FEDERAL REGISTER

Vol. 82 Friday,

No. 221 November 17, 2017

Book 1 of 2 Books

Pages 54289–54470

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 82, No. 221

Friday, November 17, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 1271

[Docket No. FDA–2014–D–1584]

Same Surgical Procedure Exception: Questions and Answers Regarding the Scope of the Exception; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a document entitled ''Same Surgical Procedure Exception under 21 CFR 1271.15(b): Questions and Answers Regarding the Scope of the Exception.'' The guidance document provides tissue establishments and health care professionals with FDA's current thinking on the scope of an exception set forth in the human cells, tissues, and cellular and tissue-based products (HCT/Ps) regulations.

DATES: The announcement of the guidance is published in the **Federal Register** on November 17, 2017.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2014–D–1584 for ''Same Surgical Procedure Exception under 21 CFR 1271.15(b): Questions and Answers Regarding the Scope of the Exception.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Lori J. Churchyard, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a document entitled ''Same Surgical

Procedure Exception under 21 CFR 1271.15(b): Questions and Answers Regarding the Scope of the Exception.'' The guidance provides tissue establishments and health care professionals with FDA's current thinking on the scope of the exception set forth in part 1271 (21 CFR part 1271), specifically the exception set forth in § 1271.15(b) (21 CFR 1271.15(b)). This guidance does not address the other exceptions in § 1271.15. The guidance, presented in question and answer format, provides FDA's current interpretation of this regulation and includes examples based on inquiries received by the Agency since the final rule entitled ''Human Cells, Tissues, and Cellular and Tissue-Based Products; Establishment Registration and Listing'' published in the **Federal Register** of January 19, 2001 (66 FR 5447).

In the **Federal Register** of October 23, 2014 (79 FR 63348), FDA announced the availability of the draft guidance of the same title. Additionally, in the **Federal Register** of December 24, 2014 (79 FR 77414), FDA announced the availability of the draft guidance entitled ''Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/Ps) from Adipose Tissue: Regulatory Considerations; Draft Guidance for Industry'' dated December 2014 (Adipose Draft Guidance).

In the **Federal Register** of October 30, 2015, FDA reopened the comment period for three HCT/P-related draft guidances (80 FR 66847, 66849, and 66844, respectively) and announced the availability of another HCT/P-related draft guidance (80 FR 66850). Comments on the four HCT/P-related guidances were requested by April 29, 2016. Lastly, in the **Federal Register** of October 30, 2015 (80 FR 66845), FDA announced a 1-day part 15 (21 CFR part 15) public hearing to obtain input on the four HCT/P-related guidances to be held on April 13, 2016.

Due to considerable interest in the public hearing and to give stakeholders additional time to provide comments to the Agency, on February 29, 2016, FDA announced that the hearing was postponed. In the **Federal Register** of April 22, 2016 (81 FR 23661 and 81 FR 23664, respectively), FDA announced the rescheduled part 15 hearing date of September 12 and 13, 2016, and an extension of the comment period from April 29, 2016, until September 27, 2016, on the four HCT/P-related guidances. Also in the **Federal Register** of April 22, 2016 (81 FR 23708), FDA announced a public workshop to be held on September 8, 2016, on the ''Scientific Evidence in Development of HCT/Ps Subject to Premarket Approval.''

FDA received numerous comments on the draft guidance and the Adipose Draft Guidance in response to the request for comments, and those comments were considered in developing the final guidance. The guidance announced in this notification finalizes the draft guidance of the same title dated October 2014. This guidance also finalizes certain material related to adipose tissue that was included in the Adipose Draft Guidance.

The material in this guidance related to adipose tissue, together with the material in the final guidance entitled ''Regulatory Considerations for Human Cell, Tissues, and Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use; Guidance for Industry and Food and Drug Administration Staff'' dated November 2017 (Minimal Manipulation and Homologous Use Guidance) related to adipose tissue, supersedes the Adipose Draft Guidance. Accordingly, FDA does not intend to finalize the Adipose Draft Guidance, which is now withdrawn.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of the Minimal Manipulation and Homologous Use Guidance.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Same Surgical Procedure Exception under 21 CFR 1271.15(b): Questions and Answers Regarding the Scope of the Exception.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. Paperwork Reduction Act of 1995

The guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 1271 have been approved under OMB control number 0910–0543.

