual oversight by any master servicer or oversight advisor, if any, to mitigate losses on financial assets consistent with maximizing the net present value of the financial asset. Servicers shall have the authority to modify assets to address reasonably foreseeable default, and to take other action to maximize the value and minimize losses on the securitized financial assets. The documents shall require that the servicers apply industry best practices for asset management and servicing. The documents shall require the servicer to act for the benefit of all investors, and not for the benefit of any particular class of investors, that the servicer maintain records of its actions to permit full review by the trustee or other representative of the investors and that the servicer must commence action to mitigate losses no later than ninety (90) days after an asset first becomes delinquent unless all delinquencies have been cured, *provided* that this requirement will not be deemed to require that the documents include any provision concerning loss mitigation that requires any action that may conflict with the requirements of Regulation X (12 CFR part 1024), as Regulation X may be amended or modified from time to time.

(B) The servicing agreement may not require a primary servicer to advance delinquent payments of principal and interest for more than three payment periods, unless financing or reimbursement facilities are available, which may include, but are not limited to, the obligations of the master servicer or issuing entity to fund or reimburse the primary servicer, or alternative reimbursement facilities. Such ''financing or reimbursement facilities'' under this paragraph may not be dependent for repayment on foreclosure proceeds.

(4) *Compensation.* The following requirements apply only to securitizations in which the financial assets include any residential mortgage loans. Compensation to parties involved in the securitization of such financial assets must be structured to provide incentives for sustainable credit and the long-term performance of the financial assets and securitization as follows:

(i) The documents must require that any fees or other compensation for services payable to credit rating agencies or similar third-party evaluation companies are payable, in part, over the five-year period after the first issuance of the obligations based on the performance of surveillance services and the performance of the financial assets, with no more than sixty percent of the total estimated compensation due at closing; and

(ii) The documents must provide that compensation to servicers will include incentives for servicing, including payment for loan restructuring or other loss mitigation activities, which maximizes the net present value of the financial assets. Such incentives may include payments for specific services, and actual expenses, to maximize the net present value or a structure of incentive fees to maximize the net present value, or any combination of the foregoing that provides such incentives.

(5) *Origination and retention requirements*—(i) *Requirements applicable to all securitizations.* For any securitization, the documents creating the securitization shall require retention of an economic interest in the credit risk of the financial assets in accordance with the regulations required under Section 15G of the Securities Exchange Act, 15 U.S.C. 78a *et seq.,* added by Section 941(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, including restrictions on sale, pledging and hedging set forth therein.

(ii) *Requirements applicable only to securitizations in which the financial assets include any residential mortgage loans.* (A) The documents must require the establishment of a reserve fund equal to at least five (5) percent of the cash proceeds of the securitization payable to the sponsor to cover the repurchase of any financial assets required for breach of representations and warranties. The balance of such fund, if any, must be released to the sponsor one year after the date of issuance.

(B) The documents must include a representation that the assets were originated in all material respects in compliance with statutory, regulatory, and originator underwriting standards in effect at the time of origination. The documents must include a representation that the mortgages included in the securitization were underwritten at the fully indexed rate, based upon the borrowers' ability to repay the mortgage according to its terms, and rely on documented income and comply with all existing all laws, rules, regulations, and guidance governing the underwriting of residential mortgages by federally insured credit unions.

(c) *Other requirements.* (1) The transaction should be an arms-length, bona fide securitization transaction. The documents must require that the obligations issued in a securitization shall not be predominantly sold to a credit union service organization in which the sponsor credit union has an interest (other than a wholly-owned credit union service organization consolidated for accounting and capital purposes with the credit union) or insider of the sponsor;

(2) The securitization agreements are in writing, approved by the board of directors of the credit union or its loan committee (as reflected in the minutes of a meeting of the board of directors or committee), and have been, continuously, from the time of execution in the official record of the credit union;

(3) The securitization was entered into in the ordinary course of business, not in contemplation of insolvency and with no intent to hinder, delay, or defraud the credit union or its creditors;

(4) The transfer was made for adequate consideration;

(5) The transfer and/or security interest was properly perfected under the UCC or applicable state law;

(6) The transfer and duties of the sponsor as transferor must be evidenced in a separate agreement from its duties, if any, as servicer, custodian, paying agent, credit support provider, or in any capacity other than the transferor; and

(7) The documents must require that the sponsor separately identify in its financial asset data bases the financial assets transferred into any securitization and maintain (i) an electronic or paper copy of the closing documents for each securitization in a readily accessible form, (ii) a current list of all of its outstanding securitizations and the respective issuing entities, and (iii) the most recent Securities and Exchange Commission Form 10-K, if applicable, or other periodic financial report for each securitization and issuing entity. The documents must provide that to the extent serving as servicer, custodian, or paying agent for the securitization, the sponsor may not comingle amounts received with respect to the financial assets with its own assets except for the time, not to exceed two business days, necessary to clear any payments received. The documents must require that the sponsor will make these records

readily available for review by NCUA promptly upon written request.

(d) *Safe harbor*—(1) *Participations.* With respect to transfers of financial assets made in connection with participations, the NCUA Board as conservator or liquidating agent will not, in the exercise of its statutory authority to disaffirm or repudiate contracts, reclaim, recover, or recharacterize as property of the credit union or the liquidation estate any such transferred financial assets, provided that such transfer satisfies the conditions for sale accounting treatment under generally accepted accounting principles, except for the ''legal isolation'' condition that is addressed by this section. The foregoing sentence applies to a last-in, first-out participation, provided that the transfer of a portion of the financial asset satisfies the conditions for sale accounting treatment under generally accepted accounting principles that would have applied to such portion if it had met the definition of a ''participating interest,'' except for the ''legal isolation'' condition that is addressed by this section.

(2) *For securitizations meeting sale accounting requirements.* With respect to any securitization for which transfers of financial assets were made after adoption of this rule, or from a master trust or revolving trust established after adoption of this rule, and which complies with the requirements applicable to that securitization as set forth in paragraphs (b) and (c) of this section, the NCUA Board as conservator or liquidating agent will not, in the exercise of its statutory authority to disaffirm or repudiate contracts, reclaim, recover, or recharacterize as property of the credit union or the liquidation estate such transferred financial assets, provided that such transfer satisfies the conditions for sale accounting treatment under generally accepted accounting principles in effect for reporting periods after November 15, 2009, except for the ''legal isolation'' condition that is addressed by this paragraph (d)(2).

(3) *For securitizations not meeting sale accounting requirements.* With respect to any securitization for which transfers of financial assets were made after adoption of this rule, or from a master trust or revolving trust established after adoption of this rule, and which complies with the requirements applicable to that securitization as set forth in paragraphs (b) and (c) of this section, but where the transfer does not satisfy the conditions for sale accounting treatment set forth by generally accepted accounting principles in effect for reporting periods after November 15, 2009, the following conditions apply:

(i) *Monetary default.* If, at any time after appointment, the NCUA Board as conservator or liquidating agent is in a monetary default under a securitization due to its failure to pay or apply collections from the financial assets received by it in accordance with the securitization documents, whether as servicer or otherwise, and remains in monetary default for ten business days after actual delivery of a written notice to the NCUA Board as conservator or liquidating agent pursuant to paragraph (f) of this section requesting the exercise of contractual rights because of such monetary default, the NCUA Board as conservator or liquidating agent hereby consents pursuant to 12 U.S.C. 1787(c)(13)(C) to the exercise of any contractual rights in accordance with the documents governing such securitization, including but not limited to taking possession of the financial assets and exercising self-help remedies as a secured creditor under the transfer agreements, provided no involvement of the conservator or liquidating agent is required other than such consents, waivers, or execution of transfer documents as may be reasonably requested in the ordinary course of business in order to facilitate the exercise of such contractual rights. Such consent does not waive or otherwise deprive the NCUA Board as conservator or liquidating agent or its assignees of any seller's interest or other obligation or interest issued by the issuing entity and held by the conservator or liquidating agent or its assignees, but shall serve as full satisfaction of the obligations of the insured credit union in conservatorship or liquidation and the NCUA Board as conservator or liquidating agent for all amounts due.

(ii) *Repudiation.* If the NCUA Board as conservator or liquidating agent provides a written notice of repudiation of the securitization agreement pursuant to which the financial assets were transferred, and does not pay damages, defined in this paragraph, within ten business days following the effective date of the notice, the NCUA Board as conservator or liquidating agent hereby consents pursuant to 12 U.S.C. 1787(c)(13)(C) to the exercise of any contractual rights in accordance with the documents governing such securitization, including but not limited to taking possession of the financial assets and exercising self-help remedies as a secured creditor under the transfer agreements, provided no involvement of the conservator or liquidating agent is required other than such consents, waivers, or execution of transfer documents as may be reasonably requested in the ordinary course of business in order to facilitate the exercise of such contractual rights. For purposes of this paragraph, the damages due will be in an amount equal to the par value of the obligations outstanding on the date of appointment of the conservator or liquidating agent, less any payments of principal received by the investors through the date of repudiation, plus unpaid, accrued interest through the date of repudiation in accordance with the contract documents to the extent actually received through payments on the financial assets received through the date of repudiation. Upon payment of such repudiation damages, all liens or claims on the financial assets created pursuant to the securitization documents shall be released. Such consent does not waive or otherwise deprive the NCUA Board as conservator or liquidating agent or its assignees of any seller's interest or other obligation or interest issued by the issuing entity and held by the conservator or liquidating agent or its assignees, but serves as full satisfaction of the obligations of the insured credit union in conservatorship or liquidation and the NCUA Board as conservator or liquidating agent for all amounts due.

(iii) *Effect of repudiation.* If the NCUA Board as conservator or liquidating agent repudiates or disaffirms a securitization agreement, it will not assert that any interest payments made to investors in accordance with the securitization documents before any such repudiation or disaffirmance remain the property of the conservatorship or liquidation.

(e) *Consent to certain actions.* Prior to repudiation or, in the case of a monetary default referred to in paragraph (d)(3)(i) of this section, prior to the effectiveness of the consent referred to therein, the NCUA Board as conservator or liquidating agent consents pursuant to 12 U.S.C. 1787(c)(13)(C) to the making of, or if serving as servicer, does make, the payments to the investors to the extent actually received through payments on the financial assets (but in the case of repudiation, only to the extent supported by payments on the financial assets received through the date of the giving of notice of repudiation) in accordance with the securitization documents, and, subject to the conservator's or liquidating agent's rights to repudiate such agreements, consents to any servicing activity required in furtherance of the securitization or, if acting as servicer, the conservator or liquidating agent

performs such servicing activities in accordance with the terms of the applicable servicing agreements, with respect to the financial assets included in securitizations that meet the requirements applicable to that securitization as set forth in paragraphs (b) and (c) of this section.

(f) *Notice for consent.* Any party requesting the NCUA Board's consent as conservator or liquidating agent under 12 U.S.C. 1787(c)(13)(C) pursuant to paragraph (d)(3)(i) of this section must provide notice to the President, NCUA Asset Management & Assistance Center, 4807 Spicewood Springs Road, Suite 5100, Austin TX 78759–8490, and a statement of the basis upon which such request is made, and copies of all documentation supporting such request, including without limitation a copy of the applicable agreements and of any applicable notices under the contract.

(g) *Contemporaneous requirement.* The NCUA Board as conservator or liquidating agent will not seek to avoid an otherwise legally enforceable agreement that is executed by an insured credit union in connection with a securitization or in the form of a participation solely because the agreement does not meet the ''contemporaneous'' requirement of 12 U.S.C. 1787(b)(9) and 1788(a)(3).

(h) *Limitations.* The consents set forth in this section do not act to waive or relinquish any rights granted to NCUA in any capacity, including the NCUA Board as conservator or liquidating agent, pursuant to any other applicable law or any agreement or contract except as specifically set forth herein. Nothing contained in this section alters the claims priority of the securitized obligations.

(i) *No waiver.* This section does not authorize the attachment of any involuntary lien upon the property of the NCUA Board as conservator or liquidating agent. Nor does this section waive, limit, or otherwise affect the rights or powers of NCUA in any capacity, including the NCUA Board as conservator or liquidating agent, to take any action or to exercise any power not specifically mentioned, including but not limited to any rights, powers or remedies of the NCUA Board as conservator or liquidating agent regarding transfers or other conveyances taken in contemplation of the credit union's insolvency or with the intent to hinder, delay or defraud the credit union or the creditors of such credit union, or that is a fraudulent transfer under applicable law.

(j) *No assignment.* The right to consent under 12 U.S.C. 1787(c)(13)(C) may not be assigned or transferred to any purchaser of property from the NCUA Board as conservator or liquidating agent, other than to a conservator or bridge credit union.

(k) *Repeal.* This section may be repealed by NCUA upon 30 days' notice provided in the **Federal Register**, but any repeal does not apply to any issuance made in accordance with this section before such repeal.

Civil Monetary Penalty Inflation Adjustment

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: On January 23, 2017, the NCUA Board (Board) published an interim final rule amending its regulations to adjust the maximum amount of each civil monetary penalty (CMP) within its jurisdiction to account for inflation. This action, including the amount of the adjustments, is required under the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996 and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. This rule finalizes those amendments.

DATES: Effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Ian Marenna, Senior Trial Attorney, at 1775 Duke Street, Alexandria, VA 22314, or telephone: (703) 518–6540.

SUPPLEMENTARY INFORMATION:

I. Background

The Debt Collection Improvement Act of 1996 [1] (DCIA) amended the Federal Civil Penalties Inflation Adjustment Act of 1990 [2] (FCPIA Act) to require every federal agency to enact regulations that adjust each CMP provided by law under its jurisdiction by the rate of inflation at least once every four years. In November 2015, Congress further amended the CMP inflation requirements in the Bipartisan Budget Act of 2015,[3] which contains the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 amendments).[4] This legislation provides for an initial ''catch-up'' adjustment of CMPs in 2016, followed by annual inflation adjustments starting in 2017.

On January 23, 2017, in compliance with the 2015 amendments, the Board published the annual inflation adjustments for 2017 in an interim final rule with a request for comments in the **Federal Register**.[5] In calculating the adjustments, the Board reviewed and applied government-wide guidance issued by the Office of Management and Budget (OMB).[6] In accordance with the procedures and calculations prescribed by the 2015 amendments and OMB's guidance, the Board adjusted the maximum level of each of the CMPs that NCUA has authority to assess. NCUA is not, however, required to assess at the new maximum levels and retains discretion to assess at lower levels, as it has done historically.[7]

The interim final rule became effective on January 23, 2017. The Board received no comments on the rule. Accordingly, this final rule confirms the adjustments made in the interim final rule without change.

II. Regulatory Procedures

Section III of the Supplementary Information in the January 2017 interim final rule sets forth the Board's analyses under the Administrative Procedure Act, the Regulatory Flexibility Act, the Paperwork Reduction Act of 1995, the Small Business Regulatory Enforcement Fairness Act (SBREFA), Executive Order 13132, and the Treasury and General Government Appropriations Act.[8] Because the final rule confirms the interim final rule and does not alter the substance of the analyses and determinations accompanying the interim final rule, the Board continues to rely on those analyses and determinations for purposes of this rulemaking. The Board notes that OMB determined that the interim final rule is not a ''major rule'' within the meaning of SBREFA.

RIN 3133–AD44

Revisions to the Freedom of Information Act Regulation

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: The NCUA Board (Board) is finalizing its interim final rule amending its Freedom of Information Act (FOIA) regulation. The FOIA Improvement Act of 2016 amended the FOIA and required agencies to review their FOIA regulations and issue certain amendments by December 27, 2016. The amendments included revised procedures for disclosing records under the FOIA, assessing fees, and notifying requestors of options for resolving disputes through the NCUA FOIA Public Liaison and the Office of Government Information Services (OGIS) within the National Archives and Records Administration. The interim final rule became effective on December 22, 2016. This rulemaking finalizes the interim rule with minor edits for consistency and clarification.

DATES: Effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Regina Metz, Senior Staff Attorney, or Linda Dent, Associate General Counsel, Administrative Law Section, Office of General Counsel, at 1775 Duke Street, Alexandria, Virginia 22314–3428, or telephone: (703) 518–6540.

SUPPLEMENTARY INFORMATION:

I. Background

On December 22, 2016, NCUA published an interim final rule [1] to revise its FOIA regulation at part 792, subpart A of the agency's regulations [2] in accordance with new requirements under the FOIA Improvement Act of 2016.[3] The interim final rule became effective on December 22, 2016. The NCUA accepted public comments, however, until January 23, 2017.

The interim final rule revised procedures for the disclosure of records, including procedures for engaging in dispute resolution through the FOIA Public Liaison and the OGIS. The revisions were necessary to comply with amendments to the FOIA Improvement Act of 2016. NCUA is issuing this rulemaking to finalize the interim rule with minor wording changes for consistency and clarification.

II. Summary of Public Comments and Final Rule

NCUA received two comments on the interim final rule. One was from a trade organization and one was from an institute. One comment was fully supportive of the Act, noting that the interim rule met all the technical statutory requirements. The comment, however, also urged the NCUA to exceed the requirements and continue to adopt a presumption of openness. NCUA's longstanding FOIA practices include a presumption of openness which will continue under the final rule.

In addition, the commenter believes the NCUA should post every FOIA response to its Web site. The FOIA and the interim final rule, in section 792.03(c), already provide that NCUA must post on its Web site records released in response to a FOIA request that are either: Likely to be the subject of subsequent requests because of the nature of their subject matter; or records that have been requested three or more times. NCUA generally exceeds these requirements, posting on its FOIA page records requested more than once and considering each record requested for possible routine Web site posting. As every record requested, however, is not of interest to the general public, NCUA is adopting this section in the final rule without change.

The other commenter requested that NCUA revise its definition of ''representative of the news media'' in § 792.20 to be consistent with the FOIA at 5 U.S.C. 552(a)(4)(A)(ii) and also to consider additional technical matters. As a change to this definition and the other issue raised were not included in the interim final rule, NCUA will address this in an upcoming technical amendment rule. The final rule does contain minor changes to wording for consistency and clarification.

III. Regulatory Procedures

A. Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act (PRA) of 1995,[4] the Board has reviewed the final rule and determined it does not contain or modify a collection of information subject to the PRA. The PRA applies to rulemakings in which an agency by rule creates a new paperwork burden on regulated entities or increases an existing burden. For purposes of the PRA, a paperwork burden may take the form of a reporting or recordkeeping requirement, both referred to as information collections. Information collected as part of an affidavit, oath, affirmation, certification, receipt, changes of address, consent, or acknowledgment, however, is not considered an information collection for purposes of the PRA.

This category is limited to those disclosures that require persons to provide or display only facts necessary to identify themselves. For example, they entail no burden other than that necessary to identify the respondent, the date, the respondent's address, and the nature of the instrument. ''Nature of the instrument'' refers to a respondent's request for materials, such as publications or other information from an agency. To facilitate such requests for information from an agency, an agency may ask requesters to describe the material or information sought in detail sufficient to describe the individual desires.

The final rule implements the FOIA Improvement Act of 2016 by amending the agency's FOIA regulations. Because the only paperwork burden in this final rule relates to activities that are not considered to be information collections, NCUA has determined that this rule is exempt from the requirements of the PRA.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a rule may have on a substantial number of small credit unions (those under $100 million in assets). This final rule does not impose any requirements on federally insured credit unions. Therefore, it will not have a significant economic impact on a substantial number of small credit unions and a regulatory flexibility analysis is not required. Because this final rule would affect few, if any, small entities, the Board certifies that the final rule will

[4] 44 U.S.C. 3506; 5 CFR part 1320 Appendix A.1.

not have a significant economic impact on small entities.

C. Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order. The final rule would not have substantial direct effects on the states, on the connection between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined that this final rule does not constitute a policy that has federalism implications for purposes of the executive order.

D. The Treasury and General Government Appropriations Act, 1999—Assessment of Federal Regulations and Policies on Families

NCUA has determined that this final rule would not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act of 1999.[5]

E. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where the Board issues a final rule as defined by Section 551 of the APA. The Board submitted the rule to the Office of Management and Budget. It determined the rule is not a ''major rule'' within the meaning of the relevant sections of SBREFA.

List of Subjects in 12 CFR Part 792

Administrative practice and procedure, Credit unions, Freedom of Information, Information, Privacy, Records, System of records.

By the National Credit Union Administration Board on June 22, 2017.

Gerard Poliquin,

Secretary of the Board.

For the reasons stated above, the National Credit Union Administration adopts the interim rule published December 22, 2016, at 81 FR 93792, as final with the following changes:

[5] Public Law 105–277, 112 Stat. 2681.

PART 792—REQUESTS FOR INFORMATION UNDER THE FREEDOM OF INFORMATION ACT AND PRIVACY ACT, AND BY SUBPOENA; SECURITY PROCEDURES FOR CLASSIFIED INFORMATION

■ 1. The authority citation for part 792 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b; 12 U.S.C. 1752a(d), 1766, 1789, 1795f; E.O. 12600, 52 FR 23781, 3 CFR, 1987 Comp., p.235; E.O. 13526, 75 FR 707, 2009 Comp. p.298.

■ 2. In § 792.02, revise the introductory text and paragraph (d) to read as follows:

§ 792.02 What records does NCUA make available to the public for inspection and copying?

Except for records that are exempt from public disclosure under FOIA as amended (5 U.S.C. 552) or are promptly published and copies are available for purchase, NCUA routinely makes the following five types of records available for you to inspect and copy and in an electronic format:

* * * * *

(d) Copies of all records, regardless of form or format, which have been released after March 31, 1997, in response to a FOIA request and which, because of the nature of their subject matter, NCUA determines have been or are likely to become the subject of subsequent requests; or records that have been requested three (3) or more times; and

* * * * *

■ 3. In § 792.03, revise the introductory text and paragraph (c) to read as follows:

§ 792.03 How will I know which records to request?

NCUA maintains current indices providing identifying information for the public for any matter referred to in § 792.02, issued, adopted, or promulgated after July 4, 1967. The listing of material in an index is for the convenience of possible users and does not constitute a determination that all of the items listed will be disclosed. NCUA has determined that publication of the indices is unnecessary and impractical. You may obtain copies of indices by making a request to the NCUA, Office of General Counsel, 1775 Duke Street, Alexandria, VA 22314–2387, Attn: FOIA Officer or as indicated on the NCUA Web site at *www.ncua.gov.* The indices are available for public inspection and copying, provided at their duplication cost, and in an electronic format. The indices are:

* * * * *

(c) Popular FOIA Index: Records released in response to a FOIA request, that NCUA determines are likely to be the subject of subsequent requests because of the nature of their subject matter, or records that have been requested three (3) or more times. The Popular FOIA Index is available on the NCUA Web site.

■ 4. In § 792.10, revise paragraph (e) to read as follows:

§ 792.10 What will NCUA do with my request?

* * * * *

(e) Upon a determination by the appropriate Information Center to comply with your initial request for records, the records will be made promptly available to you. NCUA will also advise you of the right to seek assistance from the FOIA Public Liaison. If we notify you of a denial of your request, we will include the reason for the denial. NCUA will also advise you of the right to utilize dispute resolution services offered by the FOIA Public Liaison and the Office of Government Information Services.

* * * * *

■ 5. In § 792.11, revise paragraph (a)(5) to read as follows:

§ 792.11 What kinds of records are exempt from public disclosure?

(a) * * *

(5) Inter-agency or intra-agency memoranda or letters which would not be available by law to a private party in litigation with NCUA. This exemption preserves the existing freedom of NCUA officials and employees to engage in full and frank written or taped communications with each other and with officials and employees of other agencies. It includes, but is not limited to, inter-agency and intra-agency reports, memoranda, letters, correspondence, work papers, and minutes of meetings, as well as staff papers prepared for use within NCUA or in concert with other governmental agencies. In applying this exemption, the NCUA will not withhold records based on the deliberative process privilege if the records were created 25 years or more before the date on which the records were requested.

* * * * *

■ 6. In § 792.15, revise paragraph (b)(2) to read as follows:

§ 792.15 How long will it take to process my request?

* * * * *

(b) * * *

(2) Such alternative time period as mutually agreed by you and the Information Office, when NCUA notifies

you that the request cannot be processed in the specified time limit. In such cases, NCUA will make available its FOIA Public Liaison and notify you of the right to seek dispute resolution services from the Office of Government Information Services.

■ 7. In § 792.16, revise paragraph (c) to read as follows:

§ 792.16 What unusual circumstances can delay NCUA's response?

* * * * *

(c) If NCUA sends you an extension notice, it will also advise you that you can either limit the scope of your request so that it can be processed within the statutory time limit or agree to an alternative time frame for processing your request. In such cases, NCUA will make available its FOIA Public Liaison and notify you of the right to seek dispute resolution services from the Office of Government Information Services.

■ 8. Revise § 792.17 to read as follows:

§ 792.17 What can I do if the time limit passes and I still have not received a response?

(a) If NCUA does not comply with the time limits under § 792.15, or as extended under § 792.16, you do not have to pay search fees; requesters qualifying for free search fees will not have to pay duplication fees. However, if NCUA has extended the time limits under § 792.16 and must review more than 5,000 pages to respond to the request, NCUA may charge you search fees (or for requesters qualifying for free search fees, duplication fees), if NCUA has discussed with you via written mail, electronic mail, or telephone (or made not less than 3 good-faith attempts to do so) how you could effectively limit the scope of the request.

(b) You can seek assistance from the FOIA Public Liaison or dispute resolution services from the Office of Government Information Services. You also can file suit against NCUA because you will be deemed to have exhausted your administrative remedies if NCUA fails to comply with the time limit provisions of this subpart. If NCUA can show that exceptional circumstances exist and that it is exercising due diligence in responding to your request, the court may retain jurisdiction and allow NCUA to complete its review of the records. You may have to pay search or duplication fees if a court has determined that exceptional circumstances exist and has extended the time limits for NCUA's response by a court order. In determining whether exceptional circumstances exist, the court may consider your refusal to modify the scope of your request or arrange an alternative time frame for processing after being given the opportunity to do so by NCUA, when it notifies you of the existence of unusual circumstances as set forth in § 792.16.

■ 9. In § 792.28, revise the introductory text to read as follows:

§ 792.28 What if I am not satisfied with the response I receive?

If you are not satisfied with NCUA's response to your request, you can seek dispute resolution services from the FOIA Public Liaison and the Office of Government Information Services, and you can file an administrative appeal. Your appeal must be in writing and must be filed within 90 days from receipt of the initial determination (in cases of denials of the entire request or denials of a fee waiver or reduction), or from receipt of any records being made available pursuant to the initial determination (in cases of partial denials). In the response to your initial request, the Freedom of Information Act Officer or the Inspector General (or designee), will notify you that you may appeal any adverse determination to the Office of General Counsel. The General Counsel, or designee, as set forth in this paragraph, will:

BILLING CODE 7535–01–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Parts 1024 and 1026

[Docket No. CFPB–2017–0016]

Policy Guidance on Supervisory and Enforcement Priorities Regarding Early Compliance With the 2016 Amendments to the 2013 Mortgage Rules Under the Real Estate Settlement Procedures Act (Regulation X) and the Truth in Lending Act (Regulation Z)

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Policy guidance.

SUMMARY: The Consumer Financial Protection Bureau (Bureau) is issuing policy guidance on its supervisory and enforcement priorities regarding early compliance with the final rule it issued in August 2016 (2016 Mortgage Servicing Final Rule) amending certain of the Bureau's mortgage servicing rules.

DATES: The Bureau released this Policy Guidance on its Web site on June 27, 2017.

FOR FURTHER INFORMATION CONTACT: Joel L. Singerman, Counsel, or Laura A. Johnson, Senior Counsel, Office of Regulations, at 202–435–7700.

SUPPLEMENTARY INFORMATION:

I. Summary

On August 4, 2016, the Bureau issued the 2016 Mortgage Servicing Final Rule clarifying, revising, or amending certain of the Bureau's mortgage servicing rules.[1] Each of the changes will take effect on either Thursday, October 19, 2017, or Thursday, April 19, 2018.[2] The Bureau has heard concerns that these midweek effective dates for the 2016 Mortgage Servicing Final Rule could create operational challenges for servicers. The Bureau understands that, for many servicers, the Thursday effective dates could afford less than a full day—from the close of business overnight on each of the preceding Wednesdays—to update and test systems in order to be compliant with the 2016 amendments. If servicers do not have sufficient time to complete these tasks, their systems may be more likely to produce errors, which could expose servicers and consumers to risk. Industry participants have notified the Bureau that implementing the 2016 Mortgage Servicing Final Rule during the weekend, with early compliance beginning on the Monday before each of the respective Thursday effective dates, would address these concerns.

The Bureau understands industry's concerns and believes that, in the context of the 2016 Mortgage Servicing Final Rule, servicers and consumers are likely to benefit if servicers have the weekend immediately before each of the effective dates to update and test their systems. The Bureau does not, therefore, intend to take supervisory or enforcement action for violations of existing Regulation X or Regulation Z resulting from a servicer's compliance with the 2016 Mortgage Servicing Final Rule occurring up to three days before the applicable effective dates. For these purposes, ''up to three days before the applicable effective dates'' means, for the amendments that will take effect on Thursday, October 19, 2017, the period of Monday, October 16, through Wednesday, October 18, 2017; and, for the amendments that will take effect on Thursday, April 19, 2018, the period of Monday, April 16, through Wednesday, April 18, 2018.

[1] Amendments to the 2013 Mortgage Rules under the Real Estate Settlement Procedures Act (Regulation X) and the Truth in Lending Act (Regulation Z), 81 FR 72160 (Oct. 19, 2016).

[2] *See id.* at 72160, 72349–50.

II. Regulatory Requirements

This Policy Guidance is a non-binding general statement of policy articulating considerations relevant to the Bureau's exercise of its supervisory and enforcement authority. It is therefore exempt from notice and comment rulemaking requirements under the Administrative Procedure Act pursuant to 5 U.S.C. 553(b). Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis. 5 U.S.C. 603(a), 604(a). The Bureau has determined that this Policy Guidance does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring OMB approval under the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.*

Dated: June 26, 2017.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.

Modernization of the Customs Brokers Examination

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Final rule.

SUMMARY: This document adopts as a final rule, with changes, the amendments proposed to the U.S. Customs and Border Protection (CBP) regulations concerning the customs broker's examination provisions. Specifically, this rule transitions the examination to a computer automated customs broker examination, adjusts the dates of the examination to account for the fiscal year transition period and payment schedule requirements, and increases the examination fee to cover the cost of delivering the exam.

DATES: Effective July 31, 2017.

FOR FURTHER INFORMATION CONTACT: Julia Peterson, Chief, Broker Management Branch, Office of Trade, U.S. Customs and Border Protection, (202) 863–6601, *julia.peterson@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

Section 641 of the Tariff Act of 1930, as amended (19 U.S.C. 1641), provides, among other things, that a person (an individual, corporation, association, or partnership) must hold a valid customs broker's license and permit in order to transact customs business on behalf of others, sets forth standards for the issuance of a broker's license and permit, and provides for disciplinary action against brokers that have engaged in specific infractions. This section also provides that an examination may be conducted to assess an applicant's qualifications for a license.

The regulations issued under the authority of section 641 are set forth in title 19 of the Code of Federal Regulations, part 111 (19 CFR part 111). Part 111 sets forth the regulations regarding, among other things, the licensing of, and granting of permits to, persons desiring to transact customs business as customs brokers. These regulations also include the qualifications required of applicants and the procedures for applying for licenses and permits, including examination procedures and requirements.

Currently, a customs broker's examination consists of a paper test booklet and a scannable answer sheet which is administered by the Office of Personnel Management (OPM). CBP supplements OPM's resources by providing CBP officials to proctor the examination and space to conduct the examination. There is a $200 fee to take the examination. This fee, which has not changed since 2000, currently does not cover the administrative costs of the paper-based examination as the costs of administering the examination have increased. At the same time that CBP is looking to update its fee to reflect the costs of administering the exam, OPM has informed CBP that it will no longer administer the paper-based examination and it is shifting all the examinations it administers to an electronic format.

On September 14, 2016, CBP published a document in the **Federal Register** (81 FR 63149) proposing to amend title 19 of the Code of Federal Regulations (''19 CFR'') to modernize the customs broker's examination provisions. Specifically, CBP proposed amending the customs broker's examination provisions, which are contained in 19 CFR part 111, to permit automation of the examination. CBP proposed removing references to the ''written'' examination to accommodate the transition from the paper and pencil format to an electronic format; and proposed removing the requirement that CBP grade the examinations to permit officials at the Office of Personnel Management (OPM) or OPM contractors to grade the examinations. CBP proposed removing the reference to ''Headquarters'' to allow CBP offices nationwide to assist in preparing the examination. CBP also proposed moving the examination dates to the fourth Monday in April and October to allow more time between the start of the federal fiscal year and the October examination date. To cover the costs of administering the examination, plus the cost of automating the examination, CBP proposed to increase the fee. CBP proposed removing the special examination provision because it was unnecessary. Finally, to better reflect CBP's organizational structure, CBP proposed updating the information on whom to contact when an applicant either would miss an examination, or would file an appeal of examination results. CBP proposed these changes to benefit both applicants and CBP. For applicants, automation would standardize the testing environment and equipment for all examinations, and provide earlier notification of test scores. For CBP, automation would provide for a more efficient use of CBP staff and administrative resources. The notice of proposed rulemaking requested public comments. The public comment period closed on November 14, 2016.

Discussion of Comments

Eight comments were received in response to the notice of proposed rulemaking.

Comment: Six commenters sought clarification about the transition from a paper and pencil format to computer automated examinations as described in

the proposed rule. Three of them requested an additional explanation of how the removal of ''written'' from the description of the examination in the proposed regulations determined the examination format. One commenter suggested replacing ''written'' with another term, such as ''multiple choice,'' to describe the exact examination format in the regulations.

CBP Response: CBP disagrees that the regulations need to define a specific form of examination. CBP is removing the term ''written'' to describe the examination from the regulation to provide flexibility in the transition from the paper and pen format to delivering the examination via computer. For that reason, CBP is not limiting the examination format by including specific parameters, such as ''multiple choice.'' CBP understands the applicants' desire for transparency on the type of question (*e.g.* multiple choice, true/false, essay) that will appear on the examination; therefore, CBP will provide guidance to the public on *CBP.gov* prior to the administration of the electronic examination.

Comment: Several commenters raised specific questions about the process of taking the new electronic examination. Commenters asked whether applicants could choose a testing site; whether applicants could bring electronic reference materials to the site, and, if not, whether they would have sufficient space to use their paper reference materials and receive scrap paper for solving problems; whether they could change their answers during the allotted time; whether they could skip questions and return to them later; and whether the computer program would track skipped questions for the examinee. Commenters also asked whether CBP would have a contingency plan for technical difficulties, whether CBP was going to test the automated examination program before requiring it nationwide, whether it would provide a practice test, when it would provide the answer key, and when it would provide the results to the applicants.

CBP Response: CBP understands the concerns about a new examination format; thus CBP will provide guidance to the public on *CBP.gov* prior to the administration of the electronic examination.

The selection of an examination location depends on the information in the application. Applicants select their business port when they register for the customs broker's examination; CBP assigns the applicants to the exam locations closest to their selected port. With the examination location notification, CBP will provide the applicant with contingency plans for system failures, power outages, and other site-related breakdowns or emergencies. The examination sites themselves will offer ample room for hard copies of reference material, and the guidance on *CBP.gov* will describe the permitted reference materials. Applicants will receive scrap paper at examination sites. The examination sites, however, will provide access to only one computer monitor per examinee: Applicants will not have access to a second monitor or be permitted to access reference materials on-line.

The electronic examination itself will allow applicants to skip answers, to return to skipped or completed answers, and to change their answers during the examination period. After the broker's examination development team completes its testing of the electronic examination, CBP will provide a link to a sample practice examination so that applicants can familiarize themselves with the format and how to navigate within the examination. The guidance CBP will provide on *CBP.gov* will include information on how and when CBP anticipates it will provide a copy of the examination and its answer key. CBP will post the examination online at *CBP.gov* after the completion of all the examinations at all examination locations. CBP will post the examination answer key on *CBP.gov* after it vets the examination results.

Comment: Several commenters questioned the examination fee increase to $390, or requested more information about the basis for the increase in the fee. They compared the new fee to other licensing fees, and the increase in the examination fee to increases resulting from inflation or changes in the cost of living since 2000; and stated that the fee would be expensive for individuals beginning their trade careers. Commenters questioned how automation could be so expensive when it would save administrative resources.

CBP Response: CBP appreciates that the fee may be expensive for some individuals but CBP disagrees that its examination fee increase is too high as it is set to cover CBP's costs to provide the exam under the new exam process. The fee is not being changed merely to adjust the existing fee for inflation, or to bring it in line with licensing fees for exams in unrelated fields, but to reflect CBP's costs of providing the exam. The Office of Personnel Management has informed CBP that it will soon no longer administer the current paper based examination. Instead, the exam will now be electronic and provided at private testing centers. While the automation itself saves money by reducing the time spent preparing and grading the exam, the need to rent testing centers with professional proctors will increase the overall exam costs. The increase in costs over time due to inflation, coupled with the need to change to an all-electronic exam administered at private testing centers, makes it necessary to increase the customs broker exam fee from $200 to $390 for CBP to recover all of its costs to administer the customs broker exam.

Comment: Commenters said that an individual's brokerage does not always reimburse for the cost of the exam and that $390 would be a large expense for individuals.

CBP Response: CBP acknowledges that not all brokerages reimburse their employees for the cost of the exam and some only reimburse their employees when they pass the exam. This is consistent with the analysis that indicates only that there is some portion of brokerages who do reimburse their employees and that there are brokers who are sole proprietors. This discussion takes place in the Regulatory Flexibility Act section of this document, which analyzes the impact on small entities. Small entities, as defined by the Regulatory Flexibility Act, includes small businesses but does not include individuals (other than sole proprietors). Therefore, the cost to individuals was not analyzed in this section. For an analysis of the costs of this rule to all parties, see the Executive Orders 13563, 12866, and 13771 and Regulatory Flexibility Act sections in this notice.

Comment: Several commenters requested additional information on what costs were covered by the fee.

CBP Response: As requested, CBP has revised the administrative costs section in the fee study to include a more detailed description of what is included in the costs for informational purposes. Exam administration costs are the costs associated with administering the customs broker license exam. CBP contracts with the U.S. Office of Personnel Management (OPM) to administer the exam. The contracted services include, but are not limited to: The development of the exam onto an electronic platform, the renting of testing locations, the providing of equipment and proctors, the grading of the exam, the mailing of individual score sheets to each examinee, and the providing to CBP of an array of exam metrics including distractor analysis and frequency distribution. The fee study documenting the proposed fee changes, entitled ''Customs Broker License Examination Fee Study,'' has

been included in the docket of this rulemaking (Docket No. USCBP–2016–0059). As stated in the fee study, there were two inputs to determining the new examination fee—the costs to both CBP and OPM and the number of examinees. The cost of administering the examination is increasing to $390 because CBP now has to hire professional proctors and rent out formal testing centers instead of using port staff to proctor the exam and port facilities to administer the exam.

Comment: Several commenters objected to eliminating the special examination provision, mentioned CBP had applied the provision in 2001, and requested that it remain, in case of extenuating circumstances or unforeseen emergencies.

CBP Response: CBP agrees and will retain the special examination provision at 19 CFR 111.13(c) with changes to reflect that the special examination will also be modernized to allow for electronic testing. In addition, CBP changed the provision to require that special examination requests be submitted to the Executive Assistant Commissioner, Office of Trade.

Comment: Although no one objected to moving the customs broker's examination dates later in April and October, several commenters suggested that neither Monday nor Friday were ideal dates for business reasons.

CBP Response: CBP agrees that moving the exam administration date to the fourth Wednesday in October and in April would be beneficial. Accordingly, CBP changed the administration date from the fourth Monday to the fourth Wednesday in 19 CFR 111.13(b).

Conclusion

Accordingly, after review of the comments and further consideration, CBP has decided to adopt as final, with the changes discussed above, and grammatical corrections, the proposed rule published in the **Federal Register** (81 FR 63149) on September 14, 2016. Specifically, the final rule will change the examination dates to the fourth Wednesday in April and October (not the fourth Monday); and, will retain the special examination provision with changes in § 111.13(c) (19 CFR 111.13(c)).

Executive Orders 13563, 12866, and 13771

Executive Orders 12866 (''Regulatory Planning and Review'') and 13563 (''Improving Regulation and Regulatory Review'') direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (''Reducing Regulation and Controlling Regulatory Costs'') directs agencies to reduce regulation and control regulatory costs and provides that ''for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.''

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed it. As this rule is not a significant regulatory action, this rule is exempt from the requirements of Executive Order 13771. *See* OMB's Memorandum ''Guidance Implementing Executive Order 13771, Titled 'Reducing Regulation and Controlling Regulatory Costs' '' (April 5, 2017).

1. Purpose of the Rule

Customs brokers are private individuals and/or business entities (partnerships, associations or corporations) that are regulated and empowered by CBP to assist importers and exporters in meeting federal requirements governing imports and exports. Customs brokers have an enormous responsibility to their clients and to CBP that requires them to properly prepare importation and exportation documentation, file these documents timely and accurately, classify and value goods properly, pay duties and fees, and safeguard their clients' information.

CBP currently licenses brokers who meet a certain set criteria. One criterion is that each prospective broker must first pass a broker license exam. CBP's current paper-based examination method will soon no longer be available and so CBP is shifting to an all-electronic exam. The all-electronic exam has benefits to both CBP and the trade, such as a faster processing time, which lets examinees know their results more quickly and efficiently, and a significant reduction in administrative duties for CBP employees. However, administering this new electronic exam is also more expensive. Additionally, the current $200 fee does not cover the costs of the current paper exam. CBP is therefore increasing the examination fee from $200 to $390 in order to fully cover all of CBP's costs of administering the broker examination.

CBP is also changing the date of the semi-annual customs broker exam from the first Monday in October and April to the fourth Wednesday in October and April for easier administration.

2. Background

It is CBP's responsibility to ensure that only qualified individuals and business entities can perform customs business on another party's behalf. The first step in meeting the eligibility requirements for a customs broker license requires an individual to pass the customs broker license examination. Currently paper-based, the customs broker examination is an open-book examination consisting of 80 multiple-choice questions.

An individual currently must meet the following criteria in order to be eligible to take the customs broker examination:

- Be a U.S. citizen at least 18 years of age; [1]
- Not be an employee of the U.S. federal government; and
- Pay a $200 examination fee.

The customs broker examination is offered semi-annually, in April and October, and an examinee has four and a half (4.5) hours to complete it. Based on prior year exams from 2004 to 2013, CBP estimates that there will be approximately 2,600 examinees per year, or 1,300 examinees per session. Currently the broker exam is given at 50 testing locations around the country. CBP anticipates that changing the exam format from paper-based to electronic would result in no change in the number of testing locations in the country; the only change would be the type of testing location. The exam is currently administered at hotels and ports throughout the country. In the future, the exam will instead be held at privately operated formal testing locations.

Beginning in October 2017, the current paper testing option will no longer be available and the broker examination will be fully electronic. Despite the higher costs of an electronic exam, it has many favorable features which would benefit both CBP and the examinees, including shorter wait times for examinees to get their test results and a reduction in the time CBP staff

[1] Although U.S. citizens at least 18 years old may take the broker license exam, a U.S. citizen must be at least 21 years old to apply to become a licensed customs broker. An individual has three years, from the time the individual takes the customs broker exam, to apply to become a licensed customs broker.

spends on administrative matters related to the exam, such as arranging facility space for and proctoring the exam, fielding questions from examinees and mailing test result notices.

3. Costs

As discussed above, CBP currently charges a $200 fee for the customs broker license examination. This fee is used to offset the costs associated with providing the services necessary to operate the customs broker license examination. Based on a recently completed fee study entitled, ''Customs Broker License Examination Fee Study,'' CBP has determined that these fees are no longer sufficient to cover its costs.[2] Currently, examinees go to either a port or to a rented event space in a hotel to take the paper exam with a 35-page test booklet and a scannable answer sheet, which must subsequently be collected and graded. The new all-electronic version of the exam will be administered entirely on a computer where the examinees answer the questions directly on the screen and the exam is graded automatically. As the electronic exam uses all private facilities with professional proctors, this automated method will be more expensive than the paper exam. Furthermore, the current fee is not enough to cover even the current costs of administering the exam. Exam administration costs include the development of the exam in an electronic platform, the renting of testing locations, the providing of equipment and proctors, the grading of the exam, the mailing of individual score sheets to each examinee, and the providing to CBP of an array of exam metrics including distractor analysis and frequency distribution. As stated above, the current $200 fee has not been changed since 2000. According to data provided by CBP's Broker Management Branch, administrative and testing costs have increased since the fee was last changed. This increase in administrative fees coupled with switching to an all-electronic exam administered at private testing centers, makes it necessary to increase the customs broker exam fee from $200 to $390 for CBP to recover all of its costs to administer the customs broker exam.

CBP has determined that the fee of $390 is necessary to recover the costs associated with administering the customs broker license examination once the exam is made electronic. The customs broker examination is an established service provided by CBP that already requires a fee payment. Absent this rule, CBP would be operating the exam at a loss and this fee is intended to offset that loss. As such, a change in the fee is not a net cost to society, but rather a transfer payment from test takers to the government.[3] CBP does recognize, however, that the fee change may have a distributional impact on prospective customs brokers. In order to inform stakeholders of all potential effects of the final rule, CBP has analyzed the distributional effects of the final rule in section ''5. Distributional Impact.''

4. Benefits

As discussed above, CBP is increasing the customs broker license examination fee from $200 to $390. The broker exam fee was last changed in 2000 when it was reduced from $300 to the current fee of $200. The lower cost paper-based examination that is currently being administered is being replaced by an all-electronic exam in an effort to fully modernize the customs broker testing procedure. This fee increase will allow CBP to fully recover all of its costs, including those to provide a fully electronic version of the customs broker examination beginning in October 2017. As discussed above, the fee increase is neither a cost nor a benefit of this rule since the broker exam fee is already an established fee. Thus, the fee increase is considered a transfer payment. As stated above, in order to inform stakeholders of all potential effects of the final rule, CBP has analyzed the distributional effects of the final rule in section ''5. Distributional Impact.''

In addition to increasing the examination fee, CBP is changing the date the examination is given from the first Monday in October and April to the fourth Wednesday in October and April. Administering the examination on the first Monday in October is administratively difficult because it is too close to the conclusion of the Federal Government's fiscal year at the end of September. With this rule's changes, CBP and the examinees will benefit through greater predictability in years where federal budgets are uncertain.

5. Distributional Impact

Under the final rule, the customs broker license examination fee will increase from $200 to $390 in order for CBP to fully recover all of its costs to administer the broker examination. As noted above, these costs are increasing due to a shift in the administration of the exam that will go into effect beginning with the October 2017 exam.

The customs broker license examination fee will cost individuals an additional $190 when they register to take the customs broker license examination. As discussed above, CBP estimates that there will be 2,600 examinees per year (1,300 per session) who will take the customs broker license examination. Using this estimate and the additional cost that each examinee will incur, CBP estimates that the fee increase will result in a transfer payment to the government of approximately $494,000 per year (2,600 examinees per year * $190 proposed fee increase = $494,000).

Regulatory Flexibility Act

This section examines the impact of the rule on small entities as required by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996 (SBREFA). A small entity may be a small business (defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act); a small not-for-profit organization; or a small governmental jurisdiction (locality with fewer than 50,000 people).

The final rule will apply to all prospective brokers who take the broker exam. The fee is paid by the individual taking the broker exam and individuals are not considered small entities under the Regulatory Flexibility Act. However, some of these individuals are sole proprietors or may be reimbursed for this expense by their brokerage, so we consider the impact on these entities. The U.S. Census Bureau categorizes customs brokers (as well as freight forwarders and marine shipping agents) under the North American Industry Classification (NAICS) code 488510. As shown in Exhibit 1 below, approximately 96 percent of business entities in this NAICS code are small. As this rule will affect any prospective broker or his/her employer, regardless of its size, this rule has an impact on a substantial number of small entities.

The direct impact of this rule on each individual customs broker examinee, or his/her employer, is the fee increase of $190. To assess whether this is a significant impact, we examine the annual revenue for customs brokers. The U.S. Census Bureau categorizes customs brokers under the NAICS code 488510. In addition to customs brokers, this NAICS code also includes freight

[2] The fee study is included in the docket of this rulemaking (Docket No. USCBP–2016–0059).

[3] Transfer payments are monetary payments from one group to another that do not affect total resources available to society. See OMB Circular A–4.

forwarders and marine shipping agents.[4] The Small Business Administration (SBA) publishes size standards that determine the criteria for being considered a small entity for the purposes of this analysis. The SBA considers a business entity classified under the 488510 NAICS code as small if it has less than $15 million in annual receipts. We obtained the number of firms in each revenue category provided by the U.S. Census Bureau (see Exhibit 1 below). To estimate the average revenue of all firms under this NAICS code, we first assumed that each firm in each revenue category had receipts of the midpoint of the range. For example, we assumed that the 4,354 firms with annual receipts of between $100,000 and $499,000 had average receipts of $300,000. We then used the number of firms in each category to calculate the weighted average revenue across all small firms. Using this method, we estimate that the weighted average revenue for small businesses in this NAICS code is $1,496,197. The $190 increase in the broker exam fee, then, represents 0.01 percent of the weighted average annual revenue for brokers. CBP does not consider 0.01 percent of revenue per exam to be a significant impact. Accordingly, CBP certifies that this rule does not have a significant economic impact on a substantial number of small entities.

EXHIBIT 1—BUSINESS ENTITY DATA FOR NAICS CODE 488510

Annual receipts ($) (Midpoint)	Number of firms	Small
<100,000 (50,000)	1,834	Yes.
100,000–499,999 (300,000)	4,354	Yes.
500,000–999,999 (750,000)	2,040	Yes.
1,000,000–2,499,999 (1,750,000)	2,300	Yes.
2,500,000–4,999,999 (3,750,000)	1,087	Yes.
5,000,000–7,499,999 (6,250,000)	427	Yes.
7,500,000–9,999,999 (8,750,000)	242	Yes.
10,000,000–14,999,999 (12,500,000)	233	Yes.
>15,000,000	548	No.
Total	13,065	96 Percent are Small (12,517/13,065).

Signing Authority

This document is being issued in accordance with 19 CFR 0.2(a), which provides that the authority of the Secretary of the Treasury with respect to CBP regulations that are not related to customs revenue functions was transferred to the Secretary of Homeland Security pursuant to section 403(l) of the Homeland Security Act of 2002. Accordingly, this final rule to amend such regulations may be signed by the Secretary of Homeland Security (or his delegate).

List of Subjects in 19 CFR Part 111

Administrative practice and procedure, Brokers, Customs duties and inspection, Penalties, Reporting and recordkeeping requirements.

Amendments to the CBP Regulations

For the reasons given above, part 111 of title 19 of the Code of Federal Regulations (19 CFR part 111) is amended as set forth below:

PART 111—CUSTOMS BROKERS

■ 1. The authority citation for part 111 continue to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1624, 1641.

Section 111.3 also issued under 19 U.S.C. 1484, 1498;

Section 111.96 also issued under 19 U.S.C. 58c, 31 U.S.C. 9701.

§ 111.11 [Amended]

■ 2. In § 111.11, paragraph (a)(4) is amended by removing the words ''a written'' and adding in its place the word ''an''.

§ 111.12 [Amended]

■ 3. In § 111.12, paragraph (a) is amended by removing the word ''written'' from the two places that it appears in the fifth and sixth sentences.

§ 111.13 [Amended]

■ 4. In § 111.13:

■ a. The section heading is revised;

■ b. Paragraph (a) is amended by:

■ 1. Removing the word ''written'' in the first sentence;

■ 2. Removing the words ''and graded at'' in the second sentence and adding in their place the word ''by''; and

■ 3. Removing the phrase ''Headquarters, Washington, DC'' from the second sentence;

■ c. Paragraphs (b) through (d) and (f) are revised.

The revisions read as follows:

§ 111.13 Examination for individual license.

* * * * *

(b) *Basic requirements, date, and place of examination.* In order to be eligible to take the examination, an individual must on the date of examination be a citizen of the United States who has attained the age of 18 years and who is not an officer or employee of the United States Government. CBP will publish a notice announcing each examination on its Web site. Examinations will be given on the fourth Wednesday in April and October unless the regularly scheduled examination date conflicts with a national holiday, religious observance, or other foreseeable event and the agency publishes in the **Federal Register** an appropriate notice of a change in the examination date. An individual who intends to take the examination must complete the electronic application at least 30 calendar days prior to the scheduled examination date and must remit the $390 examination fee prescribed in § 111.96(a) at that time. CBP will give notice of the exact time and place for the examination.

(c) *Special examination.* If a partnership, association, or corporation loses the required member or officer

[4] *http://www.census.gov/cgi-bin/sssd/naics/naicsrch?code=488510&search=2012%20NAICS%20Search.*

having an individual broker's license (see § 111.11(b) and (c)(2)) and its license would be revoked by operation of law under the provisions of 19 U.S.C. 1641(b)(5) and § 111.45(a) before the next scheduled examination, CBP may authorize a special examination for a prospective applicant for an individual license who would serve as the required licensed member or officer. CBP may also authorize a special examination for an individual for purposes of continuing the business of a sole proprietorship broker. A special examination for an individual may also be authorized by CBP if a brokerage firm loses the individual broker who was exercising responsible supervision and control over an office in another district (see § 111.19(d)) and the permit for that additional district would be revoked by operation of law under the provisions of 19 U.S.C. 1641(c)(3) and § 111.45(b) before the next scheduled examination. A request for a special examination must be submitted to the Executive Assistant Commissioner, Office of Trade, in writing and must describe the circumstances giving rise to the need for the examination. If the request is granted, the Executive Assistant Commissioner, Office of Trade or his/her designee, will notify the prospective examinee of the exact time and place for the examination. If the individual attains a passing grade on the special examination, the application for the license may be submitted in accordance with § 111.12. The examinee will be responsible for all additional costs incurred by CBP in preparing and administering the special examination that exceed the $390 examination fee prescribed in § 111.96(a), and those additional costs must be reimbursed to CBP before the examination is given.

(d) *Failure to appear for examination.* If a prospective examinee advises the Office of Trade at the Headquarters of U.S. Customs and Border Protection, Attn: Broker Management Branch, electronically in a manner specified by CBP at least 2 working days prior to the date of a regularly scheduled examination that he will not appear for the examination, CBP will refund the $390 examination fee referred to in paragraph (b) of this section. No refund of the examination fee or additional reimbursed costs will be made in the case of a special written examination provided for under paragraph (c) of this section.

* * * * *

(f) *Appeal of failing grade on examination.* If an examinee fails to attain a passing grade on the examination taken under this section, the examinee may challenge that result by filing a written appeal with the Office of Trade at the Headquarters of U.S. Customs and Border Protection, Attn: Broker Management Branch, within 60 calendar days after the date of the written notice provided for in paragraph (e) of this section. CBP will provide to the examinee written notice of the decision on the appeal. If the CBP decision on the appeal affirms the result of the examination, the examinee may request review of the decision on the appeal by writing to the Executive Assistant Commissioner, Office of Trade, U.S. Customs and Border Protection, within 60 calendar days after the date of the notice on that decision.

§ 111.96 [Amended]

■ 5. In § 111.96:

■ a. Paragraph (a) is amended by removing the word ''written'' from the second sentence and removing the phrase ''$200 examination fee'' in the second sentence and adding in its place the phrase ''$390 examination fee''; and

■ b. Paragraph (e) is amended by removing the words ''United States Customs Service'' and adding in their place the words ''U.S. Customs and Border Protection, or paid by other CBP-approved payment method''.

Dated: June 27, 2017.

Elaine C. Duke,

Deputy Secretary.

RIN 1545–BN74

Regulations Regarding Withholding of Tax on Certain U.S. Source Income Paid to Foreign Persons, Information Reporting and Backup Withholding on Payments Made to Certain U.S. Persons, and Portfolio Interest Treatment; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to final and temporary regulations (TD 9808), which were published in the **Federal Register** on Friday, January 6, 2017 (82 FR 2046). These regulations are related to withholding of tax on certain U.S. source income paid to foreign persons, information reporting and backup withholding with respect to payments made to certain U.S. persons, and portfolio interest paid to nonresident alien individuals and foreign corporations.

DATES:

Effective Date: These corrections are effective June 30, 2017.

Applicability Date: The corrections to §§ 1.1441–0; 1.1441–1(b)(7)(ii)(B), (e)(3)(iv)(B) and (C), (e)(4)(ii)(B)(*11*), (e)(4)(ix)(D), (e)(5)(ii) through (e)(5)(ii)(B), (e)(5)(ii)(D) through (e)(5)(v)(B)(*3*), (e)(5)(v)(B)(*5*) through (e)(5)(v)(D), and (f) through (f)(4); 1.1441–1T; 1.1441–3(d)(1); 1.1441–4; 1.6045–1(m)(2)(ii) and (n)(12)(ii); and 1.6049–5(c)(1) through (c)(4) are applicable on January 6, 2017.

FOR FURTHER INFORMATION CONTACT: Nancy Lee, (202) 317–6942 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations that are the subject of these corrections are §§ 1.1441–0, 1.1441–1, 1.1441–1T, 1.1441–3, 1.1441–4, 1.6045–1, and 1.6049–5, promulgated under sections 1441, 6045, 6049, and 7805 of the Internal Revenue Code. These regulations affect persons making payments of U.S. source income to foreign persons and persons making payments to certain U.S. persons subject to reporting and backup withholding.

Need for Correction

As published, the final regulations contain a number of items that need to be corrected or clarified. Several portions of TD 9808 could not be incorporated due to inaccurate amendatory instructions. Most of the correcting amendments to TD 9808 are needed to clarify or correct the results of these inaccurate amendatory instructions. The correcting amendments also include the addition, deletion, or modification of regulatory language to clarify the relevant provisions to meet their intended purposes, specifically to make a conforming change to the entry in the table of contents (§ 1.1441–0) for § 1.1441–1(e)(4)(ix); to correct typographical errors in §§ 1.1441–1(e)(4)(ix)(D), 1.1441–1T(c)(3)(ii), and 1.1441–3(d)(1); to clarify that allowances for electronic signatures in § 1.1441–1T(e)(4)(i)(B) and use of third party repository in § 1.1441–1T(e)(4)(iv)(E) are limited to Forms W–8; to remove an obsolete cross-reference

to § 1.1441–4(h); and to return § 1.6045–1(m)(2)(ii) and (n)(12)(ii) to the way those provisions read prior to unnecessary revisions in TD 9808.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Correction of Publication

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendments:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.1441–0 is amended by adding an entry for § 1.1441–1(e)(4)(viii)(C); revising the entries for § 1.1441–1(e)(4)(ix), (e)(5)(v)(A), (f), and (f)(2); and removing the entries for § 1.1441–1(f)(2)(i) and (ii).

The addition and revisions read as follows:

§ 1.1441–0 Outline of regulation provisions for section 1441.

* * * * *

§ 1.1441–1 Requirement for the deduction and withholding of tax on payments to foreign persons.

* * * * *

(e) * * *

(4) * * *

(viii) * * *

(C) Reliance on a prior version of a withholding certificate.

(ix) Certificates to be furnished to withholding agent for each obligation unless exception applies.

* * * * *

(5) * * *

(v) * * *

(A) In general.

* * * * *

(f) Effective/applicability date.

* * * * *

(2) Lack of documentation for past years.

* * * * *

■ **Par. 3.** Section 1.1441–1 is amended by:

■ 1. Adding paragraph (b)(7)(ii)(B);

■ 2. Adding paragraphs (e)(3)(iv)(B) and (C);

■ 3. Revising paragraph (e)(4)(ii)(B)(*11*);

■ 4. Revising the last sentence of paragraph (e)(4)(ix)(D);

■ 5. Revising paragraphs (e)(5)(ii) introductory text through (e)(5)(ii)(B);

■ 6. Removing paragraph (e)(5)(ii)(C) and redesignating paragraph (e)(5)(ii)(D) as new paragraph (e)(5)(ii)(C);

■ 7. Adding new paragraph (e)(5)(ii)(D) and removing paragraph (e)(5)(ii)(E);

■ 8. Revising paragraphs (e)(5)(iii) through (e)(5)(v)(B)(*3*);

■ 9. Adding paragraph (e)(5)(v)(B)(*5*) through (e)(5)(v)(D); and

■ 10. Revising the heading of paragraph (f), and paragraphs (f)(1) through (4).

The addition and revisions read as follows:

§ 1.1441–1 Requirement for the deduction and withholding of tax on payments to foreign persons.

* * * * *

(b) * * *

(7) * * *

(ii) * * *

(B) [Reserved]. For further guidance, see § 1.1441–1T(b)(7)(ii)(B).

* * * * *

(e) * * *

(3) * * *

(iv) * * *

(B) *General requirements.* A withholding statement must be provided prior to the payment of a reportable amount and must contain the information specified in paragraph (e)(3)(iv)(C) of this section. The statement must be updated as often as required to keep the information in the withholding statement correct prior to each subsequent payment. The withholding statement forms an integral part of the withholding certificate provided under paragraph (e)(3)(iii) of this section, and the penalties of perjury statement provided on the withholding certificate shall apply to the withholding statement. The withholding statement may be provided in any manner the nonqualified intermediary and the withholding agent mutually agree, including electronically. If the withholding statement is provided electronically as part of a system established by the withholding agent or nonqualified intermediary to provide the statement, however, there must be sufficient safeguards to ensure that the information received by the withholding agent is the information sent by the nonqualified intermediary and all occasions of user access that result in the submission or modification of the withholding statement information must be recorded. In addition, the electronic system must be capable of providing a hard copy of all withholding statements provided by the nonqualified intermediary. A withholding statement may otherwise be transmitted by a nonqualified intermediary via email or facsimile to a withholding agent under the requirements specified in paragraph (e)(4)(iv)(D) of this section (substituting the term withholding statement for the term Form W–8 or the term document, as applicable). A withholding agent will be liable for tax, interest, and penalties in accordance with paragraph (b)(7) of this section to the extent it does not follow the presumption rules of paragraph (b)(3) of this section or §§ 1.1441–5(d) and (e)(6), and 1.6049–5(d) for any payment of a reportable amount, or portion thereof, for which it does not have a valid withholding statement prior to making a payment. A withholding agent may not treat as valid an allocation of a payment to a chapter 4 withholding rate pool of U.S. payees described in paragraph (e)(3)(iv)(A) of this section or an allocation of a payment to a chapter 4 withholding rate pool of recalcitrant account holders described in paragraph (e)(3)(iv)(C)(*2*) of this section unless the withholding agent identifies the nonqualified intermediary maintaining the account (as described in § 1.1471–5(b)(5)) as a participating FFI (including a reporting Model 2 FFI) or registered deemed-compliant FFI (including a reporting Model 1 FFI) by applying the rules of § 1.1471–3(d)(4). Additionally, in the case of a withholdable payment that is an amount subject to withholding made on or after April 1, 2017, a withholding agent may not treat as valid an allocation of the payment to a chapter 4 withholding rate pool of U.S. payees unless the nonqualified intermediary identifies the pool of U.S. payees as one described in § 1.1471–3(c)(3)(iii)(B)(*2*)(*iii*) (or by describing such payees consistent with the description provided in § 1.1471–3(c)(3)(ii)(B)(*2*)(*iii*)).

(C) *Content of withholding statement.* The withholding statement provided by a nonqualified intermediary must contain the information required by this paragraph (e)(3)(iv)(C).

(*1*) *In general.* Except as otherwise provided by paragraph (e)(3)(iv)(C)(*2*) and (*3*) of this section), the withholding statement provided by a nonqualified intermediary must contain the information required by this paragraph (e)(3)(iv)(C)(*1*).

(*i*) Except as otherwise provided in (e)(3)(iv)(A) of this section (which excludes reporting of information with respect to certain U.S. persons on the withholding statement), the withholding statement must contain the name, address, TIN (if any), and the type of documentation (documentary evidence, Form W–9, or type of Form W–8) for every person from whom documentation has been received by the nonqualified intermediary and provided to the withholding agent and whether that person is a U.S. exempt recipient, a U.S. non-exempt recipient, or a foreign person. See paragraphs (c)(2), (20), and

(21) of this section for the definitions of foreign person, U.S. exempt recipient, and U.S. non-exempt recipient. In the case of a foreign person, the statement must indicate whether the foreign person is a beneficial owner or an intermediary, flow-through entity, U.S. branch, or territory financial institution described in paragraph (b)(2)(iv) of this section and include the type of recipient, based on recipient codes applicable for chapter 3 purposes used for filing Forms 1042–S, if the foreign person is a recipient as defined in § 1.1461–1(c)(1)(ii).

(*ii*) The withholding statement must allocate each payment, by income type, to every payee required to be reported on the withholding statement for whom documentation has been provided (including U.S. exempt recipients except as provided in paragraph (e)(3)(iv)(A) of this section). Any payment that cannot be reliably associated with valid documentation from a payee shall be treated as made to an unknown payee in accordance with the presumption rules of paragraph (b) of this section and §§ 1.1441–5(d) and (e)(6) and 1.6049–5(d). For this purpose, a type of income is determined by the types of income required to be reported on Forms 1042–S or 1099, as appropriate. Notwithstanding the preceding sentence, deposit interest (including original issue discount) described in section 871(i)(2)(A) or 881(d) and interest or original issue discount on short-term obligations as described in section 871(g)(1)(B) or 881(e) is only required to be allocated to the extent it is required to be reported on Form 1099 or Form 1042–S. See § 1.6049–8 (regarding reporting of bank deposit interest to certain foreign persons). If a payee receives income through another nonqualified intermediary, flow-through entity, or U.S. branch or territory financial institution described in paragraph (e)(2)(iv) of this section (other than a U.S. branch or territory financial institution treated as a U.S. person), the withholding statement must also state, with respect to the payee, the name, address, and TIN, if known, of the other nonqualified intermediary or U.S. branch from which the payee directly receives the payment or the flow-through entity in which the payee has a direct ownership interest. If another nonqualified intermediary, flow-through entity, or U.S. branch fails to allocate a payment, the name of the nonqualified intermediary, flow-through entity, or U.S. branch that failed to allocate the payment shall be provided with respect to such payment.

(*iii*) If a payee is identified as a foreign person, the nonqualified intermediary must specify the rate of withholding to which the payee is subject, the payee's country of residence and, if a reduced rate of withholding is claimed, the basis for that reduced rate (*e.g.,* treaty benefit, portfolio interest, exempt under section 501(c)(3), 892, or 895). The allocation statement must also include the TINs of those foreign persons for whom such a number is required under paragraph (e)(4)(vii) of this section or § 1.1441–6(b)(1) (regarding claims for treaty benefits for which a TIN is provided unless a foreign tax identifying number described in § 1.1441–6(b)(1) is provided). In the case of a claim of treaty benefits, the nonqualified intermediary's withholding statement must also state whether the limitation on benefits and section 894 statements required by § 1.1441–6(c)(5) have been provided, if required, in the beneficial owner's Form W–8 or associated with such owner's documentary evidence.

(*iv*) The withholding statement must also contain any other information the withholding agent reasonably requests in order to fulfill its obligations under chapter 3 and chapter 61 of the Code, and section 3406.

(*2*) *Nonqualified intermediary withholding statement for withholdable payments.* This paragraph (e)(3)(iv)(C)(*2*) modifies the requirements of a withholding statement described in paragraph (e)(3)(iv)(C)(*1*) of this section that is provided by a nonqualified intermediary with respect to a reportable amount that is a withholdable payment. For such a payment, the requirements applicable to a withholding statement described in paragraph (e)(3)(iv)(A) through (e)(3)(iv)(C)(*1*) of this section shall apply, except that—

(*i*) The withholding statement must include the chapter 4 status (using the applicable status code used for filing Form 1042–S) and GIIN (when required for chapter 4 purposes under § 1.1471–3(d)) of each other intermediary or flow-through entity that is a foreign person and that receives the payment, excluding an intermediary or flow-through entity that is an account holder of or interest holder in a withholding foreign partnership, withholding foreign trust, or intermediary acting as a qualified intermediary for the payment;

(*ii*) If the nonqualified intermediary that is a participating FFI or registered deemed-compliant FFI provides a withholding statement described in § 1.1471–3(c)(3)(iii)(B)(*2*) (describing an FFI withholding statement), the withholding statement may include chapter 4 withholding rate pools with respect to the portions of the payment allocated to nonparticipating FFIs and recalcitrant account holders (to the extent permitted on an FFI withholding statement described in that paragraph) in lieu of providing specific payee information with respect to such persons on the statement (including persons subject to chapter 4 withholding) as described in paragraph (e)(3)(iv)(C)(*1*) of this section;

(*iii*) If the nonqualified intermediary provides a withholding statement described in § 1.1471–3(c)(3)(iii)(B)(*3*) (describing a chapter 4 withholding statement), the withholding statement may include chapter 4 withholding rate pools with respect to the portions of the payment allocated to nonparticipating FFIs; and

(*iv*) For a payment allocated to a payee that is a foreign person (other than a person included in a chapter 4 withholding rate pool described in paragraphs (e)(3)(iv)(C)(*2*)(*ii*) and (*iii*) of this section) that is reported on a withholding statement described in § 1.1471–3(c)(3)(iii)(B)(*2*) or (*3*), the withholding statement must include the chapter 4 status of the payee (unless an exception applies for purposes of providing such status under chapter 4) and, for a payee other than an individual, the recipient code for chapter 4 purposes used for filing Form 1042–S; and

(*v*) To the extent that a withholdable payment is not reportable on a Form 1042–S, Form 1099 under the rules of chapter 61, or Form 8966 ''FATCA Report,'' no allocation of the payment is required on the withholding statement.

(*3*) [Reserved]. For further guidance, see § 1.1441–1T(e)(3)(iv)(C)(*3*).

(*4*) *Example.* This example illustrates the principles of paragraph (e)(3)(iv)(C) of this section. WA makes a withholdable payment of U.S. source dividends to NQI, a nonqualified intermediary. NQI provides WA with a valid intermediary withholding certificate under paragraph (e)(3)(iii) of this section that includes NQI's certification of its status for chapter 4 purposes as a participating FFI. NQI provides a withholding statement on which NQI allocates 20% of the payment to a chapter 4 withholding rate pool of recalcitrant account holders of NQI for purposes of chapter 4 and allocates 80% of the payment equally to A and B, individuals that are account holders of NQI. NQI also provides WA with valid beneficial owner withholding certificates from A and B establishing their status as foreign persons entitled to a 15% rate of withholding under an applicable income tax treaty. Because NQI has certified its status as a participating FFI, withholding under chapter 4 is not required with respect to NQI. See § 1.1471–2(a)(4). Based on the documentation NQI provided to WA with respect to A and B, WA can reliably associate

the payment with valid documentation on the portion of the payment allocated to them and, because the payment is a withholdable payment, may rely on the allocation of the payment for NQI's recalcitrant account holders in a chapter 4 withholding rate pool in lieu of payee information with respect to such account holders. See paragraph (e)(3)(iv)(C)(*2*) of this section for the special rules for a withholding statement provided by a nonqualified intermediary for a withholdable payment. Also see § 1.1471–2(a) for WA's withholding requirements under chapter 4 with respect to the portion of the payment allocated to NQI's recalcitrant account holders and § 1.1441–3(a)(2) for coordinating withholding under chapter 3 for payments to which withholding is applied under chapter 4.

* * * * *

(4) * * *

(ii) * * *

(B) * * *

(*11*) Documentary evidence that is not generally renewed or amended (such as a certificate of incorporation).

* * * * *

(ix) * * *

(D) * * * See § 1.1471–3(c)(9)(v) for a similar reliance rule that applies for purposes of chapter 4.

(5) * * *

(ii) *Definition of qualified intermediary.* With respect to a payment to a foreign person, the term qualified intermediary means a person that is a party to a withholding agreement with the IRS where such person is—

(A) A foreign financial institution that is a participating FFI (including a reporting Model 2 FFI), a registered deemed-compliant FFI (including a reporting Model 1 FFI), an FFI treated as a deemed-compliant FFI under an applicable IGA that is subject to due diligence and reporting requirements with respect to its U.S. accounts similar to those applicable to a registered deemed-compliant FFI under § 1.1471–5(f)(1), excluding a U.S. branch of any of the foregoing entities, or any other category of FFI identified in a qualified intermediary withholding agreement as eligible to act as a qualified intermediary;

(B) A foreign branch or office of a U.S. financial institution or a foreign branch or office of a U.S. clearing organization that is either a reporting Model 1 FFI or agrees to the reporting requirements applicable to a participating FFI with respect to its U.S. accounts;

* * * * *

(D) Any other person acceptable to the IRS.

(iii) *Withholding agreement*—(A) *In general.* The IRS may, upon request, enter into a withholding agreement with a foreign person described in paragraph (e)(5)(ii) of this section pursuant to such procedures as the IRS may prescribe in published guidance (see § 601.601(d)(2) of this chapter). Under the withholding agreement, a qualified intermediary shall generally be subject to the applicable withholding and reporting provisions applicable to withholding agents and payors under chapters 3, 4, and 61 of the Code, section 3406, the regulations under those provisions, and other withholding provisions of the Code, except to the extent provided under the agreement.

(B) *Terms of the withholding agreement.* The withholding agreement shall specify the obligations of the qualified intermediary under chapters 3 and 4 including, for a qualified intermediary that is an FFI, the documentation, withholding, and reporting obligations required of a participating FFI or registered deemed-compliant FFI (including a reporting Model 1 FFI as defined in § 1.1471–1(b)(114)) with respect to each branch of the qualified intermediary other than a U.S. branch that is treated as a U.S. person under paragraph (b)(2)(iv)(A) of this section. The withholding agreement will specify the type of certifications and documentation upon which the qualified intermediary may rely to ascertain the classification (*e.g.,* corporation or partnership), status (*i.e.,* U.S. or foreign and chapter 4 status) of beneficial owners and payees who receive reportable amounts, reportable payments, and withholdable payments collected by the qualified intermediary for purposes of chapters 3, 4, and 61, section 3406, and, if necessary, entitlement to the benefits of a reduced rate under an income tax treaty. The withholding agreement shall specify if, and to what extent, the qualified intermediary may assume primary withholding responsibility in accordance with paragraph (e)(5)(iv) of this section. It shall also specify the extent to which applicable return filing and information reporting requirements are modified so that, in appropriate cases, the qualified intermediary may report payments to the IRS on an aggregated basis, without having to disclose the identity of beneficial owners and payees. However, the qualified intermediary may be required to provide to the IRS the name and address of those foreign customers who benefit from a reduced rate under an income tax treaty pursuant to the withholding agreement for purposes of verifying entitlement to such benefits, particularly under an applicable limitation on benefits provision. Under the withholding agreement, a qualified intermediary may agree to act as an acceptance agent to perform the duties described in § 301.6109–1(d)(3)(iv)(A) of this chapter. The withholding agreement may specify the manner in which applicable procedures for adjustments for underwithholding and overwithholding, including refund procedures, apply to qualified intermediaries and the extent to which applicable procedures may be modified. In particular, a withholding agreement may allow a qualified intermediary to claim refunds of overwithheld amounts. In addition, the withholding agreement shall specify the manner in which the IRS will verify compliance with the agreement, including the time and manner for which a qualified intermediary will be required to certify to the IRS regarding its compliance with the withholding agreement (including its performance of a periodic review) and the types of information required to be disclosed as part of the certification. In appropriate cases, the IRS may require review procedures be performed by an approved reviewer (in addition to those performed as part of the periodic review) and may conduct a review of the reviewer's findings. The withholding agreement may include provisions for the assessment and collection of tax in the event that failure to comply with the terms of the withholding agreement results in the failure by the withholding agent or the qualified intermediary to withhold and deposit the required amount of tax. Further, the withholding agreement may specify the procedures by which amounts withheld are to be deposited, if different from the deposit procedures under the Code and applicable regulations. To determine whether to enter a withholding agreement and the terms of any particular withholding agreement, the IRS will consider the type of local know-your-customer laws and practices to which the entity is subject (if the entity is an FFI), as well as the extent and nature of supervisory and regulatory control exercised under the laws of the foreign country over the foreign entity.

(iv) *Assignment of primary withholding responsibility.* Any person (whether a U.S. person or a foreign person) who meets the definition of a withholding agent under § 1.1441–7(a) (for payments subject to chapter 3 withholding) and § 1.1473–1(d) (for withholdable payments) is required to withhold and deposit any amount withheld under §§ 1.1461–1(a) and 1.1474–1(b) and to make the returns prescribed by §§ 1.1461–1(b) and (c), and by 1.1474–1(c), and (d). Under its qualified intermediary withholding

agreement, a qualified intermediary may, however, inform a withholding agent from which it receives a payment that it will assume the primary obligation to withhold, deposit, and report amounts under chapters 3 and 4 of the Code and/or under chapter 61 and section 3406 of the Code. For assuming withholding obligations as described in the previous sentence, a qualified intermediary that assumes primary withholding responsibility for payments made to an account under chapter 3 is also required to assume primary withholding responsibility under chapter 4 for payments made to the account that are withholdable payments. Additionally, a qualified intermediary may represent that it assumes chapter 61 reporting and section 3406 obligations for a payment when the qualified intermediary meets the requirements of § 1.6049–4(c)(4)(i) or (ii) for the payment. If a withholding agent makes a payment of an amount subject to withholding under chapter 3, a reportable payment (as defined in section 3406(b)), or a withholdable payment to a qualified intermediary that represents to the withholding agent that it has assumed primary withholding responsibility for the payment, the withholding agent is not required to withhold on the payment. The withholding agent is not required to determine that the qualified intermediary actually performs its primary withholding responsibilities. A qualified intermediary that assumes primary withholding responsibility under chapters 3 and 4 or primary reporting and backup withholding responsibility under chapter 61 and section 3406 is not required to assume primary withholding responsibility for all accounts it has with a withholding agent but must assume primary withholding responsibility for all payments made to any one account that it has with the withholding agent.

(v) *Withholding statement*—(A) *In general.* A qualified intermediary must provide each withholding agent from which it receives reportable amounts as a qualified intermediary with a written statement (the withholding statement) containing the information specified in paragraph (e)(5)(v)(B) of this section. A withholding statement is not required, however, if all of the information a withholding agent needs to fulfill its withholding and reporting requirements is contained in the withholding certificate. The qualified intermediary withholding agreement will require the qualified intermediary to include information in its withholding statement relating to withholdable payments for purposes of withholding under chapter 4 as described in paragraph (e)(5)(v)(C)(*2*) of this section. The withholding statement forms an integral part of the qualified intermediary's qualified intermediary withholding certificate, and the penalties of perjury statement provided on the withholding certificate shall apply to the withholding statement as well. The withholding statement may be provided in any manner, and in any form, to which qualified intermediary and the withholding agent mutually agree, including electronically. If the withholding statement is provided electronically, the statement must satisfy the requirements described in paragraph (e)(3)(iv) of this section (applicable to a withholding statement provided by a nonqualified intermediary). The withholding statement shall be updated as often as necessary for the withholding agent to meet its reporting and withholding obligations under chapters 3, 4, and 61 and section 3406. For purposes of this section, a withholding agent will be liable for tax, interest, and penalties in accordance with paragraph (b)(7) of this section to the extent it does not follow the presumption rules of paragraph (b)(3) of this section, §§ 1.1441–5(d) and (e)(6), and 1.6049–5(d) for a payment, or portion thereof, for which it does not have a valid withholding statement prior to making a payment.

(B) *Content of withholding statement.* The withholding statement must contain sufficient information for a withholding agent to apply the correct rate of withholding on payments from the accounts identified on the statement and to properly report such payments on Forms 1042–S and Forms 1099, as applicable. The withholding statement must—

(*1*) Designate those accounts for which the qualified intermediary acts as a qualified intermediary;

(*2*) Designate those accounts for which qualified intermediary assumes primary withholding responsibility under chapter 3 and chapter 4 of the Code and/or primary reporting and backup withholding responsibility under chapter 61 and section 3406;

(*3*) If applicable, designate those accounts for which the qualified intermediary is acting as a qualified securities lender with respect to a substitute dividend paid in a securities lending or similar transaction;

* * * * *

(*5*) Provide information regarding withholding rate pools, as described in paragraph (e)(5)(v)(C) of this section.

(C) *Withholding rate pools*—(*1*) *In general.* Except to the extent it has assumed both primary withholding responsibility under chapters 3 and 4 of the Code and primary Form 1099 reporting and backup withholding responsibility under chapter 61 and section 3406 with respect to a payment, a qualified intermediary shall provide as part of its withholding statement the chapter 3 withholding rate pool information that is required for the withholding agent to meet its withholding and reporting obligations under chapters 3 and 61 of the Code and section 3406. See, however, paragraph (e)(5)(v)(C)(*2*) of this section for when a qualified intermediary may provide a chapter 4 withholding rate pool (as described in paragraph (c)(48) of this section) with respect to a payment that is a withholdable payment. A chapter 3 withholding rate pool is a payment of a single type of income, determined in accordance with the categories of income reported on Form 1042–S, that is subject to a single rate of withholding paid to a payee that is a foreign person and for which withholding under chapter 4 does not apply. A chapter 3 withholding rate pool may be established by any reasonable method on which the qualified intermediary and a withholding agent agree (*e.g.,* by establishing a separate account for a single chapter 3 withholding rate pool, or by dividing a payment made to a single account into portions allocable to each chapter 3 withholding rate pool). A qualified intermediary may include a separate pool for account holders that are U.S. exempt recipients or may include such accounts in a chapter 3 withholding rate pool to which withholding does not apply. The withholding statement must identify the chapter 4 exemption code (as provided in the instructions to Form 1042–S) applicable to the chapter 3 withholding rate pools contained on the withholding statement. To the extent a qualified intermediary does not assume primary Form 1099 reporting and backup withholding responsibility under chapter 61 and section 3406, a qualified intermediary's withholding statement must establish a separate withholding rate pool for each U.S. non-exempt recipient account holder that the qualified intermediary has disclosed to the withholding agent unless the qualified intermediary uses the alternative procedures in paragraph (e)(5)(v)(C)(*3*) of this section or the account holder is a payee that the qualified intermediary is permitted to include in a chapter 4 withholding rate pool of U.S. payees. A qualified intermediary that is a participating FFI or registered deemed- compliant FFI

may include a chapter 4 withholding rate pool of U.S. payees on a withholding statement by applying the rules under paragraph (e)(3)(iv)(A) of this section (by substituting ''qualified intermediary'' for ''nonqualified intermediary'') with respect to an account that it maintains (as described in § 1.1471–5(b)(5)) for the payee of the payment. A qualified intermediary shall determine withholding rate pools based on valid documentation that it obtains under its withholding agreement with the IRS, or if a payment cannot be reliably associated with valid documentation, under the applicable presumption rules. If a qualified intermediary has an account holder that is another intermediary (whether a qualified intermediary or a nonqualified intermediary) or a flow- through entity, the qualified intermediary may combine the account holder information provided by the other intermediary or flow-through entity with the qualified intermediary's direct account holder information to determine the qualified intermediary's chapter 3 withholding rate pools and each of the qualified intermediary's chapter 4 withholding rate pools to the extent provided in its withholding agreement with the IRS.

(*2*) *Withholding rate pool requirements for a withholdable payment.* This paragraph (e)(5)(v)(C)(*2*) modifies the requirements of a withholding statement described in paragraph (e)(5)(v)(C)(*1*) of this section provided by a qualified intermediary with respect to a withholdable payment (including a reportable amount that is a withholdable payment). For such a payment, the regulations applicable to a withholding statement described in paragraph (e)(5)(v)(C)(*1*) of this section shall apply, except that—

(*i*) If the qualified intermediary provides a withholding statement described in § 1.1471–3(c)(3)(iii)(B)(*2*) (describing an FFI withholding statement), the withholding statement may include a chapter 4 withholding rate pool with respect to the portion of the payment allocated to a single pool of recalcitrant account holders (without the need to subdivide into the pools described in § 1.1471–4(d)(6)), including both account holders of the qualified intermediary and of any participating FFI, registered deemed-compliant FFI, or other qualified intermediary for whom the first-mentioned qualified intermediary receives the payment, and nonparticipating FFIs (to the extent permitted) in lieu of reporting chapter 3 withholding rate pools with respect to such persons as described in paragraph (e)(5)(v)(C)(*1*) of this section); or

(*ii*) If the qualified intermediary provides a withholding statement described in § 1.1471–3(c)(3)(iii)(B)(*3*) (describing a chapter 4 withholding statement), the withholding statement may include a chapter 4 withholding rate pool with respect to the portion of the payment allocated to nonparticipating FFIs.

(*3*) *Alternative procedure for U.S. non-exempt recipients.* If permitted under its withholding agreement with the IRS, a qualified intermediary may, by mutual agreement with a withholding agent, establish a single zero withholding rate pool that includes U.S. non-exempt recipient account holders for whom the qualified intermediary has provided Forms W–9 prior to the withholding agent paying any reportable payments, as defined in the qualified intermediary withholding agreement, and foreign persons for which no withholding is required under chapters 3 and 4, and may include payments allocated to a chapter 4 withholding rate pool of U.S. payees. In such a case, the qualified intermediary may also establish a separate withholding rate pool (subject to 28-percent withholding, or other applicable statutory back-up withholding tax rate) that includes only U.S. non-exempt recipient account holders for whom a qualified intermediary has not provided Forms W–9 prior to the withholding agent paying any reportable payments. If a qualified intermediary chooses the alternative procedure of this paragraph (e)(5)(v)(C)(*3*), the qualified intermediary must provide the information required by its withholding agreement to the withholding agent no later than January 15 of the year following the year in which the payments are paid. Failure to provide such information will result in the application of penalties to the qualified intermediary under sections 6721 and 6722, as well as any other applicable penalties, and may result in the termination of the qualified intermediary's withholding agreement with the IRS. A withholding agent shall not be liable for tax, interest, or penalties for failure to backup withhold or report information under chapter 61 of the Code due solely to the errors or omissions of the qualified intermediary. If a qualified intermediary fails to provide the allocation information required by this paragraph (e)(5)(v)(C)(*3*), with respect to U.S. non-exempt recipients, the withholding agent shall report the unallocated amount paid from the withholding rate pool to an unknown recipient, or otherwise in accordance with the appropriate Form 1099 and the instructions accompanying the form.

(*D*) *Example.* The following example illustrates the application of paragraph (e)(5)(v)(C) of this section for a qualified intermediary providing chapter 4 withholding rate pools on an FFI withholding statement provided to a withholding agent. WA makes a payment of U.S. source interest that is a withholdable payment to QI, a qualified intermediary that is an FFI and a non-U.S. payor (as defined in § 1.6049–5(c)(5)), and A and B are account holders of QI (as defined under § 1.1471–5(a)) and are both U.S. non-exempt recipients (as defined in paragraph (c)(21) of this section). Ten percent of the payment is attributable to both A and B. A has provided WA with a Form W–9, but B has not provided WA with a Form W–9. QI assumes primary withholding responsibility under chapters 3 and 4 with respect to the payment, 80 percent of which is allocable to foreign payees who are account holders other than A and B. As a participating FFI, QI is required to report with respect to its U.S. accounts under § 1.1471–4(d) (as incorporated into its qualified intermediary agreement). Provided that QI reports A's account as a U.S. account under the requirements referenced in the preceding sentence, QI is not required to provide WA with a Form W–9 from A and may instead include A in a chapter 4 withholding rate pool of U.S. payees, allocating 10% of the payment to this pool. See § 1.6049–4(c)(4)(iii) concerning when reporting under section 6049 for a payment of interest is not required when an FFI that is a non-U.S. payor reports an account holder receiving the payment under its chapter 4 requirements. With respect to B, the interest payment is subject to backup withholding under section 3406. Because B is a recalcitrant account holder of QI for withholdable payments and because QI assumes primary chapter 4 withholding responsibility, however, QI may include the portion of the payment allocated to B with the remaining 80% of the payment for which QI assumes primary withholding responsibility. WA can reliably associate the full amount of the payment based on the withholding statement and does so regardless of whether WA knows B is a U.S. non-exempt recipient that is receiving a portion of the payment. See § 31.3406(g)–1(e) (providing exemption to backup withholding when withholding was applied under chapter 4).

* * * * *

(f) *Effective/applicability date*—(1) *In general.* Except as otherwise provided in paragraphs (e)(4)(ix)(D), (f)(2), and (f)(3) of this section, this section applies to payments made on or after January 6, 2017. (For payments made after June 30, 2014 (except for payments to which paragraph (e)(4)(ix)(D) applies, in which case, substitute March 5, 2014, for June 30, 2014), and before January 6, 2017, see this section as in effect and contained in 26 CFR part 1, as revised April 1, 2016. For payments made after

December 31, 2000, and before July 1, 2014, see this section as in effect and contained in 26 CFR part 1, as revised April 1, 2013.)

(2) *Lack of documentation for past years.* A taxpayer may elect to apply the provisions of paragraphs (b)(7)(i)(B), (ii), and (iii) of this section, dealing with liability for failure to obtain documentation timely, to all of its open tax years, including tax years that are currently under examination by the IRS. The election is made by simply taking action under those provisions in the same manner as the taxpayer would take action for payments made after December 31, 2000.

(3) *Section 871(m) transactions.* Paragraphs (b)(4)(xxi), (b)(4)(xxiii), (e)(3)(ii)(E), and (e)(6) of this section apply to payments made on or after September 18, 2015.

(4) [Reserved]. For further guidance, see § 1.1441–1T(f)(4).

* * * * *

■ **Par. 4.** Section 1.1441–1T is revised to read as follows:

§ 1.1441–1T Requirement for the deduction and withholding of tax on payments to foreign persons (temporary).

(a) through (b)(7)(ii)(A) [Reserved]. For further guidance, see § 1.1441–1(a) through (b)(7)(ii)(A).

(B) *Special rules for establishing that income is effectively connected with the conduct of a U.S. trade or business.* A withholding certificate received after the date of payment to claim under § 1.1441–4(a)(1) that income is effectively connected with the conduct of a U.S. trade or business will be considered effective as of the date of the payment if the certificate contains a signed affidavit (either at the bottom of the form or on an attached page) that states that the information and representations contained on the certificate were accurate as of the time of the payment. The signed affidavit must also state that the beneficial owner has included the income on its U.S. income tax return for the taxable year in which it is required to report the income or, alternatively, that the beneficial owner intends to include the income on a U.S. income tax return for the taxable year in which it is required to report the income and the due date for filing such return (including any applicable extensions) is after the date on which the affidavit is signed. A certificate received within 30 days after the date of the payment will not be considered to be unreliable solely because it does not contain the affidavit described in the preceding sentences.

(b)(7)(iii) through (c)(2)(i) [Reserved]. For further guidance, see § 1.1441–1(b)(7)(iii) through (c)(2)(i).

(ii) *Dual residents.* Individuals will not be treated as U.S. persons for purposes of this section for a taxable year or any portion of a taxable year for which they are a dual resident taxpayer (within the meaning of § 301.7701(b)–7(a)(1) of this chapter) who is treated as a nonresident alien pursuant to § 301.7701(b)–7(a)(1) of this chapter for purposes of computing their U.S. tax liability.

(c)(3) through (c)(3)(i) [Reserved]. For further guidance, see § 1.1441–1(c)(3) through (c)(3)(i).

(ii) *Nonresident alien individual.* The term *nonresident alien individual* means persons described in section 7701(b)(1)(B), alien individuals who are treated as nonresident aliens pursuant to § 301.7701(b)–7 of this chapter for purposes of computing their U.S. tax liability, or an alien individual who is a resident of Puerto Rico, Guam, the Commonwealth of Northern Mariana Islands, the U.S. Virgin Islands, or American Samoa as determined under § 301.7701(b)–1(d) of this chapter. An alien individual who has made an election under section 6013(g) or (h) to be treated as a resident of the United States is nevertheless treated as a nonresident alien individual for purposes of withholding under chapter 3 of the Code and the regulations thereunder.

(c)(4) through (c)(38)(i) [Reserved]. For further guidance, see § 1.1441–1(c)(4) through (c)(38)(i).

(ii) *Hold mail instruction.* Notwithstanding the provisions of paragraph (i) of this section, an address that is subject to a hold mail instruction can be used as a permanent residence address if the person has also provided the withholding agent with documentary evidence establishing residence in the country in which the person claims to be a resident for tax purposes. If, after a withholding certificate is provided, a person's permanent residence address is subsequently subject to a hold mail instruction, this is a change in circumstances requiring the person to provide the documentary evidence described in this paragraph (c)(38)(ii) in order to use the address as a permanent residence address.

(c)(39) through (e)(2)(ii)(A) [Reserved]. For further guidance, see § 1.1441–1(c)(39) through (e)(2)(ii)(A).

(B) *Requirement to collect foreign TIN and date of birth beginning January 1, 2017.* Beginning January 1, 2017, a beneficial owner withholding certificate provided to document an account that is maintained at a U.S. branch or office of a financial institution is required to contain the account holder's foreign TIN and, in the case of an individual account holder, the account holder's date of birth in order for the withholding agent to treat such withholding certificate as valid under paragraph (e)(2) of this section. For withholding certificates associated with payments made on or after January 1, 2018, if an account holder does not have a foreign TIN, the account holder is required to provide a reasonable explanation for its absence (*e.g.,* the country of residence does not provide TINs) in order for the withholding certificate not to be considered invalid as a result of the application of this paragraph (e)(2)(ii)(B). A withholding certificate that does not contain the account holder's date of birth will not be considered invalid as a result of the application of this paragraph (e)(2)(ii)(B) if the withholding agent has the account holder's date of birth information in its files.

(e)(3) through (e)(3)(iv)(C)(*2*) [Reserved]. For further guidance, see § 1.1441–1(e)(3) through (e)(3)(iv)(C)(*2*).

(*3*) *Alternative withholding statement.* In lieu of a withholding statement containing all of the information described in paragraph (e)(3)(iv)(C)(*1*) of this section, a withholding agent may accept from a nonqualified intermediary a withholding statement that meets all of the requirements of this paragraph (e)(3)(iv)(C)(*3*) with respect to a payment. This alternative withholding statement may only be provided by a nonqualified intermediary that provides the withholding agent with the withholding certificates from the beneficial owners (*i.e.,* not documentary evidence) before the payment is made.

(*i*) The withholding statement is not required to contain information that is also included on a withholding certificate (*e.g.,* name, address, TIN (if any), chapter 4 status, GIIN (if any)). The withholding statement is also not required to specify the rate of withholding to which each foreign payee is subject, provided that all of the information necessary to make such determination is provided on the withholding certificate. A withholding agent that uses an alternative withholding statement may not apply a different rate from that which the withholding agent may reasonably conclude from the information on the withholding certificate.

(*ii*) The withholding statement must allocate the payment to every payee required to be reported as described in paragraph (e)(3)(iv)(C)(*1*)(*ii*) of this section.

(*iii*) The withholding statement must also contain any other information the withholding agent reasonably requests in order to fulfill its obligations under chapters 3, 4, and 61 of the Code, and section 3406.

(*iv*) The withholding statement must contain a representation from the nonqualified intermediary that the information on the withholding certificates is not inconsistent with any other account information the nonqualified intermediary has for the beneficial owners for determining the rate of withholding with respect to each payee.

(e)(3)(iv)(C)(*4*) through (e)(4)(i)(A) [Reserved]. For further guidance, see § 1.1441–1(e)(3)(iv)(C)(*4*) through (e)(4)(i)(A).

(B) *Electronic signatures.* A withholding agent, regardless of whether the withholding agent has established an electronic system pursuant to paragraph (e)(4)(iv)(A) or (e)(4)(iv)(C) of this section, may accept a withholding certificate (other than a Form W–9) with an electronic signature, provided the electronic signature meets the requirements of paragraph (e)(4)(iv)(B)(*3*)(*ii*) of this section. In addition, the withholding certificate must reasonably demonstrate to the withholding agent that the form has been electronically signed by the recipient identified on the form (or a person authorized to sign for the person identified on the form). For example, a withholding agent may treat as validly signed a withholding certificate that has, in the signature block, the name of the person authorized to sign, a time and date stamp, and a statement that the certificate has been electronically signed. However, a withholding agent may not treat a withholding certificate with a typed name in the signature line and no other information as validly signed.

(e)(4)(ii) through (e)(4)(ii)(A)(*1*) [Reserved]. For further guidance, see § 1.1441–1(e)(4)(ii) through (e)(4)(ii)(A)(*1*).

(*2*) *Documentary evidence for treaty claims and treaty statements.* Documentary evidence described in § 1.1441–6(c)(3) or (4) and a statement regarding entitlement to treaty benefits described in § 1.1441–6(c)(5)(i) (treaty statement) shall remain valid until the last day of the third calendar year following the year in which the documentary evidence is provided to the withholding agent except as provided in paragraph (e)(4)(ii)(B) of this section. Notwithstanding the validity period prescribed in this paragraph (e)(4)(ii)(A)(*2*), a treaty statement will cease to be valid if a change in circumstances makes the information on the statement unreliable or incorrect. For accounts opened and treaty statements obtained prior to January 6, 2017, the treaty statement will expire January 1, 2019.

(e)(4)(ii)(B) through (e)(4)(iv)(B)(*4*) [Reserved]. For further guidance, see § 1.1441–1(e)(4)(ii)(B) through (e)(4)(iv)(B)(*4*).

(C) *Form 8233.* A withholding agent may establish a system for a beneficial owner or payee to provide Form 8233 electronically, provided the system meets the requirements of paragraph (e)(4)(iv)(B)(1) through (4) of this section (replacing ''Form W–8'' with ''Form 8233'' each place it appears).

(D) [Reserved]. For further guidance, see § 1.1441–1(e)(4)(iv)(D).

(E) *Third party repositories.* A withholding certificate (other than a Form W–9) will be considered furnished for purposes of this section (including paragraph (e)(1)(ii)(A)(*1*) of this section) by the person providing the certificate, and a withholding agent may rely on an otherwise valid withholding certificate received electronically from a third party repository, if the withholding certificate was uploaded or provided to a third party repository and there are processes in place to ensure that the withholding certificate can be reliably associated with a specific request from the withholding agent and a specific authorization from the person providing the certificate (or an agent of the person providing the certificate) for the withholding agent making the request to receive the withholding certificate. Each request and authorization must be associated with a specific payment, and, as applicable, a specific obligation maintained by a withholding agent. A third party repository may also be used for withholding statements, and a withholding agent may also rely on an otherwise valid withholding statement, if the intermediary providing the withholding certificates and withholding statement through the repository provides an updated withholding statement in the event of any change in the information previously provided (*e.g.,* a change in the composition of a partnership or a change in the allocation of payments to the partners) and ensures there are processes in place to update withholding agents when there is a new withholding statement (and withholding certificates, as necessary) in the event of any change that would affect the validity of the prior withholding certificates or withholding statement. A third party repository, for purposes of this paragraph, is an entity that maintains withholding certificates (including certificates accompanied by withholding statements) but is not an agent of the applicable withholding agent or the person providing the certificate. The following examples illustrate the provisions of this paragraph (e)(4)(iv)(E):

Example 1. A, a foreign corporation, completes a Form W–8BEN–E and a Form W–8ECI and uploads the forms to X, a third party repository (X is an entity that maintains withholding certificates on an electronic data aggregation site). WA, a withholding agent, enters into a contract with A under which it will make payments to A of U.S. source FDAP that are not effectively connected with A's conduct of a trade or business in the United States. X is not an agent of WA or A. Prior to receiving a payment, A sends WA an email with a link that authorizes WA to access A's Form W–8BEN–E on X's system. The link does not authorize WA to access A's Form W–8ECI. X's system meets the requirements of a third party repository, and WA can treat the Form W–8BEN–E as furnished by A.

Example 2. The facts are the same as *Example 1* of this paragraph (e)(4)(iv)(E), and WA and A enter into a second contract under which WA will make payments to A that are effectively connected with A's conduct of a trade or business in the United States. A sends WA an email with a link that gives WA access to A's Form W–8ECI on X's system. The link in this second email does not give WA access to A's Form W–8BEN–E. A's email also clearly indicates that the link is associated with payments received under the second contract. X's system meets the requirements of a third party repository, and WA can treat the Form W–8ECI as furnished by A.

Example 3. FP is a foreign partnership that is acting on behalf of its partners, A and B, who are both foreign individuals. FP completes a Form W–8IMY and uploads it to X, a third party repository. FP also uploads Forms W–8BEN from both A and B and a valid withholding statement allocating 50% of the payment to A and 50% to B. WA is a withholding agent that makes payments to FP as an intermediary for A and B. FP sends WA an email with a link to its Form W–8IMY on X's system. The link also provides WA access to FP's withholding statement and A's and B's Forms W–8BEN. FP also has processes in place that ensure it will provide a new withholding statement or withholding certificate to X's repository in the event of a change in the information previously provided that affects the validity of the withholding statement and that ensure it will update WA if there is a new withholding statement. X's system meets the requirements of a third party repository, and WA can treat the Form W–8IMY (and withholding statement) as furnished by FP. In addition, because FP is acting as an agent of A and B, the beneficial owners, WA can treat the Forms W–8BEN for A and B as furnished by A and B.

(e)(4)(v) through (f)(3) [Reserved]. For further guidance, see § 1.1441–1(e)(4)(v) through (f)(3).

(4) *Effective/applicability date.* This section applies to payments made on or after January 6, 2017.

(g) *Expiration date.* The applicability of this section expires on December 30, 2019.

§ 1.1441–3 [Amended]

■ **Par. 5.** Section 1.1441–3 is amended by removing the second instance of the word ''is'' in the last sentence of paragraph (d)(1).

§ 1.1441–4 [Amended]

■ **Par. 6.** Section 1.1441–4 is amended by removing and reserving paragraph (h).

■ **Par. 7.** Section 1.6045–1 is amended by revising paragraphs (m)(2)(ii) and (n)(12)(ii) to read as follows:

§ 1.6045–1 Returns of information of brokers and barter exchanges.

* * * * *

(m) * * *

(2) * * *

(ii) *Delayed effective date for certain options*—(A) Notwithstanding paragraph (m)(2)(i) of this section, if an option, stock right, or warrant is issued as part of an investment unit described in § 1.1273–2(h), paragraph (m) of this section applies to the option, stock right, or warrant if it is acquired on or after January 1, 2016.

(B) Notwithstanding paragraph (m)(2)(i) of this section, if the property referenced by an option (that is, the property underlying the option) is a debt instrument that is issued by a non-U.S. person or that provides for one or more payments denominated in, or determined by reference to, a currency other than the U.S. dollar, paragraph (m) of this section applies to the option if it is granted or acquired on or after January 1, 2016.

* * * * *

(n) * * *

(12) * * *

(ii) *Effective/applicability date.* Paragraph (n)(12)(i) of this section applies to a debt instrument described in paragraph (n)(12)(i)(A) or (B) of this section that is acquired on or after February 18, 2016. However, a broker may rely on paragraph (n)(12)(i) of this section for a debt instrument described in paragraph (n)(12)(i)(A) or (B) of this section acquired before February 18, 2016.

* * * * *

■ **Par. 8.** Section 1.6049–5 is amended by revising paragraphs (c)(1) through (c)(4) to read as follows:

§ 1.6049–5 Interest and original issue discount subject to reporting after December 31, 1982.

* * * * *

(c) * * *

(1) *Documentary evidence for offshore obligations and certain other obligations*—(i) A payor may rely on documentary evidence described in § 1.1471–3(c)(5)(i) instead of a beneficial owner withholding certificate described in § 1.1441–1(e)(2)(i) in the case of an amount paid outside the United States (as described in paragraph (e) of this section) with respect to an offshore obligation, or, in the case of broker proceeds described in § 1.6045–1(c)(2), to the extent provided in § 1.6045–1(g)(1)(i). For purposes of this section, the term *offshore obligation* means—

(A) An account maintained at an office or branch of a bank or other financial institution located outside the United States; or

(B) An obligation as defined in § 1.6049–4(f)(3) (other than an account described in paragraph (c)(1)(i)(A) of this section), contract, or other instrument with respect to which the payor is either engaged in business as a broker or dealer in securities or a financial institution (as defined in § 1.1471–5(e)) that engages in significant activities at an office or branch located outside the United States. For purposes of the preceding sentence, an office or branch of such payor shall be considered to engage in significant activities with respect to an obligation when it participates materially and actively in negotiating the obligation under the principles described in § 1.864–4(c)(5)(iii) (substituting the term ''obligation'' for the term ''stock or security'').

(ii) A payor may rely on documentary evidence if the payor has established procedures to obtain, review, and maintain documentary evidence sufficient to establish the identity of the payee and the status of that person as a foreign person; and the payor obtains, reviews, and maintains such documentary evidence in accordance with those procedures. A payor maintains the documents reviewed for purposes of this paragraph (c)(1) by retaining an original, certified copy, or photocopy (including a microfiche, electronic scan, or similar means of electronic storage) of the documents reviewed for as long as it may be relevant to the determination of the payor's obligation to report under § 1.6049–4 and this section and noting in its records the date on which the document was received and reviewed. Documentary evidence furnished for a payment of an amount subject to withholding under chapter 3 of the Code or that is a chapter 4 reportable amount under § 1.1474–1(d)(2) must contain all of the information that is necessary to complete a Form 1042–S for that payment. See §§ 1.1471–3(c) and 1.1471–4(c) for additional documentation requirements to identify a payee or account holder for chapter 4 purposes that may apply in addition to the requirements under paragraph (c) of this section.

(iii) Even if an account or obligation (as defined in § 1.6049–4(f)(3)) is not maintained outside the United States (maintained in the United States), a payor may rely on documentary evidence associated with a withholding certificate described in § 1.1441–1(e)(3)(iii) with respect to the persons for whom an entity acting as an intermediary collects the payment. A payor may also rely on documentary evidence associated with a flow-through withholding certificate for payments treated as made to foreign partners of a nonwithholding foreign partnership, as defined in § 1.1441–1(c)(28), the foreign beneficiaries of a foreign simple trust, as defined in § 1.1441–1(c)(24), or foreign owners of a foreign grantor trust, as defined in § 1.1441–1(c)(26), even though the partnership or trust account is an obligation maintained in the United States.

(iv) For accounts opened on or after July 1, 2014, and before January 1, 2015, and for obligations entered into on or after July 1, 2014, and before January 1, 2015, a payor may continue to apply the rules of § 1.6049–5(c)(1) and (c)(4) as in effect and contained in 26 CFR part 1 revised April 1, 2013, rather than this paragraph (c)(1) and paragraph (c)(4) of this section. A payor that applies the rules of § 1.6049–5(c)(1) and (c)(4) as in effect and contained in 26 CFR part 1 revised April 1, 2013, to an account or obligation must also apply § 1.1441–6(c)(2) (to the extent applicable) and § 1.6049–5(e) both as in effect and contained in 26 CFR part 1 revised April, 2013, with respect to the account or obligation.

(2) *Other applicable rules.* The provisions of § 1.1441–1(e)(4)(i) through (xii) (regarding who may sign a certificate, validity period of certificates and documentary evidence, retention of certificates, reliance rules, etc.) shall apply (by substituting the term ''payor'' for the term ''withholding agent'' and disregarding the fact that the provisions under § 1.1441–1(e)(4) only apply to amounts subject to withholding under chapter 3 of the Code) to withholding certificates and documentary evidence furnished for purposes of this section. See § 1.1441–1(b)(2)(vii) for provisions

dealing with reliable association of a payment with documentation.

(3) *Standards of knowledge.* A payor may not rely on a withholding certificate or documentary evidence described in paragraph (c)(1) or (4) of this section if it has actual knowledge or reason to know that any information or certification stated in the certificate or documentary evidence is unreliable. A payor has reason to know that information or certifications are unreliable only if the payor would have reason to know under the provisions of § 1.1441–7(b)(2) and (3) that the information and certifications provided on the certificate or in the documentary evidence are unreliable or, in the case of a Form W–9 (or an acceptable substitute), it cannot reasonably rely on the documentation as set forth in § 31.3406(h)–3(e) of this chapter (see the information and certification described in § 31.3406(h)–3(e)(2)(i) through (iv) of this chapter that are required in order for a payor reasonably to rely on a Form W–9). The provisions of § 1.1441–7(b)(2) and (3) shall apply for purposes of this paragraph (c)(3) irrespective of the type of income to which § 1.1441–7(b)(2) is otherwise limited. The exemptions from reporting described in paragraphs (b)(10) and (11) of this section shall not apply if the payor has actual knowledge that the payee is a U.S. person who is not an exempt recipient.

(4) *Special documentation rules for certain payments.* This paragraph (c)(4) modifies the provisions of paragraph (c)(1) of this section for payments of amounts that are not subject to withholding under chapter 3 of the Code, other than amounts described in paragraph (d)(3)(iii) of this section (dealing with U.S. short-term OID and U.S. source deposit interest described in section 871(i)(2)(A) or 881(d)(3)). Amounts are not subject to withholding under chapter 3 of the Code if they are not included in the definition of amounts subject to withholding under § 1.1441–2(a) (*e.g.,* deposit interest with foreign branches of U.S. banks, foreign source income, or broker proceeds). A payor may rely upon documentation in lieu of documentary evidence (as described in paragraph (c)(1) of this section) or a written statement (as defined in § 1.1471–1(b)(150)) or another statement to the extent permitted in paragraphs (c)(4)(i) through (iii) of this section, until the payor knows or has reason to know of a change in circumstance that makes the documentation unreliable or incorrect (as defined in § 1.1441–1(e)) when the payor does not have customer information for the payee that includes any of the U.S. indicia described in § 1.1471–3(c)(6)(ii)(C)(*1*). Further, a payor may maintain such documentation or documentary evidence as required in paragraph (c)(4)(iv) of this section.

(i) *Statement in lieu of documentary evidence with respect to accounts.* If under the local laws, regulations, or practices of a country in which an account is maintained, it is not customary to obtain documentary evidence described in paragraph (c)(1) of this section with respect to the type of account, the payor may, instead of obtaining a beneficial owner withholding certificate described in § 1.1441–1(e)(2)(i) or documentary evidence described in paragraph (c)(1) of this section, establish a payee's foreign status based on the statement described in this paragraph (c)(4)(i) (or such substitute statement as the Internal Revenue Service may prescribe) made on an account opening form. However, see, also § 1.1471–4(c) or an applicable IGA for additional documentation requirements that may apply to a participating FFI (including a reporting Model 2 FFI) for determining the status of its account holders for chapter 4 purposes. The statement referred to in this paragraph (c)(4)(i) must appear near the signature line and must state, ''By opening this account and signing below, the account owner represents and warrants that he/she/it is not a U.S. person for purposes of U.S. Federal income tax and that he/she/it is not acting for, or on behalf of, a U.S. person. A false statement or misrepresentation of tax status by a U.S. person could lead to penalties under U.S. law. If your tax status changes and you become a U.S. citizen or a resident, you must notify us within 30 days.'' Additionally, a payor may, instead of obtaining a beneficial owner withholding certificate described in § 1.1441–1(e)(2)(i) or § 1.1471–3(c)(3)(ii) or documentary evidence described in paragraph (c)(1) of this section, establish a payee's foreign status based on a written statement described in paragraph § 1.1471–1(b)(150) to the extent a payor uses such written statement to establish a payee's chapter 4 status and is permitted to use the written statement under § 1.1471–3(d) (by substituting the term ''payor'' for the term ''withholding agent'') without any other documentary evidence.

(ii) *Documentation under IGA.* A payor that is a reporting Model 1 FFI or reporting Model 2 FFI may rely upon documentation or information establishing a payee's status that is permitted under an applicable IGA for determining whether the account of the payee is other than a U.S. account and regardless of whether such documentation or certification is described in paragraph (c)(1) of this section or § 1.1441–1(e)(2).

(iii) *Maintenance of documentation and written statement.* A payor maintains documentation if it either maintains the documentary evidence as described in paragraph (c)(1) of this section or retains a record of the documentary evidence reviewed if the payor is not required to retain copies of the documentation pursuant to the payor's AML due diligence (as defined in § 1.1471–1(b)(4)). A payor retains a record of documentary evidence reviewed by noting in its records the type of documentation reviewed, the date the document was reviewed, the document's identification number (if any), and whether such documentation contained any U.S. indicia described in § 1.1441–7(b)(8). Any statement described in paragraph (c)(4)(i) of this section, must be retained in accordance with § 1.1471–3(c)(6)(iii).

Regulations Relating to Information Reporting by Foreign Financial Institutions and Withholding on Certain Payments to Foreign Financial Institutions and Other Foreign Entities; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to final and temporary regulations (TD 9809) that were published in the **Federal Register** on Friday, January 6, 2017 (82 FR 2124). The final and temporary regulations under chapter 4 of the Subtitle A (sections 1471 through 1474) of the Internal Revenue Code of 1986 (Code) relate to information reporting by foreign financial institutions (FFIs) with respect to U.S. accounts and

withholding on certain payments to FFIs and other foreign entities.

DATES: These corrections are effective June 30, 2017 and are applicable beginning January 6, 2017.

FOR FURTHER INFORMATION CONTACT: Kamela Nelan at (202) 317–6942 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations (TD 9809) that are the subject of this correction are under sections 1471 through 1474 of the Internal Revenue Code.

Need for Correction

As published, the final and temporary regulations (TD 9809) contain errors which may prove to be misleading and need to be clarified. Some portions of TD 9809 could not be incorporated due to inaccurate amendatory instructions. Several of the correcting amendments to TD 9809 are needed to clarify or correct the results of inaccurate amendatory instructions. These correcting amendments also include the addition, deletion, or modification of regulatory language to clarify the relevant provisions to meet their intended purposes or for consistency with other related provisions of these regulations. The addition of final regulatory language includes language that was inadvertently removed in a prior amendment to the final regulations.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Correction of Publication

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendments:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.1471–1T is amended by revising the third sentence of paragraph (b)(99) to read as follows:

§ 1.1471–1T Scope of chapter 4 and definitions (temporary).

* * * * *

(b) * * *

(99) * * * An address that is provided subject to instructions to hold all mail to that address must be accompanied by certain documentary evidence described in § 1.1441–1(c)(38)(ii). * * *

* * * * *

■ **Par. 3.** Section 1.1471–2 is amended by revising the third sentence of paragraph (a)(2)(i) to read as follows:

§ 1.1471–2 Requirement to deduct and withhold tax on withholdable payments to certain FFIs.

(a) * * *

(2) * * *

(i) * * * Further, a withholding agent is not required to withhold on a payment that it can reliably associate with documentation indicating that the payee is a U.S. branch treated as a U.S. person (as defined in § 1.1471–1(b)(135)) or is a U.S. branch of an FFI that is not treated as a U.S. person but that applies the rules described in § 1.1471–4(d)(2)(iii)(C). * * *

* * * * *

■ **Par. 4.** Section 1.1471–3 is amended by revising paragraph (b)(3) to read as follows:

§ 1.1471–3 Identification of payee.

* * * * *

(b) * * *

(3) *Determination of whether the payment is made to a QI, WP, or WT.* A withholding agent may treat the person who receives a payment as a QI, WP, or WT if the withholding agent can reliably associate the payment with a valid Form W–8IMY, as described in paragraph (c)(3)(iii) of this section, that indicates that the person who receives the payment is a QI, WP, or WT, provides the person's QI–EIN, WP–EIN, or WT–EIN, and the person's GIIN, if applicable.

* * * * *

■ **Par. 5.** Section 1.1471–4 is amended by revising paragraph (d)(3)(ii)(E) and adding a heading to paragraph (d)(7) to read as follows:

§ 1.1471–4 FFI agreement.

* * * * *

(d) * * *

(3) * * *

(ii) * * *

(E) Such other information as is otherwise required to be reported under this paragraph (d)(3) or in the form described in paragraph (d)(3)(v) of this section and its accompanying instructions.

* * * * *

(7) *Special reporting rules with respect to the 2014 and 2015 calendar years—*

* * * * *

■ **Par. 6.** Section 1.1471–4T is amended by revising paragraph (d)(2)(ii)(G) introductory text to read as follows:

§ 1.1471–4T FFI agreement (temporary).

* * * * *

(d) * * *

(2) * * *

(ii) * * *

(G) *Combined reporting on Form 8966 following merger or bulk acquisition.* If a participating FFI (successor) acquires accounts of another participating FFI (predecessor) in a merger or bulk acquisition of accounts, the successor may assume the predecessor's obligations to report the acquired accounts under paragraph (d) of this section with respect the calendar year in which the merger or acquisition occurs (acquisition year), provided that the requirements in paragraphs (d)(2)(ii)(G)(*1*) through (*4*) of this section are satisfied. If the requirements of paragraphs (d)(2)(ii)(G)(*1*) through (*4*) of this section are not satisfied, both the predecessor and the successor are required to report the acquired accounts for the portion of the acquisition year that it maintains the account.

* * * * *

■ **Par. 7.** Section 1.1471–5 is amended by adding paragraph (f)(1)(i)(F)(*3*)(*viii*) and revising paragraph (f)(2)(iii)(C) to read as follows:

§ 1.1471–5 Definitions applicable to section 1471.

* * * * *

(f) * * *

(1) * * *

(i) * * *

(F) * * *

(*3*) * * *

(*viii*) Has not had its status as a sponsoring entity revoked.

* * * * *

(2) * * *

(iii) * * *

(C) Twenty or fewer individuals own all of the debt and equity interests in the FFI (disregarding debt interests owned by U.S. financial institutions, participating FFIs, registered deemed-compliant FFIs, and certified deemed-compliant FFIs and equity interests owned by an entity if that entity owns 100 percent of the equity interests in the FFI and is itself a sponsored FFI under this paragraph (f)(2)(iii)).

* * * * *

■ **Par. 8.** Section 1.1474–1 is amended by:

■ 1. Revising paragraphs (d)(4)(i)(C)(*2*) and (*3*).

■ 2. Adding paragraph (d)(4)(ii)(C).

■ 3. Revising the heading of paragraph (d)(4)(iii), and paragraphs (d)(4)(iii)(A) and (B).

The revisions and addition read as follows:

§ 1.1474–1 Liability for withheld tax and withholding agent reporting.

* * * * *

(d) * * *
(4) * * *
(i) * * *
(C) * * *

(*2*) If the U.S. branch of an FFI is not treated as a U.S. person and applies the rules described in § 1.1471–4(d)(2)(iii)(C) and provides the withholding agent with a withholding certificate that transmits information regarding its reporting pools referenced in paragraph (d)(4)(i)(B) of this section or information regarding each recipient that is an account holder or payee of the U.S. branch, the withholding agent must complete a separate Form 1042–S issued to the U.S. branch for each such pool to the extent required on the form and its accompanying instructions or must complete a separate Form 1042–S issued to each recipient whose documentation is associated with the U.S. branch's withholding certificate as described in paragraph (d)(4)(ii)(A) of this section and report the U.S. branch as an entity not treated as a recipient; or

(*3*) If the U.S. branch of an FFI is not treated as a U.S. person and applies the rules described in § 1.1471–4(d)(2)(iii)(C) to the extent it fails to provide sufficient information regarding its account holders or payees, the withholding agent shall report the recipient of the payment as an unknown recipient to the extent recipient information is not provided and report the U.S. branch as provided in paragraph (d)(4)(ii)(A) of this section for an entity not treated as a recipient.

* * * * *

(ii) * * *

(C) *Disregarded entities.* If a U.S. withholding agent makes a payment to a disregarded entity and receives a valid withholding certificate or other documentary evidence from the person that is the single owner of such disregarded entity, the withholding agent must file a Form 1042–S treating the single owner as the recipient in accordance with the instructions to the Form 1042–S.

(iii) *Reporting by participating FFIs and deemed-compliant FFIs (including QIs, WPs, and WTs) and U.S. branches of FFIs not treated as U.S. persons*—(A) *In general.* Except as otherwise provided in paragraph (d)(4)(iii)(B) (relating to NQIs, NWPs, NWTs, and FFIs electing under section 1471(b)(3)) and § 1.1471–4(d)(2)(ii)(F) (relating to transitional payee-specific reporting for payments to nonparticipating FFIs), a participating FFI or deemed-compliant FFI (including a QI, WP, or WT), and a U.S. branch of an FFI that is not treated as a U.S. person that applies the rules described in § 1.1471–4(d)(2)(iii)(C) that makes a payment that is a chapter 4 reportable amount to a recalcitrant account holder or nonparticipating FFI must complete a Form 1042–S to report such payments. A participating FFI or registered deemed-compliant FFI (including a QI, WP, or WT), and a U.S. branch of an FFI that is not treated as a U.S. person that applies the rules described in § 1.1471–4(d)(2)(iii)(C) may report in pools consisting of its recalcitrant account holders and payees that are nonparticipating FFIs. With respect to recalcitrant account holders, the FFI may report in pools consisting of recalcitrant account holders within a particular status described in § 1.1471–4(d)(6) and within a particular income code. Except as otherwise provided in § 1.1471–4(d)(2)(ii)(F), with respect to payees that are nonparticipating FFIs, the FFI may report in pools consisting of one or more nonparticipating FFIs that fall within a particular income code and within a particular status code described in the instructions to Form 1042–S. Alternatively, a participating FFI or registered deemed-compliant FFI (including a QI, WP, or WT) and a U.S. branch of an FFI that is not treated as a U.S. person that applies the rules described in § 1.1471–4(d)(2)(iii)(C) may (and a certified deemed-compliant FFI is required to) perform payee-specific reporting to report a chapter 4 reportable amount paid to a recalcitrant account holder or a nonparticipating FFI when withholding was applied (or should have applied) to the payment.

(B) *Special reporting requirements of participating FFIs, deemed-compliant FFIs, FFIs that make an election under section 1471(b)(3), and U.S. branches of FFIs not treated as U.S. persons.* Except as otherwise provided in § 1.1471–4(d)(2)(ii)(F), a participating FFI or deemed-compliant FFI that is an NQI, NWP, or NWT, and a U.S. branch of an FFI that is not treated as a U.S. person that applies the rules described in § 1.1471–4(d)(2)(iii)(C) or an FFI that has made an election under section 1471(b)(3) and has provided sufficient information to its withholding agent to withhold and report the payment is not required to report the payment on Form 1042–S as described in paragraph (d)(4)(iii)(A) of this section if the payment is made to a nonparticipating FFI or recalcitrant account holder and its withholding agent has withheld the correct amount of tax on such payment and correctly reported the payment on a Form 1042–S. Such FFI or branch is required to report a payment, however, when the FFI knows, or has reason to know, that less than the required amount has been withheld by the withholding agent on the payment or the withholding agent has not correctly reported the payment on Form 1042–S. In such case, the FFI or branch must report on Form 1042–S to the extent required under paragraph (d)(4)(iii)(A) of this section. See, however, § 1.1471–4(d)(6) for the requirement to report certain aggregate information regarding accounts held by recalcitrant account holders on Form 8966, ''FATCA Report,'' regardless of whether withholdable payments are made to such accounts.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9819]

RIN 1545–BM06

Guidelines for the Streamlined Process of Applying for Recognition of Section 501(c)(3) Status

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations and removal of temporary regulations.

SUMMARY: This document contains final regulations that allow the Commissioner of Internal Revenue to adopt a streamlined application process that eligible organizations may use to apply for recognition of tax-exempt status under section 501(c)(3) of the Internal Revenue Code (Code). The final regulations affect organizations seeking recognition of tax-exempt status under section 501(c)(3).

DATES:

Effective Date: These regulations are effective on June 30, 2017.

Applicability Dates: For dates of applicability, see §§ 1.501(a)–1(f), 1.501(c)(3)–1(h), and 1.508–1(c).

FOR FURTHER INFORMATION CONTACT: Peter A. Holiat at (202) 317–5800 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Since 1969, section 508 of the Code has required an organization seeking tax-exempt status under section 501(c)(3), as a condition of its

exemption, to notify the Secretary of the Treasury (or his delegate) that it is applying for recognition of exempt status in the manner prescribed in regulations, unless it is specifically excepted from the requirement. Longstanding regulations under §§ 1.501(a)–1, 1.501(c)(3)–1, and 1.508–1 had required all organizations applying for recognition of section 501(c)(3) exempt status to submit a properly completed and executed Form 1023, ''Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code,'' (see § 1.508–1(a)(2) as contained in 26 CFR part 1, revised April 1, 2014) and to submit with, and as part of, the application, a detailed statement of its proposed activities (see §§ 1.501(a)–1(b)(1)(iii) and 1.501(c)(3)–1(b)(1)(v) as contained in 26 CFR part 1, revised April 1, 2014). Detailed procedures for applying for recognition of exemption are included in annual revenue procedures and in the instructions for Form 1023. *See* § 601.601(d)(2)(i)(*b*).

On July 2, 2014, final and temporary regulations (TD 9674) authorizing the Commissioner to adopt a streamlined application process that eligible organizations may use to apply for recognition of tax-exempt status under section 501(c)(3) were published in the **Federal Register** (79 FR 37630). The final and temporary regulations were effective and applicable on July 1, 2014. The 2014 final regulations removed and reserved certain paragraphs of the longstanding final regulations addressed by corresponding paragraphs of the new temporary regulations. Under the temporary regulations, the IRS instituted the streamlined application process on Form 1023–EZ, ''Streamlined Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code,'' the detailed procedures for which have been provided in annual revenue procedures, most recently in Rev. Proc. 2017–5, 2017–1 IRB 230, and in the instructions for Form 1023–EZ.

Also on July 2, 2014, a notice of proposed rulemaking (REG–110948–14) cross-referencing the temporary regulations and soliciting public comments and requests for a hearing was published in the **Federal Register** (79 FR 37697). No comments responding to the notice of proposed rulemaking were received, and no public hearing was requested or held. The IRS continues to consider improvements to Form 1023–EZ based on its own experience and informal comments received from the public and other stakeholders on the form, including whether to require applicants to submit a brief statement of actual or proposed activities. Because the proposed regulations contemplate that guidance published in the Internal Revenue Bulletin may prescribe the information required of Form 1023–EZ filers, including regarding their proposed activities, the Department of the Treasury (Treasury Department) and the IRS have concluded that the proposed regulations are sufficiently flexible to allow such a revision to the Form 1023–EZ at a future date, as resources permit. Accordingly, this Treasury decision adopts as final regulations, without substantive change, the proposed regulations set forth in the 2014 notice of proposed rulemaking and removes the corresponding temporary regulations.

Explanation of Provisions

The Treasury Department and the IRS have considered how the process of meeting the notice requirement of section 508 in seeking recognition of tax-exempt status may be made more efficient for certain smaller organizations. The IRS developed Form 1023–EZ to provide a simplified application form that relies more heavily on attestations by the organization that it meets the section 501(c)(3) organizational and operational requirements, which are explained in the accompanying form instructions. The new form was made available for use by eligible small organizations in July 2014, following the issuance of the temporary regulations and a revenue procedure describing the streamlined application process. The streamlined application process generally allows eligible small organizations to receive IRS determinations of tax-exempt status more quickly and allows the IRS to focus resources on more complex exemption applications and on compliance programs. This Treasury decision adopts the 2014 proposed regulations by amending §§ 1.501(a)–1, 1.501(c)(3)–1, and 1.508–1 to authorize the continued use of the IRS' streamlined process by eligible organizations to meet the notice requirements of section 508.

Specifically, this Treasury decision amends §§ 1.501(a)–1 and 1.501(c)(3)–1, as in effect before July 2, 2014, to authorize the Treasury Department and the IRS to modify, by applicable regulations or other guidance published in the Internal Revenue Bulletin, the requirement that an organization applying for section 501(c)(3) tax-exempt status provide a detailed statement of its proposed activities. This document also amends the § 1.501(a)–1 provisions relating to the Commissioner's ability to revoke a determination because of a change in the law or regulations, or for other good cause, to reference the Commissioner's authority to retroactively revoke a determination under section 7805(b). No substantive change is intended by this amendment. This Treasury decision also amends the requirement in § 1.501(a)–1(b)(3) that an organization claiming to be exempted from filing annual returns file a statement supporting its claim with and as a part of its application. As amended, § 1.501(a)–1(b)(3) allows an organization to file the statement either in its application, or in a manner prescribed in guidance published in the Internal Revenue Bulletin. *See* Rev. Proc. 2017–5 for rules for filing this statement on Form 8940, ''Request for Miscellaneous Determinations.''

In addition, this document amends § 1.508–1 to provide that eligible organizations may use Form 1023–EZ to notify the Commissioner of their applications for tax-exempt status under section 501(c)(3). This Treasury decision also amends §§ 1.501(a)–1 and 1.508–1 to state that the office to which applications should be submitted will be published in the Internal Revenue Bulletin or instructions to the Form 1023 or Form 1023–EZ.

Finally, this Treasury decision incorporates minor revisions within the portions of §§ 1.501(a)–1, 1.501(c)(3)–1, and 1.508–1 that are otherwise being amended. In § 1.501(a)–1(a)(2), the reference to ''internal revenue district'' is removed because such reference has been made obsolete by the enactment of the Internal Revenue Service Restructuring and Reform Act of 1998, Public Law 105–206, 112 Stat. 685. References to a district director in §§ 1.501(a)–1, 1.501(c)(3)–1, and 1.508–1 are also modified as appropriate, as those positions no longer exist within the IRS. Similarly, references to obsolete due dates for filing notices described in section 508 and related transition relief provisions that are no longer relevant have been removed from §§ 1.508–1(a)(2)(i) and (b)(2)(iv). In addition, § 1.508–1(b)(2)(v) has been revised to remove a reference to the instructions for Form 4653, which is no longer in use.

Effective/Applicability Dates

The temporary regulations have applied since July 1, 2014, and this Treasury decision adopts the proposed regulations that cross-referenced the text of those temporary regulations without substantive change. Thus, the final regulations apply on and after July 1, 2014.

Statement of Availability of IRS Documents

Rev. Proc. 2017–5 is published in the Internal Revenue Bulletin and is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or by visiting the IRS Web site at *http://www.irs.gov.*

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It is hereby certified that this rule will not have a significant economic impact on a substantial number of small entities. Although this rule may affect a substantial number of eligible small entities that choose to use Form 1023–EZ to apply for recognition of tax-exempt status under section 501(c)(3), the Form 1023–EZ streamlines the application process, thereby reducing the economic impact on these entities. This rule merely permits use of the streamlined form of application available to satisfy the notice requirements under section 508(a). Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f), the temporary and proposed regulations preceding these final regulations were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business and no comments were received.

Drafting Information

The principal author of these regulations is Peter A. Holiat of the Office of Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.501(a)–1 is amended by revising paragraphs (a)(2), (b)(1), (b)(3), and (f) to read as follows:

§ 1.501(a)–1 Exemption from taxation.

(a) * * *

(2) An organization, other than an employees' trust described in section 401(a), is not exempt from tax merely because it is not organized and operated for profit. In order to establish its exemption, it is necessary that every such organization claiming exemption file an application form as set forth below with the appropriate office as designated by the Commissioner in guidance published in the Internal Revenue Bulletin, forms, or instructions to the applicable forms. Subject only to the Commissioner's inherent power to revoke rulings, including with retroactive effect as permitted under section 7805(b), because of a change in the law or regulations or for other good cause, an organization that has been determined by the Commissioner (or previously by a district director) to be exempt under section 501(a) or the corresponding provision of prior law may rely upon such determination so long as there are no substantial changes in the organization's character, purposes, or methods of operation. An organization that has been determined to be exempt under the provisions of the Internal Revenue Code of 1939 or prior law is not required to secure a new determination of exemption merely because of the enactment of the Internal Revenue Code of 1954 unless affected by substantive changes in law made by such Code.

* * * * *

(b) *Additional proof by particular classes of organizations*—(1) Unless otherwise prescribed by applicable regulations or other guidance published in the Internal Revenue Bulletin, organizations mentioned below shall submit with and as a part of their applications the following information:

(i) Mutual insurance companies shall submit copies of the policies or certificates of membership issued by them.

(ii) In the case of title holding companies described in section 501(c)(2), if the organization for which title is held has not been specifically notified in writing by the Internal Revenue Service that it is held to be exempt under section 501(a), the title holding company shall submit the information indicated herein as necessary for a determination of the status of the organization for which title is held.

(iii) An organization described in section 501(c)(3) shall submit with, and as a part of, an application filed after July 26, 1959, a detailed statement of its proposed activities.

* * * * *

(3) An organization claiming to be specifically exempted by section 6033(a) from filing annual returns shall submit with and as a part of its application (or in such other manner as is prescribed in guidance published in the Internal Revenue Bulletin) a statement of all the facts on which it bases its claim.

* * * * *

(f) *Effective/applicability date.* Paragraphs (a)(2), (b)(1), and (b)(3) of this section apply on and after July 1, 2014.

Section 1.501(a)–1T [Removed].

■ **Par. 3.** Section 1.501(a)–1T is removed.

■ **Par. 4.** Section 1.501(c)(3)–1 is amended by revising paragraphs (b)(1)(v), (b)(6), and (h) to read as follows:

§ 1.501(c)(3)–1 Organizations organized and operated for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals.

* * * * *

(b) * * *

(1) * * *

(v) Unless otherwise prescribed by applicable regulations or other guidance published in the Internal Revenue Bulletin, an organization must, in order to establish its exemption, submit a detailed statement of its proposed activities with and as a part of its application for exemption (see § 1.501(a)–1(b)).

* * * * *

(6) *Applicability of the organizational test.* A determination by the Commissioner that an organization is described in section 501(c)(3) and exempt under section 501(a) will not be granted after July 26, 1959, regardless of when the application is filed, unless such organization meets the organizational test prescribed by this paragraph (b). If, before July 27, 1959, an organization has been determined by the Commissioner or district director to be exempt as an organization described in section 501(c)(3) or in a corresponding provision of prior law and such determination has not been revoked before such date, the fact that such organization does not meet the organizational test prescribed by this paragraph (b) shall not be a basis for revoking such determination. Accordingly, an organization that has been determined to be exempt before July 27, 1959, and which does not seek

a new determination of exemption is not required to amend its articles of organization to conform to the rules of this paragraph (b), but any organization that seeks a determination of exemption after July 26, 1959, must have articles of organization that meet the rules of this paragraph (b). For the rules relating to whether an organization determined to be exempt before July 27, 1959, is organized exclusively for one or more exempt purposes, see 26 CFR (1939) 39.101(6)–1 (Regulations 118) as made applicable to the Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167; 1954–2 CB 47).

* * * * *

(h) *Effective/applicability date.* Paragraphs (b)(1)(v) and (b)(6) of this section apply on and after July 1, 2014.

Section 1.501(c)(3)–1T [Removed].

■ **Par. 5.** Section 1.501(c)(3)–1T is removed.

■ **Par. 6.** Section 1.508–1 is amended by revising paragraphs (a)(2)(i), (a)(2)(ii), (b)(2)(iv), (b)(2)(v), and (c) to read as follows:

§ 1.508–1 Notices.

(a) * * *

(2) *Filing of notice*—(i) For purposes of paragraph (a)(1) of this section, except as provided in paragraph (a)(3) of this section, an organization seeking exemption under section 501(c)(3) must file the notice described in section 508(a) within 15 months from the end of the month in which the organization was organized. Such notice is filed by submitting a properly completed and executed Form 1023 (or, if applicable, Form 1023–EZ) exemption application. Notice should be filed with the appropriate office as designated by the Commissioner in guidance published in the Internal Revenue Bulletin, forms, or instructions to the applicable forms. A request for extension of time for the filing of such notice should be submitted to such appropriate office. Such request may be granted if it demonstrates that additional time is required.

(ii) Although the information required by either Form 1023 or Form 1023–EZ must be submitted to satisfy the notice required by this section, the failure to supply, within the required time, all of the information required to complete such form is not alone sufficient to deny exemption from the date of organization to the date such complete information for such form is submitted by the organization. If the information that is submitted within the required time is incomplete, and the organization supplies the necessary additional information requested by the Commissioner within the additional time period allowed, the original notice will be considered timely.

* * * * *

(b) * * *

(2) * * *

(iv) Any organization filing notice under this paragraph (b)(2)(iv) shall file its notice by submitting a properly completed and executed Form 1023 (or, if applicable, Form 1023–EZ) and providing information that it is not a private foundation. The organization shall also submit all information required by the regulations under section 170 or 509 (whichever is applicable) necessary to establish recognition of its classification as an organization described in section 509(a)(1), (2), (3), or (4). The notice required by this paragraph (b)(2)(iv) should be filed with the appropriate office as designated by the Commissioner in guidance published in the Internal Revenue Bulletin, forms, or instructions to the applicable forms.

(v) An extension of time for the filing of a notice under this paragraph (b)(2) may be granted by the office with which the notice is filed upon timely request by the organization, if the organization demonstrates that additional time is required.

* * * * *

(c) *Effective/applicability date.* Paragraphs (a)(2)(i), (a)(2)(ii), (b)(2)(iv), and (b)(2)(v) of this section apply on and after July 1, 2014.

Section 1.508–1T [Removed].

Par. 7. Section 1.508–1T is removed.

Kirsten B. Wielobob,

Deputy Commissioner for Services and Enforcement.

Approved: June 9, 2017.

Thomas West,

Tax Legislative Counsel.

Regulations Relating to Information Reporting by Foreign Financial Institutions and Withholding on Certain Payments to Foreign Financial Institutions and Other Foreign Entities; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final and temporary regulations; correction.

SUMMARY: This document contains a correction to final and temporary regulations (TD 9809) that were published in the **Federal Register** on Friday, January 6, 2017 (82 FR 2124). The final and temporary regulations under chapter 4 of Subtitle A (sections 1471 through 1474) of the Internal Revenue Code of 1986 (Code) relate to information reporting by foreign financial institutions (FFIs) with respect to U.S. accounts and withholding on certain payments to FFIs and other foreign entities.

DATES: This correction is effective June 30, 2017 and is applicable beginning January 6, 2017.

FOR FURTHER INFORMATION CONTACT: Kamela Nelan at (202) 317–6942 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations (TD 9809) that are subject of this correction are under sections 1471 through 1474 of the Internal Revenue Code.

Need for Correction

As published, the final and temporary regulations (TD 9809) contain an error that proves to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the final and temporary regulations (TD 9809) that are the subject of FR Doc. 2016–31601 are corrected as follows:

■ On page 2192, column 1, under the title heading PART 301—PROCEDURE AND ADMINISTRATION, the first line, the language ''Par. 23. Need Authority'' is corrected to read ''Par. 23. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *.''

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel (Procedure and Administration).

Juvenile Justice and Delinquency Prevention Act Formula Grant Program

AGENCY: Office of Justice Programs.

ACTION: Final rule; correcting amendments.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (''OJJDP'') of the Office of Justice Programs (''OJP'') published in the **Federal Register** on January 17, 2017, a partial Final Rule amending the formula grant program (''Formula Grant Program'') regulation. This technical correction corrects inaccurate citations to sections of the Juvenile Justice and Delinquency Prevention Act (the ''Act'') in the partial Final Rule.

DATES: *Effective Date:* This rule is effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Gregory Thompson, Senior Advisor, Office of Juvenile Justice and Delinquency Prevention, at 202–307–5911.

SUPPLEMENTARY INFORMATION:

Background

The OJJDP Formula Grant Program is authorized by the Juvenile Justice and Delinquency Prevention Act (''JJDPA''), which authorizes OJJDP to provide an annual grant to each State to improve its juvenile justice system and to support juvenile delinquency prevention programs. The partial Final Rule that OJJDP published on January 17, and which took effect on March 21, 2017, amends the implementing regulations for the Formula Grant Program found at 28 CFR part 31. In particular, § 31.303(f)(5) amends States' reporting requirements in several aspects. This technical correction simply corrects inaccurate references to sections of the Act cited in the partial Final Rule.