III. Electronic Access

Persons with access to the internet may obtain the guidance at either *https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: November 13, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

[FR Doc. 2017–24839 Filed 11–16–17; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 1271

[Docket No. FDA–2017–D–6146]

Regulatory Considerations for Human Cells, Tissues, and Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a document entitled ''Regulatory Considerations for Human Cells, Tissues, and Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use; Guidance for Industry and Food and Drug Administration Staff.'' The guidance provides human cells, tissues, and cellular and tissue-based product (HCT/P) manufacturers, healthcare providers, and FDA staff, with FDA's current thinking on the regulatory criteria of minimal manipulation and homologous use. The guidance is intended to improve stakeholders' understanding of the definitions of minimal manipulation and homologous use and how the regulatory criteria apply to their HCT/Ps. It also informs manufacturers, healthcare providers, and other interested persons that the Agency generally intends to exercise enforcement discretion over the next 36 months under limited conditions, with respect to the investigational new drug (IND) application and premarket approval (biologics license application (BLA)) requirements, for certain HCT/Ps.

DATES: The announcement of the guidance is published in the **Federal Register** on November 17, 2017.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov*. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov*.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–D–6146 for ''Regulatory Considerations for Human Cells, Tissues, and Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use; Guidance for Industry and Food and Drug Administration Staff.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov*. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002; or to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health (CDRH), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002; or you may send an email request to the Office of Combination Products (OCP) at *combination@fda.gov*. If you are submitting a written request, send one self-addressed adhesive label to assist that office in processing your request. The guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Lori J. Churchyard, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911; or Angela Krueger, Office of Device Evaluation, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1676, Silver Spring, MD 20993–0002, 301–796–6380; or Leigh Hayes, Office of Combination Products, Office of the Commissioner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5129, Silver Spring, MD 20993–0002, 301–796–8938.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a document entitled ''Regulatory Considerations for Human Cells, Tissues, Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use; Guidance for Industry and Food and Drug Administration Staff.'' The guidance provides HCT/P manufacturers, healthcare providers, and FDA staff, with our current thinking on the criteria under part 1271 (21 CFR part 1271), specifically the § 1271.10(a)(1) (21 CFR 1271.10(a)(1)) criterion of minimal manipulation and the § 1271.10(a)(2) criterion of homologous use. The interpretation of the minimal manipulation and homologous use criteria and definitions of related key terms have been of considerable interest to industry stakeholders since the criteria and definitions were first proposed.[1] The guidance document is intended to improve stakeholders' understanding of the definitions of minimal manipulation in § 1271.3(f) and homologous use in § 1271.3(c). It will also facilitate stakeholders' understanding of how the regulatory criteria in § 1271.10(a)(1) and (2) apply to their HCT/Ps. The guidance document explains the regulatory scope of the regulations, as well as the Agency's compliance policy regarding certain regulatory requirements relating to HCT/Ps. In addition, the guidance document informs manufacturers, health care providers, and other interested persons that over the next 36 months, we intend to exercise enforcement discretion under limited

[1] ''Establishment Registration and Listing for Manufacturers of Human Cellular and Tissue-Based Products'' 63 FR 26744 at 26748–49 (May 14, 1998) *https://www.gpo.gov/fdsys/pkg/FR-1998-05-14/pdf/98-12751.pdf*.

conditions with respect to the IND application or premarket approval (BLA) requirements, for certain HCT/Ps.

In the **Federal Register** of December 23, 2014 (79 FR 77012), FDA announced the availability of the draft guidance entitled ''Minimal Manipulation of Human Cells, Tissues, and Cellular and Tissue-Based Products; Draft Guidance for Industry and Food and Drug Administration Staff'' dated December 2014 (Minimal Manipulation Draft Guidance), and in the **Federal Register** of December 24, 2014 (79 FR 77414), FDA announced the availability of draft guidance entitled ''Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/Ps) from Adipose Tissue: Regulatory Considerations; Draft Guidance for Industry'' dated December 2014 (Adipose Draft Guidance). Additionally, in the **Federal Register** of October 30, 2015 (80 FR 66850), FDA announced the availability of the draft guidance entitled ''Homologous Use of Human Cells, Tissues, and Cellular and Tissue-Based Products; Draft Guidance for Industry and FDA Staff'' dated October 2015 (Homologous Use Draft Guidance).

Also in the **Federal Register** of October 30, 2015, FDA reopened the comment period on the Minimal Manipulation Draft Guidance (80 FR 66844), Adipose Draft Guidance (80 FR 66849), and a third HCT/P-related guidance addressing the same surgical procedure exception in § 1271.15(b) (80 FR 66847) (Same Surgical Procedure Exception Draft Guidance). Comments on these three HCT/P-related guidances, as well as the Homologous Use Draft Guidance, were requested by April 29, 2016. Lastly, the **Federal Register** of October 30, 2015 (80 FR 66845), FDA announced a 1-day part 15 (21 CFR part 15) public hearing to obtain input on the four HCT/P-related guidances to be held on April 13, 2016.

Due to considerable interest in the public hearing and to give stakeholders additional time to provide comments to the Agency, on February 29, 2016, FDA announced that the hearing was postponed. In the **Federal Register** of April 22, 2016 (81 FR 23661 and 81 FR 23664, respectively), FDA announced the rescheduled part 15 hearing date of September 12 and 13, 2016, and an extension of the comment period from April 29, 2016, until September 27, 2016, on the four HCT/P-related guidances. Also in the **Federal Register** of April 22, 2016 (81 FR 23708), FDA announced a public workshop on the ''Scientific Evidence in Development of HCT/Ps Subject to Premarket Approval.''

FDA received numerous comments on the Minimal Manipulation Draft Guidance, Homologous Use Draft Guidance, and the Adipose Draft Guidance in response to the request for comments, and those comments were considered in developing the final guidance in this notification.

The guidance document announced in this notification finalizes the Minimal Manipulation Draft Guidance and the Homologous Use Draft Guidance. The guidance document also finalizes certain material related to adipose tissue that was included in the Adipose Draft Guidance. The material in this guidance document related to adipose tissue, together with the material related to adipose tissue included in the guidance finalizing the Same Surgical Procedure Exception Draft Guidance, the availability of which is announced elsewhere in this issue of the **Federal Register**, supersedes the Adipose Draft Guidance. Accordingly, FDA does not intend to finalize the Adipose Tissue Guidance, which is now withdrawn. Finally, this guidance supersedes the guidance entitled ''Minimal Manipulation of Structural Tissue (Jurisdictional Update) Guidance for Industry and FDA Staff'' dated September 2006.

FDA is also announcing via this **Federal Register** notification that, with the publication of this guidance document, it will cease posting the Tissue Reference Group (TRG) annual reports on FDA's Web site. The TRG was created as specified in the ''Proposed Approach to the Regulation of Cellular and Tissue-Based Products'' dated February 28, 1997 (March 4, 1997; 62 FR 9721). The purpose of the TRG is to provide a single reference point for product specific questions received by FDA (either through the Centers, or from the Office of Combination Products) concerning jurisdiction and applicable regulation of HCT/Ps.

In 1998, the TRG began publishing its recommendations in an annual report that was posted on FDA's Web site. Originally intended to assist industry in understanding the scientific rationale for the TRG recommendations, the recommendations are stated in general terms in order to protect proprietary information. As a result, FDA has received feedback from stakeholders that the annual reports do not provide helpful information. Therefore, we are announcing that although the TRG will continue to provide recommendations, the TRG annual reports will no longer be posted on FDA's Web site. We note that this final guidance is intended to help clarify the minimal manipulation and homologous use criteria in § 1271.10(a)(1) and (2), and thus addresses many of the questions that had been posed to the TRG.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Regulatory Considerations for Human Cells, Tissues, and Cellular and Tissue-Based Products: Minimal Manipulation and Homologous Use.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. Paperwork Reduction Act of 1995

The guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 1271 have been approved under OMB control number 0910–0543.