How This Document Complies With the Federal Administrative Requirements for Rulemaking

A. Executive Order 12866 and Executive Order 13563

This technical correction has been drafted and reviewed in accordance with Executive Order 12866, ''Regulatory Planning and Review,'' section 1(b), The Principles of Regulation, and Executive Order 13563, ''Improving Regulation and Regulatory Review,'' section 1, General Principles of Regulation. This technical correction is limited to amending the citations to sections of the Act and, therefore, is not a ''regulation'' or ''rule'' as defined by that Executive Order.

B. Executive Order 13132

This technical correction to the partial Final Rule will not have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, ''Federalism,'' OJP has determined that this technical correction does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

C. Executive Order 12988

This technical correction to the partial Final Rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988, ''Civil Justice Reform.''

D. Administrative Procedures Act

This technical correction simply corrects citations to sections of the Act in the partial Final Rule published on January 17, 2017 and, accordingly, OJP finds it unnecessary to publish this technical correction for public notice and comment. *See* 5 U.S.C. 553(b). Similarly, because delaying the effective date of this technical correction would serve no purpose, OJP also finds good cause to make this rule technical correction effective upon publication. *See* 5 U.S.C. 553(d)(3).

E. Regulatory Flexibility Act

OJP, in accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), has reviewed this technical correction and, by approving it, certifies that it will not have a significant economic impact on a substantial number of small entities because it simply makes a technical correction to the partial Final Rule published on January 17, 2017. Further, a Regulatory Flexibility analysis is not required for this technical correction because OJP was not required to publish a general notice of proposed rulemaking for this matter. *See* 5 U.S.C. 604.

F. Small Business Regulatory Enforcement Fairness Act of 1996

This technical correction is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 804. This technical correction will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

G. Unfunded Mandates Reform Act of 1995

This technical correction was not preceded by a published notice of proposed rulemaking; will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year; will not significantly or uniquely affect small governments; and does not contain significant intergovernmental mandates. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1535.

H. Paperwork Reduction Act of 1995

This technical correction does not impose any new reporting or recordkeeping requirements under the Paperwork Reduction Act, 44 U.S.C. 3501–3521.

List of Subjects in 28 CFR Part 31

Authority and Issuance.

PART 31—OJJDP GRANT PROGRAMS

■ 1. The authority citation for 28 CFR part 31 continues to read as follows:

Authority: 42 U.S.C. 5611(b); 42 U.S.C. 5631–5633.

Subpart A—Formula Grants

§ 31.303 [Amended]

■ 2. In § 31.303(f)(5), remove the words ''42 U.S.C. 5633(a)(12), (13), and (14)'' and add in their place ''42 U.S.C. 5633(a)(11), (12), and (13)''.

Dated: June 12, 2017.

Alan R. Hanson,

Acting Assistant Attorney General, Office of Justice Programs.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2017–0169]

RIN 1625–AA08

Special Local Regulation; Washburn Board Across the Bay, Lake Superior; Chequamegon Bay, WI

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard will establish a permanent special local regulation on Lake Superior within Chequamegon Bay for the annual Washburn Board Across the Bay racing event. This annual event historically occurs within the last 2 weeks of July and lasts for 1 day. This action is necessary to safeguard the participants and spectators on the water in a portion of Chequamegon Bay between Washburn, WI and Ashland, WI. This regulation would functionally restrict all vessel speeds while within a designated no-wake zone, unless otherwise specifically authorized by the Captain of the Port (COTP) Duluth or a designated representative. The area forming the subject of this permanent special local regulation is described below.

DATES: This rule is effective July 31, 2017.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2017–0169 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rulemaking, call or email Lieutenant Junior Grade John Mack, Waterways management, MSU Duluth, Coast Guard; telephone 218–725–3818, email *John.V.Mack@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

COTP Captain of the Port, Duluth
CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On March 30, 2017 the Coast Guard published an NPRM in the **Federal Register** (82 FR 15660) entitled ''Special Local Regulation; Washburn Board Across the Bay, Lake Superior; Chequamegon Bay, WI.'' The NPRM proposed to establish a no-wake zone within Chequamegon Bay on an annual basis during the Washburn Board Across the Bay paddle craft event, and invited comments on our proposed regulatory action related to this paddle craft event. The aforementioned NPRM was open for comment for 30 days in which no comments were received.

III. Discussion of Comments, Changes, and the Rule

As noted above, we received no comments on our NPRM published on March 30, 2017. There are no changes in the regulatory text of this rule from the proposed rule in the NPRM. This rule will create a permanent special local regulation in Chequamegon Bay for the annual Washburn Board Across the Bay racing event that historically takes place in the third or fourth week of July. The no-wake zone will be enforced on all vessels entering into 100 yards of either side of an imaginary line beginning in Washburn, WI at position 46°36′52″ N., 090°54′24″ W.; thence southwest to position 46°38′44″ N., 090°54′50″ W.; thence southeast to position 46°37′02″ N., 090°50′20″ W.; and ending southwest at position 46°36′12″ N., 090°51′51″ W. All vessels transiting through the no-wake zone will be required to travel at an appropriate rate of speed that does not create a wake except as may be permitted by the COTP or a designated representative. The precise times and date of enforcement for this special local regulation will be determined annually.

The COTP, Duluth, will use all appropriate means to notify the public when the special local regulation in this rule will be enforced. Such means may include publication in the **Federal Register** a Notice of Enforcement, Broadcast Notice to Mariners, and Local Notice to Mariners. The regulatory text appears at the end of this document.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

E.O.s 12866 (''Regulatory Planning and Review'') and 13563 (''Improving Regulation and Regulatory Review'') direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits including potential economic, environmental, public health and safety effects, distributive impacts, and equity. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (''Reducing Regulation and Controlling Regulatory Costs''), directs agencies to reduce regulation and control regulatory costs and provides that ''for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.''

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget (OMB) has not reviewed it.

As this rule is not a significant regulatory action, this rule is exempt from the requirements of Executive Order 13771. See OMB's Memorandum titled ''Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017 titled 'Reducing Regulation and Controlling Regulatory Costs' '' (February 2, 2017).

This regulatory action determination is based on the size, location, duration, and time-of-year of the Special Local Regulation. Vessel traffic will be able to safely transit through the no-wake zone which will be 200 yards wide and will impact only a small designated area of Lake Superior in Chequamegon Bay between Washburn, WI and Ashland, WI during a time of year when commercial vessel traffic is normally low. Moreover, the Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and

operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit through the no-wake zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule will have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a no-wake zone being enforced for no more than 5 hours along a prescribed route between Washburn & Ashland, Wisconsin. Normally such actions are categorically excluded from further review under paragraph 34(h) of Figure 2–1 of Commandant Instruction M16475.lD. A preliminary Record of Environmental Consideration and Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233

■ 2. Add § 100. 169 to read as follows:

§ 100. 169 Special Local Regulation; Washburn Board Across the Bay, Lake Superior; Chequamegon Bay, WI.

(a) *Location.* All waters of Chequamegon Bay within 100 yards of either side of an imaginary line beginning in Washburn, WI at position 46°36′52″ N., 090°54′24″ W.; thence southwest to position 46°38′44″ N., 090°54′50″ W.; thence southeast to position 46°37′02″ N., 090°50′20″ W.; and ending southwest at position 46°36′12″ N., 090°51′51″ W.

(b) *Effective period.* This annual event historically occurs within the third or fourth week of July. The COTP, Duluth, will announce enforcement dates via Notice of Enforcement, Local Notice to Mariners, Broadcast Notice to Mariners, on-scene designated representatives, or other forms of outreach.

(c) *Regulations.* Vessels transiting within the regulated area shall travel at a no-wake speed except as may be permitted by the COTP, Duluth or a designated on-scene representative. Additionally, vessels shall yield right-of-way for event participants and event safety craft and shall follow directions given by event representatives during the event.

Dated: May 26, 2017.

E.E. Williams,

Commander, U.S. Coast Guard, Captain of the Port Duluth.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2017–0470]

Drawbridge Operation Regulation; Swinomish Channel, Whitmarsh, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Northern Santa Fe Railroad Company (BNSF) Railroad Swing Span Drawbridge 12A across Swinomish Channel, mile 8.4,

near Whitmarsh, WA. This deviation is necessary to accommodate replacement of the bridge protective fendering system. The deviation allows the bridge to remain in the closed-to-navigation position at various times based on low tide predictions; and also allows the swing span to not completely open at various times detained herein.

DATES: This deviation is effective from 7 a.m. on July 1, 2017 to 6 p.m. on November 30, 2017.

ADDRESSES: The docket for this deviation, [USCG–2017–0470] is available at *http://www.regulations.gov*. Type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206–220–7282, email *d13-pf-d13bridges@uscg.mil.*

SUPPLEMENTARY INFORMATION: BNSF (bridge owner) has requested the BNSF Railroad Swing Span Drawbridge 12 be allowed to close the span, and need not open to marine traffic to facilitate fender replacements. The BNSF Railroad Swing Span Drawbridge 12A crosses the Swinomish channel, mile 8.4, near Whitmarsh, WA. The swing span provides 8 feet of vertical clearance in the closed-to-navigation position, and 100 feet of horizontal clearance in the open-to-navigation position. The span provides unlimited vertical clearance in the open-to-navigation position. Vertical and horizontal clearances are referenced to mean high-water elevation.

The closures of the BNSF Railroad Swing Span Drawbridge for the fender replacements will depend on the tidal status of the river, which means that work (and closure), will occur on different times on different days. The specific times of the bridge closures will be published in the weekly Coast Guard Local Notice to Mariners. BNSF work requires the swing span to be in the closed-to-navigation position when the ebb tide height reaches plus three feet above Mean Tide Level, and open the span when the flood tide height reaches plus three feet above Mean Tide Level. The deviation period allows the subject bridge to be in the closed-to-navigation position from 6 a.m. on July 1, 2017 to 6 p.m. on November 30, 2017, when the river is a plus three foot ebb tide, and open the bridge span on a plus three foot flood tide Monday through Saturday. However, if the project gets delayed, work on Sundays will be required.

The swing span at various times will only be able to open to 97 percent. This reduces the horizontal navigation clearance by five feet—from 100 feet to 95 feet. The five feet of horizontal clearance is needed to position work barges at various locations to replace fenders.

During the dates and times of the deviation, the drawbridge will not be able to operate according to the normal operating schedule. This drawbridge normally operates in accordance with 33 CFR 117.5. The subject bridge is normally maintained in the open-to-navigation position. The bridge shall operate in accordance to 33 CFR 117.5 at all other times. Waterway usage on the Swinomish Channel includes commercial tugs and barges, U.S. Coast Guard vessels, and large to small pleasure craft. The Coast Guard provided notice of this deviation to local mariners via the Local Notice Mariners and emails. One objection was submitted to the Coast Guard, and requested bridge closure times be posted in the Local Notice to Mariners. As stated herein, specific times will be published in the weekly Local Notice to Mariners.

Vessels will not be able to pass through the swing span via the marked navigation channel during the closure times. Working barges will be positioned in the channel at the bridge during the closed-to-navigation periods preventing safe passage. An alternate route is via the southern Swinomish Channel using Skagit Bay. The bridge will not be able to open for vessels responding to emergencies during the stated closure times. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 23, 2017.

Steven M. Fischer,

Bridge Administrator, Thirteenth Coast Guard District.

[FR Doc. 2017–13745 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2017–0365]

Drawbridge Operation Regulation; Lewis Creek Channel, Chincoteague, VA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the SR 175 Bridge that carries the SR 175 across the Lewis Creek Channel, mile 0.0, at Chincoteague, VA. The deviation is necessary to facilitate the Annual Pony Run. This deviation allows the bridge to remain in the closed-to-navigation position.

DATES: The deviation is effective from 7 a.m. on Wednesday July 26, 2017, through 5 p.m. on Thursday July 27, 2017.

ADDRESSES: The docket for this deviation, [USCG–2017–0365] is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH''. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Michael Thorogood, Bridge Administration Branch Fifth District, Coast Guard, telephone 757–398–6557, email *Michael.R.Thorogood@uscg.mil*.

SUPPLEMENTARY INFORMATION: The Virginia Department of Transportation, owner and operator of the SR 175 Bridge that carries the SR 175 Bridge across the Lewis Creek Channel, mile 0.0, at Chincoteague, VA, has requested a temporary deviation from the current operating regulations to ensure the safety of the increased volumes of spectators that will be attending Annual Pony Run on Wednesday July 26, 2017, and Thursday July 27, 2017. This bridge is a bascule span drawbridge with a vertical clearance of 15 feet above mean high water in the closed position and unlimited vertical clearance in the open position. The current operating regulation is set out in 33 CFR 117.5. Under this temporary deviation, the bridge will be maintained in the closed-to-navigation position from 7 a.m. to 5 p.m. on Wednesday July 26, 2017 and Thursday July 27, 2017.

The Lewis Creek Channel is used by recreational vessels. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. The bridge will be able to open for emergencies and there is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The Coast Guard will also inform the users of the waterway through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 26, 2017.

Hal R. Pitts,

Bridge Program Manager, Fifth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0617]

Safety Zones; Annual Firework Displays Within the Captain of the Port, Puget Sound

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce five safety zones for annual firework displays in the Captain of the Port, Puget Sound Zone during the dates and times noted under **SUPPLEMENTARY INFORMATION.** This action is necessary to prevent injury and to protect life and property of the maritime public from the hazards associated with the firework displays. During the enforcement periods, entry into, transit through, mooring, or anchoring within these safety zones is prohibited unless authorized by the Captain of the Port, Puget Sound or their Designated Representative.

DATES: The regulations in 33 CFR 165.1332 will be enforced for the five safety zones listed under **SUPPLEMENTARY INFORMATION** from 5 p.m. on July 4, 2017, through 1 a.m. on July 5, 2017 during the dates and times specified.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, call or email Petty Officer Zachary Spence, Sector Puget Sound Waterways Management, Coast Guard; telephone 206–217–6051, *SectorPugetSoundWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce regulations for the following five safety zones established for Annual Fireworks Displays within the Captain of the Port, Puget Sound Area of Responsibility in 33 CFR 165.1332 during the dates and times noted in the table below.

The following safety zones will be enforced from 5 p.m. on July 4, 2017, through 1 a.m. on July 5, 2017:

Event name	Location	Latitude	Longitude
Tacoma Freedom Fair	Commencement Bay	47°17.103′ N.	122°28.410′ W.
Friday Harbor Independence	Friday Harbor	48°32.255′ N.	123°0.654.033′ W.
Three Tree Point Community Fireworks	Three Tree Point	47°27.033′ N.	122°23.15′ W.
Everett 4th of July	Port Gardner	48°0.672′ N.	122°13.391′ W.
Seattle Seafair	Lake Washington	47° 34.333′ N.	122° 16.017′ W.

The special requirements listed in 33 CFR 165.1332(b) apply to the activation and enforcement of these safety zones. All vessel operators who desire to enter the safety zone must obtain permission from the Captain of the Port or their Designated Representative by contacting the Coast Guard Sector Puget Sound Joint Harbor Operations Center (JHOC) on VHF Ch 13 or Ch 16 or via telephone at (206) 217–6002.

The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation.

This notice of enforcement is issued under authority of 33 CFR 165.1332 and 5 U.S.C. 552(a). In addition to the publication of this document in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advanced notification of enforcement of these safety zones via the Local Notice to Mariners and marine information broadcasts on the day of the events.

Dated: June 26, 2017.

L.A. Sturgis,

Captain, U.S. Coast Guard, Captain of the Port Puget Sound.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0613]

Safety Zone; City of Richmond Fourth of July Fireworks Display, San Francisco Bay, Richmond, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the annual City of Richmond Fourth of July Fireworks Display in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 9, will be enforced from 8 a.m. on July 1, 2017 to 10 p.m. on July 3, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a 100 foot safety zone around the fireworks barge during the loading, transit, and arrival of the fireworks barge from the loading location to the display location and until the start of the fireworks display. From 8 a.m. on July 1, 2017 until 5 p.m. on July 3, 2017, the fireworks barge will be loading pyrotechnics from Pier 50 in San Francisco, CA. The fireworks barge will remain at the loading location until its transit to the display location. From 6 p.m. to 8:30 p.m. on July 3, 2017, the loaded fireworks barge will transit from Pier 50 to the launch site in Richmond Marina in approximate position 37°54′40″ N., 122°21′05″ W. (NAD 83) where it will remain until the conclusion of the fireworks display. Upon the commencement of the 20-minute fireworks display, scheduled to begin at 9:30 p.m. on July 3, 2017, the safety zone will increase in size and encompass the navigable waters around and under the fireworks barge within a radius 560 feet in Richmond Marina in approximate position 37°54′40″ N., 122°21′05″ W. (NAD 83) for the Fourth of July Fireworks, City of Richmond in 33 CFR 165.1191, Table 1, Item number 9. This safety zone will be in effect from 8 a.m. on July 1, 2017 until 10 p.m. on July 3, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so. This notice is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 4, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

[FR Doc. 2017–13841 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0589]

Safety Zone; Delaware River, Philadelphia, PA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a safety zone regulation for an annual fireworks event on the Delaware River, Philadelphia, PA from 9:30 p.m. to 11:30 p.m. on June 30, 2017 and July 1, 2017. Enforcement of this safety zone is necessary and intended to ensure safety of life on navigable waters immediately prior to, during, and immediately after these fireworks events. During the enforcement periods, no vessel may transit this regulated area without approval from the Captain of the Port or a designated representative.

DATES: The regulations in 33 CFR 165.506 will be enforced from 9:30 p.m. to 11:30 p.m. on June 30, 2017 and July 1, 2017, for the safety zone listed in the Table to § 165.506, line (a.)(16).

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, you may call or email MST2 Amanda Boone, Sector Delaware Bay Waterways Management Division, U.S. Coast Guard; telephone 215–271–4889, email *Amanda.N.Boone@uscg.mil.*

SUPPLEMENTARY INFORMATION: From 9:30 p.m. to 11:30 p.m. on June 30, 2017 and July 1, 2017, the Coast Guard will enforce the safety zone regulation listed in the Table to 33 CFR 165.506 (a.)(16) that takes place on the Delaware River, Philadelphia, PA. This action is being taken to enhance the safety of life on navigable waterways during the fireworks display.

Coast Guard regulations for recurring firework events in Captain of the Port Delaware Bay Zone, are published in § 165.506, Safety Zones; Fireworks Displays within the Fifth Coast Guard District, which specifies the location of the regulated area for this safety zone as all waters of Delaware River, adjacent to Penns Landing, Philadelphia, PA, bounded from shoreline to shoreline, bounded on the south by a line running east to west from points along the shoreline at latitude 39°56′31.2″ N., longitude 075°08′28.1″ W.; thence west to latitude 39°56′29.1″ N., longitude 075°07′56.5″ W., and bounded on the north where the Benjamin Franklin Bridge crosses the Delaware River.

As specified in § 165.506, during the enforcement period, no vessel or person may enter, transit through, anchor in, or remain within the regulated area unless authorized by the Captain of the Port Delaware Bay or a designated representative. If permission is granted, all persons and vessels shall comply with the instructions of the COTP, designated representative or Patrol Commander.

This notice of enforcement is issued under authority of 33 CFR 165.506 and 33 U.S.C. 1233. The Coast Guard will provide the maritime community with advanced notice of enforcement of regulation by Broadcast Notice to Mariners (BNM), Local Notice to Mariners and on-scene actual notice by designated representative. In the event Captain of the Port Delaware Bay determines that it's not necessary to enforce the regulated area for the entire duration of the enforcement period, a BNM will be issued to authorize general permission to enter the regulated area.

Dated: Jun 27, 2017.

Scott E. Anderson,

Captain, U.S. Coast Guard, Captain of the Port Delaware Bay.

[FR Doc. 2017–13917 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0539]

Safety Zones; Coast Guard Sector Ohio Valley Annual and Recurring Safety Zones

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulations.

SUMMARY: The Coast Guard will enforce several recurring safety zones on navigable waterways within Sector Ohio Valley. This regulatory action is necessary to provide for the safety of life and protection of vessels from the hazards associated with fireworks displays, festivals, and events. During the enforcement period, entry into these safety zones is prohibited unless

specifically authorized by the Captain of the Port Ohio Valley (COTP) or a designated representative.

DATES: The regulations in 33 CFR 165.801, Table 1, will be enforced for the safety zones within Sector Ohio Valley as identified in **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, call or email Petty Officer James Robinson, Sector Ohio Valley, U.S. Coast Guard; telephone 502–779–5347, email *James.C.Robinson@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zones in 33 CFR 165.801, Table 1, lines 13, 17, 19, 21, 22, 23, 24, 25, 26, 27, 29, 50, and 69 as follows:

Line 13, Riverview Park Independence Festival, from 9:30 p.m. through 11 p.m. on July 1, 2017; Line 17, Louisville Bats Firework Show, from 9 p.m. through 11 p.m. on July 4, 2017; Line 19, All American 4th of July, from 9 p.m. through 10 p.m. on July 4, 2017; Line 21, Spirit of Freedom Fireworks, from 9 p.m. through 9:30 p.m. on July 4, 2017; Line 22, Lighting up the Cumberlands Fireworks, from 9 p.m. through 9:30 p.m. on July 1, 2017; Line 23, Knoxville July 4th Fireworks, from 9:40 p.m. through 10:10 p.m. on July 4, 2017; Line 24, Music City July 4th, from 9 p.m. through 9:30 p.m. on July 4, 2017; Line 25, Grand Harbor Marina July 4th Celebration, from 10 p.m. through 10:20 p.m. on July 1, 2017; Line 26, City of Bellevue, KY/Bellevue Beach Park Concert Fireworks, from 9 p.m. through 11 p.m. on July 08, 2017; Line 27, Cincinnati Bell, WEBN, and Proctor Riverfest, from 12 p.m. to 10 p.m. on September 3, 2017; Line 29, City of Point Pleasant/Point Pleasant Sternwheel Fireworks, from 9:30 p.m. through 10 p.m. on July 1, 2017; Line 50, Evansville Freedom Celebration, from 9:45 p.m. through 10:15 p.m. on July 4, 2017; and Line 69, Newburgh Fireworks Display, from 9:45 p.m. through 10:10 p.m. on July 1, 2017. The regulations for the Coast Guard Sector Ohio Valley Annual and Recurring Safety Zones, § 165.801, Table 1, specifies the locations of these safety zones. As specified in § 165.23, during the enforcement period, no vessel may transit these safety zones without approval from the Captain of the Port Ohio Valley (COTP) or a designated representative. Sector Ohio Valley may be contacted on VHF–FM radio channel 16 or phone at 1–800–253–7465.

This notice of enforcement is issued under authority of 33 CFR 165.801 and 5 U.S.C. 552(a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via Local Notice to Mariners and updates via Marine Information Broadcasts.

Dated: June 26, 2017.

M.B. Zamperini,

Captain, U.S. Coast Guard, Captain of the Port Ohio Valley.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0606]

Safety Zone; Fourth of July Fireworks, City of Pittsburg, Suisun Bay, Pittsburg, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the City of Pittsburg Fourth of July Fireworks display, in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 13 will be enforced from 9:30 p.m. to 10 p.m. on July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone established in 33 CFR 165.1191, Table 1, Item number 13 on July 4, 2017. Upon commencement of the 20 minute fireworks display, scheduled to begin at 9:30 p.m. on July 4, 2017, the safety zone will encompass the navigable waters surrounding the land based launch site on the Pittsburg Marina Pier in approximate position 38°02′32″ N., 121°53′19″ W. (NAD 83). Upon the conclusion of the fireworks display the safety zone shall terminate. This safety zone will be in effect from 9:30 p.m. to 10 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice of enforcement is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notification in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notification, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 4, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0610]

Safety Zone; Execpro Services Fourth of July Fireworks, Incline Village, NV

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the annual Execpro Services Fourth of July Fireworks Display in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the

hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 28, will be enforced from 6 a.m. on July 1, 2017 to 10:30 p.m. on July 3, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil*.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a 100 foot safety zone around the fireworks barge during the loading, transit, and arrival of the fireworks barge from the loading location to the display location and until the start of the fireworks display. From 6 a.m. on July 1, 2017 until 8 a.m. on July 1, 2017, the fireworks barge will be loading pyrotechnics Obexers Marina in Homewood, CA. The fireworks barge will remain at the loading location until its transit to the display location. From approximately 8 a.m. to 10 a.m. on July 1, 2017, the loaded fireworks barge will transit from Obexers Marina to the launch site off-shore from Incline Village, NV in approximate position 39°13′54″ N., 119°56′25″ W. (NAD 83) where it will remain until the conclusion of the fireworks display. Upon the commencement of the 24-minute fireworks display, scheduled to begin at 9:30 p.m. on July 3, 2017, the safety zone will increase in size and encompass the navigable waters around and under the fireworks barge within a radius 1,000 feet, off-shore from Incline Village, NV, in approximate position 39°13′54″ N., 119°56′25″ W. (NAD 83) for the Execpro Services Fourth of July Fireworks in 33 CFR 165.1191, Table 1, Item number 28. This safety zone will be in effect from 6 a.m. on July 1, 2017 until 10:30 p.m. on July 3, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM.

Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice of enforcement is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552 (a). In addition to this notification in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 1, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0310]

RIN 1625–AA00

Safety Zone: Vengeance Sunken Barge, San Francisco, CA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone in support of the environmental and salvage response operation to the sunken barge Vengeance in the San Francisco Bay, east of Yerba Buena Island and north of the Oakland Outer Harbor Entrance Channel near Oakland, CA. All vessel traffic is prohibited from transiting the area to allow safe response operations to be conducted. All vessels are prohibited from entering into, transiting through, or remaining in the safety zone without permission of the Captain of the Port or their designated representative.

DATES: This rule is effective without actual notice from June 30, 2017 until July 31, 2017. For the purposes of enforcement, actual notice will be used from June 1, 2017 until June 30, 2017.

ADDRESSES: Documents mentioned in this preamble are part of docket USCG–2017–0310. To view these documents go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Marcia Medina, U.S. Coast Guard Sector San Francisco; telephone (415) 399–7443 or email at *D11-PF-MarineEvents@uscg.mil*.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

APA Administrative Procedures Act
CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NAD North American Datum of 1983
NPRM Notice of Proposed Rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.''

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a NPRM. Publishing an NPRM would be impractical due to the emergent nature of the environmental and salvage response to be conducted on the barge Vengeance.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. The Coast Guard finds that it is impracticable to provide notice and receive comment due to the emergent nature of the environmental and salvage response to be conducted on the barge Vengeance.

III. Legal Authority and Need for Rule

The legal basis for the proposed rule is 33 U.S.C 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to establish safety zones.

The sunken barge Vengeance creates a significant underwater hazard to navigation to vessels transiting the San Francisco Bay. The response operations are complex in nature and involve

multiple vessels. These operations, when conducted in close proximity to transiting vessels, create unpredictable hazards, hence necessitating a safety zone restricting all vessel traffic within this impacted area until environmental response operations are complete. This safety zone establishes a temporary restricted area on the navigable waters of the San Francisco Bay, east of Yerba Buena Island and north of Oakland Outer Harbor Entrance Channel within the following points: 37°48.549′ N. 122°20.891′ W., 37°48.498′ N. 122°21.134′ W., 37°48.346′ N. 122°21.068′ W., and 37°48.461′ N. 122°20.782′ W. (NAD 83). This restricted area applies to all vessels transiting the specified area.

IV. Discussion of the Rule

The Coast Guard or a designated representative will enforce a safety zone in navigable waters of the San Francisco Bay, east of Yerba Buena Island and north of Oakland Outer Harbor Entrance Channel within the following points: 37°48.549′ N. 122°20.891′ W., 37°48.498′ N. 122°21.134′ W., 37°48.346′ N. 122°21.068′ W., and 37°48.461′ N. 122°20.782′ W. (NAD 83).

This safety zone is effective from June 1, 2017 through on July 31, 2017 or as announced via Broadcast Notice to Mariners.

The effect of the temporary safety zone will be to restrict navigation in the vicinity of the sunken barge Vengeance until the environmental and salvage response operations are complete. Except for persons or vessels authorized by the Captain of the Port or a designated representative, no vessel may enter or remain in the restricted area. These regulations are needed to keep vessels safely outside of the response zone until environmental and salvage response operations are complete.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive order related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

E.O.s 12866 (''Regulatory Planning and Review'') and 13563 (''Improving Regulation and Regulatory Review'') direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits including potential economic, environmental, public health and safety effects, distributive impacts, and equity. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (''Reducing Regulation and Controlling Regulatory Costs''), directs agencies to reduce regulation and control regulatory costs and provides that ''for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.''

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget (OMB) has not reviewed it.

As this rule is not a significant regulatory action, this rule is exempt from the requirements of Executive Order 13771. See OMB's Memorandum titled ''Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017 titled 'Reducing Regulation and Controlling Regulatory Costs' '' (February 2, 2017).

We expect the economic impact of this rule will not rise to the level of necessitating a full Regulatory Evaluation. The safety zone is limited in duration, and is limited to a narrowly tailored geographic area. In addition, although this rule restricts access to the waters encompassed by the safety zone, the effect of this rule will not be significant because it is outside of the Oakland Outer Harbor Entrance Channel and will be notified via public Broadcast Notice to Mariners to ensure the safety zone will result in minimum impact. The entities most likely to be affected are waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule may affect the following entities, some of which may be small entities: Owners and operators of waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities and sightseeing, if these facilities or vessels are in the vicinity of the safety zone at times when this zone is being enforced. This rule will not have a significant economic impact on a substantial number of small entities for the following reasons: (i) This rule will encompass only a small portion of the waterway for a limited period of time, (ii) vessel traffic can transit safely around the safety zone, and (iii) the maritime public will be advised in advance of this safety zone via Broadcast Notice to Mariners.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone of limited size and duration. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. A Record of Environmental Consideration for categorically excluded actions is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T11–857 to read as follows:

§ 165.T11–857 Safety Zone; Vengeance Sunken Barge, San Francisco, CA.

(a) *Location.* This temporary safety zone is established in the navigable waters of San Francisco Bay, east of Yerba Buena Island and north of Oakland Outer Harbor Entrance Channel within the following points: 37°48.549′ N. 122°20.891′ W., 37°48.498′ N. 122°21.134′ W., 37°48.346′ N. 122°21.068′ W., and 37°48.461′ N. 122°20.782′ W. (NAD 83).

(b) *Enforcement period.* The zone described in paragraph (a) of this section will be enforced from June 1, 2017 through July 31, 2017 or as announced via Broadcast Notice to Mariner. The Captain of the Port San Francisco (COTP) will notify the maritime community of any changes to this enforcement period via Broadcast Notice to Mariners in accordance with 33 CFR 165.7.

(c) *Definitions.* As used in this section, ''designated representative'' means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer on a Coast Guard vessel or a Federal, State, or local officer designated by or assisting the COTP in the enforcement of the safety zone.

(d) *Regulations.* (1) Under the general regulations in 33 CFR part 165, subpart C, entry into, transiting or anchoring within this safety zone is prohibited unless authorized by the COTP or a designated representative.

(2) The safety zone is closed to all vessel traffic, except as may be permitted by the COTP or a designated representative.

(3) Vessel operators desiring to enter or operate within the safety zone must contact the COTP or a designated representative to obtain permission to do so. Vessel operators given permission to enter or operate in the safety zone must comply with all directions given to them by the COTP or a designated representative. Persons and vessels may request permission to enter the safety zone through the 24-hour Command Center at telephone (415) 399–3547 or on VHF channel 16.

Dated: June 1, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port San Francisco.

[FR Doc. 2017–13648 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2016–0825]

RIN 1625–AA00

Safety Zone; United Illuminating Company, Housatonic River Crossing Project; Milford and Stratford, CT

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is amending a temporary safety zone on the Housatonic River near Milford and Stratford, CT. Amending the safety zone is necessary to protect personnel, vessels, and the marine environment from potential hazards created by the United Illuminating Company Housatonic River Crossing Project. This regulation prohibits entry of vessels or people into the safety zone unless authorized by the Captain of the Port Sector Long Island Sound. The safety zone will only be enforced during cable pulling operations or other instances which may create a hazard to navigation.

DATES: This rule is effective without actual notice from June 30, 2017 through August 31, 2017. For the purposes of enforcement, actual notice will be used from June 12, 2017 through June 30, 2017.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2016–0825 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, contact Petty Officer Katherine Linnick, Prevention Department, U.S. Coast Guard Sector Long Island Sound,

telephone (203) 468–4565, email *Katherine.E.Linnick@uscg.mil*.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
LIS Long Island Sound
NPRM Notice of Proposed Rulemaking
NAD 83 North American Datum 1983
TFR Temporary final rule

II. Background Information and Regulatory History

This rulemaking amends a temporary safety zone for certain waters of the Housatonic River near Milford and Stratford, CT. Corresponding regulatory history is discussed below.

On August 25, 2016, United Illuminating Company notified the Coast Guard that it would conduct a project involving the installation of new transmission conductors over the Housatonic River near Stratford and Milford, CT. On March 14, 2017, the Coast Guard published a NPRM entitled, ''Safety Zone; United Illuminating Company Housatonic River Crossing Project; Housatonic River; Milford and Stratford, CT'' in the **Federal Register** (80 FR 13572). There we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this transmission project. During the comment period that ended April 13, 2017, we received zero comments.

On May 22, 2017, the Coast Guard published a TFR entitled, ''Safety Zone; United Illuminating Company Housatonic River Crossing Project; Housatonic River; Milford and Stratford, CT'' in the **Federal Register** (82 FR 23144). This project was schedule to be completed in two phases. The first phase involving the stringing of optical fiber ground wires on the North circuit of the project was scheduled to begin on April, 26, 2017 through May 4, 2017. The second phase involves the stringing of optical fiber ground wires on the South circuit from July 29, 2017 through August 3, 2017.

On May 10, 2017, United Illuminating Company notified the Coast Guard that due to foul weather it was behind schedule and was unable to complete phase one as described in the above-mentioned TFR. The project is now scheduled to begin on June 12, 2017 and be completed by August 31, 2017. Due to fluctuations in the project's schedule, the safety zone is being amended to permit enforcement of the safety zone during re-scheduled cable installation operations or other instances which may cause a hazard to navigation. The COTP Long Island Sound (LIS) has determined that the potential hazards associated with the cable installation project could be a safety concern for anyone within the work area. The work area is between the eastern and western shores of the Housatonic River. The southern boundary of the work zone begins at the Metro-North Rail Bridge and extends north approximately 525 feet upstream.

The Coast Guard is amending § 165.T01–0825 without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM with respect to this rule because doing so would be impracticable and contrary to the public interest. The late finalization of project details after weather delays did not give the Coast Guard enough time to publish an NPRM, take public comments regarding the amendments to § 165.T01–0825, and issue a new final rule before the rescheduled cable crossing operation is set to begin. It would be impracticable and contrary to the public interest to delay promulgating the amendments to this rule as it is necessary to protect the safety of the public and waterway users.

Under 5 U.S.C. 553(d)(3), and for the same reasons stated in the preceding paragraph, the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

III. Legal Authority and Need for Rule

The legal basis for this temporary rule is 33 U.S.C. 1231. The COTP LIS has determined that potential hazards associated with the river cable crossing project starting on June 12, 2017 and continuing through August 31, 2017 will be a safety concern for anyone within the work zone. This rule is needed to protect people and vessels within the safety zone while the cable crossing project is completed.

IV. Discussion of the Rule

This rule amends the temporary safety zone in § 165.T01–0825. The safety zone will cover all navigable waters of the Housatonic River near Milford and Stratford, CT contained within the following area: Beginning at a point on land in position at 41°12′17″ N., 073°06′40″ W. near the Governor John Davis Lodge Turnpike (I–95) Bridge; then northeast across the Housatonic River to a point on land in position at 41°12′20″ N., 073°06′29″ W. near the Governor John Davis Lodge Turnpike (I–95) Bridge; then northwest along the shoreline to a point on land in position at 41°12′25″ N., 073°06′31″ W.; then southwest across the Housatonic River to a point on land in position at 41°12′22″ N., 073°06′43″ W.; then southeast along the shoreline back to point of origin (NAD 83). All positions are approximate. The duration of the zone is intended to ensure the safety of people and vessels in these navigable waters during any instance that necessitates a temporary closure of the Housatonic River at the work site. The safety zone will only be enforced during cable installation operations or other instances, when they cause a hazard to navigation. During enforcement periods, no vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

The Coast Guard will notify the public and local mariners of this safety zone through appropriate means, which may include, but are not limited to, publication in the **Federal Register**, the Local Notice to Mariners, and Broadcast Notice to Mariners via VHF–FM marine channel16 eight hours in advance of any scheduled enforcement period. The regulatory text we are enforcing appears at the end of this document.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, and duration of the safety zone which will affect a small, designated area of the Housatonic River for less than one hour

at a time. It also may be enforced temporarily during the cable installation project if necessitated by an emergency. The Coast Guard will issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone, and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit this regulated area may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator. Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This temporary rule involves a safety zone enforced for less than one hour at a time that would prohibit entry within the work zone during cable installation. It also may be enforced temporarily during the cable installation project if necessitated by an emergency, such as equipment falling from the towers into the Housatonic River. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure 2–1 of Commandant Instruction M16475.lD. A Record of Environmental Consideration (REC) is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 165.T01–0825 to read as follows:

§ 165.T01–0825 Safety Zone; United Illuminating Company; Housatonic River Crossing Project; Milford and Stratford, CT.

(a) *Location.* The following area is a safety zone: All navigable waters of the Housatonic River near Milford and Stratford, CT contained within the following area; beginning at a point on land in position at 41°12′17″ N., 073°06′40″ W. near the Governor John Davis Lodge Turnpike (I–95) Bridge; then northeast across the Housatonic River to a point on land in position at 41°12′20″ N., 073°06′29″ W. near the Governor John Davis Lodge Turnpike (I–95) Bridge; then northwest along the shoreline to a point on land in position at 41°12′25″ N., 073°06′31″ W.; then southwest across the Housatonic River to a point on land in position at 41°12′22″ N., 073°06′43″ W.; then southeast along the shoreline back to point of origin (NAD 83). All positions are approximate.

(b) *Effective and enforcement period.* This rule will be effective from 8:00 a.m. on June 12, 2017 to 6:00 p.m. on August 31, 2017, but will only be enforced during cable installation operations or other instances which may cause a hazard to navigation, when deemed necessary by the Captain of the Port (COTP), Sector Long Island Sound. The Coast Guard will issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 eight hours in advance to any scheduled period of enforcement or as soon as practicable in response to an emergency.

(c) *Definitions.* The following definitions apply to this section: A ''designated representative'' is any Coast Guard commissioned, warrant or petty officer of the U.S. Coast Guard who has been designated by the COTP, Sector Long Island Sound, to act on his or her behalf. The designated representative may be on an official patrol vessel or may be on shore and will communicate with vessels via VHF–FM radio or loudhailer. ''Official patrol vessels'' may consist of any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP, Sector Long Island Sound. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation. A ''work vessel'' is any vessel provided by United Illuminating Company for the Housatonic River Crossing Project and may be hailed via VHF channel 13 or 16.

(d) *Regulations.* (1) The general regulations contained in § 165.23 apply.

(2) In accordance with the general regulations in § 165.23, entry into or movement within this zone is prohibited unless authorized by the COTP Long Island Sound.

(3) Operators of vessels desiring to enter or operate within the safety zone should contact the COTP Long Island Sound at 203–468–4401 (Sector Long Island Sound Command Center) or the designated representative via VHF channel 16 to obtain permission to do so. Request to enter or operate in the safety zone must be made 24 hours in advanced of the planned undertaking.

(4) Mariners are requested to proceed with caution after passing arrangements have been made. Mariners are requested to cooperate with the United Illuminating Company work vessels for the safety of all concerned. The United Illuminating Company work vessels will be monitoring VHF channels 13 and 16. Mariners are requested to proceed with extreme caution and operate at their slowest safe speed as to not cause a wake.

(5) Any vessel given permission to enter or operate in the safety zone must comply with all directions given to them by the COTP Long Island Sound, or the designated on-scene representative.

(6) Upon being hailed by a U.S. Coast Guard vessel by siren, radio, flashing light or other means, the operator of the vessel shall proceed as directed.

Dated: June 8, 2017.

A.E. Tucci,

Captain, U. S. Coast Guard, Captain of the Port Long Island Sound.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0608]

Safety Zone; Fourth of July Fireworks Display, Tahoe City, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Fourth of July Fireworks Display, Tahoe City, CA in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 15, will be enforced from 7 a.m. to 10:30 p.m. on July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Lieutenant Junior Grade Christina Ramirez, Sector San Francisco Waterways Safety Division, U.S. Coast Guard; telephone 415–399–2001, email *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone in navigable waters around and under the fireworks barge within a radius of 100 feet during the loading, transit, and arrival of the fireworks barge to the display location and until the start of the fireworks display. From 7 a.m. until 10 a.m. on July 4, 2017, the fireworks barge will be loading pyrotechnics at the Kings Beach Boat Ramp, in Kings Beach, CA. From approximately 10 a.m. to noon on July 4, 2017, the loaded fireworks barge will transit from the Kings Beach Boat Ramp to the launch site off of Commons Beach in Tahoe City, CA in approximate position 39°10′03″ N., 120°08′09″ W. (NAD 83) where it will remain until the commencement of the fireworks display. Upon the commencement of the 20 minute fireworks display, scheduled to begin at approximately 9:30 p.m. on July 4, 2017, the safety zone will increase in size to encompass the navigable waters around and under the fireworks barge within a radius 1,000 feet in approximate position 39°10′03″ N., 120°08′09″ W. (NAD 83) for the Fourth of July Fireworks, Tahoe City, CA in 33 CFR 165.1191, Table 1, Item number 15. This safety zone will be in effect from 7 a.m. until 10:30 p.m. on July 4, 2017. Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners. If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 25, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0607]

Safety Zone; Fourth of July Fireworks, City of Martinez, Carquinez Strait, Martinez, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Fourth of July Fireworks display in the City of Martinez in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 11 will be enforced from 9:30 p.m. to 10 p.m. on July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone established in 33 CFR 165.1191, Table 1, Item number 11 on July 4, 2017. Upon commencement of the 20 minute fireworks display, scheduled to begin at 9:30 p.m. on July 4, 2017, the safety zone will encompass the navigable waters surrounding the land based launch site at Waterfront Park near Martinez, CA within a radius of 560 feet in approximate position 38°01′32″ N., 122°08′24″ W. (NAD 83) for the Fourth of July Fireworks, City of Martinez in 33 CFR 165.1191, Table 1, Item number 11. Upon the conclusion of the fireworks display the safety zone shall terminate. This safety zone will be in effect from 9:30 p.m. to approximately 10 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice of enforcement is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notification in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notification, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 4, 2017.

[Docket No. USCG–2017–0604]

Safety Zone; Red, White, and Tahoe Blue Fireworks, Incline Village, NV

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Red, White, and Tahoe Blue Fireworks display in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 19, will be enforced without actual notice from June 30, 2017, until July 4, 2017. For the purposes of enforcement, actual notice will be used from June 28, 2017 through June 30, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Lieutenant Junior Grade Christina Ramirez, Sector San Francisco Waterways Safety Division, U.S. Coast Guard; telephone 415–399–2001, email *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone in navigable waters around and under the fireworks barges within a radius of 100 feet during the loading of the fireworks barges at the display location and until the start of the fireworks display. From 12:20 p.m. on June 28, 2017 until 5 p.m. on July 4, 2017 the fireworks barges will be loaded in the vicinity of Incline Beach, near Incline Village, NV at approximate position 39°14′13″ N., 119°57′01″ W. (NAD 83) where they will remain until the commencement of the fireworks display. Upon the commencement of the 35-minute fireworks display, scheduled to start at approximately 9:30 p.m. on July 4, 2017, the safety zone will increase in size to encompass the navigable waters around and under the fireworks barges within a radius of 1,000 feet at approximate position 39°14′13″ N., 119°57′01″ W. (NAD 83) for the Red, White, and Tahoe Blue Fireworks, Incline Village, NV in 33 CFR 165.1191, Table 1, Item number 19. This safety zone will be in effect from 12:20 p.m. on June 28, 2017 until 10:30 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This document is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). Safety Zone; Delta Independence Day Celebration Fireworks

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Delta Independence Day Celebration Fireworks in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 14 will be enforced from 8 a.m. to 10:30 p.m. July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a 100 foot safety zone around the fireworks barge during the loading, transit, and arrival of the fireworks barge to the display location and until the start of the fireworks display. From 8 a.m. until 9 a.m. on July 4, 2017, the fireworks barge will be loading off of Dutra Corporation Yard in Rio Vista, CA. From approximately 9 a.m. to 2 p.m. on July 4, 2017 the loaded barge will transit from Dutra Corporation Yard to the launch site near Venice Island, CA in approximate position 38°03′21″ N., 121°32′03″ W. (NAD83). The fireworks barge will remain at launch site until the commencement of the fireworks display. Upon the commencement of the 20-minute fireworks display, scheduled to begin at approximately 9:30 p.m. on July 4, 2017, the safety zone will increase in size and encompass the navigable waters around and under the fireworks barge within a radius 1,000 feet in approximate position 38°03′21″

N., 121°32′03″ W. (NAD83) for the Delta Independence Day Celebration Fireworks in 33 CFR 165.1191, Table 1, Item number 14. This safety zone will be in effect from 8 a.m. to 10:30 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners. If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2017–0468]

RIN 1625–AA00

Safety Zone; Severn River, Sherwood Forest, MD

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for certain waters of the Severn River. This action is necessary to provide for the safety of life on the navigable waters of Sherwood Forest near Annapolis, MD, during a fireworks display on July 3, 2017. This action will prohibit persons and vessels from entering the safety zone unless authorized by the Captain of the Port Maryland-National Capital Region or a designated representative.

DATES: This rule is effective from 8 p.m. on July 3, 2017, until 10:30 p.m. on July 7, 2017.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2017–0468 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On December 29, 2016, the Sherwood Forest Club, Inc. of Sherwood Forest, MD notified the Coast Guard that from 9:15 p.m. to 10 p.m. on July 3, 2017, it will be conducting a fireworks display launched from the end of the Sherwood Forest Club main pier located adjacent to the Severn River, approximately 200 yards east of Brewer Pond in Sherwood Forest, MD. In the event of inclement weather, the fireworks display will be scheduled for July 7, 2017. In response, on April 6, 2017, the Coast Guard published a notice of proposed rulemaking (NPRM) titled ''Special Local Regulations and Safety Zones; Recurring Marine Events and Fireworks Displays Within the Fifth Coast Guard District'' (82 FR 16746). There we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this fireworks display. During the comment period that ended May 8, 2017, we received two comments. While the Coast Guard has made the determination to issue a temporary final rule concerning this year's fireworks display, USCG still plans to issue a final rule in the future to cover this recurring event in future years.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to public interest because immediate action is needed to respond to the potential safety hazards associated with a fireworks display.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The COTP has determined that potential hazards associated with the fireworks to be used in this July 3, 2017 display will be a safety concern for anyone on the Severn River near the end of the Sherwood Forest Club main pier. The purpose of this rulemaking is to ensure the safety of vessels and the navigable waters in the safety zone before, during, and after the scheduled event.

IV. Discussion of Comments, Changes, and the Rule

As noted above, we received two comments on our NPRM published April 6, 2017. Both comments addressed issues not related to this rulemaking. Therefore, there are no changes in the regulatory text of this rule from the proposed rule in the NPRM based on the comments received.

Details of the event were provided to the Coast Guard on May 15, 2017, that allowed the COTP to reassess the potential hazards associated with the fireworks to be used in this July 3, 2017 display. The area of the safety zone at the fireworks discharge site located at end of the Sherwood Forest Club main pier, listed in the Table to 33 CFR 165.506 under Coast Guard Sector Maryland-National Capital Region—COTP Zone as No. (b.)27, is reduced from a 200 yards radius to a 150 yards radius. As a result, there is one change in the regulatory text of this rule from the proposed rule in the NPRM. The safety zone will be reduced in size from 200 yards from the center point located at 39°01′54.0″ N., longitude 076°32′41.8″ W. to a 150 yard radius.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory

alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of the safety zone. Vessel traffic will be able to safely transit around this safety zone which will impact a small designated area of the Severn River for 2½ hours during the evening when vessel traffic is normally low. Moreover, the Coast Guard will issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule might affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting approximately 2½ hours that will prohibit entry within 150 yards of a fireworks discharge site at the end of the Sherwood Forest pier. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure 2–1 of Commandant Instruction M16475.lD. A Record of Environmental Consideration (REC) supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 19133 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T05–0468 to read as follows:

§ 165.0468 Safety Zone; Severn River, Sherwood Forest, MD.

(a) *Definitions.* As used in this section:

Captain of the Port Maryland-National Capital Region means the Commander, U.S. Coast Guard Sector Maryland-National Capital Region.

Designated representative means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port Maryland-National Capital Region to assist in enforcing the safety zone described in paragraph (a) of this section.

(b) *Location.* The following area is a safety zone: All waters of the Severn River, within a 150 yards radius of a fireworks discharge site located at the end of Sherwood Forest Club main pier in approximate position latitude 39°01′54.0″ N., longitude 076°32′41.8″ W., Sherwood Forest, MD. All coordinates refer to datum NAD 1983.

(c) *Regulations.* The general safety zone regulations found in subpart C of this part apply to the safety zone created by this section.

(1) All persons are required to comply with the general regulations governing safety zones found in § 165.23.

(2) Entry into or remaining in this safety zone is prohibited unless authorized by the Coast Guard Captain of the Port Maryland-National Capital Region. All vessels underway within this safety zone at the time it is implemented shall depart the safety zone.

(3) Persons desiring to transit the area of the safety zone must first obtain authorization from the Captain of the Port Maryland-National Capital Region or designated representative. To request permission to enter or transit the regulated area, the Captain of the Port Maryland-National Capital Region or designated representatives can be contacted at telephone number 410–576–2693 or on Marine Band Radio VHF–FM channel 16 (156.8 MHz). The Coast Guard vessels enforcing this section can be contacted on Marine Band Radio VHF–FM channel 16 (156.8 MHz). Upon being hailed by a U.S. Coast Guard vessel, or other Federal, State, or local agency vessel, by siren, radio, flashing light or other means, the operator of a vessel shall proceed as directed. If permission is granted to enter the safety zone, all persons and vessels must comply with the instructions of the Captain of the Port Maryland-National Capital Region or designated representative and proceed as directed while in the zone.

(4) *Enforcement officials.* The U.S. Coast Guard may be assisted in the patrol and enforcement of the safety zone by Federal, State, and local agencies.

(d) *Enforcement period.* This section will be enforced from 8 p.m. through 10:30 p.m. on July 3, 2017, and if necessary due to inclement weather, from 8 p.m. through 10:30 p.m. on July 7, 2017.

Dated: June 22, 2017.

M.W. Batchelder,

Commander, U.S. Coast Guard, Acting Captain of the Port Maryland-National Capital Region.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2017–0502]

RIN 1625–AA00

Safety Zone; Navy Underwater Detonation (UNDET) Exercise, Apra Outer Harbor, GU

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters within Apra Outer Harbor, Guam. The safety zone will encompass a U.S. Navy underwater detonation (UNDET) exercise. The Coast Guard believes this safety zone regulation is necessary to protect the public and exercise participants within the affected area from possible safety hazards associated with the exercise. This safety zone will impact a small designated area of navigable waters in Apra Harbor for 8 hours or less. With the exception of exercise participants, entry of vessels or persons into the zone is prohibited unless specifically authorized by the Captain of the Port Guam.

DATES: This rule is effective from 8 a.m. through 4 p.m. on July 13th, 2017.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2017–0502 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Petty Officer Robin Branch, Sector Guam, U.S. Coast Guard; telephone (671) 355–4835, email *wwmguam@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
E.O. Executive order
FR Federal Register
NPRM Notice of Proposed Rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

After the Coast Guard analyzed the scope and potential impacts associated with a temporary safety zone being established, the Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because doing so would be impracticable and contrary to public interest. To delay implementation of the safety zone past the exercise date of July 13th, 2017 to publish and seek public comment is impracticable as it would unavoidably prevent the Coast Guard from ensuring the safety of the public and exercise participants from potential hazards associated with the exercise. It is for the same reason good cause exists under the public interest exception to the required public comment period. It is in the public's interest the safety zone be established prior to notice and comment to ensure the safety zone is in place for the UNDET exercise on July 13th, 2017.

For the same reasons as noted above, we are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Due to the potential dangers associated with the UNDET exercise, delaying the effective period of this safety zone beyond July 13th, 2017 would be impracticable and contrary to public interest. The temporary final rule and resulting restricted navigation area established by this rulemaking relates to the establishment of the safety zone itself. It does not address or regulate the UNDET exercise. The U.S. Navy environmental impact statement and public involvement for the UNDET activity is available at *http://mitt-eis.com/.*

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The Captain of the Port Guam concurs with the U.S. Navy that potential hazards associated with the UNDET exercise on July 13th, 2017 may be a safety concern for anyone within a 700-yard radius above and below the surface in the area of the operation. This rule is needed to protect the public, exercise participants and vessels in the navigable waters within the safety zone during the exercise. Mariners and divers

approaching too close to such exercises could potentially be exposed to hazardous conditions or place the exercise participants at risk.

IV. Discussion of the Rule

This rule establishes a safety zone from 8 a.m. through 4 p.m. on July 13th, 2017. The safety zone will cover all navigable waters within 700-yards above and below the surface of the water around the UNDET exercise. The duration of the zone is intended to protect the public, exercise participants and vessels in navigable waters during the exercise. No vessel or person, with the exception of exercise participants, will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders (E.O.s) related to rulemaking. Below we summarize our analyses based on a number of these statutes and E.O.s, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location and duration of the safety zone. Vessel traffic will be able to safely transit around this safety zone which will impact a small designated area of waters in the outer harbor for 8 hours or less. Moreover, the Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone. Further, the rule allows vessels and persons to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in E.O 13132.

Also, this rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969(42 U.S.C. 4321–4370f), and have determined that the establishment of a safety zone is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting up to eight hours that will prohibit entry within 700-yards above and below the surface of the UNDET exercise. It is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. A Record of Environmental Consideration (REC) supporting this determination is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without

jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation (water), Reporting and record-keeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T14–0502 to read as follows:

165. T14–0502 Safety Zone; Navy UNDET Exercise, Apra Outer Harbor, GU.

(a) *Location.* The following areas, within the Captain of the Port (COTP) Guam Zone (See 33 CFR 3.70–15), from the surface of the water to the ocean floor, are safety zones:

Apra Outer Harbor, Guam July 13, 2017. All waters above and below the surface bounded by a circle with a 700-yard radius centered at 13 degrees 27 minutes 42 seconds North Latitude and 144 degrees 38 minutes 30 seconds East Longitude, (NAD 1983).

(b) *Effective period.* This section is effective from 8 a.m. through 4 p.m. on July 13th, 2017, unless canceled earlier by the COTP Guam.

(c) *Regulations.* The general regulations governing safety zones contained in 33 CFR 165.23 apply. No vessels, with the exception of exercise participants may enter or transit the safety zone and no persons in the water, with the exception of exercise participants may enter or transit the safety zone unless authorized by the COTP Guam or a designated representative thereof.

(d) *Enforcement.* Any Coast Guard commissioned, warrant, or petty officer, and any other COTP Guam representative permitted by law, may enforce this temporary safety zones.

(e) *Waiver.* The COTP Guam may waive any of the requirements of this section for any person, vessel, or class of vessel upon finding that application of the safety zone is unnecessary or impractical for the purpose of maritime safety and security.

(f) *Penalties.* Vessels or persons violating this rule are subject to the penalties set forth in 33 U.S.C. 1232 and 50 U.S.C. 192.

Dated: June 8, 2017.

James B. Pruett,

Captain, U.S. Coast Guard, Captain of the Port, Guam.

[FR Doc. 2017–13853 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0612]

Safety Zone; Fourth of July Fireworks, Glenbrook NV

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Fourth of July Fireworks display in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect the life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 16 will be enforced from 7 a.m. through 10:30 p.m. on July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone in navigable waters around and under a fireworks barge within a radius of 100 feet during the loading of the fireworks barge and until the start of the fireworks display. From 7 a.m. until 8 a.m. on July 4, 2017, the fireworks barge will be loading pyrotechnics at the launch site in Glenbrook Bay in approximate position 39°05′18″ N., 119°56′34″ W. (NAD 83). The fireworks barge will remain at the launch site in Glenbrook Bay in approximate position 39°05′18″ N., 119°56′34″ W. (NAD 83) until the commencement of the fireworks display. Upon the commencement of the 20 minute fireworks display, scheduled to begin at approximately 9:30 p.m. on July 4, 2017, the safety zone will increase in size and encompass the navigable waters around and under the fireworks barge within a radius 1,000 feet in approximate position 39°05′18″ N., 119°56′34″ W. (NAD 83). Upon the conclusion of the fireworks display the safety zone shall terminate. This safety zone will be in effect from 7 a.m. until approximately 10:30 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice of enforcement is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notification in the **Federal Register,** the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notification, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 23, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

[FR Doc. 2017–13844 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0616]

Safety Zone; Commencement Bay, Tacoma, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone regulations for the Tacoma Freedom Fair Air Show on Commencement Bay from 1:30 p.m. July 4, 2017, until 12:30 a.m. on July 5, 2017. This action is necessary to ensure the safety of the public from inherent dangers associated with these annual aerial displays. During the enforcement period, no person or vessel may enter or transit this safety zone unless authorized by the Captain of the Port or her designated representative.

DATES: The regulations in 33 CFR 165.1305 will be enforced from 1:30 p.m. July 4, 2017, until 12:30 a.m. on July 5, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Petty Officer Zachary Spence, Sector Puget Sound Waterways Management Division, Coast Guard; telephone (206) 217–6051, email *SectorPugetSoundWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.1305 from 1:30 p.m. July 4, 2017 until 12:30 a.m. July 5, 2017 unless canceled sooner by the Captain of the Port Puget Sound. It is necessary to start the safety zone 30 minutes sooner since the Tacoma Freedom Fair Air Show will begin at 1:30 p.m. instead of 2 p.m. This action is being taken to provide for the safety of life on navigable waterways during the air show.

The safety zone resembles a rectangle protruding from the shoreline along Ruston Way and will be marked by the event sponsor. The specific coordinates of the safety zone location is listed in 33 CFR 165.1305.

As specified in § 165.1305(c), during the enforcement period, no vessel may transit this regulated area without approval from the Captain of the Port Sector Puget Sound (COTP) or a COTP designated representative. The Captain of the Port may be assisted by other federal, state and local law enforcement agencies in enforcing this regulation.

This notice of enforcement is issued under authority of 33 CFR 165.1305 and 5 U.S.C. 552 (a). In addition to this notice of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advanced notification of the safety zone via the Local Notice to Mariners and marine information broadcasts on the day of the event. If the COTP determines that the safety zone need not be enforced for the full duration stated in this notice of enforcement, she may use a Broadcast Notice to Mariners to grant general permission to enter the regulated area.

Dated: June 26, 2017.

L.A. Sturgis,

Captain, U.S. Coast Guard, Captain of the Port Puget Sound.

[FR Doc. 2017–13680 Filed 6–29–17; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2017–0609]

Safety Zone; Fourth of July Fireworks, City of Sausalito, San Francisco Bay, Sausalito, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Fourth of July Fireworks, City of Sausalito in the Captain of the Port, San Francisco area of responsibility during the dates and times noted below. This action is necessary to protect life and property of the maritime public from the hazards associated with the fireworks display. During the enforcement period, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone, unless authorized by the Patrol Commander (PATCOM).

DATES: The regulations in 33 CFR 165.1191, Table 1, Item number 10 will be enforced from 9 a.m. to 10 p.m. on July 4, 2017.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone (415) 399–2001 or email at *D11-PF-MarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone extending around and under the fireworks barge within a radius of 100 feet during the loading, transit, and arrival of the fireworks barge to the display location until the start of the fireworks display.

From 9 a.m. until 3 p.m. on July 4, 2017, the fireworks barge will be loading pyrotechnics off of Pier 50 in San Francisco, CA. The fireworks barge will remain at the pier until its transit to the display location. From 6:30 p.m. to 8 p.m. on July 4, 2017 the loaded fireworks barge will transit from Pier 50 to the launch site near Sausalito, CA in approximate position 37°51′31″ N., 122°28′28″ W. (NAD83) where it will remain until the conclusion of the scheduled fireworks display.

Upon the commencement of the fireworks display at approximately 9:15 p.m. on July 4, 2017, the safety zone will increase in size and encompass the navigable waters around and under the fireworks barge within a radius of 1,000 feet in approximate position 37°51′31″ N., 122°28′28″ W. (NAD83) for the Fourth of July Fireworks, City of Sausalito in 33 CFR 165.1191, Table 1, Item number 10. This safety zone will be in effect from 9 a.m. to 10 p.m. on July 4, 2017.

Under the provisions of 33 CFR 165.1191, unauthorized persons or vessels are prohibited from entering into, transiting through, or anchoring in the safety zone during all applicable effective dates and times, unless authorized to do so by the PATCOM. Additionally, each person who receives notice of a lawful order or direction issued by an official patrol vessel shall obey the order or direction. The PATCOM is empowered to forbid entry into and control the regulated area. The PATCOM shall be designated by the Commander, Coast Guard Sector San Francisco. The PATCOM may, upon request, allow the transit of commercial vessels through regulated areas when it is safe to do so.

This notice is issued under authority of 33 CFR 165.1191 and 5 U.S.C. 552(a). In addition to this notice in the **Federal Register**, the Coast Guard will provide the maritime community with extensive advance notification of the safety zone and its enforcement period via the Local Notice to Mariners.

If the Captain of the Port determines that the regulated area need not be enforced for the full duration stated in this notice, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: May 4, 2017.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port, San Francisco.

34 CFR Parts 300 and 303

RIN 1820–AB74

Assistance to States for the Education of Children With Disabilities and Preschool Grants for Children With Disabilities Program; Early Intervention Program for Infants and Toddlers With Disabilities

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education (Secretary) amends the regulations implementing Parts B and C of the Individuals with Disabilities Education Act (IDEA). These conforming changes are needed to implement statutory amendments made to the IDEA by the Every Student Succeeds Act (ESSA), enacted on December 10, 2015. These regulations remove and revise IDEA definitions based on changes made to the definitions in the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the ESSA, and also update several State eligibility requirements to reflect amendments to the IDEA made by the ESSA. They also update relevant cross-references in the IDEA regulations to sections of the ESEA to reflect changes made by the ESSA. These regulations also include several technical corrections to previously published IDEA Part B regulations.

DATES: These final regulations are effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Mary Louise Dirrigl, U.S. Department of Education, 550 12th Street SW., Potomac Center Plaza, Room 5156, Washington, DC 20202–2641. Telephone: (202) 245–7324 or by email: *Mary.Louise.Dirrigl@ed.gov.* If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Purpose of This Regulatory Action: Enacted December 10, 2015, the ESSA [1] reauthorized the ESEA, which provides Federal funds to improve elementary and secondary education in the Nation's public schools. The ESSA also made certain changes to sections 602 and 611 through 614 of the IDEA. Consequently, we are amending the IDEA regulations in parts 300 and 303 to reflect these changes.

Summary of the Major Provisions of This Regulatory Action: For the IDEA regulations in parts 300 and 303, these regulations:

- Revise the definition of the term ''charter school'' in § 300.7 to update the statutory reference to the ESEA's amended definition of that term.
- Remove the definition of the term ''core academic subjects'' in § 300.10, the definition of ''highly qualified special education teachers'' in § 300.18, and the definition of ''scientifically based research'' in §§ 300.35 and 303.32 because these terms have been removed from the ESEA.
- Revise the term ''Limited English proficient'' in § 300.27 to reflect the revisions to the term ''English learner'' in section 8101 of the ESEA.
- Revise § 300.102(a)(3)(iv) to incorporate the definition of ''regular high school diploma'' in section 8101(43) of the ESEA.
- Move the qualification requirements for special education teachers from § 300.18(b)(1) and (2) to § 300.156(c).
- Revise § 300.160(c) to reflect amendments made to the IDEA by the ESSA that clarify that guidelines and alternate assessments to measure academic progress under title I of the ESEA apply only to children with disabilities who are students with the most significant cognitive disabilities, whose achievement is measured against alternate academic achievement standards if a State has adopted such standards as permitted under section 1111(b)(1)(E) of the ESEA.
- Revise paragraph (b)(4)(xi) of § 300.704 (State-level activities), regarding the provision of technical assistance to schools and local educational agencies (LEAs) implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d) of the ESEA on the basis of consistent underperformance of the disaggregated subgroup of children with disabilities, to include direct student services described in section 1003A(c)(3) of the ESEA to children with disabilities.

Part 300 Regulatory Changes

Subpart A—General

Definitions Used in This Part

We are revising the definition of ''charter school'' in § 300.7 by removing the phrase ''section 5210(1)'' and replacing it with ''section 4310(2).'' We are revising the authority citation for § 300.7 by removing ''20 U.S.C. 7221i(1)'' and replacing it with ''20 U.S.C. 7221i(2).''

We are removing the definition of ''core academic subjects'' in § 300.10 and reserving § 300.10. This change is consistent with section 9215(ss)(1)(A) of the ESSA, which eliminated section 602(4) of the IDEA.

Consistent with section 9215(ss)(1)(B) of the ESSA, we are revising the definition of ''excess cost'' in § 300.16. Specifically, we are revising the cross-reference to the ESEA in § 300.16(a)(3) to read ''under part A of title III of the ESEA.''

We are removing the definition of ''highly qualified special education teachers'' in § 300.18, consistent with section 9214(d)(1) of the ESSA, which eliminated section 602(10) of the IDEA, and we are reserving § 300.18. Consequently, we are removing the references to § 300.18 in §§ 300.138(a)(1) and 300.146(b) and adding a reference to § 300.156(c) in § 300.138(a)(1), as explained below. Based on the amendments made to the IDEA by section 9214(d)(2)(A) of the ESSA, as discussed in Subpart B, we are moving § 300.18(b)(1) and (2), regarding qualifications for special education teachers, to § 300.156(c). Consistent with changes made by section 9214(d)(2)(B) and (C) to section 612(a)(14)(D) and (E) of the IDEA, we are also removing references to the term ''highly qualified'' in § 300.156(d) and (e) and replacing them with references to personnel ''who meet the applicable requirements described in paragraph (c) of this section.''

Consistent with section 9215(ss)(1)(C) of the ESSA, which amended section 602(18) of the IDEA, we are revising the definition of ''Limited English proficient'' in § 300.27 to adopt the meaning given to the term ''English learner'' in section 8101 of the ESEA.

Consistent with section 8002(1) of the ESEA, we are removing the definition of ''scientifically based research'' in § 300.35 because this definition has been removed from the ESEA. Section 300.35 is reserved. However, we are retaining references to ''scientifically based research'' in §§ 300.604(a)(1)(ii) and 300.704(b)(4)(xi), because these references were retained in sections 616(e)(1)(A)(ii) and 611(e)(2)(C)(xi), respectively.

We are revising the following cross-references to definitions:

- The cross-reference to the definition of ''special education'' in § 300.105(a)(1) is changed from § 300.36 to § 300.39, and from § 300.38 to § 300.39 in § 300.115(b)(1).

[1] Unless otherwise indicated, citations to the ESEA refer to the ESEA, as amended by the ESSA.

• The cross-reference to the definition of ''supplementary aids and services'' in § 300.105(a)(3) is changed from § 300.38 to § 300.42, and from § 300.41 to § 300.42 in § 300.154(b)(1)(i).

• The cross-reference to the definition of ''transition services'' in § 300.154(b)(1)(i) is changed from § 300.42 to § 300.43.

Subpart B—State Eligibility

Free Appropriate Public Education (FAPE) Requirements

We are revising § 300.102(a)(3)(iv) to incorporate the definition of ''regular high school diploma'' currently included in section 8101(43) of the ESEA. The term means the standard high school diploma awarded to the preponderance of students in the State that is fully aligned with State standards, or a higher diploma, except that a regular high school diploma shall not be aligned to the alternate academic achievement standards described in section 1111(b)(1)(E) of the ESEA. A regular high school diploma does not include a recognized equivalent of a diploma, such as a general equivalency diploma, certificate of completion, certificate of attendance, or similar lesser credential. We are making this conforming change to ensure that ''regular high school diploma'' has the same meaning under the IDEA and the ESEA, and the definition is consistently applied under both programs. We are also updating the authority citation to reflect this change.

Additional Eligibility Requirements

Consistent with section 9214(d)(2)(A) of the ESSA, we are revising § 300.156(c) by removing the language indicating that each person employed as a public school special education teacher in the State must be highly qualified by the deadline established in section 1119(a)(2) of the ESEA. In its place at § 300.156(c), we are adding language from the current definition of ''highly qualified'' in § 300.18(b)(1). The revisions are needed to clarify that the IDEA, as amended by the ESSA, retains the same requirements as in current § 300.18(b)(1) governing the qualifications of special education teachers. Additionally, consistent with section 9214(d)(2)(A) of the ESSA, we are retaining the requirements in current § 300.18(b)(2), regarding participation in an alternate route to certification as a special educator. The retention of these requirements is consistent with amendments to section 612(a)(14)(C)(i) of the IDEA, which require that an alternate route to certification as a special educator meets the minimum requirements described in 34 CFR 200.56(a)(2)(ii), as such section was in effect on November 28, 2008. Because 34 CFR 200.56(a)(2)(ii), as in effect on November 28, 2008, included the language in current § 300.18(b)(2), we are moving the language in current § 300.18(b)(2) to new § 300.156(c)(2). Additionally, consistent with amendments to section 612(a)(14)(D) and (E) of the IDEA made by section 9214(d)(2)(B) and (C) of the ESSA, we are removing references to ''highly qualified'' in paragraphs (d) and (e) of § 300.156 and replacing them with references to personnel ''who meet the applicable requirements described in paragraph (c) of this section.''

Consistent with section 9215(ss)(3)(A) of the ESSA, which amended section 612(a)(15) of the IDEA (Performance goals and indicators), we are making the following changes to § 300.157. Consistent with section 9215(ss)(3)(A)(i) of the ESSA, which amended section 612(a)(15)(A)(ii) of the IDEA, we are replacing § 300.157(a)(2) in its entirety with the language ''Are the same as the State's long-term goals and measurements of interim progress for children with disabilities under section 1111(c)(4)(A)(i) of the ESEA.'' Consistent with amendments to section 612(a)(15)(B) made by section 9215(ss)(3)(A)(ii) of the ESSA, we are also revising § 300.157(b) by replacing the language ''including measurable annual objectives for progress by children with disabilities under section 1111(b)(2)(C)(v)(II)'' with ''including measurements of interim progress for children with disabilities under section 1111(c)(4)(A)(i).''

We are making a number of amendments to §§ 300.160(c) through (f) to address amendments made by section 9215(ss)(3)(B) of the ESSA to section 612(a)(16)(C)(ii) of the IDEA, as well as changes made by the ESSA to section 1111(b)(2)(D) of the ESEA, which affect current (d), (e), and (f) of § 300.160. We are changing the title of § 300.160(c) from ''Alternate Assessments'' to ''Alternate Assessments Aligned with Alternate Academic Achievement Standards for Students with the Most Significant Cognitive Disabilities.'' We are adding the phrase ''children with disabilities who are students with the most significant cognitive disabilities'' in § 300.160(c)(1) with respect to State guidelines for participation in alternate assessments, because section 9215(ss)(3)(B) of the ESSA clarifies that the State guidelines referred to in section 612(a)(16)(C)(i) of the IDEA apply only to participation of children with disabilities who are students with the most significant cognitive disabilities in alternate assessments aligned with alternate academic achievement standards as permitted under section 1111(b)(1)(E) of the ESEA, if those children cannot take regular assessments, even with accommodations as indicated in their respective individualized education programs (IEPs).

Consistent with section 9215(ss)(3)(B) of the ESSA, which amended section 612(a)(16)(C)(ii) of the IDEA, we are also reorganizing § 300.160(c)(2) for greater clarity and to ensure consistency with 34 CFR 200.6(c) of the regulations for title I, part A of the ESEA. These changes will clarify that if a State has adopted alternate academic achievement standards as permitted under section 1111(b)(1)(E) of the ESEA and 34 CFR 200.1(d) of the regulations for title I, part A of the ESEA, the State must conduct alternate assessments that measure the achievement of children with disabilities who are students with the most significant cognitive disabilities against those standards. Consistent with amendments made to section 612(a)(16)(C)(ii) of the IDEA by section 9215(ss)(3)(B) of the ESSA, we are replacing the phrase ''the State's challenging academic content standards and challenging student academic achievement standards'' with ''challenging State academic content standards under section 1111(b)(1) of the ESEA and alternate academic achievement standards under section 1111(b)(1)(E) of the ESEA.'' Accordingly, § 300.160(c)(2)(iii) is removed, because the statutory amendments that form the basis for the above regulatory changes clarify that in assessing the academic progress of children with disabilities under title I, part A of the ESEA, the only alternate assessments permitted under the IDEA and title I of the ESEA are alternate assessments aligned with alternate academic achievement standards for children with disabilities who are students with the most significant cognitive disabilities under section 1111(b)(2)(D) of the ESEA. We are amending § 300.160(c)(3) by adding a reference to section 1111(b)(1)(E)(ii) of the ESEA and changing the title I, part A regulatory reference to § 200.6(c)(6) to reinforce that States are prohibited from adopting modified academic achievement standards or any other alternate academic achievement standards that do not meet the requirements in section 1111(b)(1)(E) of the ESEA for any students with disabilities under section 602(3) of the IDEA.

Consistent with section 1111(b)(2)(D)(i)(II) of the ESEA, and 34

CFR 200.6(d)(2), we are amending § 300.160(d) (Explanation to IEP Teams). We are adding new § 300.160(d)(1) to read, ''A State (or in the case of a district-wide assessment, an LEA) must provide to IEP teams a clear explanation of the differences between assessments based on grade-level academic achievement standards and those based on alternate academic achievement standards, including any effects of State and local policies on a student's education resulting from taking an alternate assessment aligned with alternate academic achievement standards, such as how participation in such assessments may delay or otherwise affect the student from completing the requirements for a regular high school diploma.'' Consistent with section 1111(b)(2)(D)(i)(VII) of the ESEA, and 34 CFR 200.6(d)(4), we have added new § 300.160(d)(2), which reads, ''A State (or in the case of a district-wide assessment, an LEA) must not preclude a student with the most significant cognitive disabilities who takes an alternate assessment aligned with alternate academic achievement standards from attempting to complete the requirements for a regular high school diploma.'' Even though this language is now reflected in 34 CFR 200.6(d)(2) and (4), we believe this is important information for IEP teams to have in ensuring that students with the most significant cognitive disabilities taking alternate assessments aligned with alternate academic achievement standards receive the special education and related services that they need to enable them to be involved and make progress in the general education curriculum that is aligned with the State's challenging academic content standards for the grade in which the student is enrolled. Similarly, we believe it is important for parents to be fully informed of the possible implications of their child's participation in alternate assessments aligned with alternate academic achievement standards. Therefore, consistent with section 1111(b)(2)(D)(i)(II) of the ESEA, and 34 CFR 200.6(d)(3), we have revised § 300.160(e) (Inform parents) to read, ''A State (or in the case of a district-wide assessment, an LEA) must ensure that parents of students selected to be assessed using an alternate assessment aligned with alternate academic achievement standards under the State's guidelines referred to in paragraph (c)(1) are informed, consistent with § 200.2(e), that their child's achievement will be measured based on alternate academic achievement standards, and how participation in such assessments may delay or otherwise affect the student from completing the requirements for a regular high school diploma.'' This revised language is also consistent with 34 CFR 200.6(d)(3), implementing title I, part A of the ESEA.

Consistent with section 612(a)(16)(C) of the IDEA and section 1111(b)(1)(E)(ii) of the ESEA, we are revising § 300.160(f) to make clear that school year 2016–2017 is the last school year for which States may report on the participation and performance of children with disabilities taking alternate assessments based on grade-level achievement standards. We are also correcting an inadvertent error in § 300.160(f)(3), regarding participation in assessments, that was included in the August 21, 2015 regulations governing title I, part A of the ESEA. See Improving the Academic Achievement of the Disadvantaged; Assistance to States for the Education of Children With Disabilities. 80 FR 50773. We are replacing school years prior to ''2015–2016'' with school years prior to ''2016–2017.'' This correction clarifies that school year 2015–2016, not school year 2014–2015, was the last school year in which States were permitted to administer alternate assessments based on modified academic achievement standards. We have also removed the words ''if any'' from § 300.160(f)(4), because the only alternate assessments that States may conduct to assess academic progress under title I of the ESEA are alternate assessments aligned with alternate academic achievement standards for students with the most significant cognitive disabilities. We are also changing the words ''based on'' to ''aligned with'' in paragraphs (f)(3) and (4) of § 300.160 to be consistent with the language used elsewhere in § 300.160(c) referring to alternate assessments conducted under this section.

Subpart C—Local Educational Agency Eligibility

Consistent with section 9215(ss)(4) of the ESSA, which amended section 613(a)(3) of the IDEA, we are revising § 300.207, regarding personnel development, by removing the reference to ''section 2122 of the ESEA'' and replacing it with ''section 2102(b) of the ESEA.''

Subpart D—Evaluations, Eligibility Determinations, Individualized Education Programs, and Educational Placements

Evaluations and Reevaluations

Consistent with section 9215(ss)(5) of the ESSA, which amended section 614(b)(5)(A) of the IDEA, we are revising § 300.306(b)(1)(i), regarding determination of eligibility, by inserting the phrase ''as such section was in effect on the day before the date of enactment of the Every Student Succeeds Act (December 9, 2015)'' after ''ESEA.''

Development of IEP

We are correcting an inadvertent error in § 300.324(d)(2)(ii) (Children with disabilities in adult prisons) by changing the least restrictive environment reference from § 300.112 to § 300.114.

Subpart G—Authorization, Allotment, Use of Funds, and Authorization of Appropriations

Allotments, Grants, and Use of Funds

Consistent with section 9215(ss)(2)(A) and (B) of the ESSA, which amended section 611(e)(2)(C) and (e)(3)(C)(ii)(I)(bb) of the IDEA, we are making the following revisions. We are revising § 300.704(b)(4) (Other State-level activities) as follows:

- Removing ''section 6111 of the ESEA'' from paragraph (x) and replacing it with ''section 1201 of the ESEA.''
- Revising paragraph (xi) regarding the provision of technical assistance to schools and LEAs by removing ''including supplemental educational services as defined in section 1116(e) of the ESEA to children with disabilities, in schools or LEAs identified for improvement under section 1116 of the ESEA on the sole basis of the assessment results of the disaggregated subgroup of children with disabilities'' and replacing it with ''including direct student services described in section 1003A(c)(3) of the ESEA to children with disabilities, to schools or LEAs implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d) of the ESEA on the basis of consistent underperformance of the disaggregated subgroup of children with disabilities.''
- Replacing the phrase ''to meet or exceed the objectives established by the State under section 1111(b)(2)(G) of the ESEA'' with ''based on the challenging academic standards described in section 1111(b)(1) of the ESEA.''
- Finally, we are revising § 300.704(c)(3)(i)(A)(*2*), regarding the LEA high cost fund, by changing the ESEA reference from section 9101 to section 8101.

Part 303 Regulatory Changes

Subpart A—General

Definitions Used in This Part

Consistent with section 8002(1) of the ESEA, we are removing the definition of

''scientifically based research'' from § 303.32, because this definition has been removed from the ESEA. Section 303.32 is reserved. The definition of ''scientifically based research'' was adopted in the 2011 regulations under Part C of the IDEA to cross-reference the same definition under the ESEA. However, the term ''scientifically based research'' is still retained and applies to § 303.112 of the Part C regulations regarding the State's responsibility to make early intervention services available under section 635(a)(2) of the IDEA. See 76 FR 60140, 60163–60164 (Sept. 28, 2011).

Executive Orders 12866, 13563, and 13771

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

Under Executive Order 13771, for each new regulation that the Department proposes for notice and comment or otherwise promulgates that is a significant regulatory action under Executive Order 12866, it must identify two deregulatory actions. For Fiscal Year 2017, any new incremental costs associated with a new regulation must be fully offset by the elimination of existing costs through deregulatory actions. The final regulations are not a significant regulatory action. Therefore, the requirements of Executive Order 13771 do not apply.

We have also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these final regulations only upon a reasoned determination that their benefits will justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that these final regulations are consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

Potential Costs and Benefits

Under Executive Order 12866, we have assessed the potential costs and benefits of this regulatory action and have determined that these regulations will not impose additional costs to States and LEAs or to the Federal government. These regulations do not impose additional costs or administrative burdens because States will be in the process of developing and revising their regulations implementing title I of the ESEA to conform with the changes made by the ESSA. We believe any additional costs imposed on States by these final regulations will be negligible, primarily because they reflect technical changes which do not impose additional burden. Moreover, we believe any costs will be significantly outweighed by the potential benefits of ensuring consistency among the implementation of the IDEA and ESSA requirements for children with disabilities.

Waiver of Rulemaking and Delayed Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed regulations. However, the APA provides that an agency is not required to conduct notice- and-comment rulemaking when the agency, for good cause, finds that notice and public comment thereon are impracticable, unnecessary, or contrary to the public interest (5 U.S.C. 553(b)(B)). There is good cause to waive rulemaking here as unnecessary.

Rulemaking is ''unnecessary'' in those situations in which ''the administrative rule is a routine determination, insignificant in nature and impact, and inconsequential to the industry and to the public.'' *Utility Solid Waste Activities Group* v. *EPA,* 236 F.3d 749, 755 (D.C. Cir. 2001), *quoting* U.S. Department of Justice, *Attorney General's Manual on the Administrative Procedure Act* 31 (1947) and *South Carolina* v. *Block,* 558 F. Supp. 1004, 1016 (D.S.C. 1983). These regulations implement the technical amendments made to the IDEA by the ESSA and include revisions made for consistency with the statute.

The APA also generally requires that regulations be published at least 30 days before their effective date, unless the agency has good cause to implement its regulations sooner (5 U.S.C. 553(d)(3)). Again, because these final regulations include only conforming changes and technical corrections, there is good

cause to make them effective on the day they are published.

Paperwork Reduction Act of 1995

These regulations do not contain any information collection requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance. This document provides early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

Based on our review, we have determined that these final regulations do not require transmission of information that any other agency or authority of the United States gathers or makes available.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register.** Free internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register,** in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

List of Subjects in 34 CFR Parts 300 and 303

Administrative practice and procedure, Education of individuals with disabilities, Elementary and secondary education, Equal educational opportunity, Grant programs—education, Privacy, Private schools, Reporting and recordkeeping requirements.

Dated: June 27, 2017.

Betsy DeVos,

Secretary of Education.

For the reasons discussed in the preamble, the Secretary amends parts 300 and 303 of title 34 of the Code of Federal Regulations as follows:

PART 300—ASSISTANCE TO STATES FOR THE EDUCATION OF CHILDREN WITH DISABILITIES

■ 1. The authority citation for part 300 is revised to read as follows:

Authority: 20 U.S.C. 1221e–3, 1406, 1411–1419, and 3474, unless otherwise noted.

§ 300.7 [Amended]

■ 2. Section 300.7 is amended by removing the phrase ''section 5210(1)'' and adding in its place ''section 4310(2)'' and by removing the authority citation ''20 U.S.C. 7221i(1)'' and adding in its place ''20 U.S.C. 7221i(2)''.

§ 300.10 [Removed and Reserved]

■ 3. Remove and reserve § 300.10.

§ 300.16 [Amended]

■ 4. Section 300.16 is amended in paragraph (a)(3) by removing the words ''Parts A and B'' and adding in its place ''Part A''.

§ 300.18 [Removed and Reserved]

■ 5. Remove and reserve § 300.18.

§ 300.27 [Amended]

■ 6. Section 300.27 is amended by removing the phrase ''in section 9101(25) of the ESEA'' and adding in its place '''English learner' in section 8101 of the ESEA''.

§ 300.35 [Removed and Reserved]

■ 7. Remove and reserve § 300.35.

■ 8. Section 300.102 is amended by revising paragraph (a)(3)(iv) and by revising the authority citation to read as follows:

§ 300.102 Limitation—exception to FAPE for certain ages.

(a)* * *

(3)* * *

(iv) As used in paragraphs (a)(3)(i) through (iii) of this section, the term *regular high school diploma* means the standard high school diploma awarded to the preponderance of students in the State that is fully aligned with State standards, or a higher diploma, except that a regular high school diploma shall not be aligned to the alternate academic achievement standards described in section 1111(b)(1)(E) of the ESEA. A regular high school diploma does not include a recognized equivalent of a diploma, such as a general equivalency diploma, certificate of completion, certificate of attendance, or similar lesser credential.

* * * * *

Authority: 20 U.S.C. 1412(a)(1)(B)–(C) and 7801(43).

§ 300.105 [Amended]

■ 9. Section 300.105 is amended:

■ A. In paragraph (a)(1) by removing ''§ 300.36'' and adding in its place ''§ 300.39''.

■ B. In paragraph (a)(3) by removing ''§ 300.38'' and adding in its place ''§ 300.42''.

§ 300.115 [Amended]

■ 10. Section 300.115 is amended in paragraph (b)(1) by removing ''§ 300.38'' and adding in its place ''§ 300.39''.

§ 300.138 [Amended]

■ 11. Section 300.138 is amended in paragraph (a)(1) by removing the phrase ''highly qualified special education teacher requirements of § 300.18'' and adding in its place ''special education teacher qualification requirements in § 300.156(c)''.

§ 300.146 [Amended]

■ 12. Section 300.146 is amended in paragraph (b) by removing ''§ 300.18 and''.

§ 300.154 [Amended]

■ 13. Section 300.154 is amended in paragraph (b)(1)(i) by removing ''§ 300.41'' and ''§ 300.42'' and adding in their place ''§ 300.42'' and ''§ 300.43'', respectively.

■ 14. Section 300.156 is amended:

■ A. By revising paragraph (c).

■ B. In paragraph (d) by removing the term ''highly qualified'' and adding in its place ''who meet the applicable requirements described in paragraph (c) of this section'' after the word ''personnel''.

■ C. In paragraph (e) by removing the phrase ''be highly qualified'' and adding in its place ''meet the applicable requirements described in paragraph (c) of this section''.

The revision reads as follows:

§ 300.156 Personnel qualifications.

* * * * *

(c) *Qualifications for special education teachers.* (1) The qualifications described in paragraph (a) of this section must ensure that each person employed as a public school special education teacher in the State who teaches in an elementary school, middle school, or secondary school—

(i) Has obtained full State certification as a special education teacher (including certification obtained through an alternate route to certification as a special educator, if such alternate route meets minimum requirements described in 34 CFR 200.56(a)(2)(ii) as such section was in effect on November 28, 2008), or passed the State special education teacher licensing examination, and holds a license to teach in the State as a special education teacher, except that when used with respect to any teacher teaching in a public charter school, the teacher must meet the certification or licensing requirements, if any, set forth in the State's public charter school law;

(ii) Has not had special education certification or licensure requirements waived on an emergency, temporary, or provisional basis; and

(iii) Holds at least a bachelor's degree.

(2) A teacher will be considered to meet the standard in paragraph (c)(1)(i) of this section if that teacher is participating in an alternate route to special education certification program under which—

(i) The teacher—

(A) Receives high-quality professional development that is sustained, intensive, and classroom-focused in order to have a positive and lasting impact on classroom instruction, before and while teaching;

(B) Participates in a program of intensive supervision that consists of structured guidance and regular ongoing support for teachers or a teacher mentoring program;

(C) Assumes functions as a teacher only for a specified period of time not to exceed three years; and

(D) Demonstrates satisfactory progress toward full certification as prescribed by the State; and

(ii) The State ensures, through its certification and licensure process, that the provisions in paragraph (c)(2)(i) of this section are met.

* * * * *

■ 15. Section 300.157 is amended:

■ A. By revising paragraph (a)(2).

■ B. In paragraph (b) by removing ''including measurable annual objectives for progress by children with disabilities under section 1111(b)(2)(C)(v)(II)'' and adding in its place ''including measurements of interim progress for children with disabilities under section 1111(c)(4)(A)(i)''.

The revision reads as follows:

§ 300.157 Performance goals and indicators.

* * * * *

(a) * * *

(2) Are the same as the State's long-term goals and measurements of interim progress for children with disabilities under section 1111(c)(4)(A)(i) of the ESEA.

* * * * *

■ 16. Section 300.160 is amended by revising paragraphs (c) through (f) to read as follows:

§ 300.160 Participation in assessments.

* * * * *

(c) *Alternate assessments aligned with alternate academic achievement standards for students with the most significant cognitive disabilities.* (1) If a State has adopted alternate academic achievement standards for children with disabilities who are students with the most significant cognitive disabilities as permitted in section 1111(b)(1)(E) of the ESEA, the State (or, in the case of a district-wide assessment, an LEA) must develop and implement alternate assessments and guidelines for the participation in alternate assessments of those children with disabilities who cannot participate in regular assessments, even with accommodations, as indicated in their respective IEPs, as provided in paragraph (a) of this section.

(2) For assessing the academic progress of children with disabilities who are students with the most significant cognitive disabilities under title I of the ESEA, the alternate assessments and guidelines in paragraph (c)(1) of this section must—

(i) Be aligned with the challenging State academic content standards under section 1111(b)(1) of the ESEA and alternate academic achievement standards under section 1111(b)(1)(E) of the ESEA; and

(ii) Measure the achievement of children with disabilities who are students with the most significant cognitive disabilities against those standards.

(3) Consistent with section 1111(b)(1)(E)(ii) of the ESEA and 34 CFR 200.6(c)(6), a State may not adopt modified academic achievement standards or any other alternate academic achievement standards that do not meet the requirements in section 1111(b)(1)(E) of the ESEA for any children with disabilities under section 602(3) of the IDEA.

(d) *Explanation to IEP Teams.* A State (or in the case of a district-wide assessment, an LEA) must—

(1) Provide to IEP teams a clear explanation of the differences between assessments based on grade-level academic achievement standards and those based on alternate academic achievement standards, including any effects of State and local policies on a student's education resulting from taking an alternate assessment aligned with alternate academic achievement standards, such as how participation in such assessments may delay or otherwise affect the student from completing the requirements for a regular high school diploma; and

(2) Not preclude a student with the most significant cognitive disabilities who takes an alternate assessment aligned with alternate academic achievement standards from attempting to complete the requirements for a regular high school diploma.

(e) *Inform parents.* A State (or in the case of a district-wide assessment, an LEA) must ensure that parents of students selected to be assessed using an alternate assessment aligned with alternate academic achievement standards under the State's guidelines in paragraph (c)(1) of this section are informed, consistent with 34 CFR 200.2(e), that their child's achievement will be measured based on alternate academic achievement standards, and of how participation in such assessments may delay or otherwise affect the student from completing the requirements for a regular high school diploma.

(f) *Reports.* An SEA (or, in the case of a district-wide assessment, an LEA) must make available to the public, and report to the public with the same frequency and in the same detail as it reports on the assessment of nondisabled children, the following:

(1) The number of children with disabilities participating in regular assessments, and the number of those children who were provided accommodations (that did not result in an invalid score) in order to participate in those assessments.

(2) The number of children with disabilities, if any, participating in alternate assessments based on grade-level academic achievement standards in school years prior to 2017–2018.

(3) The number of children with disabilities, if any, participating in alternate assessments aligned with modified academic achievement standards in school years prior to 2016–2017.

(4) The number of children with disabilities who are students with the most significant cognitive disabilities participating in alternate assessments aligned with alternate academic achievement standards.

(5) Compared with the achievement of all children, including children with disabilities, the performance results of children with disabilities on regular

assessments, alternate assessments based on grade-level academic achievement standards (prior to 2017–2018), alternate assessments based on modified academic achievement standards (prior to 2016–2017), and alternate assessments aligned with alternate academic achievement standards if—

(i) The number of children participating in those assessments is sufficient to yield statistically reliable information; and

(ii) Reporting that information will not reveal personally identifiable information about an individual student on those assessments.

* * * * *

§ 300.207 [Amended]

■ 17. Section 300.207 is amended by removing ''section 2122 of the ESEA'' and adding in its place ''section 2102(b) of the ESEA''.

§ 300.306 [Amended]

■ 18. Section 300.306 is amended in paragraph (b)(1)(i) by adding the phrase ''as such section was in effect on the day before the date of enactment of the Every Student Succeeds Act (December 9, 2015)'' after ''ESEA''.

§ 300.324 [Amended]

■ 19. Section 300.324 is amended in paragraph (d)(2)(ii) by removing ''300.112'' and adding in its place ''300.114''.

■ 20. Section 300.704 is amended:

■ A. In paragraph (b)(4)(x) by removing ''6111 of the ESEA'' and adding in its place ''1201 of the ESEA''.

■ B. Revising paragraph (b)(4)(xi).

■ C. In paragraph (c)(3)(i)(A)(*2*) by removing ''section 9101'' and adding in its place ''section 8101''.

The revision reads as follows:

§ 300.704 State-level activities.

* * * * *

(b) * * *

(4) * * *

(xi) To provide technical assistance to schools and LEAs, and direct services, including direct student services described in section 1003A(c)(3) of the ESEA, to children with disabilities, in schools or LEAs implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d) of the ESEA on the basis of consistent underperformance of the disaggregated subgroup of children with disabilities, including providing professional development to special and regular education teachers who teach children with disabilities, based on scientifically based research to improve educational instruction, in order to improve academic achievement based on the challenging academic standards described in section 1111(b)(1) of the ESEA.

* * * * *

PART 303—EARLY INTERVENTION PROGRAM FOR INFANTS AND TODDLERS WITH DISABILITIES

■ 21. The authority citation for part 303 continues to read as follows:

Authority: 20 U.S.C. 1431 through 1444, unless otherwise noted.

§ 303.32 [Removed and Reserved]

■ 22. Remove and reserve § 303.32.

Correction

■ In rule document 2016–21203, appearing on pages 73478–74274, in the issue of Tuesday, October 25, 2016, make the following corrections:

§ 1036.805 Symbols, abbreviations, and acronyms. [Corrected]

■ 1. On page 74044, in paragraph (b), the table should read as follows:

Symbol	Quantity	Unit	Unit symbol	Unit in terms of SI base units
a	atomic hydrogen-to-carbon ratio	mole per mole	mol/mol	1.
b	atomic oxygen-to-carbon ratio	mole per mole	mol/mol	1.
C_dA	drag area	meter squared	m^2	m^2.
C_{rr}	coefficient of rolling resistance	kilogram per metric ton	kg/tonne	10^{-3}.
D	distance	miles or meters	mi or m	m.
e	mass weighted emission result	grams/ton-mile	g/ton-mi	g/kg-km.
Eff	efficiency.			
E_m	mass-specific net energy content	megajoules/kilogram	MJ/kg	$m^2 \cdot s^{-2}$.
f_n	angular speed (shaft)	revolutions per minute	r/min	$\pi \cdot 30 \cdot s^{-1}$.
i	indexing variable.			
k_a	drive axle ratio.			
$k_{topgear}$	highest available transmission gear.			
m	mass	pound mass or kilogram	lbm or kg	kg.
M	molar mass	gram per mole	g/mol	$10^{-3} \cdot kg \cdot mol^{-1}$.
M	vehicle mass	kilogram	kg	kg.
$M_{rotating}$	inertial mass of rotating components	kilogram	kg	kg.
N	total number in a series.			
P	power	kilowatt	kW	$10^3 \cdot m^2 \cdot kg \cdot s^{-3}$.
T	torque (moment of force)	newton meter	N·m	$m^2 \cdot kg \cdot s^{-2}$.
t	time	second	s	s.
Δt	time interval, period, 1/frequency	second	s	s.
UF	utility factor.			
v	speed	miles per hour or meters per second	mi/hr or m/s	$m \cdot s^{-1}$.

Symbol	Quantity	Unit	Unit symbol	Unit in terms of SI base units
W	work	kilowatt-hour	kW·hr	$3.6 \cdot m^2 \cdot kg \cdot s^{-1}$.
w_C	carbon mass fraction	gram/gram	g/g	1.
w_{CH4N2O}	urea mass fraction	gram/gram	g/g	1.
x	amount of substance mole fraction	mole per mole	mol/mol	1.
x_b	brake energy fraction.			
x_{bl}	brake energy limit.			

§ 1037.550 Powertrain testing. [Corrected]

■ 2. On page 74097, in the third column, TABLE 1 OF § 1037.550—STATISTICAL CRITERIA FOR VALIDATING DUTY CYCLES should read as follows:

TABLE 1 OF § 1037.550—STATISTICAL CRITERIA FOR VALIDATING DUTY CYCLES

Parameter [1]	Speed control
Slope, a_1	$0.990 \leq a_1 \leq 1.010$.
Absolute value of intercept, $\|a_0\|$.	≤2.0% of maximum test speed.
Standard error of estimate, *SEE*.	≤2.0% of maximum test speed.
Coefficient of determination, r^2.	≥0.990.

[1] Determine values for specified parameters as described in 40 CFR 1065.514(e) by comparing measured and reference values for $f_{nref,dyno}$.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2016–0409; FRL–9955–67–Region 9]

Approval of California Air Plan Revisions, Great Basin Unified Air Pollution Control District and the Town of Mammoth Lakes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve revisions to the Great Basin Unified Air Pollution Control District (GBUAPCD) and the Town of Mammoth Lakes portion of the California State Implementation Plan (SIP). These revisions concern emissions of particulate matter (PM) from wood burning devices and road dust in the Town of Mammoth Lakes. We are approving local rules that regulate these emission sources under the Clean Air Act (CAA or the Act).

DATES: This rule is effective on August 29, 2017 without further notice, unless the EPA receives adverse comments by July 31, 2017. If we receive such comments, we will publish a timely withdrawal in the **Federal Register** to notify the public that this direct final rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2016–0409 at *http://www.regulations.gov,* or via email to Andrew Steckel, Rulemaking Office Chief at *Steckel.Andrew@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, EPA Region IX, (415) 947–4125, *vineyard.christine@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. The State's Submittal

A. What rules did the State submit?

Table 1 lists the rules addressed by this action with the dates that they were adopted by the local agencies and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULES

Local agency	Rule No.	Rule title	Revised	Submitted
GBUAPCD	431	Particulate Matter (except paragraphs M and N)	05/05/14	11/06/14
Town of Mammoth Lakes	8.30	Particulate Emissions Regulations (except paragraphs 8.30.110 and 8.30.120).	06/04/14	11/06/14

On December 11, 2014, the EPA determined that the submittal for GBUAPCD Rule 431 and Town of Mammoth Lakes Municipal Code Chapter 8.30 met the completeness criteria in 40 CFR part 51 Appendix V,

which must be met before formal EPA review.

B. Are there other versions of these rules?

We approved earlier versions of Rule 431 and Municipal Code Chapter 8.30 into the SIP on October 31, 2007 (72 FR 61526) and June 24, 1996 (61 FR 32341), respectively. The GBUAPCD and Town of Mammoth Lakes adopted revisions to the SIP-approved rules on May 5, 2014 and May 7, 2014 respectively, and CARB submitted them to us on November 6, 2014.

C. What is the purpose of the submitted rules?

PM, including PM equal to or less than 10 microns in diameter (PM_{10}), contributes to effects that are harmful to human health and the environment, including premature mortality, aggravation of respiratory and cardiovascular disease, decreased lung function, visibility impairment, and damage to vegetation and ecosystems. Section 110(a) of the CAA requires states to submit regulations that control PM emissions. GBUAPCD Rule 431 (except paragraphs M and N) and Town of Mammoth Lakes Municipal Code Chapter 8.30 (except paragraphs 8.30.110 and 8.30.120) were revised to be consistent with each other, and to enable the GBUAPCD to be able to enforce air quality regulations governing residential wood combustion and road dust in the Town of Mammoth Lakes.[1] The EPA's technical support document (TSD) has more information about these rules.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rules?

SIP rules must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)), and must not modify certain SIP control requirements in nonattainment areas without ensuring equivalent or greater emissions reductions (see CAA section 193).

On October 5, 2015 (80 FR 60049), the EPA redesignated the Mammoth Lakes Planning Area to attainment of the 24-hour PM_{10} National Ambient Air Quality Standard, pursuant to CAA section 107(d)(3)(D), and determined that the area met the requirements of CAA section 107(d)(3)(E). Accordingly, the Mammoth Lakes Planning Area is not subject to the nonattainment area requirement to implement either Reasonably Available Control Measures (RACM) or Best Available Control Measures (BACM) for PM_{10} and PM_{10} precursors in CAA section 189(b) and (e). Therefore, we are not evaluating GBUAPCD Rule 431 and Mammoth Lakes Municipal Code Chapter 8.30 for compliance with current RACM or BACM requirements with respect to PM_{10}. Should a GBUAPCD nonattainment area take credit for Rule 431 in the future as part of meeting its CAA Part D requirements, then we will evaluate the rule for current RACM or BACM, as applicable, at that time.

Guidance and policy documents that we use to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

1. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' (57 FR 13498, April 16, 1992 and 57 FR 18070, April 28, 1992).
2. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' (''the Bluebook,'' U.S. EPA, May 25, 1988; revised January 11, 1990).
3. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' (''the Little Bluebook'', EPA Region 9, August 21, 2001).
4. ''PM_{10} Guideline Document,'' (EPA 452/R–93–008, April 1993).

B. Do the rules meet the evaluation criteria?

We believe these rules are consistent with the relevant policy and guidance regarding enforceability and SIP relaxations. The District is not including for SIP approval Rule 431 paragraphs M and N regarding fees and penalties, and similar provisions in Municipal Code Chapter 8.30, paragraphs 8.30.110 and 8.30.120. These paragraphs could lead to confusion with respect to similar federal requirements. The TSD has more information on our evaluation.

C. The EPA's Recommendations To Further Improve the Rules

The TSD describes additional rule revisions that we recommend for the next time the local agencies modify the rules.

D. Public Comment and Final Action

As authorized in section 110(k)(3) of the Act, the EPA is fully approving the submitted rules because we believe they fulfill all relevant requirements.[2] We do not think anyone will object to this approval, so we are finalizing it without proposing it in advance. However, in the Proposed Rules section of this **Federal Register**, we are simultaneously proposing approval of the same submitted rules. If we receive adverse comments by July 31, 2017, we will publish a timely withdrawal in the **Federal Register** to notify the public that the direct final approval will not take effect and we will address the comments in a subsequent final action based on the proposal. If we do not receive timely adverse comments, the direct final approval will be effective without further notice on August 29, 2017. This will incorporate these rules into the federally enforceable SIP.

Please note that if the EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, the EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

III. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the GBUAPCD Rule 431 (except paragraphs M and N) and Town of Mammoth Lakes Chapter 8.30 (except paragraphs 8.30.110 and 8.30.120), described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those

[1] Rule 431 may apply to communities other than the Town of Mammoth Lakes within the Great Basin Unified Air Quality Control District if a community is designated a High Wood Smoke Area according to the procedures set forth in the Rule.

[2] Upon the effective date of this final action, GBUAPCD Rule 431 (except paragraphs M and N) and Town of Mammoth Lakes Municipal Code Chapter 8.30 (except paragraphs 8.30.110 and 8.30.120) would supersede existing GBUAPD 431 and Town of Mammoth Lakes 8.30, approved at 72 FR 61526 on October 31, 2007 and 61 FR 32341 on June 24, 1996, respectively in the applicable SIP.

imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 29, 2017. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the Proposed Rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that the EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements.

Dated: November 14, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(228)(i)(A)(*1*)(*iii*), (c)(350)(i)(A)(*3*), and (c)(457)(i)(I) to read as follows:

§ 52.220 Identification of plan—in part.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–1990–0011; FRL–9963–95–Region 8]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the Mystery Bridge Road/ U.S. Highway 20 Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) Region 8 is publishing a direct final notice of Partial Deletion of the property currently owned by Tallgrass Energy Partners, LP, (formerly owned by KM Upstream LLC and hereinafter referred to as the former KMI

Property), on the Mystery Bridge Road/U.S. Highway 20 Site (Site) from the National Priorities List (NPL). The Site is located in Natrona County, northeast of Casper, Wyoming. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution and Contingency Plan (NCP). This direct final partial deletion is being published by EPA with the concurrence of the State of Wyoming through the Wyoming Department of Environmental Quality (WDEQ) because EPA has determined that all appropriate response actions under CERCLA, other than maintenance of institutional controls and five-year reviews, have been completed for the former KMI source area and the resultant groundwater contamination. However, this deletion does not preclude future actions under Superfund.

This partial deletion pertains to the former KMI Property. EPA is proposing to delete the entire former KMI Property from the NPL, including the groundwater (OU1) and the soil/former source area (OU2). The remaining areas and media of the Site for both OU1 and OU2 containing the volatile halogenated organic chemicals (VHOs) source soils and plume, which are attributable to the Dow Chemical Company/Dowell Schlumberger, Inc. (DOW/DSI) facility, will remain on the NPL and are not being considered for deletion as part of this action. However, this partial deletion does not preclude future actions under Superfund.

DATES: This direct final rule is effective August 29, 2017 unless EPA receives adverse comments by July 31, 2017. If adverse comments are received, EPA will publish a timely withdrawal of the direct final partial deletion in the **Federal Register** informing the public that the partial deletion will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–1990–0011, by one of the following methods:

- *http://www.regulations.gov.* Follow on-line instructions for submitting comments.
- *Email:* Andrew Schmidt (*schmidt.andrew@epa.gov*).
- *Mail:* Andrew Schmidt, Remedial Project Manager, 8EPR–SR, Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202.
- *Hand Delivery:* Andrew Schmidt, Remedial Project Manager, 8EPR–SR, Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202.

Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–SFUND–1990–0011. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The Web site, *http://www.regulations.gov,* is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at: U.S. EPA Region 8, Superfund Records Center & Technical Library, 1595 Wynkoop Street, Denver, CO 80202–1129.

Viewing hours: 8 a.m. to 4:00 p.m., Monday through Thursday, excluding holidays;

Contact: Andrew Schmidt; (303) 312–6283; email: *schmidt.andrew@epa.gov* and Natrona County Public Library, Reference Desk, 307 East 2nd Street, Casper, WY 82601–2593, (307) 237–4935.

Monday–Thursday: 9 a.m.–6 p.m.
Friday and Saturday: 9 a.m.–5 p.m.

FOR FURTHER INFORMATION CONTACT: Andrew Schmidt, Remedial Project Manager, 8EPR–SR, U.S. Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202–1129, (303) 312–6283, email: *schmidt.andrew@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

EPA Region 8 is publishing this direct final notice of Partial Deletion for the former KMI Property of the Mystery Bridge Road/U.S. Highway 20 Superfund Site (Site) from the National Priorities List (NPL). The former KMI Property includes areas of soil and groundwater formerly impacted by benzene, toluene, ethylbenzene, and total xylenes (collectively known as BTEX) contamination. A map and surveyed boundaries of the former KMI Property are included in the docket and at the information repositories listed above. The NPL constitutes Appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). This partial deletion of the Mystery Bridge Road/U.S. Highway 20 Superfund Site is proposed in accordance with 40 CFR 300.425(e) and is consistent with the Notice of Policy Change: Partial Deletion of Sites Listed on the NPL, 60 FR 55466 (Nov. 1, 1995). As described in § 300.425(e)(3) of the NCP, a portion of a site deleted from the NPL remains eligible for Fund-financed remedial action if future conditions warrant such actions.

Because EPA considers this action to be non-controversial and routine, this action will be effective August 29, 2017 unless EPA receives adverse comments

by July 31, 2017. Along with this direct final Notice of Partial Deletion, EPA is co-publishing a Notice of Intent for Partial Deletion in the ''Proposed Rules'' section of the **Federal Register**. If adverse comments are received within the 30-day public comment period on this partial deletion action, EPA will publish a timely withdrawal of this direct final Notice of Partial Deletion before the effective date of the partial deletion, and the partial deletion will not take effect. EPA will, as appropriate, prepare a response to comments and continue with the deletion process on the basis of the Notice of Intent for Partial Deletion and the comments already received. There will be no additional opportunity to comment.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Mystery Bridge Road/U.S. Highway 20 Superfund Site and demonstrates how portions of the Site proposed for deletion meet the deletion criteria. Section V discusses EPA's action to partially delete the Site from the NPL unless adverse comments are received during the public comment period.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR Section 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the state, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. All appropriate Fund-financed responses under CERCLA have been implemented, and no further response action by responsible parties is appropriate; or

iii. The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Partial Deletion Procedures

The following procedures apply to the deletion of the former KMI Property of the Site:

1. EPA has consulted with the State of Wyoming prior to developing this direct final Notice of Partial Deletion and the Notice of Intent for Partial Deletion co-published in the ''Proposed Rules'' section of the **Federal Register**.

2. EPA has provided the State 30 working days for review of this notice and the parallel Notice of Intent for Partial Deletion prior to their publication today. The State, through the Wyoming Department of Environmental Quality (WDEQ), has concurred on the partial deletion of the Site from the NPL.

3. Concurrent with the publication of this direct final Notice of Partial Deletion, a notice of the availability of the parallel Notice of Intent for Partial Deletion is being published in a major local newspaper, the Casper Star Tribune. The newspaper notice announces the 30-day public comment period concerning the Notice of Intent for Partial Deletion of the Site from the NPL.

4. The EPA placed copies of documents supporting the partial deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

5. If adverse comments are received within the 30-day public comment period on this partial deletion action, EPA will publish a timely notice of withdrawal of this direct final Notice of Partial Deletion before its effective date and will prepare a response to comments and continue with the deletion process on the basis of the Notice of Intent for Partial Deletion and the comments already received.

Deletion of a portion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a portion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for further response actions, should future conditions warrant such actions.

IV. Basis for Partial Site Deletion

The following information provides EPA's rationale for deleting the former KMI Property from the Mystery Bridge Road/U.S. Highway 20 Superfund Site.

Site Background and History

The Mystery Bridge Road/U.S. Highway 20 Superfund Site (Site), EPA ID No. WYD981546005, is located in Natrona County, Wyoming northeast of Casper, Wyoming and one mile east of Evansville. The Site is bordered on the north by the North Platte River, on the west by the Sinclair Refinery (formerly known as the Little America Refining Company or LARCO), on the south by U.S. Highway 20 and on the east by Mystery Bridge Road. The northern two thirds of the Site contain residential housing units built primarily between 1973 and 1983. The former KN Energy (KN) facility, now owned by Tallgrass Energy Partners, LP, formerly owned by KM Upstream LLC and referred to in this Notice of Partial Deletion as the former KMI Property, and the adjacent Dow Chemical Company and Dowell-Schlumberger, Inc (DOW/DSI) facilities comprise the southern third of the Site. Site investigations, initiated due to resident complaints of poor water and air quality, were completed in 1986 and 1987 and identified a BTEX plume originating from the former KMI Property and a volatile halogenated organic chemicals (VHOs) plume originating from the DOW/DSI property, moving northeast towards the North Platte River. The Site was proposed for listing on the National Priorities List June 24, 1988 (53 FR 23996, 23749–24010 (June 24, 1988)), and was listed on the National Priorities List on August 30, 1990 (55 FR 35508, 35419–35554 (August 30, 1990)). Potential releases at the Sinclair Refinery (formerly LARCO) facility are currently being addressed under a RCRA 3008(h) order.

KM Upstream LLC and its predecessors have operated a natural gas fractionation, compression, cleaning, odorizing, and transmission plant at the Site since 1965. During the plant start-up, an underground pipe burst, injecting 5,000 to 10,000 gallons of absorption oil into the subsurface. Also, initially, an earthen flare pit was used to collect spent material generated by the facility. Absorption oil, emulsions, anti-foulants, and anti-corrosive agents, crude oil condensate, liquids accumulated in the flare stack, potassium hydroxide treated waste, and lubrication oils and blowdown materials from plant equipment were all possibly collected in

the flare pit. In 1984, a concrete-lined flare pit was constructed and put into operation. Leaks from the earthen flare pit, the initial absorption oil spill, and a catchment area that collected surface water run-off are all believed to have contributed to the BTEX soil and groundwater impacts.

The DOW/DSI facility has conducted oil and gas production enhancement services for the oil and gas industry since the 1950's. Contamination originating from the DOW/DSI facility is believed to have come from the truck wash water disposal system (believed to have contained chlorinated solvents) and the toluene storage area on the northern end of the facility.

EPA is the lead agency for the Site, and WDEQ is the support agency. Pursuant to the 1991 Consent Decree, KN, its successor Kinder Morgan Inc. (KMI), and DOW/DSI have jointly conducted and funded the remediation work at the Site. The former KMI Property is in continued operation as mid-stream gas processing facility.

The Site was divided into two media-specific operable units (OUs). OU1 refers to the groundwater at the Site and OU2 refers to the source areas in the soil at the Site.

Remedial Investigations and Feasibility Study (RI/FS) and Engineering Evaluations/Cost Analysis (EE/CA)

Numerous studies and remedial investigations conducted within the Site have addressed the former KMI Property. In December 1987, KN and DOW/DSI entered into Administrative Orders on Consent (AOCs) to perform removal actions at their respective facilities. Based on the findings of the initial investigation, each PRP was required to prepare an Engineering Evaluation/Cost Analysis (EE/CA) of its property to document the extent and nature of the contaminants present and to support proposals of expedited removal actions. The AOC also required the two PRPs to perform a Remedial Investigation/Feasibility Study (RI/FS) of the Brookhurst Subdivision site. The Mystery Bridge/U.S. Hwy 20 Superfund site includes the former KMI Property, the DOW/DSI property, several adjacent industrial properties, the Burlington Northern right-of-way and the Subdivision. The Brookhurst Subdivision RI/FS was submitted in June 1990 and concluded that two groundwater plumes originated from the industrial area, one from the DOW/DSI property containing VHOs and one from the former KMI Property contaminated with BTEX and suggested that the two plumes were not commingled.

In early 1988, Phase I and Phase II Environmental Site Assessments were performed on the former KMI Property, focusing on the area around the flare pit. Based on the free product findings, a Phase III Environmental Site Assessment, including a soil vapor survey, was conducted in mid-1988 to identify the extent of impacts. The EPA developed site-specific soil action levels (SALs) in 1988 for the former KMI Property that were based on toxicity data current at the time including:

- Benzene: 80 to 82 micrograms per kilogram (µg/kg)
- Ethylbenzene: 182,000 to 325,000 µg/kg
- Toluene: 71,000 to 107,000 µg/kg
- Total Xylenes: 176,000 µg/kg

In March 1989, the KN EE/CA was submitted to the EPA.

Selected Remedy

On July 14, 1989 the EPA signed an action memorandum, choosing the suggested response strategy outlined by the EE/CA. In November 1989, KN started the OU1 response actions, coupling a groundwater pump and treat system with a soil vapor extraction system, to remove BTEX contaminants in three phases: Soil vapor, floating product, and dissolved in groundwater. In September 1990, EPA issued a Record of Decision (ROD) dividing the Site into two operable units: OU1, groundwater contaminant plumes, and OU2, contaminated soils which represent a source for the groundwater contamination. The 1990 ROD selected a remedial action for OU1, the groundwater, and deferred selection of the remedial action for OU2. The OU1 ROD set out the following remedial action objectives (RAOs) for the BTEX contamination:

(1) Prevent ingestion of water containing benzene, toluene, ethylbenzene, or xylene at concentrations that either (a) exceed MCLs or proposed MCLs, or (b) Present a total carcinogenic risk range greater than 1×10^{-4} to 1×10^{-6}; and

(2) Restore the alluvial aquifer to concentrations that both (a) meet the MCLs or proposed MCLs for benzene, toluene, ethylbezene, and xylene, and (b) Present a total carcinogenic risk range less than 1×10^{-4} to 1×10^{-6}. The area of attainment included the entire BTEX groundwater plume.

The applicable MCLs for BTEX were the National Primary Drinking Water Regulations (40 CFR 141.61):

- Benzene: 0.005 milligrams per liter (mg/L)
- Ethylbenzene: 0.7 mg/L
- Toluene: 1 mg/L
- Total Xylenes 10 mg/L

An institutional control to restrict the groundwater use was also included in the OU1 ROD. In October 1991, a Consent Decree, where parties agreed to implement the OU1 remedy, was signed between EPA, KN and DOW/DSI.

Response Actions

The KN OU1 remediation system operated from November 1989 to August 1996 and involved a pump-and-treat system, where the effluent was sent through an air stripper and a soil vapor extraction system. The clean effluent from the air stripper was returned to the subsurface. A groundwater monitoring plan (GWP) was developed in 1993 and specified that quarterly post-remedial action (RA) monitoring would begin after the remediation system was discontinued and 12 months of groundwater sampling results were below the MCLs.

KMI assumed responsibility for KN's portion of the Site when KMI purchased KN in 1999. After a minimum of eight quarterly post-RA sampling events were conducted where the 90 percent one-tailed upper confidence limit (UCL90) concentrations for benzene, ethylbenzene, toluene, and total xylenes were below the MCLs for each chemical, compliance with the RAOs for the BTEX groundwater plume was achieved. It was confirmed that the OU1 RAOs were achieved in 2010 and the results were recorded in the September 30, 2010 OU2 ROD.

KN, KMI, and DOW each conducted work at the Site under an Administrative Order on Consent that addressed the contaminated soils on their respective properties. The OU2 ROD served to document that this previous work was completed and that this work cleaned up the DOW/DSI property and the KMI Property to levels safe for industrial use. Contaminants have been left above levels that allow for unlimited use and unrestricted exposure and it is acknowledged that land uses around these properties are transitioning from rural to residential and commercial. The OU2 ROD concluded that ICs were necessary for future protectiveness. Specifically for the former KMI Property, the RAOs specified in the OU2 ROD include:

- Restricting the use of the KMI Property to industrial uses.
- Controlling the handling of excavated soils on the KMI Property.

The OU2 RAOs have been achieved through institutional controls placed on the former KMI Property and implemented through restrictive covenants within the deed transferring the KMI Property from KMI to KM

Upstream LLC and, more recently, to Tallgrass Energy Partners, LP. The ground water institutional control from the OU1 ROD restricting ground water use except for sampling purposes at the former KMI Property was also implemented in 2010 as part of the restrictive covenants.

Operation and Maintenance

No operation and maintenance is required at the former KMI Property in addition to maintaining institutional controls.

Five-Year Review

Because the remedial action implemented for the former KMI Property results in contaminants remaining on site above concentrations that allow for unlimited use and unrestricted exposure, continued five-year reviews will be necessary to ensure that the remedy is protective of human health and the environment. The Fourth Five-Year Review for the Site, noted that the pump and treat remedy, as selected in the ROD, was shutdown prior to meeting cleanup levels at the site. Proper documentation for the shutdown, and Agency approval was identified for the decision to turn of the pump and treat system, and can be found in the deletion docket.

Community Involvement

Public participation activities have been satisfied as required in CERCLA section 113(k), 42 U.S.C. 9613(k) and CERCLA section 117, 42 U.S.C. 9617. Documents in the partial deletion docket, which the EPA relied on for the partial deletion from the NPL, are available to the public in the information repositories, and a notice of availability of the Intent for Partial Deletion has been published in the Casper Star Tribune to satisfy public participation procedures required by 40 CFR 300.425(e)(4).

Determination That the Criteria for Deletion Have Been Met

For the former KMI Property of both OU1 and OU2, EPA and the WDEQ have determined that the responsible parties completed all appropriate response actions required by the OU1 and OU2 Records of Decision and the 1991 Consent Decree. Additionally, institutional controls are in place that will limit property use to industrial purposes only and will control the handling of excavated soils and restrict ground water use to sampling only without further approval from EPA or the State. EPA has consulted with the State on the proposed partial deletion of the former KMI Property from OU1 and OU2 from the NPL prior to developing this notice of Partial Deletion.

Pursuant to CERCLA section 121(c) and the NCP, EPA will conduct the next five-year review by September 2019 to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure.

V. Partial Deletion Action

The EPA, with the concurrence of the State of Wyoming through WDEQ, has determined that all appropriate response actions under CERCLA, other than maintenance of institutional controls and five-year reviews, have been completed. Therefore, EPA is deleting the former KMI Property, including the groundwater from OU1 and the soils/source area from OU2 of the Mystery Bridge Road/U.S. Highway 20 Superfund Site from the NPL.

Because EPA considers this action to be noncontroversial and routine, EPA is taking it without prior publication. This action will be effective August 29, 2017 unless EPA receives adverse comments by July 31, 2017. If adverse comments are received within the 30-day public comment period, EPA will publish a timely withdrawal of this direct final notice of partial deletion before the effective date of the partial deletion and it will not take effect. EPA will prepare a response to comments and continue with the deletion process on the basis of the notice of intent to partially delete and the comments already received. There will be no additional opportunity to comment.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: May 1, 2017.

Debra H. Thomas,

Acting Regional Administrator, U.S. Environmental Protection Agency, Region 8.

For the reasons set out in this document, 40 CFR part 300 is amended as follows:

PART 300—NATIONAL OIL AND HAZARDOUS SUBSTANCES POLLUTION CONTINGENCY PLAN

■ 1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923; 3 CFR, 1987 Comp., p. 193.

■ 2. Table 1 of Appendix B to part 300 is amended by revising the entry under ''WY,'' ''Mystery Bridge Road/U.S. Highway 20,'' ''Evansville'' to read as follows:

Appendix B to Part 300—National Priorities List

TABLE 1—GENERAL SUPERFUND SECTION

State	Site name	City/county	Notes (a)
*	*	*	*

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[GN Docket No. 12–268, WT Docket Nos. 14–70, 05–211, RM–11395; FCC 15–80]

Updating Competitive Bidding Rules

AGENCY: Federal Communications Commission.

ACTION: Announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved the information collection requirements associated with the FCC 15–80, Updating Part 1 Competitive Bidding Rules, published on September 18, 2015. This document is consistent with FCC 15–80, which stated that the Commission would publish a document in the **Federal Register** announcing OMB approval and the effective date of changes to the forms.

DATES: FCC 15–80 and the changes to FCC Form 603 and FCC Form 608 published at 80 FR 56764 will become effective on June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Cathy Williams by email at *Cathy.Williams@fcc.gov* and telephone at (202) 418–2918.

SUPPLEMENTARY INFORMATION: This document announces that on June 8, 2017, OMB approved the information collection requirements, OMB Control Numbers 3060–0800 and 3060–1058, for changes to the FCC Forms 603 and 608.

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that on June 8, 2017, OMB approved changes to FCC Form 603 and FCC Form 608. In doing so, OMB approved changes to the information collection requirements of OMB Control Numbers 3060–0800 and 3060–1058. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Numbers are 3060–0800 and 3060–1058.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–0800.

OMB Approval Date: June 8, 2017.

OMB Expiration Date: June 30, 2020.

Title: FCC Application for Assignments of Authorization and Transfers of Control: Wireless Telecommunications Bureau and/or Public Safety and Homeland Security Bureau.

Form Number: FCC Forms 603.

Respondents: Individuals and households; Business or other for-profit entities; Not-for-profit institutions; and State, local or tribal government.

Number of Respondents and Responses: 2,447 respondents and 2,447 responses.

Estimated Time per Response: 0.5–1.75 hours.

Frequency of Response: Recordkeeping requirement, on occasion reporting requirement and periodic reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in 47 U.S.C. 154, 155, 158, 161, 301, 303(r), 308, 309, 310 and 332.

Total Annual Burden: 2,759 hours.

Total Annual Cost: $366,975.

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information.

Privacy Act Impact Assessment: Yes.

Needs and Uses: FCC Form 603 is a multi-purpose form used to apply for approval of assignment or transfer of control of licenses in the wireless services. The data collected on this form is used by the FCC to determine whether the public interest would be served by approval of the requested assignment or transfer. This form is also used to notify the Commission of consummated assignments and transfers of wireless and/or public safety licenses that have previously been consented to by the Commission or for which notification but not prior consent is required. This form is used by applicants/licensees in the Advanced Wireless Services, Public Mobile Services, Personal Communications Services, General Wireless Communications Services, Private Land Mobile Radio Services, Broadcast Auxiliary Services, Broadband Radio Services, Educational Radio Services, Fixed Microwave Services, Maritime Services (excluding ships), and Aviation Services (excluding aircraft).

The purpose of this form is to obtain information sufficient to identify the parties to the proposed assignment or transfer, establish the parties' basic eligibility and qualifications, classify the filing, and determine the nature of the proposed service. Various technical schedules are required along with the main form applicable to Auctioned Services, Partitioning and Disaggregation, Undefined Geographical Area Partitioning, Notification of Consummation or Request for Extension of Time for Consummation.

The data collected on FCC Form 603 includes the FCC Registration Number (FRN), which serves as a ''common link'' for all filings an entity has with the FCC. The Debt Collection Improvement Act of 1996 requires entities filing with the Commission use an FRN.

The OMB approved revisions to the previously approved collection of information under OMB Control Number 3060–0800 to permit the collection of the additional information for Commission licenses and permits, pursuant to the rules and information collection requirements adopted by the Commission in the Part 1 R&O and the Mobile Spectrum Holdings R&O. As part of the collection, the Commission is seeking approval for the information collection and recordkeeping requirements associated with FCC Form 603.

In addition, OMB approved various other, non-substantive editorial/consistency edits and updates to FCC Form 603 that corrected inconsistent capitalization of words and other typographical errors, and better align the text on the form with the text in the Commission rules both generally and in connection with recent non-substantive, organizational amendments to the Commission's rules. Also, in certain circumstances, the Commission requires the applicant to provide copies of their agreements. The Commission did not anticipate that these revisions will impact the collection filing burden. OMB therefore approved the FCC revision of its currently approved information collection on FCC Form 603 to revise FCC Form 603 accordingly.

OMB Control Number: 3060–1058.

OMB Approval Date: June 8, 2017.

OMB Expiration Date: June 30, 2020.

Title: FCC Application or Notification for Spectrum Leasing Arrangement: Wireless Telecommunications Bureau and/or Public Safety and Homeland Security Bureau.

Form Number: FCC Form 608.

Respondents: Business or other for profit entities; Not-for-profit institutions; and State, local or tribal government.

Number of Respondents and Responses: 991 respondents; 991 responses.

Estimated Time per Response: 0.5–1 hours.

Frequency of Response: Recordkeeping requirement, on occasion reporting requirement and periodic reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. 154, 155, 158, 161, 301, 303(r), 308, 309, 310 and 332.

Total Annual Burden: 996 hours.

Total Annual Cost: $1,282,075.

Nature and Extent of Confidentiality: In general there is no need for confidentiality with this collection of information.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: FCC Form 608 is a multipurpose form. It is used to provide notification or request approval for any spectrum leasing arrangement (''Leases'') entered into between an existing licensee (''Licensee'') in certain wireless services and a spectrum lessee (''Lessee''). This form also is required to notify or request approval for any spectrum subleasing arrangement (''Sublease''). The data collected on the form is used by the FCC to determine whether the public interest would be served by the Lease or Sublease. The form is also used to provide notification for any Private Commons Arrangement entered into between a Licensee, Lessee, or Sublessee and a class of third-party users (as defined in Section 1.9080 of the Commission's Rules).

The OMB approved revisions to the previously approved collection of information under OMB Control Number 3060–1058 to permit the collection of the additional information for Commission licenses and permits, pursuant to the rules and information collection requirements adopted by the Commission in the Part 1 R&O and the Mobile Spectrum Holdings R&O. As part of the collection, the Commission is seeking approval for the information collection and recordkeeping requirements associated with FCC Form 608.

In addition, OMB approved various other, non-substantive editorial/consistency edits and updates to FCC Form 608 that corrected inconsistent capitalization of words and other typographical errors, and better align the text on the form with the text in the Commission rules both generally and in connection with recent non-substantive, organizational amendments to the Commission's rules. Also, in certain circumstances, the Commission requires the applicant to provide copies of their agreements. The Commission did not anticipate that these revisions will impact the collection filing burden. OMB therefore approved the FCC revision of its currently approved information collection on FCC Form 608 to revise FCC Form 608 accordingly.

Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 16–306, GN Docket No. 12–268; DA 17–484]

Transition Progress Report Form and Filing Requirements for Stations Not Eligible for Reimbursement From the TV Broadcast Relocation Fund

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) describes the information that must be provided in periodic progress reports (FCC Form 2100—Schedule 387 (Transition Progress Report)) by full power and Class A television stations that are not eligible to receive payment of relocation expenses from the TV Broadcast Relocation Fund in connection with their being assigned to a new channel through the Incentive Auction.

DATES: Effective June 30, 2017.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, *Joyce.Bernstein@fcc.gov,* (202) 418–1647, or Kevin Harding, *Kevin.Harding@fcc.gov,* (202) 418–7077.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's document, DA 17–484, MB Docket No. 16–306, GN Docket No. 12–268, adopted and released May 18, 2017. The complete text of this document is available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY–A257, Washington, DC 20554. The complete text of this document is also available for download at *http://transition.fcc.gov/Daily_Releases/Daily_Business/2017/db0518/DA-17-484A1.pdf.*

Synopsis

The Incentive Auction Task Force and Media Bureau (collectively, the Commission) previously determined that stations that are eligible for reimbursement from the TV Broadcast Relocation Fund in connection with their being assigned to a new channel through the Incentive Auction must file reports showing how the disbursed funds have been spent and what portion of the stations' construction in complete, and sought comment on whether non-reimbursable stations should also file reports to show what portion of the stations' construction is complete. These Transition Progress Reports will help the Commission, broadcasters, those involved in construction of broadcast facilities, other interested parties, and the public to monitor the construction of stations.

The Commission announces that each full power and Class A television station that will be changing channels during the post-incentive auction transition and is not eligible for reimbursement of its relocation costs from the TV Broadcast Relocation Fund established by the Middle Class Tax Relief and Job Creation Act of 2012 must follow the same progress reporting requirements as reimbursable stations and periodically file an FCC Form 2100—Schedule 387 (Transition Progress Report) that is attached as Appendix A to the Public Notice DA 17–34. The appendix is available at *https://apps.fcc.gov/edocs_public/attachmatch/DA-17-34A1.docx.* Non-Reimbursable stations must file Transition Progress Reports using the Commission's electronic filing system starting with first full calendar quarter after close of the Incentive Auction, which occurred on April 13, 2017, and on a quarterly basis thereafter. In addition to these quarterly reports, Non-Reimbursable stations must file the reports: (1) 10 weeks before the end of their assigned construction deadline; (2) 10 days after they complete all work related to construction of their post-auction facilities; and (3) five days after they cease broadcasting on their pre-auction channel. Once a station has filed a Transition Progress Report certifying that it has completed all work related to construction of its post-auction facilities and has ceased operating on its pre-auction channel, it will no longer be required to file reports. The Commission will automatically line the Transition Progress Reports to non-reimbursable stations' online local public inspection file on the Commission's Web site.

Some commenters proposed changes to questions in the Transition Progress Report Form adopted for reimbursable stations and certain filing procedures, which the Commission treated as requests for reconsideration and declined to adopt. The Commission declined to incorporate the response of ''unknown at this time'' into the form for each question, to change the wording of a question dealing with auxiliary antenna systems, to require a more detailed level of reporting with respect to a number of questions, to require reports to be filed on a less frequent basis, or to allow group owners to file a single report for all of their stations.

Paperwork Reduction Act of 1995 Analysis: This document contains new or modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, has invited the general public and the Office of Management and Budget (OMB) to comment on the information collection requirements contained in this document in a separate **Federal Register** Notice, as required by the Paperwork Reduction Act of 1995, Public Law 104–13, see 44 U.S.C. 3507.

The Commission will send a copy of the document, DA 17–484, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Appendix B: Final Regulatory Flexibility Act Analysis

As required by the Regulatory Flexibility Act of 1980, as amended (''RFA''), an Initial Regulatory Flexibility Analysis (''IRFA'') was incorporated in the *Transition Progress Report Public Notice.* The Incentive Auction Task Force and Media Bureau sought written public comments on the proposals in the *Transition Progress Report Public Notice,* including comment on the IRFA. Because we adopt filing requirements for stations in the Public Notice, we have included this Final Regulatory Flexibility Analysis (''FRFA''), which conforms to the RFA.

Need for, and Objectives of, the Rule Changes. The Federal Communications Commission (Commission) adopted a 39-month transition period during which television stations that are assigned to new channels in the incentive auction must construct their new facilities. The Commission determined that reassigned television stations that are eligible for reimbursement from the TV Broadcast Relocation Fund are required, on a regular basis, to provide progress reports to the Commission showing how the disbursed funds have been spent and what portion of construction is complete. In the *Transition Progress Report Public Notice,* the Media Bureau adopted a form for such progress reports and set the filing deadlines for such reports. The Public Notice requires that that reassigned television stations that are not eligible for reimbursement from the TV Broadcast Relocation Fund (Non-Reimbursable Stations) provide the same progress reports to the Commission on the same schedule as that specified for stations eligible for reimbursement. The Transition Progress Report Form requires all reassigned stations to certify that certain steps toward construction of their post-auction channel either have been completed or are not required, and to identify potential problems which they believe may make it difficult for them to meet their construction deadlines. The information in the progress reports will be used by the Commission, stations, and other interested parties to monitor the status of reassigned stations' construction during the 39-month transition period.

Summary of Significant Issues Raised by Public Comments in Response to the IRFA. No formal comments were filed on the IRFA.

Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration. No comments were filed on the IRFA by the Small Business Administration.

Description and Estimate of the Number of Small Entities to Which the Rules Will Apply. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA. Below, we provide a description of such small entities, as well as an estimate of the number of such small entities, where feasible.

Television Broadcasting. This Economic Census category ''comprises establishments primarily engaged in broadcasting images together with sound.'' These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA has created the following small business size standard for such businesses: those having $38.5 million or less in annual receipts. The 2012 Economic Census reports that 751 firms in this category operated in that year. Of that number, 656 had annual receipts of $25,000,000 or less, 25 had annual receipts between $25,000,000 and $49,999,999 and 70 had annual receipts of $50,000,000 or more. Based on this data we therefore estimate that the majority of commercial television broadcasters are small entities under the applicable SBA size standard.

The Commission has estimated the number of licensed commercial television stations to be 1,384. Of this total, 1,264 stations (or about 91 percent) had revenues of $38.5 million or less, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on February 24, 2017, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission has estimated the number of licensed noncommercial educational (NCE) television stations to be 394. Notwithstanding, the Commission does not compile and otherwise does not have access to information on the revenue of NCE stations that would permit it to determine how many such stations would qualify as small entities.

We note, however, that in assessing whether a business concern qualifies as small under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, an element of the definition of ''small business'' is that the entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific television station is dominant in its field of operation. Accordingly, the estimate of small businesses to which rules may apply does not exclude any television station from the definition of a small business on this basis and is therefore possibly over-inclusive to that extent.

Class A TV Stations. The same SBA definition that applies to television broadcast stations would apply to licensees of Class A television stations. As noted above, the SBA has created the following small business size standard

for this category: Those having $38.5 million or less in annual receipts. The Commission has estimated the number of licensed Class A television stations to be 417. Given the nature of these services, we will presume that these licensees qualify as small entities under the SBA definition.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements. The Public Notice adopted the following new reporting requirements. Non-Reimbursable Stations must file the Transition Progress Report on a quarterly basis, with the first Report being filed beginning for the first full quarter after the release of a public notice announcing the completion of the incentive auction. The deadline for filing the first Report is October 10, 2017. We further require that Non-Reimbursable Stations file Transition Progress Reports: (1) 10 weeks before the end of their assigned construction deadline; (2) 10 days after they complete all work related to construction of their post-auction facilities; and (3) five days after they cease broadcasting on their pre-auction channel. The Transition Progress Reports will be filed electronically using the Commission's electronic filing system, and the Commission will make the filings viewable in stations' online public inspection files. All reassigned stations are assigned to one of 10 Post-Auction Transition Plan Phase with construction deadline requirements ranging from November 30, 2018 to July 3, 2020. Once a station has ceased operating on its pre-auction channel, it no longer needs to file reports.

Steps Taken to Minimize Significant Impact on Small Entities, and Significant Alternatives Considered. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standard; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

The reporting requirement adopted in the Public Notice will allow the Commission, broadcasters (including those filing the Reports), and other interested parties to more closely monitor the status of construction during the transition, and focus resources on ensuring successful completion of the transition by all reassigned stations and continuity of over-the-air television service. In addition, the burdens of the reporting requirements are minimal and we believe the benefits of the reporting requirements, which will facilitate the successful post-incentive auction transition, outweigh any burdens associated with compliance.

Federal Rules that May Duplicate, Overlap, or Conflict With the Proposed Rule. None.

Report to Congress. The Commission will send a copy of the Public Notice, including this FRFA, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act. A copy (or summary thereof) will also be published in the **Federal Register**.

Report to Small Business Administration. The Commission will send a copy of the Public Notice, including this FRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Thomas Horan,

Chief of Staff.

50 CFR Part 622

[Docket No. 161020986–7352–02]

RIN 0648–BG38

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Amendment 36

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement Amendment 36 to the Fishery Management Plan (FMP) for the Snapper-Grouper Fishery of the South Atlantic Region as prepared and submitted by the South Atlantic Fishery Management Council (Council). This final rule modifies the FMP framework procedures to allow spawning special management zones (SMZs) to be established or modified through the framework process; establishes spawning SMZs off North Carolina, South Carolina, and Florida; establishes transit and anchoring provisions in the spawning SMZs; and establishes a sunset provision for most of the spawning SMZs. This final rule also moves the boundary of the existing Charleston Deep Artificial Reef Marine Protected Area (MPA). The purpose of this final rule is to protect spawning snapper-grouper species and the habitat where they spawn, and to reduce bycatch and bycatch mortality for snapper-grouper species, including speckled hind and warsaw grouper.

DATES: This final rule is effective July 31, 2017.

ADDRESSES: Electronic copies of Amendment 36 may be obtained from *www.regulations.gov* or the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov.* Amendment 36 includes an environmental assessment, Regulatory Flexibility Act (RFA) analysis, regulatory impact review, and fishery impact statement.

FOR FURTHER INFORMATION CONTACT: Frank Helies, NMFS Southeast Regional Office, telephone: 727–824–5305, or email: *frank.helies@noaa.gov.*

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery in the South Atlantic region is managed under the FMP and includes speckled hind and warsaw grouper, along with other snapper-grouper species. The FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On January 4, 2017, NMFS published a notice of availability of Amendment 36 and requested public comment (82 FR 810). On January 18, 2017, NMFS published the proposed rule to implement Amendment 36 and requested public comment (82 FR 5512). The proposed rule and Amendment 36 outline the rationale for the actions contained in this final rule. A summary of the actions implemented by Amendment 36 and this final rule is provided below.

Management Measures Contained in This Final Rule

This final rule modifies the FMP framework procedures to allow spawning SMZs to be established or modified through the framework process; establishes spawning SMZs off North Carolina, South Carolina, and Florida; establishes transit and anchoring provisions in the spawning SMZs; establishes a sunset provision for

most of the spawning SMZs; and moves the existing Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) northwest to match the permitted site boundary.