III. Electronic Access

Persons with access to the internet may obtain the guidance at either *https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm;* or *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm;* or *https://www.fda.gov/CombinationProducts/GuidanceRegulatoryInformation/default.htm;* or *https://www.regulations.gov.*

Dated: November 13, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164–01–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 943

[SATS No. TX–067–FOR; Docket ID: OSM–2016–0001; S1D1S SS08011000 SX064A000 189S180110; S2D2S SS08011000 SX064A000 18XS501520]

Texas Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: We, the Office of Surface Mining Reclamation and Enforcement (OSMRE), are approving an amendment to the Texas regulatory program (Texas program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). Texas proposed revisions to its regulations regarding annual permit fees. Texas revised its program at its own initiative to raise revenues sufficient to cover its anticipated share of costs to administer the coal regulatory program and to encourage mining companies to more quickly reclaim lands and request bond release, thereby fulfilling SMCRA's purpose of assuring the reclamation of mined land as quickly as possible.

DATES: The effective date is December 18, 2017.

FOR FURTHER INFORMATION CONTACT: William L. Joseph, Director, Tulsa Field Office. Telephone: (918) 581–6430. Email: *bjoseph@osmre.gov.*

SUPPLEMENTARY INFORMATION:

I. Background on the Texas Program
II. Submission of the Amendment
III. OSMRE's Findings
IV. Summary and Disposition of Comments
V. OSMRE's Decision
VI. Procedural Determinations

I. Background on the Texas Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, State laws and regulations that govern surface coal mining and reclamation operations in accordance with the Act and consistent with the Federal regulations. See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Texas program, effective February 16, 1980. You can find background information on the Texas program, including the Secretary's findings, the disposition of comments, and the conditions of approval, in the February 27, 1980, **Federal Register** (45 FR 12998, 13008). You can find later actions on the Texas program at 30 CFR 943.10, 943.15, and 943.16.

II. Submission of the Amendment

By letter dated November 17, 2015 (Administrative Record No. TX–705), and on its own initiative, Texas sent us an amendment to its program under SMCRA (30 U.S.C. 1201 *et seq.*). We announced receipt of the proposed amendment in the April 08, 2016, **Federal Register** (81 FR 20591). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the adequacy of the amendment. We did not hold a public hearing or meeting because no one requested one. The public comment period ended on May 09, 2016. We did not receive any public comments.

III. OSMRE's Findings

The following are the findings we made concerning the amendment under SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17. We are approving the amendment as described below.

16 Texas Administrative Code (TAC) Section 12.108 Permit Fees

Texas proposed to revise its regulations at 16 TAC Sections 12.108(b)(1)–(3), adjusting the annual coal mining permit fees for calendar years 2015 and 2016. Fees for mining activities during calendar years 2015 and 2016 were to be paid by coal mine operations by March 15th of the year following the calendar year for which the fees are applicable.

By this amendment, Texas has:

(1) Repealed paragraph (b)(1) regarding a fee for each acre of land within the permit area on which coal or lignite was actually removed during the calendar year;

(2) Renumbered existing paragraphs (b)(2) and (3) to read as (b)(1) and (2) respectively;

(3) Increased the fee in the new paragraph (b)(1) from $12.00 to $13.05 for each acre of land within a permit area covered by a reclamation bond on December 31st of the year; and

(4) Increased the fee in the new paragraph (b)(2) from $6,540.00 to $6,600.00 for each permit in effect on December 31st of the year.

The Federal regulations at 30 CFR 777.17 provide that applications for surface coal mining permits must be accompanied by a fee determined by the regulatory authority. The Federal regulations also provide that the fees may be less than, but not more than, the actual or anticipated cost of reviewing, administering, and enforcing the permit.