Modify the FMP Framework Procedures for Spawning SMZs

The current FMP contains framework procedures to allow the Council to modify certain management measures, such as annual catch limits and other management measures, via an expedited process (see 50 CFR 622.194; 56 FR 56016, October 31, 1991). In Amendment 36 and this final rule, the Council has included changes to spawning SMZs, such as boundary modifications and the establishment or removal of spawning SMZs, under the framework process. For example, this final rule allows the Council to remove a spawning SMZ if monitoring efforts do not document evidence of spawning snapper-grouper species within the boundary. The revisions to the FMP framework procedures also allow the Council to remove the 10-year sunset provision for a spawning SMZ if monitoring efforts document snapper-grouper species' spawning inside a spawning SMZ. The Council decided that changing spawning SMZs through an expedited process can have beneficial biological and socio-economic impacts, especially if the changes respond to newer information, such as spawning locations for snapper-grouper species. The Council concluded that the framework process will allow adequate time for the public to comment on any proposed change related to a spawning SMZ.

Establish Spawning SMZs Off North Carolina, South Carolina, and Florida

The Council is establishing five snapper-grouper spawning SMZs in the South Atlantic off North Carolina, South Carolina, and Florida. This final rule prohibits fishing for or harvest of snapper-grouper species year-round in the spawning SMZs. The final rule establishes other restrictions in the spawning SMZs, including transiting with snapper-grouper species on board and anchoring.

The spawning SMZ off North Carolina is called South Cape Lookout (5.1 sq mi; 13.2 sq km). The final rule establishes three spawning SMZs off South Carolina that are called Devil's Hole/Georgetown Hole (3.03 sq mi; 7.8 sq km), Area 51 (approximately 3 sq mi; 7.8 sq km), and Area 53 (approximately 3 sq mi; 7.8 sq km). The spawning SMZ off the east coast of the Florida Keys is called Warsaw Hole/50 Fathom Hole (3.64 sq mi; 9.4 sq km).

Another purpose of spawning SMZs is to reduce bycatch and bycatch mortality of snapper-grouper species, including speckled hind and warsaw grouper. Currently, retention of speckled hind and warsaw grouper is prohibited in Federal waters in the South Atlantic. Prohibiting the targeting or harvest of snapper-grouper species in specified areas where these species are known to occur and possibly spawn is expected to reduce encounters with these deep-water species and provide protection for reproduction. The Council concluded that protecting snapper-grouper species within the spawning SMZs could enhance the opportunity for these species to reproduce and introduce more eggs and larvae into the environment.

Establish Transit and Anchoring Provisions in Spawning SMZs

This final rule allows fishing vessels to transit through the spawning SMZs with snapper-grouper species on board only when fishing gear is properly stowed. ''Properly stowed'' means that trawl or try nets and the attached doors must be out of the water, but are not be required to be on deck or secured below deck. Terminal gear (hook, leader, sinker, flasher, or bait) used with automatic reels, bandit gear, buoy gear, handline, or rod and reel would have to be disconnected and stowed separately from such fishing gear and sinkers would have to be disconnected from down riggers and stowed separately. Except under the limited condition to possess snapper-grouper species while transiting a spawning SMZ with fishing gear properly stowed, vessels in the spawning SMZs are prohibited from fishing for, harvesting, or possessing snapper-grouper species year-round in these areas. Except for the Area 51 and Area 53 Spawning SMZs off South Carolina, persons on board a fishing vessel are not allowed to anchor, use an anchor or chain, or use a grapple and chain while in spawning SMZs. Fishermen continue to be allowed to troll for pelagic species such as dolphin, tuna, and billfish in spawning SMZs.

Establish a Sunset Provision for Most Spawning SMZs

This final rule implements a 10-year sunset provision for the establishment of the spawning SMZs, except for the Area 51 and Area 53 Spawning SMZs, which will remain in effect indefinitely. Therefore, except for Areas 51 and 53, the spawning SMZs and their associated management measures are effective for 10 years following the implementation of this final rule for Amendment 36. For the spawning SMZs and management measures subject to the sunset provision to extend beyond 10 years, the Council would need to take further action. The Council will regularly evaluate all of the spawning SMZs over the 10-year period.

Move the Existing Charleston Deep Artificial Reef MPA

This final rule moves the existing Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) northwest to match the boundary of the U.S. Army Corps of Engineers' permitted artificial reef area at that location. This final rule does not change the size of the existing MPA. The Council originally designated the current area as an artificial reef site in Amendment 14 to the FMP (74 FR 1621, January 13, 2009). The State of South Carolina has worked with the U.S. Army Corps of Engineers to modify the boundary of this site to include material recently sunk by the state in the area and requested that the Council shift their boundary of the existing Charleston Deep Artificial Reef MPA to match the new boundary of the U.S. Army Corps of Engineers' permitted artificial reef area.

Management Measure Contained in Amendment 36 but Not Codified Through This Final Rule

In addition to the management measures that this final rule implements, Amendment 36 includes an action to modify the SMZ procedures in the FMP to allow for the designation of spawning SMZs. The Council will be able to designate important spawning areas as spawning SMZs to provide additional protection to some existing Essential Fish Habitat-Habitat Areas of Particular Concern for snapper-grouper species. The Council concluded that designating areas as spawning SMZs is important to protect snapper-grouper species and habitat where snapper-grouper species spawn. Additionally, the Council concluded that designating the spawning SMZ sites through this final rule, and subsequent changes to regulations, would enhance reproduction for snapper-grouper species and thus increase the number of eggs and larvae that are produced by the species.

Comments and Responses

NMFS received a total of 101 comments on the notice of availability and proposed rule for Amendment 36. The commenters included commercial, private recreational, and charter vessel fishing entities, as well as recreational divers, non-governmental organizations, and individuals from the general public. Comments both supported additional protections for spawning fish through

implementation of spawning SMZs and opposed the implementation of any spatial closures in the South Atlantic. The majority of comments received from the public during the comment period were supportive of the actions in Amendment 36 to establish spawning SMZs to protect spawning snapper-grouper species. NMFS' responses to comments that specifically relate to the actions contained in Amendment 36 and the proposed rule are summarized below.

Comment 1: NMFS should not establish additional fishing area closures to protect spawning fish. The data used to determine potential spawning SMZ sites are flawed and the sites were arbitrarily selected. Additionally, the science does not support the use of MPAs or similarly named spatial closures as a viable management option.

Response: NMFS disagrees that the spawning SMZ sites were arbitrarily selected and that the data used are flawed. The Council used a variety of data sources to select spawning SMZ sites. Data sources included the Southeast Reef Fish Survey, habitat mapping research, and cooperative research projects that identified locations where snapper-grouper species occur, including spawning fish. In addition, multiple groups provided input on site selection to protect spawning fish while reducing social and economic impacts to fishermen. These groups included fishermen on the Council's MPA Expert Work Group and Snapper-Grouper Advisory Panel (Snapper-Grouper AP) who could be affected by the spawning SMZs. Finally, the Council evaluated comments and recommendations from the public during meetings such as public hearings and scoping meetings. The NMFS Southeast Fisheries Science Center reviewed the data and analyses contained in Amendment 36 and certified it to be based on the best scientific information available.

NMFS disagrees that spatial closures are not a viable management option for protecting spawning snapper-grouper species. Areas closed to protect known spawning locations of fish species have been shown to provide positive biological and socio-economic benefits. The spawning SMZs implemented by this final rule are expected to result in additional protections for spawning snapper-grouper, while potentially providing positive economic effects by increasing future stock size and sustainability. Should monitoring efforts highlight the need for the adjustment of an area or the removal of a spawning SMZ if spawning snapper-grouper species are not documented in the area, this final rule will allow the Council to modify spawning SMZs. If the Council does not take any subsequent action to modify or renew the spawning SMZs, most of the spawning SMZs would expire automatically after the 10-year sunset provision in this final rule.

Comment 2: NMFS is establishing spawning SMZs without any regard for the economic and social impacts on fishermen and coastal communities.

Response: NMFS disagrees. The Magnuson-Stevens Act requires NMFS to consider and analyze the economic and social impacts of proposed management actions. Amendment 36 and this final rule recognize that negative short-term economic effects resulting from restrictions in fishing opportunities in the designated spawning SMZs may occur. The spawning SMZs are small (combined total area is 17.71 square miles) relative to all available fishing grounds in the South Atlantic, and the total estimated economic loss of ex-vessel revenue for the entire commercial sector is $1,605 annually. NMFS assumes that any reduction in ex-vessel revenue from this final rule would be minimized based on the small size of each spawning SMZ area and the high likelihood that commercial vessels would substitute landings of snapper-grouper species in other areas. Also, the allowance for transit and trolling for pelagic species could reduce economic impacts from this final rule to fishermen.

Comment 3: The spawning SMZs should be closed to all fishing methods. Research has shown that snapper-grouper species, including warsaw grouper and speckled hind, can be harvested through the deployment of trolling gear. Allowing trolling of any kind could undermine the potential effectiveness of a spawning SMZ and would make enforcement of the provision that allows transiting with snapper-grouper species on board difficult.

Response: Amendment 36 and this final rule allow fishermen to troll for pelagic species in the spawning SMZs but do not allow fishing vessels to have snapper-grouper species on board. The final rule allows fishing vessels to possess snapper-grouper species on board while in a spawning SMZ only if the vessel is transiting through the spawning SMZ directly and without stopping, and if fishing gear is appropriately stowed and unavailable for immediate use (*e.g.,* terminal gear, like hooks and weights, must be disconnected and stowed separately from a rod and reel). Therefore, law enforcement would be able to determine the difference between fishing vessels that are trolling for pelagic species and fishing vessels that are transiting the spawning SMZs with snapper-grouper species on board through visual inspection of the gear and the species on board. The trolling and transit allowances were discussed by the Council and included in Amendment 36 as a way to reduce the economic and social impacts of spatial closures on the fishing community and address concerns about safety at-sea, respectively.

Comment 4: Fishing for snapper-grouper species and anchoring in the spawning SMZs should be exempted for spear fishermen. Spear fishing is a selective gear type and large catches of snapper-grouper are not expected to occur through its use.

Response: In all of the spawning SMZs implemented by this final rule, the fishing for, harvest, or possession (except while transiting through a spawning SMZ) of snapper-grouper species is prohibited year-round. While NMFS agrees that spear fishing is a selective fishing gear with lower bycatch potential compared to other fishing methods, spear fishing could remove larger fish that are important to spawning. Prohibiting spear fishing in spawning SMZs is expected to provide protection to spawning snapper-grouper species to meet the objectives of Amendment 36.

Comment 5: Establishing Warsaw Hole as a spawning SMZ should be removed from consideration in Amendment 36. Fish caught in the Warsaw Hole and surrounding area (particularly greater amberjack) make up the majority of some fishermen's annual income in Key West, Florida, and fishing in the area results in little to no discards. Additionally, the majority of landings around Warsaw Hole occur north of 24°21′ N. lat., within the 1.8-square mile area included in another sub-alternative. However, if the Warsaw Hole Spawning SMZ must be established, the alternative consisting of a 0.9-square mile area is recommended over the preferred alternative of a 3.6-square mile area. The 0.9-square mile area would provide the least amount of negative economic impact to fishermen in Key West, Florida.

Response: The Council's objective for the protection of Warsaw Hole is to implement a spawning SMZ that would maximize the probability that snapper-grouper species, including warsaw grouper and greater amberjack, reform spawning aggregations at this site while balancing both short and long-term social and economic impacts to fishermen. To accomplish this objective,

the Council determined the spawning SMZ should cover the shelf edge around the hole where greater amberjack spawn. After evaluating a spawning SMZ of different sizes around Warsaw Hole, the Council concluded that the 3.6-square mile area for the Warsaw Hole Spawning SMZ best meets this objective.

NMFS acknowledges that there may be short-term negative social and economic impacts from the spawning SMZ being implemented for Warsaw Hole. The Council considered these economic impacts but determined that the enhanced reproduction for snapper-grouper species and, subsequently, the increased the number of eggs and larvae that are produced as a result of this added protection, would be expected to result in long-term indirect economic benefits to commercial and recreational fishermen. In the end, the Council concluded that the 3.6-square mile area for the Warsaw Hole Spawning SMZ best meets the objectives of Amendment 36 by creating positive impacts, while balancing both short and long-term social and economic impacts.

Comment 6: The Council should adopt the 3.6-square mile area as a spawning SMZ for Warsaw Hole and the 13.3-square mile area as a spawning SMZ for Daytona Steeples. These two alternatives together would provide the greatest amount of protection to spawning snapper-grouper species off Florida.

Response: The Council selected the 3.6-square mile area around Warsaw Hole as the only spawning SMZ off Florida. Extensive input from the Council's Snapper-Grouper AP and the public indicated that there would be support for a spawning SMZ at Daytona Steeples if there were data on spawning snapper-grouper species or habitat in the area. The Council considered a spawning SMZ in the Daytona Steeples area but agreed with the Snapper-Grouper AP and public about the lack of available data on spawning snapper-grouper species or habitat and decided not to propose any spawning SMZ in the Daytona Steeples area.

Comment 7: The details in the system management plan (SMP) for the spawning SMZs, such as cost, monitoring, and evaluation techniques, should have been fully developed before the proposed sites in Amendment 36 were presented to the Council.

Response: The SMP for the spawning SMZs was developed in conjunction with Amendment 36 to outline the data and research needed to monitor and evaluate the spawning SMZs and guide researchers applying for project funding. The SMP outlines the estimated project costs for each study type to aid fishery managers in determining research priorities. The purpose of the SMP is not to outline the specific methods and costs. The Council acknowledged that the SMP will likely be modified over time as research projects are implemented. One of the primary tasks for the SMP was to recommend development of an advisory panel to the Council. The advisory panel would be used to further develop specific projects to monitor spawning SMZs.

Classification

The Regional Administrator for the NMFS Southeast Region has determined that this final rule is consistent with Amendment 36, the FMP, the Magnuson-Stevens Act, and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the statutory basis for this rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting, record-keeping, or other compliance requirements are introduced by this final rule.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this rule would not have a significant economic impact on a substantial number of small entities. The factual basis for this determination was published in the proposed rule and is not repeated here. Public comments relating to socio-economic implications and potential impacts on small businesses are addressed in the responses to Comments 2, 3, and 4 in the Comments and Responses section of this final rule. No comments were received regarding the certification and NMFS has not received any new information that would affect its determination. As a result, a final regulatory flexibility analysis was not required and none was prepared.

Change to Codified Text From the Proposed Rule

In this final rule, NMFS makes one change to the coordinates table for the Devil's Hole/Georgetown Hole Spawning SMZ. In the proposed rule, the coordinate points for this spawning SMZ were listed in a counter-clockwise order when plotted on a map or chart. The points for all other coordinate tables of the spawning SMZs in the proposed rule were listed in a clockwise order. This final rule revises the order of the coordinates for the Devil's Hole/Georgetown Hole Spawning SMZ to list them in a clockwise order, to be consistent with the other spawning SMZs in this final rule.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Marine protected area, South Atlantic, Special management zone.

Dated: June 27, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.183, revise the table in paragraph (a)(1)(i)(D) and add paragraph (a)(2) to read as follows:

§ 622.183 Area and seasonal closures.

(a) * * *

(1) * * *

(i) * * *

(D) * * *

Point	North lat.	West long.
A	32°05.04′	79°13.575′
B	32°09.65′	79°09.2′
C	32°07.155′	79°05.595′
D	32°02.36′	79°09.975′
A	32°05.04′	79°13.575′

* * * * *

(2) *Spawning SMZs.* (i) Any fishing vessel in a spawning SMZ is prohibited to fish for or harvest species in the snapper-grouper fishery management unit year-round. For a fishing vessel to possess snapper-grouper species on board while in a spawning SMZ, the vessel must be in transit and fishing gear must be appropriately stowed, as specified in paragraph (a)(2)(vii) of this section. Except for spawning SMZs of Area 51 and Area 53, the spawning SMZs in this paragraph are effective until August 2, 2027. A person on board a fishing vessel may not anchor, use an anchor and chain, or use a grapple and chain while in the spawning SMZs specified in paragraph (a)(2) of this section. The anchoring prohibition does not apply to fishing vessels in the spawning SMZs of Area 51 and Area 53.

(ii) *South Cape Lookout Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	33°53.040′	76°28.617′
B	33°52.019′	76°27.798′
C	33°49.946′	76°30.627′
D	33°51.041′	76°31.424′
A	33°53.040′	76°28.617′

(iii) *Devil's Hole/Georgetown Hole Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	32°34.311′	78°34.996′
B	32°34.311′	78°33.220′
C	32°32.748′	78°33.220′
D	32°32.748′	78°34.996′
A	32°34.311′	78°34.996′

(iv) *Area 51 Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	32°35.25′	79°28.6′
B	32°35.25′	79°27′
C	32°33.75′	79°27′
D	32°33.75′	79°28.6′
A	32°35.25′	79°28.6′

(v) *Area 53 Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	32°22.65′	79°22.25′
B	32°22.65′	79°20.5′
C	32°21.15′	79°20.5′
D	32°21.15′	79°22.25′
A	32°22.65′	79°22.25′

(vi) *Warsaw Hole/50 Fathom Hole Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	24°22.277′	82°20.417′
B	24°22.277′	82°18.215′
C	24°20.932′	82°18.215′
D	24°20.932′	82°20.417′
A	24°22.277′	82°20.417′

(vii) For the purpose of paragraph (a)(2)(i) of this section, transit means direct, non-stop progression through the spawning SMZ. Fishing gear appropriately stowed means—

(A) A longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck. Hooks cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

(B) Trawl doors and nets must be out of the water, but the doors are not required to be on deck or secured on or below deck.

(C) A gillnet, stab net, or trammel net must be left on the drum. Any additional such nets not attached to the drum must be stowed below deck.

(D) Terminal gear (*i.e.,* hook, leader, sinker, flasher, or bait) used with an automatic reel, bandit gear, buoy gear, handline, or rod and reel must be disconnected and stowed separately from such fishing gear. Sinkers must be disconnected from the down rigger and stowed separately.

(E) A crustacean trap, golden crab trap, or sea bass pot cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

* * * * *

■ 3. In § 622.194, revise paragraph (a) to read as follows:

§ 622.194 Adjustment of management measures.

* * * * *

(a) Biomass levels, age-structured analyses, target dates for rebuilding overfished species, MSY (or proxy), OY, ABC, TAC, quotas (including a quota of zero), annual catch limits (ACLs), annual catch targets (ACTs), AMs, maximum fishing mortality threshold (MFMT), minimum stock size threshold (MSST), trip limits, bag limits, size limits, gear restrictions (ranging from regulation to complete prohibition), seasonal or area closures, fishing year, rebuilding plans, definitions of essential fish habitat, essential fish habitat, essential fish habitat HAPCs or Coral HAPCs, restrictions on gear and fishing activities applicable in essential fish habitat and essential fish habitat HAPCs, and establish or modify spawning SMZs.

* * * * *

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 170320292–7580–02]

RIN 0648–XF311

Fisheries Off West Coast States; Coastal Pelagic Species Fisheries; Annual Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this rule to implement annual management measures and harvest specifications to establish the allowable catch levels (*i.e.,* annual catch limit (ACL)/harvest guideline (HG)) for the northern subpopulation of Pacific sardine (hereafter, Pacific sardine), in the U.S. exclusive economic zone (EEZ) off the Pacific coast for the fishing season of July 1, 2017, through June 30, 2018. These specifications were determined according to the Coastal Pelagic Species (CPS) Fishery Management Plan (FMP). This action includes a prohibition on directed non-tribal Pacific sardine commercial fishing off the coasts of Washington, Oregon, and California, which is required because the estimated 2017 biomass of Pacific sardine has dropped below the biomass threshold specified in the HG control rule. Under this action, Pacific sardine may still be harvested as part of either the live bait or tribal fishery, or as incidental catch in other fisheries; the incidental harvest of Pacific sardine would initially be limited to 40-percent by weight of all fish per trip when caught with other CPS or up to 2 metric tons (mt) when caught with non-CPS. The ACL for the 2017–2018 Pacific sardine fishing year is 8,000 mt. This action is intended to conserve and manage the Pacific sardine stock off the U.S. West Coast.

DATES: Effective July 1, 2017 through June 30, 2018.

FOR FURTHER INFORMATION CONTACT: Joshua Lindsay, West Coast Region, NMFS, (562) 980–4034, *joshua.lindsay@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS manages the Pacific sardine fishery in the U.S. EEZ off the Pacific coast (California, Oregon, and Washington) in accordance with the CPS FMP. Annual specifications published in the **Federal Register** establish the allowable harvest levels (*i.e.,* overfishing limit (OFL)/ACL/HG) for each Pacific sardine fishing year. The purpose of this final rule is to implement these annual catch reference points for the 2017–2018 fishing year. This final rule adopts, without changes, the catch levels and restrictions that NMFS proposed in the rule published on May 30, 2017 (82 FR 24656), including the OFL and an acceptable biological catch (ABC) that takes into consideration uncertainty surrounding the current estimate of biomass for Pacific sardine in the U.S. EEZ off the Pacific coast.

The FMP and its implementing regulations require NMFS to set these annual catch levels for the Pacific sardine fishery based on the annual specification framework and control

rules in the FMP. These control rules include the HG control rule, which, in conjunction with the OFL and ABC rules in the FMP, are used to manage harvest levels for Pacific sardine, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.* According to the FMP, the quota for the principal commercial fishery is determined using the FMP-specified HG formula. The HG formula in the CPS FMP is HG = [(Biomass − CUTOFF) * FRACTION * DISTRIBUTION] with the parameters described as follows:

1. *Biomass.* The estimated stock biomass of Pacific sardine age one and above. For the 2017–2018 management season, this is 86,586 mt.

2. *CUTOFF.* This is the biomass level below which no HG is set. The FMP established this level at 150,000 mt.

3. *DISTRIBUTION.* The average portion of the Pacific sardine biomass estimated in the EEZ off the Pacific coast is 87 percent.

4. *FRACTION.* The temperature-varying harvest fraction is the percentage of the biomass above 150,000 mt that may be harvested.

As described above, the Pacific sardine HG control rule, the primary mechanism for setting the annual directed commercial fishery quota, includes a CUTOFF parameter, which has been set as a biomass level of 150,000 mt. This amount is subtracted from the annual biomass estimate before calculating the applicable HG for the fishing year. Since this year's biomass estimate is below that value, the formula results in an HG of zero, and no Pacific sardine are available for the primary commercial directed fishery during the 2017–2018 fishing season.

At the April 2017 Pacific Fishery Management Council (Council) meeting, the Council's Science and Statistical Committee (SSC) approved, and the Council adopted, the ''Assessment of the Pacific Sardine Resource in 2017 for U.S. Management in 2017–2018,'' which was prepared by NMFS Southwest Fisheries Science Center. The resulting Pacific sardine biomass estimate of 86,586 mt is the best available science for setting harvest specifications. Based on recommendations from its SSC and other advisory bodies, the Council recommended, and NMFS is implementing, an OFL of 16,957 mt, an ABC of 15,497 mt, and a prohibition on Pacific sardine catch, unless it is harvested as part of either the live bait or tribal fishery or incidental to other fisheries for the 2017–2018 Pacific sardine fishing year. As additional management measures, the Council also recommended, and NMFS is implementing through this action, an ACL of 8,000 mt and that the incidental catch of Pacific sardine in other CPS fisheries be managed with the following automatic inseason actions to reduce the potential for both targeting and discard of Pacific sardine:

- An incidental per landing by weight allowance of 40 percent Pacific sardine in non-treaty CPS fisheries until a total of 2,000 mt of Pacific sardine are landed.
- When 2,000 mt are landed, the incidental per landing allowance will be reduced to 20 percent until a total of 5,000 mt of Pacific sardine have been landed.
- When 5,000 mt have been landed, the incidental per landing allowance will be reduced to 10 percent for the remainder of the 2017–2018 fishing year.

Pacific sardine is known to comingle with other CPS stocks; thus, these incidental allowances are established to allow for the continued prosecution of these other important CPS fisheries and reduce the potential discard of sardine. Additionally, an incidental per landing allowance is allowed in non-CPS fisheries: Up to 2 mt may be landed per trip.

The NMFS West Coast Regional Administrator will publish a notice in the **Federal Register** announcing the date of attainment of any of the incidental catch levels described above and subsequent changes to allowable incidental catch percentages. Additionally, to ensure that the regulated community is informed of any closure, NMFS will also make announcements through other means available, including fax, email, and mail to fishermen, processors, and state fishery management agencies.

As explained in the proposed rule, the Quinault Indian Nation requested a set-aside for tribal harvest of 800 mt (the same amount that was requested and approved for 2016–2017). NMFS considered this request and, per this action, 800 mt of the 2017–2018 ACL are being set aside for tribal harvest.

Detailed information on the fishery and the stock assessment are found in the report ''Assessment of the Pacific Sardine Resource in 2017 for U.S. Management in 2017–2018'' (see **FOR FURTHER INFORMATION CONTACT**).

Comment and Response

On May 30, 2017, NMFS published a proposed rule for this action and solicited public comments (82 FR 24656), with a public comment period that ended on June 14, 2017. NMFS received one comment letter—explained below—during the comment period. After consideration of the public comment, no changes were made from the proposed rule. For further background information on this action please refer to the preamble of the proposed rule. NMFS summarizes and responds below to the comment letter below.

Comment: The commenter expressed support for the prohibition on directed commercial sardine fishing, but opposition to the proposed ACL level, and requested that NMFS instead set an ACL of no more than 2,000 mt to be divided among the live bait and tribal sectors, and to accommodate limited bycatch. The commenter expressed an opinion that the proposed ACL of 8,000 mt is contrary to the purpose of the CUTOFF and that only minimal incidental catch (*i.e.,* 2,000 mt) should be allowed to prevent further depletion and support sardine recovery.

In addition to commenting on the proposed rule, the bulk of the comment described various scientific papers and requested reconsideration of various aspects of sardine management including the Minimum Stock Size Threshold value as well as aspects of the harvest guideline control rule, including but not limited to the existing CUTOFF parameter and the DISTRIBUTION parameter. (These parameters, as well as other changes to the sardine harvest control rule and management are set in the CPS Plan and are beyond the scope of this rulemaking; therefore, they will not be addressed below.)

Response: NMFS disagrees that the ACL implemented in this rule is not in line with the FMP or that it fails to prevent overfishing or ''is excessive and risks further depletion and delayed recovery''. The ACL should be viewed in the context of the OFL for the northern subpopulation of Pacific Sardine of 16,957 mt and an ABC of 15,497 mt that takes into account scientific uncertainty surrounding the OFL. These harvest reference limits were recommended by the Council based on the control rules in the FMP and were endorsed by the Council's SSC. The commenter does not question that the OFL and ABC levels reflect the best available science. By definition, harvest up to the level of OFL or ABC would not constitute overfishing, and would not drive the stock towards an overfished state. This rule takes a conservative approach by limiting harvest levels by all sources to an ACL of 8,000 mt, which is well below both the OFL and ABC. All incidental catch, live bait harvest and tribal harvest of sardine will be managed to stay at or below the ACL, employing multiple

safeguards to ensure the ACL will not be exceeded. In short, the management measures implemented by this rule are more than adequate to prevent exceeding the OFL. Additionally, even in the absence of any fishing mortality, unfavorable environmental conditions could keep the sardine population at a low level. Small pelagic species, such as sardine, undergo wide natural fluctuations in abundance, even in the absence of fishing, from environmental conditions external to fishing; therefore, it is highly unlikely that reducing the ACL from 8,000 mt to 2,000 mt would measurably affect long-term fluctuations in Pacific sardine abundance. Based on the recent stock assessments and NMFS research, low recent recruitments (*i.e.,* the number of young fish maturing into the spawning population) is the primary cause of the current downward trend in overall population size. Recruitment is believed to be strongly related to environmental conditions, particularly, large-scale oceanographic phenomena.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Fishery Conservation and Management Act, the NMFS West Coast Regional Administrator, with the concurrence of the Assistant Administrator, has determined that this final rule is consistent with the CPS FMP, other provisions of the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws.

NMFS finds good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness for the establishment of these final harvest specifications for the 2017–2018 Pacific sardine fishing season. In accordance with the FMP, this rule was recommended by the Council at its meeting in April 2017, the contents of which were based on the best available new scientific information on the population status of Pacific sardine that became available at that time. Making these final specifications effective on July 1, 2017, is necessary for the conservation and management of the Pacific sardine resource. The FMP requires a prohibition on directed fishing for Pacific sardine for the 2017–2018 fishing year because the sardine biomass is below the CUTOFF. The purpose of the CUTOFF in the FMP—and prohibiting directed fishing when the biomass drops below this level—is to protect the stock when biomass is low and provide a buffer of spawning stock that is protected from fishing and available for use in rebuilding the stock. A delay in the effectiveness of this rule for a full 30 days would not allow the implementation of this prohibition prior to the expiration of the closure of the directed fishery on July 1, 2017, which was imposed under the 2016–2017 annual specifications.

Delaying the effective date of this rule beyond July 1 would be contrary to the public interest because reducing Pacific sardine biomass beyond the limits set out in this action could decrease the sustainability of the Pacific sardine, as well as cause future harvest limits to be even lower under the harvest control rule, thereby reducing future profits of the fishery.

These final specifications are exempt from review under Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This action does not contain a collection-of-information requirement for purposes of the Paper Reduction Act.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 26, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

RIN 0648–XF335

Pacific Island Fisheries; 2017–18 Annual Catch Limit and Accountability Measures; Main Hawaiian Islands Deep 7 Bottomfish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final specifications.

SUMMARY: NMFS specifies an annual catch limit (ACL) of 306,000 lb for Deep 7 bottomfish in the main Hawaiian Islands (MHI) for the 2017–18 fishing year, which will begin on September 1, 2017, and end on August 31, 2018. If NMFS projects that the fishery will reach the ACL, NMFS would close the commercial and non-commercial fisheries for MHI Deep 7 bottomfish for the remainder of the fishing year as an accountability measure (AM). The ACL and AM support the long-term sustainability of Hawaii bottomfish.

DATES: The final specifications are effective from July 31, 2017, through August 31, 2018.

ADDRESSES: Copies of the Fishery Ecosystem Plan for the Hawaiian Archipelago are available from the Western Pacific Fishery Management Council (Council), 1164 Bishop St., Suite 1400, Honolulu, HI 96813, tel. 808–522–8220, fax 808–522–8226, or *www.wpcouncil.org.* Copies of the environmental assessment and finding of no significant impact for this action, identified by NOAA–NMFS–2017–0033, are available from *www.regulations.gov,* or from Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Region (PIR), 1845 Wasp Blvd. Bldg. 176, Honolulu, HI 96818.

FOR FURTHER INFORMATION CONTACT: Sarah Ellgen, NMFS PIR Sustainable Fisheries, 808–725–5173.

SUPPLEMENTARY INFORMATION: Through this action, NMFS is specifying an ACL of 306,000 lb of Deep 7 bottomfish in the MHI for the 2017–18 fishing year. The fishing year begins September 1, 2017, and ends on August 31, 2018. The Council recommended this ACL, based on the best available scientific, commercial, and other information, taking into account the associated risk of overfishing. The ACL of 306,000 lb for 2017–18 is 12,000 lb less than the ACL that NMFS specified for 2016–17 (82 FR 5429, January 18, 2017).

The MHI Management Subarea is the portion of U.S. Exclusive Economic Zone around the Hawaiian Archipelago east of 161°20′ W. The Deep 7 bottomfish are onaga (*Etelis coruscans*), ehu (*E. carbunculus*), gindai (*Pristipomoides zonatus*), kalekale (*P. sieboldii*), opakapaka (*P. filamentosus*), lehi (*Aphareus rutilans*), and hapuupuu (*Hyporthodus quernus*).

NMFS will monitor the fishery and, if we project that the fishery will reach the ACL before August 31, 2018, we would, as an AM authorized in 50 CFR 665.4(f), close the non-commercial and commercial fisheries for Deep 7 bottomfish in Federal waters through August 31, 2018. During a fishery closure for Deep 7 bottomfish, no person may fish for, possess, or sell any of these fish in the MHI Management Subarea.

There is no prohibition on fishing for, possessing, or selling other (*non*-Deep 7) bottomfish during such a closure. All other management measures continue to apply in the MHI bottomfish fishery. If NMFS and the Council determine that the final 2017–18 Deep 7 bottomfish catch exceeds the ACL, NMFS would reduce the Deep 7 bottomfish ACL for 2018–19 by the amount of the overage.

You may review additional background information on this action in the preamble to the proposed specifications (82 FR 24092; May 25, 2017); we do not repeat that information here.

Comments and Responses

The comment period for the proposed specifications ended on June 9, 2017. NMFS did not receive any comments.

Changes From the Proposed Specifications

There are no changes in the final specifications from the proposed specifications.

Classification

The Regional Administrator, NMFS PIR, determined that this action is necessary for the conservation and management of MHI Deep 7 bottomfish, and that it is consistent with the Magnuson-Stevens Act and other applicable laws.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed specification stage that this action would not have a significant economic impact on a substantial number of small entities. NMFS published the factual basis for the certification in the proposed specifications, and does not repeat it here. NMFS did not receive comments regarding this certification. As a result, a final regulatory flexibility analysis is not required, and one was not prepared.

This action is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 26, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[FR Doc. 2017–13681 Filed 6–29–17; 8:45 am]

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 82, No. 125
Friday, June 30, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Parts 429 and 430

[EERE–2017–BT–TP–0004]

Energy Conservation Program: Test Procedures for Consumer Refrigerators, Refrigerator-Freezers, and Freezers

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Request for information (''RFI'').

SUMMARY: The U.S. Department of Energy (''DOE'') is initiating a data collection process through this request for information to consider whether to amend DOE's test procedures for consumer refrigerators, refrigerator-freezers, and freezers. To inform interested parties and to facilitate this process, DOE has gathered data, identifying several issues associated with the currently applicable test procedures on which DOE is interested in receiving comment. The issues outlined in this document mainly concern testing products with newly-available features, the inclusion of automatic icemaker energy use, built-in product test configuration, any issues with the current test procedure that need to be addressed, and any additional topics that may inform DOE's decisions in a future test procedure rulemaking, including methods to reduce regulatory burden while ensuring the procedure's accuracy. DOE welcomes written comments from the public on any subject within the scope of this document (including topics not raised in this request for information).

DATES: Written comments and information are requested and will be accepted on or before July 31, 2017.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE–2017–BT–TP–0004, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email:* To *ConsumerRefrigFreezer2017TP0004@ee.doe.gov.* Include the docket number EERE–2017–BT–TP–0004 in the subject line of the message.
- *Postal Mail:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW., Washington, DC, 20585–0121. Telephone: (202) 586–6636. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.
- *Hand Delivery/Courier:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, 950 L'Enfant Plaza SW., 6th Floor, Washington, DC, 20024. Telephone: (202) 586–6636. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

No telefacsimilies (faxes) will be accepted. For detailed instructions on submitting comments and additional information on the rulemaking process, see section III of this document.

Docket: The docket for this activity, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *http://www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

The docket Web page can be found at *http://www.regulations.gov/#!docketDetail;D=EERE-2017-BT-TP-0004.* The docket Web page will contain simple instructions on how to access all documents, including public comments, in the docket. See section III for information on how to submit comments through *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Dr. Stephanie Johnson, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW., Washington, DC, 20585–0121. Telephone: (202) 287–1943. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–8145. Email: *Michael.Kido@hq.doe.gov.*

For further information on how to submit a comment, review other public comments and the docket, or participate in the public meeting, contact the Appliance and Equipment Standards Program staff at (202) 586–6636 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

Consumer refrigerators, refrigerator-freezers, and freezers are included in the list of ''covered products'' for which DOE is authorized to establish and amend energy conservation standards and test procedures. (42 U.S.C. 6292(a)(1)) DOE's test procedures for consumer refrigerators, refrigerator-freezers, and freezers are prescribed at title 10 of the Code of Federal Regulations (''CFR'') part 430, subpart B, appendices A and B (''Appendices A and B''). The following sections discuss DOE's authority to establish and amend test procedures for consumer refrigerators, refrigerator-freezers, and freezers, as well as relevant background information regarding DOE's consideration of test procedures for these products.

A. Authority and Background

The Energy Policy and Conservation Act of 1975 (''EPCA'' or ''the Act''),[1] Public Law 94–163 (42 U.S.C. 6311–6317, as codified), among other things, authorizes DOE to regulate the energy efficiency of a number of consumer products and industrial equipment. Title III, part B [2] of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency. These products include consumer refrigerators, refrigerator-freezers, and freezers, the subject of this request for information (RFI). (42 U.S.C. 6292(a)(1))

Under EPCA, DOE's energy conservation program consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of the Act specifically include definitions (42 U.S.C. 6291), energy conservation standards (42 U.S.C. 6295), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

Federal energy efficiency requirements for covered products established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (See 42 U.S.C. 6297) DOE may, however, grant waivers of Federal preemption for particular State laws or regulations, in accordance with the procedures and other provisions of EPCA. (42 U.S.C. 6316(b)(2)(D))

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of those consumer products (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the products comply with relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE must follow when prescribing or amending test procedures for covered products. EPCA requires that any test procedures prescribed or amended under this section be reasonably designed to produce test results which measure energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

In addition, if DOE determines that a test procedure amendment is warranted, it must publish proposed test procedures and offer the public an opportunity to present oral and written comments on them. (42 U.S.C. 6293(b)(2))

EPCA also requires that, at least once every 7 years, DOE evaluate test procedures for each type of covered product, including consumer refrigerators, refrigerator-freezers, and freezers, to determine whether amended test procedures would more accurately or fully comply with the requirements for the test procedures to not be unduly burdensome to conduct and be reasonably designed to produce test results that reflect energy efficiency, energy use, and estimated operating costs during a representative average use cycle. (42 U.S.C. 6293(b)(1)(A)) If amended test procedures are appropriate, DOE must publish a final rule to incorporate the amendments. If DOE determines that test procedure revisions are not appropriate, DOE must publish its determination not to amend the test procedures. DOE is publishing this RFI to collect data and information to inform a potential test procedure rulemaking to satisfy the 7-year review requirement specified in EPCA, which requires that DOE publish, by April 21, 2021, either a final rule amending the test procedures or a determination that amended test procedures are not required. (42 U.S.C. 6293(b)(1)(A))

B. Rulemaking History

DOE's current test procedures for refrigerators, refrigerator-freezers, and freezers are the result of numerous evolutionary steps taken since DOE initially established its test procedures for these products in a final rule published in the **Federal Register** on September 14, 1977 (42 FR 46140). Industry representatives viewed these original test procedures as too complex and eventually developed alternative test procedures in conjunction with the Association of Home Appliance Manufacturers (AHAM) that were incorporated into the 1979 version of HRF–1, ''Household Refrigerators, Combination Refrigerator-Freezers, and Household Freezers'' (HRF–1–1979). Using this industry-created test procedure, DOE revised its test procedures on August 10, 1982 (47 FR 34517).

On August 31, 1989, DOE amended the test procedure further when it published a final rule establishing test procedures for variable-defrost control refrigeration products, dual-compressor refrigerator-freezers, and freezers equipped with ''quick-freeze'' (54 FR 36238).

DOE amended the test procedures again on March 7, 2003, by modifying the test period used for products equipped with long-time automatic defrost or variable defrost (68 FR 10957).

On December 16, 2010, DOE made its most recent significant modifications to the test procedures when it published a final and interim final rule establishing the test procedures in Appendices A and B (75 FR 78810). That rule established a number of comprehensive changes to help improve the measurement of energy consumption of refrigerators, refrigerator-freezers, and freezers. These changes included, among other things: (1) Adjusting the standardized compartment temperatures and volume-adjustment factors, (2) adding new methods for measuring compartment volumes, (3) modifying the long-time automatic defrost test procedure to measure all energy use associated with the defrost function, and (4) adding test procedures for products with a single compressor and multiple evaporators with separate active defrost cycles. Lastly, the interim final rule addressed icemaking energy use by including a fixed energy use adder for those products equipped with an automatic icemaker. Using available data submitted by the industry, this value was set at 84 kilowatt-hours (kWh) per year. *Id.* On January 25, 2012, DOE finalized the test procedures established in the interim final rule and incorporated additional amendments to improve test accuracy (77 FR 3559).

On July 10, 2013, DOE proposed further amending the consumer refrigerator and refrigerator-freezer test procedure to address products with multiple compressors and to allow an alternative method for measuring and calculating energy consumption for refrigerator-freezers and refrigerators with freezer compartments, (78 FR 41610, ''2013 NOPR''). DOE also proposed to amend certain aspects of the consumer refrigerator, refrigerator-freezer, and freezer test procedures to ensure better accuracy and repeatability. Additionally, DOE solicited comment on a proposed automatic icemaker test procedure and on whether built-in

[1] All references to EPCA in this document refer to the statute as amended through the Energy Efficiency Improvement Act of 2015 (EEIA 2015), Public Law 114–11 (April 30, 2015).

[2] For editorial reasons, upon codification in the U.S. Code, part B was redesignated part A.

products should be tested in a built-in configuration. *Id.* In response to the 2013 NOPR, interested parties requested that DOE grant more time to respond to the proposal for measuring energy use associated with icemaking and to DOE's request for comment regarding testing of built-in products in a built-in configuration. DOE granted the comment period extension request for these two topics (78 FR 53374, Aug. 29, 2013).

On April 21, 2014, DOE published a final rule for the refrigerator, refrigerator-freezer, and freezer test procedures (the ''2014 final rule''), (79 FR 22320). The amendments enacted by the 2014 final rule addressed products with multiple compressors and established an alternative method for measuring and calculating energy consumption for refrigerator-freezers and refrigerators with freezer compartments. The 2014 final rule also amended certain aspects of the test procedures to improve test accuracy and repeatability. To allow time to review comments and data received during the comment period extension, DOE did not address automatic ice making energy use or built-in testing configuration in the 2014 final rule. *Id.*

On July 18, 2016, DOE published a final rule that established coverage and test procedures for a variety of refrigeration products collectively described as ''miscellaneous refrigeration products'' (''MREFs''), (81 FR 46768). Included within this category are refrigeration products that include one or more compartments that maintain higher temperatures than typical refrigerator compartments, such as wine chillers and beverage coolers. Additionally, the final rule amended Appendices A and B to include provisions for testing MREFs and to improve the clarity of certain existing test requirements. *Id.*

II. Request for Information and Comments

In the following sections, DOE has identified a variety of issues on which it seeks input to aid in the development of the technical and economic analyses regarding whether amended test procedures for consumer refrigerators, refrigerator-freezers, and freezers may be warranted. Specifically, DOE is requesting comment on any opportunities to streamline and simplify testing requirements for refrigerators, refrigerator-freezers, and freezers.

Additionally, DOE welcomes comments on other issues relevant to the conduct of this rulemaking that may not specifically be identified in this document. In particular, DOE notes that under E.O. 13771, executive branch agencies such as DOE are directed to manage the costs associated with the imposition of expenditures required to comply with Federal regulations. See 82 FR 9339 (Feb. 3, 2017) (E.O. 13771 ''Reducing Regulation and Controlling Regulatory Costs''). Pursuant to that executive order, DOE encourages the public to provide input on measures DOE could take to lower the cost of its regulations applicable to consumer refrigerators, refrigerator-freezers, and freezers consistent with the requirements of EPCA.

A. Features

1. Door-in-Door Designs

DOE's test procedures for refrigerators, refrigerator-freezers, and freezers are intended to represent operation in typical room conditions with door openings by testing at an elevated ambient temperature with no door openings. 10 CFR 430.23(a)(7). The increased thermal load from the elevated ambient temperature is intended to represent the thermal load that would be associated with both door openings as cool cabinet air mixes with warmer ambient air and the loading of warmer items in the cabinet.

DOE is aware of certain products available on the market that incorporate a door-in-door design. This feature allows the consumer to access items loaded in the door shelves without opening an interior door that encloses the inner cabinet. This feature prevents the majority of the cool cabinet air from escaping to the room and being replaced by warmer ambient air, as would be the case during a typical total door opening.

Because the DOE test procedure requires testing with the cabinet doors remaining closed, it would not reflect the potential energy savings associated with door-in-door features during typical consumer operation with door openings.

DOE requests comment on test methods for products with door-in-door designs that will yield accurate and repeatable results. Specifically, DOE seeks information on whether an alternate test method is appropriate or whether potential energy savings may be addressed with a calculation approach. DOE also seeks information regarding what steps, if any, manufacturers are taking to account for the energy use characteristics of products that use door-in-door designs. Further, DOE requests data, if any, on consumer use of the door-in-door feature, including how often the outer door is used in comparison to a total door opening, and the corresponding energy impacts of each type of door opening.

2. Display Screens and Connected Functions

Many refrigerators, refrigerator-freezers, and freezers currently available on the market include user control panels or displays located on the front of the product. These features, which can control the products' function and provide additional user features, such as television or internet access, operate with many different control schemes, including activation by proximity sensors.

The DOE test procedure, by referencing AHAM's 2008 version of ''Energy and Internal Volume of Refrigerating Appliances'' (HRF–1–2008), requires testing with customer-accessible features, not required for normal operation, which are electrically powered, manually initiated, and manually terminated, set at their lowest energy usage positions when adjustment is provided.

However, by testing in this manner (*i.e.,* setting consumer features in their lowest energy positions), the resulting measurements may not accurately represent actual consumer use. DOE requests information on how consumers typically use exterior display screens and control panels, when available. While any information would be welcome, DOE is particularly interested in any survey data that may yield insight into the manner and frequency with which consumers use these features. Additionally, DOE requests detailed feedback on the appropriate energy-related settings to use for these types of features during testing to best represent consumer use.

Similarly, many products incorporating these more advanced user interfaces include internet connections to allow for additional functions. The product controls may consume different amounts of energy depending on whether the internet connection is enabled or disabled, and if enabled, whether it is connected to a network. DOE requests information (such as survey data) on whether consumers typically use an internet connection, when available, for refrigerators, refrigerator-freezers, and freezers. DOE also requests information on the potential energy impacts of the refrigeration products equipped with a connected configuration, and on the appropriate energy-related settings to use for testing.

B. Icemaking Energy Consumption

In 2010, DOE initiated a test procedure rulemaking to help address a

variety of test procedure-related issues, including energy use associated with automatic icemaking. On May 27, 2010, DOE published a NOPR (the ''2010 NOPR'') proposing to use a fixed value of 84 kWh per year to represent the energy use associated with automatic icemaking (75 FR 29824). The 2010 NOPR also indicated that DOE would consider adopting an approach based on testing to determine icemaking energy use if a suitable test procedure could be developed. *Id.* at 29846–29847. A broad group of interested parties submitted a joint comment supporting DOE's proposal to use a temporary fixed placeholder value to represent the energy use of automatic icemakers. The joint commenters also urged DOE to initiate a rulemaking no later than January 1, 2012, and publish a final rule no later than December 31, 2012, to amend the test procedures to incorporate a laboratory-based measurement of icemaking energy use. (Test Procedure for Refrigerators, Refrigerator-Freezers, and Freezers, Docket Number EERE–2009–BT–TP–0003; Joint Comment, No. 20 at pp. 5–6)

In January 2012, AHAM provided DOE with a draft test procedure that could be used to measure automatic icemaker energy usage. (AHAM Refrigerator, Refrigerator-Freezer and Freezer Ice Making Energy Test Procedure, Revision 1.0—12/14/11, No. 4) [3] AHAM then submitted a revised automatic icemaker test procedure on July 18, 2012. (AHAM Refrigerator, Refrigerator-Freezer and Freezer Ice Making Energy Test Procedure, Revision 2.0—7/10/12, No. 5) [4] In the subsequent 2013 NOPR, as mentioned in section I.B of this document, DOE proposed a method for measuring the energy usage associated with automatic icemaking based on the revised approach submitted by AHAM. See generally 78 FR 41618–41629. In response to the 2013 NOPR, AHAM submitted comments to DOE requesting that DOE grant its members more time to respond to the automatic icemaker testing proposal, which DOE granted (78 FR 53374, Aug. 29, 2013). In the 2014 final rule, DOE established the fixed value adder approach and stated that it would review comments received during the comment period extension to address the icemaking test procedure issue in a future notice. See 79 FR 22341–22342.

A number of interested parties supported the development and adoption of a test procedure that measures the energy use of automatic icemaking. These commenters cited a number of reasons to justify a laboratory-based icemaker energy test procedure, including: (1) A direct laboratory test is more accurate and representative of actual icemaking energy use, and (2) the fixed adder approach would not reward improvements in icemaking efficiency or provide incentives to reduce icemaker energy consumption. (BSH Home Appliances Corporation, No. 21 at p. 1; [5] Joint Commenters,[6] No. 42 at pp. 1–5; Samsung Electronics America, Inc., No. 39 at p. 2)

Other interested parties supported the adder approach, noting the significant test burden associated with the proposed icemaking test procedure and the limited opportunities to reduce icemaking energy consumption. (AHAM, No. 37 at p. 2–5; GE Appliances, No. 40 at p. 5; Sub-Zero Group, Inc., No. 36 at p. 2) Further, DOE received data indicating that consumers likely use less ice than assumed in calculating the 84 kWh/year adder. Interested parties commented that the updated consumer use data supported an adder as low as 28 kWh/year. (AHAM, No. 37 at pp. 2–6; GE Appliances, No. 40 at pp. 2–4; Northwest Energy Efficiency Alliance and Northwest Power & Conservation Council, No. 41 at p. 2)

DOE welcomes additional feedback from interested parties on the most appropriate approach to account for icemaker energy use. DOE also requests any more recent consumer use data, if available, regarding ice consumption and automatic icemaker usage in consumer refrigerator-freezers and freezers. DOE also seeks input regarding whether retention of the current fixed adder approach should continue or whether an actual test procedure should replace it at this time. If DOE were to adopt a test procedure that measures icemaker energy use, DOE seeks input on which one to use, for example, the test proposed in the 2013 NOPR, and what specific technical issues it needs to consider if it were to propose such a rule for adoption. To this end, DOE is also interested in what impacts, if any, the adoption of an icemaking energy measurement test procedure would have on the measured energy use of a given product when compared to the fixed energy value adder approach used in the current test procedure.

DOE is also aware of consumer products available on the market that use two automatic icemakers. Typically, these products are refrigerator-freezers with bottom-mounted freezers, with an icemaker in the freezer compartment and another contained in the through-the-door ice service in the fresh food compartment. The fresh food icemaker serves more frequent through-the-door ice service, while the freezer icemaker serves as an in-freezer storage container for infrequent bulk ice use.

DOE requests information on whether products with multiple automatic icemakers should be tested differently than the more typical single automatic icemaker models—and if so, how. DOE seeks consumer use data for these products to inform whether a different energy use adder or test procedure would be appropriate for these dual-icemaker products.

C. Built-In Test Configuration

In the 2013 NOPR, DOE presented data indicating that testing in a built-in enclosure may affect energy consumption for certain configurations of built-in products. Specifically, those products that reject condenser heat at the back of the unit showed a potential increase in energy use when tested in an enclosure. DOE observed no significant change in energy use associated with the test configuration for those products that reject heat from the front of the unit. DOE requested comment on the appropriate test configuration for built-in refrigerators, refrigerator-freezers, and freezers, (78 FR 46149–46150). Similar to the icemaking test issue, DOE provided additional time to comment on the built-in testing issue prior to the 2014 final rule, but did not address the issue in that rule.

In the rulemaking leading to the 2014 final rule, DOE received multiple comments. Some commenters supported testing built-in products in an enclosure, as this would represent how the products are used in the field. (Joint Commenters, No. 42 at pp. 5–6; Northwest Energy Efficiency Alliance and Northwest Power & Conservation Council, No. 41 at p. 4) Others opposed the enclosure approach, noting the significant increase in test burden with little or no corresponding change in

[3] Document No. 4 in Docket No. EERE–2012–BT–TP–0016, available for review at *www.regulations.gov*.

[4] Document No. 5 in Docket No. EERE–2012–BT–TP–0016, available for review at *www.regulations.gov*.

[5] A notation in the form ''BSH Home Appliances Corporation, No. 21 at p. 1'' identifies a written comment: (1) Made by BSH Home Appliances Corporation; (2) recorded in document number 21 that is filed in the docket of the test procedure rulemaking (Docket No. EERE–2009–BT–TP–0003) and available for review at *www.regulations.gov;* and (3) which appears on page 1 of document number 21.

[6] ''Joint Commenters'' refers to the Appliance Standards Awareness Project, American Council for an Energy-Efficient Economy, Consumer Federation of America, National Consumer Law Center, and Natural Resources Defense Council.

measured energy consumption. These interested parties also noted that for the products showing a difference in measured energy use between the freestanding and enclosure setups, the enclosure configuration that DOE used (based on Underwriters Laboratories (UL) 250, ''Household Refrigerators and Freezers'') was not necessarily consistent with manufacturer installation instructions. (AHAM, No. 37 at pp. 16–17; BSH Home Appliances Corporation, No. 21 at p. 1; Liebherr-Canada, Ltd., No. 34 at pp. 1–4; Sub-Zero Group, Inc., No. 36 at p. 2).

DOE continues to seek comment on the built-in testing issue, including consumer installation, test burden, and energy impacts. Among the issues of interest to DOE include whether testing a product in its built-in condition would generally be more representative of energy consumption of a product during its average use cycle or period of use and, if so, the extent to which testing in this condition would be expected to affect the measured energy use of these products, if any. DOE requests information on whether testing all built-in products in an enclosure is appropriate, or whether testing in an enclosure would affect the test results only for certain built-in product configurations, such as those that exhaust condenser heat from the rear of the product. DOE is also interested in detailed information on whether there would be a significant additional test burden resulting from a requirement that specifies these products be tested in a built-in condition—and if so, the nature and extent of that burden. Additionally, DOE is interested in whether alternative methods of assessing the energy consumption of built-in products during their average use cycle or period of use, such as through a calculation or adder approach, are feasible—and if so, what likely degree of accuracy could be obtained if such methods were used in lieu of testing in a built-in condition.

D. Test Procedure Clarifications

1. Thermocouple Configuration for Freezer Drawers

As discussed in section II.A.2 of this document, Appendices A and B incorporate by reference portions of HRF–1–2008 for testing requirements. Section 5.5.5.5 of HRF–1–2008 includes figures specifying thermocouple placement for a number of example fresh food and freezer compartment configurations. HRF–1–2008 also notes that in situations where the interior of a cabinet does not conform to the configurations shown in the example figures, measurements must be taken at locations chosen to represent approximately the entire cabinet.

HRF–1–2008 provides a specific thermocouple location diagram for freezer compartments in refrigerator-freezers (type 6 in Figure 5–2). However, the diagram for this configuration is based on an upright, front-opening freezer compartment, and does not explicitly address drawer-type freezer compartments. Based on its experience testing these products at third-party test laboratories, DOE understands there may be confusion over which thermocouple layout is appropriate for drawer-type freezer compartments in refrigerator-freezers. DOE believes that sensor layout type 6 is appropriate for testing drawer freezer compartments in refrigerator-freezers. DOE requests feedback on whether this sensor layout or, alternatively, a different thermocouple configuration set forth in HRF–1–2008 or elsewhere, is appropriate for testing drawer freezer compartments.

2. Definitions

As discussed in the recent MREF test procedure final rule, DOE's test procedures in Appendices A and B frequently use the term ''compartment'' despite that term not being defined. While DOE considered the need for clarifying that term, it did not define it in that final rule. See 81 FR 46779.

DOE is aware of only one specific definition for ''compartment'' in finalized international or industry test procedures—specifically, Australian/New Zealand testing standard AS/NZS 4474.1–2007. This procedure define a compartment as ''an enclosed space within a refrigerating appliance, which is directly accessible through one or more external doors. A compartment may contain one or more sub-compartments and one or more convenience features.'' AS/NZS 4474.1–2007 further defines a ''sub-compartment'' as ''a permanent enclosed space within a compartment or sub-compartment which is designated as being a different type of food storage space (*i.e.,* has a different compartment temperature range) from the compartment or sub-compartment within which it is located,'' and ''convenience features,'' as enclosures or containers with temperature conditions which may or may not be different from the compartment within which they are located.

However, DOE notes that the AS/NZS 4474.1–2007 approach is not fully consistent with all of the uses of the term ''compartment'' currently found in the DOE test procedures. In some cases, the term denotes all of the space within a refrigeration product that operates within a designated temperature range. In other cases, the term refers to specific enclosed spaces that operate within a designated temperature range. For example, Appendix A, section 5.1.3 uses the term in both ways, referring to individual fresh food compartment temperatures and volumes to calculate the overall fresh food compartment temperature.

DOE requests information on whether the clarity of Appendices A and B would be improved by defining the term ''compartment'' and using the term consistently throughout the test procedures. If DOE were to define the term ''compartment,'' DOE seeks comment on what that definition should be—and whether a definition such as the one included in AS/NZS 4474.1–2007 would be sufficient to clearly define this term.

DOE also notes that while Appendix A defines ''cooler compartment,'' it does not directly define related terms such as ''fresh food compartment'' or ''freezer compartment''—although these definitions are in HFR–1–2008, which is incorporated by reference into Appendices A and B. 10 CFR 430.3. DOE requests comment on whether it should directly define these terms in Appendix A—and if so, how?

DOE also welcomes feedback on the definitions of ''refrigerators,'' ''refrigerator-freezers,'' and ''freezers'' in 10 CFR 430.2. These definitions were most recently amended in DOE's final rule establishing coverage and test procedures for MREFs, (81 FR 46768). Prior to that final rule, DOE published a supplemental noticed of proposed determination (''SNOPD'') in which it proposed to amend these definitions. In that SNOPD, DOE noted that the refrigerator and refrigerator-freezer product definitions described a freezer compartment as a compartment designed for the freezing and storage of food at temperatures below 8 °F which may be adjusted by the user to a temperature of 0 °F or below, and proposed to amend the definitions to refer to a compartment capable of maintaining compartment temperatures of 0 °F or below, (81 FR 11454, 11460, March 4, 2016). However, because interested parties commented that the proposed amendments may affect the scope of the existing refrigerator, refrigerator-freezer, and freezer definitions (AHAM, MREF Coverage No. 24 at pp. 2–3; [7] Sub Zero, MREF

[7] A notation in the form ''AHAM, MREF Coverage No. 24 at pp. 2–3'' identifies a written comment: (1) Made by the Association of Home Appliance

Coverage No. 22 at pp. 1–2), DOE did not adopt these proposed modifications to the amended definitions. See 81 FR 46777.

The proposed amendments would have resolved an inconsistency between the definitions and the standardized compartment temperature specified in the test procedure. Specifically, while the 8 °F threshold for freezer compartments in the definitions for refrigerators and refrigerator-freezers is consistent with the fresh food compartment and freezer compartment definitions included in HRF–1–2008, Appendix A requires that freezer compartments in refrigerator-freezers be tested to a standardized compartment temperature of 0 °F. Under the existing requirements, a product would meet the refrigerator-freezer definition but would not receive an energy use rating under Appendix A if the freezer compartment is capable of achieving a temperature below 8 °F but above 0 °F.

DOE requests feedback on whether it should address this potential definitional and testing issue, and if so, how. DOE also seeks information on how to best harmonize the refrigerator and refrigerator-freezer definitions with any potential updates to the fresh food and freezer compartment definitions.

E. AHAM HRF–1 Standard

As discussed in section II.A.2 of this document, the DOE test procedures incorporate by reference certain sections of the AHAM industry standard HRF–1–2008. DOE references HRF–1–2008 for definitions, installation and operating conditions, temperature measurements, and volume measurements. In August 2016, AHAM released an updated version of the HRF–1 standard, HRF–1–2016. Based on review of the newer standard, DOE notes that the majority of the updates from the 2008 standard are clarifications or other revisions that harmonize with DOE's test procedures. Accordingly, DOE does not expect that updating its references to HRF–1–2016 would substantively affect the test procedures in Appendices A and B.

DOE requests feedback on whether its test procedures should incorporate by reference certain sections of the most current version of HRF–1, HRF–1–2016, rather than HRF–1–2008. DOE also requests whether any of the revisions between HRF–1–2008 and HRF–1–2016 would substantively affect the requirements currently incorporated by reference in Appendices A and B—and if so, how?

F. Other Test Procedure Topics

In addition to the issues identified earlier in this document, DOE welcomes comment on any other aspect of the existing test procedures for refrigerators, refrigerator-freezers, and freezers not already addressed by the specific areas identified in this document. DOE particularly seeks information that would improve the repeatability, reproducibility, and consumer representativeness of the test procedures. DOE also requests information that would help DOE create a procedure that would limit manufacturer test burden through streamlining or simplifying testing requirements. Comments regarding repeatability and reproducibility are also welcome.

DOE also requests feedback on any potential amendments to the existing test procedure that could be considered to address impacts on manufacturers, including small businesses. Regarding the Federal test method, DOE seeks comment on the degree to which the DOE test procedure should consider and be harmonized with the most recent relevant industry standards for consumer refrigerators, freezers, and refrigerator-freezers and whether there are any changes to the Federal test method that would provide additional benefits to the public.

Additionally, DOE requests comment on whether the existing test procedures limit manufacturer's ability to provide additional features to consumers on refrigerators, refrigerator-freezers, and freezers. DOE particularly seeks information on how the test procedures could be amended to reduce the cost of these new or additional features and make it more likely that such features are included on consumer refrigerators, freezers, and refrigerator-freezers.

III. Submission of Comments

DOE invites all interested parties to submit in writing by July 31, 2017, comments and information on matters addressed in this notice and on other matters relevant to DOE's consideration of amended test procedures for refrigerators, refrigerator-freezers, and freezers. After the close of the comment period, DOE will begin collecting data, conducting analyses, and reviewing the public comments, as needed. These actions will be taken to aid in the development of a test procedure NOPR for refrigerators, refrigerator-freezers, and freezers if DOE determines that amended test procedures may be appropriate for these products.

Submitting comments via *http://www.regulations.gov.* The *http://www.regulations.gov* Web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *http://www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (CBI)). Comments submitted through *http://www.regulations.gov* cannot be claimed as CBI. Comments received through the Web site will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *http://www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *http://www.regulations.gov* provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery, or mail. Comments and documents submitted via email, hand delivery, or mail also will be posted to *http://www.regulations.gov.* If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead,

Manufacturers; (2) recorded in document number 24 that is filed in the docket of the MREF coverage determination rulemaking (Docket No. EERE–2011–BT–DET–0072–0024) and available for review at *www.regulations.gov;* and (3) which appears on pages 2–3 of document number 24.

provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery, please provide all items on a CD, if feasible. It is not necessary to submit printed copies. No facsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery two well-marked copies: one copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include (1) a description of the items, (2) whether and why such items are customarily treated as confidential within the industry, (3) whether the information is generally known by or available from other sources, (4) whether the information has previously been made available to others without obligation concerning its confidentiality, (5) an explanation of the competitive injury to the submitting person which would result from public disclosure, (6) when such information might lose its confidential character due to the passage of time, and (7) why disclosure of the information would be contrary to the public interest.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

DOE considers public participation to be a very important part of the process for developing test procedures and energy conservation standards. DOE actively encourages the participation and interaction of the public during the comment period in each stage of the rulemaking process. Interactions with and between members of the public provide a balanced discussion of the issues and assist DOE in the rulemaking process. Anyone who wishes to be added to the DOE mailing list to receive future notices and information about this rulemaking should contact Appliance and Equipment Standards Program staff at (202) 586–6636 or via email at *ApplianceStandardsQuestions@ee.doe.gov.*

Issued in Washington, DC, on June 23, 2017.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

[FR Doc. 2017–13803 Filed 6–29–17; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9568; Directorate Identifier 2016–NM–150–AD]

RIN 2120–AA64

Airworthiness Directives; 328 Support Services GmbH (Type Certificate Previously Held by AvCraft Aerospace GmbH; Fairchild Dornier GmbH; Dornier Luftfahrt GmbH) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM); reopening of comment period.

SUMMARY: We are revising an earlier proposal for an airworthiness directive (AD) for certain 328 Support Services GmbH Model 328–100 and Model 328–300 airplanes. This action revises the notice of proposed rulemaking (NPRM) by expanding the applicability and making certain inspections repetitive. We are proposing this AD to address the unsafe condition on these products. Since these actions impose an additional burden over those proposed in the NPRM, we are reopening the comment period to allow the public the chance to comment on these proposed changes.

DATES: The comment period for the NPRM published in the **Federal Register** on January 11, 2017 (82 FR 3217), is reopened.

We must receive comments on this SNPRM by August 14, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this SNPRM, contact 328 Support Services GmbH, Global Support Center, P.O. Box 1252, D–82231 Wessling, Federal Republic of Germany; telephone +49 8153 88111 6666; fax +49 8153 88111 6565; email *gsc.op@328support.de;* Internet *http://www.328support.de.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9568; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Todd Thompson, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1175; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9568; Directorate Identifier 2016–NM–150–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We issued an NPRM to amend 14 CFR part 39 by adding an AD that would apply to certain 328 Support Services GmbH Model 328–100 and Model 328–300 airplanes. The NPRM published in the **Federal Register** on January 11, 2017 (82 FR 3217). The NPRM was prompted by reports of broken bonding wires of certain fuel line clamps. The NPRM proposed to require a one-time inspection of certain fuel line clamps for discrepancies, and replacement of any discrepant clamps.

Actions Since the NPRM Was Issued

Since we issued the NPRM, we have determined that repetitive inspections are necessary to address the unsafe condition and that additional airplanes are affected by the unsafe condition and must be added to the applicability.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2017–0016, dated January 31, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition on all 328 Support Services GmbH Model 328–100 and Model 328–300 airplanes. The MCAI states:

> Occurrences of broken bonding wires of the fuel line clamps have been reported on Dornier 328–100 and Dornier 328–300 aeroplanes equipped with fuel line clamps Part Number (P/N) 14C02–10A, or P/N 14C02–12A, or P/N 14C02–16A. The affected fuel line clamps have been installed in accordance with the instructions of Dornier 328 Service Bulletin (SB) SB–328–28–490 or SB–328J–28–241, as applicable, to reduce occurrences of fuel line chafing.
>
> The results of the investigation did not identify design deficiency or production failure of the fuel line clamps. It is assumed that the chafing and breaking of the bonding wires are caused either by excessive vibration, misalignment, excessive installation tolerances or mistakes on installation or a combination thereof.
>
> This condition, if not detected and corrected, could lead to the loss of bonding function and, in combination with a lightning strike, create a source of ignition in a fuel tank, possibly resulting in a fire or explosion and consequent loss of the aeroplane.
>
> To address the unsafe condition, 328 Support Services issued Alert SB (ASB) ASB–328–28–041 (for Dornier 328–100) and ASB–328J–28–018 (for Dornier 328–300), providing inspection instructions.
>
> Consequently, EASA issued AD 2016–0169 [which corresponds to the NPRM] to require a one-time inspection of the fuel line clamps and, depending on findings, replacement. That [EASA] AD also required the reporting off all inspection results to the design approval holder.
>
> Since that [EASA] AD was issued, it was determined that repetitive inspections are necessary and 328 Support Services revised the applicable ASBs accordingly.
>
> For the reason described above, this [EASA] AD retains the requirements of EASA AD 2016–0169, which is superseded, and requires repetitive inspections of all Hydraflow fuel line clamps [*i.e.,* a general visual inspection of all Hydraflow fuel line clamps for worn and missing bonding wires; a general visual inspection of the jet pump outlet, connection part, and fuel lines for chafing marks; and a measurement of the depth of the chafing marks on affected parts] and continued reporting to the TC Holder.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9568.

Related Service Information Under 1 CFR Part 51

328 Support Services has issued Alert Service Bulletin ASB–328J–28–018, Revision 2, dated December 12, 2016; and Alert Service Bulletin ASB–328–28–041, Revision 2, dated December 12, 2016. The service information describes procedures for a general visual inspection of all Hydraflow fuel line clamps for worn and missing bonding wires; a general visual inspection of the jet pump outlet, connection part, and fuel lines for chafing marks; a measurement of the depth of the chafing marks, and replacement of affected parts. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Comments

We gave the public the opportunity to participate in developing this proposed AD. We considered the comments received.

Request To Refer to Updated Service Information

Two commenters, Patrick Brady and Christoph Thallmayr, requested that we revise the proposed AD to refer to the latest 328 Support Services Service Bulletins. The commenters stated that updated versions of the service information specify repetitive inspections at intervals of 2,500 flight hours. The commenters further noted that EASA issued an updated AD, which references the latest service information. Patrick Brady noted that the repetitive inspections could be scheduled with recurring ''5A'' inspections to ensure no additional downtime is needed.

We agree with the request. We have revised this AD to refer to the updated service information and MCAI.

FAA's Determination and Requirements of This SNPRM

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Certain changes described above expand the scope of the NPRM. As a result, we have determined that it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this SNPRM.

Costs of Compliance

We estimate that this SNPRM affects 25 airplanes of U.S. registry

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	8 work-hours × $85 per hour = $680 per inspection cycle..	$0	$680 per inspection cycle	$17,000 per inspection cycle
Reporting	1 work-hour × $85 per hour = $85 per inspection cycle.	0	$85 per inspection cycle	$2,125 per inspection cycle

We estimate the following costs to do any necessary replacements that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need these replacements.

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	Up to 1 work-hour × $85 per hour = $85	Up to $588	Up to $673.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this proposed AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

328 Support Services GmbH (Type Certificate Previously Held by AvCraft Aerospace GmbH; Fairchild Dornier GmbH; Dornier Luftfahrt GmbH): Docket No. FAA–2016–9568; Directorate Identifier 2016–NM–150–AD.

(a) Comments Due Date

We must receive comments by August 14, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to 328 Support Services GmbH (Type Certificate Previously Held by AvCraft Aerospace GmbH; Fairchild Dornier GmbH; Dornier Luftfahrt GmbH) airplanes, certificated in any category, as identified in paragraphs (c)(1) and (c)(2) of this AD.

(1) Model 328–100 airplanes, all serial numbers.

(2) Model 328–300 airplanes, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Reason

This AD was prompted by reports of broken bonding wires of certain fuel line clamps. We are issuing this AD to prevent the loss of bonding function, which, in combination with a lightning strike, could create a source of ignition in a fuel tank, possibly resulting in a fire or explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

Within 6 months after the effective date of this AD, do a general visual inspection of all Hydraflow fuel line clamps for worn and missing bonding wires; do a general visual

inspection of the jet pump outlet, connection part, and fuel lines for chafing marks; and for parts with chafing marks, before further flight, measure the depth of the chafing marks; in accordance with the Accomplishment Instructions of the service information specified in paragraph (g)(1) or (g)(2) of this AD, as applicable. Repeat the inspections thereafter at intervals not to exceed 2,500 flight hours.

(1) 328 Support Services GmbH Alert Service Bulletin ASB–328–28–041, Revision 2, dated December 12, 2016 (for Model 328–100 airplanes).

(2) 328 Support Services GmbH Alert Service Bulletin ASB–328J–28–018, Revision 2, dated December 12, 2016 (for Model 328–300 airplanes).

(h) Replacement of Parts

(1) If any worn or missing bonding wires are found during any inspection required by paragraph (g) of this AD, before further flight, replace all affected clamps, in accordance with the Accomplishment Instructions of the service information specified in paragraph (g)(1) or (g)(2) of this AD, as applicable.

(2) If, during any inspection required by paragraph (g) of this AD, any chafing depth is found that is more than the replacement limits specified in the Accomplishment Instructions of the service information specified in paragraph (g)(1) or (g)(2) of this AD, as applicable, before further flight, replace all affected parts, in accordance with the Accomplishment Instructions of the service information specified in paragraph (g)(1) or (g)(2) of this AD, as applicable.

(i) Reporting

At the applicable time specified in paragraph (i)(1) or (i)(2) of this AD, report the inspection results, positive or negative, to 328 Support Services, GmbH, Global Support Center, P.O. Box 1252, D–82231 Wessling, Federal Republic of Germany; fax +49 8153 88111 6565; email *gsc.op@328support.de.* The report must include findings on fuel line clamps, aircraft serial number, total flight hours, and total landings.

(1) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(2) If the inspection was done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(j) Credit for Previous Actions

This paragraph provides credit for the initial inspection, parts replacement, and initial report required by paragraphs (g), (h), and (i) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraphs (j)(1) through (j)(4) of this AD.

(1) 328 Support Services GmbH Alert Service Bulletin ASB–328–28–041, dated June 14, 2016.

(2) 328 Support Services GmbH Alert Service Bulletin ASB–328–041, Revision 1, dated October 13, 2016.

(3) 328 Support Services GmbH Alert Service Bulletin ASB–328J–28–018, dated June 3, 2016.

(4) 328 Support Services GmbH Alert Service Bulletin ASB–328J–28–018, Revision 1, dated October 13, 2016.

(k) No Terminating Action

Replacement of clamps as required by paragraph (h) of this AD does not constitute terminating action for the repetitive inspections required by paragraph (g) of this AD for that airplane.

(l) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Branch, send it to the attention of the person identified in paragraph (m)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or 328 Support Services GmbH's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Reporting Requirements:* A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(m) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2017–0016, dated January 31, 2017, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9568.

(2) For more information about this AD, contact Todd Thompson, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1175; fax 425–227–1149.

(3) For service information identified in this AD, contact 328 Support Services GmbH, Global Support Center, P.O. Box 1252, D–82231 Wessling, Federal Republic of Germany; telephone +49 8153 88111 6666; fax +49 8153 88111 6565; email *gsc.op@328support.de;* Internet *http://www.328support.de.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on June 22, 2017.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all Airbus Model A310 series airplanes. This proposed AD was prompted by a revision of certain airworthiness limitation items (ALI) documents, which require more restrictive maintenance requirements and airworthiness limitations. This proposed AD would require revising the maintenance or inspection program to incorporate the maintenance requirements and airworthiness limitations. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by August 14, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0628; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2017–0628; Directorate Identifier 2016–NM–207–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2016–0217, dated November 2, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Airbus Model A310 series airplanes. The MCAI states:

> The airworthiness limitations for Airbus A310 aeroplanes, which are approved by EASA, are currently defined and published in the Airbus A310 Airworthiness Limitations Section (ALS) document(s). These instructions have been identified as mandatory actions for continued airworthiness.
>
> Failure to accomplish these instructions could result in an unsafe condition.
>
> EASA previously issued [EASA] AD 2014–0124 (later revised) [which includes actions for Airbus A310 series airplanes; those actions are included in FAA AD 2013–13–13, Amendment 39–17501 (79 FR 48957, August 19, 2014) (''AD 2013–13–13'')], to require the actions as specified in Airbus A310 Airworthiness Limitation Item (ALI) Document at issue 08.
>
> Since EASA AD 2014–0124R1 was issued, Airbus replaced ALI Document issue 08 with A310 ALS Part 2 Revision 01 and then published the A310 ALS Part 2 Variation 1.1 and Variation 1.2, to introduce more restrictive maintenance requirements and/or airworthiness limitations.
>
> For the reason described above, this [EASA] AD retains part of the requirements of EASA AD 2014–0124R1, which will be superseded, and requires accomplishment of the actions specified in Airbus A310 ALS Part 2 Revision 01, ALS Part 2 Variation 1.1 and ALS Part 2 Variation 1.2 (hereafter collectively referred to as 'the ALS' in this [EASA] AD). The remaining requirements of EASA AD 2014–0124R1 are retained in [EASA] AD 2016–0218, applicable to A300–600 aeroplanes, published at the same time as this [EASA] AD.

This NPRM would not supersede AD 2013–13–13. Rather, we have determined that a stand-alone AD would be more appropriate to address the changes in the MCAI. This NPRM would require revising the maintenance or inspection program to incorporate the maintenance requirements and airworthiness limitations. Accomplishment of the proposed actions would then terminate all requirements of AD 2013–13–13.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0628.

Related Service Information Under 1 CFR Part 51

We reviewed the following service information:

- Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT—ALI),'' Revision 01, dated August 7, 2015.
- Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT—ALI),'' Variation 1.1, dated January 25, 2016.
- Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT—ALI),'' Variation 1.2, dated July 22, 2016.

The service information describes airworthiness limitations applicable to the DT—ALIs. These documents are distinct because they contain different tasks at different revision levels. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

This AD requires revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (j)(1) of this proposed AD. The request should include a description of changes to the required

actions that will ensure the continued damage tolerance of the affected structure.

Costs of Compliance

We estimate that this proposed AD affects 8 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Maintenance Program Revision	1 work-hour × $85 per hour = $85	None	$85	$680

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2017–0628; Directorate Identifier 2016–NM–207–AD.

(a) Comments Due Date

We must receive comments by August 14, 2017.

(b) Affected ADs

This AD affects AD 2013–13–13, Amendment 39–17501 (79 FR 48957, August 19, 2014) (''AD 2013–13–13'').

(c) Applicability

This AD applies to all Airbus Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes, certificated in any category, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 05.

(e) Reason

This AD was prompted by a revision of certain airworthiness limitation items (ALI) documents, which require more restrictive maintenance requirements and airworthiness limitations. We are issuing this AD to prevent fatigue cracking, damage, or corrosion in principal structural elements, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revision of Maintenance or Inspection Program

Within 3 months after the effective date of this AD, revise the maintenance or inspection program, as applicable, to incorporate the information specified in paragraphs (g)(1), (g)(2), and (g)(3) of this AD. The initial compliance times for doing the tasks is at the time specified in the service information identified in paragraphs (g)(1), (g)(2), and (g)(3) of this AD, or within 3 months after the effective date of this AD, whichever occurs later.

(1) Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT—ALI),'' Revision 01, dated August 7, 2015.

(2) Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT—ALI),'' Variation 1.1, dated January 25, 2016.

(3) Airbus A310 Airworthiness Limitations Section (ALS), Part 2, ''Damage Tolerant Airworthiness Limitation Items (DT–ALI),'' Variation 1.2, dated July 22, 2016.

(h) No Alternative Actions, and Intervals

After the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections), or intervals, may be used unless the actions and/or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (j)(1) of this AD.

(i) Terminating Action for AD 2013–13–13

Accomplishing the actions required by this AD terminates all requirements of AD 2013–13–13 for that airplane only.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Branch, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–

116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016–0217, dated November 2, 2016, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0628.

(2) For more information about this AD, contact Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149.

(3) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com*; Internet *http://www.airbus.com*. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on June 22, 2017.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. This proposed AD was prompted by reports of fatigue cracking in the frame outboard chord and in the radius of the auxiliary chord at a certain area. This proposed AD would require inspections to detect this cracking, and corrective action if necessary. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by August 14, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0629.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0629; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Alan Pohl, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98057–3356; phone: (425) 917–6450; fax: (425) 917–6590; email: *alan.pohl@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2017–0629; Directorate Identifier 2016–NM–184–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received reports indicating that fatigue cracking was found in the frame outboard chord at BS 727 and in the radius of the auxiliary chord at BS 727 and S–18A on certain airplanes. Cracks in the outboard chord were found on airplanes having between 20,000 and 85,000 flight cycles, and between 27,000 and 74,000 flight hours. Cracks in the radius of the auxiliary chord were found on airplanes having between 46,000 and 85,000 flight cycles, and between 41,000 and 64,000 flight hours. The cracks were caused by fatigue, and, for certain airplanes, the fretting of adjacent parts contributed to the initiation of the fatigue damage. This condition, if not corrected, could result in reduced structural integrity of the outboard chord and consequent rapid decompression of the airplane.

Related Rulemaking

On October 16, 2012, we issued AD 2012–23–04, Amendment 39–17260 (77 FR 69747, November 21, 2012) (''AD 2012–23–04''), applicable to all The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. That AD requires various inspections for cracks in the outboard chord of the frame at BS 727. That AD also requires inspections for cracks in the BS 727 frame outboard chord and the radius of the auxiliary chord, for certain airplanes. That AD was prompted by several reports of fatigue cracking in the frame outboard chord at BS 727 and in the radius of the auxiliary chord. The actions required by that AD are intended to detect and correct fatigue cracking of the outboard and auxiliary chords, which could result in reduced structural integrity of the outboard chord and consequent rapid decompression of the airplane.

Since issuance of AD 2012–23–04, the FAA has found discrepancies in the requirements of that AD, as follows:

• The optional terminating action specified in paragraph (r) of AD 2012–23–04 allows terminating action if the preventive modification is installed. However, Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, allows terminating action only if both the BS 727 outboard chord is replaced and the preventive modification is installed. Consequently, for airplanes having line numbers 1 through 999 inclusive on which the preventive modification may have been installed, the outboard chord may not have been replaced. Additionally, paragraph (r)(2) of AD 2012–23–04 specifies replacing only a cracked outboard chord; however, the intent was to require replacement of the outboard chord whether it was cracked or not. In light of these factors, there could be cracking in the auxiliary chord combined with cracking in the outboard chord. This cracking could progress undetected and result in the identified unsafe condition.

• Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, contains instructions to determine whether the modification should be classified as interim or permanent; a one-time inspection is specified after the interim modification is done. The instructions specified in the previous service information did not contain this stipulation during installation of the preventive modification. Therefore, the modification could have resulted in edge margins in the frame outboard chord that would have been classified as interim had the modification been done in accordance with Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. Since neither Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, nor AD 2012–23–04 contained instructions to measure edge margins, it is possible that an edge margin condition exists, so the one-time follow-on inspection must be done.

• Paragraph (r) of AD 2012–23–04 terminates the one-time inspection specified in Part 8 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, for airplanes that have the interim preventive modification installed. This inspection is referenced in paragraph (o) of AD 2012–23–04, and should not have been terminated. Paragraph (o) of AD 2012–23–04 was incorrectly included in the list of paragraphs with inspections that are terminated after accomplishing paragraph (r) of that AD.

Therefore, since the discrepancies described previously provide inadvertent relief to operators, we find it necessary to issue additional, new AD rulemaking to provide additional inspection requirements. We have confirmed that the requirements of this AD correct those discrepancies and do not conflict with other requirements of AD 2012–23–04.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. The service information describes procedures for inspections for cracks of the BS 727 frame outboard chord and in the radius of the auxiliary chord, and repair or replacement if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously.

This AD corrects discrepancies in the requirements for certain airplanes identified in AD 2012–23–04. The FAA has considered that fact in determining whether to issue a new AD action or to supersede AD 2012–23–04. We have determined that a less burdensome approach is to issue a separate AD action applicable to the airplanes on which the discrepancies could have occurred. This proposed AD would not supersede AD 2012–23–04, and compliance with the requirements must continue for airplanes listed in the applicability of AD 2012–23–04. This proposed AD is a separate AD action, applicable only to the airplanes identified in paragraph (c) of this AD.

Costs of Compliance

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Affected airplanes of U.S. registry	Cost per product	Cost on U.S. operators
Detailed and High Frequency Eddy Current (HFEC) inspections.	6 work-hours × $85 per hour = $510 per inspection cycle.	5	$510	$2,550 per inspection cycle.
One-time follow-on HFEC inspection ..	9 work-hours × $85 per hour = $765 ..	5	765	$3,825.
HFEC inspection	9 work-hours × $85 per hour = $765 ..	150	765	$114,750.

We estimate the following costs to do any necessary repairs that would be required based on the results of the inspections. We have no way of determining the number of aircraft that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Repair of cracking of the outboard chord frame	514 work-hours × $85 per hour = $43,690	$13,586	$57,276
Repair of cracking of the outboard chord	49 work-hours × $85 per hour = $4,165	4,255	8,420

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2017–0629; Directorate Identifier 2016–NM–184–AD.

(a) Comments Due Date

We must receive comments by August 14, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of fatigue cracking in the frame outboard chord and in the radius of the auxiliary chord at body station (BS) 727 and stringer (S) 18A. We are issuing this AD to detect and correct fatigue cracking of the outboard and auxiliary chords, which could result in reduced structural integrity of the outboard chord and consequent rapid decompression of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections and Corrective Action

For airplanes identified in paragraph (h) of this AD: Within 4,500 flight cycles or 24 months after the effective date of this AD, whichever occurs first, do internal detailed and High Frequency Eddy Current (HFEC) inspections to detect cracks in the auxiliary chord radius, in accordance with Part 1 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. If any crack is found during any inspection required by this paragraph, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (l) of this AD. Repeat the inspections thereafter at intervals not to exceed 15,000 flight cycles. Replacement of the outboard chord of the frame at BS 727 concurrently with the installation of the preventive modification of the outboard chord in accordance with Part 6 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, terminates the repetitive inspections required by this paragraph.

(h) Airplanes for Actions Specified in Paragraph (g) of This AD

The actions specified in paragraph (g) of this AD are required for airplanes that meet the criteria of paragraphs (h)(1), (h)(2), (h)(3), and (h)(4) of this AD.

(1) Model 737–100, –200, and –200C series airplanes, line numbers 1 through 999 inclusive.

(2) Airplanes identified as Groups 1, 2, and 3 in Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006.

(3) Airplanes on which a preventive modification has been installed in accordance with the method specified in paragraph (h)(3)(i), (h)(3)(ii), or (h)(3)(iii) of this AD.

(i) Part 6 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006.

(ii) Part II of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 1, dated May 25, 1995.

(iii) Part II of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, dated June 30, 1994.

(4) Airplanes on which the outboard chord has not been replaced in accordance with the method specified in paragraph (h)(4)(i), (h)(4)(ii), or (h)(4)(iii) of this AD.

(i) Part 3 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006.

(ii) Part I of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 1, dated May 25, 1995.

(iii) Part I of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, dated June 30, 1994.

(i) Edge Margin Measurement, Related Investigative Actions, and Repair

For Model 737–100, –200, and –200C series airplanes having line numbers 1 through 999 inclusive, identified as Groups 1 through 3 in Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, on which the preventive modification has been installed in accordance with Boeing Alert Service Bulletin 737–53A1166, dated June 30, 1994; or Boeing Alert Service Bulletin 737–53A1166, Revision 1, dated May 25, 1995: Within 60,000 flight cycles after accomplishing the preventive modification, determine if the modification is classified as interim or permanent by using the edge margin measurement and repair classification specified in Part 6 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. In lieu of measuring on the airplane, a review of engineering documentation may be used to classify the modification if the engineering documentation was completed at the time of the modification and has the edge margins recorded.

(1) If the modification is classified as permanent, no further action is required by paragraph (i) of this AD.

(2) If the modification is classified as interim: Within 60,000 flight cycles after accomplishment of the interim modification of the outboard chord of the frame at BS 727 at S–18A, but no earlier than 50,000 flight cycles after accomplishment of the modification, do a one-time follow-on open-hole eddy current inspection to detect cracks

in the modified chord, in accordance with Part 8 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. If any crack is found, before further flight, repair in accordance with Part 3 or Part 4, as applicable, of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006; except, if the repairs cannot be installed using the identified procedures, repair before further flight using a method approved in accordance with the procedures specified in paragraph (l) of this AD.

(j) Follow-On Inspection for Interim Modification and Repair

For airplanes having line numbers 1 through 3132 inclusive, on which an interim modification of the BS 727 outboard chord as defined in Part 6 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, has been accomplished: Within 60,000 flight cycles after accomplishment of the interim modification of the outboard chord of the frame at BS 727 at S–18A, but no earlier than 50,000 flight cycles after accomplishment of the modification, do a one-time follow-on open-hole eddy current inspection to detect cracks in the modified chord, in accordance with Part 8 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006. If any crack is found during the inspection required by this paragraph, before further flight, repair in accordance with Part 3 or Part 4, as applicable, of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006; except, where the repairs cannot be installed using the procedures identified in this service bulletin, repair before further flight using a method approved in accordance with the procedures specified in paragraph (l) of this AD.

(k) Exception to the Service Information

Access and restoration procedures specified in the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1166, Revision 2, dated May 25, 2006, are not required by this AD. Operators may do those actions following their approved maintenance procedures.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (m)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(m) Related Information

(1) For more information about this AD, contact Alan Pohl, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98057–3356; phone: (425) 917–6450; fax: (425) 917–6590; email: *alan.pohl@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on June 22, 2017.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2017–0627; Directorate Identifier 2017–NM–037–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all Airbus Model A330–200 Freighter, –200, and –300 series airplanes; and Airbus Model A340–200, –300, –500, and –600 series airplanes. This proposed AD was prompted by a report that the trimmable horizontal stabilizer actuator (THSA) might not function as intended after failure of the primary load path. This proposed AD would require repetitive detailed visual inspections for discrepancies of the THSA upper attachments and no-back housing. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by August 14, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330-A340@airbus.com*; Internet *http://www.airbus.com*. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0627; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments

to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2017–0627; Directorate Identifier 2017–NM–037–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2017–0044, dated March 9, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Airbus Model A330–200 Freighter, –200 and –300 series airplanes; and Airbus Model A340–200, –300, –500, and –600 series airplanes. The MCAI states:

> The Trimmable Horizontal Stabilizer Actuator (THSA), as installed on A330 and A340 aeroplanes, was initially designed to stall when engaging on the upper secondary load path (SLP) after primary load path (PLP) failure. Such stall triggers system monitoring detection. New mission profile analysis revealed that in some cases, the THSA could be operated while engaged on the upper SLP without stalling [*i.e.,* the THSA might not function as intended after failure of the primary load path]. The partial engagement of the SLP at upper attachment level does not trigger any indication to the flight crew.
>
> This condition, if not detected and corrected, could lead to THSA upper attachment failure and consequent disconnection of the THSA from the aeroplane structure, possibly resulting in loss of control of the aeroplane.
>
> For the reasons described above, this [EASA] AD requires repetitive detailed [visual] inspections (DET) of the upper THSA attachments parts and the PLP and SLP fuselage attachment points, and, depending on findings (which include, but are not limited to, failure of the primary load path), accomplishment of applicable [additional inspections for discrepancies and] corrective action(s).

The additional inspections include a detailed visual inspection for discrepancies of the upper attachment fitting of the airplane and a detailed visual inspection for discrepancies of the removed THSA. Corrective actions include repair and replacement of the THSA. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0627.

Related Service Information Under 1 CFR Part 51

We reviewed the following Airbus service information:

- Airbus Service Bulletin A330–27–3218, Revision 01, dated December 5, 2016.
- Airbus Service Bulletin A340–27–4203, Revision 01 dated December 5, 2016.
- Airbus Service Bulletin A340–27–5067, Revision 01 dated December 5, 2016.

The service information describes procedures for detailed visual inspections for discrepancies of the THSA upper attachments and no-back housing, additional inspections for discrepancies, and corrective actions. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Costs of Compliance

We estimate that this proposed AD affects 102 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	3 work-hours × $85 per hour = $255 per inspection cycle.	$0	$255 per inspection cycle	$26,010

We estimate the following costs to do any necessary replacements that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need this replacement.

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	20 work-hours × $85 per hour = $1,700	$734,661	$736,361

We have received no definitive data that would enable us to provide cost estimates for other on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that

section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2017–0627; Directorate Identifier 2017–NM–037–AD.

(a) Comments Due Date

We must receive comments by August 14, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Model A330–201, –202, –203, –223, –223F, –243, –243F, –301, –302, –303, –321, –322, –323, –341, –342 and –343 airplanes; and Airbus Model A340–211, –212, –213, –311, –312, –313, –541, and –642 airplanes; certificated in any category, all manufacturer's serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Controls.

(e) Reason

This AD was prompted by a report that the trimmable horizontal stabilizer actuator (THSA) might not function as intended after failure of the primary load path. We are issuing this AD to detect and correct discrepancies of the THSA upper attachments and no-back housing, which could lead to THSA upper attachment failure and consequent disconnection of the THSA from the airplane structure, possibly resulting in loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Detailed Visual Inspections

Before exceeding the Threshold in Table 1 to paragraph (g) of this AD, as applicable, or within 3 months after the effective date of this AD, whichever occurs later; and thereafter at intervals not to exceed the inspection interval values defined in Table 1 to paragraph (g) of this AD; accomplish a detailed visual inspection for discrepancies of the trimmable horizontal stabilizer actuator (THSA) upper attachments and no-back housing, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable. Where the ''Threshold'' column of table 1 to paragraph (g) of this AD specifies compliance times in ''FH'' (flight hours) or ''FC'' (flight cycles), those compliance times are flight hours or flight cycles since the first flight of the airplane, or since the last accomplishment of Airbus Model A330 or A340 Maintenance Review Board Report task 27.40.00/07, or since the last detailed visual inspection of the THSA done in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, A340–27–4203, or A340–27–5067, all dated July 1, 2016, as applicable.

TABLE 1 TO PARAGRAPH (g) OF THIS AD—THSA UPPER ATTACHMENTS/NO-BACK HOUSING INSPECTIONS

Affected airplanes	Compliance times (whichever occurs first, flight hours (FH) or flight cycles (FC))	
	Threshold	Inspection interval (not to exceed)
A330, A340–200 and A340–300	Before 4,000 FH or 1,000 FC	4,000 FH or 1,000 FC.
A340–500 and A340–600	Before 4,000 FH or 800 FC	4,000 FH or 800 FC.

(h) Additional Inspections and Corrective Actions

(1) If, during any inspection required by paragraph (g) of this AD, any discrepancy identified in the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable, is detected, before further flight, remove the THSA, and accomplish a detailed visual inspection for discrepancies of the upper attachment fitting of the airplane and a detailed visual inspection for discrepancies of the removed THSA, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable. As an alternative to the removed THSA inspections required by this paragraph, before further flight, replace the THSA with a serviceable part (as defined in paragraph (i) of this AD).

(2) If, during any inspection of the upper attachment fitting of the airplane required by paragraph (h)(1) of this AD, any discrepancy identified in the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable, is detected, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (k)(2) of this AD.

(3) If, during any inspection of the removed THSA required by paragraph (h)(1) of this AD, no discrepancy specified in the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable, is detected, before further flight, reinstall the THSA, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203,

Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable.

(4) If, during any inspection of the removed THSA required by paragraph (h)(1) of this AD, any discrepancy specified in the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable, is detected, before further flight, replace the THSA with a serviceable part (as defined in paragraph (i) of this AD), in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable.

(i) Definition of Serviceable THSA

For the purpose of this AD, a serviceable THSA is a part that has accumulated less than 4,000 FH or 1,000 FC (for Airbus Model A330, A340–200, or A340–300 airplanes) or 4,000 FH or 800 FC (for Airbus Model A340–500 or A340–600 airplanes), whichever occurs first since the first flight of the airplane, or since the last overhaul of the THSA, or since the last detailed visual inspection of the THSA in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–27–3218, Revision 01, A340–27–4203, Revision 01, or A340–27–5067, Revision 01, all dated December 5, 2016, as applicable.

(j) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (g), (h)(1), (h)(3), and (h)(4) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraph (j)(1), (j)(2), or (j)(3) of this AD.

(1) Airbus Service Bulletin A330–27–3218, Revision 00, dated July 1, 2016.

(2) Airbus Service Bulletin A340–27–4203, Revision 00, dated July 1, 2016.

(3) Airbus Service Bulletin A340–27–5067, Revision 00, dated July, 1 2016.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Branch, send it to attention of the person identified in paragraph (l)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (h)(2) of this AD: If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2017–044, dated March 9, 2017, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–0627.

(2) For more information about this AD, contact Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

(3) For service information identified in this AD, contact Airbus SAS, Airworthiness Office–EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330-A340@airbus.com*; Internet *http://www.airbus.com.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on June 22, 2017.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 417

Waiver of Flight Termination Receiver Qualification by Similarity Deficiencies

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of waiver.

SUMMARY: This notice concerns three petitions for waiver submitted to the FAA by Rocket Lab USA Inc. (RL) for the Flight Termination Receiver (FTR) Qualification by Similarity (QBS): A petition to waive the requirement that a component may be qualified based on similarity to a component that has already been qualified for use only if the environments encountered by the previously qualified component during its qualification or flight history were equal or more severe than the Rocket Lab qualification environments; a petition to waive the Electromagnetic Interference and Compatibility (EMI/EMC) on the same units; and a petition to waive the requirement that the same manufacturer must produce the qualified and the unqualified component in the same location using identical tools and manufacturing processes. The FAA grants these three petitions.

DATES: Issued in Washington, DC, on May 15, 2017.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this waiver, contact Michael Wiktowy, Licensing Program Lead, Commercial Space Transportation—Licensing and Evaluation Division, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–7287; email: *Michael.Wiktowy@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

RL submitted a petition to the FAA's Office of Commercial Space Transportation (AST) requesting relief from regulatory requirements for a launch license for flight of Electron test flight missions from Mahia, New Zealand. Specifically, RL requested relief from 14 CFR E417.7(f)(2) and (5), Qualification Testing and Analysis by Similarity for the Flight Termination Receiver. For Qualification, the Flight Termination Receiver is required to meet Table E417.19–2, which states with note (5): ''The same three sample components must undergo each test designated with an X. For a test designated with a quantity of less than three, each sample component tested must be one of the original three sample components.'' For Qualification Testing and Analysis by Similarity, Part 417 Appendix E section 417.7(f) provides the requirements a launch operator must satisfy in order to qualify or re-qualify a flight termination system component's design through qualification by similarity to tests performed on identical or similar hardware. Section E417.7(f)(2) states that to qualify component ''A'' based on similarity to

component ''B'', that has already been qualified for use, a launch operator must demonstrate that the environment encountered by ''B'' must have been equal to or more severe than the qualification environments required for ''A''. Specifically, RL used different components for the random vibration qualification test and the EMI/EMC qualification test instead of the original three qualification sample components used for the other tests under E417.7(f)(2). Section E417.7(f)(5) requires that the same manufacturer produce ''A'' and ''B'' in the same location using identical tools and manufacturing processes. Specifically, RL's sample ''A'' and ''B'' were manufactured at different locations with different manufacturing processes.

The FAA licenses the launch of a launch vehicle and reentry of a reentry vehicle under authority granted to the Secretary of Transportation in the Commercial Space Launch Act of 1984, as amended and re-codified by 51 U.S.C. Subtitle V, chapter 509 (Chapter 509), and delegated to the FAA Administrator and the Associate Administrator for Commercial Space Transportation, who exercises licensing authority under Chapter 509.

RL is a private commercial space flight company. RL seeks to lower the cost and increase the frequency of access to space for small payloads, potentially expanding the opportunity for space services and research. RL's petition for waiver addresses all upcoming Electron test flights that RL plans to launch from the Mahia Peninsula, New Zealand. The Electron launch is the first planned test flight from the privately-owned Rocket Lab Launch Complex at Mahia Peninsula in Hawkes Bay, New Zealand. The launch location is capable of hosting launches to the northeast, east, and south. The area within 20 NM surrounding the launch site is extremely remote, and has a low population density. The launch flight corridor will have minimal impact on air and marine traffic.

Waiver Criteria

Chapter 509 allows the FAA to waive a license requirement if the waiver (1) will not jeopardize public health and safety, safety of property; (2) will not jeopardize national security and foreign policy interests of the United States; and (3) will be in the public interest. See 51 U.S.C. 50905(b)(3) (2011); 14 CFR 404.5(b) (2011).

Section E417.7(f)(2) and (5) Waiver Petition

Section E417.7(f)(2) requires a launch operator wishing to qualify a component's design through qualification by similarity to tests performed on identical or similar hardware to demonstrate that the environments encountered by the component during its qualification or flight history were equal to or more severe than the qualification environments required for a component that has already been qualified for use. Section E417.7(f)(5) requires a launch operator qualifying a component's design as discussed above to demonstrate that the same manufacturer produced both the qualified component and the component the launch operator wishes to qualify in the same location using identical tools and manufacturing processes. For reasons described below, the FAA waives the requirements in section E417.7(f)(2) and (5) to allow RL to use components in its flight termination system that were qualified by similarity to more than one qualified component.

In deciding whether or not to issue a waiver, the FAA had to analyze whether the waiver: (1) Would jeopardize public health and safety or safety of property; (2) would jeopardize national security and foreign policy interests of the United States; and (3) was in the public interest. See 51 U.S.C. 50905(b)(3); 14 CFR 404.5(b).

i. Public Health and Safety and Safety of Property

Part 417 contains requirements for qualification and acceptance testing of flight termination system components based on the approach used at the federal launch ranges. At federal launch ranges, flight termination system components are tested according to federal range-approved test procedures and requirements. Verification methods include test, analysis, and inspection. As an alternative to testing, components of an FTS are sometimes qualified by similarity. A component that has been qualified through testing for one launch vehicle may be approved for use on a different launch vehicle if it can be shown that the environments in which it must operate on the second vehicle are no harsher than those of the first. Also, with limited additional testing, the component may be qualified for a more severe environment. Although RL did not complete each of the qualification by similarity requirements for its flight termination receiver as required by the regulations, the failsafe design of the Electron's flight termination system combined with the remoteness of the operating area allow the FAA to find that RL's activities will not jeopardize public health and safety and safety of property.

RL procured the Electron launch vehicle's flight termination receiver from Vendor A, who performed several qualification and delta qualification tests. A delta qualification test extends the tested environments to cover specific tests or levels that were not previously covered. RL submitted a Qualification by Similarity Analysis Report to the FAA, referencing three previous groups of similar flight termination receiver qualification and delta qualification tests performed by Vendor A. Group 1 was subjected to most of the qualification testing required by 14 CFR Table E417.19–2, with three exceptions: (a) Group 1 did not satisfy 14 CFR E417.7(f)(2) because the random vibration qualification environment encountered by Group 1 was not equal to or more severe than the random vibration qualification environment required for the Electron flight termination receivers, falling below for approximately 3.5% over the required 20 Hz to 2000 Hz test band; (b) Group 1 was not subjected to EMI/EMC testing; and (c) Group 1 did not meet the requirements of 14 CFR E417.7(f)(5) because it was not produced in the same manufacturing location using identical tools and manufacturing processes as the Rocket Lab Electron flight termination receivers. Group 1's deficiencies were mitigated by two subsequent delta qualification tests on 2 groups (referred to herein as Group 2 and Group 3) of similar receivers. Group 2 satisfied Electron's required random vibration qualification test levels for the entire required test band, and Group 2 was manufactured in the same location using identical tools and manufacturing processes as Electron flight termination receivers. Group 3 successfully passed EMI/EMC qualification testing.

Group 1 also did not meet the requirements of 14 CFR E417.7(f)(5) because Group 1 was not produced in the same manufacturing location using identical tools and manufacturing processes as Group 2 and Electron flight termination receivers. Vendor A originally outsourced one of the flight termination receiver's printed circuit boards to another supplier. In late 2013, Vendor A upgraded its internal equipment and process, and assembled the printed circuit boards in-house. Group 1 and Group 3 were manufactured and qualification tested before this change in equipment and process, whereas Group 2 and Electron's flight termination receivers were assembled after the change. To verify that the equipment and process change did not invalidate previous qualification and delta qualification testing, Vendor

A applied the same heritage process profile to the new equipment, retained heritage printed circuit board samples for periodic process control comparisons, and implemented periodic visual/x-ray inspections for consistency validation. Heritage and new equipment specifications were also assessed to compare their performance characteristics. White Sand Missile Range has reviewed and accepted this process change, for U.S. Government launch vehicle programs conducting launches from its launch range, based on improved reliability and quality of the process.

The FAA waives the requirements of E417.7(f)(2) and (5) because the Electron has implemented a failsafe flight safety system design that would terminate thrust to the vehicle should both flight termination receivers fail or communication was lost with the ground station, and RL's operating area is remote enough that were it to experience a catastrophic failure, it would not jeopardize public health and safety and safety of property. The Electron test flight missions would occur from the isolated Mahia Peninsula in New Zealand. The area within 20 NM of Mahia Peninsula has a very low population density. The Electron flight corridor is over the broad ocean area with minimal impact on air and marine traffic. Consequence analysis showed that less than 1 in 100,000 casualties would be expected if the worst foreseeable vehicle response mode (*i.e.,* where the vehicle guidance is assumed to fail in a manner that leads to an attempt to guide to erroneous, randomly located points) occurred at the worst flight time (relatively early in flight before the vehicle proceeds downrange) and the flight termination receiver failed to activate. Thus, the casualty expectation given the assumption of the worst possible failure would on average still produce significantly less casualties than the FAA's limit of 1 in 10,000, which does not assume failure but rather assigns realistic failure probabilities. Also, the flight termination receiver's failsafe feature will terminate thrust if there is a loss of power or Radio Frequency carrier or pilot tone signal, providing an additional safety margin. For these reasons, the FAA has determined that waiving sections E417.7(f)(2) and (5) for the Electron test flight missions from Mahia, New Zealand will not jeopardize public health and safety or safety of property.

ii. National Security and Foreign Policy Implications

The FAA has identified no national security or foreign policy implications associated with granting this waiver.

iii. Public Interest

The waiver is consistent with the public interest goals of Chapter 509 and the National Space Transportation Policy. Three of the public policy goals of Chapter 509 are: (1) To promote economic growth and entrepreneurial activity through use of the space environment; (2) to encourage the United States private sector to provide launch and reentry vehicles and associated services; and (3) to facilitate the strengthening and expansion of the United States space transportation infrastructure to support the full range of United States space-related activities. See 51 U.S.C. 50901(b)(1), (2), (4).

RL seeks to lower the cost and increase the frequency of access to space for small payloads, potentially expanding the opportunity for space services and research. These activities will help to make the U.S. launch industry more competitive internationally. The National Space Transportation Policy states that strengthening U.S. competitiveness in the international launch market and improving the cost effectiveness of U.S. space transportation services are in the public interest:

Maintaining an assured capability to meet United States Government needs, while also taking the necessary steps to strengthen U.S. competitiveness in the international commercial launch market, is important to ensuring that U.S. space transportation capabilities will be reliable, robust, safe, and affordable in the future. Among other steps, improving the cost effectiveness of U.S. space transportation services could help achieve this goal by allowing the United States Government to invest a greater share of its resources in other needs such as facilities modernization, technology advancement, scientific discovery, and national security. Further, a healthier, more competitive U.S. space transportation industry would facilitate new markets, encourage new industries, create high technology jobs, lead to greater economic growth and security, and would further the Nation's leadership role in space.

More specifically, Rocket Lab will be carrying onboard the Electron launch vehicle on its inaugural launch a flight test experiment for NASA Kennedy Space Center which will improve public risk mitigation capabilities from an errant launch vehicle. This component is designed and manufactured by NASA KSC and is part of the independent safety system which will be installed on the launch vehicles. This safety system will be capable of determining if the flight of the launch vehicle will pose an unacceptable increased risk to the public based on mission rules designed for its unique vehicle and flight characteristics and programmed into the safety system and terminate the flight of such launch vehicle. This type of capability is in public interest because this safety system will allow for improved protection of the public from mishaps resulting from flight of errant launch vehicles.

Issued in Washington, DC, on May 15, 2017.

Kenneth Wong,

Commercial Space Transportation, Licensing and Evaluation Division Manager.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–0257]

RIN 1625–AA09

Drawbridge Operation Regulation; Delaware River, Pennsauken Township, NJ

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to modify the operating regulation that governs the DELAIR Memorial Railroad Bridge across the Delaware River, mile 104.6, at Pennsauken Township, NJ. This proposed regulation will allow the bridge to be remotely operated from the Conrail South Jersey dispatch center in Mount Laurel, NJ, instead of being operated by an on-site bridge tender. This regulation will not change the operating schedule of the bridge.

DATES: Comments and related material must reach the Coast Guard on or before August 18, 2017.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0257 using Federal eRulemaking Portal at *http://www.regulations.gov.*

See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Mr. Hal R. Pitts, Fifth Coast Guard District (dpb); telephone (757) 398–6222, email *Hal.R.Pitts@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose and Legal Basis

The DELAIR Memorial Railroad Bridge across the Delaware River, mile 104.6, at Pennsauken Township, NJ, owned and operated by Conrail Shared Assets, has a vertical clearance of 49 feet above mean high water in the closed-to-navigation position. There is a daily average of 28 New Jersey Transit trains and eight Conrail freight trains that cross the bridge and a daily average of three bridge openings that allow one or more vessels to transit through the bridge during each opening. The bridge is normally maintained in the closed position due to the average daily number of trains crossing the bridge. The operating schedule is published in 33 CFR 117.716. This current operating schedule has been in effect since 1984 and will not change with the implementation of remote operation of the bridge. However, within this proposed operating schedule, § 117.716 will be restructured from its current configuration to clearly distinguish the remote operation of the DELAIR Memorial Railroad Bridge. This proposed operating regulation allows the bridge to be operated remotely from the bridge owner's South Jersey dispatch center in Mount Laurel, NJ.

The Delaware River is used by a variety of vessels, including deep draft commercial vessels, tug and barge traffic, recreational vessels, and public vessels, including military vessels of various sizes. The three-year average number of bridge openings and maximum number of bridge openings by month and overall for 2013 through 2015, as drawn from the data contained in the bridge tender logs, is presented below.

Month	Average openings	Maximum openings
January	73	88
February	54	56
March	80	94
April	55	68
May	60	67
June	60	71
July	122	162
August	112	138
September	143	201
October	109	117
November	100	116
December	100	122
Monthly	89	201
Daily	3	7

The bridge owner and the maritime community have been working together since 2013 in an effort to incorporate sensors and other technologies into the bridge and the Conrail South Jersey dispatch center to allow for the safe and effective remote operation of the bridge.

On April 12, 2017, the Coast Guard published a temporary deviation entitled ''Drawbridge Operation Regulation; Delaware River, Pennsauken Township, NJ'' in the **Federal Register** (82 FR 17561). This test deviation allows the bridge to be operated remotely from the bridge owner's South Jersey dispatch center in Mount Laurel, NJ. This test deviation is effective from 8 a.m. on April 24, 2017, to 7:59 a.m. on October 21, 2017.

III. Discussion of Proposed Rule

This proposed operating regulation will allow the bridge to be operated remotely from the bridge owner's South Jersey dispatch center in Mount Laurel, NJ. The remote operation system will include eight camera views (four marine and four rail), two forward-looking infrared equipped camera views (marine), marine radar, a dedicated telephone line for bridge operations, radio telephone on VHF–FM channels 13 and 16, and an automated identification system (AIS) transmitter to provide bridge status. The AIS transmitter has been installed on the New Jersey side of the bridge at the bridge and land intersection in approximate position 39°58′50.52″ N. (39.9807), 75°03′58.75″ W. (−75.06632). The AIS transmitter is assigned maritime mobile service identity (MMSI) number 993663001 and will provide the status of the bridge (open/closed/inoperative) via the name transmitted by the private aids to navigation as DELAIR BRG–OPEN (fully open and locked position, channel light green), DELAIR BRG–CLOSED (other than fully open, not inoperative), or DELAIR BRG–INOP (other than fully open, inoperative). The AIS transmitter will transmit the bridge status every two minutes and upon a change in the bridge status.

The remote operation system is designed to provide equal or greater capabilities compared to the on-site bridge tender in visibility of the waterway and bridge and in signals (communications) via sound and visual signals and radio telephone (voice) via VHF–FM channels 13 and 16. The remote operation system also incorporates real-time bridge status via AIS signal to aid mariners in voyage planning and navigational decision-making, a dedicated telephone line (856) 231–2301 for bridge operations, and push-to-talk (PTT) capability on VHF–FM channel 13.

The signals for the remote operation center or on-site bridge tender to respond to a sound signal for a bridge opening will include: (1) When the draw can be opened immediately—a sound signal of one prolonged blast followed by one short blast and illumination of a fixed white light not more than 30 seconds after the requesting signal, and (2) when the draw cannot be opened immediately—five short blasts sounded in rapid succession and illumination of a fixed red light not more 30 seconds after the vessel's opening signal. The signals for the remote operation center or on-site

bridge tender to respond to a visual signal for a bridge opening will include: (1) When the draw can be opened immediately—illumination of a fixed white light not more than 30 seconds after the requesting signal, and (2) when the draw cannot be opened immediately—illumination of a fixed red light not more than 30 seconds after the vessel's opening signal. The fixed white light will remain illuminated until the bridge reaches the fully open position. The fixed white and red lights will be positioned on the east (New Jersey) bridge abutment adjacent to the navigation span.

Vessels that require an opening shall continue to request an opening via the methods defined in 33 CFR 117.15(b) through (d) (sound or visual signals or radio telephone (VHF–FM) voice communications), via telephone at (856) 231–2301, or via push-to-talk (PTT) on VHF–FM channel 13. Vessels may push the PTT button five times while on VHF–FM channel 13 to request an opening.

The remote operation system will be considered in a failed condition and qualified personnel will return and operate the bridge within 60 minutes if any of the following conditions are found: (1) The remote operation system becomes incapable of safely and effectively operating the bridge from the remote operation center, (2) visibility of the waterway or bridge is degraded to less than equal that of an on-site bridge tender (all eight camera views are required), (3) signals (communications) via sound or visual signals or radio telephone (voice) via VHF–FM channels 13 or 16 become inoperative, or (4) AIS becomes inoperative.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on these statutes and Executive Orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The determination that this NPRM is not a significant regulatory action is based on the findings that: (1) Vessels will continue to transit the bridge in accordance with 33 CFR 117.716, (2) the remote operation system is designed to provide equal or greater capabilities compared to the on-site bridge tender, and (3) the bridge owner will be capable of restoring on-site operation of the bridge within 60 minutes if the remote operation system fails.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. There are no known adverse impacts to any entities related to this proposed rule, given no aspects of the remote operating system for the bridge will create any burdens on any entity as described in section IV.A above. The incorporation of the automated identification system (AIS) capability into the remote operation system is expected to aid mariners who have AIS capability or access to computer-based AIS data in safely navigating through the bridge by providing real-time bridge status.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies, and how, and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the federal government and Indian tribes, or on the distribution of power and responsibilities between the federal government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (Act) (2 U.S.C. 1531–1538) requires federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a state, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of

actions which do not individually or cumulatively have a significant effect on the human environment. This proposed rule simply promulgates the operating regulations or procedures for drawbridges. Normally, such actions are categorically excluded from further review under figure 2–1, paragraph (32)(e), of the Instruction.

A preliminary Record of Environmental Consideration and a Memorandum for the Record are not required for this rule. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that their message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this notice of proposed rulemaking and all public comments are in our online docket at *http://www.regulations.gov* and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 117.716 to read as follows:

§117.716 Delaware River.

(a) The following apply to all drawbridges across the Delaware River:

(1) The draws of railroad bridges need not be opened when there is a train in the bridge block approaching the bridge with the intention of crossing or within five minutes of the known time of the passage of a scheduled passenger train.

(2) The opening of a bridge may not be delayed more than five minutes for a highway bridge or 10 minutes for a railroad bridge after the signal to open is given.

(3) The owners of drawbridges shall provide and keep in good legible condition two board gages painted white with black figures not less than six inches high to indicate the vertical clearance under the closed draw at all stages of the tide. The gages shall be so placed on the bridge that they are plainly visible to operators of vessels approaching the bridge either up or downstream.

(b) The draw of the Conrail Memorial Railroad Bridge, mile 104.6, at Pennsauken Township, NJ shall be operated as follows:

(1) The bridge will be remotely operated from the Conrail South Jersey dispatch center in Mount Laurel, NJ unless the remote operation system is in a failed condition.

(2) An AIS transmitter has been installed on the New Jersey side of the bridge at the bridge and land intersection in approximate position 39°58′50.52″ N. (39.9807), 75°03′58.75″ (-75.06632). The AIS transmitter is assigned maritime mobile service identity (MMSI) number 993663001. The status of the bridge (open/closed/inoperative) will be provided via the name transmitted by the AIS private aids to navigation as DELAIR BRG–OPEN (fully open and locked position, channel light green), DELAIR BRG–CLOSED (other than fully open, not inoperative), or DELAIR BRG–INOP (other than fully open, inoperative). The AIS transmitter will transmit the bridge status every two minutes and upon a change in the bridge status.

(3) The remote operation system will be considered in a failed condition and qualified personnel will return and operate the bridge within 60 minutes if any of the following conditions are found:

(i) The remote operation system becomes incapable of safely and effectively operating the bridge from the remote operation center; or

(ii) Visibility of the waterway or bridge is degraded to less than equal that of an on-site bridge tender; or

(iii) Signals (communications) via sound or visual signals or radio telephone (voice) via VHF–FM channels 13 or 16 become inoperative; or

(iv) AIS becomes inoperative.

(4) Vessels that require an opening shall continue to request an opening via the methods defined in § 117.15(b) through (d) (sound or visual signals or radio telephone (VHF–FM) voice communications), via telephone at (856) 231–2301, or via push-to-talk (PTT) on VHF–FM channel 13. Vessels may push the PTT button five times while on VHF–FM channel 13 to request an opening.

(5) The signals for the remote operation center or on-site bridge tender to respond to a sound signal for a bridge opening include:

(i) When the draw can be opened immediately—a sound signal of one prolonged blast followed by one short blast and illumination of a fixed white light not more than 30 seconds after the requesting signal; or

(ii) When the draw cannot be opened immediately—five short blasts sounded in rapid succession and illumination of a fixed red light not more 30 seconds after the vessel's opening signal.

(6) The signals for the remote operation center or on-site bridge tender to respond to a visual signal for a bridge opening include:

(i) When the draw can be opened immediately—illumination of a fixed white light not more than 30 seconds after the requesting signal; or

(ii) When the draw cannot be opened immediately—illumination of a fixed red light not more 30 seconds after the vessel's opening signal.

(7) The fixed white light will remain illuminated until the bridge reaches the fully open position. The fixed white and red lights will be positioned on the east (New Jersey) bridge abutment adjacent to the navigation span.

Dated: June 19, 2017.

M.L. Austin,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

BILLING CODE 9110–04–P

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 201

[Docket No. 2017–10]

Exemptions To Permit Circumvention of Access Controls on Copyrighted Works

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of inquiry and request for petitions.

SUMMARY: The United States Copyright Office is initiating the seventh triennial rulemaking proceeding under the Digital Millennium Copyright Act (''DMCA''), concerning possible temporary exemptions to the DMCA's prohibition against circumvention of technological measures that control access to copyrighted works. In this proceeding, the Copyright Office is establishing a new, streamlined procedure for the renewal of exemptions that were granted during the sixth triennial rulemaking. If renewed, those current exemptions would remain in force for an additional three-year period (October 2018—October 2021). Members of the public seeking the renewal of current exemptions should submit petitions as described below; parties opposing such renewal will then have the opportunity to file comments in response. The Office is also accepting petitions for *new* exemptions to engage in activities not currently permitted by existing exemptions, which may include proposals that expand upon a current exemption. Those petitions, and any renewal petitions that are meaningfully opposed, will be considered pursuant to a more comprehensive rulemaking process similar to that used for the sixth rulemaking (*i.e.,* three rounds of written comment, followed by public hearings).

DATES: Written petitions for renewal of current exemptions must be received no later than 11:59 p.m. Eastern Time on July 31, 2017. Written comments in response to any petitions for renewal must be received no later than 11:59 p.m. Eastern Time on September 13, 2017. Written petitions for new exemptions must be received no later than 11:59 p.m. Eastern Time on September 13, 2017.

ADDRESSES: Written petitions for renewal of current exemptions must be completed using the form provided on the Office's Web site at *https://www.copyright.gov/1201/2018/renewal-petition.pdf.* Written petitions proposing new exemptions must be completed using the form provided on the Office's Web site at *https://www.copyright.gov/1201/2018/new-petition.pdf.* The Copyright Office is using the regulations.gov system for the submission and posting of public petitions and comments in this proceeding. All petitions and comments are therefore to be submitted electronically through *regulations.gov*. Specific instructions for submitting petitions and comments are available on the Copyright Office Web site at *https://www.copyright.gov/1201/2018.* If electronic submission is not feasible, please contact the Office using the contact information below for special instructions.

FOR FURTHER INFORMATION CONTACT: Regan A. Smith, Deputy General Counsel, by email at *resm@loc.gov,* Anna Chauvet, Assistant General Counsel, by email at *achau@loc.gov,* or Jason E. Sloan, Attorney-Advisor, by email at *jslo@loc.gov.* Each can be contacted by telephone by calling (202) 707–8350.

SUPPLEMENTARY INFORMATION:

I. The Digital Millennium Copyright Act and Section 1201

The Digital Millennium Copyright Act (''DMCA'') [1] has played a pivotal role in the development of the modern digital economy. Enacted by Congress in 1998 to implement the United States' obligations under two international treaties,[2] the DMCA was intended to foster the growth and development of a thriving, innovative, and flexible digital marketplace by making digital networks safe places to disseminate and use copyrighted materials.[3] It did this by, among other things, ensuring adequate legal protections for copyrighted content to ''support new ways of disseminating copyrighted materials to users, and to safeguard the availability of legitimate uses of those materials by individuals.'' [4]

These protections, codified in section 1201 of title 17, United States Code, as envisioned by Congress, seek to balance the interests of copyright owners and users, including the personal interests of consumers, in the digital environment.[5] Section 1201 does this by protecting the use of technological measures (also called technological protection measures or TPMs) used by copyright owners to prevent unauthorized access to or use of their works.[6] Section 1201 contains three separate protections for TPMs. First, it prohibits circumvention of technological measures employed by or on behalf of copyright owners to protect access to their works (also known as access controls). Access controls include, for example, a password requirement limiting access to a Web site to paying customers, or authentication codes in video game consoles to prevent the playing of pirated copies. Second, the statute prohibits trafficking in devices or services primarily designed to circumvent access controls. Finally, it prohibits trafficking in devices or services primarily designed to circumvent TPMs used to protect the copyright rights of the owner of a work (also known as copy controls). Copy controls protect against unauthorized uses of a copyrighted work once access has been lawfully obtained. They include, for example, technology preventing the copying of an e-book after it has been downloaded to a user's device. Because title 17 already forbids copyright infringement, there is no corresponding ban on the act of circumventing a copy control.[7] These prohibitions supplement the preexisting rights of copyright owners under the Copyright Act of 1976 by establishing separate and distinct causes of action independent of any infringement of copyright.[8]

At the same time, section 1201 contains a number of discrete, statutory exemptions to these prohibitions, to avoid curtailing legitimate activities such as security testing, law enforcement activities, or the protection of personally identifying information.[9] In addition, to accommodate changing marketplace realities and ensure that access to copyrighted works for lawful

[9] 17 U.S.C. 1201(d)–(j).

purposes is not unjustifiably diminished,[10] the statute provides for a rulemaking proceeding whereby additional, temporary exemptions to the prohibition on circumventing access controls may be adopted by the Librarian of Congress, upon the recommendation of the Register of Copyrights in consultation with the Assistant Secretary for Communications and Information of the Department of Commerce.[11] In contrast to the permanent exemptions set out by statute, exemptions adopted pursuant to the rulemaking must be reconsidered every three years.[12] By statute, the triennial rulemaking process only addresses section 1201(a)(1)(A)'s prohibition on circumvention; the statute does not grant the authority to adopt exemptions to the anti-trafficking provisions of sections 1201(a)(2) or 1201(b).[13]

In order for a temporary exemption from the prohibition on circumvention to be granted through the triennial rulemaking, it must be established that ''persons who are users of a copyrighted work are, or are likely to be in the succeeding 3-year period, adversely affected by the prohibition . . . in their ability to make noninfringing uses under [title 17] of a particular class of copyrighted works.'' [14] In evaluating the evidence, the statutory factors listed in section 1201(a)(1)(C) are weighed: ''(i) the availability for use of copyrighted works; (ii) the availability for use of works for nonprofit archival, preservation, and educational purposes; (iii) the impact that the prohibition on the circumvention of technological measures applied to copyrighted works has on criticism, comment, news reporting, teaching, scholarship, or research; (iv) the effect of circumvention of technological measures on the market for or value of copyrighted works; and (v) such other factors as the Librarian considers appropriate.'' [15] To assess whether the implementation of access controls impairs the ability of individuals to make noninfringing uses of copyrighted works, the Office solicits proposals from the public and develops a comprehensive administrative record using information submitted by interested parties, and the Register makes a recommendation to the Librarian concerning whether exemptions are warranted based on that record.

II. Overview of the Rulemaking Process

The rulemaking process for the seventh triennial proceeding will be generally similar to the process introduced in the sixth proceeding. The primary change from the last rulemaking is the addition of a new streamlined procedure through which members of the public may petition for current temporary exemptions that were granted during the sixth triennial rulemaking to remain in force for an additional three-year period (October 2018–October 2021).

With this notice of inquiry, the Copyright Office is initiating the petition phase of the rulemaking, calling for the public to submit petitions both to renew current exemptions, as well as any comments in support of or opposition to such petitions, and to propose new exemptions. This two-track petition process is described below. After the close of the petition phase, the Office will publish a notice of proposed rulemaking (''NPRM'') to initiate the next phase of the rulemaking process, as described below.

Video tutorials explaining section 1201 in general and the rulemaking process can be found on the Office's 1201 rulemaking Web page at *https://www.copyright.gov/1201.*

III. Process for Seeking Renewal of Current Exemptions

A. Background

The Copyright Office recently published a comprehensive study of section 1201, including the process for adopting temporary exemptions. As part of the study, the Office solicited comments from the public and held roundtable discussions on whether the Office should adjust the rulemaking procedure to streamline the process for recommending readoption of previously adopted exemptions to the Librarian.[16] Previously, the Office had ''require[d] that a factual record to support an exemption be developed *de novo* each rulemaking,'' meaning rulemaking participants could not merely rely on previously submitted evidence from prior proceedings, but had to provide new evidence every three years.[17]

During the course of the study, a broad consensus of stakeholders requested that the Copyright Office change this approach and take steps within its regulatory authority to streamline the process for recommending the renewal of previously adopted exemptions to the Librarian.[18] In the study, the Office concluded as a threshold matter that ''the statute itself requires that exemptions cannot be renewed automatically, presumptively, or otherwise, without a fresh determination concerning the next three-year period. . . . [A] determination must be made specifically for each triennial period.'' [19] The Office further determined, however, that ''the statutory language appears to be broad enough to permit determinations to be based upon evidence drawn from prior proceedings, but only upon a conclusion that this evidence remains reliable to support granting an exemption in the current proceeding.'' [20] The Office elaborated:

> Adopting an approach of *de novo* assessment of evidence—compared to *de novo* submission—would allow future rulemakings to consider the appropriate weight to afford to previously submitted evidence when evaluating renewal requests. The relatively quick three-year turnover of the exemptions was put in place by Congress to allow the rulemaking to be fully considered and fairly decided on the basis of real marketplace developments, and any streamlined process for recommending renewed exemptions must retain flexibility to accommodate changes in the marketplace that affect the required rulemaking analysis. But at the same time, where there is little evidence of marketplace or technological changes, the Office believes it is statutorily permissible to establish a framework that expedites the recommendation to renew perennially sought exemptions.[21]

While the study concluded that the Office has some regulatory flexibility as to how it could implement a streamlined process for evaluating exemption renewals, it announced that the Office intended to implement such a process for this seventh triennial rulemaking proceeding. As promised in the study, below the Office provides further details regarding the streamlined process.[22]

B. Petitioning To Renew a Current Exemption

Those seeking readoption of a current exemption, granted during the sixth rulemaking, may petition for renewal by submitting the Copyright Office's required fillable form, available on the Office's Web site at *https://www.copyright.gov/1201/2018/renewal-petition.pdf.* This form is for renewal petitions only. The Office has a separate

[22] *Id.*

form, discussed below, for petitions for new exemptions.

Scope of Renewal. Renewal may only be sought for current exemptions as they are currently formulated, without modification. This means that if a proponent seeks to engage in any activities not currently permitted by an existing exemption, a petition for a *new* exemption must be submitted. Where a petitioner seeks to engage in activities that expand upon a current exemption, the Office recommends that the petitioner submit both a petition to renew the current exemption, and, separately, a petition for a new exemption. In such cases, the petition for a new exemption need only discuss those issues relevant to the proposed expansion of the current exemption. If the Office recommends readoption of the current exemption, then only those discrete aspects relevant to the expansion will be subject to the more comprehensive rulemaking procedure described below.

Automatic Reconsideration. If the Office declines to recommend renewal of a current exemption (as discussed below), the petition to renew will automatically be treated as a petition for a new exemption, and will be considered pursuant to the more comprehensive rulemaking proceeding. If a proponent has petitioned both for renewal and an expansion, and the Office declines to recommend renewal, the entire exemption (*i.e.,* the current exemption along with the proposed expansion) will automatically be considered under the more comprehensive public proceeding.

Petition Form and Contents. The petition to renew is a short form designed to let proponents identify themselves and the relevant exemption, and to make certain sworn statements to the Copyright Office concerning the existence of a continuing need and justification for the exemption. Use of the Office's prepared form is mandatory, and petitioners must follow the instructions contained in this notice and on the petition form. A separate petition form must be submitted for each current exemption for which renewal is sought. This is required for reasons of administrability and so that the basis for renewal set forth in each petition is clear as to which exemption it applies. While a single petition may not encompass more than one current exemption, the same party may submit multiple petitions.

The petition form has four components:

1. Petitioner identity and contact information. The form asks for each petitioner (*i.e.,* the individual or entity seeking renewal) to provide its name and the name of its representative, if any, along with contact information. Any member of the public capable of making the sworn declaration discussed below may submit a petition for renewal, regardless of prior involvement with past rulemakings. Petitioners and/or their representatives should be reachable through the provided contact information for the duration of the rulemaking proceeding. Multiple petitioning parties may jointly file a single petition.

2. Identification of the current exemption that is the subject of the petition. The form lists all current exemptions granted during the last rulemaking (codified at 37 CFR 201.40), with a check box next to each. The exemption for which renewal is sought is to be identified by marking the appropriate checkbox.

3. Explanation of need for renewal. The petitioner must provide a brief explanation summarizing the basis for claiming a continuing need and justification for the exemption. The required showing is meant to be minimal. The Office anticipates that petitioners will provide a paragraph or two detailing this information, but there is no page limit. While it is permissible to attach supporting documentary evidence as exhibits to the petition, it is not necessary. The Office's petition form includes an example of what it regards as a sufficient explanation.

4. Declaration and signature. One of the petitioners named in the petition must sign a declaration attesting to the continued need for the exemption and the truth of the explanation provided in support. Where the petitioner is an entity, the declaration must be signed by an individual at the organization having appropriate personal knowledge to make the declaration. The declaration may be signed electronically.

For the attestation to be trustworthy and reliable, it is important that the petitioner make it based on his or her own personal knowledge and experience. This requirement should not be burdensome, as a broad range of individuals have a sufficient level of knowledge and experience. For example, a blind individual having difficulty finding and purchasing e-books with appropriate assistive technologies would have such personal knowledge and experience to make the declaration with regard to the assistive technology exemption; so would a relevant employee or volunteer at an organization like the American Foundation for the Blind, which advocates for the blind, visually impaired, and print disabled, is familiar with the needs of the community, and is well-versed specifically in the e-book accessibility issue. It would be improper, however, for a general member of the public to petition for renewal if he or she knows nothing more about matters concerning e-book accessibility other than what he or she might have read in a brief newspaper article, or simply opposes the use of digital rights management tools as a matter of general principle.

The declaration also requires affirmation that, to the best of the petitioner's knowledge, there has not been any material change in the facts, law, or other circumstances set forth in the prior rulemaking record (available at *https://www.copyright.gov/1201/2015*) that originally demonstrated the need for the selected exemption, such that renewal of the exemption would not be justified. By ''material change,'' the Office means such significant change in the underlying conditions that originally justified the exemption when it was first granted, such that the appropriateness of continuing the exemption for another three years based on that original justification is called into question. This attestation tells the Office that the prior rulemaking record from when the current exemption was originally granted is still ripe and applicable in considering whether or not the same exemption is appropriate for the subsequent triennial period. Only after finding the old record to still be germane can the Office rely upon it in deciding, pursuant to 17 U.S.C. 1201(a)(1)(C), whether to recommend renewal.

C. Comments in Response to a Petition To Renew an Exemption

Any interested party may respond to a petition to renew a current exemption by submitting comments. While the primary purpose of these comments is to allow for opposition to renewing the exemption, comments in support of renewal are also permitted. Although no form is being provided for such comments, the first page of any responsive comments must clearly identify which exemption's readoption is being supported or opposed. While participants may comment on more than one exemption, a single submission may not address more than one exemption. For example, a party that wishes to oppose the renewal of both the wireless device unlocking exemption and the jailbreaking exemption must file separate comments for each.[23] The

[23] Commenters may, however, respond to multiple *petitions* to renew the same exemption in a single submission. For instance, if the Office

Office acknowledges that this format may require some parties to repeat certain general information (*e.g.,* about their organization) across multiple submissions, but the Office believes that the administrative benefits of creating self-contained, separate records for each exemption will be worth the modest amount of added effort involved.

Opposition to a renewal petition must be meaningful, such that, from the evidence provided, it would be reasonable for the Register to conclude that the prior rulemaking record and any further information provided in the renewal petition are insufficient to support recommending renewal of an exemption. For example, a change in case law might affect whether a particular use is noninfringing, new technological developments might affect the availability for use of copyrighted works, or new business models might affect the market for or value of copyrighted works. Such evidence could cause the Office to conclude that the prior evidentiary record is too stale to rely upon for an assessment affecting the subsequent three-year period. The Office may also consider whether opposition is meaningful only as to part of a current exemption.

Unsupported conclusory opinion and speculation will not be enough for the Register to refuse to recommend renewing an exemption she would have otherwise recommended in the absence of any opposition, or subject consideration of this exemption to the more comprehensive rulemaking procedure.

IV. Process for Seeking New Exemptions

Those seeking to engage in activities not currently permitted by an existing exemption, including activities that expand upon a current exemption, may propose a new exemption by filing a petition using the Copyright Office's required fillable form, available on the Office's Web site at *https://www.copyright.gov/1201/2018/new-petition.pdf.* Use of the Office's prepared form is mandatory, and petitioners must follow the instructions contained in this notice and on the petition form. As in the sixth rulemaking, a separate petition must be filed for *each* proposed exemption. The Office anticipates that it will, once again, receive a significant number of submissions, and requiring separate submissions for each proposed exemption will help both participants and the Office keep better track of the record for each proposed exemption. Although a single petition may not encompass more than one proposed exemption, the same party may submit multiple petitions.

The petition form has two components:

1. Petitioner identity and contact information. The form asks for each petitioner (*i.e.,* the individual or entity proposing the exemption) to provide its name and the name of its representative, if any, along with contact information. Petitioners and/or their representatives should be reachable through the provided contact information for the duration of the rulemaking proceeding. Multiple petitioning parties may jointly file a single petition.

2. Description of the proposed exemption. At this stage, the Office is only asking petitioners to briefly explain the nature of the proposed new or expanded exemption. The information that would be most helpful to the Office includes the following, to the extent relevant: (1) The types of copyrighted works that need to be accessed; (2) the physical media or devices on which the works are stored or the services through which the works are accessed; (3) the purposes for which the works need to be accessed; (4) the types of users who want access; and (5) the barriers that currently exist or which are likely to exist in the near future preventing these users from obtaining access to the relevant copyrighted works.

To be clear, petitioners need not propose precise regulatory language or fully define the contours of an exemption class in the petition. A short, plain statement describing the nature of the activities the petitioners wish to engage in will be sufficient. Although there is no page limit, the Office anticipates that petitioners will be able to adequately describe in plain terms the relevant information in a few sentences. The Office's petition form includes examples of what it regards as a sufficient description of a requested exemption.

Nor does the Office intend for petitioners to deliver the complete legal and evidentiary basis for their proposals in the petition, and specifically requests that petitioners not do so. Rather, the sole purpose of the petition is to provide the Office with basic information about the uses of copyrighted works that are adversely affected by the prohibition on circumvention. The Office will then use that information to itself formulate categories of potential exemptions, and group similar proposals into those categories, for purposes of the next, more substantive, phase of the rulemaking beginning with the publication of the NPRM.

Indeed, as during the last rulemaking, even the NPRM will not ''put forward precise regulatory language for the proposed classes, because any specific language for exemptions that the Register ultimately recommends to the Librarian will necessarily depend on the full record developed during this rulemaking.'' [24] Rather, the proposed categories of exemptions described in the NPRM will ''represent only a starting point for further consideration in the rulemaking proceeding, and will be subject to further refinement based on the record.'' [25] Thus, proponents will have the opportunity to further refine or expound upon their initial petitions during later phases of the rulemaking.

V. Notice of Proposed Rulemaking

Following receipt of all petitions, as well as comments on petitions for renewal, the Office will evaluate the material received and will issue an NPRM addressing all of the potential exemptions to be considered in the seventh rulemaking.

The NPRM will set forth which exemptions the Register will recommend for readoption, along with proposed regulatory language. The NPRM will also identify any exemptions the Register has declined to recommend for renewal under the streamlined process, after considering any opposition received. Those exemptions will instead be subject to the more comprehensive rulemaking procedure in order to build out the administrative record. The Register will not at the NPRM stage make a final determination to reject recommendation of any exemption that meets the threshold requirements of section 1201(a).[26]

For current exemptions for which renewal was sought but which were not recommended for readoption through the streamlined process and all new exemptions, including proposals to expand current exemptions, the NPRM will group them appropriately, describe them, and initiate at least three rounds of public comment. As with the sixth rulemaking, the Office plans to

receives six petitions in favor of readopting the current wireless device unlocking exemption, a commenter can file a single comment that addresses points made in the six petitions. That comment, however, may not address petitions to readopt the jailbreaking exemption.

[24] 79 FR 73856, 73859 (Dec. 12, 2014).

[25] *Id.* (internal quotation marks and citation omitted).

[26] *See* 79 FR 55687, 55692 (Sept. 17, 2014) (explaining that part of the purpose of providing the information in the petition phase is so the Office can ''confirm that the threshold requirements of section 1201(a) can be met''); *see also* 79 FR at 73859 (noting that three petitions sought an exemption which could not be granted as a matter of law and declining to put them forward for comment).

consolidate or group related and/or overlapping proposed exemptions where possible to simplify the rulemaking process and encourage joint participation among parties with common interests (though such collaboration is not required). As in previous rulemakings, the exemptions as described in the NPRM will represent only a starting point for further consideration in the rulemaking proceeding, and will be subject to further refinement based on the record. The NPRM will provide guidance regarding specific areas of legal and factual interest for the Office with respect to each proposed exemption, and suggest particular types of evidence that participants may wish to submit for the record. It will also contain additional instructions and requirements for submitting comments and will detail the later phases of the rulemaking proceeding—*i.e.,* public hearings, post-hearing questions, recommendation, and final rule—which will be similar to those of the sixth rulemaking.

As noted in the Office's study, however, the Office intends to issue the NPRM at an earlier point than during the sixth rulemaking proceeding, to give all parties sufficient time to participate in the process. Publishing the NPRM earlier should better accommodate the academic calendar and allow for greater law student participation during the more substantive comment and public hearing phases of the proceeding—something many commenters suggested during the study.[27] In addition, the Office will look for opportunities to preview regulatory language or ask additional post-hearing questions, where necessary to ensure sufficient stakeholder participation.[28]

[27] *See, e.g.,* Section 1201 Study Initial Reply Comments of International Documentary Association et al. at 3–4 (Apr. 1, 2016); Section 1201 Study Hearing Tr. at 132:10–133:17 (May 25, 2016) (McClure, American Foundation for the Blind); Section 1201 Study Hearing Tr. at 133:16–135:02 (May 19, 2016) (Decherney, University of Pennsylvania); Section 1201 Study Hearing Tr. at 108:13–109:05 (May 25, 2016) (Metalitz, Association of American Publishers, Motion Picture Association of America, Inc., & Recording Industry Association of America); Section 1201 Study Additional Comments of American Association of Law Libraries at 3 (Oct. 27, 2016). Given the statutory deadline, it was necessary to also move up the petition phase to align the written comment and hearing phases with the academic calendar. The Office determined this to be the most optimal choice, particularly given that the petitions are meant to be simple and short filings, as discussed above. Nevertheless, after discussing the schedule with a number of academic clinics, we selected a longer period for the filing of initial petitions to better accommodate academic schedules.

[28] Section 1201 Study at 150–51.

Dated: June 27, 2017.

Sarang V. Damle,

General Counsel and Associate Register of Copyrights.

BILLING CODE 1410–30–P

POSTAL REGULATORY COMMISSION

39 CFR Part 3050

[Docket No. RM2017–7; Order No. 3982]

Periodic Reporting

AGENCY: Postal Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is noticing a recent filing requesting that the Commission initiate an informal rulemaking proceeding to consider changes to an analytical method for use in periodic reporting (Proposal Three). This document informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* August 16, 2017.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

On June 22, 2017, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting the Commission to initiate an informal rulemaking proceeding to consider proposed changes to an analytical method related to periodic reports.[1] The Petition identifies the proposed analytical method changes filed in this docket as Proposal Three.

II. Proposal Three

Background. The Postal Service currently uses statistical estimates in the Revenue, Pieces, and Weight (RPW) Report for mailpieces reported in the Retail Systems Software Business Partners (RSS BP) application and bearing contract postal unit metered postage. Petition at 1. The RSS BP is the electronic point-of-sale management system that the Postal Service provides to contract postal units. *Id.* at 4. The statistical estimates used in the RSS BP management system are produced by the Postal Service's Origin-Destination Information System—Revenue, Pieces, and Weight (ODIS–RPW) probability-based sampling system. *Id.* at 4, 5.

Proposal. Proposal Three would change the methodology for measuring the national totals of revenue, pieces, and weight in the RPW Report for RSS BP mailpieces by replacing ODIS–RPW statistical sampling estimates with corresponding census data reported in the Postal Service's Retail Data Mart reporting system. *Id.* at 6. In support of Proposal Three, the Postal Service cites other proposals approved by the Commission which have replaced statistical estimates with census data. *See id.* at 3.

Rationale and impact. The Postal Service states that the proposed change in methodology ''provides a complete census source of transactional-level data of all RSS BP mailpieces and extra services.'' *Id.* at 6. The Postal Service asserts that the use of census data would lead one to expect equal or improved data quality because census data, unlike ODIS–RPW statistical sampling data, does not have sampling error. *Id.* at 5. To illustrate the potential impact of switching from ODIS–RPW statistical estimates to census data, the Postal Service provides a comparison of results for the FY 2016 time period. *Id.* at 6–9.

III. Notice and Comment

The Commission establishes Docket No. RM2017–7 for consideration of matters raised by the Petition. More information on the Petition may be accessed via the Commission's Web site at *http://www.prc.gov.* Interested persons may submit comments on the Petition and Proposal Three no later than August 16, 2017. Pursuant to 39 U.S.C. 505, Lyudmila Y. Bzhilyanskaya is designated as officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. RM2017–7 for consideration of the matters raised by the Petition of the United States Postal Service Requesting

[1] Petition of the United States Postal Service Requesting Initiation of a Proceeding to Consider a Proposed Change in Analytical Principles (Proposal Three), June 22, 2017 (Petition).

Initiation of a Proceeding to Consider a Proposed Change in Analytical Principles (Proposal Three), filed June 22, 2017.

2. Comments by interested persons in this proceeding are due no later than August 16, 2017.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Lyudmila Y. Bzhilyanskaya to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,

Secretary.

BILLING CODE 7710–FW–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2016–0409; FRL–9955–66–Region 9]

Approval of California Air Plan Revisions, Great Basin Unified Air Pollution Control District and Town of Mammoth Lakes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the Great Basin Unified Air Pollution Control District (GBUAPCD) and the Town of Mammoth Lakes portion of the California State Implementation Plan (SIP). These revisions concern particulate matter (PM) emissions from wood burning devices and road dust in the Town of Mammoth Lakes. We are proposing to approve local rules to regulate these emission sources under the Clean Air Act (CAA or the Act).

DATES: Any comments on this proposal must arrive by July 31, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2016–0409 at *http://www.regulations.gov,* or via email to Andrew Steckel, Rulemaking Office Chief at *Steckel.Andrew@epa.gov.* For comments submitted at *Regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the Web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, EPA Region IX, (415) 947–4125, *vineyard.christine@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA. This proposal addresses the following local rules:

- GBUAPCD Rule 431, Particulate Matter (except paragraphs M and N).
- Town of Mammoth Lakes Municipal Code Chapter 8.30, Particulate Emissions Regulations (except paragraphs 8.30.110 and 8.30.120).

In the Rules and Regulations section of this **Federal Register**, we are approving these local rules in a direct final action without prior proposal because we believe these SIP revisions are not controversial. If we receive adverse comments, however, we will publish a timely withdrawal of the direct final rule and address the comments in subsequent action based on this proposed rule. Please note that if we receive adverse comment on a particular rule, we may adopt as final the rule that is not the subject of an adverse comment.

We do not plan to open a second comment period, so anyone interested in commenting should do so at this time. If we do not receive adverse comments, no further activity is planned. For further information, please see the direct final action.

Dated: November 14, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

Editorial note: This document was received for publication by the Office of the Federal Register on June 20, 2017.

40 CFR Part 300

[EPA–HQ–SFUND–1990–0011; FRL–9963–94-Region 8]

National Oil and Hazardous Substances Pollution Contingency Plan National Priorities List: Partial Deletion of the Mystery Bridge Road/U.S. Highway 20 Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 8 is issuing a notice of Intent to Partially Delete the property currently owned by Tallgrass Energy Partners, LP (formerly owned by KM Upstream LLC and hereinafter referred to as the former KMI Property), on the Mystery Bridge Road/U.S. Highway 20 Site (Site) from the National Priorities List (NPL). The Site is located in Natrona County, northeast of Casper, Wyoming. EPA requests public comment on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution and Contingency Plan (NCP). The EPA and the State of Wyoming, through the Wyoming Department of Environmental Quality (WDEQ), have determined that all appropriate response actions, other than maintenance of institutional controls and five-year reviews, have been completed for the former KMI source area and the resultant groundwater contamination. However, this deletion does not preclude future actions under Superfund.

This partial deletion pertains to the former KMI Property of OU1 and OU2 formerly containing the benzene, toluene, ethylbenzene, and total xylenes (collectively known as BTEX) groundwater plume and source soils, respectively. The remaining area and media of both OU1 and OU2 containing the volatile halogenated organic chemicals (VHOs) source soils and

plume, which are attributable to the Dow Chemical Company/Dowell Schlumberger, Inc. (DOW/DSI) facility, will remain on the NPL and are not being considered for deletion as part of this action. A map and the description of the surveyed boundaries of the former KMI Property are included in the docket and at the information repositories listed below.

DATES: Comments concerning this action must be received by July 31, 2017.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1910–0011, by one of the following methods:

- *http://www.regulations.gov.* Follow on-line instructions for submitting comments.
- *Email:* Andrew Schmidt (*schmidt.andrew@epa.gov*)
- *Mail:* Andrew Schmidt, Remedial Project Manager, 8EPR–SR, Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202.
- *Hand Delivery:* Andrew Schmidt, Remedial Project Manager, 8EPR–SR, Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202.

Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1910–0011. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The Web site, *http://www.regulations.gov,* is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket

All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at: U.S. EPA Region 8, Superfund Records Center & Technical Library, 1595 Wynkoop Street, Denver, CO 80202–1129.

Viewing hours: 8 a.m. to 4:00 p.m., Monday through Thursday, excluding holidays;

Contact: Andrew Schmidt; (303) 312–6283; email: *schmidt.andrew@epa.gov* and Natrona County Public Library, Reference Desk, 307 East 2nd Street, Casper, WY 82601–2593, (307) 777–7092.

Monday–Thursday: 9 a.m.–6 p.m. Friday and Saturday: 9 a.m.–5 p.m.

FOR FURTHER INFORMATION CONTACT: Andrew Schmidt, Remedial Project Manager, 8EPR–SR, U.S. Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, CO 80202–1129, (303) 312–6283, *email: schmidt.andrew@epa.gov.*

SUPPLEMENTARY INFORMATION: In the ''Rules and Regulations'' section of the **Federal Register**, we are publishing a direct final notice of Partial Deletion for the former KMI Property containing portions of Operable Unit 1 and 2, and the former BTEX impacted areas, of the Mystery Bridge Road/U.S. Highway 20 Superfund Site (Site) without prior notice of Intent for Partial Deletion because EPA views this as a noncontroversial revision and anticipates no adverse comment. We have explained our reasons for this partial deletion in the preamble to the direct final notice of Partial Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this partial deletion action, we will not take further action on this notice of Intent for Partial Deletion. If we receive adverse comment(s), we will withdraw the direct final notice of Partial Deletion based on this notice of Intent for Partial Deletion. We will, as appropriate, address all public comments in a subsequent final notice of Partial Deletion based on this notice of Intent for Partial Deletion. We will not institute a second comment period on this notice of Intent for Partial Deletion. Any parties interested in commenting must do so at this time.

For additional information, see the direct final notice of Partial Deletion, located in the Rules section of this **Federal Register**.

[PS Docket No. 15–94; FCC–17–74]

Blue Alert EAS Event Code

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) proposes to revise its rules governing the Emergency Alert System (EAS) to incorporate a new event code, ''BLU'', for Blue Alerts. Adding this event code would allow alert originators to issue an alert whenever a law enforcement officer is injured or killed, missing in connection with their official duties, or if there is an imminent and credible threat to cause death or serious injury to law enforcement officers.

DATES: Comments are due on or before July 31, 2017 and reply comments are due on or before August 29, 2017.

ADDRESSES: You may submit comments, identified by PS Docket No. 15–94, by any of the following methods:

- *Federal Communications Commission's Web site: http://apps.fcc.gov/ecfs/.* Follow the instructions for submitting comments.
- *Mail:* Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although the Commission continues to experience delays in receiving U.S. Postal Service mail). All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- *People With Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Gregory Cooke, Deputy Division Chief, Policy and Licensing Division, Public Safety and Homeland Security Bureau, at (202) 418–2351, or by email at *Gregory.Cooke@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (*NPRM*) in PS Docket No. 15–94, FCC 17–74, adopted on June 22, 2017, and released on June 22, 2017. The full text of this is available for inspection and copying during normal business hours in the FCC Reference Center (Room CY–1257), 445 12th Street SW., Washington, DC 20554. The full text may also be downloaded at: *www.fcc.gov.* This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Documents in Rulemaking Proceedings,* 63 FR 24121 (1998).

- *Electronic Filers:* Comments may be filed electronically using the Internet by accessing the ECFS: *http://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- All hand-delivered or messenger-delivered paper filings for the Commission's Secretary must be delivered to FCC Headquarters at 445 12th St. SW., Room TW–A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes and boxes must be disposed of *before* entering the building.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW., Washington DC 20554.

People With Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

Synopsis

I. Introduction

1. In this *NPRM,* we propose to revise the Federal Communications Commission's (Commission or FCC) Emergency Alert System (EAS) rules to adopt a new EAS event code that will allow the transmission of ''Blue Alerts'' to the public over the EAS. In doing so, we propose measures to advance the important public policy of protecting our nation's law enforcement officials through facilitating the apprehension of suspects who pose an imminent and credible threat to law enforcement officials and aiding search efforts to locate missing officers. Further, by initiating this proceeding, we also seek

to promote the development of compatible and integrated Blue Alert plans throughout the United States, consistent with the Rafael Ramos and Wenjian Liu National Blue Alert Act of 2015 (Blue Alert Act) and the need articulated by the Office of Community Oriented Policing Service (COPS Office) of the United States Department of Justice (DOJ) to establish a dedicated EAS event code for Blue Alerts.

II. Background

2. *The EAS.* The EAS is a national public warning system through which broadcasters, cable systems, and other service providers (EAS Participants) deliver alerts to the public to warn them of impending emergencies and dangers to life and property. Although the primary purpose of the EAS is to equip the President with the capability to provide immediate communications and information to the general public during periods of national emergency, the EAS also is used by other federal agencies, such as the National Weather Service (NWS), to deliver weather-related alerts, as well as by state and local governments to distribute other alerts such as AMBER Alerts. EAS Participants are required to deliver Presidential alerts; delivery of all other alerts, including NWS weather alerts and state and local EAS alerts, is voluntary. EAS alerts are configured using the EAS Protocol, which utilizes fixed codes to identify the various elements of an EAS alert so that each alert can deliver accurate, secure, and geographically-targeted alerts to the public. Of particular relevance to this proceeding, the EAS Protocol utilizes a three-character ''event code'' to describe the nature of the alert (*e.g.,* ''CAE'' signifies a Child Abduction Emergency, otherwise known as an AMBER Alert). EAS alerts are distributed in two ways: (1) Over-the-air, through a hierarchical, broadcast-based ''daisy chain'' distribution system, and (2) over the Internet, through the Federal Emergency Management Agency's Integrated Public Alert and Warning System (IPAWS), which simultaneously sends data-rich alerts in the Common Alerting Protocol (CAP) format to various public alerting systems.

3. *Blue Alerts.* The Blue Alert Act was enacted to encourage, enhance, and integrate the formation of voluntary ''Blue Alert plans throughout the United States in order to disseminate information when a law enforcement officer is seriously injured or killed in the line of duty, is missing in connection with the officer's official duties, or an imminent and credible threat that an individual intends to cause the serious injury or death of a law enforcement officer is received, and for other purposes.'' As required by the Blue Alert Act, DOJ has designated the COPS Office Director as the National Blue Alert Coordinator (National Blue Alert Coordinator). Accordingly, the National Blue Alert Coordinator has developed a set of voluntary guidelines (Blue Alert Guidelines) for states to use in developing their Blue Alert plans in a manner that will promote compatible and integrated Blue Alert plans throughout the United States.

4. Blue Alerts may be initiated by a law enforcement agency having primary jurisdiction over the incident. The Blue Alert Guidelines provide three criteria for Blue Alert issuance, any one of which should be met before a Blue Alert is issued. First, an alert may be issued when ''the agency confirms that a law enforcement officer has been killed, seriously injured, or attacked and with indications of death or serious injury.'' Second, an alert may be issued in the event of a ''threat to cause death or serious injury to a law enforcement officer.'' Under this criterion, the agency initiating the Blue Alert should confirm that the threat is ''imminent and credible,'' and, to the extent the threat arises from the acts of a suspect, such suspect, ''at the time of receipt of the threat,'' should be ''wanted by a law enforcement agency.'' Third, where a law enforcement officer is reported missing, an agency may issue a Blue Alert if it concludes that ''the law enforcement officer is missing in connection with the officer's official duties'' and that ''there is an indication of serious injury to or death of the law enforcement officer.'' With respect to each of these three scenarios, the agency should not issue the Blue Alert unless ''any suspect involved has not been apprehended'' and ''there is sufficient descriptive information of the suspect, including any vehicle and license tag information.'' The Blue Alert Act also provides that an alert should be issued only in those areas most likely to result in the apprehension of the suspect, and that an alert should be suspended once the suspect is apprehended.

5. Additionally, the National Blue Alert Coordinator is charged with cooperating with the Chairman of the FCC to carry out the Blue Alert Act. In its 2017 Report to Congress, the COPS Office noted that it has complied with this directive by establishing a point of contact with the FCC, and by commencing outreach efforts to pursue a dedicated EAS event code.

III. Discussion

6. We propose to revise the Commission's EAS rules to add a new ''Blue Alert'' event code to the EAS and thus ''promote compatible and integrated Blue Alert plans throughout the United States'' as called for in the Blue Alert Act. Several developments support taking this action today. The Blue Alert Act was adopted to help the states provide effective alerts to the public and law enforcement when police and other law enforcement officers are killed or in danger. In order to ensure that these state plans are compatible and integrated throughout the United States as envisioned by the Blue Alert Act, the Blue Alert Coordinator has made a series of recommendations to Congress. Among them, the Blue Alert Coordinator identified the need for a dedicated EAS event code for Blue Alerts and noted the alignment of the EAS with the implementation of the Blue Alert Act. We propose that by adopting a dedicated EAS event code to deliver Blue Alerts, our rules can help facilitate the delivery of Blue Alerts to the public in a uniform and consistent manner that promotes the compatible and integrated Blue Alert plans contemplated by the Blue Alert Act. We seek comment on this proposal below.

7. We propose to amend Section 11.31(e) of the EAS rules to add a new ''BLU'' event code to the codes contained within the EAS Protocol. Consistent with the guidance issued by the National Blue Alert Coordinator, we anticipate this code would be used by alert originators to disseminate information related to (1) the serious injury or death of a law enforcement officer in the line of duty, (2) an officer who is missing in connection with their official duties, or (3) an imminent and credible threat that an individual intends to cause serious injury to, or kill, a law enforcement officer. We also propose that such alerts would be confined to those areas most likely to facilitate capture of the suspect, and would be suspended when the suspect is apprehended. As with other non-Presidential alerts, carriage of Blue Alerts and use of the Blue Alert event code would be voluntary. We seek comment on this proposal.

8. *Efficacy of the EAS as a mechanism for delivering Blue Alerts.* We seek comment on the efficacy of the EAS as a mechanism for the delivery of Blue Alerts. We note that, for over two decades, the EAS has proven to be an effective method of alerting the public and saving lives and property. EAS Participants continue to voluntarily

transmit thousands of alerts and warnings annually regarding severe weather threats, child abductions, and other local emergencies.

9. We seek comment on whether the current system could accommodate Blue Alerts as effectively as it does these other types of alerts. Are there constraints that would impede the ability of the EAS to contain the information required under the Blue Alert Guidelines? For example, EAS alerts are subject to a two-minute time limit. Can the information required by the Blue Alert Guidelines be communicated within a two-minute time frame? We note that EAS alerts delivered over the IPAWS can contain detailed text files, non-English alerts, or other content-rich data that is not available to EAS alerts delivered via the broadcast-based daisy chain. Do Blue Alerts contain extra text files or other data-rich content that would benefit from IPAWS' capabilities? Would it have a negative impact on the value of an EAS Blue Alert that such data-rich content may not be delivered to all EAS Participants, depending on whether they receive the alert through IPAWS or through the broadcast-based daisy chain?

10. Further, EAS Alerts are limited to the geographic contours and service areas of broadcasters and cable service providers. In light of this, are EAS alerts suited to deliver Blue Alerts in a targeted geographic manner, consistent with the Blue Alert Act, which provides that Blue Alerts, to the maximum extent practicable, ''be limited to the geographic areas most likely to facilitate the apprehension of the suspect involved or which the suspect could reasonably reach, which should not be limited to state lines''? Can EAS Participants distribute Blue Alerts to such smaller, more narrowly targeted geographic areas? We note that, in the future, if ATSC 3.0 DTV is approved by the Commission as proposed in the *ATSC 3.0 NPRM,* television broadcasters using ATSC 3.0 expect to have the capability of tailoring emergency alert information for specific geographic areas. In particular, what is the ability of small cable operator EAS Participants to limit the geographic area of a Blue Alert? To what extent do states use the EAS to send Blue Alerts? Do any states send Blue Alerts outside of the EAS structure? What has been their experience? Would the EAS serve as a more effective means of conveying the information required by the Blue Alert Guidelines?

11. *Implementation of Blue Alerts.* We seek comment on whether—assuming that the EAS would be an efficient manner of distributing Blue Alerts—the establishment of a dedicated EAS event code would help to facilitate the implementation of the Blue Alert Guidelines in a compatible and integrated manner nationwide, as contemplated by the Blue Alert Act. The COPS Office states ''a dedicated Blue Alert EAS event code would serve as the central and organizing element for Blue Alert plans coast-to-coast and greatly facilitate the work of the National Blue Alert Network.'' We seek comment on this statement.

12. As of November 2016, 27 states have implemented Blue Alert plans. We observe that states' implementation of Blue Alert plans vary. For example, Montana and Florida utilize the ''Law Enforcement Emergency'' (LEW) EAS event code to transmit Blue Alerts, whereas Washington is creating its own ''Blue Alert System'' for voluntary cooperation between law enforcement, and radio, television, cable, and satellite systems. To what extent do current state guidelines for delivering a Blue Alert differ from the Blue Alert Guidelines? Would a dedicated EAS event code help ensure that both Blue Alerts and related outreach are undertaken in a consistent manner nationally? We seek comment on the distribution methods states currently employ to deliver Blue Alerts. To the extent states use different distribution methods to deliver Blue Alerts, do these various distribution methods detract from the effectiveness of Blue Alerts? We seek comment on the experience of any states that have adopted Blue Alerts as part of their statewide alerting systems. We seek comment on whether the adoption of a dedicated EAS Blue Alert event code would encourage EAS Participants to deliver Blue Alerts.

13. We additionally ask whether availability of a dedicated Blue Alert EAS event code would promote the adoption of additional Blue Alert systems throughout the nation. According to the COPS Office, a dedicated EAS event code would ''facilitate and streamline the adoption of new Blue Alert plans throughout the nation and would help to integrate existing plans into a coordinated national framework.'' As the National Blue Alert Coordinator noted in its 2016 Report to Congress, a majority of states and territories do not yet have Blue Alert systems. Would facilitating law enforcement agencies' ability to utilize existing EAS distribution networks alleviate much of the burden associated with designing and implementing Blue Alert systems and plans? Would the implementation of a dedicated Blue Alert EAS code encourage states that do not have Blue Alert plans to adopt, in whole or in part, existing procedures of states that have implemented Blue Alert plans? Has the lack of a dedicated Blue Alert EAS event code impeded adoption of Blue Alert plans? Further, would utilizing the nationwide EAS architecture help integrate existing plans into a coordinated national framework? In this regard, would integrating state Blue Alert plans into the EAS help individual states work together when suspects or threats cross state borders, as envisioned by the Blue Alert Act?

14. Alternately, we seek comment on whether existing event codes are sufficient to convey Blue Alert information. According to the COPS Office, there is a lack of urgency associated with existing event codes, which do not ''suggest immediate action on the part of broadcasters.'' As noted above, at least two states utilize the ''Law Enforcement Warning'' (LEW) EAS code to transmit Blue Alerts. The COPS Office observes, however, that the LEW event code is used for events such as road closures and notifying drivers of hazardous road conditions and is not an effective means to transmit Blue Alerts. We seek comment on this observation. Is the use of LEW effective to provide information to help protect law enforcement officials? For what purposes is LEW otherwise used? Does utilizing an existing EAS code for a Blue Alert detract from the existing code's ability to serve its intended purpose? Without adoption of a Blue Alert code, would law enforcement agencies be hampered by being forced to use codes that do not directly apply to the situation, nor convey the necessary information? Further, would the use of existing EAS event codes to broadcast a Blue Alert create confusion? Do other event codes contain instructions that might confuse the public or direct the public to take unsafe actions in response to the underlying situation? For example, in the 2016 *NWS Report and Order,* the Commission adopted new dedicated event codes for certain weather events, noting that the existing TOR event code for tornados provided the public with incorrect guidance about what actions to take in response to hurricane-related weather events, such as storm surges. Is there a similar risk of confusion with using existing EAS event codes in lieu of a dedicated Blue Alert event code?

15. *Public Awareness and Outreach.* We seek comment on how the public may respond to Blue Alert EAS codes. Would a dedicated Blue Alert EAS event code allow law enforcement to provide a warning that the public

recognizes immediately as a Blue Alert, *e.g.,* because Blue Alerts would be issued only under specific criteria that are nationally consistent? The COPS Office states that a dedicated EAS event code would ''convey the appropriate sense of urgency'' and ''galvanize the public awareness necessary to protect law enforcement officers and the public from extremely dangerous offenders.'' We seek comment on this position. Would a dedicated event code facilitate consistent and effective public outreach educating the public to recognize and respond to Blue Alerts?

16. In this regard, we seek comment on what actions states have taken to educate the public on Blue Alerts and appropriate responses to Blue Alerts. For example, we note that the Blue Alert Foundation has prepared model Public Service Announcements (PSAs) for use by states to educate the public about Blue Alerts. Have states adopted these PSAs or other types of outreach to educate the public about Blue Alerts and appropriate responses to them? How often have Blue Alerts been activated and through what means or media have they been issued? How has the public reacted to Blue Alerts? In the past, the Commission has noted its concern that over-alerting or alerting to unaffected areas can lead to alert fatigue. Has public response indicated that is the case in connection with Blue Alerts? We encourage commenters to provide examples of all available public responses to Blue Alerts that have been delivered since the adoption of the Blue Alert Act and DOJ's Blue Alert Guidelines.

17. *Timeframe.* We seek comment on the timeframe in which a dedicated Blue Alert EAS event code could be implemented. In the *NWS Report and Order,* the Commission required EAS equipment manufacturers to integrate the severe weather-related EAS event codes into equipment yet to be manufactured or sold, and to make necessary software upgrades available to EAS Participants, no later than six months from the effective date of the rules, reasoning that the prompt deployment of alerts using the new codes would be consistent with the safety of the public in affected areas. We believe that adding a Blue Alert EAS event code would trigger similar technical and public safety requirements regarding equipment readiness. We therefore propose that EAS equipment manufacturers should integrate the Blue Alert event code into equipment yet to be manufactured or sold, and make necessary software upgrades available to EAS Participants, no later than six months from the effective date of the rules. We seek comment on this proposal.

18. With regard to EAS Participants, we note that in the NWS proceeding the Commission allowed EAS Participants to implement the new event codes on a voluntary basis. The Commission further noted that it has taken this approach when it has adopted other new EAS event codes in the past, and that the record did not reflect any basis to take a different approach. We therefore propose to take a similar approach here and would allow EAS Participants to upgrade their equipment (whether through new equipment that is programmed to contain the code or through implementing a software upgrade to install the code into equipment already in place) on a voluntary basis until such time as their equipment is replaced. We seek comment on our proposal. If commenters disagree with our analysis or proposed timeline, they should specify alternatives and the specific technical bases for such alternatives.

19. *Wireless Emergency Alerts.* We note that along with the EAS, a primary public alert warning system regulated by the Commission is Wireless Emergency Alerts (WEA), a system that allows wireless providers (participating CMRS Providers) to voluntarily deliver critical warnings and information to Americans through their wireless phones. In its 2017 Report to Congress, the COPS Office notes that many Americans depend on both the EAS and WEA for public alerts and warnings. The COPS Office goes on to note its intent that Blue Alerts be delivered to the public over wireless devices as well as over the EAS. We note that EAS event codes are not required by the Commission's rules for a WEA message to be processed, but seek comment on whether the adoption of a dedicated EAS code for Blue Alerts would have any effect on WEA. For example, would the use of a Blue Alert EAS event code have any impact on how the IPAWS infrastructure and the networks of participating CMRS Providers would process a Blue Alert WEA? To what extent, if any, have states used WEA to deliver Blue Alerts to the public? Have such WEA messages been initiated by the use of existing EAS event codes?

20. Would the adoption of a dedicated EAS event code help ensure that Blue Alerts issued over WEA are swiftly processed and delivered to the public? If we were to adopt a dedicated Blue Alert EAS event code, and the alert originator were to select ''BLU'' as the event code type, could this automatically prepopulate the WEA message—thereby saving critical seconds—with uniform language that might be applicable to all Blue Alerts (such as by automatically including alert message text saying ''This is a Blue Alert for [area]'')? We assume that WEA Blue Alerts would be classified as either an Imminent Threat Alert or the newly adopted Public Safety Message, depending on the circumstances. We seek comment on this assumption, and ask whether alert initiators, Participating CMRS providers, or other WEA stakeholders believe it would be helpful to receive additional guidance or direction regarding how Blue Alerts should be classified for purposes of WEA. Are there other reasons adopting a dedicated EAS Blue Alert event code would facilitate or otherwise affect the delivery of Blue Alerts to the public over WEA?

21. *Costs and Benefits.* We seek comment on the total costs and benefits associated with the proposed addition of Blue Alerts to the EAS. For those states that have adopted State Blue Alert Plans, have Blue Alerts been effective in protecting law enforcement officers and/or apprehending criminals? Would a dedicated EAS code produce a more efficient result than utilizing an existing event code or alternate delivery mechanism?

22. In the background section of this *NPRM,* we describe how AMBER Alerts are a voluntary partnership between law-enforcement agencies, broadcasters, transportation agencies, and the wireless industry to activate an urgent bulletin in the most serious child-abduction cases. Would the adoption of a dedicated EAS event code help facilitate a similar partnership to promote the safety of law enforcement officers? Would Blue Alerts have a similar impact as AMBER Alerts? We seek comment on whether statistical information concerning AMBER Alerts is relevant to Blue Alerts. The DOJ reports that AMBER Alerts were directly responsible for recovering more than 25% of children reported missing in 2015. According to DOJ statistics, 868 children have been rescued due to Amber Alerts. In 2015 alone, 50 of the 153 recoveries were the direct result of Amber Alerts, constituting more than 25% of the recovered children reported missing that year. Is it reasonable to expect a similar success rate for EAS Blue Alerts? What is the expected reduction in time to find a lost or abducted child as a result of the introduction of the EAS Code for AMBER Alerts? Would a similar reduction of time occur with an EAS Blue Alert code?

23. We seek comment on whether introducing a dedicated EAS event code

would help save the lives of law enforcement officers or the public. We observe that 135 law enforcement officials were killed in 2016. The COPS Office argues that the EAS framework is a valuable resource that can ''expedite information sharing and facilitate the quick apprehension of dangerous criminals who pose an immediate threat to law enforcement and communities they serve.'' Would utilizing a dedicated event code facilitate faster information sharing and dissemination of information to the public? The COPS Office additionally argues that Blue Alerts can ''provide instructions to keep innocent persons safe and information on what to do if a suspect is spotted.'' Would a faster and more uniform means of disseminating Blue Alerts, such as through a dedicated EAS event code, save lives (whether directly as to law enforcement officials, or indirectly as to innocent bystanders that might be harmed by the same emergency)? To quantify the life-saving value of the EAS, we assign a dollar value to reductions in the risk of losing human lives, referred to as the ''Value of a Statistical Life'' (VSL). VSL describes ''the additional cost that individuals would be willing to bear for improvements in safety (that is, reductions in risks) that, in the aggregate, reduce the expected number of fatalities by one.'' We estimate that the dollar value of VSL in 2017 is approximately $9.6 million.

24. We seek comment on the benefits of a dedicated EAS Blue Alert code with respect to potentially providing an additional path of communication to others who may be best positioned to provide assistance, including off-duty public safety officials and the media. EAS Blue Alerts also could quickly provide the media with information that they can disseminate to the public. In this regard, could EAS Blue Alerts lower the amount of time that police forces devote to alerting the media, allowing more time for personnel to devote to responding to the emergency? We seek comment on this category of benefits and cost reductions.

25. We also seek comment on the costs of the proposed event code. In the *NWS Report and Order,* the Commission noted that the record indicated that the new severe weather-related codes could be implemented by EAS Participants via minimally burdensome and low-cost software downloads. Is the same true for the proposed Blue Alert event code? In the record of the *NWS Report and Order,* Monroe Electronics indicated that the new severe weather-related event codes could be implemented in its device models through a software update downloaded from its Web site, while Sage Alerting Systems indicated that end users could implement the proposed event codes in 10 minutes or less at no cost other than labor. In the *NWS Report and Order,* the Commission expected total costs for the codes adopted in that order would not exceed the one-time $3.5 million implementation cost ceiling. We believe that adopting a Blue Alert EAS event code presents similar technical issues to those raised in the NWS Order. Accordingly, we believe that the same costs would apply to the adoption of a Blue Alert EAS event code as applied to the severe weather event codes adopted in the NWS proceeding, and tentatively conclude that the costs for adding a dedicated Blue Alert EAS event code would not exceed the one-time $3.5 million implementation cost ceiling that the Commission expected in the *NWS Report and Order.* We seek comment on this analysis.

26. We believe $3.5 million represents a conservative estimate because it assumes all 28,508 broadcasters and cable companies will spend the maximum of one hour downloading and installing a Blue Alert specific software update. We note that, as of July 30, 2016, EAS Participants were required to have equipment in place that would be capable, at the minimum, of being upgraded by software to accommodate EAS modifications like what we propose here. We also believe that the actual cost imposed will fall far below the $3.5 million cost ceiling, because it is premised on the assumption that downloading the software updates will take one hour, whereas Sage estimated in the *NWS Report and Order* that a similar download and installation would take ten minutes. Further, we see no reason why the Blue Alert event code could not be bundled with a general software upgrade that EAS Participants would otherwise install anyway, during the regular course of business. We tentatively conclude that the installation costs imposed on EAS Participants, together with the software update costs incurred by equipment manufacturers, would be far below the $3.5 million ceiling estimated in the *NWS Report and Order.* We seek comment on our tentative conclusions. We also seek comment on the cost to EAS equipment manufacturers of creating software updates, testing these updates, supplying them to their customers, and providing any related customer support. We recognize that potential costs also may include management oversight software updates.

27. The COPS Office observes that a dedicated event code would convey the necessary sense of urgency and galvanize the public awareness necessary to protect law enforcement and the public from dangerous offenders, avoid utilizing existing codes which are used for mundane informational purposes, facilitate the adoption of new Blue Alert plans and integrate existing plans into a cohesive framework, and serve as a central and organizing element for Blue Alert plans nationally. We acknowledge DOJ's guidance and expertise as to the potential benefits of Blue Alerts, and combine that with our own analysis to support the tentative conclusion that the benefits of the proposed event code will outweigh its costs. We seek comment on this tentative conclusion.

28. Finally, are there costs or benefits that should be considered that are not captured in the above discussion? Are there alternative or additional approaches that could increase benefits and/or reduce costs? We seek comment on whether there are alternative or additional measures that the Commission could take to improve the introduction of Blue Alerts over the EAS, in order to promote the important public policy objective of protecting our nation's law enforcement officials.

IV. Initial Regulatory Flexibility Analysis

29. As required by the Regulatory Flexibility Act of 1980, as amended (RFA) the Commission has prepared this present Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this *NPRM.* Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments in the *NPRM.* The Commission will send a copy of the *NPRM,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *NPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

30. In this *NPRM,* the Commission proposes adding a new Emergency Alert System (EAS) Event Code, covering Blue Alerts (''Blue Alert Warning''). The Blue Alert Act charges the Community Oriented Policing Service (COPS Office) with identifying policies and procedures for disseminating Blue Alerts to the public that are effective, and can be implemented with no additional cost. Blue Alert carriage and

use of the Blue Alert event code would be voluntary. In its 2016 Report to Congress, the COPS Office identified a dedicated EAS event code for Blue Alerts as a means of disseminating Blue Alerts to the public, and a necessary element to align the EAS with implementation of the Blue Alert Act overall. EAS Participants who decide to carry the Blue Alert would be able to accommodate the new code with a software upgrade of equipment already in place but not yet capable of handling these codes (any new equipment allowed under existing rules is either similarly upgradeable or will already be programmed to handle the code). In this *NPRM,* we seek comment on whether adding a ''Blue Alert'' code to the EAS would serve the public interest by furthering the goal of the Blue Alert Act by disseminating information to the public that protects law enforcement officials and the public at large.

B. Legal Basis

31. Authority for the actions proposed in this *NPRM* may be found in sections 1, 2, 4(i), 4(o), 301, 303(r), 303(v), 307, 309, 335, 403, 624(g), 706, and 715 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(o), 301, 303(r), 303(v), 307, 309, 335, 403, 544(g), 606, and 615.

C. Description and Estimate of the Number of Small Entities to Which Rules Will Apply

32. The RFA directs agencies to provide a description of and, where feasible, an estimate of, the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA). Below, we describe and estimate the number of small entity licensees that may be affected by the adopted rules.

33. *Small Businesses, Small Organizations, and Small Governmental Jurisdictions.* Our action may, over time, affect small entities that are not easily categorized at present. We therefore describe here, at the outset, three comprehensive, statutory small entity size standards that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the SBA's Office of Advocacy, in general, a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 28.8 million businesses. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' Nationwide, as of 2007, there were approximately 1,621,215 small organizations. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data published in 2012 indicate that there were 89,476 local governmental jurisdictions in the United States. We estimate that, of this total, as many as 88,761 entities may qualify as ''small governmental jurisdictions.'' Thus, we estimate that most governmental jurisdictions are small.

34. *Radio Stations.* This Economic Census category comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in the station's own studio, from an affiliated network, or from external sources. The SBA has established a small business size standard for this category as firms having $38.5 million or less in annual receipts. U.S. Census Bureau data for 2012 shows that 2,849 radio station firms operated during that year. Of that number, 2,806 operated with annual receipts of less than $25 million per year, 17 with annual receipts between $25 million and $49,999,999 million and 26 with annual receipts of $50 million or more. Therefore, based on the SBA's size standard, the majority of such entities are small entities.

35. According to Commission staff review of the BIA Publications, Inc. Master Access Radio Analyzer Database as of June 2, 2016, about 11,386 (or about 99.9 percent) of 11,395 commercial radio stations had revenues of $38.5 million or less and thus qualify as small entities under the SBA definition. The Commission has estimated the number of licensed commercial radio stations to be 11,415. We note that the Commission also has estimated the number of licensed NCE radio stations to be 4,101. Nevertheless, the Commission does not compile and otherwise does not have access to information on the revenue of NCE stations that would permit it to determine how many such stations would qualify as small entities.

36. We also note that in assessing whether a business entity qualifies as small under the above definition, business control affiliations must be included. The Commission's estimate therefore likely overstates the number of small entities that might be affected by its action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, to be determined a ''small business,'' an entity may not be dominant in its field of operation. We further note, that it is difficult at times to assess these criteria in the context of media entities, and the estimate of small businesses to which these rules may apply does not exclude any radio station from the definition of a small business on these basis; thus, our estimate of small businesses may be over-inclusive.

37. *FM Translator Stations and Low-Power FM Stations.* FM translators and Low Power FM Stations are classified in the category of Radio Stations and are assigned the same NAICs Code as licensees of radio stations. This U.S. industry, Radio Stations, comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in their own studios, from an affiliated network, or from external sources. The SBA has established a small business size standard which consists of all radio stations whose annual receipts are $38.5 million dollars or less. U.S. Census data for 2012 indicate that 2,849 radio station firms operated during that year. Of that number, 2,806 operated with annual receipts of less than $25 million per year, 17 with annual receipts between $25 million and $49,999,999 million and 26 with annual receipts of $50 million or more. Based on U.S. Census Bureau data, we conclude that the majority of FM Translator Stations and Low Power FM Stations are small.

38. *Television Broadcasting.* This Economic Census category ''comprises establishments primarily engaged in broadcasting images together with sound.'' These establishments operate television broadcast studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which, in turn, broadcast the programs to the public on a predetermined schedule. Programming may originate in

their own studios, from an affiliated network, or from external sources. The SBA has created the following small business size standard for such businesses: those having $38.5 million or less in annual receipts. The 2012 Economic Census reports that 751 firms in this category operated in that year. Of that number, 656 had annual receipts of $25,000,000 or less, 25 had annual receipts between $25,000,000 and $49,999,999, and 70 had annual receipts of $50,000,000 or more. Based on this data, we therefore estimate that the majority of commercial television broadcasters are small entities under the applicable SBA size standard.

39. The Commission has estimated the number of licensed commercial television stations to be 1,384. Of this total, 1,264 stations (or about 91 percent) had revenues of $38.5 million or less, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on February 24, 2017, and, therefore, these licensees qualify as small entities under the SBA definition. In addition, the Commission has estimated the number of licensed noncommercial educational (NCE) television stations to be 394. Notwithstanding, the Commission does not compile and otherwise does not have access to information on the revenue of NCE stations that would permit it to determine how many such stations would qualify as small entities.

40. We note, however, that in assessing whether a business concern qualifies as ''small'' under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, another element of the definition of ''small business'' requires that an entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific television broadcast station is dominant in its field of operation. Accordingly, the estimate of small businesses to which rules may apply does not exclude any television station from the definition of a small business on this basis and therefore is possibly over-inclusive.

41. *Cable and Other Subscription Programming.* This industry comprises establishments primarily engaged in operating studios and facilities for the broadcasting of programs on a subscription or fee basis. The broadcast programming is typically narrowcast in nature (*e.g.,* limited format, such as news, sports, education, or youth-oriented). These establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers. The SBA size standard for this industry establishes as small any company in this category which receives annual receipts of $38.5 million or less. Based on U.S. Census data for 2012, in that year 725 establishments operated for the entire year. Of that number, 488 operated with annual receipts of $10 million a year or less and 237 establishments operated with annual receipts of $10 million or more. Based on this data, the Commission estimates that the majority of establishments operating in this industry are small.

42. *Cable System Operators (Rate Regulation Standard).* The Commission has developed its own small business size standards for the purpose of cable rate regulation. Under the Commission's rules, a ''small cable company'' is one serving 400,000 or fewer subscribers nationwide. Industry data indicate that there are currently 4,600 active cable systems in the United States. Of this total, all but nine cable operators nationwide are small under the 400,000-subscriber size standard. In addition, under the Commission's rate regulation rules, a ''small system'' is a cable system serving 15,000 or fewer subscribers. Current Commission records show 4,600 cable systems nationwide. Of this total, 3,900 cable systems have fewer than 15,000 subscribers, and 700 systems have 15,000 or more subscribers, based on the same records. Thus, under this standard as well, we estimate that most cable systems are small entities.

43. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is ''a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000 are approximately 52,403,705 cable video subscribers in the United States today. Accordingly, an operator serving fewer than 524,037 subscribers shall be deemed a small operator if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed $250 million in the aggregate. Based on available data, we find that all but nine incumbent cable operators are small entities under this size standard. We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million. Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed $250,000,000, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

44. *Custom Computer Programming Services.* This industry is comprised of establishments primarily engaged in writing, modifying, testing, and supporting software to meet the needs of a particular customer. The SBA has developed a small business size standard for this category, which is annual gross receipts of $27.5 million or less. According to data from the 2012 U.S. Census, there were 47,918 establishments engaged in this business in 2012. Of these, 45,786 had annual gross receipts of less than $10,000,000. Another 2,132 establishments had gross receipts of $10,000,000 or more. Based on this data, the Commission concludes that the majority of the businesses engaged in this industry are small.

45. *Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing.* This industry comprises establishments primarily engaged in manufacturing radio and television broadcast and wireless communications equipment. Examples of products made by these establishments are: Transmitting and receiving antennas, cable television equipment, GPS equipment, pagers, cellular phones, mobile communications equipment, and radio and television studio and broadcasting equipment. The Small Business Administration has established a size standard for this industry of 1,250 or fewer employees. U.S. Census data for 2012 shows that 841 establishments operated in this industry in that year. Of that number, 828 establishments operated with fewer than 1,000 employees, 7 establishments operated with between 1,000 and 2,499 employees and 6 establishments operated with 2,500 or more employees. Based on this data, we conclude that a majority of manufacturers in this industry are small.

46. *Satellite Telecommunications.* This category comprises firms ''primarily engaged in providing telecommunications services to other establishments in the

telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' The category has a small business size standard of $32.5 million or less in average annual receipts, under SBA rules. For this category, U.S. Census Bureau data for 2012 shows that there were a total of 333 firms that operated for the entire year. Of this total, 299 firms had annual receipts of less than $25 million. Consequently, we estimate that the majority of satellite telecommunications providers are small entities.

47. *Software Publishers.* This industry comprises establishments primarily engaged in computer software publishing or publishing and reproduction. Establishments in this industry carry out operations necessary for producing and distributing computer software, such as designing, providing documentation, assisting in installation, and providing support services to software purchasers. These establishments may design, develop, and publish, or publish only. The SBA has established a size standard for this industry of annual receipts of $38.5 million per year. U.S. Census data for 2012 indicates that 5,079 firms operated in that year. Of that number, 4,697 firms had annual receipts of $25 million or less. Based on that data, we conclude that a majority of firms in this industry are small.

48. *All Other Telecommunications Providers.* The ''All Other Telecommunications'' category is comprised of establishments that are primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Establishments providing Internet services or voice over Internet protocol (VoIP) services via client-supplied telecommunications connections are also included in this industry. The SBA has developed a small business size standard for ''All Other Telecommunications,'' which consists of all such firms with gross annual receipts of $32.5 million or less. For this category, U.S. Census data for 2012 shows that there were 1,442 firms that operated for the entire year. Of these firms, a total of 1,400 had gross annual receipts of less than $25 million. Thus, a majority of ''All Other Telecommunications'' firms potentially affected by the rules adopted can be considered small.

49. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS) systems, and ''wireless cable,'' transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)).

50. *BRS.* In connection with the 1996 BRS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of no more than $40 million in the previous three calendar years. The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, we estimate that of the 61 small business BRS auction winners, 48 remain small business licensees. In addition to the 48 small businesses that hold BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities. After adding the number of small business auction licensees to the number of incumbent licensees not already counted, we find that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission's rules.

51. In 2009, the Commission conducted Auction 86, the sale of 78 licenses in the BRS areas. The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed $15 million and do not exceed $40 million for the preceding three years (small business) received a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed $3 million and do not exceed $15 million for the preceding three years (very small business) received a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed $3 million for the preceding three years (entrepreneur) received a 35 percent discount on its winning bid. Auction 86 concluded in 2009 with the sale of 61 licenses. Of the ten winning bidders, two bidders that claimed small business status won 4 licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.

52. *EBS.* The SBA's Cable Television Distribution Services small business size standard is applicable to EBS. There are presently 2,436 EBS licensees. All but 100 of these licenses are held by educational institutions. Educational institutions are included in this analysis as small entities. Thus, we estimate that at least 2,336 licensees are small businesses. Since 2007, Cable Television Distribution Services have been defined within the broad economic census category of Wired Telecommunications Carriers. Wired Telecommunications Carriers are comprised of establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services.'' The SBA's small business size standard for this category is all such firms having 1,500 or fewer employees. U.S. Census data for 2012 shows that there were 3,117 firms that operated that year. Of this total, 3,083 operated with fewer than 1,000 employees. Thus, under this size standard, the majority of firms in this industry can be considered small. In addition to Census data, the Commission's internal records indicate that as of September 2014, there are 2,207 active EBS licenses. The Commission estimates that of these 2,207 licenses, the majority are held by non-profit educational institutions and school districts, which are by statute defined as small businesses.

53. *Direct Broadcast Satellite (''DBS'') Service.* DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic ''dish'' antenna at the subscriber's location. DBS is now included in SBA's economic census category ''Wired Telecommunications Carriers.'' The Wired Telecommunications Carriers

industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution; and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. The SBA determines that a wireline business is small if it has fewer than 1500 employees. U.S. Census data for 2012 indicates that 3,117 wireline companies were operational during that year. Of that number, 3,083 operated with fewer than 1,000 employees. Based on that data, we conclude that the majority of wireline firms are small under the applicable standard. However, currently only two entities provide DBS service, which requires a great deal of capital for operation: DIRECTV (owned by AT&T) and DISH Network. DIRECTV and DISH Network each report annual revenues that are in excess of the threshold for a small business. Accordingly, we must conclude that internally developed FCC data are persuasive that, in general, DBS service is provided only by large firms.

54. *Wired Telecommunications Carriers.* The U.S. Census Bureau defines this industry as ''establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.'' The SBA has developed a small business size standard for Wired Telecommunications Carriers, which consists of all such companies having 1,500 or fewer employees. U.S. Census data for 2012 shows that there were 3,117 firms that operated that year. Of this total, 3,083 operated with fewer than 1,000 employees. Thus, under this size standard, the majority of firms in this industry can be considered small.

55. *Wireless Communications Service.* This service can be used for fixed, mobile, radiolocation, and digital audio broadcasting satellite uses. The Commission established small business size standards for the wireless communications services (WCS) auction. A ''small business'' is an entity with average gross revenues of $40 million for each of the three preceding years, and a ''very small business'' is an entity with average gross revenues of $15 million for each of the three preceding years. The SBA has approved these small business size standards. The Commission auctioned geographic area licenses in the WCS service. In the auction, there were seven winning bidders that qualified as ''very small business'' entities, and one that qualified as a ''small business'' entity.

56. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The appropriate size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census data for 2012 show that there were 967 firms that operated for the entire year. Of this total, 955 firms had employment of 999 or fewer employees and 12 had employment of 1000 employees or more. Thus, under this category and the associated size standard, the Commission estimates that the majority of wireless telecommunications carriers (except satellite) are small entities.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

57. None.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

58. The RFA requires an agency to describe any significant, specifically small business alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) and exemption from coverage of the rule, or any part thereof, for small entities.''

59. The rule changes contemplated by the *NPRM* would implement certain EAS warning codes that are unique, and implemented by small entity and larger-sized regulated entities on a voluntary basis through equipment already in place (or a software upgrade thereof). The costs to EAS Participants associated with implementing the codes contained in the proposed rule changes are expected to be *de minimis* and limited to the cost of labor for downloading software updates, to the extent any updates are required at all. Nevertheless, we have invited comment on the costs associated with implementation of the proposed Blue Alert code in order to more fully understand the impact of the proposed action and assess whether any action is needed to assist small entities. Similarly, while we believe that the costs incurred by equipment manufacturers to write a few lines of code to implement the Blue Alert code will be minimal, we have also invited comments on the cost to EAS equipment manufacturers of creating software updates, testing these updates, supplying them to their customers, and providing any related customer support. Additionally, we have invited Commenters to propose steps that the Commission may take to further minimize any significant economic impact on small entities. When considering proposals made by other parties, commenters are invited to propose significant alternatives that serve the goals of these proposals.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

60. None.

V. Procedural Matters

A. Ex Parte Rules

61. The proceeding this *NPRM* initiates shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules.

Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must: (1) List all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made; and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda, or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

B. Regulatory Flexibility Analysis

62. As required by the Regulatory Flexibility Act of 1980, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities of the policies and rules addressed in this document. The IRFA is set forth in Appendix B. Written public comments are requested in the IRFA. These comments must be filed in accordance with the same filing deadlines as comments filed in response to this *NPRM,* as set forth on the first page of this document, and have a separate and distinct heading designating them as responses to the IRFA.

C. Paperwork Reduction Analysis

63. This document does not contain proposed information collection(s) subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198.

II. Ordering Clauses

64. Accordingly, *It is ordered* that pursuant to sections 1, 2, 4(i), 4(o), 301, 303(r), 303(v), 307, 309, 335, 403, 624(g), 706, and 715 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(o), 301, 303(r), 303(v), 307, 309, 335, 403, 544(g), 606, and 615, this *Notice of Proposed Rulemaking is Adopted.*

65. *It is Further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *Shall send* a copy of this *Notice of Proposed Rulemaking* including the Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 11

Emergency Alert System.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 11 as follows:

PART 11—EMERGENCY ALERT SYSTEM (EAS)

■ 1. The authority citation for part 11 continues to read as follows:

Authority: 47 U.S.C. 151, 154 (i) and (o), 303(r), 544(g) and 606.

■ 2. Amend § 11.31 by adding entry of ''Blue Alert'' to the table in paragraphs (e) to read as follows:

§ 11.31 EAS protocol.

* * * * *

(e) * * *

Nature of activation	Event codes
* * * * *	
State and Local Codes (Optional):	
* * * * *	
Blue Alert	BLU.
* * * * *	

* * * * *

BILLING CODE 6712–01–P

Notices

Federal Register
Vol. 82, No. 125
Friday, June 30, 2017

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

June 27, 2017.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by July 31, 2017 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: Disaster Assistance—General (7 CFR part 1945–A).

OMB Control Number: 0560–0170.

Summary of Collection: The regulation at 7 CFR 759, defines the responsibilities of the Secretary of Agriculture in making disaster area determinations, the types of incidents that can result in a disaster area determination, and the factors used in making disaster area determinations. The determination of a disaster area is prerequisite to authorizing emergency (EM) loans to qualified farmers as outlined in 7 CFR 764. EM loan funds may be used to restore or replace essential property, pay all or part of production costs incurred by the farmer or rancher in the year of the disaster, pay for essential family living expenses, pay to reorganize the farming operation or refinance USDA and non-USDA creditors. The information collection occurs when the Secretary receives a letter from an individual farmer, local government officials, State Governor, State Agriculture Commissioners, State Secretaries of Agriculture, other State government officials, and Indian Tribal Council, requesting a Secretarial natural disaster determination. Supporting documentation of losses for all counties having disaster is provided by the County Emergency Boards in the form of a report entitled ''Loss Assessment Report'' (LAR).

Need and Use of the Information: The Farm Service Agency (FSA) will collect the following information to determine if the county is eligible to qualify for a natural disaster designation: (1) The nature and extent of production losses; (2) the number of farmers who have sustained qualifying production losses; and (3) the number of farmers that have sustained qualifying production losses that other lenders in the county have indicated that they will not be in a position to finance. The collection of information is necessary to determine whether the counties did sustain sufficient production losses to qualify for a natural disaster designation. The information will be used by FSA to process request for Secretarial natural disaster designations.

Description of Respondents: State, Local or Tribal Government.

Number of Respondents: 401.

Frequency of Responses: Reporting: On occasion; Annually.

Total Burden Hours: 214.

Farm Service Agency

Title: Customer Data Worksheet Request for Business Partner Record Change.

OMB Control Number: 0560–0265.

Summary of Collection: Core Customer Data is required in order to identify USDA program participants and ensure that benefits are directed to the correct customer and respective Tax Identification Numbers. USDA requires this data to ensure that customers can be validated and also to provide a necessary basis for pursuing legal remedies in the event of error or fraud. There is no public law regarding the use or collection of Core Customer Data. The option to document and track Core Customer Data changes is necessary to ensure the integrity of the data and to provide the Farm Service Agency (FSA), Natural Resources and Conservation Service and Rural Development a method of verifying the validity of the information, and provide a necessary basis for pursuing legal remedies when needed.

Need and Use of the Information: Core Customer Data is necessary to input customer information for identity purposes and to provide a point of contact for the respective customer and a valid Tax Identification Number to direct program benefits to. The AD–2047 will be used to document Corel Customer Data changes and also to provide a method to identify who made applicable changes and when this was done. Failure to collect and timely maintain the data collected will result in erroneous/out dated point of contact information, which could result in program information and benefits being directed to incorrect recipients.

Description of Respondents: Individuals or households; Business or other for-profit; Farms.

Number of Respondents: 56,926.

Frequency of Responses: Reporting: Other (when necessary).

Total Burden Hours: 9,678.

Ruth Brown,

Departmental Information Collection Clearance Officer.

[FR Doc. 2017–13747 Filed 6–29–17; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Determination of Total Amounts of Fiscal Year 2018 WTO Tariff-Rate Quotas for Raw Cane Sugar and Certain Sugars, Syrups and Molasses

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: The Office of the Secretary of the Department of Agriculture (the Secretary) announces the establishment of the Fiscal Year (FY) 2018 (October 1, 2017–September 30, 2018) in-quota aggregate quantity of raw cane sugar at 1,117,195 metric tons raw value (MTRV), and the establishment of the FY 2018 in-quota aggregate quantity of certain sugars, syrups, and molasses (also referred to as refined sugar) at 182,000 MTRV.

DATES: *Effective Date:* June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Souleymane Diaby, Import Policies and Export Reporting Division, Foreign Agricultural Service, Department of Agriculture, 1400 Independence Avenue SW., AgStop 1021, Washington, DC 20250–1021; by telephone (202) 720–2916; by fax (202) 720–0876; or by email *souleymane.diaby@fas.usda.gov*.

SUPPLEMENTARY INFORMATION: The provisions of paragraph (a)(i) of the Additional U.S. Note 5, Chapter 17 in the U.S. Harmonized Tariff Schedule (HTS) authorize the Secretary to establish the in-quota tariff-rate quota (TRQ) amounts (expressed in terms of raw value) for imports of raw cane sugar and certain sugars, syrups, and molasses that may be entered under the subheadings of the HTS subject to the lower tier of duties during each fiscal year. The Office of the U.S. Trade Representative (USTR) is responsible for the allocation of these quantities among supplying countries and areas.

Section 359(k) of the Agricultural Adjustment Act of 1938, as amended, requires that at the beginning of the quota year the Secretary of Agriculture establish the TRQs for raw cane sugar and refined sugars at the minimum levels necessary to comply with obligations under international trade agreements, with the exception of specialty sugar.

Notice is hereby given that I have determined, in accordance with paragraph (a)(i) of the Additional U.S. Note 5, Chapter 17 in the HTS and section 359(k) of the 1938 Act, that an aggregate quantity of up to 1,117,195 MTRV of raw cane sugar may be entered or withdrawn from warehouse for consumption during FY 2018. This is the minimum amount to which the United States is committed under the WTO Uruguay Round Agreements. I have further determined that an aggregate quantity of 182,000 MTRV of sugars, syrups, and molasses may be entered or withdrawn from warehouse for consumption during FY 2018. This quantity includes the minimum amount to which the United States is committed under the WTO Uruguay Round Agreements, 22,000 MTRV, of which 20,344 MTRV is established for any sugars, syrups and molasses, and 1,656 MTRV is reserved for specialty sugar. An additional amount of 160,000 MTRV is added to the specialty sugar TRQ for a total of 161,656 MTRV.

Because the specialty sugar TRQ is first-come, first-served, tranches are needed to allow for orderly marketing throughout the year. The FY 2018 specialty sugar TRQ will be opened in five tranches. The first tranche, totaling 1,656 MTRV, will open October 2, 2017. All specialty sugars are eligible for entry under this tranche. The second tranche will open on October 18, 2017, and be equal to 48,000 MTRV. The third tranche of 48,000 MTRV will open on January 23, 2018. The fourth and fifth tranches of 32,000 MTRV each will open on April 17, 2018, and July 17, 2018, respectively. The second, third, fourth, and fifth tranches will be reserved for organic sugar and other specialty sugars not currently produced commercially in the United States or reasonably available from domestic sources.

* Conversion factor: 1 metric ton = 1.10231125 short tons.

Dated: June 21, 2017.

Jason Hafemeister,

Acting Deputy Under Secretary, Trade and Foreign Agricultural Affairs.

Dated: June 22, 2017.

Robert Johansson,

Acting Under Secretary, Farm Production and Conservation.

BILLING CODE 3410–10–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0053]

Notice of Availability of an Evaluation of the Highly Pathogenic Avian Influenza and Newcastle Disease Status of Japan

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that we are proposing to recognize Japan as being free of highly pathogenic avian influenza and Newcastle disease. This proposed recognition is based on a risk evaluation we have prepared in connection with this action, which we are making available for review and comment.

DATES: We will consider all comments that we receive on or before July 31, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0053*.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2016–0053, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0053* or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: Dr. Kelly Rhodes, Senior Staff Veterinarian, Regionalization Evaluation Services, National Import Export Services, VS, APHIS, USDA, 4700 River Road, Unit 38, Riverdale, MD 20737–1231; *Kelly.Rhodes@aphis.usda.gov*; (301) 851–3315.

SUPPLEMENTARY INFORMATION:

The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States in order to prevent the introduction of various animal diseases, including highly pathogenic avian

influenza (HPAI) and Newcastle disease. Within part 94, § 94.6 contains requirements governing the importation of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from regions where HPAI and Newcastle disease is considered to exist.

In accordance with § 94.6(a)(1)(i) the Animal and Plant Health Inspection Service (APHIS) maintains a list of regions in which Newcastle disease is not considered to exist. Paragraph (a)(1)(ii) states that APHIS will add a region to this list after it conducts an evaluation of the region and finds that Newcastle disease is not likely to be present in its commercial bird or poultry populations.

In accordance with § 94.6(a)(2)(i), APHIS maintains a list of regions in which HPAI is considered to exist. Paragraph (a)(2)(ii) states that APHIS will remove a region from this list only after it conducts an evaluation of the region and finds that HPAI is not likely to be present in its commercial bird or poultry populations.

The regulations in 9 CFR part 92, § 92.2 contain requirements for requesting the recognition of the animal health status of a region (as well as for the approval of the export of a particular type of animal or animal product to the United States from a foreign region). If, after review and evaluation of the information submitted in support of the request, APHIS believes the request can be safely granted, APHIS will make its evaluation available for public comment through a document published in the **Federal Register**. Following the close of the comment period, APHIS will review all comments received and will make a final determination regarding the request that will be detailed in another document published in the **Federal Register**.

The Government of Japan has requested that APHIS evaluate the HPAI and Newcastle disease status of the country. In response to Japan's request, we have prepared an evaluation, titled ''APHIS Evaluation of the Highly Pathogenic Avian Influenza and Newcastle Disease Status of Japan'' (May 2017). Based on this evaluation, we have determined that Japan is free of both HPAI and Newcastle disease. APHIS has also determined that the surveillance, prevention, and control measures implemented by Japan are sufficient to minimize the likelihood of introducing HPAI and Newcastle disease into the United States via imports of species or products susceptible to these diseases. Our determination supports adding Japan to the Web-based list of regions in which Newcastle disease is not considered to exist and removing Japan from the Web-based list of regions in which HPAI is considered to exist.

Therefore, in accordance with § 92.2(e), we are announcing the availability of our risk evaluation of the HPAI and Newcastle disease status of Japan for public review and comment. We are also announcing the availability of an environmental assessment (EA) which has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provision of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). The evaluation and EA may be viewed on the *Regulations.gov* Web site or in our reading room. (Instructions for accessing *Regulations.gov* and information on the location and hours of the reading room are provided under the heading **ADDRESSES** at the beginning of this notice.) The documents are also available by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

Information submitted in support of Japan's request is available by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

After reviewing any comments we receive, we will announce our decision regarding the disease status of Japan with respect to HPAI and Newcastle disease in a subsequent notice.

Authority: 7 U.S.C. 450, 7701–7772, 7781–7786, and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 26th day of June 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2017–0048]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Importation of Animals and Poultry, Animal and Poultry Products, Certain Animal Embryos, Semen, and Zoological Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the importation of animals and poultry, animal and poultry products, certain animal embryos, semen, and zoological animals.

DATES: We will consider all comments that we receive on or before August 29, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0048.*
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2017–0048, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0048* or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the importation of animals and poultry, animal and poultry products, certain animal embryos, and zoological animals, contact Dr. Bettina Helm, Senior Staff Veterinarian, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737; (301) 851–3300. For copies of more detailed information on the information collection, contact

Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Animals and Poultry, Animal and Poultry Products, Certain Animal Embryos, Semen, and Zoological Animals.

OMB Control Number: 0579–0040.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) is authorized, among other things, to prohibit or restrict the importation of animals, animal products, and other articles into the United States to prevent the introduction of animal diseases and pests. Disease prevention is the most effective method for maintaining a healthy animal population and for enhancing APHIS' ability to compete in the world market of animal and animal product trade.

Among other things, APHIS' Veterinary Services is responsible for preventing the introduction of foreign or certain other communicable animal diseases into the United States and for rapidly identifying, containing, eradicating, or otherwise mitigating such diseases when feasible. In connection with this mission, APHIS collects information from individuals, businesses, and farms that are involved with importation of animals or poultry, animal or poultry products, or animal germplasm (semen, ooycysts, and embryos, including eggs for hatching) into the United States, as well as from foreign countries and States to support these imports. Some of the information collection activities include agreements, permits, application and space reservation requests, inspections, registers, declarations of importation, requests for hearings, daily logs, additional requirements, application for permits, export health certificates, letters, written notices, daily record of horse activities, written requests, opportunities to present views, reporting, applications for approval of facilities, certifications, arrival notices, on-hold shipment notifications, reports, affidavits, animal identification, written plans, checklists, specimen submissions, emergency action notifications, refusal of entry and order to dispose of fish, premises information, recordkeeping, and application of seals.

In addition, APHIS opens U.S. markets to animal commodities by receiving and evaluating information collection activities, such as requests for recognition of the animal health status of a region, applications for recognition of the animal health status of a region, applications for recognition of a region as historically free of a disease, requests for additional information about the region, appeal classification of animal health status, and written recommendation implementation from foreign animal health authorities seeking to engage in the regionalization process.

The information collection requirements above are currently approved by the Office of Management and Budget (OMB) under OMB control numbers 0579–0040 (Importation of Animals and Poultry, Animal and Poultry Products, Certain Animal Embryos, Semen, and Zoological Animals), 0579–0165 (Importation of Horses, Ruminants, Swine, and Dogs; Inspection and Treatment for Screwworm), 0579–0224 (Tuberculosis Testing of Imported Cattle from Mexico), 0579–0301 (Spring Viremia of Carp; Import Restrictions on Certain Live Fish, Fertilized Eggs, and Gametes), and 0579–0425 (Cattle Fever Tick; Importation Requirements for Ruminants from Mexico). After OMB approves this combined information collection package (0579–0040), APHIS will retire OMB control numbers 0579–0165, 0579–0224, 0579–0301, and 0579–0425.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.57 hours per response.

Respondents: Foreign animal health authorities; U.S. importers; foreign exporters; veterinarians and animal health technicians in other countries; State animal health authorities; shippers, owners and operators of foreign processing plants and farms; USDA-approved zoos, laboratories, and feedlots; private quarantine facilities; and other entities involved (directly or indirectly) in the importation of animals and poultry, animal and poultry products, zoological animals, and animal germplasm.

Estimated annual number of respondents: 8,412.

Estimated annual number of responses per respondent: 65.

Estimated annual number of responses: 545,020.

Estimated total annual burden on respondents: 313,843 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of June 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Alaska Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that a meeting of the Alaska Advisory Committee (Committee) to the Commission will be held at 2:00 p.m. (Alaska Time) Thursday, July 6, 2017. The purpose of the meeting is for the Committee to receive orientation from Commission staff and discussion regarding the status of the Committee project on voting rights.

DATES: The meeting will be held on Thursday, July 6, 2017, at 2:00 p.m. AKDT.

Public Call Information: Dial: 888–724–9513.

Conference ID: 7347511.

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes (DFO) at *afortes@usccr.gov* or (213) 894–3437.

SUPPLEMENTARY INFORMATION: This meeting is available to the public through the following toll-free call-in number: 888–724–9513, conference ID number: 7347511. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be mailed to the Western Regional Office, U.S. Commission on Civil Rights, 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012. They may be faxed to the Commission at (213) 894–0508, or emailed Ana Victoria Fortes at *afortes@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (213) 894–3437.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at *http://facadatabase.gov/committee/meetings.aspx?cid=234.*

Please click on the ''Meeting Details'' and ''Documents'' links. Records generated from this meeting may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's Web site, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

Agenda

I. Welcome
II. Update on Proposal—*Ana Fortes, DFO*
III. Update on Date and Location of In-Person Hearing
IV. Discussion on Potential Speakers for In-Person Hearing
V. Public Comment
VI. Next Steps
VII. Adjournment

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

First Responder Network Authority

[Docket Number: 160229154–6154–02]

RIN 0660–XC023

Notice of Availability of a Final Programmatic Environmental Impact Statement for the Non-Contiguous Region of the Nationwide Public Safety Broadband Network

AGENCY: First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of availability of a final programmatic environmental impact statement.

SUMMARY: The First Responder Network Authority (''FirstNet'') announces the availability of the Final Programmatic Environmental Impact Statement for the Non-Contiguous Region (''Final PEIS''). The Final PEIS evaluates the potential environmental impacts of the proposed nationwide public safety broadband network in the Non-Contiguous Region (Alaska, Hawaii, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands).

ADDRESSES: The Final PEIS is available for download from *www.regulations.gov* FIRSTNET–FPEIS–2017–0001. A CD of this document is also available for viewing at public libraries (see Chapter 16 of the Final PEIS for the complete distribution list).

FOR FURTHER INFORMATION CONTACT: For more information on the Final PEIS, contact Amanda Goebel Pereira, NEPA Coordinator, First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192.

SUPPLEMENTARY INFORMATION: The Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96, Title VI, 126 Stat. 256 (codified at 47 U.S.C. 1401 *et seq.*)) (the ''Act'') created and authorized FirstNet to take all actions necessary to ensure the building, deployment, and operation of an interoperable, nationwide public safety broadband network (''NPSBN'') based on a single, national network architecture. The Act meets a longstanding and critical national infrastructure need, to create a single, nationwide network that will, for the first time, allow police officers, fire fighters, emergency medical service professionals, and other public safety entities to effectively communicate with each other across agencies and jurisdictions. The NPSBN is intended to enhance the ability of the public safety community to perform more reliably, effectively, and safely; increase situational awareness during an emergency; and improve the ability of the public safety community to effectively engage in those critical activities.

The National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347) (''NEPA'') requires federal agencies to undertake an assessment of environmental effects of their proposed actions prior to making a final decision and implementing the action. NEPA requirements apply to any federal project, decision, or action that may have a significant impact on the quality of the human environment. NEPA also establishes the Council on Environmental Quality (''CEQ''), which issued regulations implementing the procedural provisions of NEPA (see 40 CFR parts 1500–1508). Among other considerations, CEQ regulations at 40 CFR 1508.28 recommend the use of *tiering* from a ''broader environmental impact statement (such as a national program or policy statements) with subsequent narrower statements or environmental analysis (such as regional or basin wide statements or ultimately site-specific statements) incorporating by reference the general discussions and concentrating solely on the issues specific to the statement subsequently prepared.''

Due to the geographic scope of FirstNet (all 50 states, the District of Columbia, and five territories) and the diversity of ecosystems potentially traversed by the project, FirstNet has elected to prepare five regional PEISs. The five PEISs are divided into the East, Central, West, South, and Non-Contiguous Regions. The Non-Contiguous Region consists of Alaska, Hawaii, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. The Final PEIS analyzes potential impacts of the deployment and operation of the NPSBN on the natural and human environment in the Non-Contiguous

Region, in accordance with FirstNet's responsibilities under NEPA.

Now that this PEIS has been completed and once a Record of Decision (ROD) has been signed, the proposed FirstNet projects can begin to submit the site-specific environmental documentation to determine if the proposed project has been adequately evaluated in the PEIS or whether it instead warrants a Categorical Exclusion, an Environmental Assessment, or an Environmental Impact Statement.

Dated: June 27, 2017.

Amanda Goebel Pereira,

NEPA Coordinator, First Responder Network Authority.

BILLING CODE 3510–60–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–469–805]

Stainless Steel Bar From Spain: Final Results of Antidumping Duty Administrative Review; 2015–2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On March 3, 2017, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on stainless steel bar (SSB) from Spain. The period of review (POR) is March 1, 2015, through February 29, 2016. The review covers one producer/exporter of the subject merchandise, Gerdau Aceros Especiales Europa, S.L. (Gerdau).

DATES: Effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Ryan Mullen or Ian Hamilton, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–5260 or (202) 482–4798, respectively.

Scope of the Order

The merchandise covered by the order is SSB products. The merchandise subject to this order is currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 7222.10.00, 7222.11.00, 7222.19.00, 7222.20.00, and 7222.30.00. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.[1]

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties to this administrative review are addressed in the Issues and Decision Memorandum.[2] A list of the issues that parties raised and to which we responded is attached to this notice as an Appendix. The Issues and Decision Memorandum is a public document and is on-file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov* and in the Central Records Unit (CRU), room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/index.html.* The signed Issues and Decision Memorandum and the electronic versions of the Issues and Decision Memorandum are identical in content.

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties, we have not made changes to the *Preliminary Results.* Because mandatory respondent Gerdau has failed to provide requested information, we will continue to apply adverse facts available (AFA) to this respondent, in accordance with sections 776(a) and (b) of the Act and 19 CFR 351.308. For further discussion, *see* the Issues and Decision Memorandum.

Final Results of the Review

We determine that, for the period of March 1, 2015, through February 29, 2016, the following weighted-average dumping margin exists:

Exporter/producer	Weighted-average dumping margin (percent)
Gerdau Aceros Especiales Europa, S.L.	62.85

[1] The HTSUS numbers provided in the scope changed since the publication of the order. *See Amended Final Determination and Antidumping Duty Order: Stainless Steel Bar from Spain,* 60 FR 11656 (March 2, 1995).

[2] *See* Memorandum, ''Certain Stainless Steel Bar from Spain: Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review; 2015–2016,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

Duty Assessment

The Department shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries covered by this review.

In accordance with the Department's ''automatic assessment'' practice, for entries of subject merchandise during the POR produced by Gerdau for which it did not know that the merchandise was destined for the United States, we will instruct CBP to liquidate those entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

We intend to issue instructions to CBP 15 days after the publication date of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for Gerdau will be the rate established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the producer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 25.77 percent, the all-others rate established in the investigation.[3] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement

[3] *See Notice of Final Determination of Sales at Less Than Fair Value: Stainless Steel Bar from Spain,* 59 FR 66931 (December 28, 1994).

could result in the Secretary's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(h).

Dated: June 26, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Certain Hardwood Plywood Products From the People's Republic of China: Postponement of Final Determination of Sales at Less Than Fair Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is postponing the deadline for issuing the final determination in the less-than-fair-value (LTFV) investigation of certain hardwood plywood products (hardwood plywood) from the People's Republic of China (PRC) until November 6, 2017, and is extending the provisional measures from a four-month period to a period of not more than six months.

DATES: Effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Ryan Mullen or Amanda Brings, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–5260 or (202) 482–3927, respectively.

SUPPLEMENTARY INFORMATION:

Background

On December 8, 2016, the Department of Commerce (the Department) initiated a LTFV investigation of imports of hardwood plywood from the PRC.[1] The period of investigation is April 1, 2016, through September 30, 2016. On June 23, 2017, the Department published its *Preliminary Determination* in this LTFV investigation of hardwood plywood from the PRC.[2]

Postponement of Final Determination

Section 735(a)(2) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(b)(2) provide that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by the exporters or producers who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioners. Further, 19 CFR 351.210(e)(2) requires that such postponement requests by exporters be accompanied by a request for extension of provisional measures from a four-month period to a period of not more than six months, in accordance with section 733(d) of the Act.

On June 14, 2017, Linyi Chengen Import And Export Co., Ltd. and Shandong Dongfang Bayley Wood Co., Ltd., the mandatory respondents in this investigation, requested that the Department fully extend the deadline for the final determination, and extend the application of the provisional measures from a four-month period to a period of not more than six months.[3]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination was affirmative; (2) the request was made by the exporters and producers who account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, the Department is postponing the final determination until no later than 135 days after the date of the publication of the *Preliminary Determination,* and extending the provisional measures from a four-month period to a period of not more than six months. Accordingly, the Department will issue its final determination no later than November 6, 2017.[4]

This notice is issued and published pursuant to 19 CFR 351.210(g).

Dated: June 26, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

[2] *See Certain Hardwood Plywood Products from the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Affirmative Determination of Critical Circumstances, in Part,* 82 FR 28629 (June 23, 2017) (*Preliminary Determination*).

[3] *See* Letter from Linyi Chengen Import And Export Co., Ltd. and Shandong Dongfang Bayley Wood Co., Ltd., ''Hardwood Plywood Products from the People's Republic of China: Request for Extension of Final Determination,'' dated June 14, 2017.

[4] Postponing the final determination to 135 days after the publication of the *Preliminary Determination* would place the deadline on Sunday, November 5, 2017. The Department's practice dictates that where a deadline falls on a weekend or federal holiday, the appropriate deadline is the next business day. *See Notice of Clarification: Application of ''Next Business Day'' Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended,* 70 FR 24533 (May 10, 2005).

certain welded stainless steel pipe from South Korea and Taiwan would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States. Therefore, the Department is publishing a notice of continuation for these AD orders.

DATES: June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–5255.

SUPPLEMENTARY INFORMATION:

Background

On December 30, 1992, the Department of Commerce (the Department) published the antidumping duty orders on welded ASTM A–312 stainless steel pipe (WSSP) from South Korea and Taiwan. On November 1, 2016, the Department published a notice of initiation of its fourth five-year (sunset) reviews of the antidumping duty orders on welded ASTM A–312 stainless steel pipe from South Korea and Taiwan.[1]

As a result of these sunset reviews, the Department determined that revocation of the AD orders on WSSP from South Korea and Taiwan would likely lead to continuation or recurrence of dumping, and therefore, notified the U.S. International Trade Commission (ITC) of the magnitude of the margins likely to prevail should these orders be revoked.[2]

On May 17, 2017, the ITC published its determination that revocation of the AD orders on WSSP from South Korea and Taiwan would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time, pursuant to section 751(C) of the Act.[3]

Scope of the Orders

The merchandise subject to the antidumping duty orders is welded austenitic stainless steel pipe that meets the standards and specifications set forth by the American Society for Testing and Materials (ASTM) for the welded form of chromium-nickel pipe designated ASTM A–312. The merchandise covered by the scope of the orders also includes austenitic welded stainless steel pipes made according to the standards of other nations which are comparable to ASTM A–312.

WSSP is produced by forming stainless steel flat-rolled products into a tubular configuration and welding along the seam. WSSP is a commodity product generally used as a conduit to transmit liquids or gases. Major applications for steel pipe include, but are not limited to, digester lines, blow lines, pharmaceutical lines, petrochemical stock lines, brewery process and transport lines, general food processing lines, automotive paint lines, and paper process machines. Imports of WSSP are currently classifiable under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 7306.40.5005, 7306.40.5015, 7306.40.5040, 7306.40.5062, 7306.40.5064, and 7306.40.5085.[4] Although these subheadings include both pipes and tubes, the scope of the antidumping duty orders is limited to welded austenitic stainless steel pipes. The HTSUS subheadings are provided for convenience and customs purposes. However, the written description of the scope of the orders is dispositive.

Continuation of the Orders

As a result of the determinations by the Department and the ITC that revocation of the antidumping duty orders would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the antidumping duty orders on welded ASTM A–312 stainless steel pipe from South Korea and Taiwan.

U.S. Customs and Border Protection will continue to collect antidumping duty cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of these orders will be the date of publication in the **Federal Register** of the notice of continuation of the antidumping duty orders on WSSP from Korea and Taiwan. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the sunset reviews of these orders not later than 30 days prior to the fifth anniversary of the effective date of continuation.

These sunset reviews and this notice are in accordance with section 751(c) of the Act and published pursuant to section 777(i)(1) of the Act.

Dated: June 27, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Citric Acid and Certain Citrate Salts From Belgium, Colombia, and Thailand: Initiation of Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective June 22, 2017.

FOR FURTHER INFORMATION CONTACT: Paul Stolz at (202) 482–4474 (Belgium); Stephanie Moore at (202) 482–3692 (Colombia); and George McMahon at (202) 482–1167 (Thailand), AD/CVD Operations, Enforcement and Compliance, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On June 2, 2017, the Department of Commerce (the Department) received antidumping duty (AD) petitions (the Petitions) concerning imports of citric acid and certain citrate salts (citric acid) from Belgium, Colombia, and Thailand, filed in proper form on behalf of Archer Daniels Midland Company (ADM); Cargill Incorporated (Cargill); and Tate & Lyle Ingredients America LLC (Tate & Lyle) (collectively, the petitioners).[1] The Petitions were accompanied by a countervailing duty (CVD) petition concerning citric acid from Thailand.[2] The petitioners are domestic producers of citric acid.[3]

On June 7, 12, 14, and 16, 2017, the Department requested additional information and clarification of certain areas of the Petitions.[4] The petitioners

[1] *See* ''Petitions for the Imposition of Antidumping and Countervailing Duties on Citric Acid and Certain Citrate Salts from Belgium, Colombia, and Thailand,'', dated June 2, 2017 (the Petitions).

[2] *Id.*

[3] *See* Volume I of the Petitions, at 2.

[4] *See* Country-specific letters to the petitioners from the Department concerning supplemental

filed responses to these requests on June 9, 14, 15, and 16, 2017, respectively.[5]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), the petitioners allege that imports of citric acid and certain citrate salts from Belgium, Colombia, and Thailand, are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that such imports are materially injuring, or threatening material injury to, an industry in the United States. Also, consistent with section 732(b)(1) of the Act, the Petitions are accompanied by information reasonably available to the petitioners supporting their allegations.

The Department finds that the petitioners filed these Petitions on behalf of the domestic industry because the petitioners are interested parties as defined in section 771(9)(C) of the Act. The Department also finds that the petitioners demonstrated sufficient industry support with respect to the initiation of the AD investigations that the petitioners are requesting.[6]

Period of Investigation

Because the Petitions were filed on June 2, 2017, the period of investigation (POI) for each investigation is April 1, 2016, through March 31, 2017.[7]

Scope of the Investigations

The product covered by these investigations is citric acid and certain citrate salts from Belgium, Colombia, and Thailand. For a full description of the scope of these investigations, *see* the ''Scope of the Investigations,'' in the Appendix to this notice.

Comments on Scope of the Investigations

During our review of the Petitions, the Department issued questions to, and received responses from, the petitioners pertaining to the proposed scope to ensure that the scope language in the Petitions would be an accurate reflection of the products for which the domestic industry is seeking relief.[8]

As discussed in the preamble to the Department's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determinations. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on July 12, 2017, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information (also limited to public information), must be filed by 5:00 p.m. ET on July 24, 2017, which is the next business day after 10 calendar days after the initial comments. All such comments must be filed on the records of each of the concurrent AD and CVD investigations.

The Department requests that any factual information the parties consider relevant to the scope of the investigations be submitted during this time period. However, if a party subsequently believes that additional factual information pertaining to the scope of the investigations may be relevant, the party may contact the Department and request permission to submit the additional information. As stated above, all such comments must be filed on the records of each of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to the Department must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).[9] An electronically filed document must be received successfully in its entirety by the time and date when it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Comments on Product Characteristics for AD Questionnaires

The Department will provide interested parties an opportunity to comment on the appropriate physical characteristics of citric acid to be reported in response to the Department's AD questionnaires. This information will be used to identify the key physical characteristics of the merchandise under consideration in order to report the relevant costs of production accurately as well as to develop appropriate product-comparison criteria.

Interested parties may provide any information or comments that they feel are relevant to the development of an accurate list of physical characteristics. Specifically, they may provide comments as to which characteristics are appropriate to use as: (1) General product characteristics and (2) product-comparison criteria. We note that it is not always appropriate to use all product characteristics as product-comparison criteria. We base product-comparison criteria on meaningful commercial differences among products. In other words, although there may be some physical product characteristics utilized by manufacturers to describe citric acid, it may be that only a select few product characteristics take into account commercially meaningful physical characteristics. In addition, interested parties may comment on the order in which the physical characteristics should be used in matching products. Generally, the Department attempts to list the most important physical characteristics first and the least important characteristics last.

In order to consider the suggestions of interested parties in developing and issuing the AD questionnaires, all product characteristics comments must be filed by 5:00 p.m. ET on July 12, 2017, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, must be filed by 5:00 p.m. ET on July 24, 2017. All comments and submissions to the Department must be filed electronically using ACCESS, as explained above, on the records of the Belgium, Colombia, and Thailand less-than-fair-value investigations.

Determination of Industry Support for the Petitions

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers, as a whole, of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[10] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[11]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petitions).

With regard to the domestic like product, the petitioners do not offer a definition of the domestic like product distinct from the scope of the investigations. Based on our analysis of the information submitted on the record, we have determined that citric acid, as defined in the scope, constitutes a single domestic like product and we have analyzed industry support in terms of that domestic like product.[12]

In determining whether the petitioners have standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petitions with reference to the domestic like product as defined in the ''Scope of the Investigations,'' in the Appendix to this notice. To establish industry support, the petitioners provided their own production of the domestic like product in 2016.[13] The petitioners state that they represent the totality of the domestic industry producing citric acid; therefore, the Petitions are supported by 100 percent of the U.S. industry.[14]

Our review of the data provided in the Petitions, the General Issues Supplement, and other information readily available to the Department indicates that the petitioners have established industry support for the Petitions.[15] First, the Petitions established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.,* polling).[16] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petitions account for at least 25 percent of the total production of the domestic like product.[17] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petitions account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petitions.[18] Accordingly, the Department determines that the Petitions were filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.

The Department finds that the petitioners filed the Petitions on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) of the Act and they have demonstrated sufficient industry support with respect to the AD investigations that they are requesting that the Department initiate.[19]

Allegations and Evidence of Material Injury and Causation

The petitioners allege that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at less than normal value (NV). In addition, the petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[20]

The petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price suppression or depression; lost sales and revenues; adverse impact on the domestic industry's production, capacity utilization, and U.S. shipments; and declines in financial performance.[21] We have assessed the allegations and supporting evidence regarding material

injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[22]

Allegations of Sales at Less Than Fair Value

The following is a description of the allegations of sales at less than fair value upon which the Department based its decision to initiate investigations of imports of citric acid from Belgium, Colombia and Thailand. The sources of data for the deductions and adjustments relating to U.S. price and NV are discussed in greater detail in the country-specific initiation checklists.[23]

Export Price

For Belgium, Colombia, and Thailand, the petitioners based export price (EP) on two methodologies: (1) POI average unit values (AUVs), and (2) transaction-specific AUVs for shipments of citric acid from the three countries. The first uses official U.S. import statistics to determine the AUV of imports of citric acid under the relevant Harmonized Tariff Schedule of the United States (HTSUS) subheading during the POI. The second involves matching individual shipments of goods identified in the U.S. Customs and Border Protection's (CBP's) Automated Manifest System (AMS) to individual entries of citric acid in the official U.S. import statistics for specific months and specific ports.[24] Because the AUVs are based on the reported customs values and include freight and brokerage and handling to the port of exportation, the petitioners adjusted the customs values for foreign brokerage and handling and foreign inland freight costs to arrive at an ex-factory price.[25]

Normal Value Based on Home Market Prices

For Belgium, Colombia, and Thailand, the petitioners provided home market price information obtained through market research for citric acid produced in, and offered for sale in, each of these countries.[26] For all three of these countries, the petitioners provided a declaration from a market researcher for the price information.[27] Where applicable, the petitioners made certain deductions from the prices for movement or other expenses, consistent with the terms of sale.[28]

For Belgium and Thailand, the petitioners provided information indicating that sales of citric acid in the home market were made at prices below the cost of production (COP) and, as a result, calculated NV based on constructed value (CV).[29] [30] For further discussion of COP and NV based on CV, see below.

Normal Value Based on Constructed Value

Pursuant to section 773(b)(3) of the Act, COP consists of the cost of manufacturing (COM); selling, general and administrative (SG&A) expenses; financial expenses; and packing expenses.

For Belgium, the petitioners calculated COM during the POI, adjusted for known differences based on information available to the petitioners.[31] The petitioners valued material inputs using publicly available data for the prices of these inputs, where possible.[32] The petitioners valued labor inputs for citric acid using publicly-available data multiplied by the product-specific usage rates.[33] To calculate the factory overhead rate, the petitioners relied on the fiscal year end (FYE) December 31, 2015, audited financial statements of Belgian citric acid producer, S.A. Citrique Belge N.V. (Citrique Belge).[34] To calculate the SG&A plus financial expense rate, the petitioners also relied on the FYE December 31, 2015, audited financial statements of Citrique Belge.[35]

Because certain home market prices fell below COP, pursuant to sections 773(a)(4), 773(b), and 773(e) of the Act, as noted above, the petitioners calculated NVs based on CV.[36] Pursuant to section 773(e) of the Act, CV consists of the COM, SG&A, financial expenses, packing expenses, and profit. The petitioners calculated CV using the same COP described above, adding an amount for profit.[37] The petitioners calculated the profit rate based on the fiscal year 2016 financial statements of one of the U.S. citric acid producers.[38] The profit rate was applied to the corresponding total COM, SG&A, and financial expenses calculated above to derive CV.[39]

For Thailand, the petitioners calculated COM using the same surrogate as was used for Belgium during the POI, adjusted for known differences based on information available to the petitioners.[40] The petitioners valued material inputs using publicly available data for the prices of these inputs, where possible. The petitioners valued labor and energy inputs for citric acid using publicly available data multiplied by the product-specific usage rates.[41] To calculate the SG&A plus financial expense rate, the petitioners relied on the FYE December 31, 2015, audited financial statements for COFCO Biochemical (Thailand) Co., Ltd. (COFCO), Niran Thailand Co., Ltd. (Niran), Sunshine Biotech International Co., Ltd. (Sunshine), and Thai Citric Acid Co., Ltd. (Thai Citric). The rate was computed based on the FYE December 31, 2015, SG&A (including other income and expenses), plus financial and investment income and financial costs.[42] Because none of the four companies' financial statements contained any factory overhead detail, the petitioners relied on the audited financial statements for Ajinomoto Company (Thailand) Ltd. (Ajinomoto) for the fiscal year 2015–2016, *i.e.,* April 2015 through March 2016. Ajinomoto is a producer of lysine and monosodium glutamate, both of which are bio-fermentation products produced using processes similar to those used for citric acid production.[43]

[41] *Id.*

[42] *Id.*

[43] *Id.*

Because certain home market prices fell below COP, pursuant to sections 773(a)(4), 773(b), and 773(e) of the Act, as noted above, the petitioners also calculated NV based on CV.[44] Pursuant to section 773(e) of the Act, CV consists of the COM, SG&A, financial expenses, packing expenses, and profit. To calculate CV, we used the same COM calculated by the petitioners, plus the revised SG&A, and financial expense figures to compute the COP.[45] To calculate the profit rate, we relied on the 2015 financial statements for a Thai producer which was then applied to the total of material, labor and energy (MLE), factory overhead costs, SG&A and financial expenses.[46]

Fair Value Comparisons

Based on the data provided by the petitioners, there is reason to believe that imports of citric acid from Belgium, Colombia, and Thailand are being, or are likely to be, sold in the United States at less than fair value. Based on comparisons of EP to NV, in accordance with sections 772 and 773(a) of the Act, the estimated dumping margin(s) for citric acid are as follows: 41.18 to 49.46 percent for Colombia,[47] and 4.6 percent to 40.0 percent for Thailand.[48] Based on comparisons of EP to CV in accordance with sections 772 and 773(e) of the Act, the estimated dumping margins are as follows: 15.80 percent to 62.13 percent for Belgium,[49] and 15.18 percent to 39.98 percent for Thailand.[50]

Initiation of Less-Than-Fair-Value Investigations

Based upon the examination of the AD Petitions, we find that the Petitions meet the requirements of section 732 of the Act. Therefore, we are initiating AD investigations to determine whether imports of citric acid from Belgium, Colombia, and Thailand are being, or are likely to be, sold in the United States at less than fair value. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 140 days after the date of this initiation.

Respondent Selection

Based on information from independent sources, the petitioners identified one company in Belgium, one company in Colombia, and four companies in Thailand, as producers/exporters of citric acid.[51] With respect to Thailand, following standard practice in AD investigations involving market-economy countries, the Department intends to review U.S. Customs and Border Protection (CBP) data for U.S. imports under the appropriate HTSUS numbers listed with the ''Scope of the Investigations,'' in the Appendix below. If it determines that, due to the large number of exporters or producers, it cannot individually examine each company based upon the Department's resources, then the Department will select respondents based on the CBP data. We also intend to release the CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO. Comments regarding the CBP data and respondent selection should be submitted seven calendar days after the placement of the CBP data on the record of the investigation. Parties wishing to submit rebuttal comments should submit those comments five calendar days after the deadline for the initial comments.

Although the Department normally relies on the number of producers/exporters identified in the petition and/or import data from CBP to determine whether to select a limited number of producers/exporters for individual examination in AD investigations, the Petitions identified only one company as a producer/exporter of citric acid in Belgium, Citrique Belge,[52] and one company in Colombia, Sucroal, S.A.[53] We currently know of no additional producers/exporters of merchandise under consideration from these countries, and the petitioners provided information from independent sources as support.[54] Accordingly, the Department intends to examine all known producers/exporters in the investigations for Belgium and Colombia (*i.e.,* the companies cited above for each respective investigation). Parties wishing to comment on respondent selection for Belgium and Colombia must do so within five days of the publication of this notice in the **Federal Register**.

Comments for the above-referenced investigations must be filed electronically using ACCESS. An electronically-filed document must be received successfully in its entirety by 5:00 p.m. ET by the dates noted above. We intend to finalize our decision regarding respondent selection within 20 days of publication of this notice.

Distribution of Copies of the Petitions

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), copies of the public version of the Petitions have been provided to the governments of Belgium, Colombia, and Thailand via ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petitions to each exporter (as named in the Petitions), consistent with 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petitions were filed, whether there is a reasonable indication that imports of citric acid from Belgium, Colombia, and/or Thailand are materially injuring or threatening material injury to a U.S. industry.[55] A negative ITC determination for any country will result in the investigation being terminated with respect to that country.[56] Otherwise, these investigations will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). Any party, when submitting factual information, must specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Parties should review the regulations prior to

submitting factual information in these investigations.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under Part 351, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in these investigations.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[57] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule.*[58] The Department intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

[57] *See* section 782(b) of the Act.

[58] *See Certification of Factual Information to Import Administration during Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (*Final Rule*); *see also* frequently asked questions regarding the *Final Rule,* available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in these investigations should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed in 19 CFR 351.103(d)).

This notice is issued and published pursuant to section 777(i) of the Act and 19 CFR 351.203(c).

Dated: June 22, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix—Scope of the Investigations

The merchandise covered by these investigations includes all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. The scope also includes blends of citric acid, sodium citrate, and potassium citrate; as well as blends with other ingredients, such as sugar, where the unblended form(s) of citric acid, sodium citrate, and potassium citrate constitute 40 percent or more, by weight, of the blend.

The scope also includes all forms of crude calcium citrate, including dicalcium citrate monohydrate, and tricalcium citrate tetrahydrate, which are intermediate products in the production of citric acid, sodium citrate, and potassium citrate.

The scope includes the hydrous and anhydrous forms of citric acid, the dihydrate and anhydrous forms of sodium citrate, otherwise known as citric acid sodium salt, and the monohydrate and monopotassium forms of potassium citrate. Sodium citrate also includes both trisodium citrate and monosodium citrate which are also known as citric acid trisodium salt and citric acid monosodium salt, respectively.

The scope does not include calcium citrate that satisfies the standards set forth in the United States Pharmacopeia and has been mixed with a functional excipient, such as dextrose or starch, where the excipient constitutes at least 2 percent, by weight, of the product.

Citric acid and sodium citrate are classifiable under 2918.14.0000 and 2918.15.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), respectively. Potassium citrate and crude calcium citrate are classifiable under 2918.15.5000 and, if included in a mixture or blend, 3824.99.9295 of the HTSUS. Blends that include citric acid, sodium citrate, and potassium citrate are classifiable under 3824.99.9295 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Certain Softwood Lumber Products From Canada: Preliminary Affirmative Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain softwood lumber products (softwood lumber) from Canada is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2015, through September 30, 2016.

DATES: Effective June 30, 2017.

FOR FURTHER INFORMATION CONTACT: Stephen Bailey or Thomas Martin, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0193 or (202) 482–3936, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). The Department published the notice of initiation of this investigation on December 22, 2016.[1] On April 14, 2017, the Department postponed the preliminary determination of this investigation and the revised deadline is now June 23, 2017.[2] On April 13, 2017, the Department preliminarily determined that critical circumstances exist.[3] For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary

Decision Memorandum.[4] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is softwood lumber from Canada. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to the Department's regulations,[5] the *Initiation Notice* set aside a period of time for interested parties to raise issues regarding product coverage (*i.e.,* scope).[6] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Scope Decision.[7] The Department is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice. Furthermore, the Department has proposed additional changes to the scope language and has invited further input from the interested parties.[8] Finally, the Department has responded to the Committee Overseeing Action for Lumber International Trade Investigations or Negotiations' (the petitioner's) request to amend the petition to exclude Atlantic Lumber Board (ALB)-certified lumber from the scope of the antidumping and countervailing duty (CVD) investigations.[9]

Particular Market Situation (PMS) Allegation

On May 15, 2017, the petitioner alleged that certain particular market situations exist within the Canadian lumber industry.[10] The petitioner's PMS allegation asserts that the Government of Canada (GOC) increased the demand for lumber byproducts by establishing and supporting bioenergy, electricity and stumpage programs. The petitioner alleges that the demand created by these programs caused an increase in the production of byproducts, which, in turn, increased the production of lumber. The petitioner asserts that the only remedy for addressing the distortion to the cost of production (COP) caused by the GOC's interventions is to deny the byproduct offset to COP claimed by the respondents.

Specifically, regarding bioenergy programs, the petitioner alleges that the GOC has increased the demand for lumber byproducts by encouraging the development of energy from biomass, including wood chips from lumber. Regarding electricity, the petitioner alleges that the GOC has instituted certain energy initiatives that allow sawmills and consumers of lumber byproducts to either reduce or offset their electricity costs. The petitioner alleges these actions have decreased the electricity costs associated with producing lumber and lumber byproducts, which, in turn, distorts the COP of lumber producers. For stumpage, the petitioner alleges that lumber producers are able to obtain a steady supply of subsidized logs, which then enables them to meet the increased demand for byproducts.

The Department finds that the petitioner's presentation and discussion of the bioenergy, electricity and stumpage programs promoted by the GOC, substantiates the petitioner's allegations that such interventions and subsidies may have distorted the byproduct market and consequently the COP of lumber producers. The Department intends to further investigate and analyze the alleged distortions to COP raised by the petitioner in its PMS allegation. We intend to issue a schedule to provide deadlines for interested parties to submit further factual information related to the PMS allegation. We also intend to issue a supplemental questionnaire to all interested parties to obtain additional information to aid us in the analysis of the petitioner's PMS allegation. For further discussion of this matter, refer to the PMS Allegation Memorandum.[11]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. The Department has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances, in Part

As explained above, on April 13, 2017, the Department preliminarily determined that critical circumstances exist for all-others and do not exist for Canfor, Resolute, Tolko, and West Fraser. For a full description of the methodology and results of the Department's critical circumstances analysis, *see* the *Preliminary Critical Circumstances Determinations.*

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination the Department shall determine an

[6] *See Initiation Notice.*

[7] *See* Memorandum, ''Certain Softwood Lumber Products from Canada: Scope Decision,'' dated concurrently with this preliminary determination (Scope Decision).

[8] *Id.*

[9] *See* Memorandum, ''Decision Memorandum for Exclusion of Certain Softwood Lumber Products Certified By the Atlantic Lumber Board in the Antidumping Duty and Countervailing Duty Investigations of Certain Softwood Lumber Products from Canada,'' dated June 23, 2017 (ALB Decision Memorandum) where the Department preliminarily excluded from the scope softwood lumber products certified by the ALB as being first produced in the Provinces of Newfoundland and Labrador, Nova Scotia, or Prince Edward Island from logs harvested in these three provinces. However, as noted in the ALB Decision Memorandum, U.S. Customs and Border Protection (CBP) has not yet begun collecting ALB certifications, and the Department needs assurance that CBP will have a system in place to collect the certifications before we permit these products to be excluded. Thus, CBP will continue to suspend liquidation of entries of merchandise subject to the CVD investigation, and we will instruct CBP to begin suspension of liquidation of merchandise subject to this investigation. If there are no changes to the preliminary decision to exclude this merchandise, at the final determination, the Department will instruct CBP to stop suspension of liquidation of the merchandise subject to the exclusion and to refund cash deposits.

[10] *See* Letter from the petitioner to the Secretary, regarding ''Certain Softwood Lumber Products from Canada: Particular Market Situation Regarding Respondents' Cost of Production,'' dated May 15, 2017 (PMS allegation).

[11] *See* Memorandum, ''Less-Than-Fair-Value Investigation of Certain Softwood Lumber Products from Canada: Particular Market Situation Allegation,'' dated concurrently with this memorandum (PMS Allegation Memorandum).

estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, the Department calculated estimated weighted-average dumping margins for Canfor, Resolute, Tolko, and West Fraser, none of which are zero, *de minimis,* or based entirely on facts otherwise available. The Department calculated the all-others' rate using a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's business proprietary data for the merchandise under consideration.[12]

Preliminary Determination

The Department preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margins (percent)
Canfor Corporation, Canadian Forest Products Ltd., and Canfor Wood Products Marketing Ltd[13]	7.72
Resolute FP Canada Inc[14]	4.59
Tolko Marketing and Sales Ltd. and Tolko Industries Ltd[15]	7.53
West Fraser Mills Ltd[16]	6.76
All-Others	6.87

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, the Department will direct CBP to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), the Department will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published. As discussed in *Preliminary Critical Circumstances Determinations,* the Department preliminarily found that critical circumstances exist for imports of subject merchandise shipped by the companies subject to the all-others rate. In accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to unliquidated entries of shipments of subject merchandise from companies subject to the all-others rate that were entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

Disclosure

The Department intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, the Department intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[17] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

[12] For a complete analysis of the data, please *see* the All-Others Calculation Memorandum dated concurrently with this notice.

[13] The Department preliminarily determines that Canfor, Canadian Forest Products Ltd., and Canfor Wood Products Marketing Ltd. are a single entity. *See* Memorandum, ''Antidumping Duty Investigation of Certain Softwood Lumber from Canada: Tolko Industries Ltd. and Tolko Marketing and Sales Ltd. Preliminary Affiliation and Collapsing Memorandum,'' dated June 23, 2017.

[14] The Department preliminarily determines that Resolute and Resolute Growth Canada Inc. (Resolute Growth), Abitibi-LP Engineered Wood Inc. (Abitibi-LP), Abitibi-LP Engineered Wood II Inc. (Abitibi-LP II), Forest Products Mauricie LP (Mauricie), Produits Forestiers Petit-Paris Inc. (Petit-Paris), Société en commandite Scierie Opitciwan (Opitciwan), 9265–7030 Québec Inc. (9265–7030 Inc.), are a single entity. *See* Memorandum, ''Antidumping Duty Investigation of Certain Softwood Lumber from Canada: Resolute FP Canada Inc. Preliminary Affiliation and Collapsing Memorandum,'' dated June 23, 2017.

[15] The Department preliminarily determines that Tolko and Gilbert Smith Forest Products Ltd. are a single entity. *See* Memorandum, ''Antidumping Duty Investigation of Certain Softwood Lumber from Canada: Tolko Industries Ltd. and Tolko Marketing and Sales Ltd. Preliminary Affiliation and Collapsing Memorandum,'' dated June 23, 2017.

[16] The Department preliminarily determines that West Fraser and Blue Ridge Lumber Inc. (Blue Ridge), Manning Forest Products Ltd. (Manning), and Sundre Forest Products Inc. (Sundre) are a single entity. *See* Memorandum, ''Antidumping Duty Investigation of Certain Softwood Lumber from Canada: West Fraser Mills Ltd. Preliminary Affiliation and Collapsing Memorandum,'' dated June 23, 2017.

[17] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

In accordance with section 733(f) of the Act, the Department intends to notify the International Trade Commission (ITC) of its preliminary affirmative determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

We intend to issue and publish this notice in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: June 23, 2017.

Ronald Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is softwood lumber, siding, flooring and certain other coniferous wood (softwood lumber products). The scope includes:

- Coniferous wood, sawn, or chipped lengthwise, sliced or peeled, whether or not planed, whether or not sanded, or whether or not finger-jointed, of an actual thickness exceeding six millimeters.
- Coniferous wood siding, flooring, and other coniferous wood (other than moldings and dowel rods), including strips and friezes for parquet flooring, that is continuously shaped (including, but not limited to, tongued, grooved, rebated, chamfered, V-jointed, beaded, molded, rounded) along any of its edges, ends, or faces, whether or not planed, whether or not sanded, or whether or not end-jointed.
- Coniferous drilled and notched lumber and angle cut lumber.
- Coniferous lumber stacked on edge and fastened together with nails, whether or not with plywood sheathing.
- Components or parts of semi-finished or unassembled finished products made from subject merchandise that would otherwise meet the definition of the scope above.

Softwood lumber product imports are generally entered under Chapter 44 of the Harmonized Tariff Schedule of the United States (HTSUS).[18] This chapter of the HTSUS covers ''Wood and articles of wood.'' Softwood lumber products that are subject to this investigation are currently classifiable under the following ten-digit HTSUS subheadings in Chapter 44: 4407.10.01.01; 4407.10.01.02; 4407.10.01.15; 4407.10.01.16; 4407.10.01.17; 4407.10.01.18; 4407.10.01.19; 4407.10.01.20; 4407.10.01.42; 4407.10.01.43; 4407.10.01.44; 4407.10.01.45; 4407.10.01.46; 4407.10.01.47; 4407.10.01.48; 4407.10.01.49; 4407.10.01.52; 4407.10.01.53; 4407.10.01.54; 4407.10.01.55; 4407.10.01.56; 4407.10.01.57; 4407.10.01.58; 4407.10.01.59; 4407.10.01.64; 4407.10.01.65; 4407.10.01.66; 4407.10.01.67; 4407.10.01.68; 4407.10.01.69; 4407.10.01.74; 4407.10.01.75; 4407.10.01.76; 4407.10.01.77; 4407.10.01.82; 4407.10.01.83; 4407.10.01.92; 4407.10.01.93; 4409.10.05.00; 4409.10.10.20; 4409.10.10.40; 4409.10.10.60; 4409.10.10.80; 4409.10.20.00; 4409.10.90.20; 4409.10.90.40; and 4418.99.10.00.

Subject merchandise as described above might be identified on entry documentation as stringers, square cut box-spring-frame components, fence pickets, truss components, pallet components, flooring, and door and window frame parts. Items so identified might be entered under the following ten-digit HTSUS subheadings in Chapter 44: 4415.20.40.00; 4415.20.80.00; 4418.99.90.05; 4418.99.90.20; 4418.99.90.40; 4418.99.90.95; 4421.91.70.40; and 4421.91.97.80.

Although these HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these investigations is dispositive.

The scope of the order excludes the following items:

U.S.-origin lumber shipped to Canada for processing and imported into the United States is excluded from the scope of the investigations if the processing occurring in Canada is limited to one or more of the following: (1) Kiln drying; (2) planing to create smooth-to-size board; or (3) sanding.

Box-spring frame kits are excluded if they contain the following wooden pieces—two side rails, two end (or top) rails and varying numbers of slats. The side rails and the end rails must be radius-cut at both ends. The kits must be individually packaged and must contain the exact number of wooden components needed to make a particular box spring frame, with no further processing required. None of the components exceeds 1″ in actual thickness or 83″ in length.

Radius-cut box-spring-frame components, not exceeding 1″ in actual thickness or 83″ in length, ready for assembly without further processing are excluded. The radius cuts must be present on both ends of the boards and must be substantially cut so as to completely round one corner.

[18] Throughout this document, all references to the HTSUS are based on the HTSUS as it exists at *https://hts.usitc.gov/current.*

Appendix II

List of Topics Discussed in the Preliminary Decision Memorandum

[FR Doc. 2017–13794 Filed 6–29–17; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–549–834]

Citric Acid and Certain Citrate Salts From Thailand: Initiation of Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective June 22, 2017.

FOR FURTHER INFORMATION CONTACT: John Conniff at (202) 482–1009, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petition

On June 2, 2017, the Department of Commerce (the Department) received a countervailing duty (CVD) petition concerning imports of citric acid and

certain citrate salts (citric acid) from Thailand,[1] filed in proper form on behalf of Archer Daniels Midland Company (ADM); Cargill Incorporated (Cargill); and Tate & Lyle Ingredients Americas LLC (Tate & Lyle) (collectively, the petitioners). The Petition was accompanied by antidumping duty (AD) petitions concerning imports of citric acid from Belgium, Colombia and Thailand.[2] The petitioners are domestic producers of citric acid.[3]

On June 7, and June 12, 2017, the Department requested additional information and clarification of certain areas of the Petition.[4] The petitioners filed responses to these requests on June 9, and June 14, 2017, respectively.[5]

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioners allege that imports of citric acid from Thailand received countervailable subsidies from Thai government authorities within the meaning of sections 701 and 771(5) of the Act, and that such imports are materially injuring, or threatening material injury to, an industry in the United States. Also, consistent with section 702(b)(1) of the Act, for those alleged programs on which we are initiating a CVD investigation, the Petition alleged the elements of a subsidy and provided information reasonably available to the petitioners supporting the allegations.

The Department finds that the petitioners filed the Petition on behalf of the domestic industry because the petitioners are interested parties as defined in section 771(9)(C) of the Act. The Department also finds that the petitioners demonstrated sufficient industry support with respect to the initiation of the CVD investigation that the petitioners are requesting.[6]

[6] *See* ''Determination of Industry Support for the Petitions'' section, below.

Period of Investigation

Because the Petition was filed on June 2, 2017, the period of investigation (POI) is January 1, 2016, through December 31, 2016.[7]

Scope of the Investigation

The product covered by this investigation is citric acid and certain citrate salts from Thailand. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in the Appendix to this notice.

Comments on Scope of the Investigation

During our review of the Petition, the Department issues questions to, and received responses from, the petitioners pertaining to the proposed scope to ensure that the scope language in the Petition would be an accurate reflection of the products for which the domestic industry is seeking relief.[8]

As discussed in the preamble to the Department's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determinations. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on July 12, 2017, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information (also limited to public information), must be filed by 5:00 p.m. ET on July 24, 2017, which is the next business day after 10 calendar days after the initial comments. All such comments must be filed on the records of this investigation and each of the concurrent AD investigations.

The Department requests that any factual information the parties consider relevant to the scope of this investigation be submitted during this time period. However, if a party subsequently believes that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact the Department and request permission to submit the additional information. As stated above, all such comments must be filed on the records of this investigation and each of the concurrent AD investigations.

[7] *See* 19 CFR 351.204(b)(2).

[8] *See* General Issues Supplement, at 1–4.

Filing Requirements

All submissions to the Department must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).[9] An electronically-filed document must be received successfully in its entirety by the time and date it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to section 702(b)(4)(A)(i) of the Act, the Department notified representatives of the Royal Thai Government (RTG) of the receipt of the Petition. Also, in accordance with section 702(b)(4)(A)(ii) of the Act, the Department provided representatives of the RTG with an opportunity for consultations with respect to the Petition. Consultations with the RTG were held at the Department's main building on June 14, 2017. The invitation letter and the memorandum regarding these consultations are on file electronically *via* ACCESS.

Determination of Industry Support for the Petition

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) at least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic

[9] *See* 19 CFR 351.303 (for general filing requirements); *see also Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures,* 76 FR 39263 (July 6, 2011), for details of the Department's electronic filing requirements, which went into effect on August 5, 2011. Information on help using ACCESS can be found at *https://access.trade.gov/help.aspx,* and a handbook can be found at *https://access.trade.gov/help/Handbook%20on%20Electronic%20Filling%20Procedures.pdf.*

producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers, as a whole, of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[10] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[11]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petition).

With regard to the domestic like product, the petitioners do not offer a definition of the domestic like product distinct from the scope of the investigation. Based on our analysis of the information submitted on the record, we have determined that citric acid, as defined in the scope, constitutes a single domestic like product and we have analyzed industry support in terms of that domestic like product.[12]

In determining whether the petitioners have standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in the Appendix to this notice. To establish industry support, the petitioners provided their own production of the domestic like product in 2016.[13] The petitioners state that they represent the totality of the domestic industry producing citric acid; therefore, the Petition is supported by 100 percent of the U.S. industry.[14]

Our review of the data provided in the Petition, the General Issues Supplement, and other information readily available to the Department indicates that the petitioners have established industry support for the Petition.[15] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.,* polling).[16] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[17] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[18] Accordingly, the Department determines that the Petition was filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.

The Department finds that the petitioners filed the Petition on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) of the Act, and they have demonstrated sufficient industry support with respect to the CVD investigation they are requesting the Department to initiate.[19]

Injury Test

Because Thailand is a ''Subsidies Agreement Country'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to this investigation. Accordingly, the ITC must determine whether imports of the subject merchandise from Thailand materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioners allege that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, the petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[20] In CVD petitions, section 771(24)(B) of the Act provides that imports of subject merchandise from developing and least developed countries must exceed the negligibility threshold of four percent. The petitioners also demonstrate that subject imports from Thailand, which has been designated as developing country under section 771(36)(A) of the Act, exceed the negligibility threshold of four percent.[21]

The petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price suppression or depression; lost sales and revenues; adverse impact on the domestic industry's production, capacity utilization, and U.S. shipments; and declines in financial performance.[22] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported

by adequate evidence, and meet the statutory requirements for initiation.[23]

Initiation of CVD Investigation

Section 702(b)(1) of the Act requires the Department to initiate a CVD investigation whenever an interested party files a CVD petition on behalf of an industry that: (1) Alleges the elements necessary for an imposition of a duty under section 701(a) of the Act; and (2) is accompanied by information reasonably available to the petitioners supporting the allegations.

The petitioners allege that producers/exporters of citric acid in Thailand benefit from countervailable subsidies bestowed by their government. The Department examined the Petition and finds that it complies with the requirements of section 702(b)(1) of the Act. Therefore, in accordance with section 702(b)(1) of the Act, we are initiating this CVD investigation to determine whether manufacturers, producers, and/or exporters of citric acid in Thailand receive countervailable subsidies from Thai government authorities.

Under the Trade Preferences Extension Act of 2015, numerous amendments to the AD and CVD law were made.[24] The amendments to sections 776 and 782 of the Act are applicable to all determinations made on or after August 6, 2015, and, therefore, apply to this CVD investigation.[25]

Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation on all nine alleged programs. For a full discussion of the basis for our decision to initiate on each program, *see* the Thailand CVD Initiation Checklist. A public version of the initiation checklist is available on ACCESS.

In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determination no later than 65 days after the date of this initiation.

Respondent Selection

Based on information from independent sources, the petitioners identified four companies in Thailand as producers/exporters of citric acid.[26] Following standard practice in CVD investigations, the Department intends to review U.S. Customs and Border Protection (CBP) data for U.S. imports under the appropriate HTSUS numbers listed in the ''Scope of the Investigation,'' in the Appendix, below. If the Department determines that, due to the large number of producers or exporters, it cannot individually examine each company based on the Department's resources, then the Department will select respondents based on the CBP data. We intend to release the CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO. Comments regarding the CBP data and respondent selection should be submitted seven calendar days after the placement of the CBP data on the record of the investigation. Parties wishing to submit rebuttal comments should submit those comments five calendar days after the deadline for the initial comments.

Comments must be filed electronically using ACCESS. An electronically-filed document must be received successfully, in its entirety, by ACCESS no later than 5:00 p.m. ET on the date noted above. We intend to finalize our decision regarding respondent selection within 20 days of publication of this notice.

Distribution of Copies of the Petition

In accordance with section 702(b)(4)(A)(i) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the RTG *via* ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petition to each known exporter (as named in the Petition), consistent with 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 702(d) of the Act.

Preliminary Determination by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of citric acid from Thailand are materially injuring, or threatening material injury to, a U.S. industry.[27] A negative ITC determination will result in the investigation being terminated.[28] Otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). Any party, when submitting factual information, must specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Parties should review the regulations prior to submitting factual information in this investigation.

Extension of Time Limits Regulation

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to

submitting factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[29] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.[30] The Department intends to reject factual submissions if the submitting party does not comply with the applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 702 and 777(i) of the Act.

Dated: June 22, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation includes all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. The scope also includes blends of citric acid, sodium citrate, and potassium citrate; as well as blends with other ingredients, such as sugar, where the unblended form(s) of citric acid, sodium citrate, and potassium citrate constitute 40 percent or more, by weight, of the blend.

The scope also includes all forms of crude calcium citrate, including dicalcium citrate monohydrate, and tricalcium citrate tetrahydrate, which are intermediate products in the production of citric acid, sodium citrate, and potassium citrate.

The scope includes the hydrous and anhydrous forms of citric acid, the dihydrate and anhydrous forms of sodium citrate, otherwise known as citric acid sodium salt, and the monohydrate and monopotassium forms of potassium citrate. Sodium citrate also includes both trisodium citrate and monosodium citrate which are also known as citric acid trisodium salt and citric acid monosodium salt, respectively.

The scope does not include calcium citrate that satisfies the standards set forth in the United States Pharmacopeia and has been mixed with a functional excipient, such as dextrose or starch, where the excipient constitutes at least 2 percent, by weight, of the product.

Citric acid and sodium citrate are classifiable under 2918.14.0000 and 2918.15.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), respectively. Potassium citrate and crude calcium citrate are classifiable under 2918.15.5000 and, if included in a mixture or blend, 3824.99.9295 of the HTSUS. Blends that include citric acid, sodium citrate, and potassium citrate are classifiable under 3824.99.9295 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–863]

Honey From the People's Republic of China: Notice of Court Decision Not in Harmony With Final Results of Review and Notice of Amended Final Results of Review Pursuant to Court Decision

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is notifying the public that the Court of International Trade's (CIT's or the Court's) final judgment in this case is not in harmony with the Department's final results of review and is, therefore, amending the final dumping duty margin for one reviewed company.

DATES: *Effective Date:* June 10, 2017.

FOR FURTHER INFORMATION CONTACT: John Drury, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0195.

SUPPLEMENTARY INFORMATION:

Background

On December 10, 2001, the Department published an amended final determination of sales at less than fair value, and an antidumping duty order, on honey from the People's Republic of China (PRC).[1] As part of the Department's amended final determination, the Department made affirmative critical circumstances determinations for Zhejiang Native Produce and Animal By-Products Import & Export Corp., a.k.a. Zhejiang Native Produce and Animal By-Products Import and Export Group Corporation (Zhejiang), and certain other firms.[2]

On January 20, 2003, the Department initiated an administrative review of the antidumping duty order on honey from the PRC covering the period February 10, 2001, through November 30, 2002.[3] In the administrative review, the Department determined normal value using a factors of production (FOP) methodology, pursuant to section 773(c) of the Tariff Act of 1930, as amended (the Act) and selected India as the primary surrogate country from which to derive surrogate values.

On May 5, 2004, the Department published the *Final Results.*[4] On June 10, 2004, the Department published the *Amended Final Results,* which corrected certain ministerial errors.[5] In the *Amended Final Results,* the Department corrected the antidumping duty margin for respondent Zhejiang from 68.35 percent to 67.70 percent *ad valorem.*

Zhejiang challenged the *Final Results* and *Amended Final Results* before the CIT. On November 19, 2004, the Department amended the record of the proceeding to add 11 documents that were not included in the original

[1] *See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order; Honey from the People's Republic of China,* 66 FR 63670 (December 10, 2001) (*Amended Final Determination and Order*).

[2] *Id.,* at 63672.

[3] *See Initiation of Antidumping and Countervailing Administrative Review and Requests for Revocation in Part,* 68 FR 3009 (January 22, 2003) (*Initiation Notice*).

[4] *See Honey from the People's Republic of China: Final Results of First Antidumping Duty Administrative Review,* 69 FR 25060 (May 5, 2004), and the accompanying ''Issues and Decision Memorandum for the Final Results of the First Administrative Review of the Antidumping Order on Honey from the People's Republic of China,'' dated April 28, 2004 (Decision Memorandum) (collectively, *Final Results*).

[5] *See Honey from the People's Republic of China: Amended Final Results of First Antidumping Duty Administrative Review,* 69 FR 32494 (June 10, 2004) (*Amended Final Results*).

record,[6] but were identified as part of a Freedom of Information Act (FOIA) request filed by Zhejiang.

At the same time that Zhejiang challenged the Department's *Final Results* as amended, litigation concerning the Department's final determination of critical circumstances in the less than fair value investigation of honey from the PRC ensued.[7] In light of the fact that the POR for the first administrative review was, in part, based on the Department's finding of critical circumstances in the investigation, the CIT stayed further action pending the outcome of the litigation relating to the investigation. The CIT affirmed the Department's finding on remand of no critical circumstances on June 18, 2013.[8]

On August 3, 2015, the CIT remanded this case to the Department. Specifically, the Court: (1) Granted the Department's request for a voluntary remand to reconsider the issues related to the surrogate value for raw honey; (2) remanded the issue of the selection of the appropriate financial statements; and (3) requested that the Department recalculate Zhejiang's dumping margin to reflect the different POR resulting from the decision in *Zhejiang Native Produce & Animal By-Products Import & Export Corp.* v. *United States,* Court No. 02–00057.

The Department released a draft redetermination on December 31, 2015, and invited comments from parties.[9] The Department released a final redetermination on February 10, 2016.[10] In the Final Redetermination, consistent with the Court's instructions and after a review of information on the record and comments from interested parties, the Department found that a change in the surrogate value for raw honey was not warranted and that a change in the financial statements for calculating surrogate values for factory overhead, selling, general and administrative expenses, and profit, was also not warranted. In addition, the Department removed sales corresponding to the critical circumstances period and recalculated the antidumping duty margin. Specifically, the Department calculated a margin of 67.06 percent *ad valorem* for Zhejiang's sales of honey from the PRC for the period of May 11, 2001, to November 30, 2002.[11]

On June 1, 2017, the CIT sustained the Department's Final Redetermination in its entirety.[12]

Timken Notice

In its decision in *Timken,*[13] as clarified by *Diamond Sawblades,*[14] the United States Court of Appeals for the Federal Circuit (CAFC) held that, pursuant to sections 516A(c) and (e) of the Act, the Department must publish a notice of a court decision that is not ''in harmony'' with a Department determination and must suspend liquidation of entries pending a ''conclusive'' court decision. The CIT's June 1, 2017, judgment in *Zhejiang III,* sustaining the Department's decision in the Final Redetermination to re-calculate the dumping margin for Zhejiang from 67.70 percent to 67.06 percent, constitutes a final decision of the court that is not in harmony with the *Amended Final Results.* This notice is published in fulfillment of the publication requirements of *Timken.* Accordingly, the Department will issue liquidation instructions to U.S. Customs and Border Protection (CBP) to liquidate entries of honey from the PRC exported to or imported into the United States by Zhejiang at the rate of 67.06 percent *ad valorem* pending expiration of the period to appeal or, if appealed, pending a final and conclusive court decision.

Second Amended Final Results

Because there is now a final court decision, the Department amends the *Amended Final Results* with respect to the dumping margin of Zhejiang. The revised weighted-average dumping margin for Zhejiang during the period May 11, 2001, to November 30, 2002, is as follows:

Exporter	Weighted-average dumping margin (percent)
Zhejiang Native Produce & Animal By-Products Import & Export Corp.	67.06

In the event the Court's ruling is not appealed, or if appealed and upheld by the CAFC, the Department will instruct CBP to assess antidumping duties on entries of the subject merchandise exported by Zhejiang using the revised assessment rate calculated by the Department in the *Final Redetermination.*

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(e)(1), 751(a)(1), and 777(i)(1) of the Act.

Dated: June 23, 2017.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Endangered and Threatened Species; Listing and Recovery Priority Guidelines

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; extension of comment period.

SUMMARY: On May 31, 2017, we, NMFS, published a notice of availability to revise the Recovery Plan Preparation and Implementation Priorities and Recovery Plans contained in the 1990 Listing and Recovery Priority Guidelines. We opened a public comment period that lasted through June 30, 2017. We received several requests to extend the public comment period. Thus, we are extending the period through August 28, 2017.

DATES: Comments on the proposed revision must be received by close of business on August 28, 2017.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2017–0020 by either of the following methods:

- *Federal e-Rulemaking Portal:* Go to *www.regulations.gov/*

• *Mail:* Submit written comments to Therese Conant, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910.

Instructions: You must submit comments by one of the above methods to ensure that we receive, document, and consider them. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *http://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. We will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

SUPPLEMENTARY INFORMATION:

Background

Section 4(f) of the Endangered Species Act (ESA) (16 U.S.C. 1533(f)) requires the Secretary to develop recovery plans for all species listed pursuant to the ESA, unless he/she finds that such a plan will not promote the recovery of the species. Section 4(h) of the ESA requires the Secretary to establish a system for developing and implementing, on a priority basis, recovery plans under Section 4(f). We finalized guidance for prioritizing recovery plan development and implementation on June 15, 1990 (55 FR 24296). However, through our application of the Recovery Plan Preparation and Implementation Priorities and Recovery Plans (see parts 'B' and 'C' 55 FR 24296; June 15, 1990), we have determined that the guidelines contain vague definitions and lack sufficient detail regarding factors that should be considered when evaluating threats and recovery potential. For these reasons, we published, on May 31, 2017 (82 FR 24944), proposed revisions to the Recovery Plan Preparation and Implementation Priorities and Recovery Plan parts of the 1990 Listing and Recovery Priority Guidelines. We solicited comments on the proposed revision to be submitted by June 30, 2017. On June 14 and June 16, 2017, we received requests to extend the public comment period by an additional 30 days and 90 days, respectively. Thus, we are extending the public comment period through August 28, 2017. Previously submitted comments do not need to be resubmitted.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: June 26, 2017.

Catherine Marzin,

Acting Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

Endangered and Threatened Species; Initiation of 5-Year Review for the North Pacific Right Whale

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of initiation of 5-year review; request for information.

SUMMARY: NMFS announces a 5-year review of the North Pacific right whale (*Eubalaena japonica*) under the Endangered Species Act of 1973 (ESA), as amended. A 5-year review must be based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any such information on these whales that has become available since the last status review in 2012.

DATES: To allow us adequate time to conduct this review, we must receive your information no later than July 31, 2017. However, we will continue to accept new information about any listed species at any time.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2017–0046, by either of the following methods:

• *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2017-0046,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.

• *Mail:* Submit written comments to Jon Kurland, Assistant Regional Administrator for Protected Resources, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Verena Gill, NMFS Alaska Region, (907) 271–1937, *verena.gill@noaa.gov.*

SUPPLEMENTARY INFORMATION: Section 4(c)(2)(A) of the ESA requires that we conduct a review of listed species at least once every five years. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing species currently under active review. This notice announces our active review of North Pacific right whales, currently listed as endangered. To ensure that the 5-year review is complete and based on the best available scientific and commercial information, we are soliciting new information from the public, governmental agencies, Tribes, the scientific community, industry, environmental entities, and any other interested parties concerning the status of North Pacific right whales. Categories of requested information include: (1) Species biology and demographics (population trends, distribution, abundance, genetics, etc.); (2) habitat conditions (amount, distribution, suitability, quality, etc.); (3) conservation measures that have been implemented that benefit the species; (4) status and trends of threats; and (5) other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the list of threatened and endangered species, and improved analytical methods, if any. Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for these whales.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: June 26, 2017.

Catherine Marzin,

Acting Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

Under 44 U.S.C. 3506(e) and 13 U.S.C. Section 9, the U.S. Census Bureau is seeking comments on revisions to the confidentiality pledge it provides to its respondents under Title 13, United States Code, Section 9. These revisions are required by the passage and implementation of provisions of the Federal Cybersecurity Enhancement Act of 2015 (6 U.S.C. 1501 note), which require the Secretary of Homeland Security to provide Federal civilian agencies' information technology systems with cybersecurity protection for their Internet traffic. More details on this announcement are presented in the **SUPPLEMENTARY INFORMATION** section below. The previous notice for public comment, titled ''Agency Information Collection Activities; Request for Comments; Revision of the Confidentiality Pledge under Title 13 United States Code, Section 9'' was published in the **Federal Register** on December 23, 2016 (Vol. 81, No. 247, pp. 94321–94324), allowing for a 60 day comment period. The Census Bureau received two comments, which are addressed within this notice.

SUPPLEMENTARY INFORMATION:

I. Background

On December 18, 2015, Congress passed the Federal Cybersecurity Enhancement Act of 2015 (the Act) (6 U.S.C. 1501 note). The Act requires the Department of Homeland Security to deploy for use by other agencies a program with the ''capability to detect cybersecurity risks in network traffic transiting or traveling to or from an agency information system.'' [1] The Act requires each agency to ''apply and continue to utilize the capabilities to all information traveling between an agency information system and any information system other than an agency information system.'' [2] The DHS program is known as EINSTEIN, and DHS currently operates version 3A (E3A). Importantly, the Act provides that DHS may use the information collected through EINSTEIN ''only to protect information and information systems from cybersecurity risks.'' [3] The Act does not authorize DHS to use information collected through EINSTEIN for any other purposes, including law enforcement purposes.

In response to the passage of the Act, the Census Bureau considered whether it should revise its confidentially pledge. The Census Bureau's Center for Survey Measurement (CSM) joined the interagency Statistical Community of Practice and Engagement (SCOPE) Confidentiality Pledge Revision Subcommittee, which developed and evaluated the revision to the confidentiality pledge language. SCOPE and CSM conducted remote and in-person cognitive testing of the potential revised confidentiality pledge. The Census Bureau based its revised confidentiality pledge on the results of these tests. The revised confidentiality pledge utilizes the language the Census Bureau determined would best communicate the essential information to respondents while not negatively affecting response rates. The following is the revised statistical confidentiality pledge for the Census Bureau's data collections:

The U.S. Census Bureau is required by law to protect your information. The Census Bureau is not permitted to publicly release your responses in a way that could identify you. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

On December 23, 2016, the Census Bureau requested comments on the revised confidentiality pledge. During the public comment period, the Census Bureau received two comments from the Asian Americans Advancing Justice (AAJC) and American-Arab Anti-Discrimination Committee (ADC).

II. Comments and Responses

In response to the Census Bureau's revised confidentiality pledge, AAJC and the ADC provided comments and suggestions to the Census Bureau. These comments and suggestions, along with the Census Bureau's responses are below.

1. The AAJC and the ADC both expressed concerns about the effect of the revised confidentiality pledge on the accuracy of the results of the Census Bureau's survey.

Response: The Census Bureau is committed to collecting the most complete and accurate data. The Census Bureau takes the collection and protection of respondent information very seriously and has since the first Decennial Census in 1790. As a statistical agency committed to ensuring the collection and publication of accurate data, the Census Bureau continually conducts extensive research and testing to inform census and survey design. This research and testing confirms key technologies, outreach and promotional strategies, data collection methods, and management and response processes to allow the Census Bureau to maximize response rates and ensure the accuracy of the data collected. We also uphold a strong data stewardship culture to ensure that any decisions we make will fulfill our legal and ethical obligations to respect your privacy and protect the confidentiality of your information. The revised confidentiality pledge utilizes language that the Census Bureau determined, after cognitive testing, would not negatively affect response rates, and hence the accuracy of the survey results.

2. The ''ADC has serious concerns on the ability of [DHS] to . . . access . . . people's personal information on the server.''

Response: E3A does not provide DHS with access to a respondent's personal information. E3A does not currently decrypt respondent information or scan data at rest on Census Bureau information systems. Moreover, the Act limits the use of any information collected, stating that the DHS may use information obtained through activities authorized under this section ''only to protect information and information systems from cybersecurity risks.'' (6 U.S.C. 151(c)(3)).

EINSTEIN also provides greater protection for the Census Bureau's information and information systems than would otherwise exist. EINSTEIN enables DHS to detect cyber threat indicators traveling or transiting to or from one agency's information system, and to share those indicators with other agencies, thereby making all agencies' information systems more secure. The necessity of providing DHS limited access to such information—information which DHS can only use for cybersecurity purposes—is not only required by the Federal Cybersecurity Enhancement Act, but has a net positive impact of the security of information respondents provide to the Census Bureau.

3. The ADC is concerned that ''there is a lack of safeguards in place on who has access to information through EINSTEIN.''

Response: In addition to the safeguards contained in the Act, the Census Bureau works with DHS to protect information DHS may access through EINSTEIN. These additional safeguards cover the collection, retention, use, and disclosure of information. The safeguards also

[1] Sec. 230(b)(1)(A) of the Homeland Security Act of 2002 (6 U.S.C. 151(b)(1)(A)), as added by section 223((a)(6) of the Federal Cybersecurity Enhancement Act of 2015.

[2] Section 223 (b)(1)(A) (6 U.S.C. 151 note) of the Federal Cybersecurity Enhancement Act of 2015.

[3] Section 230(c)(3) of the Homeland Security Act of 2002 (6 U.S.C. 151(c)(3)), as added by section 223(a)(6) of the Federal Cybersecurity Enhancement Act of 2015.

include notification and reporting requirements in the unlikely event that any unauthorized access, use, or dissemination of any Census Bureau information would occur.

To reiterate, the information at issue is not a respondent's personal information, rather, it is cyber threat information. E3A does not provide DHS with access to a respondent's personal information. E3A does not currently decrypt respondent information or scan data at rest on Census Bureau information systems.

4. The ADC is concerned that the revised confidentiality pledge ''raises flags on improper use of such information.''

Response: The Act limits DHS's use of information collected pursuant to the Act to the protection of ''information and information systems from cybersecurity risks.'' To be clear, DHS's use of the information for any other purpose would be unlawful.

5. The AAJC suggests that the protections contained in Title 13 and the Confidential Information Protection and Statistical Efficiency Act (CIPSEA), both of which limit the use and disclosure of information collected, should control the information at issue.

Response: Pursuant to the Act, each agency must ''apply and continue to utilize the capabilities to all information traveling between an agency information system and any information system other than an agency information system.'' Congress authorized that, notwithstanding the protections previously afforded to information by other laws, such as Title 13, for the purpose of protecting agency information systems from cyber attacks, DHS may access information transiting and traveling to or from an agency information system. Census Bureau employees remain subject to the penalties contained in Title 13, including a federal prison sentence of up to five years and a fine of up to $250,000, or both.

6. The AAJC suggests that either the Census Bureau employees ''perform Einstein 3A functions for Census Bureau internet traffic'' or that ''DHS employees monitoring Census Bureau internet traffic under Einstein 3A take the current Title 13 confidentiality pledge.''

Response: The Act provides DHS access to network traffic transiting or traveling to or from the Census Bureau's information systems, notwithstanding the protections previously afforded to information by other laws, such as Title 13. The Act also requires each agency to ''apply and continue to utilize the capabilities to all information traveling between an agency information system and any information system other than an agency information system.''

In addition to the safeguards contained in the Act, the Census Bureau works with DHS to safeguard respondent information. These additional safeguards cover the collection, retention, use, and disclosure of information. The safeguards also include notification and reporting requirements that would apply in the unlikely event that any unauthorized access, use, or dissemination of any Census Bureau information would occur.

III. Data

Agency: U.S. Census Bureau, Department of Commerce.

Title: Revision of the Confidentiality Pledge under Title 13 United States Code, Section 9.

OMB Control Number: 0607–0993.

Form Number(s): None.

Affected Public: All survey respondents to Census Bureau data collections.

Legal Authority: 44 U.S.C. 3506(e) and 13 U.S.C. Section 9.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

IV. Request for Comments

Comments are invited on the necessity and efficacy of the Census Bureau's revised confidentiality pledge above. Comments submitted in response to this notice will become a matter of public record. Comments should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202)395–5806.

Dated: June 27, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer on behalf of the Department of Commerce.

[FR Doc. 2017–13778 Filed 6–29–17; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF304

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meetings; Cancellation

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of change of schedule for SEDAR 56 South Atlantic Black Sea Bass Assessment Webinars.

SUMMARY: The SEDAR 56 assessment of the South Atlantic stock of black seabass will consist of a series webinars. Due to changes to the schedule for the stock assessment, webinars scheduled for Thursday, July 20, 2017 and Wednesday, August 16, 2017 have been cancelled. See **SUPPLEMENTARY INFORMATION.**

DATES: This notice serves to cancel the previously scheduled July 20, 2017 and August 16, 2017 webinars.

ADDRESSES: *SEDAR address:* South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405; *www.sedarweb.org.*

FOR FURTHER INFORMATION CONTACT: Julia Byrd, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571–4366; email: *julia.byrd@safmc.net.*

SUPPLEMENTARY INFORMATION: The original notice published in the **Federal Register** on March 29, 2017 (82 FR 15495).

The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. The product of the SEDAR webinar series will be a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

During its June 2017 meeting, the South Atlantic Fishery Management

Council made a decision to change the terminal year for the data used on the stock assessment for the South Atlantic black sea bass stock. The decision affects the schedule for the stock assessment and consequently, the scheduled webinars as previously published in the **Federal Register**. An updated schedule will be published once the details are available.

Dated: June 26, 2017.

Jeffrey N. Lonergan,

Acting Deputy Director, Office of Sustainable Fisheries, National marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Multistakeholder Process on Internet of Things Security Upgradability and Patching

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The National Telecommunications and Information Administration (NTIA) will convene a virtual meeting of a multistakeholder process on Internet of Things Security Upgradability and Patching on July 18, 2017. This is the fourth in a series of meetings. For information on prior meetings, see Web site address below.

DATES: The virtual meeting will be held on July 18, 2017, from 2:00 p.m. to 4:30 p.m., Eastern Time. See **SUPPLEMENTARY INFORMATION** for details.

ADDRESSES: This is a virtual meeting. NTIA will post links to online content and dial-in information on the multistakeholder process Web site at *https://www.ntia.doc.gov/other-publication/2016/multistakeholder-process-iot-security.*

FOR FURTHER INFORMATION CONTACT: Allan Friedman, National Telecommunications and Information Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Room 4725, Washington, DC 20230; telephone: (202) 482–4281; email: *afriedman@ntia.doc.gov.* Please direct media inquiries to NTIA's Office of Public Affairs: (202) 482–7002; email: *press@ntia.doc.gov.*

SUPPLEMENTARY INFORMATION:

Background: In March of 2015 the National Telecommunications and Information Administration issued a Request for Comment to ''identify substantive cybersecurity issues that affect the digital ecosystem and digital economic growth where broad consensus, coordinated action, and the development of best practices could substantially improve security for organizations and consumers.'' [1] We received comments from a range of stakeholders, including trade associations, large companies, cybersecurity startups, civil society organizations and independent computer security experts.[2] The comments recommended a diverse set of issues that might be addressed through the multistakeholder process, including cybersecurity policy and practice in the emerging area of Internet of Things (IoT).

In a separate but related matter in April 2016, NTIA, the Department's Internet Policy Task Force, and its Digital Economy Leadership Team sought comments on the benefits, challenges, and potential roles for the government in fostering the advancement of the Internet of Things.'' [3] Over 130 stakeholders responded with comments addressing many substantive issues and opportunities related to IoT.[4] Security was one of the most common topics raised. Many commenters emphasized the need for a secure lifecycle approach to IoT devices that considers the development, maintenance, and end-of-life phases and decisions for a device.

After reviewing these comments, NTIA announced that the next multistakeholder process on cybersecurity would be on IoT security upgradability and patching.[5] The first meeting of a multistakeholder process on this topic was held on October 19, 2016.[6] A second, virtual meeting of this process was held on January 31, 2017,[7] and a third meeting was held on April 26, 2017.[8]

The matter of patching vulnerable systems is now an accepted part of cybersecurity.[9] Unaddressed technical flaws in systems leave the users of software and systems at risk. The nature of these risks varies, and mitigating these risks requires various efforts from the developers and owners of these systems. One of the more common means of mitigation is for the developer or other maintaining party to issue a security patch to address the vulnerability. Patching has become more commonly accepted, even for consumers, as more operating systems and applications shift to visible reminders and automated updates. Yet as one security expert notes, this evolution of the software industry has yet to become the dominant model in IoT.[10]

To help realize the full innovative potential of IoT, users need reasonable assurance that connected devices, embedded systems, and their applications will be secure. A key part of that security is the mitigation of potential security vulnerabilities in IoT devices or applications through patching and security upgrades.

The ultimate objective of the multistakeholder process is to foster a market offering more devices and systems that support security upgrades through increased consumer awareness and understanding. Enabling a thriving market for patchable IoT requires common definitions so that manufacturers and solution providers

[10] Bruce Schneier, *The Internet of Things Is Wildly Insecure—And Often Unpatchable,* Wired (Jan. 6, 2014), *available at: https://www.schneier.com/blog/archives/2014/01/security_risks_9.html.*

have shared visions for security, and consumers know what they are purchasing. Currently, no such common, widely accepted definitions exist, so many manufacturers struggle to effectively communicate to consumers the security features of their devices. This is detrimental to the digital ecosystem as a whole, as it does not reward companies that invest in patching and it prevents consumers from making informed purchasing choices.

Stakeholders have identified four distinct work streams that could help foster better security across the ecosystem, and focused their efforts in four working groups addressing both technical and policy issues.[11] The main objectives of the July 18, 2017, meeting are to share progress from the working groups and hear feedback from the broader stakeholder community. Stakeholders will also discuss how the outputs of the different work streams can complement each other. More information about stakeholders' work is available at: *https://www.ntia.doc.gov/other-publication/2016/multistakeholder-process-iot-security.*

Time and Date: NTIA will convene a virtual meeting of the multistakeholder process on Internet of Things Security Upgradability and Patching on July 18, 2017, from 2:00 p.m. to 4:30 p.m., Eastern Time. The meeting date and time are subject to change. Please refer to NTIA's Web site, *https://www.ntia.doc.gov/other-publication/2016/multistakeholder-process-iot-security,* for the most current information.