Texas' amendment describes how its coal mining regulatory program is funded. Texas operates on a biennial budget which appropriates general revenue funds for permitting and inspecting coal mining facilities within the state. This appropriation is contingent on the Railroad Commission of Texas (Commission) assessing fees sufficient to generate revenue to recover the general revenue appropriation. When calculating anticipated costs to the Commission for regulating coal mining activity, Texas anticipates OSMRE providing some grant funding for regulatory program costs based on Section 705(a) of SMCRA. Texas estimated that annual fees at the revised amounts in this amendment would result in revenue that, when coupled with permit application fees, was not expected to provide for more than 50 percent of the anticipated regulatory program costs during each year of the biennium. OSMRE agrees that this is a reasonable expectation in light of recent reductions in overall funding to states that have resulted in them receiving less than fifty percent of their anticipated regulatory program costs.

Texas adjusts its fees biennially to recover the amounts expended from state appropriations in accordance with a formula and schedule agreed to in 2005 by the coal mining industry and the Commission. This amendment represents the sixth adjustment to surface mining fees based upon that agreement.

We find that Texas' fee changes are consistent with the discretionary authority provided by the Federal regulation at 30 CFR 777.17. Therefore, OSMRE approves Texas' permit fee changes, recognizing that Texas has a process to adjust its fees to cover the cost of its regulatory program not covered by the Federal grant.

IV. Summary and Disposition of Comments

Public Comments

We asked for public comments on the amendment but did not receive any.

Federal Agency Comments

On February 11, 2016, pursuant to 30 CFR 732.17(h)(11)(i) and Section 503(b) of SMCRA, we requested comments on the amendment from various Federal agencies with an actual or potential interest in the Texas program (Administrative Record No. TX–705.01). We did not receive any comments.

Environmental Protection Agency (EPA) Concurrence and Comment

Under 30 CFR 732.17(h)(11)(ii), we are required to get written concurrence from EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). None of the revisions that Texas proposed to make in this amendment pertain to air or water quality standards. Therefore, we did not ask EPA to concur on the amendment. However, on February 11,

2016, under 30 CFR 732.17(h)(11)(i), we requested comments from the EPA on the amendment (Administrative Record No. TX–705.1). The EPA did not respond to our request.

State Historical Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Under 30 CFR 732.17(h)(4), we are required to request comments from the SHPO and ACHP on amendments that may have an effect on historic properties. On February 11, 2016, we requested comments on Texas' amendment (Administrative Record No. TX–705.01), but neither the SHPO nor ACHP responded to our request.

V. OSMRE's Decision

Based on the above findings, we approve the amendment Texas submitted to the OSMRE on November 17, 2015 (Administrative Record No. TX–705).

To implement this decision, we are amending the Federal regulations at 30 CFR part 943 that codify decisions concerning the Texas program. In accordance with the Administrative Procedure Act, this rule will take effect 30 days after the date of publication. Section 503(a) of SMCRA requires that the State's program demonstrate that they have the capability of carrying out the provisions of the Act and meeting its purposes. SMCRA requires consistency of State and Federal standards.

VI. Procedural Determinations

Executive Order 12630—Takings

This rulemaking does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulation.

Executive Order 12866—Regulatory Planning and Review

This rulemaking is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866.

Executive Order 12988—Civil Justice Reform

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 and has determined that this rulemaking meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments because each program is drafted and promulgated by a specific State, not by OSMRE. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR parts 730, 731, and 732 have been met.

Executive Order 13132—Federalism

This rulemaking does not have Federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to ''establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations.'' Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be ''in accordance with'' the requirements of SMCRA, and section 503(a)(7) requires that State programs contain rules and regulations ''consistent with'' regulations issued by the Secretary pursuant to SMCRA.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

In accordance with Executive Order 13175, we have evaluated the potential effects of this rulemaking on Federally-recognized Indian tribes and have determined that the rulemaking does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. The basis for this determination is that our decision is on a State regulatory program and does not involve Federal regulations involving Indian lands.