Place: This is a virtual meeting. NTIA will post links to online content and dial-in information on the multistakeholder process Web site at *https://www.ntia.doc.gov/other-publication/2016/multistakeholder-process-iot-security.*

Other Information: The meeting is open to the public and the press. There will be an opportunity for stakeholders viewing the webcast to participate remotely in the meeting through a moderated conference bridge, including polling functionality. Access details for the meeting are subject to change. Requests for a transcript of the meeting or other auxiliary aids should be directed to Allan Friedman at (202) 482–4281 or *afriedman@ntia.doc.gov* at least seven (7) business days prior to each meeting. Please refer to NTIA's Web site, *https://www.ntia.doc.gov/other-publication/2016/multistakeholder-process-iot-security,* for the most current information.

Dated: June 27, 2017.

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Community Broadband Workshop

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of Open Meeting.

SUMMARY: The National Telecommunications and Information Administration (NTIA), through the BroadbandUSA program, will hold a Technical Assistance Workshop to share information and help communities build their broadband capacity and utilization. The workshop will present in-depth sessions on planning and funding broadband infrastructure projects. The session on planning will explore effective business and partnership models. The session on funding will explore available funding options and models, including federal funding.

DATES: The Technical Assistance Workshop will be held on August 21, 2017, from 8:30 a.m. to 12:30 p.m., Central Daylight Time.

ADDRESSES: The meeting will be held in Des Moines, Iowa at the Des Moines Public Library, 1000 Grand Avenue, Des Moines, IA 50309.

FOR FURTHER INFORMATION CONTACT: Giselle Sanders, National Telecommunications and Information Administration, U.S. Department of Commerce, Room 4889, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–7971; email: *gsanders@ntia.doc.gov.* Please direct media inquiries to NTIA's Office of Public Affairs, (202) 482–7002; email: *press@ntia.doc.gov.*

SUPPLEMENTARY INFORMATION: NTIA's BroadbandUSA program provides expert advice and field-proven tools for assessing broadband adoption, planning new infrastructure, and engaging a wide range of partners in broadband projects. BroadbandUSA convenes workshops on a regular basis to bring stakeholders together to discuss ways to improve broadband policies, share best practices, and connect communities to other federal agencies and funding sources for the purpose of expanding broadband infrastructure and adoption throughout America's communities. The Des Moines workshop will explore two specific topics for broadband infrastructure: Planning and funding.

The Des Moines workshop will feature subject matter experts from NTIA's BroadbandUSA broadband program. The first session will explore key elements required for planning successful broadband projects. The second session will explore funding models, including federal programs that fund broadband infrastructure projects.

The Des Moines workshop will be open to the public. Pre-registration is requested, and space is limited. NTIA will ask registrants to provide their first and last names and email addresses for both registration purposes and to receive any updates on the workshop. If capacity for the meeting is reached, NTIA will maintain a waiting list and will inform those on the waiting list if space becomes available. Meeting updates, changes in the agenda, if any, and relevant documents will also be available on NTIA's Web site at *https://www2.ntia.doc.gov/notice-08212017-workshop.*

The public meeting is physically accessible to people with disabilities. Individuals requiring accommodations, such as language interpretation or other ancillary aids, are asked to notify Giselle Sanders at the contact information listed above at least five (5) business days before the meeting.

Dated: June 27, 2017.

Kathy D. Smith,

Chief Counsel, National Telecommunications and Information Administration.

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Commerce Spectrum Management Advisory Committee Meeting

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a public meeting of the Commerce Spectrum Management Advisory Committee (Committee). The Committee provides advice to the Assistant Secretary of Commerce for Communications and Information and

the National Telecommunications and Information Administration (NTIA) on spectrum management policy matters.

DATES: The meeting will be held on August 15, 2017, from 8:00 a.m. to 11:00 a.m., Mountain Daylight Time (MDT).

ADDRESSES: The meeting will be held at the Renaissance Boulder Flatiron Hotel, 500 Flatiron Boulevard, Broomfield, CO 80021. Public comments may be mailed to Commerce Spectrum Management Advisory Committee, National Telecommunications and Information Administration, 1401 Constitution Avenue NW., Room 4600, Washington, DC 20230 or emailed to *dreed@ntia.doc.gov.*

FOR FURTHER INFORMATION CONTACT: David J. Reed, Designated Federal Officer, at (202) 482–5955 or *dreed@ntia.doc.gov;* and/or visit NTIA's Web site at *https://www.ntia.doc.gov/category/csmac.*

SUPPLEMENTARY INFORMATION:

Background: The Committee provides advice to the Assistant Secretary of Commerce for Communications and Information on needed reforms to domestic spectrum policies and management in order to: License radio frequencies in a way that maximizes public benefits; keep wireless networks as open to innovation as possible; and make wireless services available to all Americans. *See* Charter at *https://www.ntia.doc.gov/files/ntia/publications/csmac_charter-2017.pdf.* This Committee is subject to the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2, and is consistent with the National Telecommunications and Information Administration Act, 47 U.S.C. 904(b). The Committee functions solely as an advisory body in compliance with the FACA. For more information about the Committee visit: *https://www.ntia.doc.gov/category/csmac.*

Matters to Be Considered: The Committee provides advice to the Assistant Secretary to assist in developing and maintaining spectrum management policies that enable the United States to maintain or strengthen its global leadership role in the introduction of communications technology, services, and innovation; thus expanding the economy, adding jobs, and increasing international trade, while at the same time providing for the expansion of existing technologies and supporting the country's homeland security, national defense, and other critical needs of government missions. NTIA will post a detailed agenda on its Web site, *https://www.ntia.doc.gov/category/csmac,* prior to the meeting. To the extent that time and the meeting agenda permit, any member of the public may speak to or otherwise address the Committee regarding the agenda items. *See Open Meeting and Public Participation Policy,* available at *https://www.ntia.doc.gov/category/csmac.*

Time and Date: The meeting will be held on August 15, 2017, from 8:00 a.m. to 11:00 a.m. MDT. The meeting time and the agenda topics are subject to change. The meeting will be available via two-way audio link and may be webcast. Please refer to NTIA's Web site, *https://www.ntia.doc.gov/category/csmac,* for the most up-to-date meeting agenda and access information.

Place: The meeting will be held at the Renaissance Boulder Flatiron Hotel, 500 Flatiron Boulevard, Broomfield, CO 80021. The meeting will be open to the public and members of the press on a first-come, first-served basis as space is limited. The public meeting is physically accessible to people with disabilities. Individuals requiring accommodations, such as sign language interpretation or other ancillary aids, are asked to notify Mr. Reed at (202) 482–5955 or *dreed@ntia.doc.gov* at least ten (10) business days before the meeting.

Status: Interested parties and members of the public are invited to attend and to submit written comments to the Committee at any time before or after the meeting. Parties wishing to submit written comments for consideration by the Committee in advance of a meeting may send them via postal mail to Commerce Spectrum Management Advisory Committee, National Telecommunications and Information Administration, 1401 Constitution Avenue NW., Room 4600, Washington, DC 20230. It would be helpful if paper submissions also include a compact disc (CD) that contains the comments in Microsoft Word and/or PDF file formats. CDs should be labeled with the name and organizational affiliation of the filer. Alternatively, comments may be submitted via electronic mail to *dreed@ntia.doc.gov* and should also be in one or both of the file formats specified above. Comments must be received five (5) business days before the scheduled meeting date in order to provide sufficient time for review. Comments received after this date will be distributed to the Committee, but may not be reviewed prior to the meeting.

Records: NTIA maintains records of all Committee proceedings. Committee records are available for public inspection at NTIA's Washington, DC office at the address above. Documents including the Committee's charter, member list, agendas, minutes, and reports are available on NTIA's Web site at *https://www.ntia.doc.gov/category/csmac.*

Dated: June 27, 2017.

Kathy D. Smith,

Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510–60–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

[Docket No. PTC–C–2017–0028]

Patent and Trademark Public Advisory Committees

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice and request for nominations for the Patent and Trademark Public Advisory Committees.

SUMMARY: On November 29, 1999, the President signed into law the Patent and Trademark Office Efficiency Act (the ''Act''), Public Law 106–113, which, among other things, established two Public Advisory Committees to review the policies, goals, performance, budget and user fees of the United States Patent and Trademark Office (USPTO) with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee, and to advise the Director on these matters. The America Invents Act Technical Corrections Act made several amendments to the 1999 Act, including the requirement that the terms of the USPTO Public Advisory Committee members be realigned by 2014, so that December 1 be used as the start and end date, with terms staggered so that each year three existing terms expire and three new terms begin on December 1. Through this Notice, the USPTO is requesting nominations for up to three (3) members of the Patent Public Advisory Committee, and for up to three (3) members of the Trademark Public Advisory Committee, for terms of three years that begin on December 1, 2017.

DATES: Nominations must be postmarked or electronically transmitted on or before July 25, 2017.

ADDRESSES: Persons wishing to submit nominations should send the nominee's resumé by postal mail to Brendan McCommas, Acting Chief of Staff, Office of the Under Secretary of Commerce for Intellectual Property and Director of the

USPTO, Post Office Box 1450, Alexandria, Virginia 22313–1450 or by electronic mail to: *PPACnominations@uspto.gov* for the Patent Public Advisory Committee, or *TPACnominations@uspto.gov* for the Trademark Public Advisory Committee.

FOR FURTHER INFORMATION CONTACT: Brendan McCommas, Acting Chief of Staff, Office of the Under Secretary of Commerce for Intellectual Property and Director of the USPTO, at (571) 272–8600.

SUPPLEMENTARY INFORMATION: The Advisory Committees' duties include:

- Review and advise the Under Secretary of Commerce for Intellectual Property and Director of the USPTO on matters relating to policies, goals, performance, budget, and user fees of the USPTO relating to patents and trademarks, respectively; and
- Within 60 days after the end of each fiscal year: (1) Prepare an annual report on matters listed above; (2) transmit the report to the Secretary of Commerce, the President, and the Committees on the Judiciary of the Senate and the House of Representatives; and (3) publish the report in the Official Gazette of the USPTO.

Advisory Committees

The Public Advisory Committees are each composed of nine (9) voting members who are appointed by the Secretary of Commerce (the ''Secretary'') and serve at the pleasure of the Secretary for three-year terms. Members are eligible for reappointment for a second consecutive three-year term. The Public Advisory Committee members must be citizens of the United States and are chosen to represent the interests of diverse users of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee. Members must represent small and large entity applicants located in the United States in proportion to the number of applications filed by such applicants. The Committees must include individuals with ''substantial background and achievement in finance, management, labor relations, science, technology, and office automation.'' 35 U.S.C. 5(b)(3). Each of the Public Advisory Committees also includes three (3) non-voting members representing each labor organization recognized by the USPTO. Administration policy discourages the appointment of federally registered lobbyists to agency advisory boards and commissions (Lobbyists on Agency Boards and Commissions, *http://www.whitehouse.gov/blog/2009/09/23/lobbyist-agency-boards-and-commissions* (Sept. 23, 2009)); cf. Exec. Order No. 13490, 74 FR 4673 (January 21, 2009) (While Executive Order 13490 does not specifically apply to federally registered lobbyists appointed by agency or department heads, it sets forth the Administration's general policy of decreasing the influence of special interests in the Federal Government).

Procedures and Guidelines of the Patent and Trademark Public Advisory Committees

Each newly appointed member of the Patent and Trademark Public Advisory Committees will serve for a three-year term that begins on December 1, 2017, and ends on December 1, 2020. As required by the 1999 Act, members of the Patent and Trademark Public Advisory Committees will receive compensation for each day (including travel time) while the member is attending meetings or engaged in the business of that Advisory Committee. The enabling statute states that members are to be compensated at the daily equivalent of the annual rate of basic pay in effect for level III of the Executive Schedule under section 5314 of Title 5, United States Code. Committee members are compensated on an hourly basis, calculated at the daily rate. While away from home or regular place of business, each member shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by Section 5703 of Title 5, United States Code.

Applicability of Certain Ethics Laws

Public Advisory Committee Members are Special Government Employees within the meaning of Section 202 of Title 18, United States Code. The following additional information includes several, but not all, of the ethics rules that apply to members, and assumes that members are not engaged in Public Advisory Committee business more than 60 days during any period of 365 consecutive days.

- Each member will be required to file a confidential financial disclosure form within thirty (30) days of appointment. 5 CFR 2634.202(c), 2634.204, 2634.903, and 2634.904(b).
- Each member will be subject to many of the public integrity laws, including criminal bars against representing a party in a particular matter that came before the member's committee and that involved at least one specific party. 18 U.S.C. 205(c); *see also* 18 U.S.C. 207 for post-membership bars. A member also must not act on a matter in which the member (or any of certain closely related entities) has a financial interest. 18 U.S.C. 208.
- Representation of foreign interests may also raise issues. 35 U.S.C. 5(a)(1) and 18 U.S.C. 219.

Meetings of the Patent and Trademark Public Advisory Committees

Meetings of each Advisory Committee will take place at the call of the respective Committee Chair to consider an agenda set by that Chair. Meetings may be conducted in person, telephonically, on-line through the Internet, or by other appropriate means. The meetings of each Advisory Committee will be open to the public except each Advisory Committee may, by majority vote, meet in executive session when considering personnel, privileged, or other confidential information. Nominees must have the ability to participate in Committee business through the Internet.

Dated: June 26, 2017.

Joseph Matal,

Performing the Functions and Duties of the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

United States Patent and Trademark Office

International Design Applications (Hague Agreement)

ACTION: Proposed extension of a continuing information collection; comment request.

SUMMARY: The United States Patent and Trademark Office (USPTO), as required by the Paperwork Reduction Act of 1995, invites comments on a proposed extension of an existing collection: 0651–0075 (International Design Applications (Hague Agreement)).

DATES: Written comments must be submitted on or before August 29, 2017.

ADDRESSES: You may submit comments by any of the following methods:

Email: InformationCollection@uspto.gov. Include ''0651–0075 comment'' in the subject line of the message.

Federal Rulemaking Portal: http://www.regulations.gov.

Mail: Marcie Lovett, Records and Information Governance Division Director, Office of the Chief Technology Officer, United States Patent and

Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Rafael Bacares, Senior Legal Advisor, Office of Patent Legal Administration, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–3276; or by email at *Rafael.Bacares@uspto.gov* with ''0651–0075 comment'' in the subject line. Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

Abstract

The Patent Law Treaties Implementation Act of 2012 (PLTIA) amends the patent laws to implement the provisions of the Geneva Act of the Hague Agreement Concerning International Registration of Industrial Designs (hereinafter ''Hague Agreement'') in title 1, and the Patent Law Treaty (PLT) in title 2. The Hague Agreement is an international agreement that enables an applicant to file a single international design application which may have the effect of an application for protection for the design(s) in countries and/or intergovernmental organizations that are Parties to the Hague Agreement (the ''Contracting Parties'') designated in the application. The United States is a Contracting Party to the Hague Agreement, which took effect with respect to the United States on May 13, 2015. The Hague Agreement is administered by the International Bureau (IB) of World Intellectual Property Organization (WIPO) located in Geneva, Switzerland.

Thus, under the Hague Agreement, a U.S. applicant could file an international design application in English ''indirectly'' through the U.S. Patent and Trademark Office (''USPTO''), which will forward the application to the IB or ''directly'' with the IB. The industrial design or designs will be eligible for protection in all the Contracting Parties designated by the applicant.

The IB ascertains whether the international design application complies with formal requirements, registers the international design in the International register, and publishes the international registration in the International Designs Bulletin. The international registration contains all of the data of the international application, any reproduction of the industrial design, date of the international registration, number of the international registration, and relevant class of the International Classification.

The IB will provide a copy of the publication of the international registration to each Contracting party designated by the applicant. A designated Contracting Party may perform a substantive examination of the design application. The USPTO will perform a substantive examination for patentability of the international design application, as in the case of regular U.S. design applications.

The Hague Agreement enables applicants from a Contracting Party to obtain protection of their designs with minimal formality and expense. Additionally, under the Hague Agreement, the international registration can be centrally maintained by the IB. For example, through the IB, applicants can record changes of their representatives or changes in ownership, and renew their international registration.

II. Method of Collection

Most of the items in this collection can be submitted electronically through EFS-Web. The items can also be submitted by mail.

III. Data

Collection Name: International Design Applications (Hague Agreement).

OMB Number: 0651–0075.

IC Instruments and Forms: WIPO DM/1.

Type of Review: Extension of a Previously Reviewed Information Collection.

Affected Public: Business or other for-profits; not-for-profit institutions.

Estimated Number of Responses: 556 responses per year.

Estimated Time per Response: The USPTO estimates that the response time for activities related to International Design Applications will take the public between approximately 15 minutes (0.25 hours) to 6 hours to complete. (See Table 1.) This includes the time to gather the necessary information, create the document, and submit the completed request to the USPTO. The USPTO calculates that, on balance, it takes the same amount of time to do this, regardless of whether the public is submitting the information in paper form or electronically.

Estimated Total Response Burden Hours: 1,898.00 hours.

Estimated Total Annual Respondent (Hourly) Cost Burden: $778,180. The USPTO expects that an attorney will complete these applications. The professional hourly rate for attorneys is $410. This rate is established by estimates in the 2015 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association. Using this hourly rate, the USPTO estimates that the total respondent cost burden for this collection is $778,180 per year.

TABLE 1—ANNUAL HOURLY COST BURDEN

IC No.	Item	Estimated time for response (hours) (a)	Estimated annual responses (b)	Estimated annual burden hours (a) × (b) = (c)	Rate ($/hr) (d)	Estimated annual burden (c) × (d) = (e)
1	Applicant for International Registration	6.00	156	936	$410.00	$383,750.00
2	Claim and Reproductions (Drawings)	4.00	156	624	410.00	255,840.00
3	Transmittal Letter	2.00	140	280	410.00	114,800.00
4	Appointment of a Representative	0.25 (15 minutes)	15	3.75	410.00	1,537.50
5	Petition to Excuse a Failure to Comply with a Time Limit.	4.00	1	4	410.00	1,640.00
6	Petition to Convert to a Design Application under 35 U.S.C. Chapter 16.	4.00	1	4	410.00	1,640.00
7	Petition to Review a Filing Date	4.00	2	8	410.00	3,280.00
8	Fee Authorization	0.25 (15 minutes)	31	7.75	410.00	3,177.50
9	Petitions to the Commissioner	4.00	1	4	410.00	1,640.00

TABLE 1—ANNUAL HOURLY COST BURDEN—Continued

IC No.	Item	Estimated time for response (hours) (a)	Estimated annual responses (b)	Estimated annual burden hours (a) × (b) = (c)	Rate ($/hr) (d)	Estimated annual burden (c) × (d) = (e)
10	Transmittal of Issue Fee to UPSTO for an International Design Application.	0.50 (30 minutes)	1	0.50	410.00	205.00
11	Declaration on Inventorship for Purposes of Designation of the United States.	0.50 (30 minutes)	46	23	410.00	9,430.00
12	Substitute Statement in Lieu of a Declaration of Inventorship for the Purposes of Designating the United States.	0.50 (30 minutes)	1	0.50	410.00	205.00
13	Assignment Cover Sheet	0.50 (30 minutes)	5	0.50	410.00	1,025.00
Totals			556	1,898.00		778,180.00

Estimated Total Annual (Non-hour) Respondent Cost Burden: $424,245.90.

There are no maintenance, operation, capital start-up, or recordkeeping costs associated with this collection. However, this collection does have annual (non-hour) costs in the form of postage costs and filing fees.

Although the USPTO prefers that the items in this collection be submitted electronically, the items may be submitted by mail through the United States Postal Service (USPS). The USPTO estimates that the average cost for a paper submission will be $5.95 and that 62 submissions will be mailed to the USPTO per year.

TABLE 2—POSTAGE COSTS

IC No.	Item	Estimated annual responses (a)	Postage costs (b)	Estimated total postage costs (c) (a) × (b)
1	Applicant for International Registration	1	$5.95	$5.95
2	Claim and Reproductions (Drawings)	1	5.95	5.95
3	Transmittal Letter	1	5.95	5.95
4	Appointment of a Representative	1	5.95	5.95
5	Petition to Excuse a Failure to Comply with a Time Limit	1	5.95	5.95
6	Petition to Convert to a Design Application under 35 U.S.C. Chapter 16.	1	5.95	5.95
7	Petition to Review a Filing Date	1	5.95	5.95
8	Fee Authorization	1	5.95	5.95
9	Petitions to the Commissioner	1	5.95	5.95
10	Transmittal of Issue Fee to USPTO for an International Design Application.	1	5.95	5.95
11	Declaration on Inventorship for Purposes of Designation of the United States.	46	5.95	273.70
12	Substitute Statement in Lieu of a Declaration of Inventorship for the Purposes of Designating the United States.	1	5.95	5.95
13	Assignment Cover Sheet	5	5.95	29.75
Total Postage Costs	62		368.90	

This collection also contains an annual (non-hour) cost burden in the way of filing fees. The total estimated filing costs for this collection is $423,876 detailed in Table 3 below.

TABLE 3—FILING FEES

IC No.	Item	Estimated annual response (a)	Filing fee amount (b)	Total filing fee cost (c) (a) × (b)
1	Application for International Registration (electronic)—Average Fee per registration to WIPO (collecting for WIPO).	155	$1,766.00	$273,730.00

7	Petition to Review a Filing Date (non-electronic) (large entity)	1	400.00	400.00
7	Petition to Review a Filing Date (non-electronic) (small entity)	1	200.00	200.00
7	Petition to Review a Filing Date (non-electronic) (micro entity)	1	100.00	100.00
9	Petitions to Commissioner (electronic) (large entity)	1	400.00	400.00
9	Petitions to Commissioner (electronic) (small entity)	1	200.00	200.00
9	Petitions to Commissioner (electronic) (micro entity)	1	100.00	100.00
	Totals	493		423,876.00

The USPTO estimates that the total annual (non-hour) respondent cost burden for this collection in the forms of postage costs and filing fees is estimated to be approximately be $424,245.90 per year ($368.90 in postage costs and $423,876 in filing fees).

IV. Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the USPTO's request for OMB approval. All comments will become a matter of public record.

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) The accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of the collection of information on respondents, *e.g.,* the use of automated

collection techniques or other forms of information technology.

Marcie Lovett,

Records and Information Governance Division Director, USPTO, Office of the Chief Technology Officer.

BILLING CODE P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletion

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to and Deletion from the Procurement List.

SUMMARY: The Committee is proposing to add products and services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes a service previously furnished by such agency.

Comments Must Be Received on or Before: 7/30/2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION OR TO SUBMIT COMMENTS CONTACT: Amy B. Jensen, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

The following products and services are proposed for addition to the Procurement List for production by the nonprofit agencies listed.

Products

NSN(s)—Product Name(s):

9930–00–NIB–0105—Kit, Post Mortem Bag, Basic, Straight Zipper, 36″ × 90″

9930–00–NIB–0106—Kit, Post Mortem Bag, Basic, Curved Zipper, 36″ × 90″

9930–00–NIB–0107—Kit, Post Mortem Bag, Heavy Duty, 36″ × 90″

9930–00–NIB–0108—Kit, Post Mortem Bag, Heavy Duty, XL, 72″ × 90″

9930–00–NIB–0109—Kit, Disaster Bag with ID Tags, 34″ × 96″

Mandatory for: Broad Government Requirement

Mandatory Source(s) of Supply: BOSMA Enterprises, Indianapolis, IN

Contracting Activity: Defense Logistics Agency Troop Support

Distribution: B-List

Services

Service Type: Custodial Service

Mandatory for: Defense Intelligence Agency, Defense Intelligence Agency Headquarters, Building 6000, 200 MacDill Blvd., Joint Base Anacostia-Bolling, Washington, DC

Defense Intelligence Agency, Missile and Space Intelligence Center/EOE Complex, Bldgs. 4545 Fowler Rd. & 7533 Mathews Rd., Redstone Arsenal, AL

Mandatory Source(s) of Supply: CW Resources, Inc., New Britain, CT

Contracting Activity: Dept of Defense, Virginia Contracting Agency, DIAC CF02E

Service Type: Janitorial Service

Mandatory for: U.S. Census Bureau, National Processing Center, 1201 E 10th Street, Jeffersonville, IN

Mandatory Source(s) of Supply: Rauch, Inc., New Albany, IN

Contracting Activity: Dept of Commerce/Bureau of the Census

Service Type: Base Supply Center Service

Mandatory for: U.S. Air Force, Robins Air Force Base, 375 Perry Street, Suite A, Robins AFB, GA

Mandatory Source(s) of Supply: Alabama Industries for the Blind, Talladega, AL

Contracting Activity: Dept. of the Air Force, FA8501 AFSC PZIO

Deletion

The following service is proposed for deletion from the Procurement List:

Service

Service Type: Janitorial/Custodial Service

Mandatory for: U.S. Army Reserve Center: 10541 Calle Lee, Building 2, Los Alamitos, CA

Mandatory Source(s) of Supply: Elwyn, Aston, PA

Contracting Activity: Dept of the Army, W6QM MICC–MOFFETT FIELD

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and Deletions from the Procurement List.

SUMMARY: This action adds products and services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products and services from the Procurement List previously furnished by such agencies.

DATES Effective Date: 7/30/2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Amy B. Jensen, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION

Additions

On 5/26/2017 (82 FR 24308–24309), 6/2/2017 (82FR 25602), and 6/16/2017 (82 FR 27698), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and services and impact of the additions on the current or most recent contractors, the Committee has determined that the products and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. The action will result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products and services are added to the Procurement List:

Products

NSN(s)—Product Name(s):
MR 10760—Activity Pack, Licensed, Pokemon, Includes Shipper 20760
MR 10761—Sticker Pack, Licensed, Pokemon, Includes Shipper 20760
MR 10762—Pen, Licensed, Pokemon, Includes Shipper 20762
MR 10763—Kid's Baking Tools, Licensed, Whisk and Spoon, Includes Shipper 20763
MR 10764—Kid's Baking Tools, Licensed, Turner and Spatula, Includes Shipper 20763
MR 10765—Kid's Baking Tools, Licensed, Rolling Pin and Cookie Cutters, Includes Shipper 20763
MR 10766—Kid's Baking Tools, Licensed, Decorating Set, Includes Shipper 20763
Mandatory Source(s) of Supply: Winston-Salem Industries for the Blind, Inc., Winston-Salem, NC
NSN(s)—Product Name(s):
MR 1176—Mop, Sticky
MR 1177—Refill, Mop, Sticky
Mandatory Source(s) of Supply: LC Industries, Inc., Durham, NC
NSN(s)—Product Name(s): MR 804—Grill Basket
Mandatory Source(s) of Supply: Cincinnati Association for the Blind, Cincinnati, OH

The following information is applicable to all products listed above.

Mandatory for: The requirements of military commissaries and exchanges in accordance with the Code of Federal Regulations 41 CFR 51–6.4.
Contracting Activity: Defense Commissary Agency
Distribution: C-List

Services

Service Type: Individual Equipment Elements (IEE) Store
Mandatory for: U.S. Air Force, Elmendorf AFB, 10480 Sijan Avenue, Joint Base Elmendorf-Richardson, AK
Mandatory Source(s) of Supply: RLCB, Inc., Raleigh, NC
Contracting Activity: DEPT OF THE AIR FORCE, FA5000 673 CONS LGC
Service Type: Dispenser Machine Support Service
Mandatory for: U.S. Navy, Naval Medical Center San Diego, 34800 Bob Wilson Drive, San Diego, CA
Mandatory Source(s) of Supply: Job Options, Inc., San Diego, CA
Contracting Activity: DEPT OF THE NAVY, NAVAL MEDICAL CENTER
Service Type: Grounds Maintenance
Mandatory for: U.S. Coast Guard, U.S. Coast Guard Base Los Angeles/Long Beach, 1001 S. Seaside Avenue, San Pedro, CA
Mandatory Source(s) of Supply: Goodwill Industries of Southern California, Panarama City, CA
Contracting Activity: U.S. COAST GUARD, SILC BSS (00084)

Deletions

On 5/19/2017 (82 FR 22972) and 5/26/2017 (82 FR 24308–24309), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the product(s) and/or service(s) listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSN(s)—Product Name(s): 5340–00–NSH–0008—Loop, Kevlar
5340–00–NSH–0009—Link, Quick Release
Mandatory Source(s) of Supply: Community Option Resource Enterprises, Inc. (COR Enterprises), Billings, MT
Contracting Activity: NAVSUP WEAPON SYSTEMS SUPPORT
NSN(s)—Product Name(s): MR 508—Candle, Spring Scents
Mandatory Source(s) of Supply: South Texas Lighthouse for the Blind, Corpus Christi, TX
Contracting Activity: Defense Commissary Agency
NSN(s)—Product Name(s): 8410–01–069–6611—Shirt, Dress, Navy, Women's, Short Sleeved, White, 32 × 13
Mandatory Source(s) of Supply: Middle Georgia Diversified Industries, Inc., Dublin, GA
Contracting Activity: Defense Logistics Agency Troop Support
NSN(s)—Product Name(s):
8415–01–390–8537—Coat, Combat Type VI, Army, Woodland Camouflage, XS/XS
8415–01–390–8538—Coat, Combat Type VI, Army, Woodland Camouflage, XS/R
8415–01–390–8539—Coat, Combat Type VI, Army, Woodland Camouflage, Small/Short
8415–01–390–8540—Coat, Combat Type VI, Army, Woodland Camouflage, Small/X Long
8415–01–390–8541—Coat, Combat Type VI, Army, Woodland Camouflage, Medium/X Short
8415–01–390–8542—Coat, Combat Type VI, Army, Woodland Camouflage, Medium/XX Short
8415–01–390–8543—Coat, Combat Type VI, Army, Woodland Camouflage, Small/Long
8415–01–390–8544—Coat, Combat Type VI, Army, Woodland Camouflage, Medium Regular
8415–01–390–8545—Coat, Combat Type VI, Army, Woodland Camouflage, Small/Regular
8415–01–390–8546—Coat, Combat Type VI, Army, Woodland Camouflage, X Small/Short
8415–01–390–8547—Coat, Combat Type VI, Army, Woodland Camouflage, Medium/X Long
8415–01–390–8548—Coat, Combat Type VI, Army, Woodland Camouflage, Medium/Short
8415–01–390–8549—Coat, Combat Type VI, Army, Woodland Camouflage, Medium/Long
8415–01–390–8550—Coat, Combat Type VI, Army, Woodland Camouflage, Large/Regular
8415–01–390–8551—Coat, Combat Type VI, Army, Woodland Camouflage, Large/X Long
8415–01–390–8552—Coat, Combat Type VI, Army, Woodland Camouflage, X Large/Long
8415–01–390–8553—Coat, Combat Type VI, Army, Woodland Camouflage, Large/Long
8415–01–390–8555—Coat, Combat Type VI, Army, Woodland Camouflage, XLR
8415–01–390–8557—Coat, Combat Type VI, Army, Woodland Camouflage, LXS
8415–01–390–9641—Coat, Combat Type VI, Army, Woodland Camouflage, XSS

DEPARTMENT OF DEFENSE

Office of the Secretary

TRICARE; Calendar Year 2018 TRICARE Young Adult Program Premium Update

AGENCY: Office of the Secretary of Defense, Department of Defense.

ACTION: Notice of updated TRICARE Young Adult Premiums for Calendar Year 2018.

SUMMARY: This notice provides the updated TRICARE Young Adult program premiums for Calendar Year (CY) 2018.

DATES: The CY 2018 rates contained in this notice are effective for services on or after January 1, 2018.

ADDRESSES: Defense Health Agency, TRICARE Health Plan, 7700 Arlington Boulevard, Suite 5101, Falls Church, Virginia 22042–5101.

FOR FURTHER INFORMATION CONTACT: Mr. Mark A. Ellis, (703) 681–0039.

SUPPLEMENTARY INFORMATION: The final rule published in the **Federal Register** (FR) on May 29, 2013 (78 FR 32116–32121) sets forth rules to implement the TRICARE Young Adult (TYA) program as required by Title 10, United States Code, Section 1110b. Included in the final rule were provisions for updating the TYA premiums for each CY. By law, qualified young adult dependents are charged TYA premiums that represent the full government cost of providing such coverage.

The Defense Health Agency has updated the monthly premiums for CY 2018 as shown below:

MONTHLY TYA PREMIUMS FOR CY 2018

Type of coverage	Monthly rate
TRICARE Select Plans	$225
TRICARE Prime Plans	324

The above premiums are effective for services rendered on or after January 1, 2018.

Dated: June 26, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board; Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The Defense Science Board (DSB) 2017 Summer Study Task Force on Countering Anti-access Systems with Longer Range and Standoff Capabilities (''the Long Range Effects 2017 Summer Study Task Force'') will meet in closed session on Thursday, July 13, 2017 from 7:55 a.m. to 4:00 p.m. and Friday, July 14, 2017 from 8:00 a.m. to 4:00 p.m. at Strategic Analysis Inc., The Executive Conference Center, 4075 Wilson Boulevard, 3rd Floor, Arlington, VA 22203.

DATES: Thursday, July 13, 2017 from 7:55 a.m. to 4:00 p.m. and Friday, July 14, 2017 from 8:00 a.m. to 4:00 p.m.

ADDRESSES: Strategic Analysis Inc., The Executive Conference Center, 4075 Wilson Boulevard, 3rd Floor, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Defense Science Board Designated Federal Officer (DFO) Ms. Karen D.H. Saunders, (703) 571–0079 (Voice), (703) 697–1860 (Facsimile), *karen.d.saunders.civ@mail.mil* (Email). Mailing address is Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301–3140. Web site: *http://www.acq.osd.mil/dsb/.* The most up-to-date changes to the meeting agenda can be found on the Web site.

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the Defense Science Board was unable to provide public notification concerning its meeting on July 13 through 14, 2017, of the Defense Science Board 2017 Summer Study Task Force on Countering Anti-access Systems with Longer Range and Standoff Capabilities, as required by 41 CFR 102–3.150(a). Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

The mission of the DSB is to provide independent advice and recommendations on matters relating to the Department of Defense's (DoD) scientific and technical enterprise. The objective of the Long Range Effects 2017 Summer Study Task Force is to explore new defense systems and technologies that will enable cost effective power projection that relies on the use of longer stand-off distances than current capabilities. System components may be deployed on manned or unmanned platforms with a range of potential autonomous capabilities. Use of cost reducing technology and advanced production practices from defense and commercial industry may be a major part of the strategy for deploying adequate numbers of weapons. This two-day session will focus on coalescing all the information from briefings presented during the January, February, March, April, and May meetings of the Long Range Effects 2017 Summer Study Task Force. The four panels (Architecture; Intelligence, Surveillance, and Reconnaissance; Basing, Delivery, and Weapons; and Command, Control, Communications, and Cyber) will meet simultaneously to discuss topics and analyze data in support of the study. Day Two will close with discussion of the four panels' work.

In accordance with section 10(d) of the FACA and 41 CFR 102–3.155, the DoD has determined that the Long Range Effects 2017 Summer Study Task

Force meeting will be closed to the public. Specifically, the Under Secretary of Defense (Acquisition, Technology, and Logistics), in consultation with the DoD Office of General Counsel, has determined in writing that the meeting will be closed to the public because matters covered by 5 U.S.C. 552b(c)(1) will be considered. The determination is based on the consideration that it is expected that discussions throughout will involve classified matters of national security concern. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meetings. To permit the meeting to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DSB's findings and recommendations to the Secretary of Defense and to the Under Secretary of Defense for Acquisition, Technology, and Logistics.

In accordance with section 10(a)(3) of the FACA and 41 CFR 102–3.105(j) and 102–3.140, interested persons may submit a written statement for consideration by the Long Range Effects 2017 Summer Study Task Force members at any time regarding its mission or in response to the stated agenda of a planned meeting. Individuals submitting a written statement must submit their statement to the DSB's DFO—Ms. Karen D.H. Saunders, Executive Director, Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301, via email at *karen.d.saunders.civ@mail.mil* or via phone at (703) 571–0079 at any point; however, if a written statement is not received at least 3 calendar days prior to the meeting, which is the subject of this notice, then it may not be provided to or considered by the Long Range Effects 2017 Summer Study Task Force until the next meeting of this task force. The DFO will review all submissions with the Long Range Effects 2017 Summer Study Task Force Co-Chairs and ensure they are provided to Long Range Effects 2017 Summer Study Task Force members prior to the end of the two day meeting on July 14, 2017.

Dated: June 26, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2017–13691 Filed 6–29–17; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Public Meetings for the Draft Environmental Impact Statement/ Overseas Environmental Impact Statement for Navy Atlantic Fleet Training and Testing

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969 and regulations implemented by the Council on Environmental Quality, the Department of the Navy (DoN) has prepared and filed with the U.S. Environmental Protection Agency a Draft Environmental Impact Statement (EIS)/Overseas EIS (OEIS) for public release on June 30, 2017, to evaluate the potential environmental effects from training and testing activities conducted within the Navy's Atlantic Fleet Training and Testing (AFTT) Study Area.

The Study Area is in the western Atlantic Ocean and encompasses the waters along the east coast of North America, the Gulf of Mexico, portions of the Caribbean Sea, Navy pierside locations and port transit channels, waters near civilian ports, and inland waters (*e.g.,* lower Chesapeake Bay). The Study Area covers approximately 2.6 million square nautical miles of ocean area and includes designated Navy operating areas and special use airspace.

The National Marine Fisheries Service (NMFS) is a Cooperating Agency for the EIS/OEIS.

With the filing of the Draft EIS/OEIS, the DoN is initiating a 60-day public comment period and has scheduled five public meetings to receive oral and written comments on the Draft EIS/OEIS. This notice announces the dates and locations of the public meetings for this Draft EIS/OEIS and provides supplementary information about the environmental planning effort.

Dates and Addresses: The Draft EIS/OEIS public review period will begin June 30, 2017, and end on August 29, 2017. The Navy will hold five public meetings to inform the public about the Proposed Action and the alternatives under consideration, and to provide an opportunity for the public to comment on the Proposed Action, alternatives, and the adequacy and accuracy of the analysis in the Draft EIS/OEIS. Each of the public meetings will be conducted in an open-house format with informational stations staffed by DoN representatives. These representatives will be available during the public meeting to clarify information related to the Draft EIS/OEIS. Federal, state, and local agencies and officials, and interested groups and individuals are encouraged to provide comments in person at any of the public meetings or in writing during the public comment period.

The public meetings will be held between 4 p.m. and 8 p.m. on the following dates and at the following locations:

1. Wednesday, July 19, 2017, Hotel Providence, 139 Mathewson Street, Providence, RI 02903.

2. Tuesday, July 25, 2017, UNC Institute of Marine Sciences, 3431 Arendell Street, Morehead City, NC 28557.

3. Wednesday, July 26, 2017, Nauticus, 1 Waterside Drive, Norfolk, VA 23510.

4. Tuesday, August 1, 2017, Prime F. Osborn III Convention Center, 1000 Water Street, Jacksonville, FL 32204.

5. Thursday, August 3, 2017, Gulf Coast State College Conference Center, 5230 W. Highway 98, Panama City, FL 32401.

Attendees will be able to submit comments in writing or orally using a voice recorder at the public meetings. Equal weight will be given to oral and written statements. Comments may also be submitted by U.S. postal mail or electronically via the project Web site provided below. Written comments may be submitted by mail to Naval Facilities Engineering Command Atlantic, Attn: Code EV22KP (AFTT EIS Project Managers), 6506 Hampton Boulevard, Norfolk, VA 23508–1278 and through the project Web site; all written comments must be post marked or received by August 29, 2017. All statements, oral or written, submitted during the public review period will become part of the public record on the Draft EIS/OEIS and will be considered in preparation of the Final EIS/OEIS.

Public meeting details will also be announced in local newspapers and on the project Web site: *www.AFTTEIS.com.*

FOR FURTHER INFORMATION CONTACT: Naval Facilities Engineering Command Atlantic, Attn: Code EV22KP (AFTT EIS Project Managers), 6506 Hampton Boulevard, Norfolk, VA 23508–1278.

SUPPLEMENTARY INFORMATION: A Notice of Intent (NOI) to prepare this DEIS/OEIS was published in the **Federal Register** on November 12, 2015, (Vol. 80, No. 218, p. 69951). A correction to the Notice of Intent was issued on December 1, 2015 and published in the **Federal Register** (Vol. 80, No. 230, p.

75076) to update the deadline for comment submission.

The DoN's Proposed Action is to conduct military readiness training activities, and research, development, testing, and evaluation activities in the AFTT Study Area. These military readiness activities include the use of active sonar and explosives within existing range complexes and testing ranges and additional areas located in the Atlantic Ocean along the eastern coast of North America, in portions of the Caribbean Sea, the Gulf of Mexico, at Navy pierside locations and port transit channels, near civilian ports, and in bays, harbors, and inland waterways (*e.g.,* the lower Chesapeake Bay). These military readiness activities are generally consistent with those analyzed in the AFTT EIS/OEIS completed in December 2013 and are representative of training and testing that the Navy has been conducting in the AFTT Study Area for decades.

Potential direct, indirect, cumulative, short-term, long-term, irreversible, and irretrievable impacts to the environment from two action alternatives and a No Action Alternative are evaluated in the Draft EIS/OEIS. Resources evaluated include air quality, sediments and water quality, vegetation, invertebrates, marine habitats, fish, marine mammals, sea turtles and other marine reptiles, birds and bats, cultural resources, socioeconomic resources, and public health and safety.

Based on the results of the analysis, the Navy has requested from NMFS a Letter of Authorization (LOA) in accordance with the MMPA to authorize the incidental take of marine mammals that may result from the implementation of the activities analyzed in the AFTT Draft EIS/OEIS. In accordance with Section 7 of the Endangered Species Act, the Navy is consulting with NMFS and U.S. Fish and Wildlife Service (USFWS) for potential impacts to federally listed species. The Navy will complete all required consultations and comply with other applicable laws and regulations.

The Draft EIS/OEIS addresses mitigation measures designed to help reduce or avoid potential impacts to marine resources, including new mitigation measures that include expanded geographic mitigation areas, and updates to procedural mitigation measures. In addition, the Draft EIS/OEIS addresses marine species monitoring efforts designed to track compliance with authorizations and to investigate the effectiveness of mitigation measures implemented as part of the Proposed Action. The proposed mitigation measures, including new mitigation measures, would be implemented under either alternative in order to maximize the mitigation benefits to the environment.

Mitigation measures are being coordinated through the consultation and permitting processes. The DoN will also consider public comments on proposed mitigation measures described in this Draft EIS/OEIS.

Notice of the availability of the draft EIS/OEIS was distributed to federal, state, and local agencies, elected officials, and other interested individuals and organizations. Copies of the Draft EIS/OEIS are available for public review at the following libraries:

1. Anne Arundel County Public Library, 5 Harry S. Truman Parkway, Annapolis, MD 21401.
2. Bay County Public Library, 898 West 11th Street, Panama City, FL 32401.

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

[Docket ID ED–2017–FSA–0047]

Privacy Act of 1974; Matching Program

AGENCY: Department of Education.

ACTION: Notice of the re-establishment of a computer matching program.

SUMMARY: This document provides notice of the re-establishment of a computer matching program between the Department of Education (ED) and the Defense Manpower Data Center (DMDC) of the U.S. Department of Defense (DoD).

DATES: We must receive your comments on or before July 31, 2017.

The re-established matching program will be effective on the latest of the following three dates: (A) August 1,

2017; (B) 30 days from June 30, 2017, as required by 5 U.S.C. 552a(e)(12) and OMB Circular A–108, assuming that ED receives no public comments or receives public comments but makes no changes to this notice as a result of the public comments, or 30 days from the date on which ED publishes a subsequent matching program notice in the **Federal Register**, assuming that ED receives public comments and revises this notice as a result of public comments; or (C) 60 days from the date on which ED transmits the report of the matching program, as required by 5 U.S.C. 552a(r) and OMB Circular A–108, to OMB, the U.S. House Committee on Oversight and Government Reform, and the U.S. Senate Committee on Homeland Security and Governmental Affairs, unless OMB waives any days of the 60-day review period for compelling reasons, in which case 60 days minus the number of days waived by OMB from the date of ED's transmittal of the report of the matching program.

The matching program will continue for 18 months after the effective date and may be extended for an additional 12 months thereafter, if the conditions specified in 5 U.S.C. 552a(o)(2)(D) have been met.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the ''help'' tab.
- *Postal Mail, Commercial Delivery, or Hand Delivery:* If you mail or deliver your comments, address them to Marya Dennis, Management and Program Analyst, U.S. Department of Education, Federal Student Aid, Union Center Plaza, 830 First Street NE., Washington, DC 20002–5345.

Privacy Note: ED's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Ms. Marya Dennis, Management and Program Analyst, U.S. Department of Education, Federal Student Aid, Union Center Plaza, 830 First Street NE., Washington, DC 20002–5345. Telephone: (202) 377–3385.

If you use a telecommunications device for the deaf or a text telephone, call the Federal Relay Service, toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: We provide this notice in accordance with 5 U.S.C. 552a (commonly known as the Privacy Act of 1974, as amended); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and OMB Circular A–108, 81 FR 94424 (December 23, 2016), *https://obamawhitehouse.archives.gov/sites/default/files/omb/assets/OMB/circulars/a108/omb_circular_a-108.pdf.*

Under sections 420R and 473(b) of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1070h and 20 U.S.C. 1087mm(b)), the Secretary of Defense must provide the Secretary of Education with information to identify the children of military personnel who have died as a result of their military service in Iraq or Afghanistan after September 11, 2001, to determine if the child is eligible for increased amounts of title IV, HEA program assistance. DoD and ED have determined that matching data contained in the DoD DMDC system and the Defense Enrollment Eligibility Reporting System (DEERS) against ED's Federal Student Aid Application File (18–11–01) is the only practical method that the agencies can use to meet the statutory requirements of the HEA.

The prior Computer Matching Agreement (CMA) was published in the **Federal Register** on January 2, 2015 (80 FR 37). Under the provisions of the Computer Matching and Privacy Protection Act of 1988, Public Law 100–503, the CMA was renewed for an additional 12 months through July 31, 2017 because: (1) The program was conducted without change; and (2) each Data Integrity Board Chairperson certified in writing that the program was conducted in compliance with the CMA. ED and DoD are now re-establishing the CMA through this notice.

PARTICIPATING AGENCIES:

ED and DoD

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

Sections 420R and 473(b) of the HEA (20 U.S.C. 1070h and 20 U.S.C. 1087mm(b)) and 5 U.S.C. 552a.

PURPOSES:

This matching program identifies children whose parent or guardian was a member of the Armed Forces of the United States and died as a result of performing military service in Iraq or Afghanistan after September 11, 2001. These children (referred to as qualifying students) may be eligible for a greater amount of title IV, HEA program assistance. A qualifying student must have been age 24 or younger at the time of the parent's or guardian's death, or, if older than 24, enrolled part-time or full-time in an institution of higher education at the time of the parent's or guardian's death. Beginning July 1, 2010, students who are otherwise qualified children of deceased U.S. military who meet the requirements of section 420R of the HEA (20 U.S.C. 1070h) may also be eligible for higher amounts of title IV, HEA program assistance.

CATEGORIES OF INDIVIDUALS:

The individuals whose records are included in this matching program are dependents of service personnel who died as a result of performing their military service in Iraq or Afghanistan after September 11, 2001, which records are located in the DoD DMDC and DEERS systems, and all students who complete a Free Application for Federal Student Aid.

CATEGORIES OF RECORDS:

DoD data include the individual's first and last name, Social Security number (SSN), date of birth, and the parent's or guardian's date of death for each qualifying dependent record. ED uses the SSN, date of birth, and the first two letters of an applicant's last name to match with the Federal Student Aid Application File.

SYSTEM(S) OF RECORDS:

ED system of records: Federal Student Aid Application File (18–11–01) (76 FR 46774). DoD system of records: DMDC 01, Defense Manpower Data Center Data Base (76 FR 72391) (November 23, 2011), and DMDC 02 DoD Defense Enrollment Eligibility Reporting Systems (DEERS) (81 FR 49210) (July 27, 2016).

Accessible Format: Individuals with disabilities can obtain this document in

an accessible format (such as, braille, large print, audiotape, or compact disc) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available through the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: June 27, 2017.

Matthew Sessa,

Acting Chief Operating Officer Federal Student Aid.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Paducah

AGENCY: Department of Energy (DOE).

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Paducah. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, July 20, 2017, 6:00 p.m.

ADDRESSES: Barkley Centre, 111 Memorial Drive, Paducah, Kentucky 42001.

FOR FURTHER INFORMATION CONTACT: Jennifer Woodard, Deputy Designated Federal Officer, Department of Energy Paducah Site Office, Post Office Box 1410, MS–103, Paducah, Kentucky 42001, (270) 441–6825.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management and related activities.

Tentative Agenda

- Call to Order, Introductions, Review of Agenda
- Administrative Issues
- Public Comments (15 minutes)
- Adjourn

Breaks Taken As Appropriate

Public Participation: The EM SSAB, Paducah, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Jennifer Woodard as soon as possible in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Jennifer Woodard at the telephone number listed above. Requests must be received as soon as possible prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments. The EM SSAB, Paducah, will hear public comments pertaining to its scope (clean-up standards and environmental restoration; waste management and disposition; stabilization and disposition of non-stockpile nuclear materials; excess facilities; future land use and long-term stewardship; risk assessment and management; and clean-up science and technology activities). Comments outside of the scope may be submitted via written statement as directed above.

Minutes: Minutes will be available by writing or calling Jennifer Woodard at the address and phone number listed above. Minutes will also be available at the following Web site: *http://www.pgdpcab.energy.gov/2017_meetings.htm.*

Issued at Washington, DC, on June 26, 2017.

LaTanya R. Butler,

Deputy Committee Management Officer.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[9963–90–OEI]

Cross-Media Electronic Reporting: Authorized Program Revision Approval, State of Idaho

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of the State of Idaho's request to revise its National Primary Drinking Water Regulations Implementation EPA-authorized program to allow electronic reporting.

DATES: EPA's approval is effective July 31, 2017 for the State of Idaho's National Primary Drinking Water Regulations Implementation program, if no timely request for a public hearing is received and accepted by the Agency.

FOR FURTHER INFORMATION CONTACT: Karen Seeh, U.S. Environmental Protection Agency, Office of Environmental Information, Mail Stop 2823T, 1200 Pennsylvania Avenue NW., Washington, DC 20460, (202) 566–1175, *seeh.karen@epa.gov.*

SUPPLEMENTARY INFORMATION: On October 13, 2005, the final Cross-Media Electronic Reporting Rule (CROMERR) was published in the **Federal Register** (70 FR 59848) and codified as part 3 of title 40 of the CFR. CROMERR establishes electronic reporting as an acceptable regulatory alternative to paper reporting and establishes requirements to assure that electronic documents are as legally dependable as their paper counterparts. Subpart D of CROMERR requires that state, tribal or local government agencies that receive, or wish to begin receiving, electronic reports under their EPA-authorized programs must apply to EPA for a revision or modification of those programs and obtain EPA approval. Subpart D provides standards for such approvals based on consideration of the electronic document receiving systems that the state, tribe, or local government will use to implement the electronic reporting. Additionally, § 3.1000(b) through (e) of 40 CFR part 3, subpart D provides special procedures for program revisions and modifications to allow electronic reporting, to be used at the option of the state, tribe or local government in place of procedures available under existing program-specific authorization regulations. An application submitted under the subpart D procedures must show that the state, tribe or local government has sufficient legal authority to implement the electronic reporting components of the programs covered by the application and will use electronic document receiving systems that meet the applicable subpart D requirements.

On May 5, 2017, the Idaho Department of Environmental Quality (IDEQ) submitted an application titled Compliance Monitoring Data Portal for revision to its EPA-approved drinking water program under title 40 CFR to allow new electronic reporting. EPA reviewed IDEQ's request to revise its EPA-authorized program and, based on this review, EPA determined that the application met the standards for approval of authorized program revision set out in 40 CFR part 3, subpart D. In accordance with 40 CFR 3.1000(d), this notice of EPA's decision to approve Idaho's request to revise its Part 142—National Primary Drinking Water Regulations Implementation program to allow electronic reporting under 40 CFR part 141 is being published in the **Federal Register**.

IDEQ was notified of EPA's determination to approve its application with respect to the authorized program listed above.

Also, in today's notice, EPA is informing interested persons that they may request a public hearing on EPA's action to approve the State of Idaho's request to revise its authorized public water system program under 40 CFR part 142, in accordance with 40 CFR 3.1000(f). Requests for a hearing must be submitted to EPA within 30 days of publication of today's **Federal Register** notice. Such requests should include the following information:

(1) The name, address and telephone number of the individual, organization or other entity requesting a hearing;

(2) a brief statement of the requesting person's interest in EPA's determination, a brief explanation as to why EPA should hold a hearing, and any other information that the requesting person wants EPA to consider when determining whether to grant the request;

(3) the signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

In the event a hearing is requested and granted, EPA will provide notice of the hearing in the **Federal Register** not less than 15 days prior to the scheduled hearing date. Frivolous or insubstantial requests for hearing may be denied by EPA. Following such a public hearing, EPA will review the record of the hearing and issue an order either affirming today's determination or rescinding such determination. If no timely request for a hearing is received and granted, EPA's approval of the State of Idaho's request to revise its part 142—National Primary Drinking Water Regulations Implementation program to allow electronic reporting will become effective 30 days after today's notice is published, pursuant to CROMERR section 3.1000(f)(4).

Matthew Leopard,

Director, Office of Information Management.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[GN Docket No. 17–83]

Second Meeting of the Broadband Deployment Advisory Committee

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Commission announces and provides an agenda for the second meeting of Broadband Deployment Advisory Committee (BDAC).

DATES: Thursday, July 20, 2017, 9:30 a.m.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Room TW–C305, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Brian Hurley, Designated Federal Officer (DFO), at (202) 418–2220 or *brian.hurley@fcc.gov;* or Paul D'Ari, Deputy DFO, at (202) 418–1550 or *paul.dari@fcc.gov.* The TTY number is: (202) 418–0484.

SUPPLEMENTARY INFORMATION: This meeting is open to members of the general public. The FCC will accommodate as many participants as possible; however, admittance will be limited to seating availability. The Commission will also provide audio and/or video coverage of the meeting over the Internet from the FCC's Web page at *www.fcc.gov/live.* Oral statements at the meeting by parties or entities not represented on the BDAC will be permitted to the extent time permits, at the discretion of the BDAC Chair and the DFO. Members of the public may submit comments to the BDAC in the FCC's Electronic Comment Filing System, ECFS, at *www.fcc.gov/ecfs.* Comments to the BDAC should be filed in Docket 17–83.

Open captioning will be provided for this event. Other reasonable accommodations for people with

disabilities are available upon request. Requests for such accommodations should be submitted via email to *fcc504@fcc.gov* or by calling the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY). Such requests should include a detailed description of the accommodation needed. In addition, please include a way for the FCC to contact the requester if more information is needed to fill the request. Please allow at least five days' advance notice; last minute requests will be accepted but may not be possible to accommodate.

Proposed Agenda: At this meeting, the BDAC Working Groups will report on their progress in developing recommendations for the BDAC's consideration. The BDAC also will continue its discussions on how to accelerate the deployment of broadband by reducing and/or removing regulatory barriers to infrastructure investment. This agenda may be modified at the discretion of the BDAC Chair and the DFO.

Federal Communications Commission.

Daniel Kahn,

Chief, Competition Policy Division, Wireline Competition Bureau.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 28, 2017.

A. Federal Reserve Bank of Atlanta (Chapelle Davis, Assistant Vice President) 1000 Peachtree Street NE., Atlanta, Georgia 30309. Comments can also be sent electronically to *Applications.Comments@atl.frb.org:*

1. *WB&T Bankshares, Inc.,* Waycross, Georgia; to acquire 100 percent of the outstanding shares of Pelham Banking Company, Pelham, Georgia.

Board of Governors of the Federal Reserve System, June 27, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Savings and Loan Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Home Owners' Loan Act (12 U.S.C. 1461 *et seq.*) (HOLA), Regulation LL (12 CFR part 238), and Regulation MM (12 CFR part 239), and all other applicable statutes and regulations to become a savings and loan holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a savings association and nonbanking companies owned by the savings and loan holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the HOLA (12 U.S.C. 1467a(e)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 10(c)(4)(B) of the HOLA (12 U.S.C. 1467a(c)(4)(B)). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 28, 2017.

A. Federal Reserve Bank of Atlanta (Chapelle Davis, Assistant Vice President) 1000 Peachtree Street NE., Atlanta, Georgia 30309. Comments can also be sent electronically to *Applications.Comments@atl.frb.org:*

1. *Charter Financial Corporation,* West Point, Georgia; to become a bank holding company by merging with Resurgens Bancorp, and thereby acquiring Resurgens Bank, both of Tucker, Georgia.

In connection with this proposal, Charter Financial will retain ownership of its savings association subsidiary, CharterBank, West Point, Georgia, and thereby engage in operating a savings association, pursuant to section 225.28(b)(4)(ii). Finally, Charter Financial will revert to savings and loan holding company status after the merger of Resurgens Bank with and into CharterBank.

Board of Governors of the Federal Reserve System, June 27, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–17–17CA]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the

burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to *omb@cdc.gov.* Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395–5806. Written comments should be received within 30 days of this notice.

Proposed Project

Positive Health Check Evaluation Trial—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

HIV transmission continues to be an urgent public health challenge in the United States. According to the Centers for Disease Control and Prevention (CDC), approximately 1.2 million people are living with HIV, with close to 50,000 new cases each year. Antiretroviral therapy (ART) suppresses the plasma HIV viral load (VL) and people living with HIV (PLWH) who are treated with ART—compared with those who are not—have enhanced clinical outcomes and a substantially reduced risk of transmitting HIV sexually, through drug sharing, or from mother to child. However, it is estimated that only 30% of people who are infected with HIV in the United States have an undetectable HIV VL. To enhance HIV prevention efforts, implementable, effective, scalable interventions are needed that focus on enhancing prevention and care to improve the health of and reduce HIV transmission risk among PLWH. The Positive Health Check (PHC) intervention is based on earlier computer-based interventions that were proven efficacious for HIV prevention.

The PHC intervention approach is innovative in multiple ways. First, it uses an interactive video doctor to deliver tailored messages that meet specific patient needs related to ART initiation, adherence, sexual risk reduction, engagement in care, mother-to-child transmission, and drug use. Second, this intervention is designed specifically to support improved health outcomes by providing useful behavior-change tips for patients to practice between clinic visits. These tips are generated by the tool and selected by the patient and populated on a handout that is delivered to the patient upon completing the PHC intervention. The handout has no patient-identifying information. Third, PHC supports patient-provider communication by also generating a set of questions that patients may select to ask their provider. These PHC behavior-change tips and questions are populated on a Patient Handout to guide patients' conversations with their providers and if desired, patients may choose to share their handout with their provider. As such, PHC supports the interactions between patients and their providers during their clinical encounter and is intended to improve communication. Finally, the PHC intervention has been designed from the onset for wide-scale dissemination. This web-based intervention can be easily updated and is accessible on multiple mobile devices and platforms. This approach makes PHC an important intervention strategy to improve public health in communities that have a high incidence of HIV infection.

The PHC Evaluation Trial has four primary aims: (1.) Implement a randomized trial to test the effectiveness of the PHC intervention for improving clinical health outcomes, specifically viral load and retention in care; (2.) Conduct a feasibility assessment to determine strategies to facilitate implementation and integration of PHC into the workflow of HIV primary care clinics; (3.) Collect and document data on the cost of PHC intervention implementation; and (4.) Document the standard of care at each participating clinic. The awardee of this cooperative agreement—Research Triangle International (RTI)—has subcontracted with four clinical sites to implement the trial (Atlanta VA Medical Center (Atlanta, GA), Hillsborough County Health Department (Tampa, FL), Rutgers Infectious Disease Clinic (Newark, NJ) and Crescent Care (New Orleans, LA). The four clinical sites) are well suited for this work, given the high rates of patients with elevated viral loads.

During the 36-month study period, 1,010 patients will be enrolled into the trial (505 intervention arm and 505 control arm) across the four clinics to evaluate the effectiveness of the PHC intervention. Upon enrollment, participants will be asked their date of diagnosis. To assess the effectiveness of the PHC intervention (Aim 1), patients randomized to the intervention arm will provide their responses to the patient tailoring questions embedded within the intervention and all enrolled patients will consent to have their de-identified clinical values be made available via passive data collection via the electronic medical record (EMR). In addition to the main trial, three to five key staff at each clinic site will be selected to participate in the PHC feasibility assessment (Aim 2) which includes an online survey and qualitative interviews. Clinic staff will provide data on the cost of implementing the PHC intervention (Aim 3). Finally, the medical director of each clinic will collect data on their clinic's standard of care (Aim 4).

OMB approval is requested for three years. Participation in this study is voluntary. The total estimated annualized burden hours are 419.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Patients Enrolled in the PHC Evaluation Trial	Date of diagnosis question	337	1	1/60
	PHC tailoring questions	168	3	5/60
Staff in PHC Evaluation Clinics	Electronic Medical Record (EMR)	4	4	16
	Online clinic staff survey	20	4	15/60
	Clinic staff qualitative interview	20	4	40/60
	Non-research labor cost questionnaire.	4	1	1.5

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
	PHC labor cost questionnaire	4	1	1.5
	Standard of Care Questionnaire	4	1	1.5
	PHC non-labor cost questionnaire ..	4	12	30/60

Leroy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–2431–N2]

Medicaid Program: Zika Health Care Services Program—Round 2

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the April 7, 2017 posting of a funding opportunity for Round Two of the Zika Health Care Services Program which provides up to $6.45 million to support prevention activities and treatment services for health conditions related to the Zika virus for entities that meet the eligibility requirements of the Zika Health Care Services Program, but that did not receive an award under the Round One Funding Opportunity. The Round Two Funding Opportunity provides two application due dates, May 8, 2017 and July 10, 2017. Entities eligible to apply for this funding opportunity are states, territories, tribes or tribal organizations, with active or local transmission of the Zika virus, as confirmed by the Centers for Disease Control and Prevention (CDC).

DATES: The project period of performance for the Cooperative Agreement will be 36 months from the date of award.

FOR FURTHER INFORMATION CONTACT: Elizabeth Garbarczyk, 410–786–0426.

SUPPLEMENTARY INFORMATION:

I. Background

The Zika Response and Preparedness Act (Pub. L. 114–223) provides $387,000,000 in funding to prevent, prepare for, and respond to the Zika virus. Of the funds appropriated by Public Law (Pub. L.) 114–223, Congress designated $75 million to support states, territories, tribes, or tribal organizations with active or local transmission cases of the Zika virus, as confirmed by the Centers for Disease Control and Prevention (CDC), to reimburse the costs of health care for health conditions related to the Zika virus not covered by private insurance. No less than $60 million of this funding is for territories with the highest rates of Zika transmission.

The Zika Health Care Services Program funding opportunities solicit single source emergency applications for a cooperative agreement aimed at supporting prevention activities and treatment services for women (including pregnant women), children, and men adversely or potentially impacted by the Zika virus.

On January 18, 2017, CMS issued $66.1 million in awards to eligible entities that applied for Round One of the Zika Health Care Services Program (American Samoa, Puerto Rico, U.S. Virgin Islands, and Florida). The Round One Funding Opportunity sought to issue funds to areas of greatest need, while maintaining additional funds to prevent, detect, and respond to future Zika outbreaks.

II. Provisions of the Notice

In accordance with the Zika Response and Preparedness Act (Pub. L. 114–223), entities eligible to apply for this funding opportunity include states, territories, tribes or tribal organizations with active or local transmission of the Zika virus, as confirmed by the Centers for Disease Control and Prevention (CDC). Recipients who previously received a Notice of Award under Round One of the Zika Health Care Services Program, Funding Opportunity Number CMS–1Q1–17–001, are not eligible to apply. As of the first application due date, May 8, 2017, the CDC reports that Texas is the only new area with laboratory-confirmed active or local transmission of the Zika virus; and therefore, this is the only state currently eligible to receive funding as authorized under the legislation.

This funding opportunity has been structured to ensure a comprehensive response to Zika as quickly as possible. Accordingly, the single-source emergency funding opportunity is solely available to the state health department in Texas, based on its ability to quickly and efficiently expand its existing Zika response efforts and to further determine the most effective use and dissemination of funds in its respective jurisdictions. The health department in Texas is uniquely positioned to meet the goals of the emergency cooperative agreement based on its capacity, partnerships, resources, prior experience, and ability to begin implementing the project immediately. Immediate implementation is critical to successfully addressing this rapidly spreading public health threat. The budget and project period under the specific funding opportunity will be 36 months. The total amount of federal funds available in Round Two, for both the May 8, 2017 and July 10, 2017 due dates, is up to $6.45 million. The Texas Department of State Health Services submitted their application, and was the only entity eligible for an award as of the May 8, 2017 application due date. The proposed award amount is $1,800,000.

The second application due date for the Round Two Funding Opportunity is July 10, 2017. Eligibility for the second Round Two application due date is based on the state, territory, tribe, or tribal organization meeting all of the following criteria:

- Has active or local transmission cases of the Zika virus, as confirmed by the CDC.
- Did not receive an award in Round One.
- Has not received a response to an application submitted by the first application due date (May 8, 2017).

III. Collection of Information Requirements

This notice establishes funding opportunities for health departments in areas with laboratory-confirmed active or local Zika virus transmission. The funding opportunity application process constitutes an information collection request. Specifically, this notice

pertains to Round Two for which there is only one eligible respondent (Texas). There were 4 total respondents in Round 1 (American Samoa, Puerto Rico, U.S. Virgin Islands, and Florida). In accordance with the implementing regulations of the Paperwork Reduction Act of 1995 (PRA) at 5 CFR 1320.3(c)(4), we estimate the total number of respondents between Round One and Round Two will not exceed 10 in a 12-month period. Therefore, the associated burden is exempt from the requirements of the PRA (44 U.S.C. 3501 *et seq.*).

Dated: June 13, 2017.

Seema Verma,

Administrator, Centers for Medicare & Medicaid Services.

[FR Doc. 2017–13784 Filed 6–29–17; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10393]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *July 31, 2017.*

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions:

OMB, Office of Information and Regulatory Affairs; Attention: CMS Desk Officer; Fax Number: (202) 395–5806 *OR*, Email: *OIRA_submission@omb.eop.gov.*

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension, revision or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a previously approved collection; *Title of Information Collection:* Beneficiary and Family Centered Data Collection; *Use:* The CMS Quality Improvement Organization (QIO) Program includes Beneficiary and Family Centered Care (BFCC) QIOs whose functions, as set forth in Section 1862(g) of the Social Security Act, are to improve the effectiveness, efficiency, economy, and quality of services delivered to Medicare beneficiaries. To accomplish these goals, the QIOs review health care services funded under Medicare to determine whether those services are reasonable, medically necessary, furnished in the appropriate setting, and meet professionally recognized standards of quality. The QIOs also review health care services where the beneficiary or a representative has complained about the quality of those services or is appealing alleged premature discharge.

Under the current 11th QIO Statement of Work (SOW), two organizations are providing services as BFCC QIOs across all of the United States. The QIO evaluation criteria have been revised to reflect this national regionalization and it is important for CMS to understand the impact on beneficiaries from this reorganization. The information will be used to evaluate the success of each QIO in meeting its contractual requirements and to understand the experience of Medicare beneficiaries and/or their representative with QIO contract mandated work. *Form Number:* CMS–10393 (OMB control number: 0938–1177); *Frequency:* Once; *Affected Public:* Individuals or households; *Number of Respondents:* 24,970; *Number of Responses:* 24,970; *Total Annual Hours:* 2,899. (For policy questions regarding this collection, contact David Russo at 617–565–1310.)

Dated: June 27, 2017.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2017–13835 Filed 6–29–17; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3345–N]

Medicare Program; Meeting of the Medicare Evidence Development and Coverage Advisory Committee—August 30, 2017

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces that a public meeting of the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) (''Committee'') will be held on Wednesday, August 30, 2017. This meeting will specifically focus on obtaining the MEDCAC's recommendations regarding the appraisal of the state of evidence for health outcomes in the Medicare population for surgical and endoscopic procedures for weight loss. This meeting is open to the public in accordance with the Federal Advisory Committee Act.

DATES: *Meeting Date:* The public meeting will be held on Wednesday, August 30, 2017 from 7:30 a.m. until 4:30 p.m., Eastern Daylight Time (EDT).

Deadline for Submission of Written Comments: Written comments must be received at the address specified in the **ADDRESSES** section of this notice by 5:00 p.m., EDT, Monday, July 24, 2017. Once submitted, all comments are final.

Deadlines for Speaker Registration and Presentation Materials: The deadline to register to be a speaker and to submit PowerPoint presentation materials and writings that will be used in support of an oral presentation is 5:00 p.m., EDT on Monday, July 24, 2017. Speakers may register by phone or via email by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Presentation materials must be received at the address specified in the **ADDRESSES** section of this notice.

Deadline for All Other Attendees Registration: Individuals may register online at *http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3* or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by 5:00 p.m. EDT, Wednesday, August 23, 2017. We will be broadcasting the meeting live via Webcast at *http://www.cms.gov/live/.*

Deadline for Submitting a Request for Special Accommodations: Persons attending the meeting who are hearing or visually impaired, or have a condition that requires special assistance or accommodations, are asked to contact the Executive Secretary as specified in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than 5:00 p.m., EDT Friday, August 4, 2017.

ADDRESSES: *Meeting Location:* The meeting will be held in the main auditorium of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244.

Submission of Presentations and Comments: Presentation materials and written comments that will be presented at the meeting must be submitted via email to *MedCACpresentations@cms.hhs.gov* or by regular mail to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the date specified in the **DATES** section of this notice.

FOR FURTHER INFORMATION CONTACT: Maria Ellis, Executive Secretary for MEDCAC, Centers for Medicare & Medicaid Services, Center for Clinical Standards and Quality, Coverage and Analysis Group, S3–02–01, 7500 Security Boulevard, Baltimore, MD 21244 or contact Ms. Ellis by phone (410–786–0309) or via email at *Maria.Ellis@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

MEDCAC, formerly known as the Medicare Coverage Advisory Committee (MCAC), is advisory in nature, with all final coverage decisions resting with CMS. MEDCAC is used to supplement CMS' internal expertise. Accordingly, the advice rendered by the MEDCAC is most useful when it results from a process of full scientific inquiry and thoughtful discussion, in an open forum, with careful framing of recommendations and clear identification of the basis of those recommendations. MEDCAC members are valued for their background, education, and expertise in a wide variety of scientific, clinical, and other related fields. (For more information on MCAC, see the MEDCAC Charter (*http://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/Downloads/medcaccharter.pdf*) and the CMS Guidance Document, *Factors CMS Considers in Referring Topics to the MEDCAC* (*http://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=10*)).

II. Meeting Topic and Format

This notice announces the Wednesday, August 30, 2017, public meeting of the Committee. During this meeting, the Committee will discuss recommendations regarding the appraisal of the state of evidence for health outcomes in the Medicare population for surgical and endoscopic procedures for weight loss. Background information about this topic, including panel materials, is available at *http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=BAAAAAAAAAAA&.* We will no longer be providing paper copies of the handouts for the meeting. Electronic copies of all the meeting materials will be on the CMS Web site no later than 2 business days before the meeting. We encourage the participation of organizations with expertise in health outcomes in the Medicare population for surgical and endoscopic procedures for weight loss. This meeting is open to the public. The Committee will hear oral presentations from the public for approximately 45 minutes. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, we may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by July 31, 2017. Your comments should focus on issues specific to the list of topics that we have proposed to the Committee. The list of research topics to be discussed at the meeting will be available on the following Web site prior to the meeting: *http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=BAAAAAAAAAAA&.* We require that you declare at the meeting whether you have any financial involvement with manufacturers (or their competitors) of any items or services being discussed. Speakers presenting at the MEDCAC meeting should include a full disclosure slide as their second slide in their presentation for financial interests (for example, type of financial association—consultant, research support, advisory board, and an indication of level, such as minor association < $10,000 or major association > $10,000) as well as intellectual conflicts of interest (for example, involvement in a federal or nonfederal advisory committee that has discussed the issue) that may pertain in any way to the subject of this meeting. If you are representing an organization, we require that you also disclose conflict of interest information for that organization. If you do not have a PowerPoint presentation, you will need to present the full disclosure information requested previously at the beginning of your statement to the Committee.

The Committee will deliberate openly on the topics under consideration. Interested persons may observe the deliberations, but the Committee will not hear further comments during this time except at the request of the chairperson. The Committee will also allow a 15-minute unscheduled open public session for any attendee to address issues specific to the topics

under consideration. At the conclusion of the day, the members will vote and the Committee will make its recommendation(s) to CMS.

III. Registration Instructions

CMS' Coverage and Analysis Group is coordinating meeting registration. While there is no registration fee, individuals must register to attend. You may register online at *http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3* or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the deadline listed in the **DATES** section of this notice. Please provide your full name (as it appears on your state-issued driver's license), address, organization, telephone number(s), fax number, and email address. You will receive a registration confirmation with instructions for your arrival at the CMS complex or you will be notified that the seating capacity has been reached.

IV. Security, Building, and Parking Guidelines

This meeting will be held in a federal government building; therefore, federal security measures are applicable. The Real ID Act, enacted in 2005, establishes minimum standards for the issuance of state-issued driver's licenses and identification (ID) cards. It prohibits Federal agencies from accepting an official driver's license or ID card from a state unless the Department of Homeland Security determines that the state meets these standards. Beginning October 2015, photo IDs (such as a valid driver's license) issued by a state or territory not in compliance with the Real ID Act will not be accepted as identification to enter Federal buildings. Visitors from these states/territories will need to provide alternative proof of identification (such as a valid passport) to gain entrance into CMS buildings. The current list of states from which a Federal agency may accept driver's licenses for an official purpose is found at *http://www.dhs.gov/real-id-enforcement-brief.* We recommend that confirmed registrants arrive reasonably early, but no earlier than 45 minutes prior to the start of the meeting, to allow additional time to clear security. Security measures include the following:

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel.
- Inspection of vehicle's interior and exterior (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Inspection, via metal detector or other applicable means, of all persons entering the building. We note that all items brought into CMS, whether personal or for the purpose of presentation or to support a presentation, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for presentation or to support a presentation.

Note: Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting. The public may not enter the building earlier than 45 minutes prior to the convening of the meeting.

All visitors must be escorted in areas other than the lower and first floor levels in the Central Building.

V. Collection of Information

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Authority: 5 U.S.C. App. 2, section 10(a).

Dated: June 22, 2017.

Kate Goodrich,

Director, Center for Clinical Standards and Quality, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[OMB No.: 0970–0422]

Proposed Information Collection Activity; Comment Request

Title: Adoption and Foster Care Analysis Reporting System for title IV–B and title IV–E (AFCARS).

Description: The Adoption and Foster Care Analysis and Reporting System (AFCARS) is mandated by 42 U.S.C. 679. The regulation at 45 CFR 1355 sets forth the requirements of section 479 of the Social Security Act for the collection of uniform, reliable information on children who are under the responsibility of the State or Tribal title IV–B/IV–E agency for placement, care, and adoption. Effective October 1, 2009, section 479B(b) of the Act authorizes direct Federal funding of Indian Tribes, Tribal organizations, and Tribal consortia that choose to operate a foster care, adoption assistance and, at Tribal option, a kinship guardianship assistance program under title IV–E of the Act. The data collected per the requirements at 45 CFR 1355.40 will end September 30, 2019. On October 1, 2019 the data collection will be replaced by the requirements in 45 CFR 1355.41—44, as reflected in the final rule published in the **Federal Register** on December 14, 2016 (81 FR 90524).

The data collected will inform State/Tribal/Federal policy decisions, program management, and responses to Congressional and Departmental inquiries. Specifically, the data are used for short/long-term budget projections, trend analysis, child and family service reviews, and to target areas for improved technical assistance. The data will provide information about foster care placements, adoptive parents, length of time in care, delays in termination of parental rights and placement for adoption.

Respondents: Title IV–E State and Tribal Child Welfare Agencies.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
AFCARS	59	2	2,188	258,215

Estimated Total Annual Burden Hours: 258,215.

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–3224]

Authorization of Emergency Use of an Injectable Treatment for Nerve Agent or Certain Insecticide (Organophosphorus and/or Carbamate) Poisoning; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the issuance of an Emergency Use Authorization (EUA) (the Authorization) for an injectable treatment for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning. FDA issued this Authorization under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as requested by the U.S. Centers for Disease Control and Prevention (CDC). The Authorization contains, among other things, conditions on the emergency use of the authorized injectable treatment. The Authorization follows the April 11, 2017, determination by the Department of Health and Human Services (HHS) Secretary that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves nerve agents or certain insecticides (organophosphorus and/or carbamate). On the basis of such determination, the HHS Secretary declared on April 11, 2017, that circumstances exist justifying the authorization of emergency use of injectable treatments for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning, subject to the terms of any authorization issued under the FD&C Act. The Authorization, which includes an explanation of the reasons for issuance, is reprinted in this document.

DATES: The Authorization is effective as of April 11, 2017.

ADDRESSES: Submit written requests for single copies of the EUA to the Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4338, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request or include a fax number to which the Authorization may be sent. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the Authorization.

FOR FURTHER INFORMATION CONTACT: Carmen Maher, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4347, Silver Spring, MD 20993–0002, 301–796–8510.

SUPPLEMENTARY INFORMATION:

I. Background

Section 564 of the FD&C Act (21 U.S.C. 360bbb–3) as amended by the Project BioShield Act of 2004 (Pub. L. 108–276) and the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (Pub. L. 113–5) allows FDA to strengthen the public health protections against biological, chemical, nuclear, and radiological agents. Among other things, section 564 of the FD&C Act allows FDA to authorize the use of an unapproved medical product or an unapproved use of an approved medical product in certain situations. With this EUA authority, FDA can help assure that medical countermeasures may be used in emergencies to diagnose, treat, or prevent serious or life-threatening diseases or conditions caused by biological, chemical, nuclear, or radiological agents when there are no adequate, approved, and available alternatives.

Section 564(b)(1) of the FD&C Act provides that, before an EUA may be issued, the Secretary of HHS must declare that circumstances exist justifying the authorization based on one of the following grounds: (1) A determination by the Secretary of Homeland Security that there is a domestic emergency, or a significant potential for a domestic emergency, involving a heightened risk of attack with a biological, chemical, radiological, or nuclear agent or agents; (2) a determination by the Secretary of Defense that there is a military emergency, or a significant potential for a military emergency, involving a heightened risk to U.S. military forces of attack with a biological, chemical, radiological, or nuclear agent or agents; (3) a determination by the Secretary of HHS that there is a public health emergency, or a significant potential for a public health emergency, that affects, or has a significant potential to affect, national security or the health and security of U.S. citizens living abroad, and that involves a biological, chemical, radiological, or nuclear agent or agents, or a disease or condition that may be attributable to such agent or agents; or (4) the identification of a material threat by the Secretary of Homeland Security under section 319F–2 of the Public Health Service (PHS) Act (42 U.S.C. 247d–6b) sufficient to affect national security or the health and security of U.S. citizens living abroad.

Once the Secretary of HHS has declared that circumstances exist justifying an authorization under section 564 of the FD&C Act, FDA may authorize the emergency use of a drug, device, or biological product if the Agency concludes that the statutory criteria are satisfied. Under section 564(h)(1) of the FD&C Act, FDA is required to publish in the **Federal Register** a notice of each authorization, and each termination or revocation of an authorization, and an explanation of the reasons for the action. Section 564 of the FD&C Act permits FDA to authorize the introduction into interstate commerce of a drug, device, or biological product intended for use when the Secretary of HHS has declared that circumstances

exist justifying the authorization of emergency use. Products appropriate for emergency use may include products and uses that are not approved, cleared, or licensed under sections 505, 510(k), or 515 of the FD&C Act (21 U.S.C. 355, 360(k), and 360e) or section 351 of the PHS Act (42 U.S.C. 262). FDA may issue an EUA only if, after consultation with the HHS Assistant Secretary for Preparedness and Response, the Director of the National Institutes of Health, and the Director of the CDC (to the extent feasible and appropriate given the applicable circumstances), FDA [1] concludes: (1) That an agent referred to in a declaration of emergency or threat can cause a serious or life-threatening disease or condition; (2) that, based on the totality of scientific evidence available to FDA, including data from adequate and well-controlled clinical trials, if available, it is reasonable to believe that: (A) The product may be effective in diagnosing, treating, or preventing (i) such disease or condition; or (ii) a serious or life-threatening disease or condition caused by a product authorized under section 564, approved or cleared under the FD&C Act, or licensed under section 351 of the PHS Act, for diagnosing, treating, or preventing such a disease or condition caused by such an agent; and (B) the known and potential benefits of the product, when used to diagnose, prevent, or treat such disease or condition, outweigh the known and potential risks of the product, taking into consideration the material threat posed by the agent or agents identified in a declaration under section 564(b)(1)(D) of the FD&C Act, if applicable; (3) that there is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating such disease or condition; and (4) that such other criteria as may be prescribed by regulation are satisfied.

No other criteria for issuance have been prescribed by regulation under section 564(c)(4) of the FD&C Act. Because the statute is self-executing, regulations or guidance are not required for FDA to implement the EUA authority.

II. EUA Request for an Injectable Treatment for Nerve Agent or Certain Insecticide (Organophosphorus and/or Carbamate) Poisoning

On April 11, 2017, under section 564(b)(1)(C) of the FD&C Act, the Secretary of HHS determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves nerve agents or certain insecticides (organophosphorus and/or carbamate). On April 11, 2017, under section 564(b)(1) of the FD&C Act, and on the basis of such determination, the Secretary of HHS declared that circumstances exist justifying the authorization of emergency use of injectable treatments for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning, subject to the terms of any authorization issued under section 564 of the FD&C Act. Notice of the determination and declaration of the Secretary was published in the **Federal Register** on April 17, 2017 (82 FR 18152). On March 9, 2017, CDC requested, and on April 11, 2017, FDA issued, an EUA for the 2 mg Rafa Atropine Auto-Injector, manufactured by Rafa Laboratories Ltd., subject to the terms of the Authorization.

III. Electronic Access

An electronic version of this document and the full text of the Authorization are available on the Internet at *https://www.regulations.gov.*

IV. The Authorization

Having concluded that the criteria for issuance of the Authorization under section 564(c) of the FD&C Act are met, FDA has authorized the emergency use of an injectable treatment for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning subject to the terms of the Authorization. The Authorization in its entirety (not including the authorized versions of the fact sheets and other written materials) follows and provides an explanation of the reasons for its issuance, as required by section 564(h)(1) of the FD&C Act.

[1] The Secretary of HHS has delegated the authority to issue an EUA under section 564 of the FD&C Act to the Commissioner of Food and Drugs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
Silver Spring, MD 20993

April 11, 2017

Anne Schuchat, M.D. (RADM, USPHS)
Acting Director
Centers for Disease Control and Prevention
1600 Clifton Rd, MS D-14
Atlanta, GA 30333

Dear Dr. Schuchat:

This letter is in response to your request that the Food and Drug Administration (FDA) issue an Emergency Use Authorization (EUA) for emergency use of the Rafa Laboratories Ltd. (Rafa) Atropine Auto-Injector for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population (as described in the Scope of Authorization section of this letter (Section II)), pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. § 360bbb-3).[1]

On April 11, 2017, pursuant to section 564(b)(1)(C) of the Act (21 U.S.C. § 360bbb-3(b)(1)(C)), the Secretary of Health and Human Services (HHS) determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves nerve agents or certain insecticides (organophosphorus and/or carbamate).[2] Pursuant to section 564(b)(1) of the Act (21 U.S.C. § 360bbb-3(b)(1)), and on the basis of such determination, the Secretary of HHS then declared that circumstances exist justifying the authorization of emergency use of injectable treatments for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning, subject to the terms of any authorization issued under 21 U.S.C. § 360bbb-3(a).[3]

The Centers for Disease Control and Prevention (CDC) requested this EUA so that the Rafa Atropine Auto-Injector, which is not FDA-approved, may be distributed and held by CDC,

[1] At the time of issuance of this Emergency Use Authorization (EUA), the Rafa Atropine Auto-Injector was approved in at least one country (i.e., Israel) but not approved in the U.S. This EUA, including its Conditions of Authorization in Section IV, applies only to Rafa Atropine Auto-Injector product that is manufactured and distributed by Rafa and its authorized agent(s) specifically for U.S. Government procurement and further distribution, stockpiling, and use during an emergency as set forth in this authorization.

[2] As amended by the Pandemic and All-Hazards Preparedness Reauthorization Act, Pub. L. No. 113-5, under section 564(b)(1)(C) of the Act, the Secretary may make a determination of a public health emergency, or of a significant potential for a public health emergency.

[3] U.S. Department of Health and Human Services (HHS). *Determination of a Significant Potential for a Public Health Emergency and Declaration that Circumstances Exist Justifying an Authorization Pursuant to Section 564 of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b).* April 11, 2017.

emergency response stakeholders, and DoD for preparedness purposes in advance of an actual nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning event, with the intent that it may be administered by healthcare providers or caregivers, or be self-administered, during an event or post-event for treatment of the muscarinic symptoms of poisoning caused by exposure to these agents.[4] An EUA is needed to facilitate CDC, emergency response stakeholder, and DoD pre-event planning and preparedness activities related to the use of this unapproved product to enable activities to support rapid administration of treatment during an actual emergency event involving nerve agents or certain insecticides (organophosphorus and/or carbamate) (e.g., distribution and use of fact sheets about the product, pre-event distribution and stockpiling of an unapproved product, administration of an unapproved product without a prescription, and administration by individuals who are not licensed professionally to administer the product). This EUA is important for emergency response purposes because it enables rapid initiation of treatment with the Rafa Atropine Auto-Injector during a nerve agent or insecticide emergency without FDA and CDC, emergency response stakeholders, or DoD having to take further action with respect to otherwise applicable requirements under federal law.

Other atropine auto-injectors previously have been approved by FDA to treat nerve agent and insecticide poisoning in adults and children. However, at the time of issuance of this EUA, FDA-approved atropine auto-injectors for the treatment of nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning were not available to replenish the Department's Strategic National Stockpile inventory when the products in the current inventory expire.[5] This EUA will help to facilitate the fulfillment of national preparedness and stockpiling requirements and needs for new atropine auto-injectors.

Having concluded that the criteria for issuance of this authorization under section 564(c) of the Act (21 U.S.C. § 360bbb-3(c)) are met, I am authorizing the emergency use of the Rafa Atropine Auto-Injector (as described in the Scope of Authorization section of this letter (Section II)) in the specified population (as described in the Scope of Authorization section of this letter (Section II)) for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate), subject to the terms of this authorization.

This EUA applies in all circumstances when CDC, emergency response stakeholders, and/or DoD reasonably believe that there is a need to store, distribute, and/or administer the authorized Rafa Atropine Auto-Injector without an individual prescription in an emergency because of their constituents' known, suspected, or likely imminent exposure to nerve agents or certain insecticides (organophosphorus and/or carbamate).[6]

---

[4] For purposes of this EUA, the term "emergency response stakeholders" refers to CHEMPACK stakeholders (as defined by the Centers for Disease Control and Prevention (CDC)/Division of Strategic National Stockpile (SNS) under the CHEMPACK program), and to other public health, emergency response, and/or other government agencies that receive the authorized Rafa Atropine Auto-Injector through CDC, and that have legal responsibility and authority for responding to an incident, based on political or geographical boundaries (e.g., city, county, tribal, territorial, State, or Federal), or functional range or sphere of authority (e.g., law enforcement, public health, military health) to prescribe, administer, deliver, distribute, hold, or dispense a medical product during an emergency situation.

[5] Regarding the SNS, see 42 U.S.C. § 247d-6b(a).

[6] For purposes of this EUA, the terms "administer" and "administration" refer to administration of the authorized Rafa Atropine Auto-Injector by healthcare providers and caregivers (as defined later in this letter) and by individuals administering the authorized Rafa Atropine Auto-Injector to themselves (i.e., self-administration) when healthcare

I. Criteria for Issuance of Authorization

I have concluded that the emergency use of the Rafa Atropine Auto-Injector for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population (as described in the Scope of Authorization section of this letter (Section II)) meets the criteria for issuance of an authorization under section 564(c) of the Act, because I have concluded that:

1. Susceptible nerve agents and certain insecticides (organophosphorus and/or carbamate) can cause muscarinic symptoms of poisoning, a serious or life-threatening disease or condition to humans exposed to these agents or insecticides;

2. Based on the totality of scientific evidence available to FDA, it is reasonable to believe that the Rafa Atropine Auto-Injector, when used in accordance with the Scope of Authorization, may be effective for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate), and that the known and potential benefits of the Rafa Atropine Auto-Injector for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) outweigh the known and potential risks of such product; and

3. There is no adequate, approved, and available alternative to the emergency use of the Rafa Atropine Auto-Injector for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate).[7]

II. Scope of Authorization

I have concluded, pursuant to section 564(d)(1) of the Act, that the scope of this authorization is limited to the use of the authorized Rafa Atropine Auto-Injector by CDC, emergency response stakeholders, and DoD for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population (see below). The emergency use of the authorized Rafa Atropine Auto-Injector product under this EUA must be consistent with, and may not exceed, the terms of this letter, including the scope and the conditions of authorization set forth below.

The Authorized Rafa Atropine Auto-Injector:

I am authorizing the use of the 2 mg Rafa Atropine Auto-Injector. The 2 mg Rafa Atropine Auto-Injector is a combination product (drug/device) to provide initial treatment of the muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in adults and children (weighing over 41 kg (90 lbs) (generally over 10 years of age)) following an intentional terrorism-related or unintentional event.[8] CDC may request the authorization of additional strengths (e.g., 0.5 mg and/or 1 mg) of

providers and caregivers are not available to administer the authorized Rafa Atropine Auto-Injector.

[7] No other criteria of issuance have been prescribed by regulation under section 564(c)(4) of the Act.

[8] Treatment and management of nerve agent and insecticide (organophosphorus and/or carbamate) poisoning include decontamination, supportive measures, and repeated administration of antidotes. Atropine is an antimuscarinic

the Rafa Atropine Auto-Injector, which may be authorized by FDA in consultation with, and with concurrence of, the Division of Neurology Products (DNP)/Office of Drug Evaluation I (ODE1)/Office of New Drugs (OND)/Center for Drug Evaluation and Research (CDER), the Counter-Terrorism and Emergency Coordination Staff (CTECS)/Office of the Center Director (OCD)/CDER, and the Office of Counterterrorism and Emerging Threats (OCET)/Office of the Chief Scientist (OCS)/Office of the Commissioner (OC).[9]

The authorized Rafa Atropine Auto-Injector is a self-contained unit specially designed for automatic healthcare provider,[10] caregiver,[11] or individual (i.e., self) administration. Each pre-filled auto-injector provides a single dose of atropine. When activated, the authorized 2 mg Rafa Atropine Auto-Injector dispenses 1.67 mg atropine base (equivalent to 2 mg atropine sulfate) in 0.7 mL of sterile pyrogen-free solution through a single needle for rapid intramuscular (IM) administration.

The authorized 2 mg Rafa Atropine Auto-Injector, and any other strengths that are authorized at a later time under this EUA, are authorized to be distributed by CDC, emergency response stakeholders, and DoD for pre-event storage and further redistribution, if appropriate, and for post-event storage, distribution, and administration, when packaged in the authorized manufacturer packaging and with the authorized labeling (e.g., the labels on each auto-injector and box carton, including expiration date, National Drug Code, National Stock Number if needed, bar code, and lot number; and fact sheets), despite the fact that they may not contain information on the prescription label that otherwise would be required under section 503(b)(2) of the Act (21 U.S.C. § 353(b)(2)) (e.g., name and address of dispenser; serial number; date of prescription or of its filling; name of prescriber; name of patient, if stated on prescription;

---

agent that antagonizes the muscarine-like actions of acetylcholine and other choline esters. Atropine inhibits the muscarinic actions of acetylcholine on structures innervated by postganglionic cholinergic nerves, on smooth muscles, which respond to endogenous acetylcholine but are not so innervated, and on brain. As with other antimuscarinic agents, the major action of atropine is a competitive or surmountable antagonism, which can be overcome by increasing the concentration of acetylcholine at receptor sites of the effector organ (e.g., by using anticholinesterase agents, which inhibit the enzymatic destruction of acetylcholine). When atropine and pralidoxime (2-PAM) are co-administered, survival is improved due to their synergistic effects.

[9] On the date of issuance of this EUA, the 0.5 mg Rafa Atropine Auto-Injector and 1 mg Rafa Atropine Auto-Injector were not authorized for use under this EUA. However, CDC may request authorization under this EUA of the 0.5 mg and 1 mg strengths at a later time. If FDA authorizes use of the 0.5 mg and 1 mg strengths based on a review of the scientific data, communication about such authorization will be posted on FDA's EUA website at the time of amendment of this EUA (e.g., through a memorandum and updated EUA Fact Sheets). https://www.fda.gov/EmergencyPreparedness/Counterterrorism/ucm182568.htm.

[10] For purposes of this EUA, the term "healthcare provider" includes (i) healthcare professionals who are acting within their professional scope of practice; (ii) healthcare professionals who might otherwise be acting outside of their professional scope of practice in administering the authorized Rafa Atropine Auto-Injector (e.g., physicians not licensed in the state; certain emergency medical technicians, paramedics, physician assistants, nurses, pharmacists, etc.); and (iii) other responders (e.g., firefighters). To the extent feasible and appropriate, healthcare providers should be acting under the authority of the applicable emergency response stakeholder's authority and official emergency response plans when administering the authorized product.

[11] For purposes of this EUA, the term "caregiver" includes individuals who are not healthcare providers as defined in this EUA (e.g., public health agency staff, military service members, volunteers, agents, contractors, family members, co-workers, bystanders, etc.), but who might be the only available individual to administer the Rafa Atropine Auto-Injector to an individual exhibiting symptoms of nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning (e.g., if the demand for patient care exceeds the capacity of available healthcare providers during an emergency response). To the extent feasible and appropriate, caregivers should be acting under the authority of the applicable emergency response stakeholder's official emergency response plans when receiving and administering the authorized product.

directions for use and cautionary statements, if contained in the prescription).

The authorized Rafa Atropine Auto-Injector is authorized to be administered without a prescription and by healthcare providers, caregivers, and individuals (i.e., to oneself) under this EUA, despite the fact that it does not meet certain requirements otherwise required by federal law.

The authorized Rafa Atropine Auto-Injector is authorized to be accompanied by the authorized manufacturer's labeling (e.g., the labels on each auto-injector and box carton) developed in consultation with FDA and CDC. The authorized Rafa Atropine Auto-Injector is also authorized to be accompanied by the following information pertaining to the emergency use, which is authorized to be made available to healthcare providers, caregivers, and individuals/patients[12] to facilitate understanding of nerve agent and certain insecticide (organophosphorus and/or carbamate) poisoning, the risks and benefits of the Rafa Atropine Auto-Injector, and proper medication administration:

- Fact Sheet for Healthcare Providers: Use of the 2 mg Rafa Atropine Auto-Injector for Initial Treatment of Nerve Agent or Certain Insecticide (Organophosphorus and/or Carbamate) Poisoning

- Fact Sheet for Patients and Caregivers: Use of the 2 mg Rafa Atropine Auto-Injector for Initial Treatment of Nerve Agent or Certain Insecticide (Organophosphorus and/or Carbamate) Poisoning

Other Fact Sheets developed by CDC and/or by DoD (e.g., specifically for DoD purposes) in consultation with, and with concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC may be authorized to accompany the above described Rafa Atropine Auto-Injector and to be made available to healthcare providers, caregivers, and individuals/patients, as appropriate.

As described in Section IV below, CDC and DoD are also authorized to make available additional information relating to the emergency use of the authorized Rafa Atropine Auto-Injector that is reasonably consistent with, and does not exceed, the terms of this letter of authorization.

Authorized Rafa Atropine Auto-Injectors are authorized to have their manufacturer labeled expiry dating extended by DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC based on scientific data supporting such an extension.

I have concluded, pursuant to section 564(d)(2) of the Act, that it is reasonable to believe that the known and potential benefits of the authorized Rafa Atropine Auto-Injector in the specified population, when used for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) and used consistently with the Scope of Authorization of this letter (Section II), outweigh the known and

[12] The authorized Fact Sheet for Patients and Caregivers includes information for (i) patients to whom the authorized Rafa Atropine Auto-Injector is administered by healthcare providers or caregivers, (ii) individuals who may need to self-administer the authorized Rafa Atropine Auto-Injector, and (iii) caregivers who may need to administer the authorized Rafa Atropine Auto-Injector to individuals.

potential risks of such a product.

I have concluded, pursuant to section 564(d)(3) of the Act, based on the totality of scientific evidence available to FDA, that it is reasonable to believe that the authorized Rafa Atropine Auto-Injector may be effective in the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate), when used consistently with the Scope of Authorization of this letter (Section II), pursuant to section 564(c)(2)(A) of the Act.

FDA has reviewed the scientific information available to FDA, including the information supporting the conclusions described in Section I above, and concludes that the authorized Rafa Atropine Auto-Injector, when used for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population (as described in the Scope of Authorization of this letter (Section II)), meets the criteria set forth in section 564(c) of the Act concerning safety and potential effectiveness.

The emergency use of the authorized Rafa Atropine Auto-Injector under this EUA must be consistent with, and may not exceed, the terms of this letter, including the Scope of Authorization (Section II) and the Conditions of Authorization (Section IV). Subject to the terms of this EUA and under the circumstances set forth in the Secretary of HHS's determination described above and the Secretary of HHS's corresponding declaration under section 564(b)(1), the Rafa Atropine Auto-Injector described above is authorized for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population.

This EUA will cease to be effective when the HHS declaration that circumstances exist to justify the EUA is terminated under section 564(b)(2) of the Act or when the EUA is revoked under section 564(g) of the Act.

III. Waiver of Certain Requirements

This letter authorizes use of Rafa Atropine Auto-Injectors as previously manufactured by Rafa under U.S. Government contract as of the date of this letter, as well as authorized Rafa Atropine Auto-Injectors that may be manufactured by Rafa under U.S. Government contract after such date, insofar as the informational visit and testing completed on production quality products provide reasonable assurance that the methods used in, and the facilities and controls used for, the manufacturing, processing, labeling, and packing of the authorized Rafa Atropine Auto-Injector are adequate to preserve its identity, strength, quality, and purity for use of the product under this EUA.

The authorized Rafa Atropine Auto-Injector should be held in accordance with the manufacturer's labeled and appropriate product storage conditions for the product (i.e., ambient temperature, 25°C (77°F), with excursions permitted to 15°C-30°C (59°F-86°F)). In addition, the USP allows for a brief excursion to higher temperatures (i.e., up to 24 hours at up to 40°C (104°F)). However, to ensure the delivery and availability of the authorized Rafa Atropine Auto-Injector in the event of a nerve agent or certain insecticide (organophosphorus and/or carbamate) emergency and a decision on the part of CDC, an emergency response stakeholder(s), or DoD to distribute and administer the product under the terms of this EUA, the authorized Rafa Atropine Auto-Injector may require transportation and/or temporary storage for rapid

administration without the capacity to maintain labeled storage conditions in the midst of the response. During such scenarios, the authorized Rafa Atropine Auto-Injector may be stored with temperature excursions up to 40°C (104°F) for a total period of up to 7 days. Significant excursions from the labeled storage conditions should be documented to the extent practicable given the circumstances of an emergency.

IV. Conditions of Authorization

Pursuant to section 564 of the Act, I am establishing the following conditions on this authorization:

CDC

A. CDC will distribute the authorized Rafa Atropine Auto-Injector under its direction to the extent such decisions are consistent with and do not exceed the terms of this letter, including distribution with the authorized labeling.

B. Through a process of inventory control, CDC will maintain records regarding distribution under its direction of the authorized Rafa Atropine Auto-Injector (i.e., lot numbers, quantity, receiving site, receipt date).

C. CDC will ensure that the terms of this EUA are made available to emergency response stakeholders and DoD through appropriate means.[13] CDC will provide authorized emergency response stakeholders and DoD a copy of this letter of authorization, and communicate to emergency response stakeholders and DoD any subsequent amendments that might be made to this letter of authorization and its authorized accompanying materials (e.g., Fact Sheets).

D. CDC will make available to emergency response stakeholders and DoD through appropriate means the authorized Rafa Atropine Auto-Injector Fact Sheet for Healthcare Providers, the authorized Rafa Atropine Auto-Injector Fact Sheet for Patients and Caregivers, and any other Fact Sheets for emergency response stakeholders that FDA may authorize, as well as any authorized amendments thereto.

E. CDC may request changes to the authorized Rafa Atropine Auto-Injector Fact Sheet for Healthcare Providers and the authorized Rafa Atropine Auto-Injector Fact Sheet for Patients and Caregivers and may request the development of additional Fact Sheets. Such requests will be made by CDC in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC.

F. CDC is authorized to issue additional recommendations and instructions related to the emergency use of the authorized Rafa Atropine Auto-Injector as described in this letter of authorization, to the extent that additional recommendations and instructions are necessary to meet public health needs during an event involving susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) and are reasonably consistent with the authorized emergency use of the product.

[13] For example, through hard copy, web posting, and/or mass media.

G. CDC may request changes to the authorized manufacturer's labeling (e.g., the labels on each auto-injector and carton) for the authorized Rafa Atropine Auto-Injector, or to the manufacturing, labeling, and packaging processes of Rafa or its authorized agent(s) for the authorized product. Such requests will be made by CDC in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC.

H. CDC may request the authorization of additional strengths (e.g., 0.5 mg and 1 mg) of the authorized Rafa Atropine Auto-Injector under this EUA. Such requests will be made by CDC in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC.

I. CDC will inform emergency response stakeholders about the need to have a process in place for performing adverse event monitoring and compliance activities designed to ensure that adverse events and all medication errors associated with the use of the authorized Rafa Atropine Auto-Injector are reported to FDA, to the extent practicable given emergency circumstances, as follows: complete the MedWatch FDA Form 3500 online at www.fda.gov/medwatch, by using a postage-paid MedWatch Form 3500 (available at https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home), or by calling 1-800-FDA-1088. Submitted reports should state that the Rafa Atropine Auto-Injector was used under an EUA and should provide the strength (e.g., 2 mg) that was administered. CDC will conduct any follow-up requested by FDA regarding adverse events, to the extent feasible given the emergency circumstances.

J. CDC will ensure that the authorized Rafa Atropine Auto-Injector is distributed for use under its direction within the expiry dating on the manufacturer's labeling. If FDA authorizes any expiry dating extensions of the authorized Rafa Atropine Auto-Injector under this EUA, CDC will inform emergency response stakeholders and DoD receiving the authorized Rafa Atropine Auto-Injector of such extensions and any conditions related to such extensions under this EUA. CDC will maintain adequate records regarding the expiry dates by which authorized Rafa Atropine Auto-Injectors may be used.

K. CDC will make available to FDA upon request any records maintained in connection with this EUA.

Emergency Response Stakeholders to Whom the Authorized Rafa Atropine Auto-Injector Is Distributed

L. Emergency response stakeholders will inform their applicable healthcare providers[14] of this letter of authorization, including the terms herein, and of any subsequent amendments that might be made to this letter of authorization and its authorized

[14] As defined earlier, for purposes of this EUA, the term "healthcare provider" includes (i) healthcare professionals who are acting within their professional scope of practice; (ii) healthcare professionals who might otherwise be acting outside of their professional scope of practice in administering the Rafa Atropine Auto-Injector (e.g., physicians not licensed in the state; certain emergency medical technicians, paramedics, physician assistants, nurses, pharmacists, etc.); and (iii) other responders (e.g., firefighters). To the extent feasible and appropriate, healthcare providers should be acting under the authority of the applicable emergency response stakeholder's authority and official emergency response plans when administering the authorized product.

accompanying materials (e.g., Fact Sheets), through appropriate means.

M. Emergency response stakeholders will inform their applicable healthcare providers that the authorized Rafa Atropine Auto-Injector may be used only for the initial treatment of the muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population.

N. Emergency response stakeholders will ensure that their applicable healthcare providers administering the authorized Rafa Atropine Auto-Injector will abide by any procedures regarding drug accountability issued by CDC and/or their respective institutions.

O. Through a process of inventory control, emergency response stakeholders will maintain records of product usage (i.e., lot number, quantity, receiving site, receipt date, and administration date), product storage, and disposition of the authorized product and will maintain records regarding further distribution (if permissible) under their direction of the authorized Rafa Atropine Auto-Injector product.

P. Emergency response stakeholders will, consistent with any applicable CDC and/or jurisdictional procedures, be responsible for authorizing their applicable healthcare providers to administer the authorized Rafa Atropine Auto-Injector in accordance with the terms of this letter of authorization, including instructing their applicable healthcare providers about the terms of this letter of authorization with regard to pre-event storage and distribution and post-event storage, distribution, and administration, and for instructing them about the means through which they are to obtain the authorized Rafa Atropine Auto-Injector.[15]

Q. Emergency response stakeholders will include with the authorized Rafa Atropine Auto-Injector the authorized Fact Sheet for Healthcare Providers, the authorized Fact Sheet for Patients and Caregivers, and any other Fact Sheets for emergency response stakeholders that FDA may authorize, as well as any authorized amendments thereto. Under exigent circumstances, these Fact Sheets may be disseminated through other appropriate means (e.g., web posting, mass media). With the exception of DoD-specific Fact Sheets (see Condition FF), changes to the authorized Fact Sheets may be made only by CDC in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC.

R. Emergency response stakeholders will train their applicable healthcare providers on the use of the authorized Rafa Atropine Auto-Injector in accordance with this EUA and any applicable institutional procedures or protocols. In the event of an emergency during which the authorized Rafa Atropine Auto-Injector may need to be administered by caregivers and/or be self-administered, emergency response stakeholders will inform such caregivers and individuals about the use of the authorized product (e.g., by providing them with the Fact Sheet for Patients and Caregivers and/or just-in-time

[15] An emergency response stakeholder may also, if permitted by CDC, distribute the authorized product to other public or private entities acting as the agents or delegates of the emergency response stakeholder as part of a public health or medical response. If such distribution occurs, the emergency response stakeholder will be responsible for ensuring that the authorized agents and/or delegates adhere to the emergency response stakeholder conditions and any applicable healthcare provider conditions provided in this letter of authorization.

training, instructing healthcare providers how to inform patients and caregivers, etc.), to the extent feasible given the emergency circumstances.[16]

S. Emergency response stakeholders will track adverse events and report to FDA in accordance with the Fact Sheet for Healthcare Providers (i.e., complete the MedWatch FDA Form 3500 online at www.fda.gov/medwatch, by using a postage-paid MedWatch Form 3500 (available at https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home), or by calling 1-800-FDA-1088; submitted reports should state that the Rafa Atropine Auto-Injector was used under an EUA and should provide the strength (e.g., 2 mg) that was administered), to the extent feasible given the emergency circumstances. Emergency response stakeholders will conduct any follow-up requested by FDA and/or CDC regarding adverse events, to the extent feasible given the emergency circumstances.

T. Emergency response stakeholders will track and communicate, to the extent appropriate, any expiry dating extensions of the authorized Rafa Atropine Auto-Injector that FDA may authorize, and that CDC may communicate, under this EUA and any conditions related to such extensions under this EUA. Emergency response stakeholders will maintain adequate records regarding the expiry dates by which authorized Rafa Atropine Auto-Injector may be used.

U. Emergency response stakeholders will ensure that any records associated with this EUA are maintained until notified by CDC and/or FDA. Such records will be made available to FDA and/or CDC for inspection upon request.

Healthcare Providers Conducting Activities under the Direction of Emergency Response Stakeholders with Respect to the Authorized Rafa Atropine Auto-Injector[17]

V. Healthcare providers conducting activities under the direction of emergency response stakeholders with respect to the authorized Rafa Atropine Auto-Injector will be aware of this letter, including the terms and any authorized amendments thereto. Healthcare providers will read the authorized Fact Sheet for Healthcare Providers prior to administering the authorized Rafa Atropine Auto-Injector, to the extent feasible given the emergency circumstances.

W. Healthcare providers administering the authorized Rafa Atropine Auto-Injector will ensure that the authorized Fact Sheet for Patients and Caregivers has been made available to patients and/or caregivers through appropriate means, to the extent feasible given the emergency circumstances. In the event of an emergency during which the authorized Rafa Atropine Auto-Injector may need to be administered by caregivers and/or be self-administered, healthcare providers will inform such caregivers and individuals about the use of the authorized product (e.g., by providing them with the Fact Sheet for Patients

[16] As described earlier in this letter of authorization, it is contemplated during some response scenarios that the authorized Rafa Atropine Auto-Injector may need to be administered by caregivers or be self-administered.

[17] The Conditions of Authorization for healthcare providers conducting activities under the direction of emergency response stakeholders with respect to the authorized Rafa Atropine Auto-Injector do not apply to DoD. DoD-specific Conditions of Authorization are provided below.

and Caregivers, just-in-time training, etc.), to the extent feasible given the emergency circumstances.

X. Healthcare providers will administer the authorized Rafa Atropine Auto-Injector only for the initial treatment of the muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population following an intentional terrorism-related or unintentional event.

Y. Healthcare providers will track adverse events and report to FDA in accordance with the Fact Sheet for Healthcare Providers (i.e., complete the MedWatch FDA Form 3500 online at www.fda.gov/medwatch, by using a postage-paid MedWatch Form 3500 (available at https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home), or by calling 1-800-FDA-1088; submitted reports should state that the Rafa Atropine Auto-Injector was used under an EUA and should provide the strength (e.g., 2 mg) that was administered), to the extent feasible given the emergency circumstances. Healthcare providers will conduct any follow-up requested by FDA and/or CDC regarding adverse events, to the extent feasible given the emergency circumstances.

Z. Healthcare providers will ensure that any records associated with the use of this product under this EUA are maintained, to the extent feasible given the emergency circumstances, until notified by FDA and/or CDC. Such records will be made available to FDA and/or CDC for inspection upon request.

DoD

AA. DoD may distribute the authorized 2 mg Rafa Atropine Auto-Injector product under its direction to DoD components to the extent such decisions are consistent with and do not exceed the terms of this letter, including distribution with the authorized labeling.

BB. DoD will ensure that the terms of this EUA are made available to applicable DoD components through appropriate means. DoD will provide applicable DoD components a copy of this letter of authorization, and communicate to such components any subsequent amendments that might be made to this letter of authorization and its authorized accompanying materials (e.g., Fact Sheets for DoD-only use).

CC. DoD will inform applicable DoD components that the authorized Rafa Atropine Auto-Injector may be used only for the initial treatment of the muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) in the specified population.

DD. Through a process of inventory control, DoD will maintain records regarding distribution and use under its direction of the authorized Rafa Atropine Auto-Injector (i.e., lot number, quantity, receiving site, receipt date, and administration date), product storage, and disposition of the authorized product, to the extent feasible given the emergency circumstances.

EE. DoD will make available through applicable DoD communication channels and procedures the authorized Rafa Atropine Auto-Injector Fact Sheets and/or authorized DoD-specific Rafa Atropine Auto-Injector Fact Sheet(s), as well as any authorized amendments thereto. Under exigent circumstances, other appropriate means for disseminating these Fact Sheets may be used.

FF. DoD may request the development and use of a Fact Sheet(s) for DoD-specific purposes for the authorized 2 mg Rafa Atropine Auto-Injector. Such requests will be made by DoD in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC. DoD will inform CDC of such requests. Changes to any authorized DoD-specific Rafa Atropine Auto-Injector Fact Sheets may be made only by DoD in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC. DoD will also inform CDC of such changes. Such DoD-specific Rafa Atropine Auto-Injector Fact Sheets will not be used by non-DoD emergency response stakeholders.

GG. DoD will be responsible for authorizing components acting as part of a DoD response to administer the authorized Rafa Atropine Auto-Injector in accordance with the terms of this EUA, including instructing such components about the terms of this EUA with regard to pre-event storage and distribution and post-event storage, distribution, and administration, and for instructing them about the means through which they are to obtain and use the authorized Rafa Atropine Auto-Injector.

HH. DoD is authorized to issue additional recommendations and instructions related to the DoD-specific emergency use of the authorized Rafa Atropine Auto-Injector as described in this letter of authorization, to the extent that additional recommendations and instructions are necessary to meet military needs during an event involving susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate) and are reasonably consistent with the authorized emergency use of the product.

II. DoD will train applicable DoD components and/or personnel on the use of the authorized Rafa Atropine Auto-Injector in accordance with this EUA and any applicable DoD procedures or protocols.

JJ. DoD, through applicable DoD components, will track adverse events and report to FDA (e.g., by completing the MedWatch FDA Form 3500 online at www.fda.gov/medwatch, by using a postage-paid MedWatch Form 3500 (available at https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home), or by calling 1-800-FDA-1088; submitted reports should state that the Rafa Atropine Auto-Injector was used under an EUA and should provide the strength (i.e., 2 mg) that was administered), to the extent feasible given the emergency circumstances. DoD will conduct any follow-up requested by FDA and/or CDC regarding adverse events, to the extent feasible given the

emergency circumstances.

KK. DoD will ensure that the authorized Rafa Atropine Auto-Injector is distributed for use under its direction within the expiry dates on the manufacturer's labeling. If FDA authorizes any expiry dating extensions of the authorized Rafa Atropine Auto-Injector under this EUA, DoD will inform DoD components receiving the authorized Rafa Atropine Auto-Injector of such extensions and any conditions related to such extensions under this EUA. DoD will maintain adequate records regarding the expiry dates by which authorized Rafa Atropine Auto-Injector may be used.

LL. DoD will ensure that any records associated with this EUA are maintained until notified by FDA. Such records will be made available to FDA for inspection upon request.

Rafa

MM. Rafa is authorized to have Shalon Chemical Industries Ltd. as its authorized agent under this EUA. Rafa may request an additional authorized agent(s) related to its production and/or distribution of the authorized Rafa Atropine Auto-Injector under this EUA. Such requests will include the name, address, phone number, and role of any proposed authorized agent(s) and will be made to FDA by CDC and/or Rafa in consultation with, and require concurrence of, DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC. Rafa will also notify FDA and CDC before beginning to use such agent(s) as may be authorized by FDA.

NN. Rafa will post on its website the following statement: "For information about the FDA-authorized emergency use of the Rafa Atropine Auto-Injector, please see: https://www.fda.gov/EmergencyPreparedness/Counterterrorism/ucm182568.htm." Rafa will ensure that any website references to the authorized Rafa Atropine Auto-Injector by its authorized agent(s) will include the same statement.

OO. Rafa will distribute the authorized Rafa Atropine Auto-Injector under this EUA only under U.S. Government contract to CDC and/or CDC's designee(s) and subject to terms of this letter.

PP. Rafa will contact CDC for CDC to request FDA review and concurrence before any changes are made to the manufacturer's labeling (e.g., the labels on each auto-injector and carton) for the authorized product, and before any changes are made to its manufacturing, labeling, and packaging processes, or any such processes of its authorized agent(s), for the authorized product (see Condition G).

QQ. Rafa may submit additional data to FDA through CDC to support the authorization of additional strengths of the Rafa Atropine Auto-Injector. Upon

review of this data and DNP/ODE1/OND/CDER, CTECS/OCD/CDER, and OCET/OCS/OC concurrence (as described above in Condition H), Rafa and its authorized agent(s) will be authorized to manufacture and distribute under U.S. Government contract the additional strengths of the Rafa Atropine Auto-Injector subject to the terms set forth in this letter of authorization and any subsequent amendments to this letter.

RR. Rafa will promptly notify FDA and CDC of any suspected or confirmed quality, manufacturing, distribution, and/or other issues with the authorized Rafa Atropine Auto-Injector, including such issues associated with its authorized agent(s), of which it becomes aware.

SS. Rafa will make available to FDA and, as reasonably appropriate, to CDC upon request any records maintained in connection with this letter. Upon request, Rafa will report to FDA and/or, as reasonably appropriate, to CDC information on the authorized Rafa Atropine Auto-Injector (e.g., with respect to the quality, manufacturing, distribution, emergency use, etc. of the authorized product, including activities related to its authorized agent(s)).

Conditions Related to Advertising and Promotion

TT. All advertising and promotional descriptive printed matter relating to the use of the authorized Rafa Atropine Auto-Injector shall be consistent with the Fact Sheets, as well as the terms set forth in this EUA and the applicable requirements set forth in the Act and FDA regulations.

UU. All advertising and promotional descriptive printed matter relating to the use of the authorized Rafa Atropine Auto-Injector shall clearly and conspicuously state that:

- This product has not been FDA approved or cleared;
- This product has been authorized by FDA under an EUA for use by CDC, emergency response stakeholders, and DoD;
- This product has been authorized only for the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate), not for any other agents, viruses, or pathogens; and
- This product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of the emergency use of injectable treatments for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning under section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

No advertising or promotional descriptive printed matter relating to the use of the authorized Rafa Atropine Auto-Injector may represent or suggest that this product is safe or effective for

Page 15 – Dr. Schuchat, CDC

the initial treatment of muscarinic symptoms of poisoning by susceptible nerve agents or certain insecticides (organophosphorus and/or carbamate).

The emergency use of the authorized Rafa Atropine Auto-Injector as described in this letter of authorization must comply with the conditions and all other terms of this authorization.

V. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of injectable treatments for nerve agent or certain insecticide (organophosphorus and/or carbamate) poisoning is terminated under section 564(b)(2) of the Act or the EUA is revoked under section 564(g) of the Act.

Sincerely,

Stephen M. Ostroff, M.D.
Acting Commissioner of Food and Drugs

[Docket No. FDA–2016–N–0969]

Revocation of Authorization of Emergency Use of an In Vitro Diagnostic Device for Detection of Zika Virus

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the revocation of the Emergency Use Authorization (EUA) (the Authorization) issued to Roche Molecular Systems, Inc. for the *LightMix® Zika rRT–PCR Test.* FDA revoked this Authorization on March 13, 2017, under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as requested by Roche Molecular Systems, Inc. by letter dated March 10, 2017. The revocation, which includes an explanation of the reasons for revocation, is reprinted in this document.

DATES: The Authorization is revoked as of March 13, 2017.

ADDRESSES: Submit written requests for single copies of the revocation to the Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4338, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request or include a fax number to which the revocation may be sent. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the revocation.

FOR FURTHER INFORMATION CONTACT: Carmen Maher, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4347, Silver Spring, MD 20993–0002, 301–796–8510 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

Section 564 of the FD&C Act (21 U.S.C. 360bbb–3) as amended by the Project BioShield Act of 2004 (Pub. L. 108–276) and the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (Pub. L. 113–5) allows FDA to strengthen the public health protections against biological, chemical, nuclear, and radiological agents. Among other things, section 564 of the FD&C Act allows FDA to authorize the use of an unapproved medical product or an unapproved use of an approved medical product in certain situations. On August 26, 2016, FDA issued an EUA to Roche Molecular Systems, Inc. for the *LightMix® Zika rRT–PCR Test,* subject to the terms of the Authorization. Notice of the issuance of the Authorization was published in the **Federal Register** on October 28, 2016 (81 FR 75092), as required by section 564(h)(1) of the FD&C Act. Under section 564(g)(2), the Secretary of Health and Human Services may revoke an EUA if, among other things, the criteria for issuance are no

longer met or other circumstances make such revocation appropriate to protect the public health or safety.

II. EUA Revocation Request for an In Vitro Diagnostic Device for Detection of the Zika Virus

On March 10, 2017, Roche Molecular Systems, Inc. requested, and on March 13, 2017, FDA revoked, the EUA for the *LightMix® Zika rRT–PCR* Test because the criteria for issuance were no longer met and other circumstances made such revocation appropriate to protect the public health or safety.

II. Electronic Access

An electronic version of this document and the full text of the revocation are available on the Internet at *https://www.regulations.gov.*

III. The Revocation

Having concluded that the criteria for revocation of the Authorization under section 564(g) of the FD&C Act are met, FDA has revoked the EUA for Roche Molecular Systems, Inc.'s *LightMix® Zika rRT–PCR Test.* The revocation in its entirety follows and provides an explanation of the reasons for revocation, as required by section 564(h)(1) of the FD&C Act.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
Silver Spring, MD 20993

March 13, 2017

Angela Tucker, Ph.D.
Vice President, Regulatory Affairs
Roche Molecular Systems, Inc.
4300 Hacienda Drive
Pleasanton, CA 94588

Dear Dr. Tucker:

This letter is in response to your request dated March 10, 2017, that the Food and Drug Administration (FDA) withdraw the Emergency Use Authorization (EUA160017) for emergency use of Roche Molecular Systems, Inc.'s ("Roche") *LightMix® Zika rRT-PCR Test* issued on August 26, 2016, and amended on November 23, 2016. Roche has decided to no longer market the product.

Under section 564(g)(2) of the Federal Food, Drug and Cosmetic Act (the Act), 21 U.S.C. 360bbb-3(g)(2), FDA has determined that the criteria for authorization under section 564(c) of the Act are no longer met. The known and potential benefits of the test for detecting Zika virus and diagnosing Zika virus infection no longer outweigh the known and potential risk of the product due to concerns regarding the false positive results observed. In addition, the product will no longer be marketed and these circumstances make revocation appropriate to protect the public health or safety.

Accordingly, FDA revokes the EUA for emergency use of the *LightMix® Zika rRT-PCR Test*, under section 564(g) of the Act. As of the date of this letter, the *LightMix® Zika rRT-PCR Test* that was authorized by FDA for use by clinical laboratories for the qualitative detection of RNA from Zika virus is no longer authorized by FDA.

FDA encourages Roche to instruct laboratories to discontinue use of and discard any remaining inventory immediately.

Notice of this revocation will be published in the *Federal Register*, pursuant to section 564 of the Act, 21 U.S.C. 360bbb-3.

Sincerely,

Stephen Ostroff, M.D.
Acting Commissioner of Food and Drugs

Dated: June 21, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–1486]

Authorizations of Emergency Use of In Vitro Diagnostic Devices for Detection of Zika Virus; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the issuance of two Emergency Use Authorizations (EUAs) (the Authorizations) for in vitro diagnostic devices for detection of the Zika virus in response to the Zika virus outbreak in the Americas. FDA issued these Authorizations under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as requested by Nanobiosym Diagnostics, Inc. and DiaSorin Inc. The Authorizations contain, among other things, conditions on the emergency use of the authorized in vitro diagnostic devices. The Authorizations follow the February 26, 2016, determination by the Secretary of Health and Human Services (HHS) that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves Zika virus. On the basis of such determination, the Secretary of HHS declared on February 26, 2016, that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under the FD&C Act. The Authorizations, which include an explanation of the reasons for issuance, are reprinted in this document.

DATES: The Authorization for Nanobiosym Diagnostics, Inc. is effective as of March 20, 2017; the Authorization for DiaSorin Inc. is effective as of April 5, 2017.

ADDRESSES: Submit written requests for single copies of the EUAs to the Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4338, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request or include a fax number to which the Authorizations may be sent. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the Authorizations.

FOR FURTHER INFORMATION CONTACT: Carmen Maher, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4347, Silver Spring, MD 20993–0002, 301–796–8510 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

Section 564 of the FD&C Act (21 U.S.C. 360bbb–3) as amended by the Project BioShield Act of 2004 (Pub L. 108–276) and the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (Pub L. 113–5) allows FDA to strengthen the public health protections against biological, chemical, nuclear, and radiological agents. Among other things, section 564 of the FD&C Act allows FDA to authorize the use of an unapproved medical product or an unapproved use of an approved medical product in certain situations. With this EUA authority, FDA can help assure that medical countermeasures may be used in emergencies to diagnose, treat, or prevent serious or life-threatening diseases or conditions caused by biological, chemical, nuclear, or radiological agents when there are no adequate, approved, and available alternatives.

Section 564(b)(1) of the FD&C Act provides that, before an EUA may be issued, the Secretary of HHS must declare that circumstances exist justifying the authorization based on one of the following grounds: (1) A determination by the Secretary of Homeland Security that there is a domestic emergency, or a significant potential for a domestic emergency, involving a heightened risk of attack with a biological, chemical, radiological, or nuclear agent or agents; (2) a determination by the Secretary of Defense that there is a military emergency, or a significant potential for a military emergency, involving a heightened risk to U.S. military forces of attack with a biological, chemical, radiological, or nuclear agent or agents; (3) a determination by the Secretary of HHS that there is a public health emergency, or a significant potential for a public health emergency, that affects, or has a significant potential to affect, national security or the health and security of U.S. citizens living abroad, and that involves a biological, chemical, radiological, or nuclear agent or agents, or a disease or condition that may be attributable to such agent or agents; or (4) the identification of a material threat by the Secretary of Homeland Security under section 319F–2 of the Public Health Service (PHS) Act (42 U.S.C. 247d–6b) sufficient to affect national security or the health and security of U.S. citizens living abroad.

Once the Secretary of HHS has declared that circumstances exist justifying an authorization under section 564 of the FD&C Act, FDA may authorize the emergency use of a drug, device, or biological product if the Agency concludes that the statutory criteria are satisfied. Under section 564(h)(1) of the FD&C Act, FDA is required to publish in the **Federal Register** a notice of each authorization, and each termination or revocation of an authorization, and an explanation of the reasons for the action. Section 564 of the FD&C Act permits FDA to authorize the introduction into interstate commerce of a drug, device, or biological product

intended for use when the Secretary of HHS has declared that circumstances exist justifying the authorization of emergency use. Products appropriate for emergency use may include products and uses that are not approved, cleared, or licensed under sections 505, 510(k), or 515 of the FD&C Act (21 U.S.C. 355, 360(k), and 360e) or section 351 of the PHS Act (42 U.S.C. 262). FDA may issue an EUA only if, after consultation with the HHS Assistant Secretary for Preparedness and Response, the Director of the National Institutes of Health, and the Director of the Centers for Disease Control and Prevention (to the extent feasible and appropriate given the applicable circumstances), FDA[1] concludes: (1) That an agent referred to in a declaration of emergency or threat can cause a serious or life-threatening disease or condition; (2) that, based on the totality of scientific evidence available to FDA, including data from adequate and well-controlled clinical trials, if available, it is reasonable to believe that: (A) The product may be effective in diagnosing, treating, or preventing (i) such disease or condition; or (ii) a serious or life-threatening disease or condition caused by a product authorized under section 564, approved or cleared under the FD&C Act, or licensed under section 351 of the PHS Act, for diagnosing, treating, or preventing such a disease or condition caused by such an agent; and (B) the known and potential benefits of the product, when used to diagnose, prevent, or treat such disease or condition, outweigh the known and potential risks of the product, taking into consideration the material threat posed by the agent or agents identified in a declaration under section 564(b)(1)(D) of the FD&C Act, if applicable; (3) that there is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating such disease or condition; and (4) that such other criteria as may be prescribed by regulation are satisfied.

No other criteria for issuance have been prescribed by regulation under section 564(c)(4) of the FD&C Act. Because the statute is self-executing, regulations or guidance are not required for FDA to implement the EUA authority.

[1] The Secretary of HHS has delegated the authority to issue an EUA under section 564 of the FD&C Act to the Commissioner of Food and Drugs.

II. EUA Requests for In Vitro Diagnostic Devices for Detection of the Zika Virus

On February 26, 2016, the Secretary of HHS determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves Zika virus. On February 26, 2016, under section 564(b)(1) of the FD&C Act, and on the basis of such determination, the Secretary of HHS declared that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under section 564 of the FD&C Act. Notice of the determination and declaration of the Secretary was published in the **Federal Register** on March 2, 2016 (81 FR 10878). On February 24, 2017, Nanobiosym Diagnostics, Inc. requested, and on March 20, 2017, FDA issued, an EUA for the Gene-RADAR® Zika Virus Test, subject to the terms of the Authorization. On March 30, 2017, DiaSorin Inc. requested, and on April 5, 2017, FDA issued an EUA for the LIAISON® XL Zika Capture IgM Assay, subject to the terms of the Authorization.

III. Electronic Access

An electronic version of this document and the full text of the Authorizations are available on the Internet at *https://www.regulations.gov/.*

IV. The Authorizations

Having concluded that the criteria for issuance of the Authorizations under section 564(c) of the FD&C Act are met, FDA has authorized the emergency use of two in vitro diagnostic devices for detection of Zika virus subject to the terms of the Authorizations. The Authorizations in their entirety (not including the authorized versions of the fact sheets and other written materials) follow and provide an explanation of the reasons for issuance, as required by section 564(h)(1) of the FD&C Act:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
Silver Spring, MD 20993

March 20, 2017

Anita Goel, MD, Ph.D.
Chairman and CEO
Nanobiosym Diagnostics, Inc.
245 First Street, 18th Floor
Cambridge, MA 02142

Dear Dr. Goel:

This letter is in response to your request that the Food and Drug Administration (FDA) issue an Emergency Use Authorization (EUA) for emergency use of Nanobiosym Diagnostics, Inc.'s ("Nanobiosym") Gene-RADAR® Zika Virus Test for the qualitative detection of RNA from Zika virus in human serum from individuals meeting Centers for Disease Control and Prevention (CDC) Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated), by laboratories in the United States (U.S.) that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high complexity tests, or by similarly qualified non-U.S. laboratories, pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. § 360bbb-3).[1] Test results are for the identification of Zika virus RNA. Zika virus RNA is generally detectable in serum during the acute phase of infection and, according to the updated CDC Guidance for U.S. Laboratories Testing for Zika Virus Infection,[2] up to 14 days in serum, following onset of symptoms, if present. Positive results are indicative of current infection.

On February 26, 2016, pursuant to section 564(b)(1)(C) of the Act (21 U.S.C. § 360bbb-3(b)(1)(C)), the Secretary of Health and Human Services (HHS) determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves Zika virus.[3] Pursuant to section 564(b)(1) of the Act (21 U.S.C. § 360bbb-3(b)(1)), and on the basis

[1] For ease of reference, this letter will refer to "laboratories in the United States (U.S.) that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high complexity tests, or by similarly qualified non-U.S. laboratories" as "authorized laboratories."

[2] Available at http://www.cdc.gov/zika/laboratories/lab-guidance.html (last updated on November 16, 2016).

[3] As amended by the Pandemic and All Hazards Preparedness Reauthorization Act, Pub. L. No. 113-5, under section 564(b)(1)(C) of the Act, the Secretary may make a determination of a public health emergency, or of a significant potential for a public health emergency.

of such determination, the Secretary of HHS then declared that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under 21 U.S.C. § 360bbb-3(a).[4]

Having concluded that the criteria for issuance of this authorization under section 564(c) of the Act (21 U.S.C. § 360bbb-3(c)) are met, I am authorizing the emergency use of the Gene-RADAR® Zika Virus Test (as described in the Scope of Authorization section of this letter (Section II)) in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) (as described in the Scope of Authorization section of this letter (Section II)) for the detection of Zika virus infection by authorized laboratories, subject to the terms of this authorization.

I. Criteria for Issuance of Authorization

I have concluded that the emergency use of the Gene-RADAR® Zika Virus Test for the detection of Zika virus and diagnosis of Zika virus infection in the specified population meets the criteria for issuance of an authorization under section 564(c) of the Act, because I have concluded that:

1. The Zika virus can cause Zika virus infection, a serious or life-threatening disease or condition to humans infected with the virus;

2. Based on the totality of scientific evidence available to FDA, it is reasonable to believe that the Gene-RADAR® Zika Virus Test, when used with the specified instrument(s) and in accordance with the Scope of Authorization, may be effective in detecting Zika virus and diagnosing Zika virus infection, and that the known and potential benefits of the Gene-RADAR® Zika Virus Test for detecting Zika virus and diagnosing Zika virus infection outweigh the known and potential risks of such product; and

3. There is no adequate, approved, and available alternative to the emergency use of the Gene-RADAR® Zika Virus Test for detecting Zika virus and diagnosing Zika virus infection.[5]

II. Scope of Authorization

I have concluded, pursuant to section 564(d)(1) of the Act, that the scope of this authorization is limited to the use of the authorized Gene-RADAR® Zika Virus Test by authorized laboratories for the detection of RNA from Zika virus and diagnosis of Zika virus infection in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or

[4] HHS. *Determination and Declaration Regarding Emergency Use of in Vitro Diagnostic Tests for Detection of Zika Virus and/or Diagnosis of Zika Virus Infection*. 81 Fed. Reg. 10878 (March 2, 2016).

[5] No other criteria of issuance have been prescribed by regulation under section 564(c)(4) of the Act.

travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

The Authorized Gene-RADAR® Zika Virus Test

The Gene-RADAR® Zika Virus Test is a real-time reverse transcription polymerase chain reaction (rRT-PCR) assay for the qualitative detection of RNA from Zika virus in human serum and other authorized specimen types.

To perform the Gene-RADAR® Zika Virus Test, the RNA is first extracted and purified from the patient specimen. The RNA is then reverse transcribed into cDNA which is amplified using the primer set and detected using the specific probe. The rRT-PCR is performed on the Gene-RADAR® Platform, or other authorized instruments.

The Gene-RADAR® Zika Virus Test includes the following materials or other authorized materials: Gene-RADAR® Zika Virus Kit Buffer 1 (containing primers, probes and reaction buffer), Gene-RADAR® Zika Virus Internal Process Control, Gene-RADAR® Zika Virus Positive/Negative Control, Gene-RADAR® Nanochips for use with samples and controls. The Gene-RADAR® Zika Virus Test also requires the use of additional materials and ancillary reagents that are not included with the test but are commonly used in clinical laboratories and are described in the authorized Gene-RADAR® Zika Virus Test Instructions for Use.

The Gene-RADAR® Zika Virus Test requires the following control materials, or other authorized control materials; all controls listed below must generate expected results in order for a test to be considered valid, as outlined in the Gene-RADAR® Zika Virus Test Instructions for Use:

- Gene-RADAR® Zika Virus Positive Control: Synthetic Zika RNA target sequence that can be amplified and detected – run with each batch of patient specimens. Monitors for failures of rRT-PCR reagents and reaction conditions.
- Negative Control: DNase and RNase-free water – run with each batch of patient specimens. Monitors for reagent and system contamination.
- Gene-RADAR® Zika Virus Internal Process Control: inactivated and stabilized MS2 Bacteriophage, requires extraction – added to each sample and control during the extraction step. The MS2 RNA is co-extracted and co-amplified with the target nucleic acid, and monitors for integrity of the kit reagents, equipment function and the presence of amplification inhibitors in the samples.

The above described Gene-RADAR® Zika Virus Test, when labeled consistently with the labeling authorized by FDA entitled "Gene-RADAR® Zika Virus Test Instructions for Use" (available at http://www.fda.gov/MedicalDevices/Safety/EmergencySituations/ucm161496.htm), which may be revised by Nanobiosym in consultation with the Division of Microbiology Devices (DMD)/Office of In Vitro Diagnostics and Radiological Health (OIR)/Center for Devices and Radiological Health (CDRH), is authorized to be distributed to and used by authorized laboratories under this EUA, despite the fact that it does not meet certain requirements otherwise required by federal law.

The above described Gene-RADAR® Zika Virus Test is authorized to be accompanied by the

following information pertaining to the emergency use, which is authorized to be made available to healthcare providers and patients, including pregnant women:

- Fact Sheet for Healthcare Providers: Interpreting Gene-RADAR® Zika Virus Test Results
- Fact Sheet for Patients: Understanding Results from the Gene-RADAR® Zika Virus Test

As described in Section IV below, Nanobiosym and its authorized distributors are also authorized to make available additional information relating to the emergency use of the authorized Gene-RADAR® Zika Virus Test that is consistent with, and does not exceed, the terms of this letter of authorization.

I have concluded, pursuant to section 564(d)(2) of the Act, that it is reasonable to believe that the known and potential benefits of the authorized Gene-RADAR® Zika Virus Test in the specified population, when used for detection of Zika virus and to diagnose Zika virus infection and used consistently with the Scope of Authorization of this letter (Section II), outweigh the known and potential risks of such a product.

I have concluded, pursuant to section 564(d)(3) of the Act, based on the totality of scientific evidence available to FDA, that it is reasonable to believe that the authorized Gene-RADAR® Zika Virus Test may be effective in the detection of Zika virus and diagnosis of Zika virus infection, when used consistently with the Scope of Authorization of this letter (Section II), pursuant to section 564(c)(2)(A) of the Act.

FDA has reviewed the scientific information available to FDA, including the information supporting the conclusions described in Section I above, and concludes that the authorized Gene-RADAR® Zika Virus Test, when used for detection of Zika virus and to diagnose Zika virus infection in the specified population (as described in the Scope of Authorization of this letter (Section II)), meets the criteria set forth in section 564(c) of the Act concerning safety and potential effectiveness.

The emergency use of the authorized Gene-RADAR® Zika Virus Test under this EUA must be consistent with, and may not exceed, the terms of this letter, including the Scope of Authorization (Section II) and the Conditions of Authorization (Section IV). Subject to the terms of this EUA and under the circumstances set forth in the Secretary of HHS's determination described above and the Secretary of HHS's corresponding declaration under section 564(b)(1), the Gene-RADAR® Zika Virus Test described above is authorized to detect Zika virus and diagnose Zika virus infection in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika virus transmissions at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

This EUA will cease to be effective when the HHS declaration that circumstances exist to justify the EUA is terminated under section 564(b)(2) of the Act or when the EUA is revoked under section 564(g) of the Act.

III. Waiver of Certain Requirements

I am waiving the following requirements for the Gene-RADAR® Zika Virus Test during the duration of this EUA:

- Current good manufacturing practice requirements, including the quality system requirements under 21 CFR Part 820 with respect to the design, manufacture, packaging, labeling, storage, and distribution of the Gene-RADAR® Zika Virus Test.

- Labeling requirements for cleared, approved, or investigational devices, including labeling requirements under 21 CFR 809.10 and 21 CFR 809.30, except for the intended use statement (21 CFR 809.10(a)(2), (b)(2)), adequate directions for use (21 U.S.C. 352(f)), (21 CFR 809.10(b)(5), (7), and (8)), any appropriate limitations on the use of the device including information required under 21 CFR 809.10(a)(4), and any available information regarding performance of the device, including requirements under 21 CFR 809.10(b)(12).

IV. Conditions of Authorization

Pursuant to section 564 of the Act, I am establishing the following conditions on this authorization:

Nanobiosym and Its Authorized Distributor(s)

A. Nanobiosym and its authorized distributor(s) will distribute the authorized Gene-RADAR® Zika Virus Test with the authorized labeling only to authorized laboratories. Changes to the authorized labeling may be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

B. Nanobiosym and its authorized distributor(s) will provide to authorized laboratories the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Healthcare Providers and the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Patients.

C. Nanobiosym and its authorized distributor(s) will make available on their websites the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Healthcare Providers and the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Patients.

D. Nanobiosym and its authorized distributor(s) will inform authorized laboratories and relevant public health authority(ies) of this EUA, including the terms and conditions herein.

E. Nanobiosym and its authorized distributor(s) will ensure that the authorized laboratories using the authorized Gene-RADAR® Zika Virus Test have a process in place for reporting test results to healthcare providers and relevant public health

authorities, as appropriate.[6]

F. Through a process of inventory control, Nanobiosym and its authorized distributor(s) will maintain records of device usage.