Executive Order 13211—Regulations That Significantly Affect the Supply, Distribution, or Use of Energy

Executive Order 13211 of May 18, 2001, requires agencies to prepare a Statement of Energy Effects for a rulemaking that is (1) considered significant under Executive Order 12866, and (2) likely to have a significant adverse effect on the supply, distribution, or use of energy. Because this rulemaking is exempt from review under Executive Order 12866 and is not expected to have a significant adverse effect on the supply, distribution, or use of energy, a Statement of Energy Effects is not required.

National Environmental Policy Act

This rulemaking does not require an environmental impact statement because section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rulemaking does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal, which is the subject of this rulemaking, is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In making the determination as to whether this rulemaking would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Small Business Regulatory Enforcement Fairness Act

This rulemaking is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rulemaking: (a) Does not have an annual effect on the economy of $100 million; (b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and (c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This determination is based upon the fact that the State submittal, which is the subject of this rulemaking, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rulemaking will not impose an unfunded mandate on State, local, or tribal governments or the private sector of $100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rulemaking, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

List of Subjects in 30 CFR Part 943

Intergovernmental relations, Surface mining, Underground Mining.

Dated: October 31, 2017.

Alfred L. Clayborne,

Regional Director, Mid-Continent Region.

For the reasons set out in the preamble, 30 CFR part 943 is amended as set forth below:

PART 943—TEXAS

■ 1. The authority citation for Part 943 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

■ 2. In § 943.15, the table is amended by adding a new entry in chronological order to read as follows:

§ 943.15 Approval of Texas regulatory program amendments.

* * * * *

BILLING CODE 4310–05–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AQ11

VA Vocational Rehabilitation and Employment Nomenclature Change for Position Title—Revision

AGENCY: Department of Veterans Affairs.

ACTION: Interim final rule.

SUMMARY: The Department of Veterans Affairs (VA) published a final rule in the **Federal Register** on May 2, 2016, which amended a number of regulations in the Code of Federal Regulations (CFR) to authorize personnel hired by VA's Vocational Rehabilitation and Employment (VR&E) Service under the title ''Vocational Rehabilitation Counselor'' (VRC) to make the same determinations with respect to Chapter 31 services and benefits as personnel who had been hired under the title ''Counseling Psychologist'' (CP). The preamble to that final rule cited supporting documents inaccurately and failed to properly explain the qualifications for and duties of this VR&E position responsible for making determinations with respect to Chapter 31 services and benefits. This interim final rule corrects those inaccuracies, more clearly explains the basis for the final rule, and invites public comment on the changes made to VA's regulations in the May 2, 2016, final rule.

DATES: *Effective Date:* This interim final rule is effective November 17, 2017. VA must receive comments on or before December 18, 2017.

ADDRESSES: Submit written comments through *http://www.Regulations.gov;* by mail or hand-delivery to: Director, Regulations Management (00REG), Department of Veterans Affairs, 810 Vermont Ave. NW., Room 1063B, Washington, DC 20420; or by fax to (202) 273–9026. (This is not a toll-free telephone number.) Comments should indicate that they pertain to ''RIN 2900–AQ11, VA Vocational Rehabilitation and Employment Nomenclature Change for Position Title—Revision.'' Copies of comments received will be available for public inspection in the Office of Regulation Policy and Management, Room 1063B, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays). Please call (202) 461–4902 for an appointment. (This is not a toll-free telephone number.) In addition, comments may be viewed online through the Federal Docket Management System (FDMS) at *http://www.Regulations.gov*.

FOR FURTHER INFORMATION CONTACT: C.J. Riley, Senior Policy Analyst, Vocational Rehabilitation and Employment Service (28), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, *Christi.Hellard@va.gov,* (202) 461–9600. (This is not a toll-free telephone number.)