G. Nanobiosym and its authorized distributor(s) will collect information on the performance of the test. Nanobiosym will report to FDA any suspected occurrence of false positive and false negative results and significant deviations from the established performance characteristics of the test of which Nanobiosym becomes aware.

H. Nanobiosym and its authorized distributor(s) are authorized to make available additional information relating to the emergency use of the authorized Gene-RADAR® Zika Virus Test that is consistent with, and does not exceed, the terms of this letter of authorization.

Nanobiosym Diagnostics, Inc.

I. Nanobiosym will notify FDA of any authorized distributor(s) of the Gene-RADAR® Zika Virus Test, including the name, address, and phone number of any authorized distributor(s).

J. Nanobiosym will provide its authorized distributor(s) with a copy of this EUA, and communicate to its authorized distributor(s) any subsequent amendments that might be made to this EUA and its authorized accompanying materials (e.g., Fact Sheets, Instructions for Use).

K. Nanobiosym may request changes to the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Healthcare Providers and the authorized Gene-RADAR® Zika Virus Test Fact Sheet for Patients. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

L. Nanobiosym may request the addition of other instruments for use with the authorized Gene-RADAR® Zika Virus Test. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

M. Nanobiosym may request the addition of other extraction methods for use with the authorized Gene-RADAR® Zika Virus Test. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

N. Nanobiosym may request the addition of other specimen types for use with the authorized Gene-RADAR® Zika Virus Test. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

---

[6] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Nanobiosym, other authorized distributor(s), and authorized laboratories consult with the applicable country, state or territory health department(s). According to CDC, Zika virus disease is a nationally notifiable condition (see http://www.cdc.gov/zika/).

O. Nanobiosym may request the addition and/or substitution of other control materials for use with the authorized Gene-RADAR® Zika Virus Test. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

P. Nanobiosym may request the addition and/or substitution of other ancillary reagents and materials for use with the authorized Gene-RADAR® Zika Virus Test. Such requests will be made by Nanobiosym in consultation with, and require concurrence of, DMD/OIR/CDRH.

Q. Nanobiosym will assess traceability[7] of the Gene-RADAR® Zika Virus Test with FDA-recommended reference material(s). After submission to FDA and DMD/OIR/CDRH's review of and concurrence with the data, Nanobiosym will update its labeling to reflect the additional testing.

R. Nanobiosym will track adverse events and report to FDA under 21 CFR Part 803.

Authorized Laboratories

S. Authorized laboratories will include with reports of the results of the Gene-RADAR® Zika Virus Test the authorized Fact Sheet for Healthcare Providers and the authorized Fact Sheet for Patients. Under exigent circumstances, other appropriate methods for disseminating these Fact Sheets may be used, which may include mass media.

T. Authorized laboratories will perform the Gene-RADAR® Zika Virus Test using the QIAamp® Viral RNA Mini Kit or with other authorized extraction methods.

U. Authorized laboratories will perform the Gene-RADAR® Zika Virus Test on the Gene-RADAR® Platform, or other authorized instruments.

V. Authorized laboratories will perform the Gene-RADAR® Zika Virus Test on human serum or other authorized specimen types.

W. Authorized laboratories will have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[8]

X. Authorized laboratories will collect information on the performance of the test and report to DMD/OIR/CDRH (*via* email CDRH-EUA-Reporting@fda.hhs.gov) and Nanobiosym any suspected occurrence of false positive or false negative results of which they become aware.

---

[7] Traceability refers to tracing analytical sensitivity/reactivity back to a FDA-recommended reference material.

[8] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Nanobiosym, other authorized distributor(s), and authorized laboratories consult with the applicable country, state or territory health department(s). According to CDC, Zika virus disease is a nationally notifiable condition. http://www.cdc.gov/zika/.

Y. All laboratory personnel using the test should be appropriately trained in RT-PCR techniques and use appropriate laboratory and personal protective equipment when handling this kit, and use the test in accordance with the authorized labeling.

Nanobiosym, Its Authorized Distributor(s) and Authorized Laboratories

Z. Nanobiosym, its authorized distributor(s), and authorized laboratories, will ensure that any records associated with this EUA are maintained until notified by FDA. Such records will be made available to FDA for inspection upon request.

Conditions Related to Advertising and Promotion

AA. All advertising and promotional descriptive printed matter relating to the use of the authorized Gene-RADAR® Zika Virus Test shall be consistent with the Fact Sheets and authorized labeling, as well as the terms set forth in this EUA and the applicable requirements set forth in the Act and FDA regulations.

BB. All advertising and promotional descriptive printed matter relating to the use of the authorized Gene-RADAR® Zika Virus Test shall clearly and conspicuously state that:

- This test has not been FDA cleared or approved;
- This test has been authorized by FDA under an EUA for use by authorized laboratories;
- This test has been authorized only for the detection of RNA from Zika virus and diagnosis of Zika virus infection, not for any other viruses or pathogens; and
- This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection under section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

No advertising or promotional descriptive printed matter relating to the use of the authorized Gene-RADAR® Zika Virus Test may represent or suggest that this test is safe or effective for the diagnosis of Zika virus infection.

The emergency use of the authorized Gene-RADAR® Zika Virus Test as described in this letter of authorization must comply with the conditions and all other terms of this authorization.

V. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection is terminated under section 564(b)(2) of the Act or the EUA is revoked under section 564(g) of the Act.

Sincerely,

Stephen Ostroff, M.D.
Acting Commissioner of Food and Drugs

Enclosures

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration
Silver Spring, MD 20993

April 5, 2017

Mari Meyer
Vice President, Regulatory and Clinical Affairs, North America
DiaSorin Incorporated
1951 Northwestern Avenue
Stillwater, MN 55082

Dear Ms. Meyer:

This letter is in response to your request that the Food and Drug Administration (FDA) issue an Emergency Use Authorization (EUA) for emergency use of DiaSorin Incorporated's ("DiaSorin") LIAISON® XL Zika Capture IgM Assay for the presumptive qualitative detection of Zika virus IgM antibodies in human sera collected from individuals meeting the Centers for Disease Control and Prevention (CDC) Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated), by laboratories in the United States that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories,[1] pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. § 360bbb-3). Specimens used with the LIAISON® XL Zika Capture IgM Assay should be collected between 8 days and 10 weeks after onset of symptoms or risk of exposure. Where there are presumptive Zika IgM positive and presumptive recent Zika positive results from the LIAISON® XL Zika Capture IgM Assay, confirmation of the presence of anti-Zika IgM antibodies requires additional testing, as described in the Scope of Authorization of this letter (Section II) and in the authorized Instructions for Use document, and/or consideration alongside test results for other patient-matched specimens using the latest CDC testing algorithms for the diagnosis of Zika virus infection.

On February 26, 2016, pursuant to section 564(b)(1)(C) of the Act (21 U.S.C. § 360bbb-3(b)(1)(C), the Secretary of Health and Human Services (HHS) determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad and that involves Zika virus.[2] Pursuant to section 564(b)(1) of the Act (21 U.S.C. § 360bbb-3(b)(1)), and on the basis of such determination, the Secretary of HHS then declared that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or

[1] For ease of reference, this letter will refer to "laboratories in the United States that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories" as "authorized laboratories."

[2] As amended by the Pandemic and All-Hazards Preparedness Reauthorization Act, Pub. L. No. 113-5, under section 564(b)(1)(C) of the Act, the Secretary may make a determination of a public health emergency, or of a significant potential for a public health emergency.

diagnosis of Zika virus infection, subject to the terms of any authorization issued under 21 U.S.C. § 360bbb-3(a).[3]

Having concluded that the criteria for issuance of this authorization under section 564(c) of the Act (21 U.S.C. § 360bbb-3(c)) are met, I am authorizing the emergency use of the LIAISON® XL Zika Capture IgM Assay (as described in the Scope of Authorization section of this letter (Section II)) in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) (as described in the Scope of Authorization section of this letter (Section II)) for the presumptive qualitative detection of Zika virus infection by authorized laboratories, subject to the terms of this authorization.

I. Criteria for Issuance of Authorization

I have concluded that the emergency use of the LIAISON® XL Zika Capture IgM Assay for the presumptive qualitative detection of Zika virus IgM antibodies in the specified population meets the criteria for issuance of an authorization under section 564(c) of the Act, because I have concluded that:

1. The Zika virus can cause Zika virus infection, a serious or life-threatening disease or condition to humans infected with the virus;

2. Based on the totality of scientific evidence available to FDA, it is reasonable to believe that the LIAISON® XL Zika Capture IgM Assay may be effective in diagnosing recent Zika virus infection, and that the known and potential benefits of the LIAISON® XL Zika Capture IgM Assay for diagnosing Zika virus infection outweigh the known and potential risks of such product, when, for presumptive Zika IgM positive and presumptive recent Zika positive results, additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered; and

3. There is no adequate, approved, and available alternative to the emergency use of the LIAISON® XL Zika Capture IgM Assay for diagnosing Zika virus infection.[4]

II. Scope of Authorization

I have concluded, pursuant to section 564(d)(1) of the Act, that the scope of this authorization is limited to the use of the authorized LIAISON® XL Zika Capture IgM Assay by authorized laboratories for the presumptive qualitative detection of Zika virus IgM antibodies in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other

[3] HHS. *Determination and Declaration Regarding Emergency Use of In Vitro Diagnostic Tests for Detection of Zika Virus and/or Diagnosis of Zika Virus Infection.* 81 Fed. Reg. 10878 (March 2, 2016).

[4] No other criteria of issuance have been prescribed by regulation under section 564(c)(4) of the Act.

epidemiological criteria for which Zika virus testing may be indicated) when, for presumptive Zika IgM positive and presumptive recent Zika positive results, additional testing (as described in the Instructions for Use document) is performed[5] and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered.

The Authorized LIAISON® XL Zika Capture IgM Assay

The LIAISON® XL Zika Capture IgM Assay is an automated immunoassay utilizing chemiluminescent detection technology for the *in vitro* presumptive qualitative detection of Zika virus IgM antibodies in human sera and other authorized specimen types from individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated). The test procedure is based on capturing human IgM and IgG antibodies from the patient specimen using magnetic particles functionalized with either anti-human-IgM antibody or anti-human-IgG antibody followed by the addition of Zika virus specific NS1 antigen and detector conjugate. The IgG result is used as an aid in the identification of a recent Zika viral infection when the IgM result falls in the dual cut-off zone as outlined in the LIAISON® XL Zika Capture IgM Assay Instructions for Use.

One of the limitations of this test is the possibility of false positive results in patients with a history of infection with other flaviviruses. For presumptive Zika IgM positive or presumptive recent Zika positive results, additional testing (as described in the Instructions for Use document) and/or consideration of test results for other patient-matched specimens, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, is therefore required to confirm Zika virus infection.

The automated assay uses two separate reagent packs (ZIKV-M and ZIKV-C Reagent Integrals) which contain magnetic beads coated with either a monoclonal anti-human-IgM antibody or a monoclonal anti-human-IgG antibody. Calibrators, patient sera or controls are then incubated with both reagent packs during the LIAISON® XL Zika Capture IgM Assay procedure and either human IgM antibodies or human IgG antibodies are captured by the appropriate magnetic particles. Following a wash cycle, the magnetic particles are then incubated with a recombinant Zika virus NS1 antigen-isoluminol conjugate, washed and reagents added to induce chemiluminescence that can be measured by the LIAISON® XL Analyzer or other instruments that may be authorized. The LIAISON® XL Zika Capture IgM Assay requires both the ZIKV-M and ZIKV-C Reagent Integrals to be calibrated under specific conditions described in the authorized LIAISON® XL Zika Capture IgM Assay Instructions for Use.

The LIAISON® XL Zika Capture IgM Assay includes the following materials, or other authorized materials:

- **ZIKV-M Reagent Integral:**

[5] As discussed in the Instructions for Use document, the additional testing for presumptive Zika IgM positive or presumptive recent Zika positive results is to be performed using the latest CDC testing algorithms for the diagnosis of Zika virus infection.

- Magnetic Particles – coated with a mouse monoclonal antibody to human IgM
- Calibrator 1 - Human serum/defibrinated plasma containing Zika virus IgM
- Calibrator 2 - Human serum/defibrinated plasma containing Zika virus IgM
- Specimen Diluent
- Assay Buffer

- **ZIKV-C Reagent Integral:**
  - Magnetic Particles – coated with a mouse monoclonal antibody to human IgG
  - Specimen Diluent
  - Assay Buffer

- **Additional components not on the Reagent Integrals:**
  - ZIKV-M Conjugate Lyophilized – recombinant Zika virus NS1 antigen conjugated to an isoluminol derivative
  - ZIKV-C Conjugate Lyophilized – recombinant Zika virus NS1 antigen conjugated to an isoluminol derivative
  - ZIKV-C Calibrator 1- Human serum/defibrinated plasma containing Zika virus IgG
  - ZIKV-C Calibrator 2- Human serum/defibrinated plasma containing Zika virus IgG

The LIAISON® XL Zika Capture IgM Assay requires the following control materials or other authorized control materials, which are not provided with the test:

- **LIAISON® XL Zika Capture IgM Control Set:** The positive control aids in verifying the validity of the kit.

Controls listed above must be performed once per day of use, or according to the guidelines or requirements of local regulations or accredited organizations. Controls must generate expected results in order for patient results to be considered valid.

The LIAISON® XL Zika Capture IgM Assay also requires the use of additional materials and ancillary reagents commonly used in clinical laboratories and that are described in the authorized LIAISON® XL Zika Capture IgM Assay Instructions for Use.

The above described LIAISON® XL Zika Capture IgM Assay, when labeled consistently with the labeling authorized by FDA entitled "LIAISON® XL Zika Capture IgM Assay Instructions for Use" (available at http://www.fda.gov/MedicalDevices/%20Safety/EmergencySituations/ucm161496.htm), is authorized to be distributed to and used by authorized laboratories under this EUA, despite the fact that it does not meet certain requirements otherwise required by federal law. This labeling may be revised by DiaSorin in consultation with, and with concurrence of, the Division of Microbiology Devices (DMD)/Office of In Vitro Diagnostics and Radiological Health (OIR)/Center for Devices and Radiological Health (CDRH).

The above described LIAISON® XL Zika Capture IgM Assay is authorized to be accompanied by the following information pertaining to the emergency use, which is authorized to be made available to healthcare providers and patients:

- Fact Sheet for Healthcare Providers: Interpreting LIAISON® XL Zika Capture IgM Assay Results
- Fact Sheet for Patients: Understanding Results from the LIAISON® XL Zika Capture IgM Assay

Other Fact Sheets developed by DiaSorin in consultation with, and with concurrence of, the Office of Counterterrorism and Emerging Threats (OCET)/Office of the Chief Scientist (OCS)/Office of the Commissioner (OC) and DMD/OIR/CDRH may be authorized to accompany the above described LIAISON® XL Zika Capture IgM Assay and to be made available to healthcare providers and patients.

As described in Section IV below, DiaSorin is also authorized to make available additional information relating to the emergency use of the authorized LIAISON® XL Zika Capture IgM Assay that is consistent with, and does not exceed, the terms of this letter of authorization.

I have concluded, pursuant to section 564(d)(2) of the Act, that it is reasonable to believe that the known and potential benefits of the authorized LIAISON® XL Zika Capture IgM Assay in the specified population, when used for presumptive qualitative detection of Zika virus IgM antibodies and used consistently with the Scope of Authorization of this letter (Section II), outweigh the known and potential risks of such a product.

I have concluded, pursuant to section 564(d)(3) of the Act, based on the totality of scientific evidence available to FDA, that it is reasonable to believe that the authorized LIAISON® XL Zika Capture IgM Assay may be effective in the diagnosis of recent Zika virus infection, when used consistently with the Scope of Authorization of this letter (Section II), pursuant to section 564(c)(2)(A) of the Act.

FDA has reviewed the scientific information available to FDA, including the information supporting the conclusions described in Section I above, and concludes that the authorized LIAISON® XL Zika Capture IgM Assay, when used to diagnose Zika virus infection in the specified population (as described in the Scope of Authorization of this letter (Section II)), meets the criteria set forth in section 564(c) of the Act concerning safety and potential effectiveness.

The emergency use of the authorized LIAISON® XL Zika Capture IgM Assay under this EUA must be consistent with, and may not exceed, the terms of this letter, including the Scope of Authorization (Section II) and the Conditions of Authorization (Section IV). Subject to the terms of this EUA and under the circumstances set forth in the Secretary of HHS's determination described above and the Secretary of HHS's corresponding declaration under section 564(b)(1), the LIAISON® XL Zika Capture IgM Assay described above is authorized to diagnose Zika virus infection in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

This EUA will cease to be effective when the HHS declaration that circumstances exist to justify the EUA is terminated under section 564(b)(2) of the Act or when the EUA is revoked under section 564(g) of the Act.

III. Waiver of Certain Requirements

I am waiving the following requirements for the LIAISON® XL Zika Capture IgM Assay during the duration of this EUA:

- Current good manufacturing practice requirements, including the quality system requirements under 21 CFR Part 820 with respect to the design, manufacture, packaging, labeling, storage, and distribution of the LIAISON® XL Zika Capture IgM Assay.

- Labeling requirements for cleared, approved, or investigational devices, including labeling requirements under 21 CFR 809.10 and 21 CFR 809.30, except for the intended use statement (21 CFR 809.10(a)(2), (b)(2)), adequate directions for use (21 U.S.C. 352(f)), (21 CFR 809.10(b)(5), (7), and (8)), any appropriate limitations on the use of the device including information required under 21 CFR 809.10(a)(4), and any available information regarding performance of the device, including requirements under 21 CFR 809.10(b)(12).

IV. Conditions of Authorization

Pursuant to section 564 of the Act, I am establishing the following conditions on this authorization:

DiaSorin and Its Authorized Distributor(s)

A. DiaSorin and its authorized distributor(s) will distribute the authorized LIAISON® XL Zika Capture IgM Assay with the authorized labeling only to authorized laboratories. DiaSorin may request changes to the authorized labeling. Such requests will be made by DiaSorin in consultation with, and require concurrence of, DMD/OIR/CDRH.

B. DiaSorin and its authorized distributor(s) will provide to authorized laboratories the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Healthcare Providers and the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Patients, and any additional LIAISON® XL Zika Capture IgM Assay Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

C. DiaSorin and its authorized distributor(s) will make available on their websites the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Healthcare Providers and the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Patients, and any additional LIAISON® XL Zika Capture IgM Assay Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

D. DiaSorin and its authorized distributor(s) will inform authorized laboratories and relevant

public health authority(ies) of this EUA, including the terms and conditions herein.

E. DiaSorin and its authorized distributor(s) will ensure that authorized laboratories using the authorized LIAISON® XL Zika Capture IgM Assay have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[6]

F. Through a process of inventory control, DiaSorin and its authorized distributor(s) will maintain records of device usage.

G. DiaSorin and its authorized distributor(s) will collect information on the performance of the assay. DiaSorin will report to FDA any suspected occurrence of false positive and false negative results and significant deviations from the established performance characteristics of the assay of which DiaSorin becomes aware.

H. DiaSorin and its authorized distributor(s) are authorized to make available additional information relating to the emergency use of the authorized LIAISON® XL Zika Capture IgM Assay that is consistent with, and does not exceed, the terms of this letter of authorization.

DiaSorin

I. DiaSorin will notify FDA of any authorized distributor(s) of the LIAISON® XL Zika Capture IgM Assay, including the name, address, and phone number of any authorized distributor(s).

J. DiaSorin will provide its authorized distributor(s) with a copy of this EUA, and communicate to its authorized distributor(s) any subsequent amendments that might be made to this EUA and its authorized accompanying materials (e.g., Fact Sheets, Instructions for Use).

K. DiaSorin may request changes to the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Healthcare Providers and the authorized LIAISON® XL Zika Capture IgM Assay Fact Sheet for Patients. DiaSorin may also develop new LIAISON® XL Zika Capture IgM Assay Fact Sheets for Healthcare Providers and Patients, if appropriate, and may request changes to such Fact Sheets. All such requests listed in this condition of authorization will be made by DiaSorin in consultation with, and require concurrence of, OCET/OCS/OC and DMD/OIR/CDRH.

L. DiaSorin may request the addition of other instruments for use with the authorized LIAISON® XL Zika Capture IgM Assay. Such requests will be made by DiaSorin in consultation with, and require concurrence of, DMD/OIR/CDRH.

M. DiaSorin may request the addition of other ancillary reagents for use with the authorized LIAISON® XL Zika Capture IgM Assay. Such requests will be made by DiaSorin in

[6] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that DiaSorin and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

consultation with, and require concurrence of, DMD/OIR/CDRH.

N. DiaSorin may request the addition of other specimen types for use with the authorized LIAISON® XL Zika Capture IgM Assay. Such requests will be made by DiaSorin in consultation with, and require concurrence of, DMD/OIR/CDRH.

O. DiaSorin may request the addition of other control materials for use with the authorized LIAISON® XL Zika Capture IgM Assay. Such requests will be made by DiaSorin in consultation with, and require concurrence of, DMD/OIR/CDRH.

P. DiaSorin may request substitution for or changes to the authorized materials used in the detection process of the human anti-Zika IgM and human anti-Zika IgG in the specimen. Such requests will be made by DiaSorin in consultation with, and require concurrence of, DMD/OIR/CDRH.

Q. DiaSorin will track adverse events and report to FDA under 21 CFR Part 803.

R. DiaSorin will evaluate the performance of the LIAISON® XL Zika Capture IgM Assay with any FDA-recommended or established panel(s) of characterized clinical specimens, and will submit that performance data to FDA. After DMD/OIR/CDRH's review of and concurrence with the data, DiaSorin will update its labeling, in consultation with, and with concurrence of, DMD/OIR/CDRH, to reflect the additional testing.

S. DiaSorin will assess traceability[7] of the LIAISON® XL Zika Capture IgM Assay with any FDA-recommended reference material(s). After submission to FDA and DMD/OIR/CDRH's review of and concurrence with the data, DiaSorin will update its labeling to reflect the additional testing.

T. DiaSorin will track the performance of the LIAISON® XL Zika Capture IgM Assay and report to DMD/OIR/CDRH on a semi-annual basis.

Authorized Laboratories

U. Authorized laboratories will include with reports of the results of the LIAISON® XL Zika Capture IgM Assay the authorized Fact Sheet for Healthcare Providers and the authorized Fact Sheet for Patients, and any additional LIAISON® XL Zika Capture IgM Assay Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize. Under exigent circumstances, other appropriate methods for disseminating these Fact Sheets may be used, which may include mass media.

V. Authorized laboratories will perform the LIAISON® XL Zika Capture IgM Assay on serum or with other authorized specimen types.

W. Authorized laboratories will perform the LIAISON® XL Zika Capture IgM Assay on the LIAISON® XL Analyzer or on other authorized instruments.

[7] Traceability refers to tracing analytical sensitivity/reactivity back to a FDA-recommended reference material.

X. Within the United States and its territories, authorized laboratories will report all presumptive Zika IgM positive and presumptive recent Zika positive results to DiaSorin.

Y. Authorized laboratories will have a process in place to assure that, for presumptive Zika IgM positive and presumptive recent Zika positive results, additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, are considered.

Z. Authorized laboratories will have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[8]

AA. Authorized laboratories will collect information on the performance of the assay and report to DMD/OIR/CDRH (*via* email CDRH-EUA-Reporting@fda.hhs.gov) and DiaSorin any suspected occurrence of false negative and false positive results and significant deviations from the established performance characteristics of which they become aware.

BB. All laboratory personnel using the assay must be appropriately trained in performing and interpreting immunoassay techniques, use appropriate laboratory and personal protective equipment when handling this kit, and use the test in accordance with the authorized labeling. All laboratory personnel using the assay must also be trained in and be familiar with the algorithm used for the interpretation of results of the LIAISON® XL Zika Capture IgM Assay.

DiaSorin, Its Authorized Distributor(s), and Authorized Laboratories

CC. DiaSorin, its authorized distributor(s), and authorized laboratories will ensure that any records associated with this EUA are maintained until notified by FDA. Such records will be made available to FDA for inspection upon request.

Conditions Related to Advertising and Promotion

DD. All advertising and promotional descriptive printed matter relating to the use of the authorized LIAISON® XL Zika Capture IgM Assay shall be consistent with the authorized Fact Sheets and authorized labeling, as well as the terms set forth in this EUA and the applicable requirements set forth in the Act and FDA regulations.

EE. All advertising and promotional descriptive printed matter relating to the use of the authorized LIAISON® XL Zika Capture IgM Assay shall clearly and conspicuously state that:

- This test has not been FDA cleared or approved;
- This test has been authorized by FDA under an EUA for use by authorized laboratories;

[8] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that DiaSorin and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

Page 10 – Ms. Meyer, DiaSorin Inc.

- This test has been authorized only for the diagnosis of Zika virus infection and not for any other viruses or pathogens; and
- This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection under section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

No advertising or promotional descriptive printed matter relating to the use of the authorized LIAISON® XL Zika Capture IgM Assay may represent or suggest that this test is safe or effective for the diagnosis of Zika virus infection.

The emergency use of the authorized LIAISON® XL Zika Capture IgM Assay as described in this letter of authorization must comply with the conditions and all other terms of this authorization.

V. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection is terminated under section 564(b)(2) of the Act or the EUA is revoked under section 564(g) of the Act.

Sincerely,

Stephen M. Ostroff, M.D.
Acting Commissioner of Food and Drugs

Enclosures

Dated: June 26, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

National Institute of Neurological Disorders and Stroke; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the National Advisory Neurological Disorders and Stroke Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable materials, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Neurological Disorders and Stroke Council.

Date: September 7, 2017.

Open: September 7, 2017, 8:00 a.m. to 3:00 p.m.

Agenda: Report by the Director, NINDS; Report by the Director, Division of Extramural Research; and Administrative and Program Developments.

Place: National Institutes of Health, Porter Neuroscience Research Center, Building 35A, 35 Convent Drive, Bethesda, MD 20892.

Closed: September 7, 2017, 3:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Porter Neuroscience Research Center, Building 35A, 35 Convent Drive, Bethesda, MD 20892.

Contact Person: Robert Finkelstein, Ph.D., Director, Division of Extramural Research, National Institute of Neurological Disorders and Stroke, NIH, 6001 Executive Blvd., Suite 3309, MSC 9531, Bethesda, MD 20892, (301) 496–9248.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *http://www.ninds.nih.gov,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–0316]

National Boating Safety Advisory Council; Vacancies

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Request for applications.

SUMMARY: The Coast Guard seeks applications for membership on the National Boating Safety Advisory Council. This Council advises the Coast Guard on recreational boating safety regulations and other major boating safety matters.

DATES: Completed applications should reach the Coast Guard on or before August 29, 2017.

ADDRESSES: Applicants should send a cover letter expressing interest in an appointment to the National Boating Safety Advisory Council and specifying which membership category the applicant is applying under, along with a resume detailing the applicant's boating experience via one of the following methods:

- By email: *NBSAC@uscg.mil* (preferred).
- By mail: Commandant (CG–BSX–2)/NBSAC, *Attn:* Mr. Jeff Ludwig, U.S. Coast Guard, 2703 Martin Luther King Ave. SE., Stop 7501, Washington, DC 20593–7501.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Ludwig, Alternate Designated Federal Officer of the National Boating Safety Advisory Council; telephone 202–372–1061 or email at *NBSAC@uscg.mil.*

SUPPLEMENTARY INFORMATION: The National Boating Safety Advisory Council is a Federal advisory committee which operates under the provisions of Federal Advisory Committee Act, (Title 5 U.S.C., Appendix). It was established under the authority of 46 United States Code 13110 and advises the Coast Guard on boating safety regulations and other major boating safety matters. The Council usually meets at least twice each year at a location selected by the Coast Guard. It may also meet for extraordinary purposes. Subcommittees or working groups may also meet to consider specific issues.

Each member serves for a term of three years. Members may be considered to serve a maximum of two consecutive full terms. All members serve at their own expense and receive no salary, or other compensation from the Federal Government. The exception to this policy is when attending National Boating Safety Advisory Council meetings; members may be reimbursed for travel expenses and provided per diem in accordance with Federal Travel Regulations.

We will consider applications for the following seven positions that will be vacant on January 1, 2018:

- Three representatives of State officials responsible for State boating safety programs;
- Two representatives of recreational boat and associated equipment manufacturers; and
- Two representatives of national recreational boating organizations or the general public.

If you are selected as a member from the general public, you will be appointed and serve as a Special Government Employee as defined in section 202(a) of Title 18, United States Code. Applicants for appointment as a Special Government Employee, applicants are required to complete a Confidential Financial Disclosure Report (OGE Form 450). The Coast Guard may not release the reports or the information in them to the public except under an order issued by a Federal court or as otherwise provided under the Privacy Act (5 U.S.C. 552a). Only the Designated Coast Guard Ethics Official or his or her designee may release a Confidential Financial Disclosure Report. Applicants can obtain this form by going to the Web site of the Office of Government Ethics (*www.oge.gov*) or by contacting the individual listed above in **FOR FURTHER INFORMATION CONTACT**. Applications for a member drawn from the general public that are not accompanied by a completed OGE Form 450 will not be considered.

Registered lobbyists are not eligible to serve on federal advisory committees in an individual capacity. See ''Revised Guidance on Appointment of Lobbyists to Federal Advisory Committees, Boards and Commissions'' (79 FR 47482, August 13, 2014). The position we list for a member from the general public would be someone appointed in their capacity and would be designated as a Special Government Employee as defined in section 202(a) of Title 18, U.S.C. Registered lobbyists are lobbyist as defined in 2 U.S.C. 1602 who are required by 2 U.S.C. 1603 to register

with the Secretary of the Senate and the Clerk of the House of Representatives.

Applicants are considered for membership on the basis of their particular expertise, knowledge, and experience in recreational boating safety. In addition to recreational boating safety experience, the Coast Guard is particularly interested in applicants who also have experience developing and implementing national media outreach campaigns designed to influence the decision-making of targeted audiences. The vacancies announced in this notice apply to membership positions that become vacant on January 1, 2018. Appointments for the 2017 vacancies remain pending, and applications received in response to this notice may also be used to fill the seven positions which became vacant on January 1, 2017. Applicants for the 2017 vacancies announced in the **Federal Register** on March 22, 2016, (81 FR 15326) will automatically be considered for the 2018 vacancies and do not need to submit another application. Individuals, who submitted an application for any year prior to 2017, are asked to re-submit an application if the individual wishes to apply for any of the vacancies announced in this notice.

To be eligible, applicants should have experience in one of the categories listed in the **SUPPLEMENTARY INFORMATION** section.

The Department of Homeland Security does not discriminate in selection of Council members on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disability and genetic information, age, membership in an employee organization, or other non-merit factor. The Department of Homeland Security strives to achieve a widely diverse candidate pool for all of its recruitment actions.

If you are interested in applying to become a member of the Council, send your cover letter and resume to Mr. Jeff Ludwig, Alternate Designated Federal Officer of the National Boating Safety Advisory Council via one of the transmittal methods in the **ADDRESSES** section by the deadline in the **DATES** section of this notice.

J.F. Williams,

Captain, U.S. Coast Guard, Director of Inspections and Compliance.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Delay of Effective Date for the Automated Commercial Environment (ACE) Becoming the Sole CBP-Authorized Electronic Data Interchange (EDI) System for Processing Electronic Drawback and Duty Deferral Entry and Entry Summary Filings

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Delay of effective date.

SUMMARY: On August 30, 2016, U.S. Customs and Border Protection (CBP) published a notice in the **Federal Register** announcing plans to make the Automated Commercial Environment (ACE) the sole electronic data interchange (EDI) system authorized by the Commissioner of CBP for processing electronic drawback and duty deferral entry and entry summary filings. This notice announces that the effective date for that transition has been delayed until further notice.

DATES: *The effective date is delayed until further notice.* CBP will publish a subsequent notice announcing the date when ACE will become the sole CBP-authorized EDI system for processing electronic drawback and duty deferral entry and entry summary filings, and ACS will no longer be a CBP-authorized EDI system for purposes of processing these filings.

FOR FURTHER INFORMATION CONTACT: Questions related to this notice may be emailed to *ASKACE@cbp.dhs.gov* with the subject line identifier reading ''ACS to ACE Drawback and Duty Deferral Entry and Entry Summary Filings transition.''

SUPPLEMENTARY INFORMATION: On August 30, 2016, U.S. Customs and Border Protection (CBP) published a notice in the **Federal Register** (81 FR 59644) announcing plans to make the Automated Commercial Environment (ACE) the sole electronic data interchange (EDI) system authorized by the Commissioner of CBP for processing electronic drawback and duty deferral entry and entry summary filings, with an effective date of October 1, 2016. The document also announced that the Automated Commercial System (ACS) would no longer be a CBP-authorized EDI system for purposes of processing these electronic filings. Finally, the notice announced a name change for the ACE filing code for duty deferral and the creation of a new ACE filing code for all electronic drawback filings, replacing the six distinct drawback codes previously filed in ACS. The effective date for these changes was subsequently delayed. On June 8, 2017, CBP published a notice in the **Federal Register** (82 FR 26698) announcing that the changes announced in the August 30, 2016 **Federal Register** notice would become effective on July 8, 2017.

This notice announces that the effective date announced in the June 8, 2017 **Federal Register** notice is delayed until further notice. CBP will publish a subsequent notice announcing the effective date for these changes.

Dated: June 26, 2017.

Brenda B. Smith,

Executive Assistant Commissioner, Office of Trade.

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Delayed Effective Date for Modifications of the National Customs Automation Program Tests Regarding Reconciliation, Post-Summary Corrections, and Periodic Monthly Statements

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Delay of effective date.

SUMMARY: This notice announces that the effective date for the modifications to the National Customs Automation Program (NCAP) tests regarding Reconciliation, Post-Summary Corrections (PSC), and Periodic Monthly Statements (PMS) is delayed until further notice. U.S. Customs and Border Protection (CBP) announced these modifications in notices previously published in the **Federal Register**.

DATES: The effective date for the modifications to the reconciliation, PSC, and PMS NCAP tests is delayed until further notice. CBP will publish a notice in the **Federal Register** announcing a new effective date for changes to these NCAP tests.

ADDRESSES: Comments concerning the reconciliation test program may be submitted at any time during the test via email, with a subject line identifier reading, ''Comment on Reconciliation test'', to *OFO-RECONFOLDER@cbp.dhs.gov.*

Comments concerning the PSC and PMS test programs may be submitted

via email to Monica Crockett at *ESARinfoinbox@dhs.gov* with a subject line identifier reading, ''Post-Summary Corrections and Periodic Monthly Statements.''

FOR FURTHER INFORMATION CONTACT:

Reconciliation: Acenitha Kennedy, Entry Summary and Revenue Branch, Trade Policy and Programs, Office of Trade at (202) 863–6064 or *ACENITHA.KENNEDY@CBP.DHS.GOV.*

PSC and PMS: For policy-related questions, contact Randy Mitchell, Director, Commercial Operations, Trade Policy and Programs, Office of Trade, at *Randy.Mitchell@cbp.dhs.gov.* For technical questions related to ABI transmissions, contact your assigned client representative. Interested parties without an assigned client representative should direct their questions to the Client Representative Branch at (703) 650–3500.

SUPPLEMENTARY INFORMATION:

Background

I. Reconciliation Test

On December 12, 2016, U.S. Customs and Border Protection (CBP) published a notice entitled ''Modification of the National Customs Automation Program Test Regarding Reconciliation and Transition of the Test from the Automated Commercial System to the Automated Commercial Environment'' in the **Federal Register** (81 FR 89486), with an effective date of January 14, 2017. This notice announced modifications to the National Customs Automation Program (NCAP) test regarding reconciliation, and the transition of the test from the Automated Commercial System (ACS) to the Automated Commercial Environment (ACE). The effective date for these changes was subsequently delayed. On June 8, 2017, CBP published a notice in the **Federal Register** (82 FR 26699) announcing that the effective date for the test modifications would be July 8, 2017.

This notice announces that the effective date for the modifications to the reconciliation test and for mandatory filing of reconciliation entries in ACE has been delayed until further notice.

II. Post-Summary Correction and Periodic Monthly Statement Tests

On December 12, 2016, CBP published a notice in the **Federal Register** (81 FR 89482) announcing plans to modify and clarify, effective January 14, 2017, the NCAP test regarding Post-Summary Correction (PSC) claims, and the NCAP test regarding Periodic Monthly Statements (PMS). Subsequently, on January 9, 2017, CBP published a second notice in the **Federal Register** (82 FR 2385), superseding the original notice. This notice announced CBP's plans to modify the PMS test and to modify and clarify the NCAP test regarding PSC claims to entry summaries that are filed in ACE. The effective date for these changes was subsequently delayed. On June 8, 2017, CBP published a notice in the **Federal Register** (82 FR 26699), announcing that the effective date for the modifications to the PSC and PMS tests would be July 8, 2017.

This notice announces that the effective date for the modifications to the PSC and PMS tests has been delayed until further notice.

Dated: June 26, 2017.

Brenda B. Smith,

Executive Assistant Commissioner, Office of Trade.

Federal Emergency Management Agency

[Docket ID: FEMA–2017–0026; OMB No. 1660–NW103]

Agency Information Collection Activities; Proposed Information Collection; Comment Request; Federal Emergency Management Agency Programs Customer Satisfaction Surveys

AGENCY: Federal Emergency Management Agency (FEMA), DHS.

ACTION: Notice of new information collection; request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on a new information collection to replace a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the collection of Individual Assistance customer satisfaction survey responses and information for assessment and improvement of the delivery of disaster assistance to individuals and households.

DATES: Comments must be submitted on or before August 29, 2017.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID

FEMA–2017–0026. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., Room 8NE, Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Jessica Guillory, Statistician, Customer Survey & Analysis Section, Recovery Directorate, FEMA at *Jessica.Guillory@fema.dhs.gov,* 940–891–8528. You may contact the Records Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This collection is in accordance with Executive Orders 12862 and 13571 requiring all Federal agencies to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. The Government Performance and Results Act (GPRA) (Pub. L. 103–62, 107 Stat. 285) requires agencies to set missions and goals and measure performance against them. In addition, the GPRA Modernization Act of 2010 (Pub. L. 111–352, 124 Stat. 3866) requires quarterly performance assessments of government programs for the purposes of assessing agency performance and improvement. FEMA will fulfill these requirements by collecting customer satisfaction program information through surveys of the Recovery Directorate's external customers.

Collection of Information

Title: Federal Emergency Management Agency Programs Customer Satisfaction Surveys.

Type of Information Collection: New information collection.

OMB Number: 1660–NW103.

FEMA Forms: FEMA Form 519–0–45, Preparedness Survey—Electronic; FEMA Form 519–0–44, Preparedness Survey—Phone; FEMA Form 519–0–47, Transitional Sheltering Assistance (TSA) Survey—Electronic; FEMA Form 519–0–46, Transitional Sheltering Assistance (TSA) Survey—Phone; FEMA Form 519–0–49, Temporary Housing Units (THU) Survey—Electronic; FEMA Form 519–0–48, Temporary Housing Units (THU) Survey—Phone; FEMA Form 519–0–51, Shelter and Temporary Essential Power (STEP) Survey—Electronic; FEMA Form 519–0–50, Shelter and Temporary Essential Power (STEP) Survey—Phone.

Abstract. Federal agencies are required to survey their customers to determine the kind and quality of services customers want and their level of satisfaction with those services. Analysis from the survey is used to measure FEMA's survivor-centric mission of being accessible, simple, timely and effective in meeting the needs of survivors.

Affected Public: Individuals and households.

Number of Respondents: 8,896.

Number of Responses: 8,896.

Estimated Total Annual Burden Hours: 5,548.

Estimated Cost: The estimated annual burden hour cost to respondents is $193,292. The estimated annual non-labor cost to respondents participating and traveling to focus groups is $30,816. There are no annual costs to respondents' operations and maintenance costs for technical services. There are no annual start-up or capital costs. The cost to the Federal Government is $716,338.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Dated: June 26, 2017.

Tammi Hines,

Records Management Program Chief (Acting), Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2009–0008 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection:

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition To Remove the Conditions on Residence.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–751; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Individuals or households. This form is used by USCIS to verify the petitioner's status and determine whether they are eligible to have the conditions on their permanent resident status removed.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–751 is 159,119 and the estimated hour burden per response is 3.75 hours. The estimated total number of respondents for biometric processing is 318,238 and the estimated hour burden per response is 1.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 969,035 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $19,492,200.

Dated: June 26, 2017.

Jerry Rigdon,

Deputy Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0075]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Affidavit of Support Under Section 213A of the Act, Form I–864; Contract Between Sponsor and Household Member, Form I–864A; EZ Affidavit of Support Under Section 213 of the Act, I–864EZ; Intending Immigrant's Affidavit of Support Exemption, I–864W

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until July 31, 2017. This process is conducted in accordance with 5 CFR 1320.10.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be directed to the OMB USCIS Desk Officer via email at *dhsdeskofficer@omb.eop.gov.* All submissions received must include the agency name and the OMB Control Number 1615–0075 in the subject line.

You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make. For additional information please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529–2140, Telephone number (202) 272–8377 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact

information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at *http://www.uscis.gov,* or call the USCIS National Customer Service Center at (800) 375–5283; TTY (800) 767–1833.

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on March 8, 2017, at 82 FR 13650, allowing for a 60-day public comment period. USCIS did receive comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2007–0029 in the search box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Affidavit of Support Under Section 213A of the Act; Contract Between Sponsor and Household Member; EZ Affidavit of Support under Section 213 of the Act; Intending Immigrant's Affidavit of Support Exemption.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–864, Form I–864A, Form I–864EZ, and Form I–864W; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Individuals or households; USCIS uses the data collected on Form I–864 to determine whether the sponsor has the ability to support the sponsored alien under section 213A of the Immigration and Nationality Act. This form standardizes evaluation of a sponsor's ability to support the sponsored alien and ensures that basic information required to assess eligibility is provided by petitioners.

Form I–864A is a contract between the sponsor and the sponsor's household members. It is only required if the sponsor used the income of his or her household members to reach the required 125 percent of the Federal poverty guidelines. The contract holds these household members jointly and severally liable for the support of the sponsored immigrant. The information collection required on Form I–864A is necessary for public benefit agencies to enforce the Affidavit of Support in the event the sponsor used income of his or her household members to reach the required income level and the public benefit agencies are requesting reimbursement from the sponsor.

USCIS uses Form I–864EZ in exactly the same way as Form I–864; however, less information is collected from the sponsors as less information is needed from those who qualify in order to make a thorough adjudication.

USCIS uses Form I–864W to determine whether the intending immigrant meets the criteria for exemption of section 213A requirements. This form collects the immigrant's basic information, such as name and address, the reason for the exemption, and accompanying documentation in support of the immigrant's claim that they are not subject to section 213A.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for Form I–864 is 446,313 and the estimated hour burden per response is 6 hours; the estimated total number of respondents for Form I–864A is 42,892 and the estimated hour burden per response is 1.75 hours; the estimated total number of respondents for Form I–864EZ is 114,860 and the estimated hour burden per response is 2.5 hours; the estimated total number of respondents for Form I–864W is 98,119 hours and the estimated hour burden per response is 1 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this information collection is 3,138,208 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this information collection is $161,526,540.

Dated: June 26, 2017.

Jerry Rigdon,

Deputy Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

Proposed Programmatic Candidate Conservation Agreement With Assurances for the Louisiana Pinesnake in Louisiana

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from the Louisiana Department of Wildlife and Fisheries for an enhancement of survival permit (permit) pursuant to the Endangered Species Act of 1973. The permit application includes a proposed programmatic candidate conservation agreement with assurances (CCAA) for the Louisiana pinesnake. The term of the agreement would be 99 years. If approved, the CCAA would allow the applicant to enter into conservation management agreements with eligible non-Federal landowners throughout Bienville, Beauregard, Jackson, Natchitoches, Rapides, Sabine, Vernon, Winn, Grant, and Allen Parishes, Louisiana, and to issue certificates of inclusion to enrollees. We invite public comments on these documents.

DATES: We must receive any written comments at our Regional Office (see **ADDRESSES**) on or before July 31, 2017.

ADDRESSES: To request further information, review documents, or submit written comments, please use the following methods and specify that your information request or comments are in reference to the ''Programmatic CCAA for the Louisiana Pinesnake.''

• *Internet:* Documents may be viewed and downloaded on the Internet at *http://www.fws.gov/southeast/candidaetconservation/examples.html*.

• *Email: michael_harris@fws.gov.* Include ''Programmatic CCAA for the Louisiana Pinesnake'' in the subject line. Please include your name and return address in your message. If you do not receive a confirmation from us that we have received your message, contact us directly at either telephone number listed under **FOR FURTHER INFORMATION CONTACT**.

• *U.S. Mail:* Mr. Michael Harris, At-Risk Species Coordinator, Fish and Wildlife Service, Southeast Regional Office, 1875 Century Boulevard, Atlanta, GA 30345, or Mr. Joseph Ranson, Field Supervisor, Fish and Wildlife Service, Louisiana Ecological Services Field Office, 646 Cajundome Boulevard, Suite 400, Lafayette, LA 70506.

• *In-Person Drop-off, Viewing, or Pickup:* Call 404–679–7066 to make an appointment (necessary for viewing or pick-up only) during regular business hours at the Fish and Wildlife Service's Regional Office, 1875 Century Boulevard, Suite 200, Atlanta, GA 30345; or call 337–291–3112 to make an appointment at the Louisiana Ecological Services Field Office, Fish and Wildlife Service, 646 Cajundome Boulevard, Suite 400, Lafayette, LA 70506. Written comments can be dropped off during regular business hours at either address on or before the closing date of the public comment period (see **DATES**). Requests for any documents must be in writing.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Harris, At-Risk Species Coordinator, at the Regional Office (see **ADDRESSES**), telephone: 404–679–7066; or Mr. David Castellanos, Imperiled Species Biologist, at the Louisiana Field Office (see **ADDRESSES**), telephone: 337–291–3112.

SUPPLEMENTARY INFORMATION: We have received an application from the Louisiana Department of Wildlife and Fisheries for an enhancement of survival permit (permit) pursuant to the Endangered Species Act of 1973 (Act). The permit application includes a proposed programmatic candidate conservation agreement with assurances (CCAA) for the Louisiana pinesnake (*Pituophis ruthveni*). The term of the CCAA would be 99 years. If approved, the CCAA would allow the applicant to enter into conservation management agreements with eligible non-Federal landowners throughout Bienville, Beauregard, Jackson, Natchitoches, Rapides, Sabine, Vernon, Winn, Grant, and Allen Parishes, Louisiana, and to issue certificates of inclusion to enrollees. We invite public comments on these documents.

Candidate Conservation Agreements With Assurances

Under a CCAA, participating property owners voluntarily undertake management activities on their properties to enhance, restore, or maintain habitat benefiting species that may warrant listing under the Act. CCAAs encourage private and other non-Federal property owners to implement conservation efforts for candidate and at-risk species by assuring them that they will not be subjected to increased property use restrictions should the species become listed as ''threatened'' or ''endangered'' under the Act in the future. Application requirements and issuance criteria for CCAAs are found in 50 CFR 17.22(d) and 17.32(d).

Parties' Agreement

The CCAA describes conservation measures designed to protect and enhance habitat for the benefit of the Louisiana pinesnake (covered species) on private or non-Federal public lands enrolled under the agreement. Enrolled landowners who implement these measures would receive assurances against take liability if the covered species were to be federally listed in the future. Conservation land use practices would vary according to the needs of a particular enrolled landowner. Typical measures include the use of prescribed fire, thinning of forests, and restoration of open-canopied pine (including longleaf pine). The CCAA also contemplates that other conservation measures may be developed in the future.

We specifically request information, views, and opinions from the public via this notice on our proposed Federal action, including our determination that the CCAA, including its proposed conservation measures, would have minor or negligible effects on the covered species. Therefore, we have determined that the incidental take permit for this project is ''low effect'' and qualifies for categorical exclusion under the National Environmental Policy Act (NEPA), as provided by 43 CFR 46.205 and 43 CFR 46.210. A low-effect project involves (1) minor or negligible effects on federally listed or candidate species or their habitats, and (2) minor or negligible effects on other environmental values or resources. Further, we specifically solicit information regarding the adequacy of the CCAA per 50 CFR parts 13 and 17.

Public Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Covered Area

The CCAA covers eligible lands in Bienville, Beauregard, Jackson, Natchitoches, Rapides, Sabine, Vernon, Winn, Grant, and Allen Parishes, Louisiana.

Next Steps

We will evaluate the application for enhancement of survival permit through candidate conservation agreement with assurances, including the CCAA, and any comments we receive to determine whether the application meets the requirements of section 10(a)(1)(A) of the Act and of applicable implementing regulations. We will also evaluate whether the section 10(a)(1)(A) enhancement of survival permit would comply with section 7 of the Act by conducting an intra-Service section 7 consultation. If we determine that the requirements are met, we will issue a permit under section 10(a)(1)(A) of the Act to the applicant in accordance with the applicable regulatory requirements. We will not make our final decision until after the end of the 30-day comment period and will fully consider all comments received during the comment period.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

Dated: June 23, 2017.

Luis J. Santiago,

Acting Regional Director.

Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for the Curletti Farm Employee Housing Project, Santa Barbara County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from Betteravia Farms, LLC, for an incidental take permit under the Endangered Species Act of 1973, as amended. The permit would authorize take of the federally endangered California tiger salamander (Santa Barbara distinct population segment) incidental to otherwise lawful activities associated with the Curletti Farm Employee Housing Project Habitat Conservation Plan. We invite public comment.

DATES: Written comments should be received on or before July 31, 2017.

ADDRESSES: You may download a copy of the draft habitat conservation plan and draft low-effect screening form and environmental action statement on the internet at *http://www.fws.gov/ventura/,* or you may request copies of the documents by U.S. mail to our Ventura office, or by phone (see **FOR FURTHER INFORMATION CONTACT**). Please address written comments to Stephen P. Henry, Field Supervisor, Ventura Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, CA 93003. You may alternatively send comments by facsimile to (805) 644–3958.

FOR FURTHER INFORMATION CONTACT: Rachel Henry, Fish and Wildlife Biologist, at the above address or by calling (805) 644–1766.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have received an application from Betteravia Farms, LLC (applicant), for an incidental take permit under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.;* Act). The applicant has agreed to follow all of the conditions in the habitat conservation plan for the project. The permit would authorize take of the Santa Barbara distinct population segment of the federally endangered California tiger salamander (*Ambystoma californiense*) incidental to otherwise lawful activities associated with the Curletti Farm Employee Housing Project Habitat Conservation Plan (HCP). We invite public comment on the application, the draft habitat conservation plan, draft low-effect screening form, and environmental action statement.

Background

The Santa Barbara distinct population segment of the California tiger salamander was listed by the Service as endangered on January 19, 2000 (65 FR 3096). Section 9 of the Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations prohibit the ''take'' of fish or wildlife species listed as endangered or threatened. ''Take'' is defined under the Act to include the following activities: ''[T]o harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct'' (16 U.S.C. 1532); however, under section 10(a)(1)(B) of the Act, we may issue permits to authorize incidental take of listed species. ''Incidental take'' is defined by the Act as take that is incidental to, and not the purpose of, carrying out of an otherwise lawful activity. Regulations governing incidental take permits for threatened and endangered species are in the Code of Federal Regulations at 50 CFR 17.32 and 17.22, respectively. Under the Act, protections for federally listed plants differ from the protections afforded to federally listed animals. Issuance of an incidental take permit also must not jeopardize the existence of federally listed fish, wildlife, or plant species. All species included in the incidental take permit would receive assurances under our ''No Surprises'' regulations (50 CFR 17.22(b)(5) and 17.32(b)(5)).

The applicants have applied for a permit for incidental take of the California tiger salamander. The potential taking would occur as a result of activities associated with the construction of the farm labor camp in suitable habitat for the covered species.

Our Preliminary Determination

The Service has made a preliminary determination that issuance of the permit is neither a major Federal action that will significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.;* NEPA), nor will it individually or cumulatively have more than a negligible effect on the species covered in the HCP. Therefore, the permit qualifies for a categorical exclusion under NEPA.

Public Comments

If you wish to comment on the permit application, plan, and associated documents, you may submit comments by any one of the methods in **ADDRESSES**.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public view, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

Dated: June 26, 2017.

Stephen P. Henry,

Field Supervisor, Ventura Fish and Wildlife Office, Ventura, California.

Endangered and Threatened Wildlife and Plants; 5-Year Status Reviews of 23 Southeastern Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are initiating 5-year status reviews of 23 species under the Endangered Species Act of 1973, as amended (Act). We conduct these reviews to ensure that the classification of species as threatened or endangered on the Lists of Endangered and Threatened Wildlife and Plants is accurate. A 5-year review is an assessment of the best scientific and commercial data available at the time of the review. Therefore, we are requesting submission of information that has become available since the last review of each of these species.

DATES: To allow us adequate time to conduct these reviews, we must receive your comments or information on or before August 29, 2017. However, we

will continue to accept new information about any listed species at any time.

ADDRESSES: For instructions on how to submit information and review information we receive on these species, see ''Request for New Information.''

FOR FURTHER INFORMATION CONTACT: For species-specific information, see ''Request for New Information.''

SUPPLEMENTARY INFORMATION:

Why do we conduct a 5-year review?

Under the Act (16 U.S.C. 1531 *et seq.*), we maintain lists of endangered and threatened wildlife and plant species in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species' status at least once every 5 years. Our regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species under active review. For additional information about 5-year reviews, go to *http://www.fws.gov/endangered/what-we-do/recovery-overview.html,* scroll down to ''Learn More about 5-Year Reviews,'' and click on our factsheet.

Species Under Review

This notice announces our active review of 22 species that are currently listed as endangered:

Fish and Wildlife

Florida panther (*Puma concolor coryi*)
Puerto Rican broad-winged hawk (*Buteo platypterus brunnescens*)
Puerto Rican nightjar (*Caprimulgus noctitherus*)
Cumberland darter (*Etheostoma susanae*)
Rush darter (*Etheostoma phytopilum*)
Vermilion darter (*Etheostoma chermocki*)
Pygmy madtom (*Noturus stanauli*)
Cumberland bean (*Villosa trabalis*)
Ring pink (*Obovaria retusa*)
Anthony's riversnail (*Athearnia anthonyi*)

Plants

Arabis perstellata (Braun's rock-cress)
Chamaesyce deltoidea spp. deltoidea (Deltoid spurge)
Clematis morefieldii (Morefield's leatherflower)
Conradina verticillata (Cumberland rosemary)
Galactia smallii (Small's milkpea)
Lyonia truncata var. proctorii (no common name)
Polygala smallii (Tiny polygala)
Pityopsis ruthii (Ruth's golden aster)
Sarracenia rubra ssp.alabamensis (Alabama canebrake pitcher plant)
Schwalbea americana (American chaffseed)
Vernonia proctorii (no common name)
Adiantum vivesii (no common name)

This notice also announces our active review of 1 species that is currently listed as threatened:

Fish and Wildlife

Ozark cavefish (*Troglichthys rosae*)

What information do we consider in our review?

A 5-year review considers the best scientific and commercial data that have become available since the current listing determination or most recent status review of each species, such as:

A. Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

B. Habitat conditions, including but not limited to amount, distribution, and suitability;

C. Conservation measures that have been implemented to benefit the species;

D. Threat status and trends (see five factors under heading ''How Do We Determine Whether a Species Is Endangered or Threatened?''); and

E. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

New information will be considered in the 5-year review and ongoing recovery programs for the species.

Definitions

A. *Species* includes any species or subspecies of fish, wildlife, or plant, and any distinct population segment of any species of vertebrate which interbreeds when mature.

B. *Endangered* means any species that is in danger of extinction throughout all or a significant portion of its range.

C. *Threatened* means any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

How do we determine whether a species is endangered or threatened?

Section 4(a)(1) of the Act establishes that we determine whether a species is endangered or threatened based on one or more of the following five factors:

A. The present or threatened destruction, modification, or curtailment of its habitat or range;

B. Overutilization for commercial, recreational, scientific, or educational purposes;

C. Disease or predation;

D. The inadequacy of existing regulatory mechanisms; or

E. Other natural or manmade factors affecting its continued existence.

Request for New Information

To do any of the following, contact the person associated with the species you are interested in below:

A. To get more information on a species;

B. To submit information on a species; or

C. To review information we receive, which will be available for public inspection by appointment, during normal business hours, at the listed addresses.

Mammals

• Florida panther: South Florida Ecological Services Field Office, U.S. Fish and Wildlife Service, 12085 State Road 29 S, Immokalee, FL 34142; fax 772–562–4288. For information on these species, contact David Shindle at the ES Field Office (by phone at 239–657–8013, or by email at *david_shindle@fws.gov*).

Birds

• Puerto Rican broad-winged hawk and Puerto Rican nightjar: Caribbean Ecological Services Field Office, U.S. Fish and Wildlife Service, Road 301, Km. 5.1, P.O. Box 491, Boqueron, PR 00622; fax 787–851–7440. For information on these species, contact Jose Cruz-Burgos at the ES Field Office (by phone at 787–851–7297, ext.218 or by email at *jose_cruz-burgos@fws.gov*).

Fishes

• Ozark Cavefish: Arkansas Ecological Services Field Office, U.S. Fish and Wildlife Service, 110 South Amity Road, Suite 300, Conway, Arkansas 72032; fax 501–513–4480. For information on these species, contact Tommy Inebnit at the ES Field Office (by phone at 501–513–4483 or by email at *thomas_inebnit@fws.gov*).

• Cumberland darter: Kentucky Ecological Services Field Office, U.S. Fish and Wildlife Service, 330 West Broadway, Frankfort, Kentucky 40601 fax 502–695–1024. For information on these species, contact Dr. Michael Floyd at the ES Field Office (by phone at 502–695–0468 ext. 102 or by email at *mike_floyd@fws.gov*).

• Rush darter and Vermilion darter: Mississippi Ecological Services Field Office, U.S. Fish and Wildlife Service, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Jackson, MS 39213; fax 601–965–4340. For information on these species, contact Daniel Drennen at the ES Field Office

(by phone at 601–321–1127 or by email at *daniel_drennen@fws.gov*).

• Pygmy madtom: Tennessee Ecological Services Field Office, U.S. Fish and Wildlife Service, U.S. Fish and Wildlife Service, 446 Neal Street, Cookeville, TN 38501; fax 931–528–7075. For information on these species, contact Warren Stiles at the ES Field Office (by phone at 931–525–4977 or by email at *warren_stiles@fws.gov*).

Clams

• Cumberland bean and Ring pink: Kentucky Ecological Services Field Office (see contact information above). For information on these species, contact Leroy Koch at the ES Field Office (by phone at 502–695–0468 ext. 106 or by email at *leroy_koch@fws.gov.*

Snails

• Anthony's riversnail: Tennessee Ecological Services Field Office (see contact information above). For information on these species, contact Stephanie Chance at the ES Field Office (by phone at 931–528–6481 ext. 211 or by email at *stephanie_chance@fws.gov*).

Plants

• *Arabis perstellata* (Braun's rock-cress): Kentucky Ecological Services Field Office. For information on these species, contact Dr. Michael Floyd (see contact information above).

• *Chamaesyce deltoidea spp. deltoidea* (Deltoid spurge), *Galactia smallii* (Small's milkpea), and *Polygala smallii* (Tiny polygala): South Florida Ecological Services Field Office, U.S. Fish and Wildlife Service, 1339 20th Street, Vero Beach, FL 32960; fax 772–562–4288. For information on these species, contact David Bender at the ES Field Office (by phone at 772–469–4294 or by email at *david_bender@fws.gov*).

• *Clematis morefieldii* (Morefield's leatherflower), *Conradina verticillata* (Cumberland rosemary), and *Pityopsis ruthii* (Ruth's golden aster): Tennessee Ecological Services Field Office (see contact information above). For information on these species, contact Geoff Call at the ES Field Office (by phone at 931–525–4983 or by email at *geoff_call@fws.gov*).

• *Lyonia truncata var. proctorii* (no common name), *Vernonia proctorii* (no common name), and *Adiantum vivesii* (no common name): Caribbean Ecological Services Field Office. For information on these species, contact Jose Cruz-Burgos (see contact information above).

• *Sarracenia rubra ssp. alabamensis* (Alabama canebrake pitcher plant): Mississippi Ecological Services Field Office (see contact information above). For information on these species, contact Scott Wiggers at the ES Field Office (by phone at 228–475–0765 or by email at *marion_wiggers@fws.gov*).

• *Schwalbea americana* (American chaffseed): South Carolina Ecological Services Field Office, U.S. Fish and Wildlife Service, 176 Croghan Spur Road, Suite 200, Charleston, SC 29412; fax 843–727–4218. For information on these species, contact April Punsalan at the ES Field Office (by phone at 843–727–4707 ext. 218 or by email at *april_punsalan@fws.gov*).

We request any new information concerning the status of any of these 23 species. See ''What Information Do We Consider In Our Review?'' heading for specific criteria. Information submitted should be supported by documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that the entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We publish this document under the authority of the Endangered Species Act (16 U.S.C. 1531 *et seq.*).

Dated: April 18, 2017.

Mike Oetker,

Acting Regional Director, Southeast Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R2–ES–2017–0036; FXES11130200000–178–FF02ENEH00]

Endangered and Threatened Wildlife and Plants; Mexican Wolf Draft Recovery Plan, First Revision

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of our Mexican Wolf (*Canis lupus baileyi*) Draft Recovery Plan, First Revision (draft recovery plan). The Mexican wolf is listed as endangered under the Endangered Species Act of 1973, as amended (Act), and is currently found in Arizona and New Mexico, in the United States, and in Chihuahua, Mexico. The draft recovery plan includes specific recovery criteria to be met to enable us to remove this species from the List of Endangered and Threatened Wildlife. The first Mexican wolf recovery plan was completed in 1982. We request review and comment on the revised plan from local, State, and Federal agencies; Tribes; and the public, in both the United States and Mexico. We will also accept any new information on the Mexican wolf's status throughout its range to assist in finalizing the recovery plan.

DATES: *Comment submission:* To ensure consideration, we must receive written comments on or before August 29, 2017. However, we will accept information about any species at any time.

Public meetings: We will hold information meetings to provide the public with information on the draft recovery plan. Written comments on the draft recovery plan may be submitted at these meetings (oral comments will not be recorded). The dates and times of these information meetings are as follows:

1. July 18, 2017 (6:00 p.m. to 9:00 p.m.): Flagstaff, Arizona.
2. July 19, 2017 (6:00 p.m. to 9:00 p.m.): Pinetop, Arizona.
3. July 20, 2017 (6:00 p.m. to 9:00 p.m.): Truth or Consequences, New Mexico.
4. July 22, 2017 (2:00 p.m. to 5:00 p.m.): Albuquerque, New Mexico.

ADDRESSES: *Document availability:* If you wish to review the draft recovery plan and related documents, you may obtain copies by any of the following methods:

Electronically: Go to *http://www.regulations.gov* and enter FWS–R2–ES–2017–0036.

U.S. mail: U.S. Fish and Wildlife Service, New Mexico Ecological Services Field Office, 2105 Osuna Road NE., Albuquerque, NM 87113; or

Telephone: (505) 346–2525.

Comment submission: If you wish to comment on the draft recovery plan, you may submit your comments in writing by either of the following methods:

Electronically: Go to *http://www.regulations.gov* and enter FWS–R2–ES–2017–0036.

Hard copy: Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS–R4–ES–2017–

0036, U.S. Fish and Wildlife Service, MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

Public meetings: The locations of the information meetings discussed above in **DATES** are as follows:

1. *Flagstaff:* Northern Arizona University, Prochnow Auditorium, South Knowles Drive, Flagstaff, AZ 86001.

2. *Pinetop:* Hon-Dah Resort, Casino Banquet Hall, 777 AZ–260, Pinetop, AZ 85935.

3. *Truth or Consequences:* Ralph Edwards Auditorium, Civic Center, 400 West Fourth, Truth or Consequences, NM 87901.

4. *Albuquerque:* Crowne Plaza Albuquerque, 1901 University Boulevard NE., Albuquerque, NM 87102.

FOR FURTHER INFORMATION CONTACT: Sherry Barrett, Mexican Wolf Recovery Coordinator, 505–346–2525.

SUPPLEMENTARY INFORMATION:

Background

A primary goal of our endangered species program and the Act (16 U.S.C. 1531 *et seq.*) is endangered or threatened animals and plants recovering to the point where they are again secure, self-sustaining ecosystems members. Recovery means improving listed species' status to the point at which listing is no longer appropriate under the criteria set out in the Act, section 4(a)(1). The Act requires developing recovery plans for listed species, unless such a plan would not promote a particular species' conservation.

The Service has revised its approach to recovery planning; the revised process is called Recovery Planning and Implementation (RPI) (USFWS 09/21/2016). RPI is intended to reduce the time needed to develop and implement recovery plans, increase recovery plan relevancy over a longer timeframe, and add flexibility to recovery plans so they can be adjusted to new information or circumstances. Under RPI, a recovery plan will include statutorily required elements (measurable criteria, site-specific management actions, and estimates of time and costs), along with a concise introduction and our strategy for how we plan to achieve species recovery. The RPI recovery plan is supported by a separate Species Status Assessment (SSA), or in some cases, a species Biological Report, which provides the background information and threat assessment, which are key to recovery plan development. The essential component to flexible implementation under RPI is producing a separate working document called the Recovery Implementation Strategy (implementation strategy). The implementation strategy steps down from the more general description of actions described in the recovery plan to detail the near-term, specific activities needed to implement the recovery plan. The implementation strategy will be adaptable by being able to incorporate new information without having to concurrently revise the recovery plan, unless changes to statutory elements are required. The Mexican wolf implementation strategy document will be developed with partners at a later date. The Mexican Wolf Draft Recovery Plan, First Revision, represents one of the first products developed using RPI.

In addition to the recovery plan and implementation strategy, we have completed a biological report describing the Mexican wolf's current status. The biological report supports the recovery plan by providing the background, life-history, and threat assessment information. The biological report was independently peer-reviewed by scientists outside of the Service and is available at *https://www.regulations.gov* in Docket No. FWS–R2–ES–2017–0036, and also at our Web site: *https://www.fws.gov/southwest/es/mexicanwolf/.* As with the implementation strategy, we will regularly update the biological report as new species status information becomes available, without having to concurrently review the recovery plan.

Species History

The Mexican wolf was originally listed as an endangered subspecies on April 28, 1976 (41 FR 17736), but was subsumed into the listing for the gray wolf in the coterminous United States and Mexico in 1978 (43 FR 9607, March 9, 1978). The Mexican wolf is currently listed as an endangered subspecies throughout its range without critical habitat (80 FR 2488, January 16, 2015). The Mexican wolf is also listed as endangered by the Secretaría de Medio Ambiente y Recursos Naturales, or Federal Ministry of the Environment and Natural Resource (SEMARNAT 2010) in Mexico. Mexican wolves in Arizona and New Mexico are protected under State wildlife statutes as the gray wolf. In Arizona, the gray wolf is on the Arizona Game and Fish Department's list of ''Species of Greatest Conservation Need.'' In New Mexico, the gray wolf is listed as endangered.

In the United States, current Mexican wolf range includes portions of Arizona and New Mexico in an area designated as the Mexican Wolf Experimental Population Area (MWEPA) under the Act, section 10(j) (U.S. Fish and Wildlife Service 2016). The Service began releasing Mexican wolves from captivity into the MWEPA in 1998, marking the first Mexican wolf reintroduction since their extirpation in the late 1970s. As of 2016, there is a single population of at least 113 Mexican wolves in the MWEPA (U.S. Fish and Wildlife Service 2017). In Mexico, the current Mexican wolf range includes the northern portion of the Sierra Madre Occidental in the state of Chihuahua (López González 2017, pers. comm.). After Mexican wolves were extirpated from Mexico in the late 1970s to early 1980s, Mexico began reintroducing the subspecies from captivity back into the wild in 2011. In Mexico, as of April 2017, approximately 28 wolves inhabit the northern portion of the Sierra Madre Occidental Mountains in the state of Chihuahua (Garcia Chavez et al. 2017).

In addition to the wild populations, a Mexican wolf captive population is managed under the Mexican Wolf Species Survival Plan (SSP), administered by the Association of Zoos and Aquariums. The SSP is a binational captive-breeding program with the primary purpose of producing Mexican wolves for reintroduction in the United States and Mexico and conducting public education and research. The captive population is the sole source of Mexican wolves available to reestablish the species in the wild and is, therefore, an essential component of the Mexican wolf recovery effort.

The Mexican wolf is at risk of extinction in the wild primarily because of gunshot-related mortality, inbreeding, loss of heterozygosity, loss of adaptive potential, small population size, and the cumulative effects of the aforementioned threats (80 FR 2488, January 16, 2015). As a result of predator control and eradication efforts in the 20th century, the number of Mexican wolves declined rapidly (Mech and Boitani 2003), but with the capture of the last remaining Mexican wolves in the wild in Mexico, and subsequent addition of several wolves already in captivity, the United States and Mexico established a binational captive-breeding program with seven unrelated ''founders.'' As a result of this small number of founders, Mexican wolves face the aforementioned genetic challenges (U.S. Fish and Wildlife Service 2014).

Recovery Plan Strategy

The overall strategy for recovering the Mexican wolf focuses on improving the two populations' resilience (*i.e.,* population size) and genetic representation, one in the MWEPA in

the United States, and one in the northern portion of the Sierra Madre Occidental in Mexico, across an adequate ecological and geographic range of representation within each population. The strategy involves carefully managing the captive-breeding program, releasing Mexican wolves from the captive-breeding program into the wild, and translocating Mexican wolves from the MWEPA to Mexico, to ensure two genetically and demographically viable populations are extant in the wild for redundancy. In order to achieve the genetic criteria for downlisting and delisting the Mexican wolf in this Plan, the states of New Mexico and Arizona, and the Mexican government, will determine the timing, location and circumstances of releases of wolves into the wild within their respective states, and Mexico, from the captive population, with the Service providing collaborative logistical support and facilitation of those recovery actions.

Under this strategy, Mexican wolves will be managed to achieve an average population size, with an upper population size management boundary applied to the MWEPA that would allow all forms of management to ensure that population growth does not continue unchecked. The population in Mexico will not be managed with an upper boundary. Another key component of the strategy includes working with Federal, State, Tribal, and local partners, and the public, to improve Mexican wolf tolerance on the landscape.

Request for Public Comments

The Act, section 4(f), requires us to provide public notice and an opportunity for public review and comment during recovery plan development. Our policy is to also request peer review of recovery plans (59 FR 34270, July 1, 1994). We will summarize and respond to the issues the public and peer reviewers raise and make our responses available to the public. Substantive comments may or may not result in changes to the recovery plan; comments regarding recovery plan implementation will be forwarded as appropriate to Federal or other entities so that they can be taken into account during the course of implementing recovery actions. Pursuant to a court order, this recovery plan must be finalized by November 30, 2017.

We invite written comments on the draft recovery plan. In particular, we are interested in comments on the recovery strategy, recovery criteria, recovery actions, and the cost estimates associated with implementing the recommended recovery actions.

We make reference throughout the draft recovery plan to locations where more detailed information can be found. Information on the Mexican wolf's life-history needs, threats, current status and future projections, survey guidelines, and conservation efforts to date are detailed in a variety of separate documents, including the biological report the Service developed. These documents can be found at *https://www.regulations.gov* in Docket No. FWS–R2–ES–2017–0036 and also at our Web site: *https://www.fws.gov/southwest/es/mexicanwolf/.*

Before we approve our final recovery plan, we will consider all comments we receive by the date specified in **DATES**. You may submit your comments and materials concerning the draft recovery plan by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in *ADDRESSES*.

Public Availability of Comments

If you submit information via *http://www.regulations.gov,* your entire submission—including any personal identifying information—will be posted on the Web site. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on *http://www.regulations.gov.*

Comments and materials we receive will be available, by appointment, for public inspection during normal business hours at our office (see *ADDRESSES*).

References Cited

A complete list of all references cited herein is available at *https://www.regulations.gov* in Docket No. FWS–R2–ES–2017–0036, on our Web site (*https://www.fws.gov/southwest/es/mexicanwolf/*), or upon request from the New Mexico Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Authority

We developed our draft recovery plan under the authority of the Act, section 4(f), 16 U.S.C. 1533(f). We publish this notice under section 4(f) Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.).*

Dated: June 20, 2017.

Benjamin N. Tuggle,

Regional Director, Southwest Region, U.S. Fish and Wildlife Service.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–23374; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: U.S. Department of the Interior, National Park Service, Hubbell Trading Post National Historic Site, Ganado, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of the Interior, National Park Service, Hubbell Trading Post National Historic Site, has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to Hubbell Trading Post National Historic Site. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

DATES: Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Hubbell Trading Post National Historic Site at the address in this notice by July 31, 2017.

ADDRESSES: Lloyd Masayumptewa, Superintendent, Hubbell Trading Post National Historic Site, ½ Mile West of Highway 191 & 264, Ganado, AZ 86505, telephone (928) 755–3475, email *lloyd_masayumptewa@nps.gov.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the U.S. Department of the Interior, National Park Service, Hubbell Trading

Post National Historic Site, Ganado, AZ. The human remains were removed from an unknown location.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the Superintendent, Hubbell Trading Post National Historic Site.

Consultation

A detailed assessment of the human remains was made by Hubbell Trading Post National Historic Site professional staff in consultation with representatives of the Fort Sill Apache Tribe of Oklahoma; Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Navajo Nation, Arizona, New Mexico & Utah; Pueblo of Laguna, New Mexico; and Ute Mountain Ute Tribe (previously listed as the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah) (hereafter referred to as ''The Consulted Tribes'').

The following tribes were contacted but did not participate in the face-to-face consultation meetings: Apache Tribe of Oklahoma; Fort McDowell Yavapai Nation, Arizona; Kaibab Band of Paiute Indians of the Kaibab Indian Reservation, Arizona; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Tesuque, New Mexico; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; White Mountain Apache Tribe of the Fort Apache Reservation, Arizona; and Zuni Tribe of the Zuni Reservation, New Mexico (hereafter referred to as ''The Invited Tribes'').

History and Description of the Remains

At an unknown date, human remains representing, at minimum, one individual were removed from an unknown location. The human remains were donated by the Hubbell family to the National Park Service in approximately 1967, and are believed to have been displayed in the Trading Post Rug Room by Roman Hubbell. The human remains consist of one human skull of indeterminate age and sex. No known individual was identified. No associated funerary objects are present.

Pursuant to 43 CFR 10.16, the Secretary of the Interior may make a recommendation for a transfer of control of culturally unidentifiable human remains. In December 2016, Hubbell Trading Post National Historic Site requested that the Secretary, through the Native American Graves Protection and Repatriation Review Committee, recommend the proposed transfer of control of the culturally unidentifiable Native American human remains in this notice to the Hopi Tribe of Arizona and Navajo Nation, Arizona, New Mexico & Utah. The Review Committee, acting pursuant to its responsibility under 25 U.S.C. 3006(c)(5), considered the request at its March 2017 meeting and recommended to the Secretary that the proposed transfer of control proceed. An April 2017 letter on behalf of the Secretary of the Interior from the National Park Service Associate Director for Cultural Resources, Partnerships, and Science transmitted the Secretary's independent review and concurrence with the Review Committee that:

- None of The Consulted Tribes or The Invited Tribes objected to the proposed transfer of control, and
- Hubbell Trading Post National Historic Site may proceed with the agreed-upon transfer of control of the culturally unidentifiable human remains to the Hopi Tribe of Arizona and the Navajo Nation, Arizona, New Mexico & Utah.

Transfer of control is contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement.

Determinations Made by Hubbell Trading Post National Historic Site

Officials of Hubbell Trading Post National Historical Site have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American, based on osteological analysis.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.
- Pursuant to 43 CFR 10.16, the disposition of the human remains will be to the Hopi Tribe of Arizona and the Navajo Nation, Arizona, New Mexico & Utah.

Additional Requestors and Disposition

Representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Lloyd Masayumptewa, Superintendent, Hubbell Trading Post National Historic Site, ½ Mile West of Highway 191 & 264, Ganado, AZ 86505, telephone (928) 755–3475, email *lloyd_masayumptewa@nps.gov,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Hopi Tribe of Arizona and the Navajo Nation, Arizona, New Mexico & Utah may proceed.

Hubbell Trading Post National Historic Site is responsible for notifying The Consulted Tribes and The Invited Tribes that this notice has been published.

Dated: May 9, 2017.

Melanie O'Brien,

Manager, National NAGPRA Program.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–23389; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: Oberlin College, Oberlin, OH

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: Oberlin College has completed an inventory of human remains in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to Oberlin College. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Oberlin College at the address in this notice by July 31, 2017.

ADDRESSES: Dr. Amy V. Margaris, Oberlin College NAGPRA Compliance Officer, Department of Anthropology,

305 King Building, 10 North Professor Street, Oberlin, OH 44074 telephone (440) 775–5173, email *amy.margaris@oberlin.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of Oberlin College, Oberlin, OH. The human remains were removed from Onondaga County, NY.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by Oberlin College professional staff in consultation with representatives of the Onondaga Nation.

History and Description of the Remains

At an unknown date, human remains representing, at minimum, one individual were removed from an unknown site in Baldwinsville, Onondaga County, NY. In 1886, the Oberlin College Museum received human remains described as ''Skull of Onondaga Indian'' acquired from an ''Ancient Burial Place, Baldwinsville, NY.'' S.M. Dunbar is listed as the donor. The human remains were retained by Oberlin College after the museum's closure in the 1950s and are now in the care of the Oberlin College Department of Anthropology. The human remains consist of one probable female, approximately 18–35 years old. ''Onondaga'' is written in black ink on the human remains. No known individuals were identified. No associated funerary objects are present.

Osteological examination identifies these human remains as representing an individual of Native American ancestry. Their geographic affiliation with the territory of the Onondaga Nation is documented through collection evidence, oral history, and scholarly sources. During consultation, the Onondaga Nation's NAGPRA contact, Tony Gonyea, identified Baldwinsville as located in the heart of the traditional area of the Onondaga Nation. Archeological data demonstrate the Onondaga Nation's continued occupation of the Baldwinsville area since at least the Late Woodland period.

Determinations Made by Oberlin College

Officials of Oberlin College have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Onondaga Nation.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Amy V. Margaris, Oberlin College NAGPRA Compliance Officer, Department of Anthropology, 305 King Building, 10 North Professor Street, Oberlin, OH 44074 telephone (440) 775–5173, email *amy.margaris@oberlin.edu,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Onondaga Nation may proceed.

Oberlin College is responsible for notifying the Onondaga Nation that this notice has been published.

Dated: May 11, 2017.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: Human Remains Repository, Department of Anthropology, University of Wyoming, Laramie, WY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Human Remains Repository, Department of Anthropology, University of Wyoming, has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Human Remains Repository, Department of Anthropology, University of Wyoming. If no additional requestors come forward, transfer of control of the human remains to the Indian Tribes or Native Hawaiian organizations stated in this notice may proceed.

DATES: Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Human Remains Repository, Department of Anthropology, University of Wyoming, at the address in this notice by July 31, 2017.

ADDRESSES: Dr. Rick L. Weathermon, Curator, Human Remains Repository, Department 3431, Anthropology, 1000 East University Avenue, University of Wyoming, Laramie, WY 82071, telephone (307) 314–2035, email *rikw@uwyo.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Human Remains Repository, Department of Anthropology, University of Wyoming, Laramie, WY. The human remains were removed from an unknown location in Hamilton County, TX.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Human Remains Repository, Department of Anthropology, University of Wyoming, professional staff in consultation with representatives of the Tonkawa Tribe of Indians of Oklahoma. The following Indian Tribes were invited to consult but did not participate in consultation: Apache Tribe of Oklahoma; Comanche Nation, Oklahoma; Jicarilla Apache Nation, New Mexico; Kiowa Indian Tribe of Oklahoma; Mescalero Apache

Tribe of the Mescalero Reservation, New Mexico; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Tonto Apache Tribe of Arizona, and White Mountain Apache Tribe of the Fort Apache Reservation, Arizona.

History and Description of the Remains

At some time in the 1920s, human remains representing, at minimum, one individual were removed from an unknown location in Hamilton County, TX. The fragmentary human remains were given to the Anna Miller Museum in Newcastle, WY, in 1969 and then transferred to the University of Wyoming Anthropology Department Human Remains Repository (Record HR202) in 1993. The human remains represent a single adult male. No known individual was identified. No associated funerary objects are present.

At the time of the excavation and removal of these human remains, the land from which the human remains were removed was not the tribal land of any Indian tribe or Native Hawaiian organization. In January of 2017, the Human Remains Repository, Department of Anthropology, University of Wyoming, initiated consultation with all Indian tribes who are recognized as aboriginal to the area from which these Native American human remains were removed. These tribes are the Comanche Nation, Oklahoma, and the Kiowa Indian Tribe of Oklahoma. None of these Indian tribes responded to the invitation nor agreed to accept control of the human remains. In May of 2017, the Human Remains Repository, Department of Anthropology, University of Wyoming, agreed to transfer control of the human remains to the Tonkawa Tribe of Indians of Oklahoma.

Determinations Made by the Human Remains Repository, Department of Anthropology, University of Wyoming

Officials of the Human Remains Repository, Department of Anthropology, University of Wyoming, have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are reasonably believed to be Native American based on museum notes and characteristic features of the cranial fragments.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
- Pursuant to 43 CFR 10.11(c)(2)(i), the disposition of the human remains may be to the Tonkawa Tribe of Indians of Oklahoma.

Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Rick L. Weathermon, Curator, Human Remains Repository, Department 3431, Anthropology, 1000 East University Avenue, University of Wyoming, Laramie, WY 82071, telephone (307) 314–2035, email *rikw@uwyo.edu,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Tonkawa Tribe of Indians of Oklahoma may proceed.

The Human Remains Repository, Department of Anthropology, University of Wyoming, is responsible for notifying the Apache Tribe of Oklahoma; Comanche Nation, Oklahoma; Jicarilla Apache Nation, New Mexico; Kiowa Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Tonkawa Tribe of Indians of Oklahoma; Tonto Apache Tribe of Arizona; and White Mountain Apache Tribe of the Fort Apache Reservation, Arizona, that this notice has been published.

Dated: May 12, 2017.

Melanie O'Brien,

Manager, National NAGPRA Program.

[NPS–WASO–NAGPRA–23398; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: Texas State University, Center for Archaeological Studies and Department of Anthropology, San Marcos, TX

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Texas State University, Center for Archaeological Studies and Department of Anthropology, has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian Tribes or Native Hawaiian organizations. Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Texas State University, Center for Archaeological Studies and Department of Anthropology. If no additional requestors come forward, the human remains may be reinterred.

DATES: Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Texas State University, Center for Archaeological Studies and Department of Anthropology, at the address in this notice by July 31, 2017.

ADDRESSES: Todd M. Ahlman, Center for Archaeological Studies, Texas State University, 601 University Drive, San Marcos, TX 78666, telephone (512) 245–2724, email *toddahlman@txstate.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Texas State University, Department of Anthropology, San Marcos, TX. The human remains were removed from Hays County, TX.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Texas State University, Center for Archaeological Studies and Department of Anthropology, professional staff in consultation with representatives of the Absentee-Shawnee Tribe of Indians of Oklahoma; Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Apache Tribe of Oklahoma; Caddo Nation of Oklahoma; Cherokee Nation; Comanche Nation, Oklahoma; Coushatta Tribe of Louisiana; Delaware Nation, Oklahoma; Iowa Tribe of Oklahoma; Jicarilla Apache Nation, New Mexico; Kialegee Tribal Town; Kickapoo Traditional

Tribe of Texas; Kickapoo Tribe of Oklahoma; Kiowa Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Poarch Band of Creeks (previously listed as the Poarch Band of Creek Indians of Alabama); The Choctaw Nation of Oklahoma; The Muscogee (Creek) Nation; The Osage Nation (previously listed as the Osage Tribe); The Quapaw Tribe of Indians; The Seminole Nation of Oklahoma; Thlopthlocco Tribal Town; Tonkawa Tribe of Indians of Oklahoma; Tunica-Biloxi Indian Tribe; United Keetoowah Band of Cherokee Indians in Oklahoma; Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma; and Ysleta del Sur Pueblo (previously listed as the Ysleta Del Sur Pueblo of Texas) (hereafter listed as ''The Consulted Tribes''). Texas State University, Center for Archaeological Studies and Department of Anthropology, professional staff also consulted with the Miakan-Garza Band of the Coahuiltecan people, a non-federally recognized Indian group.

History and Description of the Remains

In February of 1983, human remains representing, at minimum, two individuals were removed from site 41HY161 in Hays County, TX. The human remains were initially discovered in the fall of 1982 during construction and maintenance of the Texas State University campus. Osteological analysis was conducted by a biological anthropologist from the Southwest Texas State University Department of Sociology and Anthropology (now Texas State University Department of Anthropology), who determined by the context and appearance of the remains that they are most likely of prehistoric Native American ancestry. The human remains from the first burial were very fragmentary. Age and sex could not be determined. The human remains from the second burial were determined to be those of an adult female. No known individuals were identified. No associated funerary objects are present.

In February of 2008 and April of 2009, human remains representing, at minimum, four individuals were removed from site 40HY163 in Hays County, TX. The human remains were discovered during a construction project for expansion of the City of San Marcos' Wonder World Drive and later excavated by Texas State University's Center for Archaeological Studies. Osteological analysis was conducted Kyra Stull, M.A. and Dr. Michelle Hamilton of the Department of Anthropology at Texas State University, who determined them to be of prehistoric Native American ancestry. The human remains consist of one adult male, two adult females, and one possible adult female. No known individuals were identified. No associated funerary objects are present.

Pursuant to 43 CFR 10.16, the Secretary of the Interior may recommend that culturally unidentifiable human remains with no ''tribal land'' or ''aboriginal land'' provenience be reinterred under State or other law. In January 2017, the Texas State University, Center for Archaeological Studies and Department of Anthropology, requested that the Secretary, through the Native American Graves Protection and Repatriation Review Committee, recommend the proposed re-interment of the culturally unidentifiable Native American human remains in this notice, according to State or other law. The Review Committee, acting pursuant to its responsibility under 25 U.S.C. 3006(c)(5), considered the request at its March 2017 meeting and recommended to the Secretary that the proposed re-interment proceed. An April 2017 letter on behalf of the Secretary of Interior from the National Park Service Associate Director for Cultural Resources, Partnerships, and Science transmitted the Secretary's independent review and concurrence with the Review Committee that:

- None of The Consulted Tribes objected to the proposed re-interment, and
- Texas State University, Center for Archaeological Studies and Department of Anthropology, may proceed with the proposed re-interment of the culturally unidentifiable human remains.

Re-interment is contingent on the publication of a Notice of Inventory Completion in the **Federal Register**. This notice fulfills that requirement.

Determinations Made by the Texas State University, Center for Archaeological Studies and Department of Anthropology

Officials of the Texas State University, Center for Archaeological Studies and Department of Anthropology, have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on association with prehistoric artifacts and ancestry estimation.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of six individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
- Pursuant to 43 CFR 10.11(c)(1), a ''tribal land'' or ''aboriginal land'' provenience cannot be ascertained.
- Pursuant to 43 CFR 10.10(g)(2)(ii) and 43 CFR 10.16, the human remains may be reinterred according to the law of the State of Texas and the City of San Marcos, Texas.

Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Todd M. Ahlman, Center for Archaeological Studies, Texas State University, 601 University Drive, San Marcos, TX 78666, telephone (512) 245–2724, email *toddahlman@txstate.edu,* by July 31, 2017. After that date, if no additional requestors have come forward, the human remains may be reinterred.

The Texas State University, Center for Archaeological Studies and Department of Anthropology, is responsible for notifying The Consulted Tribes that this notice has been published.

Dated: May 12, 2017.

Notice of Inventory Completion: U.S. Department of Defense, Department of the Air Force, Air Education and Training Command, Barry M. Goldwater Range East, 56th Range Management Office, Luke Air Force Base, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Defense, Department of the Air Force, Air Education and Training Command, Barry M. Goldwater Range East, 56th Range Management Office, Luke Air Force Base, has completed an inventory of human remains and associated funerary objects, in consultation with the appropriate Indian tribes, and has determined that there is a cultural

affiliation between the human remains and associated funerary objects and present-day Indian tribes. Lineal descendants or representatives of any Indian tribe not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request to the 56th Range Management Office, Luke Air Force Base. If no additional requestors come forward, transfer of control of the human remains and associated funerary objects to lineal descendants or Indian tribes stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to the 56th Range Management Office, Luke Air Force Base by July 31, 2017.

ADDRESSES: Mr. Charles Buchanan, Director, 56th Range Management Office, 7101 Jerstad Lane, Building 500, Luke Air Force Base, AZ 85309, phone (623) 856–5820, email *charles.buchanan@us.af.mil.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the 56th Range Management Office, Luke Air Force Base, and in physical custody of the Arizona State Museum, Tucson, AZ. The human remains and associated funerary objects were removed from site AZ Y:8:001 (ASM), Maricopa County, AZ.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the Department of the Air Force, 56th Range Management Office, Luke Air Force Base, which has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by Arizona State Museum and the 56th Range Management Office, Luke Air Force Base, professional staff in consultation with representatives of the Ak Chin Indian Community (previously listed as the Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona); Gila River Indian Community of the Gila River Indian Reservation, Arizona; Quechan Tribe of the Fort Yuma Indian Reservation, California & Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; and Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona. The following Indian tribes were invited to consult but did not participate in consultations: The Cocopah Tribe of Arizona; Colorado River Indian Tribes of the Colorado River Indian Reservation, Arizona and California; Fort McDowell Yavapai Nation, Arizona; Fort Mohave Indian Tribe of Arizona, California & Nevada; Hopi Tribe of Arizona; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Yavapai-Prescott Indian Tribe (previously listed as the Yavapai-Prescott Tribe of the Yavapai Reservation, Arizona); and Zuni Tribe of the Zuni Reservation, New Mexico. All tribes listed are referred to as the ''Invited and Consulted Tribes.''

History and Description of the Remains

On September 21, 1978, human remains representing, at minimum, one individual were removed from site AZ Y:8:001 (ASM) on the Barry M. Goldwater Range East, Maricopa County, AZ (formerly the Luke AFB Bombing and Gunnery Range). The human remains, Cremation 1, were removed from Component 2, during an authorized archeological excavation under the direction of Dr. Bruce Huckell, Arizona State Museum, AZ. The collection was transferred to the Arizona State Museum on September 28, 1978, where it is currently curated. A professional report on the collection was published in 1979: *The Coronet REAL Project: Archaeological Investigations on the Luke Range, Southwestern Arizona,* by Bruce B. Huckell. Arizona State Museum Archaeological Series No. 129.

The estimated age of the individual at death is older than 40 years based on dentition and ectocranial suture of the sagittal suture. The sex of the cremation was determined to be male based on evidence from the skull and in nominate. The stature of the individual is indeterminate due to the fragmentary nature of the long bones. No known individuals were identified. The 21 associated funerary objects include 1 reconstructed Tanque Verde Red-on-Brown ceramic pitcher with missing handle (1979–145–1); 1 lot of sherds of a burned Colorado Red bowl (1979–145–10); 1 bone awl (1979–145–6); 3 rim sherds of a burned Tonto Polychrome bowl (1979–145–7:x); 14 body sherds of the same burned Tonto Polychrome bowl (1979–145–8:x), and 1 piece of worked animal bone (None–1979–145–C1–01).

Based on morphological characteristics, geographic location, archeological context, and the presence of culturally and temporally identifiable ceramics, and consistency in cremation pit size and orientation, the human remains have been determined to be Native American dating to the Classic period (A.D. 1150–1450) Tucson Basin Hohokam. The cremation pit and orientation of the remains (the long-axis of the body was aligned east-west, with the head at the east) are consistent with Classic Period Hohokam sites in the Gila Bend area and Tucson Basin. The cremation pit is identical in size and shape with primary cremations from site AZ AA:12:46 (ASM), the Rabid Ruin, a Tucson Basin Hohokam site.

A relationship of shared group identity can reasonably be traced between members of the Hohokam culture and the four southern O'odham tribes of Arizona. The O'odham comprise four Federally recognized Indian tribes (Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona); Gila River Indian Community of the Gila River Indian Reservation, Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; and Tohono O'odham Nation of Arizona. Historically the Pimeria Alta is the traditional homeland of the O'odham; including the river people (Akimel), the desert people (Tohono) and the sand people (Hia C-ed O'odham). O'odham oral history teaches that the O'odham were created in this land and have always lived here. Places mentioned in the Creation Story and other stories and songs have been identified on the landscape throughout the Sonoran Desert.

A relationship of shared group identity may also reasonably be traced between members of the Hohokam culture of the Phoenix Basin and clans of the Hopi Tribe of Arizona. Hopi history is based, in large part, on clan migration narratives. The Hopi consider all of Arizona to be within traditional Hopi lands, *i.e.,* areas in and through which Hopi clans are believed to have migrated in the past. Hopi oral history and the anthropological record show that some clans originated in the Salt-Gila region and were descended from the Hohokam. After the fall of the Great House communities, Hohokam refugees were absorbed into the Hopi culture.

A relationship of shared group identity can also reasonably be traced between members of the Hohokam

culture and the Zuni Tribe of the Zuni Reservation, New Mexico. Zuni oral history tells of ancestral migrations and settling throughout this region in their search for the Middle Place of the World (present day Pueblo of Zuni). Zuni ancestors left many markers of their passing including trails, habitation sites, campsites, and burials. Elders have identified features in the area, including shrines and petroglyphs, as Zuni.

A relationship of shared group identity may also be reasonably be traced between members of the Patayan culture and the Quechan tribe of the Fort Yuma Indian Reservation, California & Arizona. The Colorado Red bowl is associated with the archeological culture identified as Patayan, which the Quechan believe were their ancestors.

Determinations of the Luke Air Force Base

Officials of the 56th Range Management Office, Luke Air Force Base have determined that:

- Pursuant to 25 U.S.C. 301(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 301(3)(A), the 21 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 301(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Ak Chin Indian Community (previously listed as the Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona; Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Quechan Tribe of the Fort Yuma Indian Reservation, California & Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; and Zuni Tribe of the Zuni Reservation, New Mexico.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Mr. Charles Buchanan, Director, 56th Range Management Office, Barry M. Goldwater Range East, 7101 Jerstad Lane, Luke Air Force Base, AZ 85309, phone (623) 856–8520, email *charles.buchanan@us.af.mil,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to the Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona; Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Quechan Tribe of the Fort Yuma Indian Reservation, California & Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; and Zuni Tribe of the Zuni Reservation, New Mexico, may proceed.

The 56th Range Management Office, Luke Air Force Base, is responsible for notifying the Invited and Consulted Tribes that this notice has been published.

Dated: May 15, 2017.

Notice of Inventory Completion: U.S. Department of Agriculture, Forest Service, Deschutes National Forest, Bend, OR

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, Deschutes National Forest has completed an inventory of human remains, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, and has determined that there is no cultural affiliation between the human remains and any present-day Indian tribes or Native Hawaiian organizations. Representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Deschutes National Forest. If no additional requestors come forward, transfer of control of the human remains to the Indian tribes or Native Hawaiian organizations stated in this notice may proceed.

DATES: Representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Deschutes National Forest at the address in this notice by July 31, 2017.

ADDRESSES: John Allen, Deschutes National Forest, 63095 Deschutes Market Road, Bend, OR 97701, telephone (541) 383–5512, email *jpallen@fs.fed.us.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Deschutes National Forest, Bend, OR. The human remains were removed from Federal lands in central Oregon.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Deschutes National Forest professional staff, with assistance by the University of Oregon, Department of Anthropology, in consultation with representatives of the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes.

History and Description of the Remains

In 1989, human remains representing, at minimum, three individuals were removed from individual homes of persons arrested for violations of the Archeological Resource Protection Act. The three individuals were apprehended while looting an archeological site on the Deschutes National Forest. Pre-contact human remains were discovered during a search of the individuals' residences. The Deschutes National Forest is unable to determine the exact provenience of the human remains, other than their origination from Federal lands in central Oregon. The human remains remained in possession of Federal law enforcement until 1997, when they were returned to the Deschutes National Forest. In 2009, the Deschutes National

Forest contracted with Dr. Robert Pastor at the University of Oregon for the purpose of determining the number of individuals represented in the collection. Dr. Pastor determined that the set of human remains was comprised of three individuals. Individual 1 is identified as an adult male approximately 35–49 years of age, and of Amerindian ancestry. Individual 2 is identified as a young adult female between 15 and 19 years of age and of Amerindian ancestry. Individual 3 is identified as a juvenile of between 6 and 10 years of age and of Amerindian ancestry. No known individuals were identified. There are no associated funerary objects associated with the three individuals.

Determinations Made by the Deschutes National Forest

Officials of the Deschutes National Forest have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on the analysis performed by the University of Oregon Department of Anthropology.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of three individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.
- According to final judgments of the Indian Claims Commission or the Court of Federal Claims, the land from which the Native American human remains were removed is the aboriginal land of the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes.
- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains were removed is the aboriginal land of the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes.
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes.

Additional Requestors and Disposition

Representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to John Allen, Deschutes National Forest, 63095 Deschutes Market Road, Bend, OR 97701, telephone (541) 383–5512, email *jpallen@fs.fed.us,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes may proceed.

The Deschutes National Forest is responsible for notifying the Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon), Confederated Tribes of the Warm Springs Reservation of Oregon, and Klamath Tribes that this notice has been published.

Dated: May 16, 2017.

Notice of Intent To Repatriate Cultural Items: Arkansas Archeological Survey, Fayetteville, AR

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Arkansas Archeological Survey, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, has determined that the cultural items listed in this notice meet the definition of unassociated funerary objects. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request to the Arkansas Archeological Survey. If no additional claimants come forward, transfer of control of the cultural items to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to the Arkansas Archeological Survey at the address in this notice by July 31, 2017.

ADDRESSES: Dr. George Sabo, Director, Arkansas Archeological Survey, 2475 North Hatch Avenue, Fayetteville, AR 72704, telephone (479) 575–3556.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate cultural items under the control of the Arkansas Archeological Survey that meet the definition of unassociated funerary objects under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American cultural items. The National Park Service is not responsible for the determinations in this notice.

History and Description of the Cultural Items

In 1972, three cultural items were removed from the Cryer Field site (3LA35) in Lafayette County, AR. The 3 unassociated funerary objects are one Handy Engraved bottle, one Washington Stamped jar, and one Pease Brushed-Incised jar (Cat. 72–406–68–1, 2, 3).

The pottery types are well-known examples of Caddo tradition wares. All are contemporaneous, ranging from A.D. 1300 to 1500, and are attributed to the Haley Phase of the Middle Caddo period. These pottery types are found throughout Southwest Arkansas, and into adjoining corners of Texas, Louisiana, and Oklahoma. All three cultural items were made before European contact and during the Caddo tradition.

The Caddo archeological tradition developed between A.D. 900 and 1000 in the four corners region of Arkansas, Texas, Louisiana, and Oklahoma. Distinctive characteristics include a dispersed residential settlement of families with a lifestyle grounded in farming and collecting wild plants and animals. The core of community life was a religious and political center with ceremonial and burial mounds, public areas for community events and rituals, and a small residential population

believed to be religious and political leaders and their families. Caddo ceramics are highly distinctive with dual manufacturing traditions that produced both refined wares decorated with complex stylized incised and engraved designs and utilitarian wares with highly plastic incised, punctated, and brushed designs that are dominated by geometric motifs.

The Caddo continued to practice traditional settlement arrangements and material crafts well into the contact period. This is confirmed in part by past discoveries of distinctive Caddo ceramics and other artifacts found with European trade items in locations where French and Spanish observers documented their settlements. There is thus a strong material link between historic Caddo Tribal communities and pre-contact archeological remains. The collection enumerated here is entirely typical of pre-contact Caddo Tradition material culture.

Determinations Made by the Arkansas Archeological Survey

Officials of the Arkansas Archeological Survey have determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the 3 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the unassociated funerary objects and the Caddo Nation of Oklahoma.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to Dr. George Sabo, Director, Arkansas Archeological Survey, 2475 North Hatch Avenue, Fayetteville, AR 72704, telephone (479) 575–3556 by July 31, 2017. After that date, if no additional claimants have come forward, transfer of control of the unassociated funerary objects to the Caddo Nation of Oklahoma may proceed.

The Arkansas Archeological Survey is responsible for notifying the Caddo Nation of Oklahoma that this notice has been published.

Dated: April 26, 2017.

Melanie O'Brien,

Program Manager.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–23400; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: University of Massachusetts Amherst, Department of Anthropology, Amherst, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The University of Massachusetts Amherst, Department of Anthropology, has completed an inventory of human remains, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Department of Anthropology at the University of Massachusetts, Amherst. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the address in this notice by July 31, 2017.

ADDRESSES: Dr. Sonya Atalay, Chair, Repatriation Committee, Department of Anthropology, 217 Machmer Hall, University of Massachusetts, 240 Hicks Way, Amherst, MA 01003, telephone (413) 545–2702, email *satalay@umass.edu.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the University of Massachusetts Amherst, Department of Anthropology. The human remains were removed from an unknown location in East Springfield, NY.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the University of Massachusetts Amherst, Department of Anthropology, professional staff in consultation with representatives of the Haudenosaunee Standing Committee on Burial Rights and Regulations, and the following federally-recognized tribes: Cayuga Nation; Oneida Nation; Oneida Nation of New York; Onondaga Nation; Saint Regis Mohawk Tribe (previously listed as the St. Regis Band of Mohawk Indians of New York); Seneca Nation of Indians (previously listed as the Seneca Nation of New York); Seneca-Cayuga Nation (previously listed as the Seneca-Cayuga Tribe of Oklahoma); Tonawanda Band of Seneca (previously listed as the Tonawanda Band of Seneca Indians of New York); and Tuscarora Nation (hereinafter known as the Haudenosaunee Confederacy).

History and Description of the Human Remains

In the 1950s, human remains representing, at minimum, one individual were removed from the farm of Harriet R. and Raymond Rogers in East Springfield, Otsego County, NY. After keeping the human remains several years, a farmer transferred possession to an artist who visited the farm. That artist later learned about NAGPRA and transferred the human remains to the University of Massachusetts, Department of Anthropology. The date of this transfer was not recorded. No known individual was identified. No associated funerary objects are present.

Also in the possession of the University of Massachusetts, Department of Anthropology are human remains representing, at minimum, one individual from an unknown provenience, represented by the vault portion of the cranium (top, sides and back of the head). The following identification is written on the back of the cranium in black ink: ''Prehistoric Iriquois [sic] UU 21524/2.'' No known individual was identified. No associated funerary objects are present.

No further contextual information accompanies either set of human remains. Both have remained in the possession of the University of Massachusetts since legal control was established.

Determinations Made by the University of Massachusetts Amherst, Department of Anthropology

Officials of the University of Massachusetts Amherst, Department of Anthropology have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and the Haudenosaunee Confederacy.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a formal written request with information in support of the claim to Dr. Sonya Atalay, Chair, Repatriation Committee, Department of Anthropology, 217 Machmer Hall, University of Massachusetts, 240 Hicks Way, Amherst, MA 01003, telephone (413) 545–2702, email *satalay@umass.edu* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Haudenosaunee Confederacy may proceed.

The University of Massachusetts Amherst, Department of Anthropology, is responsible for notifying the Haudenosaunee Standing Committee on Burial Rights and Regulations and the member nations of the Haudenosaunee Confederacy that this notice has been published.

Dated: May 12, 2017.

Melanie O'Brien,

National NAGPRA Program Manager.

Notice of Inventory Completion: Museum of Natural History and Planetarium, Roger Williams Park, Providence RI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Museum of Natural History and Planetarium, Roger Williams Park, has completed an inventory of human remains and associated funerary objects, in consultation with the appropriate Indian tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and associated funerary objects and present-day Indian tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request to the Museum of Natural History and Planetarium, Roger Williams Park. If no additional requestors come forward, transfer of control of the human remains and associated funerary objects to the lineal descendants, Indian tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to the Museum of Natural History and Planetarium, Roger Williams Park, at the address in this notice by July 31, 2017.

ADDRESSES: Michael W. Kieron, Museum of Natural History and Planetarium, Roger Williams Park, 1000 Elmwood Avenue, Providence, RI 02907, telephone (401) 680–7248, email *m.kieron@musnathist.com.*

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the Museum of Natural History and Planetarium, Roger Williams Park. The human remains and associated funerary objects were removed from the Miller Cave site (23PU2) in Pulaski County, MO.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Museum of Natural History and Planetarium, Roger Williams Park, professional staff in consultation with representatives of the Apache Tribe of Oklahoma; Comanche Nation, Oklahoma; Eastern Band of Cherokee Indians; Kiowa Indian Tribe of Oklahoma; and The Osage Nation (previously listed as the Osage Tribe).

History and Description of the Remains

In 1927, human remains representing, at minimum, one individual were removed from the Miller Cave site (23PU2) in Pulaski County, MO, by Mr. and Mrs. Edward H. Nadeau. The human remains, consisting of one adult metacarpal, and the associated funerary objects were donated to the Museum of Natural History and Planetarium, Roger Williams Park, by Mr. and Mrs. Nadeau on January 23, 1933. No known individuals were identified. The 16 associated funerary objects include 1 polished tip of a white-tailed deer antler, 1 partial white-tailed deer antler, 9 partial white-tailed deer bones, 1 piece of a spiny softshell turtle carapace, and 4 potsherds. Most of the objects were labeled as being from Miller Cave, Pulaski County, MO.

The human remains and associated funerary objects were part of a collection of 50 lots of American Indian objects and geological specimens collected in the 1920s by the Nadeaus. No records related to this donation have been located.

The human remains and associated funerary objects were accessioned (catalog number E2730, accession number 8943) and stored with objects collected in 1927 from North Carolina and Young County, Texas. The objects from North Carolina and Texas were labeled according to their provenience. The entire group was entered into the catalog as ''Bones and Potsherds, Pulaski Co., Missouri; Young Co., Texas; North Carolina.'' Many of the American Indian objects donated at this time were

treated in a similar manner, with objects from disparate localities being cataloged together.

Due to this generalized catalog entry, the human remains were originally reported by the Museum of Natural History and Planetarium in an inventory as culturally unidentifiable (CUI). A 1983 study identified the human remains as American Indian based on the associated funerary objects. Following an examination by representatives of The Osage Nation (previously listed as the Osage Tribe) in January 2016, The Osage Nation and the Museum of Natural History and Planetarium, Roger Williams Park concurred that the human remains and associated funerary objects are from a burial site located on Osage ancestral lands.

Determinations Made by the Museum of Natural History and Planetarium, Roger Williams Park

Officials of the Museum of Natural History and Planetarium, Roger Williams Park, have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 1 individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the 16 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and The Osage Nation (previously listed as the Osage Tribe).

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Michael W. Kieron, Museum of Natural History and Planetarium, Roger Williams Park, 1000 Elmwood Avenue, Providence, RI 02907, telephone (401) 680–7248, email *m.kieron@musnathist.com,* by July 31, 2017. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to The Osage Nation (previously listed as the Osage Tribe) may proceed.

The Museum of Natural History and Planetarium, Roger Williams Park, is responsible for notifying the Apache Tribe of Oklahoma; Comanche Nation, Oklahoma; Eastern Band of Cherokee Indians; Kiowa Indian Tribe of Oklahoma; and The Osage Nation (previously listed as the Osage Tribe) that this notice has been published.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1035]

Certain Liquid Crystal Ewriters and Components Thereof; Commission Determination Not To Review an Initial Determination Terminating the Last Remaining Respondent Based on Withdrawal of the Complaint; Request for Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 11) issued by the presiding administrative law judge (''ALJ'') on May 31, 2017, terminating the last remaining respondent based on a withdrawal of the complaint. The Commission requests written submissions, under the schedule set forth below, on remedy, public interest, and bonding concerning a previously defaulted respondent.

FOR FURTHER INFORMATION CONTACT: Robert Needham, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–5468. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (*https://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on January 13, 2017, based on a complaint filed by Kent Displays, Inc. (''Kent Displays'') of Kent, Ohio. 82 FR 4418. The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain liquid crystal eWriters and components thereof that infringe U.S. Patent Nos. 7,351,506 and 8,947,604. *Id.* The Commission's notice of investigation named as respondents Shenzhen Howshow Technology Co., Ltd., d/b/a Shenzhen Howshare Technology Co., Ltd., d/b/a Howshare (''Howshare'') of Shenzhen, China, and Shenzhen SUNstone Technology Co., Ltd., d/b/a iQbe (''iQbe'') of Shenzhen, China. *Id.* The Office of Unfair Import Investigations is not participating in this investigation. *Id.*

On April 11, 2017, the ALJ issued an ID finding iQbe in default for failing to respond to the complaint, the notice of investigation, and multiple discovery requests, and for failing to respond to an order to show cause why it should not be found in default. Order No. 9, *not reviewed,* Notice (May 11, 2017).

On May 24, 2017, Kent Displays moved to terminate the investigation with respect to Howshare based on a withdrawal of the complaint. On May 26, 2017, Howshare responded that it did not oppose its termination from the investigation.

On May 31, 2017, the ALJ issued the subject ID, granting the motion and terminating the investigation with respect to Howshare. Order No. 11. No petitions for review of the ID were filed.

The Commission has determined not to review the subject ID.

On June 1, 2017, Kent Displays filed a declaration seeking relief against the defaulted respondent iQbe pursuant to section 337(g)(1) and Commission Rule 210.16(c), 19 CFR 210.16(c). The declaration contains Kent Displays' views on remedy, the public interest, and bonding. A proposed limited exclusion order and a proposed cease and desist order are attached to the declaration.

Section 337(g)(1) and Commission Rule 210.16(c) authorize the Commission to order relief against a respondent found in default, unless, after considering the public interest, it finds that such relief should not issue.

In connection with the final disposition of this investigation, the

Commission may: (1) Issue an order that could result in the exclusion of articles manufactured or imported by iQbe; and/or (2) issue cease and desist orders that could result in iQbe being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, see *Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843, Comm'n Op. at 7–10 (December 1994).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors that the Commission will consider include the effect that the exclusion order and/or cease and desists orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Kent Displays is requested to state the HTSUS numbers under which the accused products are imported, to state the dates that the patents expire, and to supply information concerning the identity of any known importers.

Written submissions must be filed no later than the close of business on July 10, 2017. Reply submissions must be filed no later than the close of business July 17, 2017. No further submissions on these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadline stated above and submit eight true paper copies to the Office of the Secretary pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (''Inv. No. 337–TA–1035'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/documents/handbook_on_filing_procedures.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel[1], solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: June 26, 2017.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2017–13686 Filed 6–29–17; 8:45 am]

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–287 (Second Review)]

Raw In-Shell Pistachios From Iran

Determination

On the basis of the record [1] developed in the subject five-year review, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping duty order on raw in-shell pistachios from Iran would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission, pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)), instituted this review on April 1, 2016 (81 FR 18882) and determined on July 5, 2016 that it would conduct a full review (81 FR 45306, July 13, 2016). Notice of the scheduling of the Commission's review and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on December 15, 2016 (81 FR 90867) (as revised effective March 7, 2017 (82 FR 14031, March 16, 2017)). The hearing was held in Washington, DC, on April 27, 2017, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made this determination pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determination in this review on June 26, 2017. The views of the Commission are contained in USITC Publication 4701 (June 2017), entitled *Raw In-Shell Pistachios from Iran: Investigation No. 731–TA–287 (Second Review).*

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

By order of the Commission.

Issued: June 26, 2017.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–979]

Certain Radio Frequency Identification (''RFID'') Products and Components Thereof; Notice of Request for Statements on the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the presiding administrative law judge (''ALJ'') has issued a Final Initial Determination and Recommended Determination on Remedy and Bonding in the above-captioned investigation. The Commission is soliciting comments on public interest issues raised by the recommended relief should the Commission find a violation. The ALJ recommended only a limited exclusion order with a certification provision directed against certain infringing radio frequency identification (''RFID'') products and components thereof imported by Respondents Kapsch TrafficCom IVHS, Inc. of McLean, Virginia; Kapsch TrafficCom Holding Corp. of McLean, Virginia; Kapsch TrafficCom Canada, Inc. of Mississauga, Ontario, Canada; Star Systems International, Ltd. of Kwai Chung, Hong Kong; and STAR RFID Co., Ltd. of Bangkok, Thailand. This notice is soliciting public interest comments from the public only.

FOR FURTHER INFORMATION CONTACT: Cathy Chen, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2392. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 provides that if the Commission finds a violation it shall exclude the articles concerned from the United States:

> unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry.

19 U.S.C. 1337(d)(1). A similar provision applies to cease and desist orders. 19 U.S.C. 1337(f)(1).

The Commission is interested in further development of the record on the public interest in its investigations. Accordingly, members of the public are invited to file submissions of no more than five (5) pages, inclusive of attachments, concerning the public interest in light of the administrative law judge's Recommended Determination on Remedy and Bonding issued in this investigation on June 22, 2017. Comments should address whether issuance of an exclusion order and/or cease and desist orders in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the recommended orders are used in the United States;

(ii) Identify any public health, safety, or welfare concerns in the United States relating to the recommended orders;

(iii) Indicate the extent to which like or directly competitive articles are produced in the United States or are otherwise available in the United States, with respect to the articles potentially subject to the recommended orders;

(iv) Indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the recommended orders within a commercially reasonable time; and

(v) Explain how the recommended orders would impact consumers in the United States.

Written submissions must be filed no later than by close of business on July 28, 2017.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to Commission Rule 210.4(f), 19 CFR part 210.4(f). Submissions should refer to the investigation number (''Inv. No. 979'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/documents/handbook_on_filing_procedures.pdf*). Persons with questions regarding filing should contact the Secretary, (202) 205–2000.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR part 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: June 27, 2017.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employment and Training Administration

Employment and Training Administration Program Year (PY) 2017; Workforce Innovation and Opportunity Act (WIOA) Section 167, National Farmworker Jobs Program (NFJP) Allocations

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This Notice announces allocations for Program Year (PY) 2017 for the WIOA Title I Section 167 National Farmworker Jobs Program (NFJP) program as required under Section 182(d) of the Workforce Innovation and Opportunity Act of 2014.

The NFJP allocations are distributed to the state service areas by a formula that estimates, by State, the relative demand for NFJP services. The formula factors used to allocate funds for the NFJP were published in the **Federal Register** on May 19, 1999. The notice explained the purpose of the formula; *i.e.,* distributing funds geographically by State service area on the basis of each area's relative share of farmworkers who are eligible for enrollment in the NFJP. The data used in the formula are comprised of a combination of data sets that were selected to yield the relative share distribution across States of eligible farmworkers. While the data factors used in the formula remain unchanged since their development in 1999, the data sets were last updated in 2005 with data from the 2000 Census, the 2003 National Agricultural Workers Survey (NAWS), and the 2002 Census of Agriculture.

DATES: The PY 2017 NFJP allocations become effective for the program year beginning on July 1, 2017.

ADDRESSES: Questions on the allocations can be submitted to the Employment and Training Administration, Office of Financial Administration, 200 Constitution Ave. NW., Room N–4702, Washington, DC 20210, Attention: Ms. Anita Harvey, (202) 693–3958 (phone), (202) 693–2859 (fax), or email: *Harvey.anita@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Laura Ibañez, Unit Chief (202) 693–3645 or Steven Rietzke, Division Chief (202) 693–3912. Individuals with hearing or speech impairments may access the telephone numbers above via TTY by calling the toll-free Federal Information Relay Service at 1–877–889–5627 (TTY–TDD).

SUPPLEMENTARY INFORMATION: The Department of Labor (DOL or Department) is announcing final PY 2017 allocations for the NFJP. This notice provides information on the amount of funds available during PY 2017 to State service areas awarded grants through the PY 2016 Funding Opportunity Announcement (FOA) for the National Farmworker Jobs Program (NFJP) Employment and Training and Housing Assistance Grants. The allocations are based on the funds appropriated in the Consolidated Appropriations Act, 2017, Public Law 115–31, May 5, 2017 (from this point forward, referred to as ''the Act''). In appropriating these funds, Congress provided $75,885,000 for Employment and Training Grants; $5,517,000 for Housing Assistance Grants; and $494,000 for Technical Assistance and Training. The Act, Division H, Title I, sec. 106(b), allows the Secretary to set aside up to 0.5 percent of each discretionary appropriation for activities related to program integrity. For 2017, the Department set aside the full 0.5 percent of most discretionary appropriations, including migrant and seasonal farmworker program formula grants and housing. This reduced the amount available for NFJP Employment and Training grants to $75,505,575 and Housing Assistance grants to $5,489,415. The amount appropriated for discretionary purposes (technical assistance and training) was not adjusted. Included below is the table listing the PY 2017 allocations for the NFJP Employment and Training Grants, as well as the sub-allocation table for California. California is the only State service area with more than one grant; the current sub-allocation formula for California was developed in collaboration with the existing grantees. Individual grants are awarded for Housing Assistance as a result of the grants competition and are further distributed according to language in the appropriations law requiring that of the total amount available, not less than 70 percent shall be allocated to permanent housing activities, leaving not more than 30 percent to temporary housing activities.

PY 2017 Formula Allocation for NFJP

The calculation of the PY 2017 formula allocation distribution incorporates the state-by-state relative shares of eligible farmworkers developed for the PY 2005 formula allocations using the updated datasets described above, with various adjustments applied since that time. The PY 2005 calculation adjusted those state-by-state relative shares by ''hold-harmless'' and ''stop-loss''/''stop-gain'' limits due to the introduction of the updated data. The following year, the PY 2006 formula allocations were proportionately based on the PY 2005 formula allocations and further adjusted by an additional $3.8 million appropriated by Congress for States whose PY 2005 allocation had been reduced as a result of the updated data used for the PY 2005 formula allocation distribution. Detailed descriptions of the formula methodology for PY 2005 and PY 2006 formula allocations were provided in the applicable **Federal Register** announcements. The PY 2007 appropriation for the WIA Section 167 formula program was $470 less than the corresponding PY 2006 appropriation. To maintain stability of funding for the program and consistency with the PY 2006 congressional directions to the Department, the Department distributed the PY 2007 formula funding among all States in the same proportion as the distribution of the PY 2006 formula allocations. In all subsequent appropriations, including PY 2017, the Department continued to distribute the formula funding amount in the same proportion as the distribution of the prior year's formula amounts.

State Combinations

There will be a single plan of service for operating the PY 2017 NFJP in the State service areas of Delaware and Maryland and the State service areas of Rhode Island and Connecticut. The sub-allocations for multiple sub-state service areas in California were discussed earlier in this Notice.

PY 2018 Formula Allocation for NFJP

In February and April 2017, the Employment and Training Administration (ETA) hosted a national online dialogue to gather ideas from NFJP grantees, research analysts, economists, and other professionals on revising the existing formula and its databases to ensure incorporation of the latest available data, as required under WIOA Section 182(a). The ideas suggested by the multiple stakeholders who participated in the national online dialogue helped inform the proposed formula for PY 2018. ETA will publish the PY 2018 proposed allocation formula for comment in the fall of 2017.

Byron Zuidema,

Deputy Assistant Secretary for Employment and Training.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Concrete and Masonry Construction Standard

ACTION: Notice.

SUMMARY: On June 30, 2017, the Department of Labor (DOL) will submit the Occupational Safety and Health Administration (OSHA) sponsored information collection request (ICR) titled, ''Concrete and Masonry Construction Standard,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before July 31, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201704-1218-003* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–OSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Concrete and Masonry Construction Standard information collection. An Occupational Safety and Health Act (OSH Act) covered construction firm engaged in the erection of concrete formwork must post warning signs/barriers, in accordance with regulations 29 CFR 1926.701(c)(2), to reduce exposure of non-essential employees to the hazards of post-tensioning operations. Paragraphs 29 CFR 1926.702(a)(2), (j)(1), and (j)(2) are general lockout/tagout measures to protect workers from injury associated with equipment and machinery. Paragraph 29 CFR 1926.703(a)(2) requires an employer to make available drawings or plans for jack layout, formwork, working decks and scaffolds. Paragraph 1926.705(b) requires an employer to mark the rated capacity of jacks and lifting units. OSH Act section 6(b)(7) authorizes this information collection. *See* 29 U.S.C. 655(b)(7).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218–0095.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on June 30, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on February 24, 2017 (82 FR 11658).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218–0095. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–OSHA.

Title of Collection: Concrete and Masonry Construction Standard.

OMB Control Number: 1218–0095.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 798,160.

Total Estimated Number of Annual Responses: 159,632.

Total Estimated Annual Time Burden: 12,771 hours.

Total Estimated Annual Other Costs Burden: $0.

Authority: 44 U.S.C. 3507(a)(1)(D).

Dated: June 27, 2017.

Michel Smyth,

Departmental Clearance Officer.

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Disclosures to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Wage and Hour Division (WHD) sponsored information collection request (ICR) titled, ''Disclosures to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act,'' to the Office of Management and Budget (OMB) for review and approval for continued use,

without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before July 31, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the *RegInfo.gov* Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201701-1235-002* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–WHD, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Disclosures to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act (MSPA) information collection. Agricultural employers, associations, and farm labor contractors use this information collection to make MSPA required disclosures of employment terms and conditions, wage statements, and housing terms and conditions to migrant and seasonal agricultural workers. MSPA section 201 authorizes this information collection. *See* 29 U.S.C. 1821.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1235–0002.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on June 30, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 23, 2016 (81 FR 84619).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1235–0002. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–WHD.

Title of Collection: Disclosures to Workers Under the Migrant and Seasonal Agricultural Worker Protection Act.

OMB Control Number: 1235–0002.

BILLING CODE 4510–27–P

NATIONAL CREDIT UNION ADMINISTRATION

Request for Comment Regarding Revised Overhead Transfer Rate Methodology

AGENCY: National Credit Union Administration (NCUA).

ACTION: Request for comment.

SUMMARY: In a voluntary effort to invite input from stakeholders, the NCUA Board (Board) is seeking comments on proposed changes to the Overhead Transfer Rate (OTR) methodology. The primary goal of the proposed changes are to reduce the complexity of the OTR methodology. The proposed changes would also reduce the resources needed to administer the OTR. This document provides a summary of and response to comments received on the current OTR methodology, and explains and solicits comments on the proposed changes to the OTR methodology.

DATES: Comments must be received on or before August 29, 2017 to ensure consideration.

ADDRESSES: You may submit comments by any one of the following methods (Please send comments by one method only):

- *NCUA Web site*: *https://www.ncua.gov/about/pages/board-comments.aspx.*
- *Email*: Address to *boardcomments@ncua.gov.* Include ''[Your name]—Comments on OTR Methodology'' in the email subject line.
- *Fax*: (703) 518–6319. Use the subject line described above for email.
- *Mail*: Address to Gerald Poliquin, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

• *Hand Delivery/Courier*: Same as mailing address.

Public Inspection: You can view all public comments on NCUA's Web site at *https://www.ncua.gov/about/pages/board-comments.aspx* as submitted, except for those we cannot post for technical reasons. NCUA will not edit or remove any identifying or contact information from the public comments submitted. You may inspect paper copies of comments in NCUA's headquarters at 1775 Duke Street, Alexandria, Virginia 22314, by appointment weekdays between 9 a.m. and 3 p.m. To make an appointment, call (703) 518–6360 or send an email to *EIMail@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: Russell Moore or Julie Decker, Loss/Risk Analysis Officers, Office of Examination and Insurance, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314 or telephone: (703) 518–6383 or (703) 518–6384.

SUPPLEMENTARY INFORMATION: NCUA requested comments on the current OTR methodologies and processes through a notice in the **Federal Register** published on January 27, 2016.[1] Areas the Board specifically sought comments on included:

• Whether the OTR should continue to be determined using a formula-driven approach, or instead be set largely at the discretion of the Board;

• the definition NCUA uses for insurance-related activities;

• adjustments or changes to the current calculation; and

• alternate methodologies to arrive at an accurate and fair allocation of costs.

Within the 90-day comment period, NCUA received 40 comment letters on the OTR methodology. The commenters included federally insured state-chartered credit unions, national credit union trade organizations, state leagues, and state supervisory authorities. There were no comment letters received from federal credit unions. While there were only 40 comment letters, the comments addressed a broad range of complex issues. In addition to reviewing comments for input on the existing approach, NCUA staff explored options for the Board to consider for improving the OTR methodology. Many of the comment letters discussed the methodologies for both the OTR and the Operating Fee as well as other budget-related issues. This request for comments focuses specifically on the OTR methodology. Comments related to the Operating Fee methodology and other budget-related issues were referred to the appropriate office.

Based on the comments and NCUA's internal assessment, the Board is considering changes to the OTR methodology.

Table of Contents

I. Background

NCUA administers the Federal Credit Union Act (the Act), which is comprised of three Titles: Title I—General Provisions, Title II—Share Insurance, and Title III—Central Liquidity Facility. The agency's mission is to ''provide, through regulation and supervision, a safe and sound credit union system, which promotes confidence in the national system of cooperative credit.'' [2] This includes protecting member rights and deposits. Specifically, NCUA charters, regulates, and insures shares in federal credit unions and insures shares and deposits in federally insured state-chartered credit unions through the National Credit Union Share Insurance Fund (Share Insurance Fund).

NCUA is responsible for ensuring federally insured credit unions operate safely and soundly and comply with all applicable laws and regulations within NCUA's jurisdiction.[3] In so doing, the agency mitigates risk to the Share Insurance Fund and prevents taxpayer-funded bailouts.

To achieve its statutory mission, the agency incurs various expenses, including those involved in examining and supervising federally insured credit unions. The Board adopts an Operating Budget each year to fund the vast majority of the costs of operating the agency.[4] The Act authorizes two primary sources to fund the Operating Budget: (1) Requisitions from the Share Insurance Fund; and (2) Operating Fees charged to federal credit unions.[5]

In 1972, the Government Accountability Office recommended NCUA adopt a method for properly allocating Operating Budget costs—that is the portion to be funded by requisitions from the Share Insurance Fund and the portion to be covered by Operating Fees paid by federal credit unions.[6] NCUA has since used an allocation methodology, known as the OTR, to determine how much of the Operating Budget to fund with a requisition from the Share Insurance Fund.

NCUA has employed various allocation methods over the years, with the current methodology adopted in 2003. For a chronological summary of the history of the OTR, refer to *Overhead Transfer Rate (OTR)—Timeline* at *https://www.ncua.gov/About/Documents/Budget/Misc%20Documents/overhead-transfer-rate-chronology.pdf.* For a detailed explanation of the current methodology, refer to **Federal Register**—*NCUA Request for Comment Regarding Overhead Transfer Rate Methodology* at *https://www.federalregister.gov/documents/2016/01/27/2016-01626/request-for-comment-regarding-overhead-transfer-rate-methodology.*

II. Legal Authority Comments and Responses

The Board detailed the legal parameters within which it must fund the NCUA Operating Budget in the January 2016 notice and request for comment.[7] While the Board did not expressly solicit comments on said authorities, a number of comments addressed NCUA's legal authority. Below the Board restates the legal parameters outlined in the January 2016 notice. Within these parameters, NCUA has developed a new OTR methodology proposed in this publication that continues to ensure application that is fair to both federal credit unions and federally insured state-chartered credit unions, and that is consistent across all of NCUA's cost centers.

a. Legal Authority

NCUA charters, regulates and insures shares in federal credit unions and insures shares and deposits in federally insured state-chartered credit unions. To cover expenses related to its statutory mission, the Board adopts an Operating Budget in the fall of each year. The Act authorizes two primary sources to fund the Operating Budget: (1) Requisitions from the Share Insurance Fund ''for such administrative and other expenses incurred in carrying out the purposes of

[1] 81 FR 4804 (Jan. 27, 2016).

[2] *https://www.ncua.gov/About/Pages/Mission-and-Vision.aspx.*

[3] In coordination with State Supervisory Authorities with respect to federally insured state-chartered credit unions.

[4] Some costs are directly charged to the Share Insurance Fund or the Temporary Corporate Credit Union Stabilization Fund when appropriate to do so. For example, costs for training and equipment provided to State Supervisory Authorities are directly charged to the Share Insurance Fund.

[5] Other sources of funding for the Operating Budget include interest income, funds from publication sales, parking fee income, and rental income.

[6] *http://www.gao.gov/assets/210/203181.pdf.*

[7] 81 FR 4804 (Jan. 27, 2016).

[Title II of the Act] as [the Board] may determine to be proper''; [8] and (2) ''fees and assessments (including income earned on insurance deposits) levied on insured credit unions under [the Act].'' [9] Among the fees levied under the Act are annual Operating Fees, which are required for federal credit unions under 12 U.S.C. 1755 ''and may be expended by the Board to defray the expenses incurred in carrying out the provisions of [the Act,] including the examination and supervision of [federal credit unions].'' Taken together, these dual primary funding authorities effectively require the Board to determine which expenses are appropriately paid from each source while giving the Board broad discretion in allocating these expenses.

To allocate agency expenses between these two primary funding sources, NCUA uses the OTR. The OTR represents the formula NCUA uses to allocate insurance-related expenses to the Share Insurance Fund under Title II. Almost all other operating expenses are collected through annual Operating Fees paid by federal credit unions.[10] Two statutory provisions directly limit the Board's discretion with respect to Share Insurance Fund requisitions for NCUA's Operating Budget and, hence, the OTR. First, expenses funded from the Share Insurance Fund must carry out the purposes of Title II of the Act, which relate to share insurance.[11] Second, NCUA may not fund its entire Operating Budget through charges to the Share Insurance Fund.[12] NCUA has not imposed additional policy or regulatory limitations on its discretion for determining the OTR. If NCUA's OTR methodology were challenged, the court would uphold NCUA's methodology unless it were shown to be arbitrary or capricious, contrary to law, or unsupported by statutory authority under the Administrative Procedure Act (APA).[13] The Board believes the existing OTR and this proposal are fully consistent with the APA and all other applicable law.[14]

b. Comments

In response to its initial OTR notice, NCUA received a variety of comments related to the legal authority to requisition funds from the Share Insurance Fund to cover a portion of the Operating Budget. Several commenters stated the agency does not have authority or discretion to establish and determine the OTR. Some commenters asserted that NCUA lacks the legal authority to use the Share Insurance Fund to cover costs of operating the agency. Other commenters claimed NCUA has only very narrow authority to allocate costs, has too broadly interpreted its authority, and may assign to the Share Insurance Fund only those costs directly associated with share insurance payments for failed or troubled credit unions. Some commenters insisted NCUA is required to fund the vast majority of the cost of operating the agency through Operating Fees charged to federal credit unions, claiming Congress intended that Operating Fees were to subsidize costs in managing risk to the Share Insurance Fund. Having considered these comments, NCUA maintains that a plain reading of the Act, as described in section II.a. above and in the January 2016 notice, supports the agency's legal authority and broad discretion in allocating operating costs.

Various commenters disagreed with the agency's legal analysis and argued that some combination of 12 U.S.C. 1781(b)(1), 1782(a)(5), and 1790 also limit NCUA's requisition of funds from the Share Insurance Fund for the Operating Budget. Several commenters went further and argued that Title II's legislative history indicates the savings from NCUA's reliance on Title I and State Supervisory Authority examinations and reports should accrue to the benefit of the Share Insurance Fund. The Act's plain language does not require an analysis of the legislative history.[15] Even if legislative history was applicable in this case, the plain reading of the Act is consistent with the legislative history and does not support commenters' interpretation that Congress intended costs savings provisions to only accrue to the Share Insurance Fund as discussed below.

Multiple commenters stated that the plain language of the Act requires the Board to structure examinations and Call Reports originally required under Title I so they may be used for Title II share insurance purposes.[16] These commenters similarly stated that the Act places requirements on NCUA to use state regulator examinations and reports to the maximum extent feasible.[17] In response, the Board notes that Title II, in 12 U.S.C. 1781(b)(2), authorizes examinations as needed for the protection of the Share Insurance Fund and other credit unions in addition to those permitted under Title I, recognizing that the scope and timing of Title I examinations does not necessarily satisfy share insurance needs under Title II. Regardless of the parsing of the various statutory provisions on this point, the Board is careful to build efficiencies wherever reasonable in light of NCUA's dual roles as (1) charterer and prudential regulator of federal credit unions and (2) insurer of federal credit unions and federally insured state-chartered credit unions. Efficiencies gained from NCUA's dual role provide cost savings and help avoid subjecting credit unions to the burden of redundant examinations. Further, the Act's provisions on cost savings do not prohibit NCUA from allocating insurance-related operating expenses to the Share Insurance Fund through the OTR under 12 U.S.C. 1783(a). Specifically, 12 U.S.C. 1781(b)(1) requires NCUA to adjust the way it conducts examinations of federal credit unions so they may be ''utilized for share insurance purposes.'' This provision does result in cost savings. However, it does not preclude NCUA from allocating the costs of the ''share insurance purposes'' portion of federal credit union examinations to the Share Insurance Fund.[18] The Board thus disagrees with commenters that argued that the Act requires the cost-savings of NCUA's dual roles to accrue specifically to the Share Insurance Fund.

While the Board did not cite 12 U.S.C. 1790 as an additional limitation in its earlier notice, the Board agrees with commenters stating that this provision should inform NCUA's interpretation of Title II so that it consciously avoids discrimination against federally insured

[8] 12 U.S.C. 1783(a).

[9] 12 U.S.C. 1766(j)(3). Other sources of income for the Operating Budget include interest income, funds from publication sales, parking fee income, and rental income.

[10] Annual Operating Fees must ''be determined according to a schedule, or schedules, or other method determined by the NCUA Board to be appropriate, which gives due consideration to the expenses of the [NCUA] in carrying out its responsibilities under the [Act] and to the ability of [FCUs] to pay the fee.'' 1755(b). The NCUA Board's methodology for determining the aggregate amount of Operating Fees was discussed in a separate **Federal Register** publication.

[11] 12 U.S.C. 1783(a).

[12] The Act in 12 U.S.C. 1755(a) states, ''[i]n accordance with rules prescribed by the Board, each [federal credit union] shall pay to the [NCUA] an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.'' See also 12 U.S.C. 1766(j)(3).

[13] 5 U.S.C. 706(2).

[14] *See, e.g., Motor Vehicle Mfrs. Ass'n of United States, Inc.* v. *State Farm Mut. Automobile Ins. Co.,* 463 U.S. 29 (1983).

[15] *See, e.g., Barnhart* v. *Sigmon Coal Co.,* 534 U.S. 438, 450 ((2002).

[16] 12 U.S.C. 1781(b)(1), 1782(a)(5).

[17] *Id.*

[18] With respect to call reports and other ongoing reports submitted by federally insured credit unions, 12 U.S.C. 1782(a)(5) is also a cost savings provision but does not preclude allocating insurance-related costs of the applicable data collections to the Share Insurance Fund.

state-chartered credit unions to the benefit of federal credit unions.[19] However, the Board does not believe that either the current or the proposed OTR process discriminates against federally insured state-chartered credit unions or federal credit unions to the benefit of the other.

As background, all federally insured credit unions are subject to the same requirements for funding the Share Insurance Fund. Specifically, § 1782(c)(1)(A)(i) requires that ''[e]ach insured credit union shall pay to and maintain with the [Share Insurance Fund] a deposit in an amount equaling 1 per centum of the credit union's insured shares.'' Section 1782(c)(2)(A) requires that ''[e]ach insured credit union shall, at such times as the Board prescribes (but not more than twice in any calendar year), pay to the Fund a premium charge for insurance in an amount stated as a percentage of insured shares (which shall be the same for all insured credit unions).'' Thus, in funding the Share Insurance Fund, federal credit unions and federally insured state-chartered credit unions are not treated any differently. Similarly, the requisitions from the Share Insurance Fund used to fund the insurance-related expenses of NCUA's Operating Budget under § 1783(a) do not distinguish between federal credit unions and federally insured state-chartered credit unions.

As for the OTR methodology and whether it complies with § 1790, the OTR methodology only considers the type of activity (*i.e.* insurance-related or not) and treats the expenses related to that activity the same regardless of the type of charter to which the activity applies. Specifically, both the existing and proposed OTR methodologies provide that all insurance-related expenses are funded from the Share Insurance Fund, regardless of charter type.

The Act clearly permits expenses related to insurance to be funded by the Share Insurance Fund regardless of charter. Specifically, 12 U.S.C. 1783(a) expressly allows expenses ''incurred in carrying out the purposes of [Title II]'' to be allocated to the Share Insurance Fund. The costs NCUA incurs in safeguarding the Share Insurance Fund relate to the risks in federal credit unions and federally insured state-chartered credit unions. The Act provides the Board with a number of specific authorities that relate to costs NCUA incurs in carrying out its obligations under Title II. For instance, Title II of the Act authorizes the Board ''to appoint examiners who shall have the power, on its behalf, to examine any insured credit union . . . whenever in the judgment of the Board an examination is necessary to determine the condition of any such credit union for insurance purposes.'' [20] Further, Title II authorizes the Board to implement regulations applicable to all insured credit unions to address risk to the Share Insurance Fund. Title II states the Board may ''prescribe such rules and regulations as it may deem necessary and appropriate to carry out the provisions of this subchapter.'' [21] Title II also grants the Board the following additional authorities relevant to agency operating costs:

- ''Appoint such officers and employees as are not otherwise provided for in this chapter;'' [22]
- ''employ experts and consultants or organizations thereof;'' [23]
- ''prescribe the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed;'' [24]
- ''exercise all powers specifically granted by the provisions of this subchapter and such incidental powers as shall be necessary to carry out the power so granted;'' [25] and
- ''make examinations of and require information and reports from insured credit unions, as provided in this subchapter.'' [26]

The Board concludes that these authorities taken together provide NCUA as insurer with broad discretion to impose regulations on and examine all insured credit unions. In addition, the cost of the agency activities associated with exercising these and other accompanying authorities can properly be considered costs of carrying out Title II of the Act.[27]

Finally, a number of commenters argued that the OTR methodology and/or calculations either should or must go through full APA notice and comment rulemaking. The APA does not require notice and comment for the OTR methodology. The legal analysis of NCUA's Office of General Counsel on the applicability of the notice and comment provisions of the APA to the OTR methodology is summarized in the January 2016 OTR notice [28] and articulated more fully in a legal opinion posted on NCUA's Web site.[29] In soliciting comment on the OTR through the **Federal Register** NCUA has gone, and continues to go, beyond its APA obligations.

III. Current OTR Methodology and Process Comments and Responses

a. Formula Driven or Set at the Discretion of the Board

The majority of commenters expressed support for NCUA's continued use of a formula to determine the OTR. The Board agrees NCUA should continue to use a formula to determine the OTR. Use of a well-designed and comprehensive formula represents a good faith effort to consider all of the agency's costs relative to how NCUA is carrying out its various responsibilities. A formula also helps ensure costs assigned to the OTR relate to agency activities to carry out Title II responsibilities. NCUA's goal in using a formula-driven OTR methodology is to provide a comprehensive, fair, and equitable allocation of costs within a framework that can be administered at a relatively low cost. Though it is formula driven, the Board can adjust the methodology at any time to ensure it continues to reflect the most equitable and suitable approach to allocating costs.

However, five commenters favored setting the OTR at a fixed 50 percent of

[19] 12 U.S.C. 1790 (''It is not the purpose of this subchapter to discriminate in any manner against State-chartered credit unions and in favor of Federal credit unions, but it is the purpose of this subchapter to provide all credit unions with the same opportunity to obtain and enjoy the benefits of this subchapter.'').

[20] 12 U.S.C. 1784(a).