SUPPLEMENTARY INFORMATION: In a final rule published in the **Federal Register** on May 2, 2016, at 81 FR 26130, VA amended a number of regulations in Part 21, CFR, to add the title ''VRC'' for the position responsible for making certain determinations with respect to Chapter 31 services and benefits. In the preamble to the final rule, we stated that the revisions were non-substantive and intended to reflect the fact that the CP and VRC position titles are synonymous because the positions have the same job duties and qualifications. We also stated that the final rule was necessary to ensure consistency. The preamble referenced a performance plan that was purportedly implemented on December 16, 2003, that described how the job duties of and qualifications for a CP and VRC were the same. However, the performance plan was implemented on July 1, 2004, rather than on December 16, 2003, and does not provide that the two positions have the same qualifications. Nonetheless, VRCs are fully qualified to perform the duties specified in Chapter 31 regulations. Therefore, because reversing the changes published in the **Federal Register** on May 2, 2016, would be harmful to Veterans seeking vocational rehabilitation services for reasons discussed below, we are not reversing those changes at this time. However, VA is seeking public comment on those changes, as further explained in this document. The explanation that follows corrects the inaccuracies in the preamble to the final rule and more clearly explains the basis for the rule.

VA's VR&E program serves an important function: To assist Veterans who have service-connected disabilities and barriers to employment in obtaining and maintaining suitable employment and achieving maximum independence in daily living. In 1996, VA began to allow use of Office of Personnel Management (OPM) classification series GS–0101, Social Science, to hire personnel under the title ''VRC'' to provide rehabilitation services. Such services include, but are not limited to, deciding eligibility and entitlement, developing rehabilitation plans, and delivering case management services. VA's VR&E program had previously hired personnel under the title ''CP,'' OPM classification series GS–0180, Psychology, to provide these types of rehabilitation services. Since 1996, after

use of the GS–0101 series was allowed, the VR&E program had hired personnel under either series to provide the same types of rehabilitation services and perform the same work. In 2015, VA's Office of Human Resources and Administration concluded that use of the GS–0180 series was not as appropriate as use of the GS–0101 series for personnel whom VA hires to provide rehabilitation services, because the majority of the duties these VR&E personnel perform most closely meets the standards associated with the GS–0101 series. Accordingly, VA discontinued use of the GS–0180 series for these VR&E positions. Although the VR&E program began to fill vacant positions using the GS–0101 series under the ''VRC'' title, the personnel who had been hired using GS–0180 series under the ''CP'' title kept their title and continued to perform under their existing position descriptions.

VR&E Service had updated a few, but not all, regulations governing the delivery of Chapter 31 services and benefits to reflect the hiring of personnel under the title ''VRC'' for the position responsible for making certain determinations. Specifically, on April 11, 1997 (62 FR 17706), VA issued a final rule defining VRC in 38 CFR 21.35. On March 26, 2007 (72 FR 14041), VA issued a final rule revising 38 CFR 21.50, 21.51, and 21.52 to describe determinations that a VRC may make during an initial evaluation, including the existence of an employment handicap and a serious employment handicap. On January 20, 2010 (75 FR 3165), VA issued a final rule revising 38 CFR 21.42, 21.44, and 21.45 to specify determinations that a VRC may make regarding a claimant's eligibility period to receive Chapter 31 services.

In September 2014, a Veteran advocate contacted VR&E Service and indicated that he believed that VA had erroneously denied benefits because VA improperly interpreted regulations regarding the roles of CPs and VRCs when making specific determinations. Additionally, the Board of Veterans' Appeals has remanded cases to regional offices with instructions for a CP to make determinations that a VRC already made, noting that regulations require CPs to make these determinations. Because the VR&E program stopped hiring under the ''CP'' title, the VR&E program's national workforce does not have enough CPs to comply with these instructions. Thus, on May 2, 2016, we amended the remainder of our regulations regarding the roles of CPs and VRCs to ensure consistency with respect to position titles and to clarify that VRCs are authorized to make the same determinations as CPs with regard to Chapter 31 services and benefits.

The shift towards staffing the VR&E positions responsible for making certain determinations with respect to Chapter 31 services and benefits under the VRC title rather than under the CP title reflects a more appropriate classification based on OPM standards and the type of work performed. This shift does not reflect a material change in the duties of or qualifications for the position. Regardless of the classification, VRCs perform the same duties as CPs perform in the VR&E program, and VRCs are fully qualified to perform these duties.