[21] 12 U.S.C. 1789(a)(11).

[22] 12 U.S.C. 1789(a)(4).

[23] 12 U.S.C. 1789(a)(5).

[24] 12 U.S.C. 1789(a)(6).

[25] 12 U.S.C. 1789(a)(7).

[26] 12 U.S.C. 1789(a)(8).

[27] For example, Title II specifically addresses a broad range of standards for all insured credit unions, including standards for insurance against burglary and defalcation, loss reserve requirements, investment limitations, ongoing reporting requirements (such as the Call Report), independent audits, accounting principles, national flood insurance program requirements, liquidity capacity, unsafe and unsound conditions or practices, security standards, recordkeeping, monetary transaction and recordkeeping and reporting, benefits to institution affiliated parties, capital standards, and approval of officials.

[28] 81 FR 4804 (Jan. 27, 2016) (''Since its inception, NCUA has taken the position that the OTR is not a legislative rule under the Administrative Procedure Act (APA) and is, therefore, exempt from notice and comment rulemaking processes. [ ] As such, NCUA has never used notice and comment rulemaking to establish either an individual determination of the OTR or the general methodology used to calculate the OTR. However, the OTR has been explained, discussed, and reviewed in various public records, including in annual Board Action Memorandums related to budget matters, independent evaluations, and other documents available in public records and on NCUA's Web site.[ ] Beyond its APA obligations, the Board has chosen to solicit public comments on the OTR processes and methodologies through this **Federal Register** publication.'').

[29] NCUA's legal analysis with respect to the OTR and APA process is available at the following Web page: *https://www.ncua.gov/Legal/Documents/Opinion/OL2015-0818.pdf.*

the Operating Budget. Commenters that supported setting the OTR at 50 percent indicated that it is easily understandable, more in line with the dual functions of NCUA as regulator and insurer, and that the OTR was set at 50 percent for many years. The Board does not believe it is transparent or appropriate to set the OTR at any level, such as the 50 percent recommended by commenters, without a reasoned basis to demonstrate that level of agency operating costs are properly allocated to Title II activities.[30] However, the Board agrees that the OTR methodology can be simplified and maintain a sufficient degree of comprehensiveness to ensure it is equitable. Such a simplification should improve understanding of the OTR and reduce administrative costs. For a discussion of how the Board proposes to simplify the OTR methodology, see section IV.

b. Delegation of the OTR Calculation to NCUA Staff

Ten commenters objected to the Board's delegation of the OTR calculation to NCUA staff. They argued that by doing so the Board abdicated its oversight and discretion over the OTR and that it will result in reduced transparency. During the November 29, 2015, Board meeting, the Board approved the delegation of authority to administer the Board approved OTR methodology to the Director of the Office of Examination and Insurance (E&I).[31]

Delegating the ministerial application of the Board approved OTR methodology does not mean the Board has abdicated its oversight and discretion for the OTR. With limited exceptions not at play here, the Act permits the Board to ''delegate to any officer or employee of the Administration such of its functions as it deems appropriate.'' [32] Further, the current delegation to staff to administer the OTR does not provide staff with the power to change the methodology for calculating the OTR. Rather it mirrors the typical organizational separation of duties where the board sets policy and staff implements the policy. The Board retains approval authority over the methodology that is used to calculate the OTR; only the Board can change the OTR methodology or use its discretion to change the OTR from the calculated result if circumstances so warranted. However, having the OTR set by a Board approved formula, instead of an explicit Board vote each year, helps avoid any perception that the agency would casually override the calculation in setting the OTR. At any time, any Board member may request a Board vote be scheduled to change the OTR methodology, or to change the OTR from the calculated result.

The delegation has not resulted in a reduction in transparency. As was done prior to the delegation, each year staff submits a report to the Board on the results of the calculation and conducts a briefing at a public Board meeting. The materials supporting the OTR calculation and the result are provided as part of the public Board briefing and posted on the agency's Web site. The Board intends for this public reporting to continue. Further, the Board is committed to soliciting public input at least every three years on the OTR methodology, and any time a change to the methodology is considered.

c. Transparency

Nine commenters stated that the current OTR methodology is not sufficiently transparent. NCUA has made various efforts over the years to be transparent with respect to the OTR, and recently published extensive information about the OTR. The setting of the OTR has been briefed and acted on each year at a public Board meeting. The associated Board Action Memorandums, which are public records, fully detailed the calculation and included supporting materials. The current methodology was extensively reviewed at a public Board meeting when adopted in 2003. All related materials have been made a matter of public record and posted on NCUA's Web site. Numerous analyses, independent evaluations, and other documents are available in public records and on NCUA's Web site. To improve transparency further, the agency organized and posted a variety of new and historical materials on its Web site in 2015.[33] Additionally, the January 27, 2016, request for comment regarding the OTR methodology provided detailed explanations for the processes and methodology related to calculating the OTR. Although all information related to the OTR calculation is publicly available already, the Board acknowledges that an obstacle to transparency is the complexity of the methodology itself. In an effort to address the transparency concern, the Board is considering simplifying the OTR methodology. While still formula driven, the proposed changes to the methodology would provide for a simpler approach that remains comprehensive, fair, and equitable. The proposed changes to the methodology are described in detail in section IV of this document.

d. Definition of Insurance-Related Activities

NCUA's definition of insurance-related activities received the most comments. Of the 36 commenters on this topic, most disagree with the definition NCUA uses for insurance-related activities. Many commenters objected to equating ''safety and soundness'' with ''insurance-related,'' with some arguing that the charterer/prudential regulator cares about safety and soundness and it is therefore not the sole domain of the insurer. Commenters asserted the definition assumes that NCUA has no safety and soundness oversight in its role as regulator and charterer of federal credit unions. By doing so, commenters claim NCUA is shifting expenses that should fall under the operating fee paid by federal credit unions to the Share Insurance Fund.

NCUA recognizes the historical role of a charterer/prudential regulator involves enforcing laws and implementing public policy. Before the advent of federal deposit insurance, federal financial institution regulators were concerned with protecting the stability of the financial system by ''regulating'' it. Thus, financial institution examinations focused on ensuring (1) statutes and regulations were followed to protect consumers, and (2) institutions were viable to protect consumer deposits, preserve access to financial services, and safeguard the stability of the economy. Though not responsible for the financial liability that comes with the role of insurer, prudential regulators are concerned with potential threats to the viability of their financial institutions to protect consumers and their jurisdiction's economy. This focus on viability benefits the insurer, whose primary role is to protect depositors and the taxpayer and contribute to the stability of the financial system.

NCUA has a unique dual role in that it serves as both the regulator of federal credit unions and the insurer of all federally insured credit unions.[34]

[34] The Office of the Comptroller of the Currency (OCC) charters, regulates, and supervises all national banks and federal savings associations as well as federal branches and agencies of foreign banks. On its Web site, the OCC lists its mission as ensuring that national banks and federal savings

Continued

Congress established the Share Insurance Fund and assigned its administration to the Board.[35] This arrangement has a variety of benefits. A regulator/supervisor with insurance responsibility creates a strong alignment of incentives in preserving safety and soundness, thereby managing risk to the Share Insurance Fund. The appropriate combination of functions reduces the likelihood that a regulator would act without adequate regard for the insurance implications. It also generally avoids additional and duplicative oversight costs, and the corresponding burden on insured institutions of separate requirements and supervision from a different regulator and insurer.

Given its multiple roles, NCUA appropriately allocates costs associated with activities connected to each role. Various provisions of the Act, as noted earlier, govern or inform this allocation. Thus, NCUA currently categorizes those activities designed to manage risk to the Share Insurance Fund as ''insurance-related.'' This includes activities designed to enforce regulations NCUA adopts to carry out the purpose of Title II (Share Insurance) as well as related examination and supervision activities.[36] NCUA's categorization focuses on the primary motivation for the regulation or examination and supervision activity. The motivation for insurance-related regulations and examination activities is based on the nature of the threat to the viability of the institution, and therefore potential losses to the Share Insurance Fund. The insurance-related definition excludes procedures that assess compliance with other regulations. Consumer protection and other laws and regulations (such as field of membership rules) designed to otherwise govern how credit unions operate, and related examination activities, are not primarily intended to reduce the potential for losses to the Share Insurance Fund. Moreover, while systemic and egregious violations of such laws could result in material fines to the institution, such occasions are very infrequent and rarely result in the failure of the institution or losses to the Share Insurance Fund.

Thus, NCUA currently allocates costs associated with regulating and examining the safety and soundness of insured institutions as insurance-related. Worthy of note, Congress uses ''safety and soundness'' and related terminology in the Act.[37] There are two subjects in Title I containing safety and soundness terminology: the interest rate ceiling for federal credit unions (12 U.S.C. 1757(5)(A)(vi)(I)) and provisions regarding multiple common bond groups (12 U.S.C. 1759(d) and 12 U.S.C. 1759(f)). The current safety and soundness language applying to these two subjects in Title I was added after Title II was enacted. There are 19 references to safety and soundness in Title II. These provisions cover a range of subjects.[38] In particular, NCUA's various enforcement authorities for violations of laws or regulations and unsafe or unsound conditions or practices are contained in Title II. Thus, most of Congress' focus on safety and soundness in the Act is in the context of share insurance.

However, NCUA acknowledges that safety and soundness is not the sole domain of the insurer; prudential regulators have various responsibilities with respect to the ''safety and soundness'' of institutions they oversee. In some respects this is recognized in the current OTR formula through the ''Imputed SSA Value.'' To better reflect that the prudential regulator and insurer both have responsibilities for safety and soundness, the Board is considering adjusting the OTR methodology so safety and soundness is not accounted for as the primary domain of the insurer. For more information on the proposed change to the OTR methodology, see section IV.

One commenter stated that routine examinations of all insured credit unions should be paid through Operating Fees. Another commenter asserted that the OTR should only be used for examinations of federally insured state-chartered credit unions and examinations of troubled federal credit unions. These recommendations assume that as insurer, NCUA takes only a reactive approach to managing risk to the Share Insurance Fund.

The Board notes that NCUA's role as insurer is best fulfilled by a proactive approach to preventing losses, not just addressing troubled or failed institutions. Since the implementation of federal share insurance in 1970, the Board has instituted a more proactive examination and supervision program geared toward safety and soundness to better manage risk to the Share Insurance Fund. Additionally, as credit unions have become larger and more complex, the risks to the Share Insurance Fund have changed, with NCUA making corresponding adaptions to its operations. In 2002, the Board strengthened its commitment to fulfilling NCUA's role as insurer by implementing the Risk-Focused Examination Program. As recently as 2016, the Board made the examination program even more risk-based by adopting an extended examination cycle for healthy, well-run credit unions. These programs base examination scope and timing largely on the risks an institution poses to the Share Insurance Fund. Further, the objective of the risk-focused examination is to enable NCUA to identify and address risks before they become a major problem. All of these changes have resulted in an increase in the agency's insurance-related activities.

The Act and NCUA Regulations have also evolved, resulting in more emphasis on safeguarding the Share Insurance Fund. For example:

1. The Credit Union Membership Access Act was enacted into law in 1998.[39] This law resulted in new obligations on credit unions and NCUA, such as prompt corrective action, designed to protect the Share Insurance Fund.

associations operate in a safe and sound manner, provide fair access to financial services, treat customers fairly, and comply with applicable laws and regulations. Similarly, the Board of Governors of the Federal Reserve System has supervisory and regulatory authority over a wide range of financial institutions, including state-chartered banks that are members of the Federal Reserve System, bank holding companies, thrift holding companies and foreign banking organizations that have a branch, agency, a commercial lending company subsidiary or a bank subsidiary in the United States. On its Web site, the Federal Reserve states its mission is to provide the nation with a safer, more flexible, and more stable monetary and financial system. One of its four stated general duties is supervising and regulating banking institutions to ensure the safety and soundness of the nation's banking and financial system and to protect the credit rights of consumers. On its Web site, the Federal Deposit Insurance Corporation states its mission is to maintain stability and public confidence in the nation's financial system by insuring deposits, examining and supervising financial institutions for safety and soundness and consumer protection, making large and complex financial institutions resolvable, and managing receiverships.

[35] 12 U.S.C. 1782, 1783.

[36] As noted in the Legal Authority section, NCUA has the authority to promulgate rules and regulations to carry out the purpose of Title II—Share Insurance. Accordingly, the NCUA Board has approved rules and regulations that specifically address credit union activities that pose risk to the Share Insurance Fund. NCUA has mapped all examination related rules and regulations to one of two categories: insurance regulatory related, or non-insurance or consumer regulatory related. This regulatory mapping provides the basis for determining how examination time is reported for use in the current OTR methodology. The mapping is discussed in detail in the 2013 independent study by PwC and in NCUA's January 2016 request for comment.

[37] ''Safe and sound,'' ''safety and soundness,'' and ''unsafe or unsound'' are the terminology encompassing safety and soundness found in the Act.

[38] See 12 U.S.C. 1781(c)(2), 1782(a)(6)(B), 1786(b), 1786(e), 1786(f), 1786(g), 1786(k)(2), 1786(r), 1786(s), and 1790d(h).

[39] Information about the Credit Union Membership Access Act is contained within NCUA Letter to Credit Unions 98–CU–16 located at the following web address: *https://www.ncua.gov/Resources/Documents/LCU1998-16.pdf.*

2. During the aftermath of the financial crisis, the Board strengthened critical safety and soundness rules, such as interest rate risk and liquidity management standards.

3. NCUA also has been providing regulatory relief. New authorities and less prescriptive, more principles-based rules have helped to reduce compliance burdens and provide credit unions with more authority to serve members and manage risk. They result in examiners devoting more time to ensuring safety and soundness through the examination process rather than relying on regulatory limits.

Under this proactive approach, the Board's primary motivation for many of the agency's current regulations and the majority of the examination program is to manage risk to the Share Insurance Fund.

The Board acknowledges there is not always a clear separation between the role of a prudential regulator concerned with enforcing laws and implementing public policy and that of an insurer. For example, NCUA relies, to the extent feasible, on the examination work performed by state regulators to manage risk to the Share Insurance Fund posed by federally insured state-chartered credit unions. This results in some cost savings in the NCUA Operating Budget. Since 2004, the value of the insurance-related work conducted by state regulators and relied on by NCUA has been reflected in the OTR methodology as the ''Imputed SSA Value.'' To ensure equitable treatment, the Imputed SSA Value is calculated on the same cost basis as if NCUA had to conduct the work itself.[40] The current methodology applies the same approach and definition of insurance-related examination activities to examinations of federally insured state-chartered credit unions as for federal credit unions. The Imputed SSA Value has the effect of reducing the OTR, thereby taking into account the fact that all insured credit unions benefit from the insurance-related examination costs of state regulators borne by state-chartered credit unions.

The Board recognizes that another plausible approach to accounting for the related missions of charterer/prudential regulator and insurer is to employ an alternating or partnership framework within the OTR methodology. This would simplify the OTR methodology and avoid having to delineate safety and soundness as the primary domain of the insurer. The concept of an alternating or partnership framework being applied to the OTR methodology is described in detail in section IV of this document.

e. State Regulator Costs

Some commenters asserted that because NCUA equates safety and soundness with insurance-related activities, the OTR methodology is not fair and equitable as state regulators also examine federally insured state-chartered credit unions for safety and soundness. As a result, some commenters contended federally insured state-chartered credit unions are charged twice for safety and soundness examinations; once by their state regulator via an operating fee and then by NCUA via the OTR. Further, some commenters claimed that federally insured state-chartered credit unions are disadvantaged when the OTR rises due to increased NCUA examination time allocated to insurance, because the NCUA operating fee paid by federal credit unions declines.

NCUA appreciates the work state regulators do in contributing to the safety and soundness of the credit union system. The agency will continue to partner and coordinate closely with state regulators in this regard. It is important to note that ultimately NCUA is accountable for carrying out the purpose of Title II of the Act and managing risk to the Share Insurance Fund. The extent state regulators examine for safety and soundness is the choice of state governments. This choice, along with the adequacy of the examination, affects the extent to which it is feasible for NCUA to rely on these examination reports to meet its Title II responsibilities. State governments also choose the extent to which they rely on the work of NCUA in its role as insurer to reduce overall state costs and burden.

State-chartered credit unions are not charged twice as a result of state regulators also examining for safety and soundness. The extent to which state regulators examine for safety and soundness in a manner that can be relied on by NCUA reduces the overall agency costs to which the OTR is applied, benefiting all insured credit unions. Conversely, NCUA's involvement in developing reporting and examination systems for all insured credit unions, publishing guidance, training and equipping most state examiners, and participating in the examination of federally insured state-chartered credit unions reduces overall state regulator costs.[41] As discussed above, the current OTR methodology takes into account via the Imputed SSA Value the insurance-related work conducted by state regulators and relied on by NCUA. In addition, the Imputed SSA Value is calculated using the same examination time allocation for federal credit unions. Thus, when more of the agency's examination time is dedicated to insurance-related areas, the Imputed SSA Value also increases. The Imputed SSA Value has the effect of reducing the OTR (and conversely increasing the operating fee paid by federal credit unions) to the benefit of state-chartered credit unions. This provision helps ensure the current OTR methodology is fair and equitable.[42]

Some commenters suggested that if the OTR continued to define all safety and soundness activities as insurance-related, NCUA should use each state regulator's actual costs instead of an imputed value. Others argued NCUA should pay the state governments for their actual costs instead of merely reducing the OTR.

NCUA notes that it is neither feasible nor appropriate to use the actual state regulator costs in determining the OTR. To ensure the methodology is fair and equitable across all federally insured institutions, the Imputed SSA Value is intentionally designed to reflect the replacement cost to NCUA if the agency had to do the insurance-related work it relies on the state regulators to conduct. The cost structure for state regulators can vary widely and include non-germane and potentially inordinate costs. Also, it is not feasible to obtain reliable and comprehensive information

[40] The Imputed SSA Value for 2017 is $50.8 million.

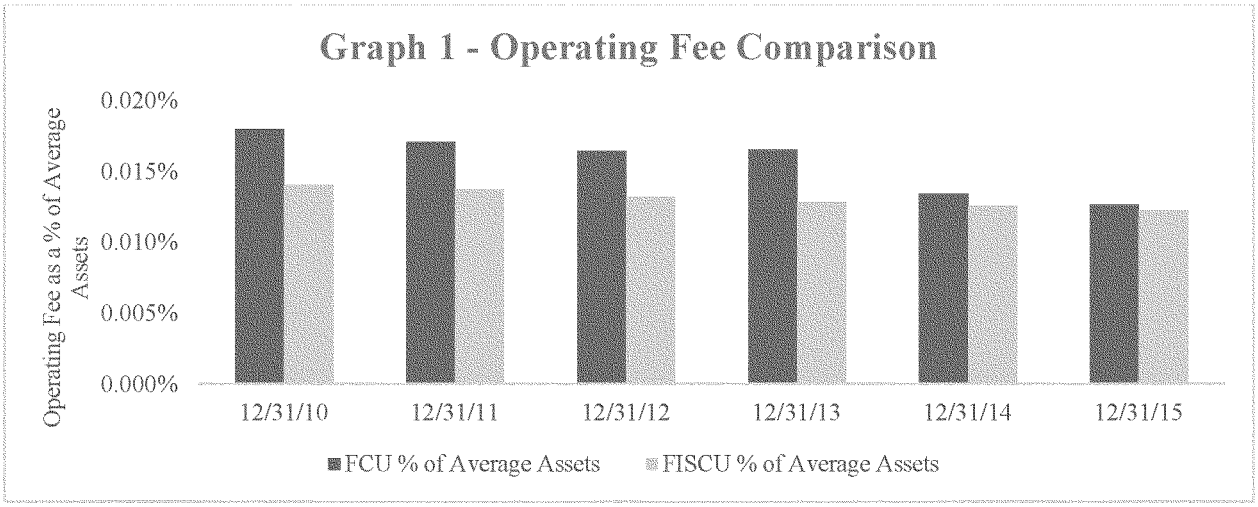
[41] NCUA budgeted to spend over 150,000 hours participating in the examination and supervision of federally insured state-chartered credit unions in 2017. To conduct this additional work would require state regulators to add an estimated 175 staff at a cost of up to $35 million. Most state regulators participate in NCUA's examiner training programs, use the agency's examination and Call Report systems, and benefit from the agency's exam techniques and supervisory guidance. State regulators would have to individually or collectively develop and administer these functions and systems if NCUA did not provide them. For context, NCUA's 2017 budget included the following for units associated with these functions and systems: $10.5 million for the Division of Training and Development; $16.4 million for the Office of the Chief Information Officer's information technology operations; and $12.3 million for the Office of Examination and Insurance. Also, NCUA's 2017 capital budget includes $10.4 million to support the Enterprise System Modernization program; much of this program involves modernization of systems that directly or indirectly support supervising credit unions. Additionally, in 2017 NCUA budgeted $1.4 million for training of state examiners and $162,480 in computer lease expense for equipment provided to state regulators.

[42] Overhead Transfer Rate Review, PriceWaterhouseCoopers, Section 1.4.3 (January 20, 2011) (Based on PwC's review, there was no reasonable basis to conclude that the OTR methodology ex-ante and for reasons beyond the control of credit unions, favours or disadvantages any one type of credit unions (*i.e.* federal versus state chartered) over another.)

about the relevant cost of each state regulator. NCUA has no authority to compel states to provide this information, nor to maintain records in such a way as to ensure proper allocation of germane costs.

As part of the process of evaluating the suggestion to use actual state regulator costs, NCUA attempted to obtain and review the costs of state regulators and their methodologies for annual and/or examination fees for state-chartered credit unions. This included determining how costs are allocated to the credit union specific activities for state regulators housed within state offices with broader responsibilities.[43] NCUA staff first reviewed publicly available information with limited success. NCUA also sent letters to the state regulators to request details on fee structures, costs, and allocation factors for credit union specific activities. The information request did not result in sufficiently comprehensive information upon which to draw any reliable conclusions.[44]

Based on Call Report data, NCUA did compare the total Operating Fees as a percent of average assets paid by federal credit unions to those reported by federally insured state-chartered credit unions. Though this comparison has some limitations, the trends in Graph 1 below show that Operating Fees recorded by federal credit unions and federally insured state-chartered credit unions are comparable in aggregate.



Further, federal credit unions continue to bear the majority of NCUA's operating costs. For NCUA's 2017 Operating Budget, federal credit unions cover 67 percent of the total Operating Budget through the operating fee and their proportional share of the OTR.

f. Regulation Mapping[45]

NCUA has mapped all examination-related rules and regulations to one of two categories: Insurance regulatory related, or non-insurance and consumer regulatory related. A third party has reviewed the regulatory mapping.[46] NCUA reviews the regulatory mapping prior to the beginning of each examination time survey cycle for any necessary updates.[47] A detailed review was completed again for 2017 that resulted in minor adjustments to classifications. For the full regulatory mapping, see the 2017 Mapping of NCUA Rules and Regulations document posted on NCUA's public Web site at *https://www.ncua.gov/About/Documents/mapping-ncua-regulations-2017.pdf.*

Since NCUA equates safety and soundness with the term insurance-related in the current OTR methodology, commenters argued that the mapping of NCUA's rules and regulations is faulty. Some commenters asserted that classifying NCUA rules as insurance-related is flawed because NCUA as charterer/prudential regulator is charged with ensuring compliance with all the provisions contained within the rules and regulations.

As noted in the Legal Analysis section above, the Board has the authority to promulgate rules and regulations to carry out the provisions of Title II (Share Insurance) of the Act, as well as examine credit unions for share insurance purposes.[48] Accordingly, the Board has approved rules and regulations that specifically address safety and soundness with the intent to protect the Share Insurance Fund. As such, the current OTR methodology accounts for examination and supervision activities for insurance-related regulations as an insurance cost.

As noted above, the Board recognizes that another plausible approach to accounting for the related missions of charterer/prudential regulator and insurer is to employ an alternating or partnership framework within the OTR methodology. This would simplify the OTR methodology in part by avoiding having to map regulations to a specific role as it relates to federal credit unions. The concept of an alternating or partnership framework being applied to

[43] Based on the responses received from the state regulators, many state credit union programs are divisions contained within a larger office with funds co-mingled with other programs. The state regulators that responded and that do not separate funds for credit unions from other financial institutions supervised generally either do not allocate expenses or did not provide their allocation methodology.

[44] In total, 27 state regulators responded to varying degrees. These state regulators provided as much of the requested information as they could, given limitations they faced.

[45] As part of the current OTR methodology, the agency maps NCUA examination activities related to specific regulations based on the primary purpose of the regulation—whether it is for carrying out the purpose of Title II (insurance-related) or part of NCUA's responsibility as charterer or prudential regulator. For details regarding the regulation mapping, see Appendix A of the January 27, 2016 request for comment.

[46] PwC National Credit Union Administration (NCUA) Analysis of Examination Time Survey (ETS) Modifications—October 2, 2013: *https://www.ncua.gov/About/Documents/Budget/2013/2013ETSAnalysis.pdf.*

[47] The examiner time survey is performed annually and is used to determine the percentage of the workload budget relates to regulatory and insurance-related tasks for federal examinations and supervision contacts.

[48] 12 U.S.C. 1789(a).

the OTR methodology is described in detail in section IV of this document.

g. Other Methodological Aspects of the OTR

NCUA received 23 comments suggesting various other changes to the current OTR process. The areas of the calculation receiving comments were the examiner time survey, the allocation factors for various NCUA central offices, and the use of insured shares in the calculation.

• Examiner time survey: [49] Commenters generally agreed with using a time survey in allocating the cost of federal credit union examination and supervision. However, some commenters suggested NCUA conduct a time survey during all examinations and supervision contacts instead of on a statistically valid sample basis. Some commenters suggested having state regulators complete the examiner time survey as well.

It is not necessary to have 100 percent coverage of all examination and supervision contacts to form a statistically valid basis for the survey. A complete census of all federal credit union examinations and supervision contacts would result in additional agency costs—all staff would have to be trained annually and all examinations and supervision contact hours would need to be increased for the time necessary to complete the survey.[50] Moreover, the survey is not pertinent to NCUA's work in federally insured state-chartered credit unions given NCUA is only functioning in its capacity as insurer.[51] The benefits of any small increases in precision would be outweighed by the corresponding costs. With respect to state regulator examinations, the agency has no authority to require state regulators to complete a time survey, and it would be challenging to ensure uniformity in how their time is reported. The proposed changes to the OTR methodology discussed in section IV would eliminate the need for an examiner time survey, resulting in additional cost savings.[52]

• Allocation factors for various NCUA central offices: Some commenters stated the allocation of costs for NCUA's non-field offices are not based on standard or consistent criteria. Overall, NCUA agrees that improvements can be made in allocation methods involving the non-field cost centers, and is addressing this in the proposed changes to the OTR methodology. Some noted that the Office of National Examinations and Supervision (ONES) costs cannot be 100 percent safety and soundness as it examines natural person credit unions with assets over $10 billion and, therefore, has regulatory responsibility. Other commenters noted ONES is also responsible for reviewing Bank Secrecy Act compliance for the corporate credit unions it supervises, suggesting some non-insurance time is spent supervising them. NCUA agrees that ONES time is not 100 percent insurance related and this issue was addressed in the 2017 OTR calculation. Other commenters questioned why the Office of Small Credit Union Initiatives and the Office of Consumer Financial Protection and Access vary in their methodology for classifying time spent on field of membership expansion. NCUA agrees that there are differences in the time allocations and has developed a consistent standard for use in the proposed changes to the OTR methodology discussed in section IV.

• *Use of Insured Shares:* Two commenters recommended not using insured shares in the calculation of the OTR. The commenters suggested that time and resources spent in each charter type would be more appropriate. In developing the revised OTR methodology in 2003, one of the main goals of NCUA was to allocate costs as precisely as possible. For the current OTR methodology, it is necessary and appropriate to incorporate insured shares to ensure it is precise and equitable. Use of insured shares is consistent with the mutual nature of the Share Insurance Fund and part of the statutory scheme related to Share Insurance Fund deposits, premiums and dividends.[53] It also reflects the fundamental economics with respect to how the implicit costs of the OTR are borne by federal and state-chartered credit unions. Nevertheless, there are reasonable alternative approaches to calculating the OTR that do not involve use of insured shares. As discussed in section IV, the proposed changes to the OTR method eliminate the need for use of insured shares in the calculation.

IV. Details of Proposed OTR Methodology

The proposed simplification of the OTR formula is intended to facilitate greater understanding of the methodology, and will decrease the agency resources necessary to administer the OTR. The new approach is within NCUA's authority and, though simplified, would provide a sufficient level of precision with respect to the allocation of agency costs. The simplified formula applies the following underlying principles to the allocation of agency operating costs:

1. Time spent examining and supervising federal credit unions is allocated as 50 percent insurance related. The 50 percent allocation mathematically emulates an examination and supervision program design where NCUA would alternate examinations, and/or conduct joint examinations, between its insurance function and its prudential regulator function if they were separate units within NCUA. It reflects an equal sharing of supervisory responsibilities between NCUA's dual roles as charterer/prudential regulator and insurer given both roles have a vested interest in the safety and soundness of federal credit unions.[54] It is consistent with the alternating examinations FDIC and state regulators conduct for insured state-chartered banks as mandated by Congress. Further, it reflects that NCUA is responsible for managing risk to the Share Insurance Fund and therefore should not rely solely on examinations and supervision conducted by the prudential regulator.

2. All time and costs NCUA spends supervising or evaluating the risks posed by federally insured state-chartered credit unions or other entities NCUA does not charter or regulate (for example, third-party vendors and CUSOs) is allocated as 100 percent insurance related. NCUA does not charter state-chartered credit unions nor

[49] The current examiner time survey is discussed in detail in the Request for Comment Regarding Overhead Transfer Rate Methodology published in the **Federal Register** on January 27, 2016.

[50] Completing examination time surveys increases the time spent on each examination and supervision contact by an average of one hour. This equates to about 6,000 hours if survey data was collected at every onsite examination and supervision contact. Additionally, annual training would be required for all examiners and supervisory examiners. This would increase training hours for field staff by about 700 hours. The total additional time would be about 6,700 hours, approximately 6 additional employees.

[51] As required by law, NCUA does review compliance with the Bank Secrecy Act and the Flood Disaster Protection Act when it conducts an examination of a federally insured state-chartered credit union and the state regulator has chosen not to conduct the review. These situations are limited and the time associated with this activity would have an indiscernible effect on the OTR.

[52] Based on the most recent Examination Time Survey results, field staff time would be reduced by approximately 200 hours annually. Central office and regional office staff time devoted to operating, maintaining, and administering the Examination Time Survey and related processes would be reduced by approximately 150 hours annually.

[53] 12 U.S.C. 1782(c)(2) and (3).

[54] The insurer may evaluate compliance matters as part of a reciprocal arrangement with the prudential regulator in evaluating matters specific to insurance as part of the overall shared supervision of a credit union. A simplified assumption of equal sharing reflects the offsetting benefits for each role under a framework emulating an alternating examination program.

serve as their prudential regulator. NCUA's role with respect to federally insured state-chartered credit unions is as insurer. Therefore, all examination and supervision work and other agency costs attributable to insured state-chartered credit unions is allocated as 100 percent insurance related.

3. Time and costs related to NCUA's role as charterer and enforcer of consumer protection and other non-insurance based laws governing the operation of credit unions (like field of membership requirements) are allocated as 0 percent insurance related.[55] As the federal agency with the responsibility to charter federal credit unions and enforce non-insurance related laws governing how credit unions operate in the marketplace, NCUA resources allocated to these functions are properly assigned to its role as charterer/prudential regulator.

4. Time and costs related to NCUA's role in administering federal share insurance and the Share Insurance Fund are allocated as 100 percent insurance related. NCUA conducts liquidations of credit unions, insured share payouts, and other resolution activities in its role as insurer. Also, activities related to share insurance, such as answering consumer inquiries about insurance coverage, are a function of NCUA's role as insurer.

These four principles are applied to the activities and costs of the agency to arrive at the portion of the agency's Operating Budget to be charged to the Share Insurance Fund as discussed in detail below.

Step 1—Workload Program

Annually, NCUA develops a workload budget based on NCUA's examination and supervision program to carry out the agency's core mission. The workload budget reflects the amount of time necessary to examine and supervise federally insured credit unions, along with other related activities, and therefore the level of field staff needed to implement the exam program. Applying principles 1, 2, and 3 (those relevant to the workload budget) to the applicable elements of the workload budget results in a composite rate that reflects the portion of the agency's overall mission program activities that are insurance related. For illustrative purposes, Table 1 shows the application of the allocation principles to the 2017 workload budget.[56]

TABLE 1—ALLOCATION OF WORKLOAD HOURS[57]

Workload programs 2017 data	Budgeted workload hours (A)	Percent insurance related (B)	Insurance-related workload hours (A) × (B)	Allocation basis
Federal Credit Union Examination & Supervision.	498,159	50	249,080	Based on allocation principle 1 reflecting NCUA's roles as both prudential regulator and insurer.
State Credit Union Examination & Supervision.	167,414	100	167,414	Based on allocation principle 2 reflecting NCUA's role as insurer.
Consumer Compliance Reviews & Related Training.	20,000	0	0	Based on allocation principle 3 reflecting NCUA's role as prudential regulator.
Field of Membership & Chartering	500	0	0	Based on allocation principle 3 reflecting NCUA's role as prudential regulator.
CUSO & Third-party Vendor Reviews	5,576	100	5,576	Based on allocation principle 2 reflecting NCUA's role as insurer. Field staff time conducting reviews of CUSOs and third-party vendors—NCUA does not charter or regulate CUSOs and third-party vendors.
Total	691,649	N/A	422,070	
Total Insurance-Related Workload Hours to Total Workload Hours.			61%	Weighted average of field staff program time devoted to NCUA's role as insurer.

Step 2—Operating Budget

The Operating Budget represents the costs of the activities associated with achieving the strategic goals and objectives set forth in the NCUA Strategic Plan. The Operating Budget is based on agency priorities and initiatives that drive resulting resource needs and allocations. Information related to NCUA's budget process, including detailed information on the Board-approved 2017 Operating Budget, is available on the agency's Web site.[58]

The agency achieves its primary mission through the examination and supervision program. For the proposed formula, as applied to the 2017 Operating Budget, the percentage of insurance-related workload hours (61 percent) derived from Step 1 represents the main allocation factor used in Step 2 for the costs of the field offices (the Regions and ONES). A few agency offices have roles that are significantly distinct enough to warrant their own allocation factors, as discussed below. A weighted average allocation factor (60 percent) representing the aggregate budgets for the Regions, Ones, and the specific agency offices listed in Step 2 is applied to the central offices that design or oversee the examination and supervision program, or support the agency's overall operations. These costs in total make up NCUA's Operating Budget. Table 2 reflects the application

[55] This includes any reviews of credit unions focused solely on compliance, such as a fair lending exam. It does not include the more broadly based examinations and supervision contacts of federal credit unions covered by principle 1. It also does not include enforcing laws, like Prompt Corrective Action, that are part of share insurance under Title II as covered by principle 4.

[56] If the proposed change to the methodology is adopted by the Board, the calculation would apply to future workload and operating budgets. Thus, actual results may vary from those presented herein for illustrative purposes.

[57] Numbers may not reconcile exactly due to rounding.

[58] *https://www.ncua.gov/About/Pages/budget-strategic-planning/supplementary-materials.aspx.*

of the OTR allocation factors to the 2017 Operating Budget as an example.

TABLE 2—ALLOCATION OF NCUA OPERATING BUDGET [59]

Cost area (2017 data)	Operating budget $ millions (A)	Percent insurance related (B)	Operating cost to be borne by the share insurance fund $ millions (A) × (B)
Regions and ONES: The financial budget for the agency's five regional offices and ONES is allocated based on the weighted average of insurance-related activities calculated from the workload budget in Step 1 (using principles 1, 2, and 3). Resources in the regions and ONES execute NCUA's examination program. Thus, the budgeted costs related to these programs should receive the same allocation basis as the programs themselves	170.9	61	104.3
Asset Management Assistance Center: Manages liquidation payouts and assets acquired from liquidations on behalf of the Share Insurance Fund. Thus, the OTR allocation factor is based on principle 4 and allocated at 100 percent insurance related	7.4	100	7.4
Office of Consumer Financial Protection and Access Largely in NCUA's role as charterer and prudential regulator, this office is responsible for chartering and field-of-membership matters, low-income designations, bylaw amendments, consumer financial literacy efforts, consumer inquiries and complaints, consumer protection compliance, fair lending examinations, and related interagency coordination. These activities are allocated based on principle 3 as 0 percent insurance related. The office does some work with respect to federally insured state-chartered credit unions, including share insurance coverage matters, in NCUA's role as insurer; these activities are allocated based on principle 4 as 100 percent insurance related. The net of this combined activity results in an allocation factor of 13 percent insurance related. See discussion below for more details	9.9	13	1.3
Office of Small Credit Union Initiatives: Provides consulting and training services for small credit unions, both federal credit unions and federally insured state-chartered credit unions. Also processes grants and loans for federally insured credit unions. Principle 1 is applied to the office's work with federal credit unions and principle 2 is applied to the office's work with federally insured state-chartered credit unions. The net of this combined activity results in an allocation factor of 60 percent insurance related. See discussion below for more details	6.5	60	3.9
Subtotal: The 60 percent subtotal factor represents the dollar-weighted average of the above four cost centers (Regions and Ones, Asset Management Assistance Center, Office of Consumer Financial Protection and Access, and Office of Small Credit Union Initiatives) representing specific aspects of NCUA's mission	194.6	60	116.8
All Other Offices: This category includes the offices that design or oversee the agency's mission and its related offices, or provide necessary support to mission offices or the entire agency. As such, the proportion of insurance-related activities for these offices correspond to that of the mission offices. Therefore, these office costs are allocated based on the weighted average of insurance-related activities calculated in the subtotal above	103.6	60	62.2
Total	298.2	.....	179.0

Regional Offices and ONES

The financial budget for the agency's five regional offices and ONES is allocated based on the weighted average of non-insurance and insurance-related activities calculated in Step 1. The Regions and ONES execute NCUA's examination programs; thus, the budgeted costs related to these offices should receive the same allocation basis as the programs themselves. The allocation factor is based on principles 1, 2, and 3 as documented in Table 1. The budget for the regional offices and ONES is allocated at 61.0 percent for insurance-related activities.

Asset Management Assistance Center

NCUA conducts credit union liquidations and performs management and recovery of assets through the Asset Management and Assistance Center. The Asset Management Assistance Center assists NCUA regional offices with the review of large, complex loan portfolios and actual or potential bond claims. It also participates extensively in the operational phases of conservatorships and records reconstruction. The purpose of the Asset Management Assistance Center is to manage and reduce costs to the Share Insurance Fund and credit union members of credit union failures. Thus, OTR allocation is based on principle 4 at 100 percent insurance related.

Office of Consumer Financial Protection and Access

This division is responsible for NCUA's consumer financial literacy efforts, consumer inquiries and complaints, consumer protection compliance and rulemaking, fair lending examinations, interagency coordination and outreach, chartering and field-of-membership matters, low-income designations, charter conversions, and bylaw amendments. The majority of the work performed by the Office of Consumer Financial Protection and Access is related to NCUA's role as prudential regulator and

[59] The totals may not reconcile exactly due to rounding.

charterer of federal credit unions. This office is unique and differs from the Regions and ONES in the distribution and nature of work performed related to federal credit unions. Thus, principle 3 is applied to the majority of this office's work and allocated at 0 percent insurance related. However, some work the office performs involves federally insured state-chartered credit unions, which falls under principle 4. The office also addresses share insurance coverage matters, which also falls under principle 4.

The composite rate of this office's insurance-related activities calculates as 13 percent as reflected in Table 3. Thus, an allocation factor of 13 percent is applied to the office's financial budget in the OTR calculation.

TABLE 3—ALLOCATION OF THE OFFICE OF CONSUMER PROTECTION AND FINANCIAL ACCESS STAFF TIME

Division	Number of staff (full time equivalent)	Staff time spent on activities (full time equivalent)	Allocation factor (percent)	Proportion of staff insurance-related work (full time equivalent)
Administrative	3			
—Principle 3 Activities		2.7	0	0.0
—Principle 4 Activities		0.3	100	0.3
Consumer Access	20			
–Principle 3 Activities		15.0	0	0.0
—Principle 4 Activities		5.0	100	5.0
Consumer Affairs	12			
—Principle 3 Activities		11.4	0	0.0
—Principle 4 Activities		0.6	100	0.6
Consumer Compliance Policy and Outreach	10			
—Principle 3 Activities		10.0	0	0.0
—Principle 4 Activities		0.0	100	
Totals	45			5.9
Insurance-Related Full Time Equivalent Staff to Total Staff	13%			

The office's administrative staff provides support for the whole office. Ten percent of this unit's work was devoted to supporting insurance-related functions, like responding to consumer inquiries on share insurance coverage. Thus, principle 4 is applied to those activities as 100 percent insurance related while the remaining 90 percent of their time was spent supporting charting, bylaw, field of membership, and related activities, which fall under principle 3 as 0 percent insurance related.

The Division of Consumer Access staff spent 25 percent of their time addressing insurance-related functions, like insurability standards for mergers and insurance applicants where principle 4 applies. The remainder of this unit's time was spent processing various chartering and field of membership expansion applications and bylaw matters where principle 3 applies.

The Division of Consumer Affairs staff spent 5 percent of its time addressing share insurance questions received from consumers which falls under principle 4. The division spent the remaining 95 percent of its time on consumer related activities like administering the Financial Literacy Program, which falls under principle 3.

The Division of Consumer Compliance Policy and Outreach focuses on issues related to consumer regulations including implementing the Equal Credit Opportunity Act, the Home Mortgage Disclosure Act, the Truth in Lending Act, and the Real Estate Settlement Procedures Act. All of these activities fall under principle 3; therefore, 100 percent of the division's staff time is allocated as 0 percent insurance related.

Office of Small Credit Union Initiatives

The proposed methodology allocates the cost of the Office of Small Credit Union Initiatives based on principles 1 and 2. The office tracks the time the Economic Development Specialists spent consulting and training both federal credit unions and federally insured state-charted credit unions. The proportion of time spent on federal credit unions is allocated based on principle 1 while federally insured state-chartered credit union work is allocated based on principle 2. Other office personnel process grants and loans for both federal credit unions and federally insured state-chartered credit unions. Grant and loan activities are allocated the same way as the consulting and training time using principles 1 and 2. The resulting allocation factor for the Office of Small Credit Union Initiatives is 60 percent as shown in Tables 4 and 5.[60]

Table 4 illustrates the allocation for the Office of Small Credit Union Initiative's consulting hours between federal and state-chartered credit unions applied to the budgeted hours for 2017. Principle 1 is applied for federal charters and principle 2 is applied for state charters. The result is a composite rate of 59.3 percent insurance-related hours for the Economic Development Specialists.

[60] About 73% of all grants and loans processed by the Office of Small Credit Union Initiatives in 2016 were for federal credit unions. Of the 18,633 hours budgeted for Economic Development Specialist consulting and training, about 81% is for federal credit unions.

TABLE 4—2017 ECONOMIC DEVELOPMENT SPECIALIST WORKLOAD ALLOCATION

Charter type	Budget (hours)	Percent insurance related	Hours insurance related	Percent of budget insurance related
Federal Charter	15,185	50	7,592	40.7
State Charter	3,448	100	3,448	18.5
Total	18,633	N/A	11,040	59.3

Table 5 illustrates the allocation of the grant and loan activities performed by the Office of Small Credit Union Initiatives by charter type. Principle 1 is applied for federal charters and principle 2 is applied for state charters. This results in a composite rate of 63.7 percent insurance-related activities for grants and loans.

TABLE 5—GRANT APPROVAL AND LOAN DISBURSEMENT 2016 BY CHARTER TYPE [61]

Charter type	Total grants and loans	Percent insurance-related	Total insurance-related	Percent of total
Federal Charter	235	50	118	36.3
State Charter	89	100	89	27.5
Total	324	N/A	207	63.7

Table 6 shows the resulting overall composite rate of 59.8 percent insurance-related activities for the Office of Small Credit Union Initiatives. This factor is applied to the financial budget for this office in the OTR calculation.

TABLE 6—ALLOCATION OF THE FINANCIAL BUDGET

Staff	Budget	Insurance-related (percent)	Budget allocation
Economic Development Specialists	3,733,000	59.3	2,211,982
Grants and Loans	527,000	63.7	335,881
Total	4,260,000	59.8	2,547,773

All Other Offices

NCUA's remaining offices design or oversee the agency's mission and its related offices, or provide necessary support to mission offices or the entire agency. As such, the proportion of insurance-related activities for these offices corresponds to that of the mission offices. It would be administratively burdensome to attempt to account for any variation in activity levels from the mission functions, and would not result in a material difference in outcomes. Therefore, these office costs are allocated based on the weighted average of insurance-related activities calculated in the subtotal of agency costs for the offices above that have a distinct allocation factor. The budgeted costs for the following offices are allocated at 60.0 percent insurance-related activities for purposes of calculating the OTR:

- NCUA Board,
- Executive Director,
- General Counsel,
- Chief Financial Officer,
- Chief Information Officer,
- Chief Economist,
- Human Resources,
- Examination and Insurance,
- Inspector General,
- Minority and Women Inclusion,
- Public and Congressional Affairs, and
- Continuity and Security Management.

c. Step 3—Calculate the OTR

The OTR represents the percentage of the NCUA Operating Budget that is funded by a transfer from the Share Insurance Fund.[62] Using the result from Step 2, the OTR calculation is shown in Table 7.

TABLE 7—OTR CALCULATION

Operating Costs to be Borne by the Share Insurance Fund	$179.0
÷ Total Operating Budget	$298.2
= OTR	60.0%

Based on data used to determine the OTR for 2017, the proposed changes to the OTR methodology would result in an OTR of 60.0 percent. The current methodology resulted in an OTR of 67.7 percent for 2017. Table 8 summarizes the results for the 2017 OTR calculation using the current and proposed methodologies.

[61] Numbers may not reconcile exactly due to rounding.

[62] The percentage of actual expenses funded by the Share Insurance Fund as they are incurred each month.

TABLE 8—2017 OTR RESULTS COMPARISON

	Current methodology	Proposed methodology	Change [63]
OTR Percent	67.7%	60.0%	−7.70%
OTR $ Millions	$201.8	$179.0	−$22.8

For informational purposes only, Table 9 illustrates the portion of NCUA's total Operating Budget costs funded explicitly and implicitly by federal credit unions and federally insured state-chartered credit unions respectively.

TABLE 9—OPERATING BUDGET COST DISTRIBUTION

Portion of 2017 operating budget covered by:	Federal credit unions	Federally insured state-chartered credit unions
Federal Credit Union Operating Fee	40.0%	0.0%.
OTR (proportional based on insured shares)	30.8%	29.2%.
	(60.0% × 51.3%).	(60.0% × 48.7%).
Total	70.8% [64]	29.2%.

The proposed change to the OTR methodology would result in the annual Operating Fee paid by federal credit unions increasing by about 24%—an increase of $22.8 million from $96.4 million to $119.2 million. Based on the 2017 Operating Fee scale, Table 10 provides several examples of how a federal credit union's operating fee would increase.

TABLE 10—EXAMPLES OF OPERATING FEE INCREASE FOR FEDERAL CREDIT UNIONS

Asset size of federal credit union	Increase to annual operating fee
$9.46 billion	$133,234
$1.01 billion	51,143
$503 million	25,445
$100 million	5,060
$50 million	2,526
$10 million	505
$1 million	0

V. Request for Comment

In addition to the proposed changes to the OTR methodology, the Board proposes to formally adopt the following OTR related processes:

- To solicit through the **Federal Register** public comment on the OTR methodology at least every 3 years, and whenever NCUA seeks to change the OTR methodology.
- Maintain the staff delegation to administer the OTR methodology but require public board briefings every year, no later than each December, on the results of the calculation and to post all related materials to NCUA's Web site.
- As part of future rulemaking, indicate for any proposed regulation involving the activities and authorities of credit unions whether the regulation is based on Title I, Title II, and/or Title III of the Act and seek comment on this determination. While the proposed new OTR methodology would no longer rely on mapping of regulations, this will increase clarity regarding the purpose of and authority for any new or updated regulations and preserve future flexibility with respect to any desired changes to the OTR methodology.

The Board seeks comments on all the proposed revisions to the OTR methodology and formal adoption of the procedures discussed above. In particular, the Board is interested in comments on alternative approaches to arriving at an allocation factor for the cost of examining and supervising federal credit unions (principle 1). For example, within the context of the overall simplification of the OTR methodology, should federal credit union examination and supervision activity be allocated primarily to the operating fee, or should it continue to reflect that much of NCUA's examination and supervision focus is on managing risk to the Share Insurance Fund.[65]

Commenters are also encouraged to discuss any other relevant issues they believe NCUA should consider with respect to the OTR methodology and, to the extent feasible, provide documentation to support any recommendations.

By the National Credit Union Administration Board on June 23, 2017.

Gerard Poliquin,

Secretary of the Board.

[FR Doc. 2017–13635 Filed 6–29–17; 8:45 am]

BILLING CODE 7535–01–P

OFFICE OF PERSONNEL MANAGEMENT

Notice of Submission for Approval: Questionnaire for Non-Sensitive Positions (SF 85)

AGENCY: U.S. Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: The National Background Investigation Bureau (NBIB), U.S. Office of Personnel Management (OPM) is notifying the general public and other Federal agencies that OPM is seeking Office of Management and Budget (OMB) approval of a revised information collection, Questionnaire for Non-Sensitive Positions, (SF 85).

DATES: Comments are encouraged and will be accepted until August 29, 2017.

[63] For 2017, the proposed OTR methodology calculation would result in a decline of 11.4% from the current methodology.

[64] Based on the current OTR methodology, 67 percent of the total 2017 Operating Budget is covered by federal credit unions through Operating Fees and the OTR: *https://www.ncua.gov/About/Documents/Agenda%20Items/AG20416117Item4a.pdf.*

[65] To provide context for commenters, an assumption under principle 1 in the proposed OTR methodology that only the examination and supervision of troubled federal credit unions was insurance-related would result in an OTR of about 31 percent. Conversely, if the results of the Examiner Time Survey (about 88 percent insurance-related) were used for the allocation factor for principle 1 in the proposed OTR methodology, it would result in an OTR of about 85 percent.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to NBIB, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415, Attention: Donna McLeod or by electronic mail at *FISFormsComments@opm.gov.*

FOR FURTHER INFORMATION CONTACT: A copy of this information collection, with applicable supporting documentation, may be obtained by contacting the NBIB, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415, Attention: Donna McLeod or by electronic mail at *FISFormsComments@opm.gov.*

SUPPLEMENTARY INFORMATION: OPM is soliciting comments for this collection as required by the Paperwork Reduction Act of 1995, 44 U.S.C. 3507(a)(1). The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Questionnaire for Non-Sensitive Positions, SF 85, including accompanying releases, housed in a system named e-QIP (Electronic Questionnaires for Investigative Processing), is an information collection completed by applicants for, or incumbents of, Federal Government civilian positions, and other individuals performing work on behalf of the Federal Government and requiring logical and physical access to Federal systems and facilities, *e.g.,* pursuant to a Government contract. The collection is used by:

- The Federal Government in conducting background investigations of persons under consideration for non-sensitive, low-risk positions as defined in Executive Order 13764 and 5 CFR part 731;
- agencies in determining whether a person performing work for or on behalf of the Federal Government should be deemed eligible for physical and logical access to federally controlled facilities or information systems.

The SF 85 is completed by applicants for, or incumbents of, Federal Government civilian positions, or other individuals requiring logical or physical access to perform work on behalf of the Federal Government. For applicants, the SF 85 is to be used only after a conditional offer of employment has been made, unless OPM has provided an exception. The Electronic Questionnaires for Investigations Processing (e-QIP) is a web-based system application that houses the SF 85. A variable in assessing burden hours is the nature of the electronic application. The electronic application includes branching questions and instructions which provide for a tailored collection from the respondent based on varying factors in the respondent's personal history. The burden on the respondent is reduced when the respondent's personal history is not relevant to particular question, since the question branches, or expands for additional details, only for those persons who have pertinent information to provide regarding that line of questioning. Accordingly, the burden on the respondent will vary depending on whether the information collection relates to the respondent's personal history.

OPM proposes new changes to the SF 85. The instructional portion of the form will be modified. OPM will provide additional information regarding the investigative process. OPM will remove instructions that were needed only for persons completing a paper form, as the form is now collected by OPM only through electronic means. The Privacy Act Routine Uses provided on the form were updated to conform to the most recent publication of the OPM/Central 9 Personnel Investigations Records system of records notice. Section 6, your ''Identifying Information'' will be expanded to request additional identifiers. OPM will request, in Section 7, ''Your Contact Information'' that the respondent provide three contact numbers to facilitate contact between investigative personnel and the respondent; however respondents will be advised that only one number is required. Section 9, ''Citizenship'' will be expanded to collect additional information to assist in verifying derived citizenship of respondents born outside of the U.S. Section 10, ''Dual/Multiple Citizenship'' will include questions regarding the time period(s) of dual/multiple citizenship and an explanation of how such citizenship was acquired. Section 11, ''Where You Have Lived'' will include branching questions that replace detailed instructions for all respondents and instead tailor the collection to elicit information based on the respondent's relevant personal history. Section 12, ''Where You Went to School'' instructions will be changed regarding the requirement to list degree or diploma information. Section 13a, ''Employment Activities-Employment & Unemployment Record'' branching questions will be added to reduce detailed instructions for all respondents and tailor instructions as applicable to the respondent. Additionally, branching questions for foreign addresses and contacts will be added to assist with conducting the background investigation. Section 13b, ''Employment Activities-Former Federal Service'' will be added to capture former federal civilian service, excluding military service not previously provided. Section 13c, ''Employment Record'' branching questions will be added to prompt the applicant to enter the required information following each positive response.

In an effort to streamline information collection from the respondents, changes are proposed to add five areas of questioning found on the Declaration of Federal Employment form (OF 306) to the SF 85. The recommendation is to have questions pertaining to Selective Service record, military discharge, police records and court(s) martial, debarment from federal employment, and financial history included on the SF 85. This change would provide information needed in support of the background investigation and limit multiple reporting requirements for respondents for the purpose of the background investigation.

Section 15, ''Military History'' branching questions will be added to collect information pertaining to the types of military discharge received and information regarding military disciplinary actions. Branching questions will be added to elicit information regarding foreign military service, if applicable, in addition to U.S. military service, and to collect details of such service. Section 17, ''Police Record'' will include questions regarding offenses, charges, and arrests, and branching questions will be added to inquire about the disposition of criminal proceedings. Section 21, ''Financial Record'' will be added with branching questions to elicit specific detailed information pertaining to

failure to file or pay Federal, state, or other taxes when required by law or ordinance and to collect information regarding delinquent federal debt.

Section 16, ''People Who Know You Well'' branching questions will be added to clarify and collect additional information pertaining to the references. Section 18, ''Illegal Use of Drugs and Drug Activity'' will include instruction to clarify that drug use or activity illegal under Federal laws must be reported, even if that use or activity is legal under state or local law(s). Branching questions will be added regarding drug treatment details, which is pertinent information needed to support final adjudication. Section 19, ''Investigations and Clearance Record'' will be added with branching questions to elicit information necessary to obtain relevant details regarding prior records, including debarment from government employment. Section 22, ''Association Record'' will be added with branching questions which collect detailed information pertinent to a respondent's involvement in terrorist organizations, association with persons involved in activities to further terrorism and/or to overthrow the U.S. Government by force or violence.

The general ''Authorization for Release of Information'' will include clarifying language noting that information gathered during the investigation may include publicly available electronic information, including electronic social media information that has been published or broadcast for public consumption, is available on request to the public, is accessible on-line to the public, is available to the public by subscription or purchase, or is otherwise lawfully accessible to the public. A change is also proposed to the expiration timeframe of the General Release to five years. This change is consistent with the investigative coverage period for low risk, non-sensitive positions. In the event that review of financial information is needed for a particular investigation, the ''Fair Credit Reporting Disclosure and Authorization'' will be added to the collection.

Analysis

Agency: NBIB, U.S. Office of Personnel Management.

Title: Questionnaire for Non-Sensitive Positions (SF 85).

OMB Number: 3206–0261.

Affected Public: The SF 85 is an information collections completed by applicants for, or incumbents of, Federal Government civilian positions, or positions in private entities performing work for the Federal Government under contract. The SF 85 will be used by the Federal Government in conducting background investigations and reinvestigations of persons under consideration for, or retention in, non-sensitive positions. The form may also be used by agencies in determining whether a subject performing work for, or on behalf of, the Government under a contract, should be deemed eligible for logical or physical access. For applicants, the SF 85 is to be used only after a conditional offer of employment has been made, unless an exception is provided by OPM.

Number of Respondents: 55,040.

Estimated Time per Respondent: 120 minutes.

Total Burden Hours: 110,080.

U.S. Office of Personnel Management.

Kathleen M. McGettigan,

Acting Director.

OFFICE OF PERSONNEL MANAGEMENT

Hispanic Council on Federal Employment

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of meeting.

SUMMARY: The Hispanic Council on Federal Employment (Council) meeting will be held on Tuesday, August 1, 2017 at the following time and location shown below:

Time: 2:00 p.m. to 3:30 p.m.

Location: Office of Personnel Management, 1900 E Street NW., Washington, DC 20415, Executive Conference Room.

The Council is an advisory committee composed of representatives from Hispanic organizations and senior government officials. Along with its other responsibilities, the Council shall advise the Director of the Office of Personnel Management on matters involving the recruitment, hiring, and advancement of Hispanics in the Federal workforce. The Council is co-chaired by the Director of the Office of Personnel Management and the Chair of the National Hispanic Leadership Agenda (NHLA).

The meeting is open to the public. Please contact the Office of Personnel Management at the address shown below if you wish to present material to the Council at any of the meetings. The manner and time prescribed for presentations may be limited, depending upon the number of parties that express interest in presenting information.

FOR FURTHER INFORMATION CONTACT: Zina Sutch, Director, for the Office of Diversity and Inclusion, Office of Personnel Management, 1900 E Street NW., Suite 5H35, Washington, DC 20415. Phone (202) 606–2433 FAX (202) 606–6012 or email at *Zina.Sutch@opm.gov*.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81020; File No. SR–MIAX–2017–30]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend MIAX Options Rules 307, Position Limits, and 309, Exercise Limits, To Extend the SPY Pilot Program

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 20, 2017, Miami International Securities Exchange, LLC (''MIAX Options'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rules 307, Position Limits, and 309, Exercise Limits, to extend the pilot program that eliminates the position and exercise limits for physically-settled options on the SPDR® S&P 500® ETF Trust (''SPY Pilot Program'').

The text of the proposed rule change is available on the Exchange's Web site at *http://www.miaxoptions.com/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Exchange Rules 307, Position Limits, and 309, Exercise Limits, establish position and exercise limits for aggregate positions in option contracts traded on the Exchange. Interpretations and Policies .01 to Rule 307 lists specific position limits for options on specific underlying securities, and Interpretations and Policies .01 to Rule 309 lists specific exercise limits for options on specific underlying securities. Among the listed specific underlying securities is the SPDR® S&P 500® ETF Trust (''SPY''). Currently, each of these Rules provides that there is no position limit and no exercise limit on options overlying SPY. The position and exercise limits for options overlying SPY in each of these Rules are the subject of a pilot program, which is scheduled to expire on July 12, 2017.[3]

The Exchange proposes to amend Exchange Rule 307, Interpretations and Policies .01, and Exchange Rule 309, Interpretations and Policies .01, to extend the duration of the SPY Pilot Program through July 12, 2018. There are no substantive changes being proposed to the SPY Pilot Program. The Exchange affirms its consideration of several factors that support the proposal to establish and extend the SPY Pilot Program, which include: (1) The liquidity of the option and the underlying security; (2) the market capitalization of the underlying security and the securities that make up the S&P 500 Index; (3) options reporting requirements; and (4) financial requirements imposed by MIAX Options and the Commission.

The Exchange notes that it is not aware of any problems created by the current SPY Pilot Program and does not foresee any problems with the proposed extension. The Exchange has formally submitted a Report for the SPY Pilot Program as part of this filing.[4] In addition, the Exchange represents that if it chooses to extend or seek permanent approval of the SPY Pilot Program, the Exchange will submit another SPY Pilot Program Report at least thirty (30) days prior to the expiration of the extended SPY Pilot Program time period which would cover the period between reports. The SPY Pilot Program Report will compare the impact of the pilot program, if any, on the volumes of SPY options and the volatility in the price of the underlying SPY contract, particularly at expiration. The SPY Pilot Program Report will also detail the size and different types of strategies employed with respect to positions established in SPY options; note whether any problems, in the underlying SPY ETF or otherwise, arose as a result of the no-limit approach; and include any other information that may be useful in evaluating the effectiveness of the SPY Pilot Program. In preparing the Pilot Report, the Exchange will utilize various data elements such as volume and open interest. In addition the Exchange would make available to Commission staff data elements relating to the effectiveness of the SPY Pilot Program.

The Exchange proposes to extend the SPY Pilot Program in order for the Exchange and the Commission to have additional time to evaluate the Pilot and its effect on the market and to determine whether to seek permanent approval. Prior to the expiration of the SPY Pilot Program and based upon the findings of the SPY Pilot Program Report, the Exchange will be able to either extend the SPY Pilot Program, adopt the SPY Pilot Program on a permanent basis, or terminate the SPY Pilot Program. If the SPY Pilot Program is not extended or adopted on a permanent basis by the expiration of the extended SPY Pilot Program, the position limits for options overlying SPY would revert to limits in effect prior to the commencement of the SPY Pilot Program.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 78120 (June 22, 2016), 81 FR 42032 (June 28, 2016) (SR–MIAX–2016–17) (extending the SPY Pilot Program to July 12, 2017).

[4] *See* Exhibit 3 attached hereto [sic].

2. Statutory Basis

MIAX believes that its proposed rule change is consistent with Section 6(b) of the Act [5] in general, and furthers the objectives of Section 6(b)(5) of the Act [6] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

Specifically, the Exchange believes that extending the SPY Pilot Program promotes just and equitable principles of trade by permitting market participants, including market makers, institutional investors and retail investors, to establish greater positions when pursuing their investment goals and needs. The Exchange believes that the elimination of position limits for SPY options would not increase market volatility or facilitate the ability to manipulate the market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The proposed rule change is not designed to address any aspect of competition, whether between the Exchange and its competitors, or among market participants. Instead, the proposed rule change is designed to allow the SPY Pilot Program to continue as the Exchange believes other competing options exchanges will also extend the SPY Pilot Program for another year.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[7]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [8] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [9] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Exchange stated that waiver of the operative delay would allow the SPY Pilot Program to continue uninterrupted at the Exchange. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[10]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MIAX–2017–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2017–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2017–30, and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81022; File No. SR–OC–2017–02]

Self-Regulatory Organizations; OneChicago, LLC; Notice of Filing of Proposed Rule Change To Implement Four Decimal Pricing for Outright Transactions in Single Stock Futures

June 26, 2017.

Pursuant to Section 19(b)(7) of the Securities Exchange Act of 1934 (the ''Act'')[1], notice is hereby given that on June 16, 2017, OneChicago, LLC (''OneChicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons. OneChicago has also filed this rule change with the Commodity Futures Trading Commission (''CFTC''). OneChicago filed a written certification with the CFTC under Section 5c(c) of the Commodity Exchange Act (''CEA'') on June 16, 2017.

I. Self-Regulatory Organization's Description of the Proposed Rule Change

OneChicago is proposing to amend OneChicago Rule 902 (Contract Specifications) to decrease the minimum price increment for outright Single Stock Futures (''SSFs'')[2] quotes and trades from $0.01 to $0.0001 per share, which results in a minimum price fluctuation of $0.01 per contract. OneChicago is proposing this change to permit market participants to more precisely price the interest rate component of SSFs. Unlike their underlying securities, which are typically priced directly by the value of the security itself, SSF prices are derived by adding an interest rate component to the price of the underlying security. As described in more detail below, interest rates are commonly quoted in basis points (''bps''), and the forward value of SSFs must accurately reflect these interest rates. As such, OneChicago believes that four decimal quoting and trading may assist market participants in pricing SSFs with the precision necessary to reflect the actual value of the interest rate component of the contract.

The minimum price fluctuation is set forth in OneChicago Rule 902, which provides general contract specifications for all OneChicago SSFs. Because the minimum price increment for blocks, EFPs, and spread transactions was already set at $0.0001, upon amending OneChicago Rule 902(e), all SSF trade types, including outright trades, will quote and trade with minimum fluctuations of $0.0001 (*i.e.,* one basis point per dollar).

Further, as currently drafted, OneChicago Rule 902(e) provides that the Exchange may amend the minimum price fluctuation for SSFs without amending the text of the rule itself. Specifically, the clause ''or as otherwise stated by the Exchange'' effectively permits the Exchange to set a minimum price fluctuation by notice or other means. OneChicago is now proposing to amend OneChicago Rule 902(e) to delete this clause, thereby providing certainty to market participants that the minimum price fluctuation is stated solely in OneChicago Rule 902, and will not be amended other than through the rule change process.

The text of the proposed rule change is attached as *Exhibit 4* to the filing submitted by the Exchange but is not attached to the published notice of the filing.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OneChicago included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared a summary of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

OneChicago is proposing to amend OneChicago Rule 902 (Contract Specifications) to decrease the minimum fluctuation for outright SSF quotes and trades from $0.01 to $0.0001 per share effective July 10, 2017.[3] Previously, the minimum price fluctuation for each contract was located in the OneChicago Rule 905 supplement. In 2011, OneChicago amended the pricing of block and EFP transactions in OneChicago Rule 905 to permit four decimal point trade prices.[4] In 2015, OneChicago similarly amended OneChicago Rule 905 to permit quoting and trading of spread transactions in four decimal places as well.[5] This expansion allowed these trades to be more precisely priced because, as described in detail below, the interest rate component of SSFs is expressed in basis points, and four decimal pricing would permit market participants to quote or trade at prices that translate to their desired basis point level.

This change will harmonize the pricing of all OneChicago trade types to four decimal places, and permit the same level of precision in central limit order book (''CLOB'') outright trades as is currently available for block trades. This change may also remove a potential barrier to entry to OneChicago's competitive marketplace, and could encourage market participants to transition away from the block marketplace and to the CLOB.

OneChicago acknowledges that sub-penny pricing is currently prohibited in NMS securities.[6] Although SSFs are not NMS securities, OneChicago believes it is warranted to discuss why four decimal pricing is appropriate in the SSF market, as well as why certain concerns highlighted by the rule's sub-penny prohibition would not apply to the SSFs listed by OneChicago.[7]

Interest Rate Component of SSFs

Unlike securities—which are assets—SSFs are contingent liabilities that represent the forward value of the underlying security. The primary

[1] 15 U.S.C. 78s(b)(7).

[2] An ''outright'' SSF trade is a non-block, non-EFP, non-spread trade.

[3] OneChicago's outright SSFs are currently quoted and traded in two decimal places, and are therefore settled on a per-contract basis with a minimum price fluctuation of $1.00 due to the 100 share per-contract multiplier. The Commission notes that the proposed rule change has become effective on June 16, 2017 and will be implemented on July 10, 2017.

[4] *See* Securities Exchange Act Release No. 65053 (August 8, 2011) (SR–OC–2011–01).

[5] *See* Securities Exchange Act Release No. 75464 (July 16, 2015) (SR–OC–2015–02).

[6] 17 CFR 242.612.

[7] OneChicago notes that equity options, like SSFs, also have a multiplier of 100 underlying shares, but are currently only quoted and traded in two decimal places. OneChicago believes it is appropriate to distinguish SSFs from equity options with regard to decimal quoting and trading. In OneChicago's view, unlike equity options, which are primarily used for hedging or speculating, the primary uses of SSFs are to (1) refinance equity positions by replacing them with positions in SSFs at more favorable interest rates, (2) loan or borrow securities, or (3) loan or borrow cash with securities as collateral. In each case, the ability for the SSF trade price to precisely target the desired interest rate of the transaction is a necessary component. Accordingly, providing for four decimal quoting and trading supports the key uses of SSFs.

difference in pricing between securities and the SSFs that overlay them is the interest rate component of the forward contract. The interest rate of an SSF represents the cost for an individual to hold the underlying equity—or in other words, the cost of carry. Interest rates are described in basis points, which are hundredths of one percentage point. For example, an interest rate of 1.25% can also be expressed as 125 basis points. Interest rates are relative, not static, values. Consequently, 125 basis points can represent a different dollar value depending on the notional amount the interest rate is applied to. Four decimal pricing is a necessary step towards allowing SSFs to be priced in the dollar value that translates to the desired basis point equivalent.

Since a trade in an SSF is not the purchase of an asset, but instead allows the individual to carry a position to a future time, the most accurate way to price the interest rate of the trade is in basis points. In order to trade in basis points, market participants need the ability to price trades to the fourth numerical decimal point.[8] The decimal pricing expressed in dollars and cents can simply be viewed as a translation tool to permit market participants to trade at their desired level of basis points.

OneChicago believes that two decimal pricing is not sufficient to translate a dollar value to an interest rate with precision. For example, an SSF bid-ask spread of $4.01 by $4.02 on a $4.00 underlying stock with sixty-four days left until expiration would represent a 1.40% (140 bps) difference between the best bid and best ask. Specifically, the bid at $4.01 translates to a 1.41% (141 bps) interest rate, whereas the offer at $4.02 translates to a 2.81% (281 bps) interest rate.[9] A market participant desiring to enter into a long position in the SSF at any interest rate between 140 bps and 281 bps would be prohibited from doing so by two decimal pricing, even if the seller was also willing to enter into a short position at that level.

Although SSF trade prices are represented in dollar values, they also encompass interest rate and time until expiration. By using the trade price and time until expiration, market participants can determine the corresponding interest rate of the trade. Likewise, if a market participant is seeking a particular interest rate, that market participant can calculate the trade price by taking into account the desired interest rate and days until expiry. This is distinguished from trading in the underlying securities where the trade price directly represents the value of the asset itself. Accordingly, when market participants trade an SSF, they are calculating the futures trade price by considering not only the stock price, but also the days left to expiry and the prevailing interest rate.[10]

Concerns Raised by Reg NMS

OneChicago has considered whether permitting market participants to quote and trade SSFs in up to four decimals will impose any burdens on or otherwise negatively impact the SSF marketplace.[11] OneChicago does not believe that permitting quoting and trading SSFs in up to four decimals will cause market participants to step ahead of each other's limit orders for nominal amounts, and thereby cause resting limit orders to lose their execution priority in the CLOB. Since $0.0001 in an SSF trade price may represent varying notional amounts depending on the trade price, quantity, and days left until expiry, OneChicago does not believe it is appropriate to prohibit four decimal pricing based on such a concern.[12] This is especially true in a low interest rate environment where market participants need to tailor their SSF trade prices with accuracy such that the resulting interest rate is in line with their expectations.

Additionally, unlike the equity markets in which hundreds of trades occur every second, OneChicago's markets are strictly governed to limit order frequency. The overwhelming majority of volume executed on the exchange occurs through the use of manual front-end systems, whereby the individual trader fills out each order ticket with the relevant order parameters. Further, even market participants trading programmatically (and who are not market-makers) are limited to a maximum of ten orders per second across all products, which minimizes the potential that any one market participant would repeatedly enter and modify orders in one particular product.

Accordingly, OneChicago believes that it is unlikely that limit orders will be frequently stepped ahead of due to the low messaging quantity threshold permitted by the Exchange. OneChicago notes on this topic that if a limit order loses execution priority to another limit order priced exactly $0.0001 above (in the case of a buy order) or $0.0001 below (in the case of a sell order) the resting order, this loss of priority typically would not have occurred for a nominal amount.[13] As described above, the fourth decimal place of an SSF trade can represent a different dollar value depending on the price of the underlying security and the days left until expiry of the futures contract. Accordingly, the Exchange believes that in most instances, the new limit order would have provided actual interest rate improvement over the resting order. In fact, the Exchange predicts that this rule change will encourage the entry of more competitive orders due to increased participation by both retail investors and market makers.[14]

Furthermore, OneChicago does not anticipate any capacity burden generated as a result of permitting four

[8] OneChicago notes that the greater number of numerical decimal places available in a trade price, the more precisely the basis point rate of a trade may be targeted. OneChicago believes that four decimal point pricing is currently sufficient to provide interest rate precision, while also avoiding increased complexity that may be associated with five or six (or greater) decimal point pricing. Due to the 100 share multiplier, per-share trade prices in four decimals would permit contract settlement in two decimal places.

[9] As an ancillary matter, OneChicago notes that the Exchange trading platform does not support market orders partly to protect market participants from inadvertently crossing these large interest rate spreads and executing at an unexpected or undesired interest rate. Limit orders are the only order type that allow participants to precisely target an interest rate with their order price.

[10] Interest rates are typically expressed in five decimal places (or alternatively, in basis points out to three decimal places). *See e.g.,* ICE Libor Historical Rates, *available at https://www.theice.com/marketdata/reports/170.*

[11] Rule 612 of Regulation NMS, 17 CFR 242.612, prohibits national securities exchanges from accepting or ranking orders in any NMS security priced greater than $1.00 per share in an increment smaller than $0.01. By prohibiting sub-penny pricing, Regulation NMS sought to prevent market participants from stepping ahead of each other for a nominal or infinitesimally small amount, thereby discouraging the use of limit orders, and also to prevent overburdening market participants' systems due to increased messaging traffic resulting from sub penny orders. Although SSFs are not NMS securities, OneChicago has considered the prohibition on sub-penny pricing in NMS securities, and has concluded that the concerns raised by sub-penny pricing are not applicable to SSFs and unnecessary to impose on the SSF market.

[12] The average trade quantity on the CLOB is 5 contracts. Accordingly, the fourth decimal place would represent, on average, a $0.05 difference in trade value, which may translate to a meaningful interest rate, depending on the trade price and time until expiration. On a typical CLOB trade, the fourth decimal place may represent 0.1 to 3 bps in interest. By way of example, a 5 contract trade at a futures trade price of $13.9835 results in a notional value of $6991.75. Without the third and fourth decimal places (a futures trade price of $13.98), the notional value would be $6990.00, a difference of $1.75.

[13] As described in footnote 12, $0.05 may represent a spectrum of interest rates, depending on the futures trade price and days remaining until expiry.

[14] OneChicago notes that its spread marketplace has been trading on a centralized order book in four decimal places since July 20, 2015. Since that time, OneChicago has not observed any instance in which a limit order for a spread transaction was stepped ahead of.

decimal quoting and trading, as OneChicago does not expect its messaging traffic to increase as a result of this change. Therefore, the Exchange does not believe quote submission or market data receipt will be impacted in any anyway. Moreover, four decimal pricing is currently commonplace in the futures industry outside of SSFs.[15]

Impact on Retail Investors

OneChicago believes that the primary beneficiaries of this rule change will be retail investors. OneChicago's SSFs offer retail investors an alternative to financing their equity securities positions via margin loan from their brokers, and offer these investors the ability to acquire synthetic exposure to equity securities at competitive financing rates. OneChicago believes the lack of four decimal pricing for outright trades has hampered the ability of the Exchange's market makers to make competitive markets which would allow retail investors to transact at competitive financing rates. With four decimal pricing in the CLOB for outright trades, OneChicago anticipates that new market makers will enter the marketplace and make more competitive markets, increasing trading activity on the CLOB.

Further, as stated above, this rule change will encourage market participants to transact in OneChicago's CLOB, rather than in the block marketplace, thereby increasing competition in trading and quoting these products. Currently, block trades, which are privately negotiated transactions available only to eligible contract participants, as that term is defined in section 1a(18) of the CEA,[16] are already priced in four decimals. This change will place retail investors, who may not access the block marketplace, on equal footing with these more sophisticated participants by permitting them to price their SSF trades in up to four decimals. As a result of this bifurcated structure in which sophisticated parties can transact blocks in four decimals, but retail investors may not, retail investors are at a disadvantage as they receive less competitive interest rates on their CLOB trades.[17] In addition to permitting retail investors to trade in four decimals, OneChicago anticipates this rule change will cause sophisticated participants who can already transact in four decimal places in the block marketplace to begin to transition their activity to the CLOB. By aggregating and concentrating more SSF activity in the CLOB, OneChicago expects that all market participants will transact at more competitive levels than those present today.

Monitoring of Four Decimal Trading

As stated above, OneChicago does not anticipate that the transition of outright SSF trading to four decimals will harm or disadvantage any market participant. Nonetheless, in order to address any concerns related to stepping ahead, the Exchange plans to monitor its trading activity to determine whether permitting outright SSFs to trade in up to four decimal places has caused any harm to investors or deterioration in market quality. OneChicago plans to monitor this in two ways. First, the Exchange plans to monitor its trading directly for any incidence of stepping ahead. To do so, the Exchange will implement surveillance procedures that identify instances in which a market participant uses the third or fourth decimal place to step ahead of limit orders on the CLOB. OneChicago will review such activity and determine whether there is a pattern or practice of conduct not in line with just and equitable principles of trade. Second, OneChicago will, on a periodic basis, assess its market quality by looking to various factors such as spreads, market depth, and number and diversity of market participants. Using this two-pronged approached, the Exchange can determine whether permitting quoting and trading of SSFs in up to four decimals has promoted market quality, while ensuring market integrity. If OneChicago makes the determination that four decimal pricing has harmed either market quality or integrity, the Exchange will amend OneChicago Rule 902 to return to two decimal pricing. In order to provide its market participants with sufficient notice regarding this this [sic] change, OneChicago plans to distribute a Notice to Members before implementing the change to permit its market participants to make any necessary technology or operational changes, which OneChicago anticipates will be minimal.

2. Statutory Basis

OneChicago believes that the proposed rule change is consistent with Section 6(b) of the Act,[18] in general, and furthers the objectives of Section 6(b)(5)[19] in particular. The proposed rule change furthers the objectives of Section 6(b)(5) because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed rule change is equitable and not unfairly discriminatory because it would apply equally to all market participants. The ability to trade outright transactions in up to four decimal places will not be limited to any class of market participant, and all market participants are eligible to trade on OneChicago's CLOB. The requirements to trade on the CLOB are no more restrictive than the requirements to trade block, EFP, or spread transactions. Permitting outright transactions to trade in up to four decimal allows all OneChicago participants to trade in the same way, thereby promoting just and equitable principles of trade.

OneChicago has considered whether permitting SSFs to quote and trade in up to four decimal places could permit manipulation or other violative activity in either the underlying equity or SSF, and has determined that no such concern exists. Four decimal pricing for SSFs would not present any new methods for market participants to engage in behavior that may be violative of Exchange Rules or any applicable law.

Further, as currently drafted, OneChicago Rule 902(e) provides that the Exchange may amend the minimum price fluctuation for SSFs without amending the text of the rule itself. Specifically, the clause ''or as otherwise stated by the Exchange'' effectively permits the Exchange to set a minimum price fluctuation by notice or other means. OneChicago is now proposing to amend OneChicago Rule 902(e) to delete

[15] Many futures products tied to interest rates trade in greater than two decimals. Although the per-contract notional value in these products are usually larger than the typical outright SSF notional value, OneChicago believes the need for interest rate precision is consistent across all of these products.

[16] 7 U.S.C. 1a(18).

[17] Although block trades typically have greater trade quantities than outright trades, block trades may trade in minimum quantities as low as five contracts for OneChicago's NoDivRisk products. Currently, participants in the block marketplace receive more favorable interest rates than those in the outright CLOB marketplace due to (1) the ability to pre-hedge block trades, and (2) four decimal pricing, which is currently available in blocks but not for outright trades.

[18] 15 U.S.C. 78f(b).

[19] 15 U.S.C. 78f(b)(5).

this clause, thereby providing certainty to market participants that the minimum price fluctuation is stated solely in OneChicago Rule 902, and will not be amended other than through the rule change process. OneChicago believes that its existing surveillance systems and capacity is sufficient to monitor and review trading activity for any violative trading in the SSF market.

B. Self-Regulatory Organization's Statement on Burden on Competition

OneChicago does not believe that the rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, in that the rule change simply allows an additional type of transaction to be priced in up to four decimal places. This change will allow all market participants to more precisely price the interest rate component of their outright transactions. By pricing futures trades more precisely, market participants will be able to submit more competitive bids and offers on the Exchange. Further, as described above, OneChicago believes this rule change will increase competition in that it will allow all market participants to transact at four decimal places, and not just sophisticated parties who qualify as eligible contract participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective on June 16, 2017 and will be implemented on July 10, 2017.

At any time within 60 days of the date of effectiveness of the proposed rule change, the Commission, after consultation with the CFTC, may summarily abrogate the proposed rule change and require that the proposed rule change be refiled in accordance with the provisions of Section 19(b)(1) of the Act.[20]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–OC–2017–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–OC–2017–02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–OC–2017–02 and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81018; File No. SR–FINRA–2017–023]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Reporting of Certain ATS Transactions in U.S. Treasury Securities

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 23, 2017, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as constituting a ''non-controversial'' rule change under paragraph (f)(6) of Rule 19b–4 under the Act,[3] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 6730 (Transaction Reporting) to provide a temporary exception to permit member alternative trading systems (''ATSs'') and member subscribers to report aggregate trade information to TRACE for certain transactions in U.S. Treasury Securities.

The text of the proposed rule change is available on FINRA's Web site at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA is proposing to amend Rule 6730 to add new Supplementary Material .06 (Temporary Exception for Aggregate Transaction Reporting of U.S. Treasury Securities Executed in ATS Trading Sessions) to provide members additional time to report individual transactions in U.S. Treasury Securities, as required by Rule 6730 (Transaction Reporting), that occur on member ATSs as part of a trading session, as described below.

Background

FINRA Rule 6730 sets forth a member's trade reporting obligations with regard to transactions in TRACE-Eligible Securities, which, beginning July 10, 2017,[4] will include U.S. Treasury Securities.[5] Pursuant to Rule 6730, each FINRA member that is a ''Party to a Transaction'' [6] in a TRACE-Eligible Security is obligated to report the transaction to TRACE within the prescribed period of time. The term ''Party to a Transaction'' means an introducing broker-dealer, if any, an executing broker-dealer, or a customer.[7] Thus, in a transaction in a TRACE-Eligible Security executed through an ATS between members, each member (and the ATS itself) is considered a Party to a Transaction and is required to report the trade.[8] Specifically, the ATS is required to report two transactions to TRACE: (1) The purchase of the security from one counterparty and (2) the sale of the security to the other counterparty. In addition, each FINRA member counterparty is required to report a buy or a sell, as applicable, identifying the ATS as the counterparty to each trade.[9]

FINRA understands that ATSs that permit subscribers to trade U.S. Treasury Securities on their platforms may permit subscribers to initiate a ''trading session,'' which is a discrete or timed order-matching event during which one or more additional subscribers can interact with the original order on the opposite side of the market or add to the initial order on the same side of the market.[10] Although it is possible that some trading sessions involve a single transaction between two counterparties like a typical trade, FINRA understands that most trading sessions include multiple participants on one or both sides of the market during the time period the trading session is open.

For example, suppose Subscriber A initiates a trading session to sell $25 million of a particular U.S. Treasury Security at a specific price. In a typical crossing scenario involving an ATS, the ATS would match the incoming sell order with a buy order from Subscriber B thus executing some or all of the original order. In this scenario, under TRACE rules, Subscriber A is required to report a sell to the ATS for the amount crossed, and Subscriber B would report a purchase from the ATS for that same amount.[11] The ATS would report two trades: A purchase from Subscriber A and a sell to Subscriber B. Under current rules, all of the reports are required to reflect the same terms of the trade and the same Time of Execution.[12]

FINRA understands that trading sessions involving U.S. Treasury Securities can, and often do, work in very different ways. Using the above example, Subscriber A may initiate a trading session to sell $25 million in a particular U.S. Treasury Security at a specific price. Subscriber B, however, may only wish to purchase $10 million. In this case, although there will be a sell from Subscriber A to the ATS and a subsequent sell from the ATS to Subscriber B (and offsetting trades for the purchase from the ATS by Subscriber B and the purchase from Subscriber A by the ATS), there may be further activity during the trading session. To continue the example, after Subscriber B agrees to purchase $10 million, Subscriber C agrees to purchase $15 million at the same price (meaning that, at this point, Subscriber A has sold all $25 million of the initial order). Subscriber D then joins the trading session and offers to sell $10 million of the same U.S. Treasury Security at the same price. Subscriber E purchases $5 million, and Subscriber B decides to purchase an additional $5 million. If, after the period of time defined by the ATS, no further interest is indicated, the trading session closes.

Reporting Obligations Under Rule 6730

Using the above example, at the end of the trading session, the individual trades are as follows:

Trade No.	Time	Subscriber	Buy/Sell	Amount (in millions)
	11:34:02.000	Subscriber A	Sell	$25
1	11:34:03.155	Subscriber B	Buy	10
2	11:34:03.483	Subscriber C	Buy	15
	11:34:04.003	Subscriber D	Sell	10
3	11:34:05.002	Subscriber E	Buy	5

[4] *See* Securities Exchange Act Release No. 79116 (October 18, 2016), 81 FR 73167 (October 24, 2016) (Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of File No. SR–FINRA–2016–027). *See also Regulatory Notice* 16–39 (October 2016).

[5] Rule 6710(p) will define a ''U.S. Treasury Security'' as ''a security, other than a savings bond, issued by the U.S. Department of the Treasury to fund the operations of the federal government or to retire such outstanding securities.'' The term ''U.S. Treasury Security'' also includes separate principal and interest components of a U.S. Treasury Security that has been separated pursuant to the Separate Trading of Registered Interest and Principal of Securities (''STRIPS'') program operated by the U.S. Department of Treasury. *See* Rule 6710(p).

[6] *See* Rule 6710(e).

[7] *See supra* note 6.

[8] *See* Question 7.4 in FINRA's Reporting of Corporate and Agencies Debt Frequently Asked Questions: Who reports trades executed through electronic trading systems that are themselves broker-dealers? All FINRA members that are ''parties to a transaction'' have a trade reporting obligation under TRACE Rules. Where two FINRA members effect/execute a transaction through an electronic trading system that is registered as a broker-dealer, both members, as well as the electronic trading system would have a trade reporting obligation. *See* Reporting of Corporate and Agencies Debt Frequently Asked Questions, available at *http://www.finra.org/industry/faq-reporting-corporate-and-agencies-debt-frequently-asked-questions-faq#7-4. See also Regulatory Notice* 14–53 (November 2014).

[9] Whether the ATS is involved in the clearance and settlement of a transaction does not change the TRACE trade reporting obligation for trades occurring through its system. *Regulatory Notice* 14–53 (November 2014).

[10] Different members use varying nomenclature to describe trading sessions. For example, one member ATS refers to these sessions as ''workups'' or ''workup sessions.'' In addition, the length of time a session remains open and other characteristics of how a session is structured may change from member to member. As used in the proposed rule change, the term ''trading session'' is meant to capture all variations of such types of sessions that member ATSs may use.

[11] Examples assume that each subscriber is a FINRA member.

[12] Under Rule 6710(d), the ''Time of Execution'' for a transaction in any TRACE-Eligible Security means ''the time when the Parties to a Transaction agree to all of the terms of the transaction that are sufficient to calculate the dollar price of the trade.''

Trade No.	Time	Subscriber	Buy/Sell	Amount (in millions)
4	11:34:05.877	Subscriber B	Buy	5
	11:34:07.877	Trading Session Closes		

FINRA understand that, under current practices, after the close of the trading session an ATS will provide each subscriber with a single trade message indicating the subscriber's aggregate activity during the trading session (including, for example, an aggregate size and average price), and that the execution time provided to a subscriber can vary depending upon the convention used by the particular ATS. FINRA also understands that, although information on the individual transactions within the trading session is generally available on a real-time basis to the subscribers during the trading session to track the status of the order, this information is not included on the final trade message, which FINRA understands currently is the message that would be used systematically by the member ATS and its subscribers for transaction reporting purposes.

Under Rule 6730, each individual trade that occurs during a trading session is a separate transaction and, as such, must be reported individually. For example, using the example above, at 11:34:03.155 (''Trade No. 1''), there is a trade agreed to between Subscribers A and B and all of the terms of the trade that are sufficient to calculate the dollar price of the trade are known at that time, including the security, the price, and the parties to the trade (*i.e.,* the Time of Execution'').[13] Thus, under current rules and guidance, FINRA would expect the following trade reports for Trade No. 1:

- Subscriber A reports a sell to the ATS for $10 million in the security with a Time of Execution of 11:34:03.155.
- Subscriber B reports a purchase from the ATS for $10 million in the security with a Time of Execution of 11:34:03.155.
- The ATS submits two reports, a buy from Subscriber A and a sell to Subscriber B for $10 million in the security, both with a Time of Execution of 11:34:03.155.

The same analysis would apply for each of the other individual trades that occurred during the trading session. Thus, under current TRACE reporting rules, the following reports would be required by all Parties to a Transaction with respect to the trades during the trading session in the above example:

Trade No.	TRACE reports	Quantity (in millions)	Time of execution
1	Subscriber A sell to ATS	$10	11:34:03.155
	ATS buy from Subscriber A	10	11:34:03.155
	ATS sell to Subscriber B	10	11:34:03.155
	Subscriber B buy from ATS	10	11:34:03.155
2	Subscriber A sell to ATS	15	11:34:03.483
	ATS buy from Subscriber A	15	11:34:03.483
	ATS sell to Subscriber C	15	11:34:03.483
	Subscriber C buy from ATS	15	11:34:03.483
3	Subscriber D sell to ATS	5	11:34:05.002
	ATS buy from Subscriber D	5	11:34:05.002
	ATS sell to Subscriber E	5	11:34:05.002
	Subscriber E buy from ATS	5	11:34:05.002
4	Subscriber D sell to ATS	5	11:34:05.877
	ATS buy from Subscriber D	5	11:34:05.877
	ATS sell to Subscriber B	5	11:34:05.877
	Subscriber B buy from ATS	5	11:34:05.877

Proposed Temporary Relief

The proposed rule change will, until July 10, 2018, permit members the flexibility to report trades that occurred in a U.S. Treasury Security executed within discrete ATS trading sessions (sometimes referred to as ''work-up sessions'') on an aggregate, rather than individual, basis. The proposed rule change is intended to provide members with additional time to complete systems changes necessary to report each individual transaction in the trading session as required by Rule 6730, as discussed below.

FINRA understands that certain ATSs that are active in the market for U.S. Treasury Securities currently are set up to deliver aggregate trading session transaction information to each subscriber that participated in the trading session through a single trade message generated at the conclusion of a trading session. The ATSs use this final trade message for purposes of back office processes (which would include generating trade reports) and believe their subscribers use the final trade messages similarly. As a result, FINRA understands that significant systems changes would be required by the ATSs to create and generate the individual trade information within a trading session in a form that could be integrated into the ATSs', as well as their subscribers', back office processes to enable the reporting of individual, rather than aggregate, trading session transaction information to TRACE, and that these changes cannot be made by July 10, 2017. As a result, FINRA is proposing to provide a temporary exception by adopting Supplementary Material .06 to permit members to report to TRACE aggregate, rather than individual, transaction information reflecting the aggregate size and average price of such transactions, and to permit trade reports to use a Time of Execution communicated by the ATS to each Party to a Transaction.[14]

[13] *See supra* note 12.

[14] FINRA notes that, even where aggregation is not necessary because only the ATS and two subscribers ultimately participated in a trading session resulting in a single cross, the proposed rule change permits members the flexibility to report a Time of Execution that is communicated by the ATS to each party. Thus, even where the trading session involves only one cross, member TRACE reports may reflect a Time of Execution that is, for

FINRA believes it is appropriate to provide the proposed relief in recognition of the fact that impacted members are unable to implement necessary changes by the July 10, 2017 effective date for TRACE reporting of transactions in U.S. Treasury Securities. FINRA believes the proposal strikes an appropriate balance in that FINRA will continue to receive transaction information for purchases and sales that occur as part of an ATS trading session, albeit aggregated. A member ATS availing itself of this exception must provide individual transaction information for each trade in a U.S. Treasury Security occurring in a trading session to FINRA upon request. In addition, FINRA notes that transparency will not be impacted by the proposed temporary relief because transaction information in U.S. Treasury Securities currently is not subject to dissemination.

FINRA has filed the proposed rule change for immediate effectiveness. The operative date of the proposed rule change will be July 10, 2017 and it will sunset on July 10, 2018, which FINRA believes will provide members with the additional time necessary to complete necessary systems changes and result in a more orderly implementation of the TRACE reporting requirements for Treasury securities.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[15] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. Based on discussions with multiple member ATSs, FINRA believes that additional time is necessary to permit members to program systems to comply with Rule 6730, which, beginning on July 10, 2017, will require that members report to TRACE each individual transaction in a U.S. Treasury Security.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The proposed rule change should benefit members whose trades are executed on member ATSs as part of a trading session, as it provides members with additional time to build or upgrade systems to enable reporting of individual transactions in the trading section. While the proposed rule change will temporarily lessen the requirements on ATSs and their subscribers as compared to other market participants, FINRA believes the proposed rule change is appropriate to allow sufficient time to make the technological changes necessary to comply with the rule and such accommodation will be limited in duration. Moreover, FINRA retains the right to require a member ATS availing itself of this exception to provide individual transaction information for each trade in a U.S. Treasury Security occurring in a trading session upon request.

The proposed temporary relief is not expected to undermine the potential benefits of Rule 6730, as the transaction information reflecting the aggregate size and average price of such transactions should still assist the regulators to conduct monitoring and surveillance of the U.S. Treasury Securities markets, in order to detect potential disruptive trading practices and risks to market stability.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[16] and subparagraph (f)(6) of Rule 19b–4 thereunder.[17]

FINRA has asked the Commission to waive the 30-day operative delay so that the proposal will become operative immediately upon filing. FINRA represents that it only recently was made aware of the significant technological changes to member systems that will be necessary to comply with FINRA's requirements to report transactions in U.S. Treasury Securities to TRACE. FINRA also represented that it was informed by members that these systems changes cannot be completed by July 10, 2017, the date on which the new reporting requirements come into force. The proposed rule change appears to be a reasonable accommodation for members who are affected by unforeseen difficulties associated with systems reprogramming because it is of reasonably short duration and FINRA will still be able to request full transaction information from an ATS that benefits from the accommodation. Therefore, to facilitate orderly application of the TRACE reporting rules on July 10, 2017, the Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest and designates the proposal operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2017–023 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

example, the beginning of the trading session or the end of the trading session.

[16] 15 U.S.C. 78s(b)(3)(A)(iii).

[17] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived the five-day prefiling requirement in this case.

[18] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2017–023. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2017–023 and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81017; File No. SR–CBOE–2017–050]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend a Pilot Program That Eliminates Position and Exercise Limits for Physically-Settled SPDR S&P 500 ETF Trust ("SPY") Options

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 22, 2017, Chicago Board Options Exchange, Incorporated (the "Exchange" or "CBOE") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a "non-controversial" proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to extend the operation of a pilot program that eliminates position and exercise limits for physically-settled SPY options ("SPY Pilot Program"). The text of the proposed rule change is provided below.

(additions are *italicized;* deletions are [bracketed])

* * * * *

Chicago Board Options Exchange, Incorporated Rules

* * * * *

Rule 4.11. Position Limits

No changes.

. . . *Interpretations and Policies:*

.01–.06 No change.

.07 The position limits under Rule 4.11 applicable to options on shares or other securities that represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that satisfy the criteria set forth in Interpretation and Policy .06 under Rule 5.3 shall be the same as the position limits applicable to equity options under Rule 4.11 and Interpretations and Policies thereunder; except that the position limits under Rule 4.11 applicable to option contracts on the securities listed in the below chart are as follows:

Security underlying option	Position limit
The DIAMONDS Trust (DIA)	300,000 contracts.
The Standard and Poor's Depositary Receipt Trust (SPY)	None.
The iShares Russell 2000 Index Fund (IWM)	500,000 contracts.
The PowerShares QQQ Trust (QQQ)	900,000 contracts.
The iShares MSCI Emerging Markets Index Fund (EEM)	500,000 contracts.

Position limits for SPY options are subject to a pilot program through [July 12, 2017] *July 12, 2018.*

.08 No change.

* * * * *

The text of the proposed rule change is also available on the Exchange's Web site (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Interpretation and Policy .07 to Rule 4.11 (Position Limits) to extend the

[19] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

duration of the SPY Pilot Program.[5] The SPY Pilot Program is currently scheduled to expire on July 12, 2017, and this proposal would extend the SPY Pilot Program through July 12, 2018. There are no substantive changes being proposed to the SPY Pilot Program.

In proposing to extend the SPY Pilot Program, the Exchange reaffirms its consideration of several factors that supported its original proposal to establish the SPY Pilot Program, which include: (1) The liquidity of the option and the underlying security; (2) the market capitalization of the underlying security and the securities that make up the S&P 500 Index; (3) options reporting requirements; and (4) financial requirements imposed by CBOE and the Commission. When the SPY Pilot Program was most recently renewed in July 2016, CBOE submitted a report providing an analysis of the SPY Pilot Program during the period June 2015 through April 2016 (the ''Pilot Report''). In the July 2016 extension, the Exchange stated that if it were to submit a proposal to either extend the SPY Pilot Program, adopt the SPY Pilot Program on a permanent basis, or terminate the SPY Pilot Program, it would submit another Pilot Report covering the period since the previous extension.[6] Accordingly, the Exchange is submitting another Pilot Report that details CBOE's experience with the SPY Pilot Program. The Pilot Report now includes the period of May 2016 through April 2017. The Pilot Report is attached as Exhibit 3 [sic]. CBOE notes that it is unaware of any problems created by the SPY Pilot Program and does not foresee any as a result of the proposed extension. In extending the SPY Pilot Program, the Exchange states that if CBOE were to propose another extension, permanent approval or termination of the SPY Pilot Program, the Exchange will submit another Pilot Report covering the period since the previous extension, which will be submitted at least 30 days before the end of the proposed extension. If the SPY Pilot Program is not extended or adopted on a permanent basis by July 12, 2018, position limits in SPY will revert to their Pre-Pilot levels.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[7] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[8] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Specifically, the Exchange believes that extending the SPY Pilot Program promotes just and equitable principles of trade by permitting market participants, including market makers, institutional investors and retail investors, to establish greater positions when pursuing their investment goals and needs. Extending the SPY Pilot Program will give the Exchange and the Commission additional time to evaluate the pilot and its effect on the market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any aspect of competition, whether between the Exchange and its competitors, or among market participants. Instead, the proposed rule change is designed to allow the SPY Pilot Program to continue as the Exchange expects other SROs will propose similar extensions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[9]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[10] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[11] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay, noting that such waiver will allow the Exchange to extend the pilot program prior to its expiration on July 12, 2017. In addition, the Exchange believes that waiver of the operative delay is consistent with the protection of investors and the public interest because it will allow for the least amount of market disruption as the pilot will continue as it currently does maintaining the status quo. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[5] *See* Securities Exchange Act Release Nos. 67937 (September 27, 2012), 77 FR 60489 (October 3, 2012) (SR–CBOE–2012–091); 70878 (November 14, 2013), 78 FR 69737 (November 20, 2013) (SR–CBOE–2013–106); 74149 (January 27, 2015) 80 FR 5606 (February 2, 2015) (SR–CBOE–2015–008); 75381 (July 7, 2015) 80 FR 40111 (July 13, 2015) (SR–CBOE–2015–065); and 78131 (June 22, 2016) 81 FR 42011 (June 28, 2016) (SR–CBOE–2016–052).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81019; File No. SR–MIAX–2017–29]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 19, 2017, Miami International Securities Exchange LLC (''MIAX Options'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Options Fee Schedule (the ''Fee Schedule'').

The text of the proposed rule change is available on the Exchange's Web site at *http://www.miaxoptions.com/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the list of MIAX Select Symbols [3] contained in the Priority Customer Rebate Program (the ''Program'') [4] of the Exchange's Fee Schedule to delete the option class ''YHOO'' associated with Yahoo! Inc. (''Yahoo!''). The Exchange initially created the list of MIAX Select Symbols on March 1, 2014,[5] and has added and removed option classes from that list since that time.[6] On June 13, 2017, Yahoo completed the sale of its operating business to Verizon Communications Inc. Subsequently, Yahoo! was renamed Altaba Inc. (''Altaba''), and, effective June 19, 2017, began trading under the ticker symbol ''AABA.'' Because Altaba's assets consist primarily of equity investments, short-term debt investments, and cash, it was required to register as an investment company under the Investment Company Act of 1940. The completion of the sale of the operating business to Verizon did not otherwise affect shares of Yahoo! common stock, which now represent shares of common stock of Altaba after it registered as an investment company and changed its name to Altaba.[7]

The Exchange has decided not to include Altaba in the list of MIAX Select Symbols. Thus, the Exchange is amending its Fee Schedule to delete the symbol YHOO from the list of MIAX Select Symbols contained in the Program to correspond with this change. This amendment is intended to

[3] The term ''MIAX Select Symbols'' means options overlying AAL, AAPL, AIG, AMAT, AMD, AMZN, BA, BABA, BBRY, BIDU, BP, C, CAT, CBS, CELG, CLF, CVX, DAL, EBAY, EEM, FB, FCX, GE, GILD, GLD, GM, GOOGL, GPRO, HAL, HTZ, INTC, IWM, JCP, JNJ, JPM, KMI, KO, MO, MRK, NFLX, NOK, NQ, ORCL, PBR, PFE, PG, QCOM, QQQ, RIG, S, SPY, SUNE, T, TSLA, USO, VALE, VXX, WBA, WFC, WMB, WY, X, XHB, XLE, XLF, XLP, XOM, XOP and YHOO.

[4] *See* section (1)(a)(iii) of the Fee Schedule for a complete description of the Program.

[5] *See* Securities Exchange Act Release No. 71700 (March 12, 2014), 79 FR 15188 (March 18, 2014) (SR–MIAX–2014–13).

[6] *See* Securities Exchange Act Release Nos. 79301 (November 14, 2016), 81 FR 81854 (November 18, 2016) (SR–MIAX–2016–42); 74291(February 18, 2015), 80 FR 9841 (February 24, 2015) (SR–MIAX–2015–09); 74288 (February 18, 2015), 80 FR 9837 (February 24, 2015) (SR–MIAX–2015–08); 73328 (October 9, 2014), 79 FR 62230 (October 16, 2014) (SR–MIAX–2014–50); 72567 (July 8, 2014), 79 FR 40818 (July 14, 2014) (SR–MIAX–2014–34); 72356 (June 10, 2014), 79 FR 34384 (June 16, 2014) (SR–MIAX–2014–26); 71700 (March 12, 2014), 79 FR 15188 (March 18, 2014) (SR–MIAX–2014–13).

[7] *See* the home page of the Altaba Web site located at: *https://www.altaba.com/.*

eliminate any potential confusion and to make it clear to market participants that, effective June 19, 2017, Yahoo!/Altaba will not be a MIAX Select Symbol contained in the Program.

2. Statutory Basis

The Exchange believes that its proposal to amend its fee schedule is consistent with Section 6(b) of the Act [8] in general, and furthers the objectives of Section 6(b)(4) of the Act,[9] in that it is an equitable allocation of reasonable fees and other charges among Exchange members and other persons using its facilities, and 6(b)(5) of the Act,[10] in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

In particular, the proposal to delete the symbol YHOO from the list of MIAX Select Symbols contained in the Program is consistent with Section 6(b)(4) of the Act because the proposed change will allow for continued benefit to investors by providing them an updated list of MIAX Select Symbols contained in the Program on the Fee Schedule.

The Exchange believes that the proposal to amend an option class that qualifies for the credit for transactions in MIAX Select Symbols is fair, equitable and not unreasonably discriminatory. The Exchange believes that the Program itself is reasonably designed because it incentivizes providers of Priority Customer [11] order flow to send that Priority Customer order flow to the Exchange in order to receive a credit in a manner that enables the Exchange to improve its overall competitiveness and strengthen its market quality for all market participants. The Program, which provides increased incentives in high volume select symbols, is also reasonably designed to increase the competitiveness of the Exchange with other options exchanges that also offer increased incentives to higher volume symbols.

The Exchange also believes that its proposal is consistent with Section 6(b)(5) of the Act because it will apply equally to all Priority Customer orders in MIAX Select Symbols in the Program. All similarly situated Priority Customer orders in MIAX Select Symbols are subject to the same rebate schedule, and access to the Exchange is offered on terms that are not unfairly discriminatory.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is a not a competitive filing but rather is designed to update the list of MIAX Select Symbols contained in the Program in order to avoid potential confusion on the part of market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[12] and Rule 19b–4(f)(2) [13] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MIAX–2017–29 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2017–29. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2017–29 and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81024; File No. SR–ISE–2017–54]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Non-Priority Customer License Surcharge

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 12, 2017, Nasdaq ISE, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to apply the Non-Priority Customer license surcharge set forth in Section IV.B of the Schedule of Fees to orders that are routed to away markets.

The text of the proposed rule change is available on the Exchange's Web site at *www.ise.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to apply the Non-Priority Customer (*i.e.,* Market Maker,[3] Non-Nasdaq ISE Market Maker,[4] Firm Proprietary [5]/Broker-Dealer,[6] and Professional Customer [7]) license surcharge set forth in Section IV.B of the Schedule of Fees to orders in those licensed products [8] that are routed to one or more exchanges in connection with the Options Order Protection and Locked/Crossed Market Plan (the ''Plan''). The Exchange initially filed the proposed pricing changes on June 1, 2017 (SR–ISE–2017–50). On June 12, 2017, the Exchange withdrew that filing and submitted this filing.

Today, the Exchange charges Non-Priority Customers route-out fees for orders in Non-Select Symbols [9] that are routed to away markets in connection with the Plan. Specifically as set forth in Section IV.F of the Schedule of Fees, Non-Priority Customer orders pay a route-out fee of $0.95 per contract in Non-Select Symbols. The route-out fees offset costs incurred by the Exchange in connection with using unaffiliated broker-dealers to access other exchanges for linkage executions. In addition, as set forth in Section IV.B of the Schedule of Fees, the Exchange presently charges a $0.25 license surcharge for all Non-Priority Customer orders in NDX and a $0.10 license surcharge for all Non-Priority Customer orders in BKX (together, ''License Surcharge''). This License Surcharge currently applies to all BKX and NDX orders executed on the Exchange, but is not applied when those orders are routed to away markets in connection with the Plan. The Exchange therefore proposes to apply the License Surcharge to such orders, specifically by adding language in Section IV.B of the Schedule of Fees that the Non-Priority Customer License Surcharge applies to all executions in BKX and NDX, including executions of BKX and NDX orders that are routed to one or more exchanges in connection with the Plan. For example, all Non-Priority Customer orders in NDX that are routed to away markets would be assessed a $0.25 per contract License Surcharge and a $0.95 per contract route-out fee under this proposal.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[11] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [12]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [13] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[14] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [15]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The term ''Market Makers'' refers to ''Competitive Market Makers'' and ''Primary Market Makers'' collectively. *See* Rule 100(a)(25).

[4] A ''Non-Nasdaq ISE Market Maker'' is a market maker as defined in Section 3(a)(38) of the Securities Exchange Act of 1934, as amended, registered in the same options class on another options exchange.

[5] A ''Firm Proprietary'' order is an order submitted by a member for its own proprietary account.

[6] A ''Broker-Dealer'' order is an order submitted by a member for a broker-dealer account that is not its own proprietary account.

[7] A ''Professional Customer'' is a person or entity that is not a broker/dealer and is not a Priority Customer. A ''Priority Customer'' is a person or entity that is not a broker/dealer in securities, and does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s), as defined in ISE Rule 100(a)(37A).

[8] The Exchange assesses a license surcharge for NDX and BKX. BKX, which represents options on the KBW Bank Index (''BKX''), is currently not traded on the Exchange. NDX represents options on the Nasdaq-100 Index traded under the symbol NDX (''NDX'').

[9] ''Non-Select Symbols'' are options overlying all symbols that are not in the Penny Pilot Program. NDX and BKX are Non-Select Symbols.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(4) and (5).

[12] Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[13] *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[14] *See NetCoalition,* at 534–535.

[15] *Id.* at 537.

national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . ..'' [16] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange believes that its proposal to apply the License Surcharge to Non-Priority Customer orders in licensed products that are routed to away markets in connection with the Plan is reasonable and equitable because it offsets both the costs associated with executing orders on away markets as well as the licensing costs associated with listing and trading these products. In particular, the Exchange's route-out fees are presently not calculated to cover the licensing costs for BKX and NDX. The Exchange notes that a license agreement is required to trade these products regardless of whether the order is executed on the Exchange or routed to another exchange in connection with the Plan. As such, the Exchange believes that extending the License Surcharge to those orders that are routed to away markets (in addition to those orders executed on the Exchange) is a reasonable and equitable means of recovering the costs of the license. Furthermore, the Exchange must pay the actual transaction fees charged by the exchange the order is routed to, which includes the license surcharge that such exchange assesses for those products. The Exchange's route-out fees are currently not calculated to cover these license surcharges assessed by other exchanges and therefore seeks to recover these costs under this proposal. For example, an NDX order that is routed to the Chicago Board Options Exchange (''CBOE'') in connection with the Plan would be assessed a $0.25 license surcharge by CBOE on top of the actual transaction fees that CBOE would charge for the NDX order.[17] The Exchange's route-out fees are presently assessed as fixed fees, unlike other exchanges, which, in addition to a fixed route-out fee, assess the actual transaction fees charged by the exchange the order is routed to.[18]

The Exchange also believes that its proposal is reasonable and equitable because Non-Priority Customers would be able to avoid paying the License Surcharge by sending the Exchange orders in these licensed products to be routed to another market and only pay the Exchange's route-out fee. The Exchange would, however, still be required to pay all of the actual transaction fees (including the license surcharge) charged by the exchange the order is routed to. For example, a Non-Priority Customer order in NDX that is routed to CBOE today would only be assessed the $0.95 per contract route-out fee while the Exchange would pay the $0.25 per contract license surcharge on top of the actual transaction fees CBOE would charge for the NDX order. The Exchange therefore believes that it is reasonable and equitable to assess the License Surcharge to orders in those licensed products which are routed to other exchanges in order to avoid this scenario.

Finally, the Exchange believes that the proposed fee change is equitable and not unfairly discriminatory because the Exchange will apply the same fee to all similarly situated members. In particular, the License Surcharge would be applied to all Non-Priority Customer orders in those licensed products which are routed to away markets in connection with the Plan. The Exchange believes it is equitable and not unfairly discriminatory to assess this surcharge on all participants other than Priority Customers because the Exchange seeks to encourage Priority Customer order flow and the liquidity such order flow brings to the marketplace, which in turn benefits all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the proposed application of the License Surcharge to orders that are routed to one or more exchanges in connection with the Plan does not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition from other exchanges. If the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that its proposal will impair the ability of members to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[19] and Rule 19b–4(f)(2) [20] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81021; File No. SR–NYSE–2017–17]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change To Require Listed Companies To Provide Advance Notice of Dividend Announcements to the Exchange

June 26, 2017.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on June 13, 2017, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Listed Company Manual (the ''Manual'') to require listed companies to provide notice to the Exchange at least 10 minutes before making any public announcement with respect to a dividend or stock distribution in all cases, including outside of the hours in which the Exchange's immediate release policy is in operation. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Manual to require listed companies to provide notice to the Exchange at least 10 minutes before making any public announcement with respect to a dividend or stock distribution in all cases, including outside of the hours in which the Exchange's immediate release policy is in operation.

The Exchange's immediate release policy, set forth in Sections 202.05 and 202.06 of the Manual, already requires companies releasing material news between 7.00 a.m. ET and the NYSE close (generally 4.00 p.m. ET) to call the Exchange's Market Watch team at least 10 minutes before issuing their announcement to discuss the content of the announcement and also email a copy of the proposed announcement to Market Watch at least 10 minutes before its release. Listed companies announcing dividends during these hours are required to comply with the immediate release policy in connection with such announcement.

Section 204.12 of the Manual requires listed companies to give prompt notice to the Exchange as to any dividend action or action relating to a stock distribution in respect of a listed stock (including the omission or postponement of a dividend action at the customary time as well as the declaration of a dividend). This notice must be given at least ten days in advance of the record date and is in addition to the requirement to publicly disclose the information pursuant to the immediate release policy. The dividend notice must be given to the Exchange in accordance with Section 204.00.[4] Notice must be given as soon as possible after declaration and in any event, no later than simultaneously with the announcement to the news media.

In addition, Section 204.21 of the Manual requires listed companies to give prompt notice to the Exchange of the fixing of a date for the taking of a record of shareholders, or for the closing of transfer books (in respect of a listed security), for any purpose. The notice must state the purpose or purposes for which the record date has been fixed. This notice must be provided to the

[4] Section 204.00 requires that such notice must be provided via a web portal or email address specified by the Exchange on its Web site, except in emergency situations, when notification may instead be provided by telephone and confirmed by facsimile as specified by the Exchange on its Web site.

Exchange in accordance with Section 204.00.

The Exchange proposes to amend each of Sections 204.12 and 204.21 to specify that notice of any dividend or stock distribution required by Section 204.12 must be provided to the Exchange at least 10 minutes before any public announcement, including when such announcement is being made outside of Exchange trading hours. The principal effect of this amendment would be to require listed companies to provide 10 minutes advance notice to the Exchange with respect to a dividend announcement made at any time, rather than just during the hours of operation of the immediate release policy as is currently the case.

The Exchange also proposes to amend Section 202.06(B) to emphasize the Exchange's consistent interpretation of that rule as requiring listed companies to comply with the immediate release policy with respect to all announcements relating to a dividend or stock distribution.

The Exchange believes there are significant benefits to requiring listed companies to provide all announcements of dividends and stock distributions to the Exchange prior to their public dissemination. In particular, if the Exchange is provided dividend information prior to its public availability, Exchange staff will be able to address any issues that may arise in relation to any announcement of a dividend or stock distribution. The proposed advance notice requirement would enable Exchange staff to ensure that a listed company's proposed dividend schedule complied with applicable Exchange requirements, including the requirement to provide 10 days advanced notice of the record date, and that the company's disclosure of the application of the Exchange's ''ex'-dividend trading policy was accurate. The Exchange intends to have staff available at all times to review dividend notifications immediately upon receipt, regardless of what time or day of the week they are provided. The staff will contact a listed company immediately if there is a problem with its notification. Addressing problems with dividend notifications before they are issued publicly will avoid any confusion in the marketplace resulting from the dissemination of inaccurate information.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b)[5] of the Act, in general, and furthers the objectives of Section 6(b)(5) of the Act,[6] in particular in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed amendment is consistent with the protection of investors and the public interest because it will ensure that Exchange staff is able to address any rule compliance problems with a listed company's dividend schedule before it is publicly announced.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change is consistent with Section 6(b)[7] of the Act, in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed amendment is consistent with the protection of investors and the public interest because it will ensure that Exchange staff is able to address any rule compliance problems with a listed company's dividend schedule before it is publicly announced.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[5] 15 U.S.C. 78f(b).

[6] 15 U.S.C. 78f(b)(5).

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSE–2017–17 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2017–17. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for

inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2017–17 and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–81023; File No. SR–GEMX–2017–25]

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Non-Priority Customer License Surcharge

June 26, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 12, 2017, Nasdaq GEMX, LLC (''GEMX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to apply the Non-Priority Customer license surcharge set forth in Section I of the Schedule of Fees to orders that are routed to away markets.

The text of the proposed rule change is available on the Exchange's Web site at *www.ise.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to apply the Non-Priority Customer (*i.e.,* Market Maker,[3] Non-Nasdaq GEMX Market Maker,[4] Firm Proprietary [5]/Broker-Dealer,[6] and Professional Customer [7]) license surcharge set forth in Section I of the Schedule of Fees to NDX [8] orders that are routed to one or more exchanges in connection with the Options Order Protection and Locked/Crossed Market Plan (the ''Plan''). The Exchange initially filed the proposed pricing changes on June 1, 2017 (SR–GEMX–2017–22). On June 12, 2017, the Exchange withdrew that filing and submitted this filing.

Today, the Exchange charges Non-Priority Customers route-out fees for orders in Non-Penny Symbols [9] that are routed to away markets in connection with the Plan. Specifically as set forth in Section II.A of the Schedule of Fees, Non-Priority Customer orders pay a route-out fee of $0.95 per contract in Non-Penny Symbols. The route-out fees offset costs incurred by the Exchange in connection with using unaffiliated broker-dealers to access other exchanges for linkage executions. Also as set forth in Section I of the Schedule of Fees, the Exchange presently charges a $0.25 license surcharge for all Non-Priority Customer orders in NDX (''NDX Surcharge''). The NDX Surcharge currently applies to all NDX orders executed on the Exchange, but is not applied when those orders are routed to away markets in connection with the Plan. The Exchange therefore proposes to apply the NDX Surcharge to such orders by adding language in note 9 of Section I of the Schedule of Fees to state that the NDX Surcharge applies to all NDX executions, including executions of NDX orders that are routed to one or more exchanges in connection with the Plan. As such, all Non-Priority Customer orders in NDX that are routed to away markets would be assessed a $0.25 per contract NDX Surcharge and a $0.95 per contract route-out fee.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[11] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [12]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [13] (''NetCoalition'') the D.C. Circuit upheld

[11] 15 U.S.C. 78f(b)(4) and (5).

[12] Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[13] *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[14] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [15]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [16] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

The Exchange believes that its proposal to apply the NDX Surcharge to Non-Priority Customer orders in NDX that are routed to away markets in connection with the Plan is reasonable and equitable because it offsets both the costs associated with executing orders on away markets as well as the licensing costs associated with listing and trading NDX. The Exchange's route-out fees are presently not calculated to cover the licensing costs for NDX. The Exchange notes that a license agreement is required to trade NDX regardless of whether the NDX order is executed on the Exchange or routed to another exchange in connection with the Plan. As such, the Exchange believes that extending the NDX Surcharge to NDX orders routed to away markets (in addition to those orders executed on the Exchange) is a reasonable and equitable means of recovering the costs of the license. Furthermore, the Exchange must pay the actual transaction fees charged by the exchange the NDX order is routed to, which includes the license surcharge that such exchange assesses for NDX orders. The Exchange's route-out fees are currently not calculated to cover these license surcharges assessed by other exchanges and therefore seeks to recover these costs under this proposal. For example, an NDX order that is routed to the Chicago Board Options Exchange (''CBOE'') in connection with the Plan would be assessed a $0.25 license surcharge by CBOE on top of the actual transaction fees CBOE would charge for the NDX order.[17] The Exchange's route-out fees are presently assessed as fixed fees, unlike other exchanges, which, in addition to a fixed route-out fee, assess the actual transaction fees charged by the exchange the order is routed to.[18]

The Exchange also believes that its proposal is reasonable and equitable because Non-Priority Customers would be able to avoid paying the NDX Surcharge by sending the Exchange NDX orders to be routed to another market and only pay the Exchange's route-out fee. The Exchange would, however, still be required to pay all of the actual transaction fees (including the license surcharge) charged by the exchange the order is routed to. For example, a Non-Priority Customer order in NDX that is routed to CBOE today would only be assessed the $0.95 per contract route-out fee while the Exchange would pay the $0.25 per contract license surcharge on top of the actual transaction fees CBOE would charge for the NDX order. The Exchange therefore believes that it is reasonable and equitable to assess the NDX Surcharge to NDX orders that are routed to other exchanges in order to avoid this scenario.

Finally, the Exchange believes that the proposed fee change is equitable and not unfairly discriminatory because the Exchange will apply the same fee to all similarly situated members. In particular, the NDX Surcharge would be applied to all Non-Priority Customer orders routed to away markets in connection with the Plan. The Exchange believes it is equitable and not unfairly discriminatory to assess this surcharge on all participants other than Priority Customers because the Exchange seeks to encourage Priority Customer order flow and the liquidity such order flow brings to the marketplace, which in turn benefits all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the proposed application of the NDX Surcharge to NDX orders that are routed to one or more exchanges in connection with the Plan does not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition from other exchanges. If the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that its proposal will impair the ability of members to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[19] and Rule 19b–4(f)(2) [20] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–GEMX–2017–25 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–GEMX–2017–25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–GEMX–2017–25 and should be submitted on or before July 21, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SELECTIVE SERVICE SYSTEM

Privacy Act; System of Records

AGENCY: Selective Service System.

ACTION: Notice of Amendment to Systems of Records.

SUMMARY: Selective Service System has amended an existing system of records subject to the Privacy Act of 1974. This action is necessary to meet the requirements of the Privacy Act to publish in the **Federal Register** notice of the existence and character of system of records maintained by the agency.

DATES: The changes became effective in 2012. The system has been operational for five years.

FOR FURTHER INFORMATION CONTACT: Chief Information Officer, Office of Information Technology, Operations Directorate, Selective Service System, 1515 Wilson Boulevard, Arlington, Virginia 22209–2425.

SUPPLEMENTARY INFORMATION: This notice serves to update, amend, and consolidate the System of Records Notice for SSS–5 Reserve Force and National Guard Personnel Records; SSS–6 Uncompensated Personnel Records; and SSS–8 Pay Records published in the **Federal Register** September 20, 2011, Vol. 76, No 182.

Authority: 5 U.S.C. 552a

SYSTEM NAME:

Integrated Mobilization Information Management System (IMIS) and Reserve and National Guard Personnel Records.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

National Headquarters, Selective Service System, 1515 Wilson Boulevard, Arlington, VA 22209–2425.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The Selective Service System is an independent agency of the United States government that maintains information on those potentially subject to military conscription. The statutory mission of the Selective Service is to be prepared to provide trained and untrained personnel to the DoD in the event of a national emergency and to be prepared to implement an alternative service program for registrants classified as conscientious objectors. These records are maintained at the National Headquarters Office in Arlington, VA.

The Selective Service System's Integrated Mobilization Information Management System (IMIS) is an application created by the Agency to manage reserve force officers and resources assigned to the Agency, various budget allocations and expenditures, local area boards, state directors, and Agency material resources. The Agency developed IMIS to manage resources needed to facilitate mission readiness; resources consist of assigned personnel, material, and budget management.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records contain information relating to selection, placement and utilization of military personnel assigned to SSS such as name, rank, Social Security account number, date of birth, physical profile, residence and business addresses, and telephone numbers.

AUTHORITY OF MAINTENANCE OF THE SYSTEM:

Chapter 49, Military Selective Service Act (50 U.S.C. 3801 *et seq.*)

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of these series of records is to provide information on Officers and Warrant Officers of the Reserves and National Guard currently assigned to the SSS. This system is used to verify payment information for reserve force officers assigned to the agency. Records includes full name of the individual, date of birth, selective service number (if available), mailing address, payment information, financial reports and reimbursements. Documents are scanned into this system for computer-based storage and shared with the National Business Center in Denver, Colorado. This system has some PII information unique solely to the system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Data is kept secure in accordance with the National Institutes of Standards and Technologies' *Special Publication 800–53* guidelines and the *Federal Information Security Management Act of 2002.*

[21] 17 CFR 200.30–3(a)(12).

RETRIEVABILITY:

Records are indexed by name and Service Number.

SAFEGUARDS:

a. Use of the records or any information contained therein is limited to Selective Service System employees or Reserve Forces Members whose official duties require access.

b. Records maintained by authorized personnel only, who have been trained in the rules and regulations concerning disclosures of information.

c. Periodic security checks and other emergency planning.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Information Officer, Office of Information Technology, Operations Directorate, Selective Service System, 1515 Wilson Boulevard, Arlington, VA 22209–2425.

RETENTION AND DISPOSAL:

Temporary. Cutoff at the end of the calendar year. Destroy immediately after employee is no longer assigned to Selective Service System.

RECORD ACCESS PROCEDURES:

SSS Reserve Forces Members or former members who wish to gain access to their records should make their request in writing addressed to: Selective Service System, 1515 Wilson Boulevard, Arlington, VA 22209–2425, Attn: Military Personnel.

It is necessary to include the Member's full name, rank, branch of service, address, and Social Security Account Number.

CONTESTING RECORD PROCEDURES:

See Record Access Procedures, above.

RECORD SOURCE CATEGORIES:

Information in this system is obtained directly from the individual to whom it applies or is derived from information supplied or is provided by the individual Branch of the Armed Forces.

SYSTEMS EXEMPTED FOR CERTAIN PROVISIONS OF THE ACT:

None.

Dated: June 22, 2017.

Donald M. Benton,

Director.

[FR Doc. 2017–13768 Filed 6–29–17; 8:45 am]

BILLING CODE 8015–01–P

SELECTIVE SERVICE SYSTEM

Privacy Act; System of Records: Amendments

AGENCY: Selective Service System.

ACTION: Notice of Amendment to Systems of Records.

SUMMARY: Selective Service System has amended an existing system of records subject to the Privacy Act of 1974. This action is necessary to meet the requirements of the Privacy Act to publish in the **Federal Register** notice of the existence and character of system of records maintained by the agency.

DATES: The changes became effective in 2012. The system has been operational for five years.

FOR FURTHER INFORMATION CONTACT: Chief Information Officer, Office of Information Technology, Operations Directorate, Selective Service System, 1515 Wilson Boulevard, Arlington, Virginia 22209–2425.

SUPPLEMENTARY INFORMATION: This notice serves to update, amend, and consolidate the Systems of Records Notice for SSS–2 General Files Registrant Processing; SSS–3 Reconciliation Service Records; SSS–4 Registrant Information Bank Records; SSS–7 Suspected Violator Inventory System; and SSS–9 Registrant Reservation Records published in the **Federal Register** September 20, 2011, Vol. 76, No 182.

AUTHORITY:

5 U.S.C. 552a.

SYSTEM NAME:

Registration, Compliance and Verification (RCV) System

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Data Management Center, Operations Directorate, Great Lakes, Illinois 60088.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Registrants of the Selective Service System after 1979 (men born after December 31, 1959). Young men register upon reaching their 18th birthday. By current law, women are not required to register.

a. Registration Form.

b. Computer database, computer tape and microfilm copies containing information provided by the registrant on Registration Form.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Chapter 49, Military Selective Service Act (50 U.S.C. 3801 *et seq.*)

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The *Military Selective Service Act,* Selective Service regulations, and the President's Proclamation on Registration requires those registering with Selective Service to provide their full name, date of birth, address, sex, Social Security Account Number, if they have one, and their signature. The principal purpose of the requested information is to establish or verify a person's registration with the Selective Service System. Registration information may be shared with the following government agencies for the purposes stated:

Department of Justice—For review and processing of suspected violations of the Military Selective Service Act (MSSA), for perjury, and for defense of a civil action arising from administrative processing under such Act.

Department of State and U.S. Citizenship and Immigration Services—For collection and evaluation of data to determine a person's eligibility for United States citizenship.

Department of Defense and U.S. Coast Guard—To exchange data concerning registration, classification, induction, and examination of registrants and for identification of prospects for recruiting.

Department of Labor—To assist veterans in need of data concerning reemployment rights, and for determination of eligibility for benefits under the Workforce Investment Act.

Department of Education—To determine eligibility for student financial assistance.

U.S. Census Bureau—For the purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of Title 13.

Office of Personnel Management and U.S. Postal Service—To determine eligibility for employment.

Department of Health and Human Services—To determine a person's proper Social Security Account Number and for locating parents pursuant to the Child Support Enforcement Act.

State and Local Governments—To provide data that may constitute evidence and facilitate the enforcement of state and local law.

Alternative Service Employers—During conscription, to exchange information with employers regarding a registrant who is a conscientious objector for the purpose of placement and supervision of performance of alternative service in lieu of induction into the military service.

General Public—Registrant's name, Selective Service Registration Number, Date of Birth and Classification, (Military Selective Service Act, 50 U.S.C. 3806(h)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on microfilm and in the computer system. Microfilm records are indexed by Document Locator Number, and the computer system lists these numbers for document retrieval from the microfilm records.

RETRIEVABILITY:

The system is indexed by Selective Service Number, but records can be located by searching for specific data.

SAFEGUARDS:

Measures that have been taken to prevent unauthorized disclosures of records are:

a. Records are maintained by authorized personnel only, who have been trained in the rules and regulations concerning disclosures of information; offices are locked when authorized personnel are not on duty, and are protected by an electronic security access system at all times.

b. Periodic security checks and other emergency planning.

c. Microfilm records transferred to a Federal Records Center for storage are boxed and taped; records in transit for temporary custody of another office are sealed.

d. Selective Service System employees access the application via customized user interface—access is controlled by user id and password credentials.

e. Records eligible for destruction are destroyed by maceration, shredding, burning or purging from the RCV database.

RETENTION AND DISPOSAL:

Individual Processing Records:

1. Registration Form—Destroyed by maceration when its information has been transferred onto microfilm, added to the computer system, and an image has been transferred to the National Archives. Original microfilm is stored at a Federal Records Center. A microfilm non-record copy is retained at the Data Management Center, in locked steel cabinets. The copies are retained until no longer needed for reference purposes. Also, registration files are stored on hard drives/network storage.

2. The record copy of microfilm and computer database will be retained until the registrant reaches 85 years of age.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Information Officer, Office of Information Technology, Operations Directorate, Selective Service System, 1515 Wilson Boulevard, Arlington, VA 22209–2425.

RECORD ACCESS PROCEDURES:

The agency office address to which inquiries should be addressed and the location at which an individual may present a request as to whether the RCV System (after 1979) contains records pertaining to himself is: Chief Information Officer, Selective Service System, 1515 Wilson Boulevard, Arlington, VA 22209–2425.

It is necessary to furnish the following information in order to identify the individual whose records are requested:

a. Full name of the individual.

b. Selective Service Number or Social Security Account Number, date of birth and address at the time of registration if Selective Service Number is not known.

c. Mailing address to which the reply should be mailed.

CONTESTING RECORD PROCEDURES:

See Record Access Procedures, above.

RECORD SOURCE CATEGORIES:

Information contained in the Registrant Registration Records System is obtained from the individual.

SYSTEMS EXEMPTED FOR CERTAIN PROVISIONS OF THE ACT:

None.

Dated: June 22, 2017.

Donald M. Benton,

Director.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #15187 and #15188; TENNESSEE Disaster #TN–00105]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of TENNESSEE

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of TENNESSEE (FEMA–4320–DR), dated 06/23/2017.

Incident: Severe Storms, Straight-line Winds, and Flooding.

Incident Period: 05/27/2017 through 05/28/2017.

DATES: Effective 06/23/2017.

Physical Loan Application Deadline Date: 08/22/2017.

Economic Injury (Eidl) Loan Application Deadline Date: 03/23/2018.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW., Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 06/23/2017, Private Non-Profit organizations that provide essential services of governmental nature may file disaster loan applications at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Blount, Cumberland, Fayette, Knox, Loudon, Morgan, Putnam, Rhea, Roane, Sevier, Shelby, Smith.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	2.500
Non-Profit Organizations without Credit Available Elsewhere	2.500
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	2.500

The number assigned to this disaster for physical damage is 15187B and for economic injury is 15188B.

BILLING CODE 8025–01–P

DEPARTMENT OF STATE

[Public Notice 10051]

E.O. 13224 Designation of Mohammad Yusuf Shah, aka Mohd Yusuf Shah, aka Mohammad Yousuf Shah, aka Mohd Yousuf Shah, aka Mohd Yosuf Shah, aka Mohammed Yusaf Shah, aka Syed Mohammed Yusuf Shah, aka Syed Salahuddin, aka Syed Salahudin, aka Sayeed Salahudeen, aka Peer Sahib, aka Salauddin as a Specially Designated Global Terrorist

Acting under the authority of and in accordance with section 1(b) of Executive Order 13224 of September 23, 2001, as amended by Executive Order 13268 of July 2, 2002, and Executive Order 13284 of January 23, 2003, I hereby determine that the person known as Mohammad Yusuf Shah, also known as Mohd Yusuf Shah, also known as Mohammad Yousuf Shah, also known as Mohd Yousuf Shah, also known as Mohd Yosuf Shah, also known as Mohammed Yusaf Shah, also known as Syed Mohammed Yusuf Shah, also known as Syed Salahuddin, also known as Syed Salahudin, also known as Sayeed Salahudeen, also known as Peer Sahib, also known as Salauddin committed, or poses a significant risk of committing, acts of terrorism that threaten the security of U.S. nationals or the national security, foreign policy, or economy of the United States.

Consistent with the determination in section 10 of Executive Order 13224 that prior notice to persons determined to be subject to the Order who might have a constitutional presence in the United States would render ineffectual the blocking and other measures authorized in the Order because of the ability to transfer funds instantaneously, I determine that no prior notice needs to be provided to any person subject to this determination who might have a constitutional presence in the United States, because to do so would render ineffectual the measures authorized in the Order.

This notice shall be published in the **Federal Register**.

Dated: June 26, 2017.

Rex Tillerson,

Secretary of State.

BILLING CODE 4710–AD–P

DEPARTMENT OF STATE

[Public Notice 10049]

30-Day Notice of Proposed Information Collection: Repatriation/Emergency Medical and Dietary Assistance Loan Application

ACTION: Notice of request for public comment and submission to OMB of proposed collection of information.

SUMMARY: The Department of State has submitted the information collection described below to the Office of Management and Budget (OMB) for approval. In accordance with the Paperwork Reduction Act of 1995 we are requesting comments on this collection from all interested individuals and organizations. The purpose of this Notice is to allow 30 days for public comment.

DATES: Submit comments directly to the Office of Management and Budget (OMB) up to July 31, 2017.

ADDRESSES: Direct comments to the Department of State Desk Officer in the Office of Information and Regulatory Affairs at the Office of Management and Budget (OMB). You may submit comments by the following methods:

- *Email: oira_submission@omb.eop.gov.* You must include the DS form number, information collection title, and the OMB control number in the subject line of your message.
- *Fax:* 202–395–5806. Attention: Desk Officer for Department of State.

FOR FURTHER INFORMATION CONTACT: Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to Derek A. Rivers, Bureau of Consular Affairs, Overseas Citizens Services (CA/OCS/PMO), U.S. Department of State, 2201 C. St. NW., Washington, DC 20522, who may be reached at *RiversDA@state.gov.*

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Repatriation/Emergency Medical and Dietary Assistance Loan Application.
- *OMB Control Number:* 1405–0150.
- *Type of Request:* Extension of a currently approved collection.
- *Originating Office:* Bureau of Consular Affairs, Overseas Citizens Services (CA/OCS).
- *Form Number:* DS–3072.
- *Respondents:* U.S. Citizens applying for emergency loan assistance.
- *Estimated Number of Respondents:* 1,459.
- *Estimated Number of Responses:* 1,459.
- *Average Time per Response:* 20 minutes.
- *Total Estimated Burden Time:* 486 hours.
- *Frequency:* On Occasion.
- *Obligation to Respond:* Required to Obtain a Benefit.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.
- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of proposed collection: The DS–3072 is an application for an

emergency loan for a destitute U.S. citizen and/or eligible family member to return to the United States or for a loan for a destitute U.S. citizen and/or eligible family member abroad to receive emergency medical and dietary assistance.

Methodology: The Bureau of Consular Affairs will post this form on Department of State Web sites to give respondents the opportunity to complete the form online, or print the form and fill it out manually and submit the form in person or by fax or mail.

Michelle Bernier-Toth,

Managing Director, Bureau of Consular Affairs, Overseas Citizen Services, Department of State.

BILLING CODE 4710–06–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Receipt of Noise Compatibility Program and Request for Review for Hawthorne Municipal Airport, Hawthorne, California

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed noise compatibility program that was submitted for Hawthorne Municipal Airport under the Aviation Safety and Noise Abatement Act, (hereinafter referred to as ''the Act'') and 14 Code of Federal Regulations (CFR) part 150 by the City of Hawthorne, Los Angeles County, California. This program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR part 150 for Hawthorne Municipal Airport were in compliance with applicable requirements, effective April 11, 2014, 79 FR 24488–24489. The proposed noise compatibility program will be approved or disapproved on or before December 20, 2017.

DATES: The effective date of the start of FAA's review of the noise compatibility program is June 23, 2017. The public comment period ends August 22, 2017.

FOR FURTHER INFORMATION CONTACT: Victor Globa, Federal Aviation Administration, Los Angeles Airports District Office, 15000 Aviation Boulevard, Room 3000, Lawndale, California 90261, Telephone: 310/725–3637. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed noise compatibility program for Hawthorne Municipal Airport which will be approved or disapproved on or before December 20, 2017. This notice also announces the availability of this program for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of 14 CFR part 150, promulgated pursuant to the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA has formally received the noise compatibility program for Hawthorne Municipal Airport, effective on December 20, 2016. The airport operator has requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 47504 of the Act. Preliminary review of the submitted material indicates that it conforms to 14 CFR part 150 requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before December 20, 2017.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, section 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety or create an undue burden on interstate or foreign commerce, and whether they are reasonably consistent with obtaining the goal of reducing existing non-compatible land uses and preventing the introduction of additional non-compatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments relating to these factors, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Western-Pacific Region Office, Airports Division, Room 3012, 15000 Aviation Boulevard, Lawndale, California 90261

Federal Aviation Administration, Los Angeles Airports District Office, 15000 Aviation Boulevard, Room 3000, Lawndale, California 90261

City of Hawthorne, Mr. Arnold Shadbehr, Interim City Manager/ Director of Public Works/City Engineer, 4455 West 126th Street, Hawthorne, CA 90250–4482

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT**.

Issued in Hawthorne, California, on June 23, 2017.

Brian Q. Armstrong,

Acting Director, Office of Airports, AWP–600, Western-Pacific Region.

[Summary Notice No. PE–2017–54]

Petition for Exemption; Summary of Petition Received

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of the FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number involved and must be received on or before July 20, 2017.

ADDRESSES: Send comments identified by docket number FAA–2017–0535 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West

Building Ground Floor, Washington, DC 20590–0001.

• *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

• *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Deana Stedman, ANM–113, Federal Aviation Administration, 1601 Lind Avenue SW., Renton, WA 98057–3356, email *deana.stedman@faa.gov,* phone (425) 227–2148; or Alphonso Pendergrass, ARM–200, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, email *alphonso.pendergrass@faa.gov,* phone (202) 267–4713.

This notice is published pursuant to 14 CFR 11.85.

Issued in Renton, Washington, on June 20, 2017.

Victor Wicklund,

Manager, Transport Standards Staff.

Petition for Exemption

Docket No.: FAA–2017–0535.

Petitioner: Embraer.

Section of 14 CFR Affected: § 25.901(c).

Description of Relief Sought: Embraer seeks relief from the *no single failure* requirement of § 25.901(c) of Title 14, Code of Federal Regulations as it relates to an engine uncontrollable high thrust event in combination with a high level of crosswind and a wet or contaminated runway.

Petition for Exemption

Docket No.: FAA–2017–0379.

Petitioner: Charm City Helicopters.

Section(s) of 14 CFR Affected: 99.7.

Description of Relief Sought: The Petitioner requests an exemption for flight operations during the times Terminal Flight Restrictions (TFR) of Notice to Airman 4/3621 (NOTAM 4/3621) is in effect. The exemption, if granted, would allow Charm City Helicopters to operate its helicopters within 3nm of the TFR ring during times the NOTAM is effective.

Federal Aviation Administration

Notice of Intent To Rule on Request To Release Airport Property at the Dallas/Fort Worth International Airport, Dallas/Fort Worth, Texas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of request to release airport property.

SUMMARY: The FAA proposes to rule and invites public comment on the release of land at the Dallas/Fort Worth International Airport under the provisions of Section 125 of the Wendell H. Ford Aviation Investment Reform Act for the 21st Century (AIR 21).

DATES: Comments must be received on or before July 31, 2017.

ADDRESSES: Comments on this application may be mailed or delivered to the FAA at the following address: Mr. Ben Guttery, Manager, Federal Aviation Administration, Southwest Region, Airports Division, Texas Airports District Office, ASW–650, 10101 Hillwood Parkway, Fort Worth, Texas 76177.

In addition, one copy of any comments submitted to the FAA must

be mailed or delivered to: Mr. Sean Donohue, Chief Executive Officer, Dallas/Fort Worth International Airport, Executive Office, P.O. Box 619428, DFW Airport, Texas 75261.

FOR FURTHER INFORMATION CONTACT: Mr. Steven Cooks, Program Manager, Federal Aviation Administration, Texas Airports District Office, ASW–650, 10101 Hillwood Parkway, Fort Worth, TX 76177, Telephone: (817) 222–5608, email: *Steven.Cooks@faa.gov*, fax: (817) 222–5989.

The request to release property may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA invites public comment on the request to release property at the Dallas/Fort Worth International Airport under the provisions of the AIR 21.

The following is a brief overview of the request:

The Dallas/Fort Worth International Airport requests the release of 41.096 acres of non-aeronautical airport property for permanent easement to the Fort Worth Transportation Authority. The permanent easement to be released will be used for public mass transit improvements and revenues shall be used to further develop, operate and maintain DFW Airport.

Any person may inspect the request in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents relevant to the application in person at the: Dallas/Fort Worth International Airport, Telephone Number (972) 973–4646.

Issued in Fort Worth, Texas, on 22 June 2017.

Cameron Bryan,

Acting Director, Airports Division.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA–2017–0002–N–17]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation

ACTION: Notice and request for comments.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of proposed information collection activities listed below. Before submitting these information collection requests (ICRs) to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified in this notice.

DATES: Comments must be received no later than August 29, 2017.

ADDRESSES: Submit written comments on the information collection activities by mail to either: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS–21, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 25, Washington, DC 20590; or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD–20, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 35, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, ''Comments on OMB Control Number 2130–XXXX,'' (the relevant OMB

control number for each ICR is listed below) and should also include the title of the ICR. Alternatively, comments may be faxed to (202) 493–6216 or (202) 493–6497, or emailed to Mr. Brogan at *Robert.Brogan@dot.gov,* or Ms. Toone at *Kim.Toone@dot.gov.* Please refer to the assigned OMB control number in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS–21, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 25, Washington, DC 20590 (telephone: (202) 493–6292) or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD–20, Federal Railroad Administration, 1200 New Jersey Avenue SE., Mail Stop 35, Washington, DC 20590 (telephone: (202) 493–6132). (These telephone numbers are not toll free.)

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested parties to comment on the following summary of proposed information collection activities regarding: (1) Whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques and other forms of information technology (*e.g.,* permitting electronic submission of responses). *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information Federal regulations mandate. In summary, FRA reasons comments received will advance three objectives: (1) Reduce reporting burdens; (2) ensure it organizes information collection requirements in a ''user-friendly'' format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

Below is a brief summary of currently approved information collection activities FRA will submit for OMB clearance as the PRA requires:

Title: Railroad Operating Rules.

OMB Control Number: 2130–0035.

Abstract: The collection of information is due to regulations in 49 CFR part 217 which require Class I and Class II railroads to file with FRA copies of their operating rules, timetables, and timetable special instructions, and subsequent amendments. The regulations require Class III railroads to retain copies of these documents at their systems headquarters. Also, 49 CFR 220.21(b) prescribes the collection of information by requiring railroads to retain one copy of their current operating rules with respect to radio communications and one copy of each subsequent amendment. Railroads must make these documents available to FRA upon request. Through these rules, FRA learns the condition of operating rules and practices of trains and instructions railroads provide their employees on operating practices.

Total Responses: 188,591,125.

Total Estimated Annual Burden: 4,797,590 hours.

Type of Request: Extension with change of a currently approved ICR (extension with change reflects revised estimates for some rule requirements).

Title: Track Safety Standards; Concrete Crossties.

OMB Control Number: 2130–0592.

Abstract: On April 1, 2011, FRA amended the Federal Track Safety Standards to promote the safety of railroad operations over track constructed with concrete crossties. FRA mandated specific requirements for effective concrete crossties, for rail fastening systems connected to concrete crossties, and for automated inspections of track constructed with concrete crossties. FRA uses the information collected under 49 CFR 213.234 to ensure automated track inspections of track constructed with concrete crossties are carried out as specified in the rule to supplement visual inspections by Class I and Class II railroads, intercity passenger railroads, and commuter railroads or small

government jurisdictions that serve populations greater than 50,000.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2017–0107]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel SEA RAVEN; Invitation for Public Comments

AGENCY: Maritime Administration.

ACTION: Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before July 31, 2017.

ADDRESSES: Comments should refer to docket number MARAD–2017–0107. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at *http://www.regulations.gov.* All comments will become part of this docket and will be available for inspection and copying at the above address between 10:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23–453, Washington, DC 20590. Telephone 202–366–9309, Email *Bianca.carr@dot.gov.*

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel SEA RAVEN is:

—*Intended Commercial Use of Vessel:* ''Sports Fishing-fish caught are not sold commercially''

—*Geographic Region:* ''California''

The complete application is given in DOT docket MARAD–20170107 at *http://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

Authority: 49 CFR 1.93(a), 46 U.S.C. 55103, 46 U.S.C. 12121.

—*Geographic Region:* ''Alaska (excluding waters in Southeastern Alaska and waters north of a line between Gore Point to Cape Suckling [including the North Gulf Coast and Prince William Sound])''

The complete application is given in DOT docket MARAD–2017–0115 at *http://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT/MARAD solicits comments from the public to better inform its rulemaking process. DOT/MARAD posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* In order to facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact

the agency for alternate submission instructions.

Authority: 49 CFR 1.93(a), 46 U.S.C. 55103, 46 U.S.C. 12121.

DEPARTMENT OF THE TREASURY

Community Development Financial Institutions Fund

Funding Opportunity Title: Notice of Funds Availability Inviting Applications for the Fiscal Year 2017 Funding Round of the Capital Magnet Fund (CMF)

Announcement Type: Announcement of funding opportunity.

Funding Opportunity Number: CDFI–2017–CMF.

Catalog of Federal Domestic Assistance (CFDA) Number: 21.011.

Key Dates:

TABLE 1—FY 2017 CMF PROGRAM FUNDING ROUND—CRITICAL DEADLINES FOR APPLICANTS

Description	Deadline	Time (eastern time—ET)	Submission method
SF–424 Mandatory form	July 28, 2017	11:59 p.m. ET	Electronically via *Grants.gov.*
Last day to contact CMF Program Staff	August 29, 2017	5:00 p.m. ET	Service Request via Awards Management Information System (AMIS) or CDFI Fund Helpdesk: 202–653–0421 or *cmf@cdfi.treas.gov.*
CMF Application and Required Attachments	August 31, 2017	5:00 p.m. ET	Electronically via Awards Management Information System (AMIS).

Executive Summary: The Capital Magnet Fund (CMF) is administered by the Community Development Financial Institutions Fund (CDFI Fund). Through the CMF, the CDFI Fund provides financial assistance grants to Community Development Financial Institutions (CDFIs), and to qualified Nonprofit Organizations that have the development or management of affordable housing as one of their principal purposes. All awards provided through this Notice of Funds Availability (NOFA) are subject to funding availability.

I. Program Description

A. *Authorizing Statute and Regulation:* The CMF was established through the Housing and Economic Recovery Act of 2008 (HERA), which added section 1339 to the Federal Housing Enterprises Financial Safety and Soundness Act of 1992. For a complete understanding of the program, the CDFI Fund encourages Applicants to review the CMF interim rule (12 CFR part 1807) as amended February 8, 2016 (the CMF Interim Rule), this NOFA, the environmental quality regulation (12 CFR part 1815), the CMF funding application (referred to hereafter as the ''Application,'' meaning the application submitted in response to this NOFA), and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200; 78 FR 78590) (Uniform Administrative Requirements or UAR). Each capitalized term used in this NOFA, but not defined herein, shall have the respective meanings assigned to them in the CMF Interim Rule, the Application, or the Uniform Administrative Requirements. Details regarding Application content requirements are found in the Application and related materials at *www.cdfifund.gov/cmf.*

B. *History:* The CDFI Fund was established by the Riegle Community Development Banking and Financial Institutions Act of 1994 to promote economic revitalization and community development through investment in and assistance to CDFIs. Since its creation in 1994, the CDFI Fund has awarded nearly $2.6 billion to CDFIs, community development organizations, and financial institutions through the CMF, Community Development Financial Institutions Program (CDFI Program), the Native American CDFI Assistance Program (NACA Program), the Bank Enterprise Award Program (BEA Program), and the Financial Education and Counseling Pilot Program. In addition, the CDFI Fund has allocated more than $50.5 billion in tax credit allocation authority through the New Markets Tax Credit Program (NMTC Program) and has obligated $1.1 billion in bond guarantees to Qualified Issuers and Eligible CDFIs through the CDFI Bond Guarantee Program.

C. *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200):* The Uniform Administrative Requirements codify financial, administrative, procurement, and program management standards that Federal award-making agencies must follow. Per the Uniform Administrative Requirements, when evaluating award applications, awarding agencies must evaluate the risks to the program posed by each Applicant, and each Applicant's merits and eligibility. These requirements are designed to ensure that Applicants for Federal assistance receive a fair and consistent review prior to an award decision. This review will assess items such as the Applicant's financial stability, quality of management systems, history of performance, and single audit findings. In addition, the Uniform Administrative Requirements include guidance on audit requirements and other award compliance requirements for award Recipients.

D. *Priorities:* The purpose of the CMF is to attract private capital for and increase investment in the Development, Preservation, Rehabilitation, or Purchase of Affordable Housing for primarily Extremely Low-Income, Very Low-Income, and Low-Income Families, as well as Economic Development Activities, which, In Conjunction With Affordable Housing Activities, implement a Concerted Strategy to stabilize or revitalize a Low-Income Area or Underserved Rural Area. In the FY 2017 funding round, the CDFI Fund will implement these priorities by funding: (i) Applications where a minimum of 20 percent of all Affordable Housing rental units that will be financed and/or supported with FY 2017 CMF Award dollars are targeted to Very Low-Income Families and a minimum of 20 percent of all Affordable Housing homeownership units that will

be financed and/or supported with FY 2017 CMF Award dollars are targeted to Low-Income Families; and (ii) Applications that leverage a higher amount of private capital to finance and/or support Affordable Housing Activities and Economic Development Activities. Additionally, the CDFI Fund seeks to fund Applications serving geographically diverse areas of economic distress, including Metropolitan Areas and Underserved Rural Areas.

E. *Funding limitations:* The CDFI Fund reserves the right to fund, in whole or in part, any, all, or none of the Applications submitted in response to this NOFA.

II. Federal Award Information

A. *Funding Availability:* The CDFI Fund plans to make $119.5 million in awards for the CMF FY 2017 round under this NOFA. HERA prohibits the CDFI Fund from obligating more than 15 percent of the aggregate available CMF funding to any Applicant, its Subsidiaries and Affiliates in the same funding round. Affiliated entities are not allowed to apply separately under this NOFA. To provide an example of the size of awards in past CMF funding rounds, the CDFI Fund notes that in FY 2016 CMF round the statutory cap was $13.7 million, but the largest amount awarded was $5.5 million. Moreover, given administrative and compliance responsibilities for award Recipients, the CDFI Fund will not accept Applications in the FY 2017 round that request less than $500,000 and will not provide awards below $500,000 to any Applicant receiving an award in the FY 2017 CMF Round.

The CDFI Fund reserves the right, in its sole discretion, to provide a CMF Award in an amount other than that which the Applicant requests; however, the award amount will not exceed the Applicant's award request as stated in its Application. An Applicant may receive only one award through the FY 2017 CMF Program Funding Round.

B. *Types of Awards:* The CDFI Fund will provide CMF Awards in the form of grants. CMF Awards must be used to support the eligible activities as set forth in 12 CFR 1807.301. CMF Awards cannot be ''passed through'' to third-party entities, whether Affiliates, Subsidiaries, or others, to undertake the eligible activities set forth in 12 CFR 1807.301, without the prior written approval of the CDFI Fund.

C. *Limitations on using CMF Awards in conjunction with other CDFI Fund awards/allocations:* 1. A CMF Award Recipient may not use its CMF Award and awards/allocations from other CDFI Fund programs to finance activities in the same property unless the CMF Award dollars are used to finance/support a different ''phase'' of development than what is funded by other CDFI Fund program awards/allocations. The separate phases of development financing are considered to be: (1) Predevelopment; (2) acquisition; (3) site work (preconstruction); (4) construction/rehabilitation; (5) permanent financing; or (6) bridge financing between two or more phases. If the Recipient has received multiple CMF Awards, these awards are not subject to this phasing restriction and may be combined in the same Project phase. The term Recipient includes the CMF Award Recipient and any Affiliates.

If providing Homeownership assistance, a CMF Award may be used in conjunction with awards/allocations from other CDFI Fund programs only if the Project can be divided into such phases, and the CMF Award is used in a different phase from the other CDFI Fund program awards/allocations. To clarify, a CMF Award cannot be used for a Homeownership property that is permanently financed (or supported) by both the Recipient's CMF Award and an award/allocation from another CDFI Fund program (*e.g.,* down payment assistance funded from CMF dollars may not be combined with a permanent mortgage funded from another CDFI Fund program).

2. Costs financed/supported by the Recipient's other awards/allocations from CDFI Fund programs, including awards from prior CMF rounds, may not be counted or reported as Leveraged Costs for the CMF Award, as further set forth in the Assistance Agreement. While the Recipient's other CMF Awards may be used to finance/support the same property, each award must separately meet the program requirements as outlined in the applicable Assistance Agreement and the CMF interim rule (12 CFR part 1807). The term Recipient includes the CMF Award Recipient and any Affiliates.

In all cases, the CMF Award remains subject to the following restriction imposed by the CDFI Bond Guarantee Program: Award funds received under any CDFI Fund program cannot be used by any participant of the CDFI Bond Guarantee Program, including Qualified Issuers, Eligible CDFIs, and Secondary Borrowers, to pay principal, interest, fees, administrative costs, or issuance costs (including Bond Issuance Fees) related to the CDFI Bond Guarantee Program, or to fund the Risk Share Pool for a Bond Issue (all capitalized terms used in this sentence, other than ''CMF Award'', shall have the meanings ascribed to them in the CDFI Bond Guarantee Program regulations and applicable guidance).

D. *Anticipated Start Date and Period of Performance:* The CDFI Fund anticipates the period of performance for the FY 2017 CMF Program Funding Round to begin in late 2017/early 2018. The period of performance for each CMF Award begins with the date that the CDFI Fund announces the Recipients of CMF Awards and continues until the end of the ten-year period of affordability, as set forth at 12 CFR 1807.401(d) and 12 CFR 1807.402, and as further set forth in the Assistance Agreement, during which time the Recipient must meet certain performance goals.

E. *Eligible Activities:* A CMF Award must support or finance activities that attract private capital for and increase investment in (i) the Development, Preservation, Rehabilitation, or Purchase of Affordable Housing for primarily Low-, Very Low- and Extremely Low-Income Families, and (ii) Economic Development Activities. CMF Awards may only be used as follows: (i) to provide Loan Loss Reserves, (ii) to capitalize a Revolving Loan Fund, (iii) to capitalize an Affordable Housing Fund, (iv) to capitalize a fund to support Economic Development Activities, (v) for Risk-Sharing Loans, or (vi) to provide Loan Guarantees. No more than 30 percent of a CMF Award may be used for Economic Development Activities. For the FY 2017 CMF Round, the CDFI Fund will allow all Recipients to use up to 5 percent of their CMF Award for Direct Administrative Expenses. The amount available for Direct Administrative Expenses may only be used for direct costs (as defined by the Uniform Administrative Requirements) incurred by the Recipient and related to the financing and/or support of a Project. The CDFI Fund considers the tracking of impacts and outcomes associated with Projects financed and/or supported by a CMF Award to fall under Direct Administrative Expenses. Any portion of the amount available for Direct Administrative Expenses may be used for direct costs related to the effective tracking and evaluation of program or evidence-based outcomes for CMF-funded Projects.

III. Eligibility Information

A. Eligible Applicants: In order to be eligible to apply for a CMF Award, an Applicant must either be a Certified CDFI or a Nonprofit Organization, as defined in 12 CFR 1807.104. Table 2

indicates the criteria that each entity type must meet in order to be eligible for a CMF Award pursuant to this NOFA. Note: A Certified CDFI that is also a Nonprofit Organization only needs to meet the Certified CDFI eligibility criteria described in Table 2, below, in order to be eligible for a CMF Award.

TABLE 2—APPLICANT ELIGIBILITY REQUIREMENTS

Category	Eligibility requirements
Certified CDFI	☐ Has been in existence as a legally formed entity for at least 3 years prior to the AMIS Application deadline under this NOFA; ☐ Has been determined by the CDFI Fund to meet the CDFI certification requirements set forth in 12 CFR 1805.201 and as verified in the CDFI's AMIS account as of the date of this NOFA; and ☐ Has not been notified by the CDFI Fund that its certification is in default or has been terminated. ☐ In cases where the CDFI Fund has provided a Certified CDFI with written notification that it no longer meets one or more certification standards and has been given an opportunity to cure, the CDFI Fund will continue to consider this Applicant to be a Certified CDFI until it has received a final determination that its certification has been terminated.
Nonprofit Organization	☐ Has been in existence as a legally formed entity for at least 3 years prior to the AMIS Application deadline under this NOFA; ☐ Demonstrates, through articles of incorporation, by-laws, or other board-approved documents, that the development or management of affordable housing are among its principal purposes; and ☐ Demonstrates that at least thirty-three and one-third percent of its total assets are dedicated to the development or management of affordable housing.
Application type and submission overview through *Grants.gov* and Awards Management Information System (AMIS).	☐ All Applicants must submit the required Application documents listed in Table 4. ☐ The CDFI Fund will only accept Applications that use the official application templates provided on the *Grants.gov* and AMIS websites. Applications submitted with alternative or altered templates will not be considered. ☐ All Applicants must submit the required documents in two locations: (1) *Grants.gov* and (2) AMIS. ○ *Grants.gov:* Applicants must submit the OMB SF–424 Mandatory (Application for Federal Assistance) form. ○ AMIS: Applicants must submit all other required Application materials. ○ All Applicants must register in the *Grants.gov* and AMIS systems to submit an Application successfully. The CDFI Fund strongly encourages Applicants to register as early as possible. ☐ *Grants.gov* and the SF–424 Mandatory form: ○ The SF–424 must be submitted in *Grants.gov* before the other Application materials are submitted in AMIS. Applicants are strongly encouraged to submit their SF–424 as early as possible via the *Grants.gov* portal. ○ Because the SF–424 is part of the Application, if the SF–424 is not accepted by *Grants.gov*, the CDFI Fund will not review any materials submitted in AMIS and the Application will be deemed ineligible. ☐ AMIS: ○ AMIS is the CDFI Fund's enterprise-wide information technology system that will be used to submit and store organization and Application information with the CDFI Fund. ○ Applicants are only allowed one submission in AMIS.
Employer Identification Number (EIN).	☐ All Applicants must have a unique EIN assigned by the Internal Revenue Service. ☐ The CDFI Fund will reject an Application submitted with the EIN of a parent or Affiliate organization.
DUNS number	☐ Pursuant to OMB guidance (68 FR 38402), each Applicant must apply using its unique DUNS number in *Grants.gov*. ☐ The CDFI Fund will reject an Application submitted with the DUNS number of a parent or Affiliate organization.
Awards Management Information System (AMIS).	☐ Each Applicant must register as an organization in AMIS and submit all required Application materials through the AMIS portal. ☐ The Authorized Representative must be included as a ''user'' in the Applicant's AMIS account. ☐ An Applicant that fails to properly register and update its AMIS account may miss important communications from the CDFI Fund or not be able to successfully submit an Application.
501(c)(4) status	☐ Pursuant to 2 U.S.C. 1611, any 501(c)(4) organization that engages in lobbying activities is not eligible to apply for or receive a CMF Award.
Compliance with Nondiscrimination and Equal Opportunity Statutes, Regulations, and Executive Orders.	☐ An Applicant may not be eligible to receive an award if proceedings have been instituted against it in, by, or before any court, governmental agency, or administrative body, and a final determination within the last 3 years as of the date of the NOFA indicates the Applicant has violated any of the following laws: Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C.2000d); Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794); the Age Discrimination Act of 1975 (42 U.S.C. 6101–6107); Title VIII of the Civil Rights Act of 1968, as amended (42 U.S.C. 3601 et seq.); and Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency.

Any Applicant that does not meet the criteria in Table 2 is ineligible to apply for a CMF Award under this NOFA. Further, Section III.B describes additional considerations applicable to prior award Recipients and/or Allocatees under any CDFI Fund program.

B. Prior award Recipients and/or Allocatees: Applicants must be aware that success in a prior round of any of the CDFI Fund's programs is not indicative of success under this NOFA. Prior award Recipients and/or Allocatees under any CDFI Program are eligible to apply under this NOFA, except as noted in Table 3:

TABLE 3—ELIGIBILITY REQUIREMENTS FOR APPLICANTS WHICH ARE PRIOR AWARD RECIPIENTS

Criteria	Description
Pending resolution of noncompliance.	The CDFI Fund will consider an Application submitted by an Applicant that has pending noncompliance issues if the CDFI Fund has not yet made a final compliance determination.
Noncompliance status	☐ The CDFI Fund will not consider an Application submitted by an Applicant that has a previously executed award agreement(s) if, as of the date of the NOFA, (i) the CDFI Fund has made a determination that such entity is noncompliant with a previously executed agreement and (ii) the CDFI Fund has provided written notification that such entity is ineligible to apply for or receive any future CDFI Fund awards or allocations. Such entities will be ineligible to submit an Application for such time period as specified by the CDFI Fund in writing. ☐ The CDFI Fund will not consider any Applicant that has defaulted on a CDFI program loan within five years of the AMIS Application deadline.

C. Contacting the CDFI Fund: Accordingly, Applicants that are prior Recipients and/or Allocatees under any CDFI Fund program are advised to: (i) Comply with requirements specified in an Assistance Agreement, award agreement, allocation agreement, bond loan agreement, or agreement to guarantee. All outstanding reporting and compliance questions should be directed to the Certification, Compliance Monitoring, and Evaluation help desk by AMIS Service Requests or by telephone at (202) 653–0421. The CDFI Fund will not respond to Applicants' reporting, compliance, or disbursement telephone calls or email inquiries that are received after 5:00 p.m. ET on August 29, 2017 until after the Application deadline. The CDFI Fund will respond to technical issues related to AMIS Accounts through 5:00 p.m. ET on August 31, 2017, via AMIS Service Requests, or at *AMIS@cdfi.treas.gov,* or by telephone at (202) 653–0422.

D. Cost sharing or matching funds requirements: Not applicable.

E. Other Eligibility Criteria:

1. Debarment/Do not pay verification: The CDFI Fund will conduct a debarment check and will not consider an Application if the Applicant is delinquent on any Federal debt or otherwise ineligible to receive a Federal award. The Do Not Pay Business Center was developed to support Federal agencies in their efforts to reduce the number of improper payments made through programs funded by the Federal government and provides delinquency information to the CDFI Fund to assist with the debarment check.

2. Entities that Submit Applications Together with Affiliates: As part of the Application review process, the CDFI Fund considers whether Applicants are Affiliates, as such term is defined in 12 CFR1807.104. If an Applicant and its Affiliates wish to submit Applications, they must do so collectively, in one Application; an Applicant and its Affiliates may not submit separate Applications. If Affiliates submit multiple or separate Applications, the CDFI Fund will reject all such Applications received.

Furthermore, an Applicant that receives an award in this CMF round may not become an Affiliate of another Applicant that receives an award in this CMF round at any time after the submission of a CMF Application under this NOFA. This requirement will also be a term and condition of the Assistance Agreement (see additional Application guidance materials on the CDFI Fund's Web site at *http://www.cdfifund.gov/cmf* for more details).

3. An Applicant will not be eligible to receive a CMF Award if the Applicant fails to demonstrate in the Application that its CMF Award would result in Eligible Project Costs (Leveraged Costs plus those costs funded by the CMF Award) that equal at least 10 times the amount of the CMF Award. Note that no costs attributable to Direct Administrative Expenses may be considered Eligible Project Costs.

IV. Application and Submission Information

A. Address to Request Application Package: Application materials can be found on the *Grants.gov* and the CDFI Fund's Web site at *www.cdfifund.gov/cmf.* Applicants may request a paper version of any Application material by contacting the CDFI Fund Help Desk by email at *cmf@cdfi.treas.gov* or by phone at (202) 653–0421.

B. Content and Form of Application Submission: The CDFI Fund will post to its Web site, at *www.cdfifund.gov/cmf,* instructions for accessing and submitting an Application. Detailed Application content requirements are found in the Application and related guidance documents. All Applications must be prepared in English and calculations must be made in U.S. dollars. Table 4 lists the required funding Application documents for the FY 2017 CMF Program Funding Round. Applicants must submit all required documents for the Application to be deemed complete. The CDFI Fund reserves the right to request and review other pertinent or public information that has not been specifically requested in this NOFA or the Application. Information submitted by the Applicant that the CDFI Fund has not specifically requested will not be reviewed or considered as part of the Application. Information submitted must accurately reflect the Applicant's activities.

TABLE 4—FUNDING APPLICATION DOCUMENTS

Application document	Submission format	Required?
Standard Form (SF) 424 Mandatory Form	Fillable PDF in *Grants.gov*	Required for all Applicants.
CMF Application	AMIS	Required for all Applicants.
Attachments to the Application		
Audited financial statements (most recent 2 fiscal years)	PDF in AMIS	Required for all Applicants.
Any management letters related to the audited financial statements (most recent 2 fiscal years).	PDF in AMIS	Required for all Applicants.

TABLE 4—FUNDING APPLICATION DOCUMENTS—Continued

Application document	Submission format	Required?
State Charter, Articles of Incorporation, or other establishing documents designating that the Applicant is a nonprofit or not-for-profit entity under the laws of the organization's State of formation.	PDF in AMIS	Required only for Applicants that are *not* Certified CDFIs.
A certification demonstrating tax exempt status from the IRS. For Applicants that are governmental instrumentalities only, and as long as all other eligibility requirements are met, the CDFI Fund will accept a legal opinion from counsel, in form and substance acceptable to the CDFI Fund, opining that the Applicant is exempt from federal taxation.	PDF in AMIS	Required only for Applicants that are *not* Certified CDFIs.
Articles of incorporation, by-laws or other documents demonstrating that the Applicant has a principal purpose of managing or developing affordable housing.	PDF in AMIS	Required only for Applicants that are *not* Certified CDFIs.

The CDFI Fund has a sequential, two-step process that requires the submission of Application documents in separate systems and on separate deadlines. The SF–424 form must be submitted through *Grants.gov* and all other application documents through the AMIS portal. The CDFI Fund will not accept Applications via email, mail, facsimile, or other forms of communication, except in extremely rare circumstances that have been pre-approved by the CDFI Fund. The separate application deadlines for the SF–424 and all other Application materials are listed in Tables 1 and 5. Only the Authorized Representative or Application Point of Contact designated in AMIS may submit the Application through AMIS.

Applicants are strongly encouraged to submit the SF–424 as early as possible through *Grants.gov* to provide sufficient time to resolve any submission problems. Applicants should contact *Grants.gov* directly with questions related to the registration or submission process as the CDFI Fund does not administer the *Grants.gov* system.

The CDFI Fund strongly encourages Applicants to start the *Grants.gov* registration process as soon as possible as it may take several weeks to complete (refer to the following link: *http://www.grants.gov/web/grants/register.html*). An Applicant that has previously registered with *Grants.gov* must verify that its registration is current and active.

C. Dun and Bradstreet Data Universal Numbering System (DUNS): Pursuant to the Uniform Administrative Requirements, each Applicant must provide as part of its Application submission, a valid Dun & Bradstreet Data Universal Numbering System (DUNS) number. Any Applicant without a DUNS number will not be able to register and submit an Application in the *Grants.gov* system. Please allow sufficient time for Dun & Bradstreet to respond to inquiries and/or requests for DUNS numbers.

D. System for Award Management (SAM): Any entity applying for Federal grants or other forms of Federal financial assistance through *Grants.gov* must be registered in SAM before submitting its Application materials through that platform. The SAM registration process can take several weeks to complete. Applicants that have previously completed the SAM registration process must verify that their SAM accounts are current and active. Each Applicant must continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an Application under consideration by a Federal awarding agency. The CDFI Fund will not consider any Applicant that fails to properly register or activate its SAM account and, as a result, is unable to submit its Application by the Application deadline. Applicants must contact SAM directly with questions related to registration or SAM account changes as the CDFI Fund does not maintain this system. For more information about SAM, please visit *https://www.sam.gov.*

E. *Submission Dates and Times:*

1. Submission Deadlines: Table 5 lists the deadlines for submission of the documents related to the FY 2017 CMF Program Funding Round:

TABLE 5—FY 2017 CMF DEADLINES FOR APPLICANTS

Document	Deadline	Time—eastern time (ET)	Submission method
SF–424 Mandatory form	July 28, 2017	11:59 pm ET	Electronically via *Grants.gov.*
CMF Application and Required Attachments.	August 31, 2017	5:00 pm ET	Electronically via AMIS.

2. Confirmation of Application Submission in *Grants.gov* and AMIS: Applicants are required to submit the OMB SF–424 Mandatory (Application for Federal Assistance) form through the *Grants.gov* system and must submit all other required Application materials through the AMIS Web site. Application materials submitted through each system are due by the applicable deadline listed in Table 5. Applicants must submit the SF–424 by an earlier deadline than that of the other required application materials in AMIS. If the SF–424 is not successfully submitted through *Grants.gov* by the corresponding deadline, the CDFI Fund will not review any of the materials submitted in AMIS, and the Application will be deemed ineligible. Thus, Applicants are strongly encouraged to submit the SF–424 as early as possible in the *Grants.gov* portal since submission problems may impact the ability to submit the overall Application.

(a) *Grants.gov* Submission Information: Each Applicant will receive an email from *Grants.gov* immediately after submitting the SF–424 confirming that the submission has entered the *Grants.gov* system. This email will contain a tracking number for

the submitted SF–424. Within 48 hours, the Applicant will receive a second email which will indicate if the submitted SF–424 was either successfully validated or rejected with errors. However, Applicants should not rely on the email notification from *Grants.gov* to confirm that their SF–424 was validated. Applicants are strongly encouraged to use the tracking number provided in the first email to closely monitor the status of their SF–424 by contacting the helpdesk at *Grants.gov* directly. The Application materials submitted in AMIS are not officially accepted by the CDFI Fund until *Grants.gov* has validated the SF–424. If using the *Grants.gov* Workspace function, please note that the Application package has not been submitted if you have not received a tracking number.

(b) Award Management Information System (AMIS) Submission Information: AMIS is a web-based portal where Applicants will directly enter their Application information and add required attachments listed in Table 4. AMIS will verify that the Applicant provided the minimum information required to submit an Application. Applicants are responsible for the quality and accuracy of the information and attachments included in the Application submitted in AMIS. The CDFI Fund strongly encourages the Applicant to allow sufficient time to confirm the Application content, review the material submitted, and remedy any issues prior to the Application deadline. Applicants can only submit one Application in AMIS. Upon submission, the Application will be locked and cannot be resubmitted, edited, or modified in any way. The CDFI Fund will not unlock or allow multiple Application submissions.

3. Multiple Application Submissions: If an Applicant submits multiple SF–424 Applications in *Grants.gov*, the CDFI Fund will only review the last SF–424 Application submitted in *Grants.gov*. Applicants may only submit one Application through AMIS.

4. Late Submission: The CDFI Fund will not accept an Application submitted after the applicable *Grants.gov* or AMIS Application deadline, except where the submission delay was a direct result of a Federal government administrative or technological error. This exception includes any errors associated with *Grants.gov*, *SAM.gov*, AMIS or any other applicable government system. Please note that this exception does not apply to errors arising from obtaining a DUNS number from Dun & Bradstreet, which is not a government entity. An Applicant unable to make timely submission of its Application due to any errors in the process of obtaining a DUNS number will not be allowed to submit its Application after the application deadline has passed. In the event of a government administrative or technological error causing delay, the Applicant must submit a request for acceptance of late Application submission and include documentation of the error no later than two business days after the applicable Application deadline. The CDFI Fund will not respond to requests for acceptance of late Application submissions after that time period. Applicants must submit late Application submission requests via Service Request in AMIS with the subject line of ''FY2017 CMF: Late Application Submission Request.''

5. Intergovernmental Review: Not Applicable.

6. Funding Restrictions: CMF Awards are limited by the following:

(a) A Recipient shall use CMF Award funds only for the eligible activities set forth in 12 CFR 1807.301 and as described in Section II.C and Section II.E of this NOFA and its Assistance Agreement.

(b) A Recipient may not disburse CMF Award funds to an Affiliate, Subsidiary, or any other entity without the CDFI Fund's prior written approval.

(c) CMF Award Payment shall only be made to the Recipient.

(d) The CDFI Fund, in its sole discretion, may pay CMF Awards in amounts, or under terms and conditions, which are different from those requested by an Applicant.

7. Other Submission Requirements: Each Applicant must register as an organization in AMIS in order to submit the required Application materials through this portal. The Authorized Representative and/or application point(s) of contact must be included as ''Contacts'' in the Applicant's AMIS account. The Authorized Representative must also be a ''user'' in AMIS and must electronically sign the Application prior to submission through AMIS. An Applicant that fails to properly register and update its AMIS account may miss important communications from the CDFI Fund or fail to submit an Application successfully. After submitting its Application, the Applicant will not be permitted to revise or modify its Application in any way or attempt to negotiate the terms of an award.

V. Application Review Information

A. *Criteria:* All complete and eligible Applications will be reviewed in accordance with the criteria and procedures described in the CMF Interim Rule, this NOFA, the Application guidance, and the Uniform Administrative Requirements. As part of the review process, the CDFI Fund reserves the right to contact the Applicant by telephone, email, mail, or through an on-site visit for the sole purpose of clarifying or confirming Application information at any point during the review process. The CDFI Fund reserves the right to collect such additional information from Applicants as it deems appropriate. If contacted, the Applicant must respond within the time period communicated by the CDFI Fund or its Application may be rejected. For the sake of clarity, specific application evaluation criteria are described in the context of the overall application review and selection process described in Section V.B. below.

B. *Review and Selection Process:*

The CDFI Fund will evaluate each complete and eligible Application using the multi-phase review process described in this Section.

1. Quantitative Assessment: Each complete and eligible Application will receive a numeric score based on the responses to quantitative questions in the Application. Applications may receive a score of up to 100 points based on the following factors outlined in Table 6.

TABLE 6—QUANTITATIVE ASSESSMENT FACTORS

Section	Points	Assessment criteria
Business and Leveraging Strategy ..	40	• Private leverage multiplier, including the portion from 3rd parties.
	.....	• Reasonableness of projected activities based on track record.
	.....	• Applicant-level leverage multiplier.
Community Impact	35	• Percent of rental housing units targeted to Very Low-Income or below (50% of AMI or below).

TABLE 6—QUANTITATIVE ASSESSMENT FACTORS—Continued

Section	Points	Assessment criteria
	.....	• Percent of homeownership units targeted to Low-Income or below (80% of AMI or below).
	.....	• Commitment to only finance Economic Development Activities in Low-Income Areas.
	.....	• Percent of housing units to be produced in Areas of Economic Distress.
Financial Health	25	• Capitalization.
	.....	• Operating Performance.
	.....	• Net income.
	.....	• Liquidity.
	.....	• Audit Results.

Within the Business and Leveraging Strategy Section of the Quantitative Assessment, an Applicant will generally score more favorably to the extent it: Is leveraging a high multiplier of private capital, particularly third party capital; has a proven track record; and is leveraging some portion of capital at the Applicant-level.

Within the Community Impact Section, an Applicant will generally score more favorably to the extent that it: Commits to producing a higher percentage of rental housing units targeted to Very Low-Income Families (if proposing to use CMF for rental housing); commits to producing a higher percentage of homeownership units targeted to Low-Income Families (if proposing to use CMF for homeownership); commits to only financing Economic Development Activities in Low-Income Areas (if proposing to use CMF for economic development); and commits to producing a higher percentage of units in Areas of Economic Distress. Areas of Economic Distress are census tracts: (a) Where at least 20 percent of households that are Very Low-Income (50% of AMI or below) spend more than half of their income on housing; or (b) where the unemployment rate is at least 1.5 times the national average; or (c) that are Low-Income Housing Tax Credit Qualified Census Tracts; or (d) where greater than 20 percent of households have incomes below the poverty rate and the rental vacancy rate is at least 10 percent; or (e) where greater than 20 percent of the households have incomes below the poverty rate and the homeownership vacancy rate is at least 10 percent; or (f) Are Underserved Rural Areas as defined in the CMF Interim Rule (as amended February 8, 2016; 12 CFR part 1807). Within the Financial Health section, Applicants will generally score more favorably to the extent that their 3-year financial data indicates: Strong capitalization, operating performance, and liquidity; positive net income; and that the Applicant has not had any negative results (*e.g.* opinion other than unqualified; a ''going concern paragraph;'' repeat finding of reportable conditions; material weaknesses in internal control) in any of the three most recently completed annual audits.

Once the quantitative score is determined, Applicants will be grouped into two categories: (1) Those with a maximum Non-Metropolitan Area investment of 50 percent or greater and (2) all other Applicants. Applicants in each category will be ranked in descending order based on their quantitative review score. The top 75 percent of Applications in each category will be forwarded to the next level of review: External Application Review. The CDFI Fund reserves the right to forward additional Applications to the External Application Review phase in order to ensure that a diversity of geographies are served by the Applicants reviewed in the External Application Review phase. The CDFI Fund also reserves the right not to implement the Quantitative Assessment if it receives fewer than 140 CMF Applications.

2. External Application Review: Applications that advance from the Quantitative Assessment will be separately scored by more than one external non-Federal reviewer who are selected based on criteria that include: A professional background in affordable housing and community and economic development finance with extensive background in affordable housing. These reviewers must complete the CDFI Fund's conflict of interest process and be approved by the CDFI Fund. Reviewers will be assigned a set number of Applications to review. The reviewer will provide a score for each of the Applications assessed in accordance with the scoring criteria outlined in Section V.B.2 of this NOFA and the Application materials.

The external reviewer's evaluation will result in the Application being awarded up to 100 total points by each reviewer. These points will be distributed across three sections: Business and Leveraging Strategy (40 possible points), Community Impact (35 possible points), and Organizational Capacity (25 possible points). An Applicant's final External Application review score will be a composite based on the external reviewers' evaluation and Quantitative Assessment factors. The majority of the score will be based on the external reviewers' evaluation.

(a) Business and Leveraging Strategy (40 points): In the Business and Leveraging Strategy section, the Applicant will address: (i) The needs of communities and persons in its proposed Service Area(s) and the extent to which the proposed strategy addresses these needs; (ii) the affordable housing and financing gaps addressed by its business strategy; (iii) the projected CMF activities and track record; (iv) plans to incorporate a CMF Award into project finance; (v) its strategy for leveraging private capital with a CMF Award, particularly third-party capital; and (vi) its strategy for leveraging its CMF Award at the Enterprise-level and/or through re-investments (if applicable).

An Applicant will generally score more favorably in the criteria evaluated by the external reviewer to the extent that it: (i) Clearly aligns its proposed CMF Award activities with the affordable housing and financing gaps it identifies; (ii) demonstrates that its projected activities are achievable based on the Applicant's strategy and track record; (iii) describes a clear process for locating projects and proposes activities that have a clear need for CMF financing; (iv) has a clear strategy for and track record of leveraging private capital; and (v) has a clear strategy for and demonstrates a track record of leveraging funds at the enterprise-level and/or through re-investments (if applicable).

(b) Community Impact (35 points): In the Community Impact Section, the Applicant will address: (i) Projected outcomes and impacts of Affordable Housing Activities and Economic Development Activities; (ii) its strategy and track record of producing housing

units targeted to Low-Income Families (for homeownership) and to Very Low-Income Families (for rental); (iii) if applicable, its strategy and track record of financing and/or supporting Economic Development Activities and how these activities will benefit the residents of nearby Affordable Housing; and (iv) its strategy for engaging low-income stakeholders to inform its business strategy. An Applicant will generally score more favorably in the criteria evaluated by the external reviewer to the extent that it: (i) Demonstrates how the expected outcomes will address community needs; (ii) demonstrates a clear and compelling strategy for producing housing units targeted to Low-Income Families (for homeownership) and Very-Low Income Families (for rental); (iii) for Economic Development Activities, it demonstrates how its proposed Economic Development Activities fit within a Concerted Strategy and will benefit the residents of the surrounding Affordable Housing; and (iv) demonstrates that feedback from Low-Income stakeholders will inform the Applicant's business strategy.

(c) Organizational Capacity (25 points): In the Organizational Capacity section, the Applicant will discuss: (i) Its management team and key staff; (ii) the roles and responsibilities of those staff in managing a CMF Award; (iii) its past experience managing other Federal Awards; and (iv) its financial health and lending portfolio (if applicable).

An Applicant will generally score more favorably in the criteria evaluated by the external reviewer to the extent that it demonstrates: (i) Strong qualifications of its key personnel with respect to their skills and experience identifying investments, underwriting similar projects, managing a portfolio of similar activities and ensuring compliance with program requirements; (ii) success in administering prior CMF Awards and/or other Federal program awards; (iii) strong financial health; and (iv) solid portfolio performance (if applicable).

(d) Scoring anomaly: If, in the case of a particular Application, the reviewers' total external Application review scores vary significantly, the CDFI Fund may, in its sole discretion, obtain the evaluation and numeric scoring of an additional reviewer to determine whether the anomalous score should be replaced with the score of the additional reviewer.

3. Internal Application Review: At the conclusion of the External Application Review phase, Applications will be ranked based on their external review score. Up to 50 of the highest scoring Applications in the External Application Review phase will be forwarded to Internal Application Review in descending order of rank score to receive further consideration for an Award. These forwarded applications will constitute the highly qualified pool. During the Internal Application Review, CDFI Fund staff will prioritize the Applications in the highly qualified pool for award based on the following criteria: (i) Final external Application review score, (ii) alignment with CMF statutory and policy priorities, and (iii) the overall quality of the Applicant's strategy.

In assessing the Application's alignment with CMF statutory and policy priorities, CDFI Fund staff will consider the following factors, including, but not limited to: The Applicant's proposed outcomes and benefits in areas of economic distress; income targeting of the portfolio of affordable units to be produced; and the amount of third-party private capital that the Applicant will attract to its Service Area.

In assessing the quality of the Applicant's strategy, the CDFI Fund staff will consider the following factors, including, but not limited to: (i) The quality of the Applicant's strategy with respect to how the strategy and financing activities address community needs; (ii) whether these outcomes are likely to be achieved if the Applicant's strategy is implemented and the extent to which these outcomes are quantifiable and evidence-based; (iii) whether the Applicant's projections are supported by its track record; (iv) whether the proposed financing activities will help to fill the financing gaps in their market; (v) whether the CMF funds will contribute to the Applicant offering more favorable rates and terms than are currently available in that market; (vi) the likely success of the strategy to leverage private capital; (vii) whether the strategy is adaptable to changing market conditions; (viii) whether the proposed deployment/redeployment schedule is realistic and achievable; and (ix) whether the Applicant has the appropriate financial, organizational, and programmatic capacity to implement the strategy.

The Internal Review will also include an analysis of the Applicant's likely capacity to: Meet award management standards; file appropriate reports and address findings from audits; and the Applicant's ability to effectively implement Federal requirements. Applicants may be re-prioritized for an award or award amounts may be reduced as a result of this analysis. In the case of an Applicant that has received awards from other Federal programs, the CDFI Fund reserves the right to contact officials from the appropriate Federal agency or agencies to determine whether the Recipient is in compliance with current or prior assistance agreements, and to take such information into consideration before making a CMF Award. In the case of an Applicant that has previously received funding through any CDFI Fund program, the CDFI Fund will consider and may, in its discretion, deduct up to 5 points from the External Application Review score for those Applicants (or their Affiliates) that, within 24 months prior to the Application deadline, are late in meeting reporting requirements for existing awards.

4. Selection: Once Applications have been internally evaluated and preliminary award determinations have been made, the Applications will be forwarded to a selecting official for a final award determination. After preliminary award determinations are made, the selecting official will review the list of potential Recipients to determine whether the Recipient pool meets the following statutory objectives:

(a) The potential Recipients' proposed Service Areas collectively represent broad geographic coverage throughout the United States; and

(b) The potential Recipients' proposed activities equitably represent both Metropolitan Areas and Non-Metropolitan Areas, as defined in the CMF Interim Rule, and as further set forth in the Application.

To the extent practicable, the CDFI Fund reserves the right to modify CMF Award amounts and/or the CMF Recipient pool if deemed necessary to achieve either of these desired outcomes. In order to evaluate the geographic coverage of the potential CMF Recipient pool, Applicants will be asked to designate one of the following three Service Area types in their Applications: Local, Statewide, or Multi-State. These Service Area types are further defined in the Application; the largest Service Area an Applicant can propose is a 10 state Multi-State Service Area. To achieve greater investment in Non-Metropolitan Areas and/or broader geographic coverage, the CDFI Fund may consider an Application ranked outside of the highly qualified pool to receive an award. However, the CDFI Fund will not award an Application that scores in the bottom 50 percent of the External Review score rankings.

In cases where the selecting official's award determination varies significantly from the initial CMF Award amount recommended by the CDFI Fund staff

review, the CMF Award recommendation will be forwarded to a reviewing official for final determination. The CDFI Fund, in its sole discretion, reserves the right to reject an Application and/or adjust CMF Award amounts as appropriate based on information obtained during the review process.

(c) Insured Depository Institution Applicants: In the case of Applicants that are Insured Depository Institutions or Insured Credit Unions, the CDFI Fund will consider safety and soundness information from the Appropriate Federal Banking Agency or Appropriate State Agency, as applicable. If the Applicant is a CDFI Depository Institution Holding Company, the CDFI Fund will consider information provided by the Appropriate Federal Banking Agency and Appropriate State Agency about both the CDFI Depository Institution Holding Company and the CDFI Insured Depository Institution that will expend and carry out the award. If the Appropriate Federal Banking Agency or Appropriate State Agency identifies safety and soundness concerns, the CDFI Fund will assess whether the concerns cause or will cause the Applicant to be incapable of undertaking the activities for which funding has been requested.

5. Right of Rejection: The CDFI Fund reserves the right to reject an Application if information (including administrative errors) comes to the attention of the CDFI Fund that adversely affects an Applicant's eligibility for an award, adversely affects the CDFI Fund's evaluation or scoring of an Application, or indicates fraud or mismanagement on the Applicant's part. If the CDFI Fund determines that any portion of the Application is incorrect in any material respect, the CDFI Fund reserves the right, in its sole discretion, to reject the Application. The CDFI Fund reserves the right to change its eligibility and evaluation criteria and procedures, if the CDFI Fund deems it appropriate. If said changes materially affect the CDFI Fund's award decisions, the CDFI Fund will provide information regarding the changes through the CDFI Fund's Web site. There is no right to appeal the CDFI Fund's award decisions. The CDFI Fund's award decisions are final.

6. Anticipated Award Announcement: The CDFI Fund anticipates making CMF Award announcements in late 2017 or early 2018.

VI. Federal Award Administration Information

A. *Award Notification:* Each successful Applicant will receive an email notification from the CDFI Fund stating that its Application has been approved for an award. Each Applicant not selected for an award will receive an email stating that a debriefing document has been provided in its AMIS account.

B. *Administrative and National Policy Requirements:* The CDFI Fund may, in its discretion and without advance notice to the Recipient, terminate the award or take other actions as it deems appropriate if, prior to entering into an Assistance Agreement, information (including an administrative error) comes to the CDFI Fund's attention that adversely affects the following: The Recipient's eligibility for an award; the CDFI Fund's evaluation of the Application; the Recipient's compliance with any requirement listed in the Uniform Requirements; or indicates fraud or mismanagement on the Recipient's part.

If the Recipient's certification status as a CDFI changes, the CDFI Fund reserves the right, in its sole discretion, to re-calculate the CMF Award, or modify the Assistance Agreement based on the Recipient's non-CDFI status.

By executing an Assistance Agreement, the Recipient agrees that, if the CDFI Fund becomes aware of any information (including an administrative error) prior to the Effective Date of the Assistance Agreement that either adversely affects the Recipient's eligibility for an CMF Award, or adversely affects the CDFI Fund's evaluation of the award Recipient's Application, or indicates fraud or mismanagement on the part of the Recipient, the CDFI Fund may, in its discretion and without advance notice to the Recipient, terminate the Assistance Agreement or take other actions as it deems appropriate.

The CDFI Fund reserves the right, in its sole discretion, to rescind an award if the Recipient fails to return the Assistance Agreement, signed by an Authorized Representative of the award Recipient, and/or provide the CDFI Fund with any other requested documentation, within the CDFI Fund's deadlines.

In addition, the CDFI Fund reserves the right, in its sole discretion, to terminate and rescind the Assistance Agreement and the award made under this NOFA for any criteria described in Table 7:

TABLE 7—REQUIREMENTS PRIOR TO EXECUTING AN ASSISTANCE AGREEMENT

Requirement	Criteria
Failure to meet reporting requirements.	If a Recipient is a prior CDFI Fund award Recipient or Allocatee under any CDFI Fund program and is not current on the reporting requirements set forth in the previously executed assistance, award, allocation, bond loan agreement(s), or agreement to guarantee, as of the date of the Notice of Award, the CDFI Fund reserves the right, in its sole discretion, to delay entering into an Assistance Agreement and/or to delay making a Payment of CMF Award, until said prior Recipient or Allocatee is current on the reporting requirements in the previously executed assistance, award, allocation, bond loan agreement(s), or agreement to guarantee. Please note that automated systems employed by the CDFI Fund for receipt of reports submitted electronically typically acknowledge only a report's receipt; such acknowledgment does not warrant that the report received was complete, nor that it met reporting requirements. If said prior Recipient or Allocatee is unable to meet this requirement within the timeframe set by the CDFI Fund, the CDFI Fund reserves the right, in its sole discretion, to terminate and rescind the Notice of Award and the CMF Award made under this NOFA.
Failure to maintain CDFI Certification (if applicable) or eligible Nonprofit Organization status (if applicable).	A Recipient must be a Certified CDFI or an eligible Nonprofit Organization, as each is defined in the CMF Interim Rule and this NOFA, prior to entering into an Assistance Agreement as well as during the application process. If, at any time prior to entering into an Assistance Agreement under this NOFA, an Applicant that is a Certified CDFI has submitted reports (or failed to submit an annual certification report as instructed by the CDFI Fund) to the CDFI Fund that demonstrate noncompliance with the requirements for certification, but the CDFI Fund has yet to make a final determination regarding whether or not the entity is Certified, the CDFI Fund reserves the right, in its sole discretion, to delay entering into an Assistance Agreement and/or to delay making a Payment of CMF Award, pending full resolution, in the sole determination of the CDFI Fund, of the noncompliance. If the Applicant is unable to meet this requirement, in the sole determination of the CDFI Fund, the CDFI Fund reserves the right, in its sole discretion, to terminate and rescind the Notice of Award and the CMF Award made under this NOFA.

TABLE 7—REQUIREMENTS PRIOR TO EXECUTING AN ASSISTANCE AGREEMENT—Continued

Requirement	Criteria
Pending resolution of non-compliance.	If, at any time prior to entering into an Assistance Agreement under this NOFA, an Applicant that is a prior CDFI Fund award Recipient or Allocatee under any CDFI Fund program has submitted reports to the CDFI Fund that demonstrate noncompliance with a previous assistance, award, or allocation agreement, but the CDFI Fund has yet to make a final determination regarding whether or not the entity is in default of its previous assistance, award, allocation, bond loan agreement, or agreement to guarantee, the CDFI Fund reserves the right, in its sole discretion, to delay entering into an Assistance Agreement and/or to delay making a Payment of CMF Award, pending full resolution, in the sole determination of the CDFI Fund, of the noncompliance. If said prior Recipient or Allocatee is unable to meet this requirement, in the sole determination of the CDFI Fund, the CDFI Fund reserves the right, in its sole discretion, to terminate and rescind the Notice of Award and the CMF Award made under this NOFA.
Default or Noncompliance status.	If, at any time prior to entering into an Assistance Agreement, the CDFI Fund determines that a Recipient is in default of a previously executed agreement with the CDFI Fund and the Recipient has been provided written notification of such determination, the CDFI Fund can delay entering into an Assistance Agreement, until the Recipient has cured the default, if applicable, by taking actions the CDFI Fund has specified within the specified timeframe. Further, if, at any time prior to entering into an Assistance Agreement, the CDFI Fund determines that a Recipient is noncompliant with an FY 2015 agreement, or with agreements for fiscal years thereafter, under any CDFI Fund program, the CDFI Fund can delay entering into an Assistance Agreement, until the Recipient has cured the noncompliance by taking actions the CDFI Fund has specified within the specified timeframe. If the Recipient is unable to meet the cure requirement, if applicable, within the specified timeframe, the CDFI Fund may terminate and rescind the Assistance Agreement and the CMF Award made under this NOFA.
Final Default and Sanctions	If the CDFI Fund has found the Recipient in final default of a prior executed agreement and provided notification of sanctions, the CDFI Fund may delay entering into an Assistance Agreement with the Recipient, impose conditions prior to entering in Assistance Agreement, or modify or rescind the CMF Award made under this NOFA within the time period specified in such notification.
Compliance with Federal civil rights requirements.	The CDFI Fund will terminate and rescind the Assistance Agreement and the CMF Award made under this NOFA if, prior to entering into an Assistance Agreement under this NOFA, the Recipient receives a final determination, made within the last 3 years, in any proceeding instituted against the Recipient in, by, or before any court, governmental, or administrative body or agency, declaring that the CMF Award Recipient has violated the following laws: Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d); Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794); the Age Discrimination Act of 1975 (42 U.S.C. 6101–6107); Title VIII of the Civil Rights Act of 1968, as amended (42 U.S.C. 3601 et seq.); and Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency.
Do Not Pay	The Do Not Pay Business Center was developed to support Federal agencies in their efforts to reduce the number of improper payments made through programs funded by the Federal government. The CDFI Fund reserves the right, in its sole discretion, to rescind an award if the award Recipient is identified as ineligible to be a Recipient on the Do Not Pay database.
Safety and soundness	If it is determined that the Recipient is or will be incapable of meeting its CMF Award obligations, the CDFI Fund will deem the Recipient to be ineligible or require it to improve safety and soundness conditions prior to entering into an Assistance Agreement.

C. *Assistance Agreement:* Each Applicant that is selected to receive an award under this NOFA must enter into an Assistance Agreement with the CDFI Fund in order to become a Recipient and receive Payment. Each CMF Award under this NOFA generally will have a period of performance that begins with the announcement date of the award and continues until the end of the period of affordability, as set forth at 12 CFR 1807.401(d) and 12 CFR 1807.402, and as further set forth in the Assistance Agreement.

1. The Assistance Agreement will set forth certain required terms and conditions of the CMF Award, which will include, but not be limited to:

(a) The amount of the award;

(b) The approved uses of the award;

(c) The approved Service Area in which the award may be used;

(d) Performance goals and measures; and

(e) Reporting requirements for all Recipients.

2. The Assistance Agreement shall provide that, prior to any determination by the CDFI Fund that a Recipient has failed to comply substantially with the Act, the CMF Interim Rule, or the environmental quality regulations, the CDFI Fund shall provide the Recipient with reasonable notice and opportunity for hearing. For failure by the Recipient to comply substantially with the Assistance Agreement, the CDFI Fund may:

(a) Require changes in the performance goals set forth in the Assistance Agreement;

(b) Reduce or terminate the CMF Award; or

(c) Require repayment of any CMF Award that has been distributed to the Recipient.

3. The Assistance Agreement shall also provide that, if the CDFI Fund determines noncompliance with the terms and conditions of the Assistance Agreement on the part of the Recipient, the CDFI Fund may:

(a) Bar the Recipient from reapplying for any assistance from the CDFI Fund; or

(b) Take such other actions as the CDFI Fund deems appropriate or as set forth in the Assistance Agreement.

4. In addition to entering into an Assistance Agreement, each Applicant selected to receive a CMF Award must furnish to the CDFI Fund a certificate of good standing from the jurisdiction in which it was formed. The CDFI Fund may, in its sole discretion, also require the Applicant to furnish an opinion from its legal counsel, the content of which may be further specified in the Assistance Agreement, and which, among other matters, opines that:

(a) The Recipient is duly formed and in good standing in the jurisdiction in which it was formed and the jurisdiction(s) in which it transacts business;

(b) The Recipient has the authority to enter into the Assistance Agreement and

undertake the activities that are specified therein;

(c) The Recipient has no pending or threatened litigation that would materially affect its ability to enter into and carry out the activities specified in the Assistance Agreement;

(d) The Recipient is not in default of its articles of incorporation or formation, bylaws or operating agreements, other organizational or establishing documents, or any agreements with the Federal government; and

(e) The CMF affordability restrictions that are to be imposed by deed restrictions, covenants running with the land, or other CDFI Fund approved mechanisms are recordable and enforceable under the laws of the State and locality where the Recipient will undertake its CMF activities.

D. *Paperwork Reduction Act:* Under the Paperwork Reduction Act (44 U.S.C. chapter 35), an agency may not conduct or sponsor a collection of information, and an individual is not required to respond to a collection of information, unless it displays a valid OMB control number. If applicable, the CDFI Fund may inform Applicants that they do not need to provide certain Application information otherwise required. Pursuant to the Paperwork Reduction Act, the CMF Program Application has been assigned the following control number: 1559–0036.

E. *Reporting:* The CDFI Fund will require each Recipient that receives a CMF Award through this NOFA to account for and report to the CDFI Fund on the use of the CMF Award. This will require Recipients to establish administrative controls, subject to the Uniform Administrative Requirements and other applicable OMB guidance. The CDFI Fund will collect information from each such Recipient on its use of the CMF Award at least once following Payment and more often if deemed appropriate by the CDFI Fund in its sole discretion. The CDFI Fund will provide guidance to Recipients outlining the format and content of the information required to be provided to describe how the funds were used.

The CDFI Fund may collect information from each Recipient including, but not limited to, an Annual Report with the components listed in Table 8:

TABLE 8—REPORTING REQUIREMENTS

Criteria	Description
Single Audit Narrative Report (or like report)	The Recipient must submit, via AMIS, a Single Audit Narrative Report for each year of its period of performance notifying the CDFI Fund whether it is required to have a single audit pursuant to OMB Single Audit requirements.
Single Audit (if applicable) (or similar report)	A Recipient that is a non-profit entity that expends $750,000 or more in Federal Awards during its fiscal year must have a single audit conducted for that year. If a Recipient is required to complete a Single Audit Report, it should be submitted to the Federal Audit Clearinghouse. See 2 CFR part 200, subpart F-Audit Requirements in the Uniform Federal Award Requirements. For-profit award Recipients will be required to complete and submit a similar report directly to the CDFI Fund.
Performance Report	The Recipient must submit a performance report not less than annually, which is a progress report on the Recipient's use of the CMF Award towards meeting its Performance Goals, affordable housing outcomes, and the Recipient's overall performance. The CMF performance report covers the Announcement Date through the Investment Period for the CMF Award and the ten-year Affordability Period for each project. The Investment Period shall mean the period beginning with the effective date of the Assistance Agreement and ending not earlier than the fifth year anniversary of the effective date or as otherwise established in the Assistance Agreement. The Affordability Period shall mean, for each CMF-funded project, the period beginning on the date when the project is placed into service and consisting of the full ten consecutive years thereafter or as otherwise established in the Assistance Agreement.
Explanation of Noncompliance (as applicable) or successor report.	If the award Recipient fails to meet a performance goal or reporting requirements, it must submit the Explanation of Noncompliance via AMIS.

Each Recipient is responsible for the timely and complete submission of the annual reporting documents. The CDFI Fund will use such information to monitor each Recipient's compliance with the requirements set forth in the Assistance Agreement and to assess the impact of the CMF. The CDFI Fund reserves the right, in its sole discretion, to modify these reporting requirements if it determines it to be appropriate and necessary; however, such reporting requirements will be modified only after notice to Recipients.

F. *Financial Management and Accounting:* The CDFI Fund will require Recipients to maintain financial management and accounting systems that comply with Federal statutes, regulations, and the terms and conditions of the CMF Award. These systems must be sufficient to permit the preparation of reports required by general and program specific terms and conditions, including the tracing of funds to a level of expenditures adequate to establish that such funds have been used in accordance with the Federal statutes, regulations, and the terms and conditions of the CMF Award.

The cost principles used by Recipients must be consistent with Federal cost principles; must support the accumulation of costs as required by the principles; and must provide for adequate documentation to support costs charged to the CMF Award. In addition, the CDFI Fund will require Recipients to: Maintain effective internal controls; comply with applicable statutes and regulations, the Assistance Agreement, and related guidance; evaluate and monitor compliance; take action when not in compliance; and safeguard personally identifiable information.

VII. Agency Contacts

A. *Availability:* The CDFI Fund will respond to questions and provide support concerning this NOFA and the Application between the hours of 9:00 a.m. and 5:00 p.m. ET, starting on the date of the publication of this NOFA until the close of business on the third day preceding the Application deadline. The CDFI Fund will not respond to questions or provide support concerning the Application that are received after 5:00 p.m. ET on said date, until after the Application deadline. CDFI Fund IT support will be available until 5:00 p.m.

ET on date of the Application deadline. Applications and other information regarding the CDFI Fund and its programs may be obtained from the CDFI Fund's Web site at *http://www.cdfifund.gov/cmf.* The CDFI Fund will post on its Web site responses to questions of general applicability regarding the CMF.

B. *The CDFI Fund's contact information is listed in Table 9:*

TABLE 9—CONTACT INFORMATION

Type of question	Telephone number (not toll free)	Email addresses/AMIS Service Request
CMF	202–653–0421	Submit an AMIS Service Request in AMIS or *cmf@cdfi.treas.gov.*
CDFI Certification	202–653–0421	Submit an AMIS Service Request in AMIS.
Compliance Monitoring and Evaluation	202–653–0421	Submit an AMIS Service Request in AMIS.
Information Technology Support	202–653–0422	Submit an AMIS Service Request or email *AMIS@cdfi.treas.gov.*

The preferred method of contact is to submit a Service Request (SR) within AMIS. For a CMF Application question, select ''General Inquiry'' for the record type and select ''CMF-Application'' for the type. For a CDFI Certification or Compliance question, select ''General Inquiry'' for the record type and select the appropriate type. For Information Technology, select ''General Inquiry'' for the record type and select ''CMF–AMIS technical problem'' for the type. Failure to select the appropriate type of SR could result in delays in responding to your question.

C. *Communication with the CDFI Fund:* The CDFI Fund will use AMIS to communicate with Applicants and Recipients, using the contact information maintained in their respective AMIS accounts. Therefore, the Recipient and any Subsidiaries, signatories, and Affiliates must maintain accurate contact information (including contact persons and Authorized Representatives, email addresses, fax numbers, phone numbers, and office addresses) in its AMIS account(s). For more information about AMIS please see the Help documents posted at *https://amis.cdfifund.gov/s/Training.*

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple IRS Information Collection Requests

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection request(s) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on the collection(s) listed below.

DATES: Comments should be received on or before July 31, 2017 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania

Ave. NW., Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Jennifer Leonard by emailing *PRA@treasury.gov,* calling (202) 622–0489, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Internal Revenue Service (IRS)

Title: Employer's Annual Tax Return for Agricultural Employees.

OMB Control Number: 1545–0035.

Type of Review: Revision of a currently approved collection.

Abstract: Sections 3101(a) and (b), and 3111(a) and (b), 3402(p), and 6011(a) and (b) of the Internal Revenue Code and sections 31.6011(a)–1 and 31.6011(a)–4 of the Employment Tax Regulations require agricultural employers to report (a) the employees' and employers' FICA taxes on wages and (b) the amounts withheld for income tax. Form 943 is used for this purpose. Sections 3101(a) and (b), 3111(a) and (b), and 6011(a) and (b) of the Internal Revenue Code and section 31.6011(a)–1 of the Employment Tax Regulations require agricultural employers in Puerto Rico to report the employees' and employers' FICA taxes on wages. Form 943–PR is used for this purpose. Section 6302(c) of the Internal Revenue Code and section 31.6302–l(g) of the Employment Tax Regulations require agricultural employers who are semiweekly depositors to deposit the taxes accumulated during the semiweekly period within 3 banking days of the end of the period. Section 31.6302–l(c)(3) of the Employment Tax Regulations requires that agricultural employers, who on any day within a deposit period accumulate $100,000 or more of employment taxes, must deposit them by the close of the next banking day. Forms 943–A and 943A–PR are optional forms that may be used by agricultural employers to show their tax liabilities for the semiweekly periods and $100,000 one-day rule. Form 943–X is used to correct errors made on Form 943, Employer's Annual Federal Tax Return for Agricultural Employees, for one year only. Form 943–X–PR, for use in Puerto Rico, is used to correct errors made on Form 943, Employer's Annual Federal Tax Return for Agricultural Employees, for one year only. (Use este formulario para corregir errores hechos en el Formulario 943–PR, Planilla para la Declaración Anual de la Contribución Federal del Patrono de Empleados Agrícolas, para un solo año.) Form 943 Sch R allows (1) an agent appointed by an employer or payer or (2) a customer who enters into a contract that meets the requirements under 7705(e)(2) or (3) a client who enters into a service agreement described under Regulations section 31.3504–2(b)(2) with a Certified Professional Employer Organization, to allocate information reported on Form 943 to each client.

Form: 943,943–PR, 943–A, 943A–PR, 943–X, 943X–PR, 943–R.

Affected Public: Businesses or other for-profits, Farms.

Estimated Total Annual Burden Hours: 10,883,138.

Title: Form 1023—Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code and Form 1023–EZ, Streamlined.

OMB Control Number: 1545–0056.

Type of Review: Revision of a currently approved collection.

Abstract: Form 1023 is filed by applicants seeking Federal income tax exemption as organization described in section 501(c)(3). IRS uses the information to determine if the applicant is exempt and whether the applicant is a private foundation. Form 1023–EZ is a simplified version of Form 1023, to be filed by organizations who meet certain criteria.

Form: 1023, 1023–EZ.

Affected Public: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 4,714,236.

Title: Foreign Tax Credit (Individual, Estate, or Trust).

OMB Control Number: 1545–0121.

Type of Review: Extension without change of a currently approved collection.

Abstract: Form 1116 is used by individuals (including nonresident aliens) estates or trusts that paid foreign income taxes on U.S. taxable income to compute the foreign tax credit. This information is used by the IRS to verify the foreign tax credit.

Form: 116.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 25,066,693.

Title: Application for Approval of Prototype Simplified Employee Pension (SEP) or Savings Incentive Match Plan for Employees of Small Employers (SIMPLE IRA Plan).

OMB Control Number: 1545–0199.

Type of Review: Extension without change of a currently approved collection.

Abstract: This form is used by banks, credit unions, insurance companies, and trade or professional associations to apply for approval of a Simplified Employee Pension Plan or Savings Incentive Match Plan to be used by more than one employer. The data collected is used to determine if the prototype plan submitted is an approved plan.

Form: 5306A.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 407.

Title: Safe-harbor lease information returns.

OMB Control Number: 1545–0923.

Type of Review: Extension without change of a currently approved collection.

Abstract: These regulations provide guidance to persons executing lease agreements involving tax-exempt entities under section 168(h) of the Internal Revenue Code. The regulations are necessary to implement congressionally enacted legislation and elections for certain previously tax-exempt organizations and certain tax-exempt controlled entities.

Form: None.

Affected Public: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 3,000.

Title: Estimated Income Tax for Estates and Trusts.

OMB Control Number: 1545–0971.

Type of Review: Extension without change of a currently approved collection.

Abstract: Internal Revenue Code section 6654(1) imposes a penalty on trusts, and in certain circumstances, a decedent's estate, for underpayment of estimated tax. Form 1041–ES is used by the fiduciary to make the estimated tax payments. For first-time filers, the form is available in an Over The Counter (OTC) version at IRS offices. For previous filers, the form is sent to them by the IRS with preprinted vouchers in the Optical Character Resolution (OCR) version.

Form: 1041–ES.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 3,161,236.

Title: Form 1099–S—Proceeds From Real Estate Transactions.

OMB Control Number: 1545–0997.

Type of Review: Revision of a currently approved collection.

Abstract: Form 1099–S is used by the real estate reporting person to report proceeds from a real estate transaction to the IRS.

Form: 1099–S.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 411,744.

Title: Form 8655-Reporting Agent Authorization; Revenue Procedure 2012–32.

OMB Control Number: 1545–1058.

Type of Review: Extension without change of a currently approved collection.

Abstract: Form 8655: Allows a taxpayer to designate a reporting agent to file certain employment tax returns electronically, and to submit Federal tax deposits. This form allows IRS to disclose tax account information and to provide duplicate copies of taxpayer correspondence to authorized agents. Reporting agents are persons or organizations preparing and filing electronically the federal tax returns and/or submitting federal tax deposits. Revenue Procedure 2012–32. This revenue procedure provides the requirements for completing and submitting Form 8655, Reporting Agent Authorization (Authorization). An Authorization allows a taxpayer to designate a Reporting Agent to perform the following acts on behalf of a taxpayer.

Form: 8655.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 819,050.

Title: Enhanced Oil Recovery Credit.

OMB Control Number: 1545–1292.

Type of Review: Revision of a currently approved collection.

Abstract: This regulation provides guidance concerning the costs subject to the enhanced oil recovery credit, the circumstances under which the credit is available, and procedures for certifying to the Internal Revenue Service that a project meets the requirements of section 43(c) of the Internal Revenue Code.

Form: 8830.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 12,527.

Title: CO–88–90 (TD 8530) Limitation on Net Operating Loss Carryforwards and Certain Built-in Losses Following Ownership Change; Special Rule for Value of a Loss Corporation Under the Jurisdiction.

OMB Control Number: 1545–1324.

Type of Review: Revision of a currently approved collection.

Abstract: This information serves as evidence of an election to apply section 382(1)(6) in lieu of section 382(1)(5) and an election to apply the provisions of the regulations. It is required by the Internal Revenue Service to assure that the proper amount of carryover attributes are used by a loss corporation following specified types of ownership changes.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 63.

Title: TD 8566 (Final)—General Asset Accounts Under the Accelerated Cost Recovery System.

OMB Control Number: 1545–1331.

Type of Review: Extension without change of a currently approved collection.

Abstract: The regulations describe the time and manner of making the election described in IRC Section 168(i)(4). Basic information regarding this election is necessary to monitor compliance with the rules in the IRC Section 168.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 250.

Title: Cognitive and Psychological Research.

OMB Control Number: 1545–1349.

Type of Review: Revision of a currently approved collection.

Abstract: The proposed research will improve the quality of the data collection by examining the psychological and cognitive aspects of methods and procedures such as: interviewing processes, forms redesign, survey and tax collection technology and operating procedures (internal and external in nature).

Form: None.

Affected Public: Individuals and Businesses, other for-profit organizations.

Estimated Total Annual Burden Hours: 18,000.

Title: Form 8866-Interest Computation Under the Look-Back Method for Property Depreciated Under the Income Forecast Method.

OMB Control Number: 1545–1622.

Type of Review: Extension without change of a currently approved collection.

Abstract: The Small Business Job Protection Act of 1996 requires taxpayers whom claim depreciation deductions on property placed in service after September 13, 1995, under the income forecast method to pay (allow taxpayers to receive) interest based on the recalculation of depreciation. Form 8866 must be used in order to compute and report interest due or to be refunded under IRC 167 (g)(2). The IRS uses Form 8866 to determine if the interest has been figured correctly.

Form: 8866.

Affected Public: Individuals or households.

Estimated Total Annual Burden Hours: 45,738.

Title: Extraterritorial Income Exclusion Elections.

OMB Control Number: 1545–1731.

Type of Review: Extension without change of a currently approved collection.

Abstract: A taxpayer that wants to revoke its election to be treated as a domestic corporation for all purposes of the Internal Revenue Code (Code) must file a revocation statement with the Internal Revenue Service (IRS). This revenue procedure provides guidance for implementing the elections (and revocation of such elections) established under the ''FSC Repeal and Extraterritorial Income Exclusion Act of 2000.''

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 19.

Title: Summary of Archer MSAs.

OMB Control Number: 1545–1743.

Type of Review: Extension without change of a currently approved collection.

Abstract: This form is used by the IRS to determine whether numerical limits set forth in section 220(j)(1) have been exceeded.

Form: 8851.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1,540,000.

Title: Revenue Procedure 2004–29—Statistical Sampling in Sec. 274 Context.

OMB Control Number: 1545–1847.

Type of Review: Extension without change of a currently approved collection.

Abstract: For taxpayers desiring to establish for purposes of Sec. 274(n) (2), (A), (C), (D), or (E) that a portion of the total amount of substantiated expenses incurred for meals and entertainment is excepted from the 50% limitation of Sec. 274(n), the revenue procedure requires that taxpayers maintain adequate documentation to support the statistical application, sample unit findings, and all aspects of the sample plan.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 3,200.

Title: Revenue Procedure 2010–52, Extension of the Amortization Period for Plan Sponsor of a Multiemployer Pension Plan.

OMB Control Number: 1545–1890.

Type of Review: Extension without change of a currently approved collection.

Abstract: This revenue procedure describes the process for obtaining an extension of the amortization period for the minimum funding standards set forth in section 412(e) of the Code.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 2,500.

Title: Form 13560, Health Plan Administrator (HPA) Return of Funds.

OMB Control Number: 1545–1891.

Type of Review: Extension without change of a currently approved collection.

Abstract: Form 13560 is completed by Health Plan Administrators (HPAs) and accompanies a return of funds in order to ensure proper handling. This form serves as supporting documentation for any funds returned by an HPA and clarifies where the payment should be applied and why it is being sent.

Form: 13560.

Affected Public: State, Local, and Tribal Government.

Estimated Total Annual Burden Hours: 50.

Title: Rollover of Gain from Qualified Small Business Stock to Another Qualified Small Business Stock.

OMB Control Number: 1545–1893.

Type of Review: Extension without change of a currently approved collection.

Abstract: These regulations relating to the application of section 1045 of the Internal Revenue Code (Code) to partnerships and their partners and provide rules regarding the deferral of gain on a partnership's sale of qualified small business stock (QSB stock) and a partner's sale of QSB stock distributed by a partnership. These regulations also provide rules for a taxpayer (other than a C corporation) who sells QSB stock and purchases replacement QSB stock through a partnership.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1,500.

Title: (TD 9212) Final, Source of Compensation for Labor or Personal Services.

OMB Control Number: 1545–1900.

Type of Review: Extension without change of a currently approved collection.

Abstract: The regulation describes the appropriate bases for determining the source of income from labor or personal services performed partly within and partly without the United States. The information required in Sec. 1.861–4(b)(2)(ii)(D) and (D)(6) will enable an employee to source certain fringe benefits on a geographical basis. The collections of information will allow the IRS to verify these determinations.

Form: None.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 10,000.

Title: TD 9210—LIFO Recapture Under Section 1363(d).

OMB Control Number: 1545–1906.

Type of Review: Extension without change of a currently approved collection.

Abstract: This collection of information is required to inform the IRS of partnerships electing to increase the basis of inventory to reflect any amount included in a partner's income under section 1363(d). Section 1.1363–2(e)(ii) allows a partnership to elect to adjust the basis of its inventory to take account of LIFO recapture. Section 1.1363–2(e)(3) provides guidance on how to make this election.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 200.

Title: Form 14134, Application for Certificate of Subordination of Federal Tax Lien.

OMB Control Number: 1545–2174.

Type of Review: Extension without change of a currently approved collection.

Abstract: The collection of information is required by 26 CFR 301.6325–1(b)(5) for consideration of the United States discharging property from the federal tax lien and is required by 26 CFR 301.6325–1(d)(4) for consideration that the United States subordinate its interest in property. These forms will provide guidance to ensure proper documentation is submitted to the Agency.

Form: 14134, 14135.

Affected Public: Businesses or other for-profits, Farms, Not-for-profit institutions.

Estimated Total Annual Burden Hours: 22,665.

Title: Affordable Care Act Notice Relating to Rescissions.

OMB Control Number: 1545–2180.

Type of Review: Revision of a currently approved collection.

Abstract: This document contains interim final regulations implementing the rules for group health plans and health insurance coverage in the group and individual markets under provisions of the Affordable Care Act regarding preexisting condition exclusions, lifetime and annual dollar limits on benefits, rescissions, prohibition on discrimination in favor of highly compensated individuals, and patient protections.

Form: None.

Affected Public: Businesses or other for-profits, Not-for-profit institutions.

Estimated Total Annual Burden Hours: 20.

Title: REG–118315–12 (FINAL), Health Insurance Providers Fee and Form 8963, Report of Health Insurance Provider Information.

OMB Control Number: 1545–2249.

Type of Review: Extension without change of a currently approved collection.

Abstract: The Affordable Care Act imposes an annual fee on health insurance providers that provide health insurance for United States health risks (a covered entity). IRS final regulations, which implements the Affordable Care Act, describe how the IRS will administer the health insurance providers fee. This information collection covered under this request are the recordkeeping requirements prescribed in § 57.2(e)(2) that each member of a controlled group are to maintain records of consent to the controlled group's selection of the designated entity. Reporting requirements under § 57.3 will be reported through Form 8963, ''Report of Health Insurance Provider Information''. File Form 8963, Report of Health Insurance Provider Information, to report net premiums written for health insurance of United States health risks. The information reported will be used by the IRS to calculate the annual fee on health insurance providers.

Form: 8963.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 18,208.

Title: Notice 2017–9—De Minimis Error Safe Harbor to the I.R.C. §§ 6721 and 6722 Penalties.

OMB Control Number: 1545–2270.

Type of Review: Extension without change of a currently approved collection.

Abstract: Under 6722(c)(3)(B) payees may elect that an exception to penalties not apply so that penalties may apply if payors don't provide corrected returns and statements. The collection of information will be this election, a retraction of the election, or specified

retention of records of elections or retractions. The collection is necessary for the effective operation of the exception and election framework. Respondents are payees or payors.

Form: None.

Affected Public: Individuals or Households.

Estimated Total Annual Burden Hours: 760,569.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: June 23, 2017.

BILLING CODE 4810–AS–P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Signing Authority for Corporate and LLC Officials

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection request(s) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on the collection(s) listed below.

DATES: Comments should be received on or before July 31, 2017 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Jennifer Leonard by emailing *PRA@treasury.gov,* calling (202) 622–0489, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Alcohol and Tobacco Tax and Trade Bureau (TTB)

Title: Signing Authority for Corporate and LLC Officials.

OMB Control Number: 1513–0036.

Type of Review: Revision of a currently approved collection.

Abstract: Under the IRC at 26 U.S.C. 6061, any return, statement, or other document required to be made under the internal revenue laws or regulations ''shall be signed in accordance with forms or regulations'' prescribed by the Secretary of the Treasury. Issued under that section's authority, but not specifically required by the TTB regulations, corporations and limited liability companies (LLCs) use TTB F 5100.1 or its electronic equivalent to identify specific corporate or LLC officials or employees, by name or by position title, authorized by the entity's articles of incorporation, bylaws, or governing officials to act on behalf of, or sign documents for, the entity in TTB matters. This information collection is necessary to ensure that only duly authorized individuals sign documents submitted to TTB on behalf of corporations or LLCs.

Form: TTB F 5100.1 N/A, TTB F 5100.1.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1,056.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: June 23, 2017.

Jennifer P. Leonard,

Treasury PRA Clearance Officer.

BILLING CODE 4810–31–P

DEPARTMENT OF VETERANS AFFAIRS

Research Advisory Committee on Gulf War Veterans' Illnesses; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C., App. 2, that the Research Advisory Committee on Gulf War Veterans' Illnesses will meet on August 1–2, 2017, at 999 California Street, San Francisco, CA, from 9:00 a.m. until 5:00 p.m. (Pacific) on August 1 and from 8:45 a.m. to 12:45 p.m. (Pacific) on August 2. All sessions will be open to the public, and for interested parties who cannot attend in person, there is a toll-free telephone number (800) 767–1750; access code 56978#.

The purpose of the Committee is to provide advice and make recommendations to the Secretary of Veterans Affairs on proposed research studies, research plans, and research strategies relating to the health consequences of military service in the Southwest Asia theater of operations during the Gulf War in 1990–1991.

The Committee will review VA program activities related to Gulf War Veterans' illnesses, and updates on relevant scientific research published since the last Committee meeting. Presentations will include updates on the VA Gulf War research program, along with presentations describing new areas of research in sleep, aging, and neuroscience that can be applied to the health problems of Gulf War Veterans. Also, there will be a discussion of Committee business and activities.

The meeting will include time reserved for public comments in the afternoon. A sign-up sheet for 5-minute comments will be available at the meeting. Individuals who wish to address the Committee may submit a 1–2 page summary of their comments for inclusion in the official meeting record. Members of the public may also submit written statements for the Committee's review to Dr. Victor Kalasinsky via email at *victor.kalasinsky@va.gov.* Any member of the public seeking additional information should contact Dr. Kalasinsky, Designated Federal Officer, at (202) 443–5600.

Dated: June 27, 2017.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900—NEW]

Agency Information Collection Activity: General Release for Medical Provider Information to the Department of Veterans Affairs (VA) and Authorization and Consent To Release Information to the Department of Veterans Affairs

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before August 29, 2017.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900—NEW'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor at (202) 461–5870.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: General Release for Medical Provider Information to the Department of Veterans Affairs (VA) (VA Form 21–4142) and Authorization and Consent to Release Information to the Department of Veterans Affairs (VA Form 21–4142a).

OMB Control Number: 2900—NEW.

Type of Review: New collection.

Abstract: VA Forms 21–4142 will be used to authorize the disclosure of information to the VA and 21–4142a will be used to gather the necessary information to request medical provider information to the VA.

Affected Public: Individuals and households.

Estimated Annual Burden: 11,033 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 132,400.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Department Clearance Officer, Office of Privacy and Records Management, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0708]

Agency Information Collection Activity Under OMB Review: Evidence for Transfer Entitlement of Education Benefits (CFR 21.7080)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of

1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 31, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–00708'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Department Clearance Officer—OI&T (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *Cynthia.harvey.pryor@va.gov.* Please refer to ''OMB Control No. 2900–0708'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 38 U.S.C. 3020, 38 U.S.C. 3319; 44 U.S.C. 3501–3521.

Title: Evidence for Transfer Entitlement of Education Benefits (CFR 21.7080).

OMB Control Number: 2900–0708.

Type of Review: Revision of a currently approved collection.

Abstract: Servicemembers on active duty may request to designate up to a maximum of 18 months of their educational entitlement to their spouse, one or more of their children, or a combination of the spouse and children. VA will accept DOD Form 2366–1 as evidence that the servicemember must submit it in writing to VA, the name of each dependent, the number of months of entitlement transferred to each dependent, and the period (beginning date or ending date) for which the transfer will be effective for each designated dependent. VA will use the information shown on DOD Form 2366–1 to determine whether the dependent qualifies to receive education benefits under the transfer of entitlement provision of law.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 82 FR 69 on April 12, 2017, page 17742.

Affected Public: Individuals or households.

Estimated Annual Burden: 11,311 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: Once.

Estimated Number of Respondents: 135,735.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Department Clearance Officer, Office of Privacy and Records Management, Department of Veterans Affairs.

Agency Information Collection Activity Under OMB Review: Credit Underwriting Standards and Procedures for Processing VA Guaranteed Loans

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 31, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0521'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0521.''

SUPPLEMENTARY INFORMATION:

Authority: Public Law 104–13; 44 U.S.C. 3501–21.

Title: Credit Underwriting Standards and Procedures for Processing VA Guaranteed Loans (VA Form 26–1820, VA Form 26–8497, VA Form 26–8497a).

OMB Control Number: 2900–0521.

Type of Review: Extension of an approved collection.

Abstract: Lenders must obtain specific information concerning a veteran's credit history in order to properly underwrite the veteran's loan. VA loans may not be guaranteed unless the veteran is a satisfactory credit risk. The data collected on the following forms are used to ensure that applications for VA-guaranteed loans are underwritten in a reasonable and prudent manner.

a. VA Form 26–1820 is completed by lenders closing VA-guaranteed and insured loans under the automatic or prior approval procedures.

b. VA Form 26–8497 is used by lenders to verify a loan applicant's income and employment information when making guaranteed and insured loans. VA does not require the exclusive use of this form for verification purposes, any alternative verification document would be acceptable provided that all information requested on VA Form 26–8497 is provided.

c. Lenders making guaranteed and insured loans complete VA Form 26–8497a to verify the applicant's deposits in banks and other savings institutions.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at Vol. 82, No. 64, Wednesday, April 5, 2017, pages 16664 and 16665.

Affected Public: Individuals or households.

Estimated Annual Burden:

VA Form 26–1820 150,000 hours
VA From 26–8497 25,000 hours
VA Form 26–8497a 12,500 hours

Estimated Average Burden per Respondent:

VA Form 26–1820 15 minutes
VA Form 26–8497 10 minutes
VA Form 26–8497a 5 minutes

Frequency of Response: One time.

Estimated Number of Respondents:

VA Form 26–1820 600,000
VA Form 26–8497 150,000
VA Form 26–8497a 150,000

By direction of the Secretary.

Cynthia Harvey-Pryor,

Department Clearance Officer, Enterprise Records Service, Office of Quality and Compliance, Department of Veterans Affairs.

Agency Information Collection Activity under OMB Review: Board of Veterans' Appeals Voice of the Veteran Appellant Satisfaction Survey

AGENCY: Board of Veterans' Appeals, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Board of Veterans' Appeals, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 31, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0816'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0816'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: Board of Veterans' Appeals Voice of the Veteran Appellant Satisfaction Survey.

OMB Control Number: 2900–0816.

Type of Review: Extension of a Currently Approved Collection.

Abstract: This notice solicits comments information needed to enable the Board to gauge the effectiveness of the Board's process delivering information and assistance to Veterans and other appellants, as well as assess Veterans' and other appellants' overall level of satisfaction with the Board's appeals process. In addition, the data will be used by the Board to make improvements to the Board's operational processes and service delivery, which in turn, will enable the Board to serve Veterans in the most efficient and effective way possible.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. [OMB Control No. 2900–0116]

Agency Information Collection Activity Under OMB Review: Notice to Department of Veterans Affairs of Veteran or Beneficiary Incarcerated in Penal Institution

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Comments must be submitted on or before July 31, 2017.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0116'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0116'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 44 U.S.C. 3501–21.

Title: Notice to Department of Veterans Affairs of Veteran or Beneficiary Incarcerated in Penal Institution (VA Form 21–4193).

OMB Control Number: 2900–0116.

Type of Review: Extension of a currently approved collection.

Abstract: VA Form 21–4193 is used to gather information from penal institutions about incarcerated VA beneficiaries. When beneficiaries are incarcerated in penal institutions in excess of 60 days after conviction, VA benefits are reduced or terminated. Without this collection of information, VA would be unable to accurately adjust the rates of incarcerated beneficiaries and overpayments would result.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 82 FR 69 on April 12, 2017, pages 17742 and 17743.

Affected Public: Individuals or Households.

Estimated Annual Burden: 416.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 1,664.

By direction of the Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 414

[CMS–5522–P]

RIN 0938–AT13

Medicare Program; CY 2018 Updates to the Quality Payment Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) established the Quality Payment Program for eligible clinicians. Under the Quality Payment Program, eligible clinicians can participate via one of two tracks: Advanced Alternative Payment Models (APMs); or the Merit-based Incentive Payment System (MIPS). We began implementing the Quality Payment Program through rulemaking for calendar year (CY) 2017. This rule provides proposed updates for the second and future years of the Quality Payment Program.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on August 21, 2017.

ADDRESSES: In commenting, please refer to file code CMS–5522–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–5522–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–5522–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following addresses prior to the close of the comment period:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members. Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period. For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

Molly MacHarris, (410) 786–4461, for inquiries related to MIPS.

Benjamin Chin, (410) 786–0679, for inquiries related to APMs.

I. Executive Summary and Background

A. Overview

This proposed rule would make payment and policy changes to the Quality Payment Program. The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10, enacted April 16, 2015) amended title XVIII of the Social Security Act (the Act) to repeal the Medicare sustainable growth rate (SGR), to reauthorize the Children's Health Insurance Program, and to strengthen Medicare access by improving physician and other clinician payments and making other improvements.

The MACRA advances a forward-looking, coordinated framework for clinicians to successfully take part in the Quality Payment Program that rewards value and outcomes in one of two ways:

- Advanced Alternative Payment Models (Advanced APMs).
- Merit-based Incentive Payment System (MIPS).

These policies are collectively referred to as the Quality Payment Program. Recognizing that the Quality Payment Program represents a major milestone in the way that we bring quality measurement and improvement together with payment, we have taken efforts to review existing policies to identify how to move the program forward in the least burdensome manner possible. Our goal is to support patients and clinicians in making their own decisions about health care using data driven insights, increasingly aligned and meaningful quality measures, and technology that allows clinicians to focus on providing high quality healthcare for their patients. We believe our existing APMs alongside the proposals in this proposed rule provide opportunities that support state flexibility, local leadership, regulatory relief and innovative approaches to improve quality accessibility and affordability. By driving changes in how care is delivered, we believe the Quality Payment Program supports eligible clinicians in improving the health of their patients and increasing care efficiency. To implement this vision, the Quality Payment Program emphasizes high-value care and patient outcomes while minimizing burden on eligible clinicians; the Program is also designed to be flexible, transparent, and structured to improve over time with input from clinicians, patients, and other stakeholders. We have sought and continue to seek feedback from the health care community through various public avenues such as rulemaking, listening sessions and stakeholder engagement. Last year, when we engaged in rulemaking to establish policies for effective implementation of the Quality Payment Program, we did so with the explicit understanding that technology, infrastructure, physician support systems, and clinical practices will change over the next few years. For more information, see the Merit-based Incentive Payment System (MIPS) and Alternative Payment Model (APM) Incentive under the Physician Fee Schedule, and Criteria for Physician-Focused Payment Models final rule with comment period (81 FR 77008, November 4, 2016), hereinafter referred to as the ''CY 2017 Quality Payment Program final rule.'' In addition, we are aware of the diversity among clinician practices in their experience with quality-based payments. As a result of these factors, we expect the Quality Payment Program to evolve over multiple years in order to achieve our national goals. To date, we have laid the groundwork for expansion toward an innovative, outcome-focused, patient-centered, resource-effective health system that leverages health information technology to support clinicians and patients and builds collaboration across care settings. This proposed rule is the next part of a staged approach to develop policies that are reflective of system capabilities and grounded in our core strategies to drive progress and reform efforts. We commit to continue evolving these policies.

CMS strives to put patients first, ensuring that they can make decisions about their own healthcare along with their clinicians. We want to ensure innovative approaches to improve quality, accessibility and affordability while paying particular attention to improving clinicians and beneficiaries experience when interacting with CMS programs. The Quality Payment Program aims to (1) support care improvement by focusing on better outcomes for patients, decreased clinician burden, and preservation of independent clinical practice; (2) promote adoption of APMs that align incentives for high-quality, low-cost care across healthcare stakeholders; and (3) advance existing delivery system reform efforts, including ensuring a smooth transition to a healthcare system that promotes high-value, efficient care through unification of CMS legacy programs.

We previously finalized the transition year Quality Payment Program policies in the CY 2017 Quality Payment Program final rule. In that final rule, we implemented policies to improve physician and other clinician payments by changing the way Medicare incorporates quality measurement into payments and by developing new policies to address and incentivize participation in APMs. The final rule established the Quality Payment Program and its two interrelated pathways: Advanced APMs, and the MIPS. The final rule established incentives for participation in Advanced APMs, supporting the goals of transitioning from fee-for-service (FFS) payments to payments for quality and value, including approaches that focus on better care, smarter spending, and healthier people. The final rule included definitions and processes to identify Qualifying APM Participants (QPs) in Advanced APMs and outlined the criteria for use by the Physician-Focused Payment Model Technical Advisory Committee (PTAC) in making comments and recommendations to the Secretary on proposals for physician-focused payment models (PFPMs).

The final rule also established policies to implement MIPS, a program for certain eligible clinicians that makes Medicare payment adjustments based on performance on quality, cost and other measures and activities, and that consolidates components of three precursor programs—the Physician Quality Reporting System (PQRS), the Physician Value-based Payment Modifier (VM), and the Medicare Electronic Health Record (EHR) Incentive Program for eligible professionals (EPs). As prescribed by MACRA, MIPS focuses on the following: quality—including a set of evidence-based, specialty-specific standards; cost; practice-based improvement activities; and use of certified electronic health record (EHR) technology (CEHRT) to support interoperability and advanced quality objectives in a single, cohesive program that avoids redundancies.

In this proposed rule, we are building and improving Quality Payment Program policies that will be familiar to stakeholders and are designed to integrate easily across clinical practices during the second and future years of implementation. We strive to continue our focus on priorities that can drive improvements toward better patient outcomes without creating undue

burden for clinicians. In this proposed rule, we also address elements of MACRA that were not included in the first year of the program, including virtual groups, facility-based measurement, and improvement scoring. We also include proposals to continue implementing elements of MACRA that do not take effect in the first or second year of the Quality Payment Program, including policies related to the All-Payer Combination Option for identifying QPs and assessing eligible clinicians' participation in Other Payer Advanced APMs. To provide unity and consistency across the two paths of the Quality Payment Program, MIPS and APMs, in this proposed rule we have referred to the second year of the program as ''Quality Payment Program Year 2.''

B. Quality Payment Program Strategic Objectives

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77010), after extensive outreach with clinicians, patients and other stakeholders, we created six strategic objectives to drive continued progress and improvement. These objectives guided our final policies and will guide our future rulemaking in order to design, implement, and evolve a Quality Payment Program that aims to improve health outcomes, promote efficiency, minimize burden of participation, and provide fairness and transparency in operations. These strategic objectives are as follows: (1) To improve beneficiary outcomes and engage patients through patient-centered Advanced APM and MIPS policies; (2) to enhance clinician experience through flexible and transparent program design and interactions with easy-to-use program tools; (3) to increase the availability and adoption of Advanced APMs; (4) to promote program understanding and maximize participation through customized communication, education, outreach and support that meet the needs of the diversity of physician practices and patients, especially the unique needs of small practices; (5) to improve data and information sharing to provide accurate, timely, and actionable feedback to clinicians and other stakeholders; and (6) to promote IT systems capabilities that meet the needs of users and are seamless, efficient and valuable on the front and back-end. We also believe it is important to ensure the Quality Payment Program maintains operational excellence as the program develops. Therefore we are adding a seventh objective, specifically to ensure operational excellence in program implementation and ongoing development. More information on these objectives and the Quality Payment Program can be found at *www.qpp.cms.gov*.

With these objectives, we recognize that the Quality Payment Program provides new opportunities to improve care delivery by supporting and rewarding clinicians as they find new ways to engage patients, families, and caregivers and to improve care coordination and population health management. In addition, we recognize that by developing a program that is flexible instead of one-size-fits-all, clinicians will be able to choose to participate in a way that is best for them, their practice, and their patients. For eligible clinicians interested in APMs, we believe that by setting ambitious yet achievable goals, eligible clinicians will move with greater certainty toward these new approaches of delivering care. APMs are a vital part of bending the Medicare cost curve by encouraging the delivery of high-quality, low-cost care. To these ends, and to allow this program to work for all stakeholders, we further recognize that we must provide ongoing education, support, and technical assistance so that clinicians can understand program requirements, use available tools to enhance their practices, and improve quality and progress toward participation in APMs if that is the best choice for their practice. Finally, we understand that we must achieve excellence in program management, focusing on customer needs, promoting problem-solving, teamwork, and leadership to provide continuous improvements in the Quality Payment Program.

C. One Quality Payment Program

Clinicians have told us that they do not separate their patient care into domains, and that the Quality Payment Program needs to reflect typical clinical workflows in order to achieve its goal of better patient care. Advanced APMs, the focus of one pathway of the Quality Payment Program, contribute to better care and smarter spending by allowing physicians and other clinicians to deliver coordinated, customized, high-value care to their patients in a streamlined and cost-effective manner. Within MIPS, the second pathway of the Quality Payment Program, we believe that integration into typical clinical workflows can best be accomplished by making connections across the four statutory pillars of the MIPS incentive structure—quality, clinical practice improvement activities (referred to as ''improvement activities''), meaningful use of CEHRT (referred to as ''advancing care information''), and resource use (referred to as ''cost'')—and by emphasizing that the Quality Payment Program is at its core about improving the quality of patient care.

Although there are two separate pathways within the Quality Payment Program, the Advanced APM and MIPS tracks both contribute toward the goal of seamless integration of the Quality Payment Program into clinical practice workflows. Advanced APMs promote this seamless integration by way of payment methodology and design that incentivize care coordination, and the MIPS builds the capacity of eligible clinicians across the four pillars of MIPS to prepare them for participation in MIPS APMs and Advanced APMs in later years of the Quality Payment Program. Indeed, the bedrock of the Quality Payment Program is high-value, patient-centered care, informed by useful feedback, in a continuous cycle of improvement. The principal way that MIPS measures quality of care is through a set of clinical quality measures (CQMs) from which MIPS eligible clinicians can select. The CQMs are evidence-based, and the vast majority are created or supported by clinicians. Over time, the portfolio of quality measures will grow and develop, driving towards outcomes that are of the greatest importance to patients and clinicians and away from process, or ''check the box'' type measures.

Through MIPS, we have the opportunity to measure quality, not only through evidence-based quality measures, but also by accounting for activities that clinicians themselves identify: namely, practice-driven quality improvement. MIPS also requires us to assess whether CEHRT is used meaningfully. Based on significant feedback, this area was simplified to support the exchange of patient information, engagement of patients in their own care through technology, and the way technology specifically supports the quality goals selected by the practice. The cost performance category was simplified and weighted at zero percent of the final score for the transition year of CY 2017 to allow clinicians an opportunity to ease into the Quality Payment Program. We further note the cost performance category requires no separate submissions for participation which minimizes burden on clinicians. The assessment of cost is a vital part of ensuring that clinicians are providing Medicare beneficiaries with high-value care. Given the primary focus on value, we indicated in the CY 2017 Quality

Payment Program final rule our intention to align cost measures with quality measures over time in the scoring system (81 FR 77010). That is, we established special policies for the first year of the Quality Payment Program, which enabled a ramp-up and gradual transition with less financial risk for clinicians in the transition year. We called this approach ''pick your pace'' and allowed clinicians and groups to participate in MIPS through flexible means while avoiding a negative payment adjustment. In this proposed rule, we continue the slow ramp-up of the Quality Payment Program by establishing special policies for Program Year 2 aimed at encouraging successful participation in the program while reducing burden, reducing the number of clinicians required to participate, and preparing clinicians for the CY 2019 performance period (CY 2021 payment year).

D. Summary of the Major Provisions

1. Quality Payment Program Year 2

We believe the second year of the Quality Payment Program should build upon the foundation that has been established which provides a trajectory for clinicians to value-based care. This trajectory provides to clinicians the ability to participate in the program through two pathways: MIPS and Advanced APMs. As we indicated in the CY 2017 Quality Payment Program final rule (81 FR 77011), we believed that a second transition period would be necessary to build upon the iterative learning and development period as we build towards a steady state. We continue to believe this to be true and have therefore crafted our policies to extend flexibilities into Quality Payment Program Year 2.

2. Small Practices

The support of small, independent practices remains an important thematic objective for the implementation of the Quality Payment Program and is expected to be carried throughout future rulemaking. For MIPS performance periods occurring in 2017, many small practices are excluded from new requirements due to the low-volume threshold, which was set at less than or equal to $30,000 in Medicare Part B allowed charges or less than or equal to 100 Medicare Part B patients. We have heard feedback, however, from many small practices that challenges still exist in their ability to participate in the program. We are proposing additional flexibilities including: Implementing the virtual groups provisions; increasing the low-volume threshold to less than or equal to $90,000 in Medicare Part B allowed charges or less than or equal to 200 Medicare Part B patients; adding a significant hardship exception from the advancing care information performance category for MIPS eligible clinicians in small practices; and providing bonus points that are added to the final scores of MIPS eligible clinicians who are in small practices. We believe that these additional flexibilities and reduction in barriers will further enhance the ability of small practices to participate successfully in the Quality Payment Program.

In keeping with the objectives to provide education about the Quality Payment Program and maximize participation, and as mandated by the statute, during a period of 5 years, $100 million in funding was provided for technical assistance to be available to provide guidance and assistance to MIPS eligible clinicians in small practices through contracts with regional health collaboratives, and others. Guidance and assistance on the MIPS performance categories or the transition to APM participation will be available to MIPS eligible clinicians in practices of 15 or fewer clinicians with priority given to practices located in rural areas or medically underserved areas (MUAs), and practices with low MIPS final scores. More information on the technical assistance support available to small practices can be found at *https://qpp.cms.gov/docs/QPP_Support_for_Small_Practices.pdf*.

As discussed in section V.C. of this proposed rule, we have also performed an updated regulatory impact analysis, accounting for flexibilities, many of which are continuing into the Quality Payment Program Year 2, that have been created to ease the burden for small and solo practices. We estimate that at least 80 percent of clinicians in small practices with 1–15 clinicians will receive a positive or neutral MIPS payment adjustment. We refer readers to section V.C. of this proposed rule for details on how this estimate was developed.

3. Summary of Major Provisions for Advanced Alternative Payment Models (Advanced APMs)

a. Overview

APMs represent an important step forward in our efforts to move our healthcare system from volume-based to value-based care. APMs that meet the criteria to be Advanced APMs provide the pathway through which eligible clinicians, who would otherwise fall under the MIPS, can become Qualifying APM Participants (QPs), thereby earning incentive payments for their Advanced APM participation. In the CY 2017 Quality Payment Program final rule (81 FR 77516), we estimated that 70,000 to 120,000 eligible clinicians would be QPs for payment year 2019 based on Advanced APM participation in performance year 2017. With new Advanced APMs expected to be available for participation in 2018, including the Medicare ACO Track 1 Plus (1+) Model, and the reopening of the application process to new participants for some current Advanced APMs, such as the Next Generation ACO Model and Comprehensive Primary Care Plus Model, we anticipate higher numbers of QPs in subsequent years of the program. We currently estimate that approximately 180,000 to 245,000 eligible clinicians may become QPs for payment year 2020 based on Advanced APM participation in performance year 2018.

b. Advanced APMs

In the CY 2017 Quality Payment Program final rule (81 FR 77408), to be considered an Advanced APM, we finalized that an APM must meet all three of the following criteria, as required under section 1833(z)(3)(D) of the Act: (1) The APM must require participants to use CEHRT; (2) The APM must provide for payment for covered professional services based on quality measures comparable to those in the quality performance category under MIPS and; (3) The APM must either require that participating APM Entities bear risk for monetary losses of a more than nominal amount under the APM, or be a Medical Home Model expanded under section 1115A(c) of the Act.

We are proposing to maintain the generally applicable revenue-based nominal amount standard at 8 percent of the estimated average total Parts A and B revenue of eligible clinicians in participating APM Entities for QP Performance Periods 2019 and 2020.

c. Qualifying APM Participant (QP) and Partial QP Determination

QPs are eligible clinicians in an Advanced APM who have met a threshold for a certain percentage of their patients or payments through an Advanced APM. QPs are excluded from MIPS for the year, and receive a 5 percent APM Incentive Payment for each year they are QPs beginning in 2019 through 2024. The statute sets thresholds for the level of participation in Advanced APMs required for an eligible clinician to become a QP for a year. For Advanced APMs that start or end during the Medicare QP Performance Period and operate

continuously for a minimum of 60 days during the Medicare QP Performance Period for the year, we are proposing to make QP determinations using payment or patient data only for the dates that APM Entities were able to participate in the Advanced APM per the terms of the Advanced APM, not for the full Medicare QP Performance Period. Eligible clinicians who participate in Advanced APMs but do not meet the QP or Partial QP thresholds are subject to MIPS reporting requirements and payment adjustments.

d. All-Payer Combination Option

The All-Payer Combination Option, which uses a calculation based on both the Medicare Option and the eligible clinician's participation in Other Payer Advanced APMs to conduct QP determinations, is applicable beginning in performance year 2019. To become a QP through the All-Payer Combination Option, an eligible clinician must participate in an Advanced APM with CMS, as well as an Other Payer Advanced APM. We identify Other Payer Advanced APMs based on information submitted to us by eligible clinicians, APM Entities, and in some cases by payers, including states and Medicare Advantage Organizations. In addition, the eligible clinician or the APM Entity must submit information to CMS so that we can determine whether other payer arrangements are Other Payer Advanced APMs and whether the eligible clinician meets the requisite QP threshold of participation. To be an Other Payer Advanced APM, as set forth in section 1833(z)(2)(B)(ii) and (C)(ii) of the Act and implemented in the CY 2017 Quality Payment Program final rule, a payment arrangement with a payer (for example, payment arrangements authorized under Title XIX, Medicare Health Plan payment arrangements, and payment arrangements in CMS Multi-Payer Models) must meet all three of the following criteria: (1) CEHRT is used; (2) the payment arrangement must require the use of quality measures comparable to those in the quality performance category under MIPS and; (3) the payment arrangement must either require the APM Entities to bear more than nominal financial risk if actual aggregate expenditures exceed expected aggregate expenditures, or be a Medicaid Medical Home Model that meets criteria comparable to Medical Home Models expanded under section 1115A(c) of the Act.

We are proposing modifications pertaining to the third criterion that the payment arrangement must either require the APM Entities to bear more than nominal financial risk if actual aggregate expenditures exceed expected aggregate expenditures; or be a Medicaid Medical Home Model that meets criteria comparable to Medical Home Models expanded under section 1115A(c) of the Act. Specifically, we are proposing to add a revenue-based nominal amount standard in addition to the benchmark-based nominal amount standard that would be applicable only to payment arrangements in which risk is expressly defined in terms of revenue.

We are proposing modifications to our methodologies to determine whether eligible clinicians will meet the QP thresholds using the All-Payer Combination Option. Specifically, we are proposing to conduct all QP determinations under the All-Payer Combination Option at the individual eligible clinician level and are seeking comment on any possible exceptions to this proposed policy that would be warranted, such as a determination based on APM Entity group performance under the All-Payer Combination Option for eligible clinicians participating in CMS Multi-Payer Models. We are also proposing to establish an All-Payer QP Performance Period to assess participation in Other Payer Advanced APMs under the All-Payer Combination Option, and to rename the QP Performance Period we established in rulemaking last year as the Medicare QP Performance Period.

We are proposing to modify the information submission requirements for the All-Payer Combination Option. Specifically, we are proposing modifications to the information we require to make APM Entity or eligible clinician initiated determinations of Other Payer Advanced APMs after the All-Payer QP Performance Period, as well as the information we require to perform QP determinations under the All-Payer Combination Option. We are also proposing policies on the handling of information submitted for purposes of assessment under the All-Payer Combination Option.

We are proposing a Payer Initiated Other Payer Advanced APM Determination Process, which would allow certain other payers, including payment arrangements authorized under Title XIX, Medicare Health Plans, and payers with payment arrangements in CMS Multi-Payer Models, to request that we determine whether their other payer arrangements are Other Payer Advanced APMs starting prior to the 2019 All-Payer QP Performance Period and each year thereafter.

e. Physician-Focused Payment Models (PFPMs)

The PTAC is an 11-member federal advisory committee that is an important avenue for the creation of innovative payment models. The PTAC is charged with reviewing stakeholders' proposed PFPMs, and making comments and recommendations to the Secretary regarding whether they meet the PFPM criteria established by the Secretary through rulemaking in the CY 2017 Quality Payment Program final rule. PTAC comments and recommendations will be reviewed by the CMS Innovation Center and the Secretary, and we will post a detailed response to them on the CMS Web site. We are seeking comments on broadening the definition of PFPM to include payment arrangements that involve Medicaid or the Children's Health Insurance Program (CHIP) as a payer even if Medicare is not included as a payer. This broadened definition might be more inclusive of potential PFPMs that could focus on areas not generally applicable to the Medicare population, and could engage more stakeholders in designing PFPMs. In addition, as we gain experience with public submission of PFPM proposals to the PTAC, we are seeking comments on the Secretary's criteria and stakeholders' needs in developing PFPM proposals aimed at meeting the criteria.

4. Summary of Major Provisions for the Merit-Based Incentive Payment System (MIPS)

For Quality Payment Program Year 2 which is the second year of the MIPS and includes the performance periods in 2018 and the 2020 MIPS payment year, we are proposing the following policies:

a. Quality

We previously finalized that the quality performance category would comprise 60 percent of the final score for the transition year and 50 percent of the final score for the 2020 MIPS payment year (81 FR 77100). For the 2020 MIPS payment year, now we are proposing to maintain a 60 percent weight for the quality performance category contingent upon our proposal to reweight the cost performance category to zero for the 2020 MIPS payment year as discussed in section II.C.6.b.(2) in this proposed rule. Quality measures are selected annually through a call for quality measures, and a final list of quality measures will be published in the **Federal Register** by November 1 of each year. Except as discussed in section II.C.6.b.(3)(a)(iii) of this proposed rule with regard to the

CAHPS for MIPS survey, we are not proposing any changes to the submission criteria for quality measures in this proposed rule. We are proposing for the CAHPS for MIPS survey for the Quality Payment Program Year 2 and future years that the survey administration period would, at a minimum, span over 8 weeks and would end no later than February 28th following the applicable performance period. In addition, we are proposing for the Quality Payment Program Year 2 and future years to remove two Summary Survey Modules (SSM), specifically, ''Helping You to Take Medication as Directed'' and ''Between Visit Communication'' from the CAHPS for MIPS survey.

For the 2018 MIPS performance period, we previously finalized that the data completeness threshold would increase to 60 percent for data submitted on quality measures using QCDRs, qualified registries, via EHR, or Medicare Part B claims. We noted that these thresholds for data submitted on quality measures using QCDRs, qualified registries, via EHR, or Medicare Part B claims would increase for performance periods occurring in 2019 and future years. However, as discussed in section II.C.6.b. of this proposed rule, we are proposing for the 2018 MIPS performance period to maintain the transition year data completeness threshold of 50 percent for data submitted on quality measures using QCDRs, qualified registries, EHR, or Medicare Part B claims to provide an additional year for individual MIPS eligible clinicians and groups to gain experience with the MIPS before increasing the data completeness threshold. However, we are proposing to increase the data completeness threshold for the 2021 MIPS payment year to 60 percent for data submitted on quality measures using QCDRs, qualified registries, EHR, or Medicare Part B claims. We anticipate that for performance periods going forward, as MIPS eligible clinicians gain experience with the MIPS, we would further increase these thresholds over time.

b. Improvement Activities

Improvement activities are those that support broad aims within healthcare delivery, including care coordination, beneficiary engagement, population management, and health equity. In response to comments from experts and stakeholders across the healthcare system, improvement activities were given relative weights of high and medium. For the 2020 MIPS payment year, we previously finalized that the improvement activities performance category would comprise 15 percent of the final score (81 FR 77179). For performance periods occurring in 2018, we are not proposing any changes in improvement activities scoring as discussed in the CY 2017 Quality Payment Program final rule (81 FR 77312).

As discussed in the appendices of this proposed rule, we are proposing new improvement activities (Table F) and improvement activities with changes (Table G) for the 2018 MIPS performance period and future years for inclusion in the Improvement Activities Inventory. Activities proposed in this section would apply for the 2018 MIPS performance period and future performance periods unless further modified via notice and comment rulemaking. We refer readers to Table H of the CY 2017 Quality Payment Program final rule for a list of all the previously finalized improvement activities (81 FR 77817 through 77831).

As discussed in section II.C.6.e.3.(c) of this proposed rule, we are proposing to expand our definition of how we will recognize an individual MIPS eligible clinician or group as being a certified patient-centered medical home or comparable specialty practice. We finalized at § 414.1380(b)(3)(iv) in the CY 2017 Quality Payment Program final rule that a certified patient-centered medical home includes practice sites with current certification from a national program, regional or state program, private payer or other body that administers patient-centered medical home accreditation. We are proposing in section II.C.6.e.(3)(b) of this proposed rule that eligible clinicians in practices that have been randomized to the control group in the CPC+ model would also receive full credit as a Medical Home Model. In addition, for group reporters, for the 2018 MIPS performance period and future performance periods, we are proposing to require that at least 50 percent of the practice sites within a TIN must be recognized as a certified or recognized patient-centered medical home or comparable specialty practice to receive full credit in the improvement activities performance category.

As discussed in section II.C.6.f.(2)(d) of this proposed rule, in recognition of improvement activities as supporting the central mission of a unified Quality Payment Program, we propose to continue to designate activities in the Improvement Activities Inventory that will also qualify for the advancing care information bonus score. This is consistent with our desire to recognize that CEHRT is often deployed to improve care in ways that our programs should recognize.

c. Advancing Care Information

For the Quality Payment Program Year 2, the advancing care information performance category comprises 25 percent of the final score. However, if a MIPS eligible clinician is participating in a MIPS APM the advancing care information performance category may comprise 30 percent or 75 percent of the final score depending on the availability of APM quality data for reporting. Objectives and measures in the advancing care information performance category focus on the secure exchange of health information and the use CEHRT to support patient engagement and improved healthcare quality. While we continue to recommend that physicians and clinicians migrate to the implementation and use of EHR technology certified to the 2015 Edition so they may take advantage of improved functionalities, including care coordination and technical advancements such as application programming interfaces, or APIs, we recognize that some practices may have challenges in adopting new certified health IT. Therefore we are proposing that MIPS eligible clinicians may continue to use EHR technology certified to the 2014 Edition for the performance period in CY 2018. We are proposing minor modifications to the advancing care information objectives and measures and the 2017 advancing care information transition objectives and measures. We are also proposing to add an exclusion for the e-Prescribing and Health Information Exchange Objectives. We are proposing to modify our scoring policy for the Public Health and Clinical Data Registry Reporting Objectives and Measures for the performance score and the bonus score.

We are also proposing to implement several provisions of the 21st Century Cures Act (Pub. L. 114–255, enacted on December 13, 2016) pertaining to hospital-based MIPS eligible clinicians, ambulatory surgical center-based MIPS eligible clinicians, MIPS eligible clinicians using decertified EHR technology, and significant hardship exceptions under the MIPS. We are also proposing to add a significant hardship exception for MIPS eligible clinicians in small practices.

d. Cost

In this proposed rule, we are proposing to weight the cost performance category at zero percent of the final score for the 2020 MIPS payment year in order to improve clinician understanding of the measures

and continue development of episode-based measures that will be used in this performance category.

For the 2018 MIPS performance period, we are proposing to adopt for the cost performance category the total per capita costs for all attributed beneficiaries measure and the Medicare Spending per Beneficiary (MSPB) measure that were adopted for the 2017 MIPS performance period. For the 2018 MIPS performance period, we are not proposing to use the 10 episode-based measures that were adopted for the 2017 MIPS performance period. Although data on the episode-based measures has been made available to clinicians in the past, we are in the process of developing new episode-based measures with significant clinician input and believe it would be more prudent to introduce these new measures over time. We will continue to offer performance feedback on episode-based measures prior to potential inclusion of these measures in MIPS to increase clinician familiarity with the concept as well as specific episode-based measures.

Specifically, we intend to provide feedback on these new episode-based cost measures in the fall of this year for informational purposes only. We intend to provide performance feedback on the MSPB and total per capita cost measures by July 1, 2018, consistent with section 1848(q)(12) of the Act. In addition, we intend to offer feedback on another set of newly developed episode-based cost measures in 2018 as well. Therefore, clinicians would have received feedback on cost measures at several points prior to the cost performance category counting as part of the final score.

e. Submission Mechanisms

As discussed in section II.6.a. of this proposed rule, we are proposing additional flexibility for submitting data. Individual MIPS eligible clinicians or groups would be able to submit measures and activities, as available and applicable, via as many mechanisms as necessary to meet the requirements of the quality, improvement activities, or advancing care information performance categories. We expect that this option will provide clinicians the ability to select the measures most meaningful to them, regardless of the submission mechanism.

f. Virtual Groups

There are generally three ways to participate in MIPS: (1) As an individual; (2) as a group; and (3) as a virtual group. In this proposed rule, we are proposing to establish requirements for MIPS participation at the virtual group level. We propose to define a virtual group as a combination of two or more TINs composed of a solo practitioner (a MIPS eligible clinician (as defined at § 414.1305) who bills under a TIN with no other NPIs billing under such TIN) or a group (as defined at § 414.1305) with 10 or fewer eligible clinicians under the TIN that elects to form a virtual group with at least one other such solo practitioner or group for a performance period for a year.

To provide support and reduce burden, we intend to make technical assistance (TA) available, to the extent feasible and appropriate, to support clinicians who choose to come together as a virtual group for the first 2 years of virtual group implementation applicable to the 2018 and 2019 performance years. Clinicians can access the TA infrastructure that they may be already utilizing. For Quality Payment Program Year 3, we intend to provide an electronic election process if technically feasible. Clinicians who do not elect to contact their designated TA representative would still have the option of contacting the Quality Payment Program Service Center. We believe that our proposal will create an election process that is simple and straightforward.

g. MIPS APMs

In the CY 2017 Quality Payment Program final rule (81 FR 77246), we finalized that MIPS eligible clinicians who participate in MIPS APMs will be scored using the APM scoring standard instead of the generally applicable MIPS scoring standard. For the 2018 performance period, we are proposing modifications to the quality performance category reporting requirements and scoring for MIPS eligible clinicians in most MIPS APMs, and other modifications to the APM scoring standard. For purposes of the APM scoring standard, we are proposing to add a fourth snapshot date that would be used only to identify APM Entity groups participating in those MIPS APMs that require full TIN participation. Along with the other APM Entity groups, these APM Entity groups would be used for the purposes of reporting and scoring under the APM scoring standard described the CY 2017 Quality Payment Program final rule (81 FR 77246).

h. Facility-Based Measurement

For the transition year of MIPS, we considered an option for facility-based MIPS eligible clinicians to elect to use their institution's performance rates as a proxy for the MIPS eligible clinician's performance in the quality and cost performance categories. However, we did not propose an option for the transition year of MIPS because there were several operational considerations that needed to be addressed before this option could be implemented. After consideration of comments received on the CY 2017 Quality Payment Program proposed rule (81 FR 28192) and other comments received, we have decided to implement facility-based measures for the 2018 MIPS performance period and future performance periods to add more flexibility for clinicians to be assessed in the context of the facilities at which they work. As discussed in section II.C.7.b. of this proposed rule, we are proposing facility-based measures policies related to applicable measures, applicability to facility-based measurement, group participation, and facility attribution.

For clinicians whose primary professional responsibilities are in a healthcare facility we present a method to assess performance in the quality and cost performance categories of MIPS based on the performance of that facility in another value-based purchasing program. While we propose to limit that opportunity to clinicians who practice primarily in the hospital, we seek to expand the program to other value-based payment programs as appropriate in the future. We discuss that new method of scoring in section II.C.7.b.(4) of this proposed rule.

i. Scoring

In the CY 2017 Quality Payment Program final rule, we finalized a unified scoring system to determine a final score across the 4 performance categories (81 FR 77273 through 77276). For the 2018 MIPS performance period, we propose to build on the scoring methodology we finalized for the transition year, focusing on encouraging MIPS eligible clinicians to meet data completeness requirements.

For quality performance category scoring, we are proposing to extend some of the transition year policies to the 2018 MIPS performance period and are also proposing several modifications to existing policy. For the 2018 MIPS performance period, we are proposing to maintain the 3 point floor for measures that can be reliably scored against a benchmark. We are also proposing, to maintain the policy to assign 3 points to measures that are submitted but do not have a benchmark or do not meet the case minimum, which does not apply to the CMS Web Interface measures and administrative claims based measures. For the 2018 MIPS performance period, we are also proposing to lower the number of points available for measures that do not meet the data completeness

criteria, except for a measure submitted by a small practice, which we propose to continue to assign 3 points if the measure does not meet data completeness. This does not apply to CMS Web Interface measures or administrative claims based measures.

Beginning with the 2018 MIPS performance period, we are proposing to add performance standards for scoring improvement for the quality and cost performance categories. We are also proposing a systematic approach to address topped out quality measures.

For the 2018 MIPS performance period, we are proposing that 3 performance category scores (quality, improvement activities, and advancing care information) would be given weight in the final score, or be reweighted if a performance category score is not available. We are also proposing to add final score bonuses for small practices and for MIPS eligible clinicians that care for complex patients.

We are also proposing that the final score will be compared against a MIPS performance threshold of 15 points, which can be achieved via multiple pathways and continues the gradual transition into MIPS.

j. Performance Feedback

We are proposing to provide Quality Payment Program performance feedback to eligible clinicians and groups. Initially, we would provide performance feedback on an annual basis. In future years, we aim to provide performance feedback on a more frequent basis, which is in line with clinician requests for timely, actionable feedback that they can use to improve care.

k. Targeted Review Process

In the CY 2017 Quality Payment Program final rule (81 FR 77353), we finalized a targeted review process under MIPS wherein a MIPS eligible clinician or group may request that we review the calculation of the MIPS payment adjustment factor and, as applicable, the calculation of the additional MIPS payment adjustment factor applicable to such MIPS eligible clinician or group for a year. We are not proposing any changes to this process for the second year of the MIPS.

l. Third Party Intermediaries

We believe that third party intermediaries that collect or submit data on behalf of individual eligible clinicians and groups participating in MIPS and allowing for flexible reporting options, will provide individual MIPS eligible clinicians and groups with options to accommodate different practices and make measurement meaningful. In the CY 2017 Quality Payment Program final rule (81 FR 77362), we finalized that qualified registries, QCDRs, health IT vendors, and CMS-approved survey vendors will have the ability to act as intermediaries on behalf of individual MIPS eligible clinicians and groups for submission of data to CMS across the quality, improvement activities, and advancing care information performance categories. As discussed in section II.C.10.a.(3) of this proposed rule, we propose to eliminate the self-nomination submission method of email and require that QCDRs and qualified registries submit their self-nomination applications via a web-based tool for future program years beginning with performance periods occurring in 2018. We are proposing, beginning with the 2019 performance period, a simplified process in which existing QCDRs or qualified registries in good standing may continue their participation in MIPS by attesting that their approved data validation plan, cost, approved QCDR measures (applicable to QCDRs only), MIPS quality measures, activities, services, and performance categories offered in the previous year's performance period of MIPS have no changes. QCDRs and qualified registries in good standing, may also make substantive or minimal changes to their approved self-nomination application from the previous year of MIPS that would be submitted during the self-nomination period for CMS review and approval. By attesting that certain aspects of their application will remain the same, as approved from the previous year, existing QCDRs in good standing and qualified registries will be spending less time completing the self-nomination application, as was previously required. This process will be conducted on an annual basis.

In addition, we are proposing that the term ''QCDR measures'' replace the term ''non-MIPS measures,'' without proposing any changes to the definition, criteria, or requirements that were finalized in the CY 2017 Quality Payment Program final rule (81 FR 77375). We are not proposing any changes to the health IT vendors that obtain data from CEHRT requirements.

Lastly, we are proposing for future program years, beginning with performance periods occurring in 2018 that we remove the April 30th survey vendor application deadline. We are proposing for the Quality Payment Program Year 2 and future years that the vendor application deadline be January 31st of the applicable performance year or a later date specified by CMS. We will notify vendors of the application deadline, to become a CMS-approved survey vendor through additional communications and postings.

m. Public Reporting

As discussed in section II.C.11. of this proposed rule, we are proposing public reporting of certain eligible clinician and group Quality Payment Program information, including MIPS and APM data in an easily understandable format as required under the MACRA.

n. Eligibility and Exclusion Provisions of the MIPS Program

In section II.C.1.f. of this proposed rule, we are proposing to modify the definition of a non-patient facing MIPS eligible clinician to apply to virtual groups. We are also proposing to specify that groups considered to be non-patient facing (more than 75 percent of the NPIs billing under the group's TIN meet the definition of a non-patient facing individual MIPS eligible clinician) during the non-patient facing determination period would automatically have their advancing care information performance category reweighted to zero. Additionally, in section II.C.3.c. of this proposed rule, we are proposing to modify the low-volume threshold policy established in the CY 2017 Quality Payment Program final rule. As discussed in section II.C.3.c of this proposed rule, we believe that increasing the low-volume threshold to less than or equal to $90,000 in Medicare Part B charges or 200 or fewer Part-B enrolled Medicare beneficiaries would further decrease burden on MIPS eligible clinicians that practice in rural areas or are part of a small practice or are solo practitioners.

E. Payment Adjustments

As discussed in section V.C. of this proposed rule, for the 2020 payment year based on Advanced APM participation in 2018 performance period, we estimate that approximately 180,000 to 245,000 clinicians will become QPs, and therefore be exempt from MIPS and qualify for lump sum incentive payments based on 5 percent of their Part B allowable charges for covered professional services. We estimate that the total lump sum incentive payments will be between approximately $590 and $800 million for the 2020 Quality Payment Program payment year. This expected growth in QPs between the first and second year of the program is due in part to reopening of CPC+ and Next Generation ACO for 2018, and the ACO Track 1+ which is projected to have a large number of participants, with a large majority reaching QP status.

Under the policies in this proposed rule, we estimate that approximately 572,000 eligible clinicians would be required to participate in MIPS in the 2018 MIPS performance period, although this number may vary depending on the number of eligible clinicians excluded from MIPS based on their status as QPs or Partial QPs. After restricting the population to eligible clinician types who are not newly enrolled, the proposed increase in the low-volume threshold is expected to exclude 585,560 clinicians who do not exceed the low-volume threshold. In the 2020 MIPS payment year, MIPS payment adjustments will be applied based on MIPS eligible clinicians' performance on specified measures and activities within three integrated performance categories; the fourth category of cost, as previously outlined, would be weighted to zero in the 2020 MIPS payment year. Assuming that 90 percent of eligible clinicians of all practice sizes participate in MIPS, we estimate that MIPS payment adjustments will be approximately equally distributed between negative MIPS payment adjustments ($173 million) and positive MIPS payment adjustments ($173 million) to MIPS eligible clinicians, as required by the statute to ensure budget neutrality. Positive MIPS payment adjustments will also include up to an additional $500 million for exceptional performance to MIPS eligible clinicians whose final score meets or exceeds the additional performance threshold of 70 points. These MIPS payment adjustments are expected to drive quality improvement in the provision of MIPS eligible clinicians' care to Medicare beneficiaries and to all patients in the health care system. However, the distribution will change based on the final population of MIPS eligible clinicians for CY 2020 and the distribution of scores under the program. We believe that starting with these modest initial MIPS payment adjustments is in the long-term best interest of maximizing participation and starting the Quality Payment Program off on the right foot, even if it limits the magnitude of MIPS positive adjustments during the 2018 MIPS performance period. The increased availability of Advanced APM opportunities, including through Medical Home models, also provides earlier avenues to earn APM incentive payments for those eligible clinicians who choose to participate.

F. Benefits and Costs of Proposed Rule

The Quality Payment Program may result in quality improvements and improvements to the patients' experience of care as MIPS eligible clinicians respond to the incentives for high-quality care provided by MIPS and implement care quality improvements in their clinical practices.

We also quantify several costs associated with this rule. We estimate that this proposed rule will result in approximately $857 million in collection of information-related burden. We estimate that the incremental collection of information-related burden associated with this proposed rule is approximately $12.4 million relative to the estimated burden of continuing the policies the CY 2017 Quality Payment Program final rule, which is $869 million. We also estimate regulatory review costs of $4.8 million for this proposed rule, comparable to the regulatory review costs of the CY 2017 Quality Payment Program proposed rule. We estimate that federal expenditures will include $173 million in revenue neutral payment adjustments and $500 million for exceptional performance payments. Additional federal expenditures include approximately $590-$800 million in APM incentive payments to QPs.

G. Stakeholder Input

In developing this proposed rule, we sought feedback from stakeholders and the public throughout the process, including in the CY 2017 Quality Payment Program final rule with comment period, listening sessions, webinars, and other listening venues. We received a high degree of interest from a broad spectrum of stakeholders. We thank our many commenters and acknowledge their valued input throughout the rulemaking process. We discuss the substance of relevant comments in the appropriate sections of this proposed rule, though we were not able to address all comments or all issues that all commenters brought forth due to the volume of comments and feedback. In general, commenters continue to support establishment of the Quality Payment Program and maintain optimism as we move from pure FFS Medicare payment towards an enhanced focus on the quality and value of care. Public support for our proposed approach and policies in the proposed rule focused on the potential for improving the quality of care delivered to beneficiaries and increasing value to the public—while rewarding eligible clinicians for their efforts.

We thank stakeholders again for their considered responses throughout our process, in various venues, including comments on the Request for Information Regarding Implementation of the Merit-based Incentive Payment System, Promotion of Alternative Payment Models, and Incentive Payments for Participation in Eligible Alternative Payment Models (herein referred to as the MIPS and APMs RFI) (80 FR 59102 through 59113) and the CY 2017 Quality Payment Program final rule (81 FR 77008 through 77831). We intend to continue open communication with stakeholders, including consultation with tribes and tribal officials, on an ongoing basis as we develop the Quality Payment Program in future years.

II. Provisions of the Proposed Regulations and Analysis of and Responses to Comments

A. Introduction

The Quality Payment Program, authorized by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) is a new approach for reforming care across the health care delivery system for eligible clinicians. Under the Quality Payment Program, eligible clinicians can participate via one of two pathways: Advanced Alternative Payment Models (APMs); or the Merit-based Incentive Payment System (MIPS). We began implementing the Quality Payment Program through rulemaking for calendar year (CY) 2017. This rule provides proposed updates for the second and future years of the Quality Payment Program.

B. Definitions

At § 414.1305, subpart O, we propose to define the following terms:

- All-Payer QP Performance Period.
- Ambulatory Surgical Center (ASC)-based MIPS eligible clinician.
- CMS Multi-Payer Model.
- Full TIN APM.
- Improvement Scoring.
- Medicare QP Performance Period.
- Other MIPS APM.
- Virtual group.

We propose to revise the definitions of the following terms:

- Affiliated practitioner.
- APM Entity.
- Attributed beneficiary.
- Certified Electronic Health Record Technology (CEHRT).
- Final Score.
- Hospital-based MIPS eligible clinician.
- Low-volume threshold.
- Medicaid APM.
- Non-patient facing MIPS eligible clinician.
- Other Payer Advanced APM.
- Rural areas.

We propose to remove the following terms:

- Advanced APM Entity.
- QP Performance Period.

These terms and definitions are discussed in detail in relevant sections of this proposed rule.

C. MIPS Program Details

1. MIPS Eligible Clinicians

a. Definition of a MIPS Eligible Clinician

In the CY 2017 Quality Payment Program final rule (81 FR77040 through 77041), we defined at § 414.1305 a MIPS eligible clinician, as identified by a unique billing TIN and NPI combination used to assess performance, as any of the following (excluding those identified at § 414.1310(b)): A physician (as defined in section 1861(r) of the Act), a physician assistant, nurse practitioner, and clinical nurse specialist (as such terms are defined in section 1861(aa)(5) of the Act), a certified registered nurse anesthetist (as defined in section 1861(bb)(2) of the Act), and a group that includes such clinicians. We established at § 414.1310(b) and (c) that the following are excluded from this definition per the statutory exclusions defined in section 1848(q)(1)(C)(ii) and (v) of the Act: (1) QPs; (2) Partial QPs who choose not to report on applicable measures and activities that are required to be reported under MIPS for any given performance period in a year; (3) low-volume threshold eligible clinicians; and (4) new Medicare-enrolled eligible clinicians. In accordance with sections 1848(q)(1)(A) and (q)(1)(C)(vi) of the Act, we established at § 414.1310(b)(2) that eligible clinicians (as defined at § 414.1305) who are not MIPS eligible clinicians have the option to voluntarily report measures and activities for MIPS. Additionally, we established at § 414.1310(d) that in no case will a MIPS payment adjustment apply to the items and services furnished during a year by eligible clinicians who are not MIPS eligible clinicians, as described in § 414.1310(b) and (c), including those who voluntarily report on applicable measures and activities specified under MIPS.

In the CY 2017 Quality Payment Program final rule (81 FR 77340), we noted that the MIPS payment adjustment applies only to the amount otherwise paid under Part B with respect to items and services furnished by a MIPS eligible clinician during a year, in which we will apply the MIPS payment adjustment at the TIN/NPI level. We have received requests for additional clarifications on which specific Part B services are subject to the MIPS payment adjustment, as well as which Part B services are included for eligibility determinations. We note that when Part B items or services are rendered by suppliers that are also MIPS eligible clinicians, there may be circumstances in which it is not operationally feasible for us to attribute those items or services to a MIPS eligible clinician at an NPI level in order to include them for purposes of applying the MIPS payment adjustment or making eligibility determinations.

To further clarify, there are circumstances that involve Part B prescription drugs and durable medical equipment where the supplier may also be a MIPS eligible clinician. In circumstances in which a MIPS eligible clinician furnishes a Part B covered item or service such as prescribing Part B drugs that are dispensed, administered, and billed by a supplier that is a MIPS eligible clinician, or ordering durable medical equipment that is administered and billed by a supplier that is a MIPS eligible clinician, it is not operationally feasible for us at this time to associate those billed allowable charges with a MIPS eligible clinician at an NPI level in order to include them for purposes of applying the MIPS payment adjustment or making eligibility determinations. For Part B items and services furnished by a MIPS eligible clinician such as purchasing and administering Part B drugs that are billed by the MIPS eligible clinician, such items and services may be subject to MIPS adjustment based on the MIPS eligible clinician's performance during the applicable performance period or included for eligibility determinations. For those billed Medicare Part B allowable charges relating to the purchasing and administration of Part B drugs that we are able to associate with a MIPS eligible clinician at an NPI level, such items and services furnished by the MIPS eligible clinician would be included for purposes of applying the MIPS payment adjustment or making eligibility determinations.

b. Group Practice (Group)

As discussed in the CY 2017 Quality Payment Program final rule (81 FR 77088 through 77831), we indicated that we will assess performance either for individual MIPS eligible clinicians or for groups. We defined a group at § 414.1305 as a single Taxpayer Identification Number (TIN) with two or more eligible clinicians (including at least one MIPS eligible clinician), as identified by their individual NPI, who have reassigned their Medicare billing rights to the TIN. We recognize that MIPS eligible clinicians participating in MIPS may be part of a TIN that has one portion of its NPIs participating in MIPS according to the generally applicable scoring criteria while the remaining portion of its NPIs is participating in a MIPS APM or an Advanced APM according to the MIPS APM scoring standard. In the CY 2017 Quality Payment Program final rule (81 FR 77058), we noted that except for groups containing APM participants, we are not permitting groups to ''split'' TINs if they choose to participate in MIPS as a group. Thus, we would like to clarify that we consider a group to be either an entire single TIN or portion of a TIN that: (1) Is participating in MIPS according to the generally applicable scoring criteria while the remaining portion of the TIN is participating in a MIPS APM or an Advanced APM according to the MIPS APM scoring standard; and (2) chooses to participate in MIPS at the group level. Also, we defined an APM Entity group at § 414.1305 as a group of eligible clinicians participating in an APM Entity, as identified by a combination of the APM identifier, APM Entity identifier, TIN, and NPI for each participating eligible clinician.

c. Small Practices

In the CY 2017 Quality Payment Program final rule (81 FR 77188), we defined the term small practices at § 414.1305 as practices consisting of 15 or fewer clinicians and solo practitioners. In section II.C.4.d. of this proposed rule, we discuss how small practice status would apply to virtual groups. Also, in the final rule, we noted that we would not make an eligibility determination regarding the size of small practices, but indicated that small practices would attest to the size of their group practice (81 FR 77057). However, we have since realized that our system needs to account for small practice size in advance of a performance period for operational purposes relating to assessing and scoring the improvement activities performance category, determining hardship exceptions for small practices as proposed in this proposed rule, calculating the small practice bonus for the final score as proposed in this proposed rule, and identifying small practices eligible for technical assistance. As a result, we believe it is critical to modify the way in which small practice size would be determined. To make eligibility determinations regarding the size of small practices for performance periods occurring in 2018 and future years, we propose that CMS would determine the size of small practices as described in this section of the proposed rule. As noted in the CY 2017 Quality Payment

Program final rule, the size of a group (including a small practice) would be determined before exclusions are applied (81 FR 77057). We note that group size determinations are based on the number of NPIs associated with a TIN, which would include clinicians (NPIs) who may be excluded from MIPS participation and do not meet the definition of a MIPS eligible clinician.

To make eligibility determinations regarding the size of small practices for performance periods occurring in 2018 and future years, we propose that CMS would determine the size of small practices by utilizing claims data. For purposes of this section, we are coining the term ''small practice size determination period'' to mean a 12-month assessment period, which consists of an analysis of claims data that spans from the last 4 months of a calendar year 2 years prior to the performance period followed by the first 8 months of the next calendar year and includes a 30-day claims run out. This would allow us to inform small practices of their status near the beginning of the performance period as it pertains to eligibility relating to technical assistance, applicable improvement activities criteria, the proposed hardship exception for small practices under the advancing care information performance category, and the proposed small practice bonus for the final score.

Thus, for purposes of performance periods occurring in 2018 and the 2020 MIPS payment year, we would identify small practices based on 12 months of data starting from September 1, 2016 to August 31, 2017. We would not change an eligibility determination regarding the size of a small practice once the determination is made for a given performance period and MIPS payment year. We recognize that there may be circumstances in which the small practice size determinations made by CMS do not reflect the real-time size of such practices. We considered two options that could address such potential discrepancies. One option would include an expansion of the proposed small practice size determination period to 24 months with two 12-month segments of data analysis (before and during the performance period), in which CMS would conduct a second analysis of claims data during the performance period. Such an expanded determination period may better capture the real-time size of small practices, but determinations made during the performance period prevent our system from being able to account for the assessment and scoring of the improvement activities performance category and identification of small practices eligible for technical assistance prior to the performance period. Specifically, our system needs to capture small practice determinations in advance of the performance period in order for the system to reflect the applicable requirements for the improvement activities performance category and when a small practice bonus would be applied. A second option would include an attestation component, in which a small practice that was not identified as a small practice during the proposed small practice size determination period would be able to attest to the size of their group practice prior to the performance period. However, this second option would require us to develop several operational improvements, such as a manual process or system that would provide an attestation mechanism for small practices, and a verification process to ensure that only small practices are identified as eligible for technical assistance. Since individual MIPS eligible clinicians and groups are not required to register to participate in MIPS (except for groups utilizing the CMS Web Interface for the Quality Payment Program or administering the CAHPS for MIPS survey), requiring small practices to attest to the size of their group practice prior to the performance period could increase burden on individual MIPS eligible clinicians and groups that are not already utilizing the CMS Web Interface for the Quality Payment Program or administering the CAHPS for MIPS survey. We solicit public comment on the proposal regarding how CMS would determine small practice size.

d. Rural Area and Health Professional Shortage Area Practices