Section 3118(c) of title 38, United States Code, requires VA to establish the necessary and appropriate qualifications for personnel providing evaluation and rehabilitation services under Chapter 31, and to take into account the qualifications established for comparable personnel under the Rehabilitation Act of 1973 (29 U.S.C. Chapter 16). Under this Act, comparable personnel are required to have a baccalaureate degree in a field of study reasonably related to vocational rehabilitation and at least one year of experience working with individuals with disabilities, providing direct service or advocacy, or having direct experience as an employer. In lieu of the experience, personnel may obtain a master's or doctoral degree in a field of study such as vocational rehabilitation counseling, law, social work, psychology, disability studies, or special education. *See* 29 U.S.C. 721(a)(7)(B)(ii).

VA implemented section 3118(c) by prescribing the qualifications for VRCs in VA's Staffing Handbook (VA Handbook 5005/6, Part II, Appendix F2 (June 3, 2004)). The VR&E program requires all personnel hired as VRCs to hold a master's degree in rehabilitation counseling, including an internship, or in counseling psychology, or a related field, including at least 30 semester hours of course work in the foundations of rehabilitation counseling, human growth and development, counseling theories and techniques, vocational assessment, career development, job placement, case management, or medical/psycho-social aspects of disability. In addition, total graduate study must have included or been supplemented by a supervised internship or successful professional experience following the completion of the master's degree. These requirements are comparable to the requirements applicable to CP positions but are more accurately aligned with the needs of the VR&E program, which is focused on helping Veterans obtain and maintain suitable employment. See the OPM Web site describing general qualifications for CP classification, *https://www.opm.gov/policy-data-oversight/classification-qualifications/general-schedule-qualification-standards/0100/psychology-series-0180/* (last visited August 10, 2017). Requiring VRCs to have these qualifications puts them in a similar position to CPs, who are required to have comparable qualifications. With comparable qualifications and experience in the closely related fields of counseling psychology and/or rehabilitation counseling, both VRCs and CPs have the same skills and capabilities necessary to perform the duties required for this program, such as counseling, rehabilitation, and employment assistance.

Additionally, as indicated in the most recent VRC position description released with VR&E Letter 28–14–13 on February 20, 2014, VRCs must possess knowledge of psychological, rehabilitation, and counseling theory and principle, as well as special knowledge of rehabilitation counseling skills, techniques, and resources needed to work with Veterans with multiple serious disabilities, Veterans who are largely confined to their homes due to disabilities, Veterans who have serious mental disabilities, and Veterans who have problems adjusting to social and occupational demands. VRCs must also have knowledge of the principles and procedures of psychological and vocational testing and research statistics used to assess a Veteran's interests, aptitudes, abilities, and personality characteristics. In addition, VRCs must know the requirements for independent living, and understand the limitations of, and services required by, individuals with severe disabilities. Finally, VRCs must know career development theory and job placement, and understand current labor market conditions and occupational trends and how to improve employability using the information obtained from transferable work-skills analyses.

Staffing the program with VRCs is a valid programmatic choice because, equipped with such knowledge, VRCs can capably and competently perform the required counseling, rehabilitation, and employment assistance tasks. For example, VRCs have knowledge of psychological, rehabilitation, and counseling theory and principle, and possess rehabilitation counseling skills and techniques to work with emotionally and physically-disabled individuals and prepare them for suitable employment. They understand the requirements for independent living and the services individuals with severe

disabilities require, and they possess the skills and qualifications to effectively perform initial evaluations and make accurate eligibility determinations. Additionally, they know the principles and procedures of psychological and vocational testing and research statistics to competently assess a Veteran's interests, aptitudes, abilities, and personality characteristics to provide the most appropriate rehabilitation planning services. Finally, they have a comprehensive understanding of current labor market conditions and occupational trends to identify the appropriate employment options for each individual they counsel. Requiring VRCs to have such knowledge ensures that VRCs have the capability to assist Veterans with service-connected disabilities in achieving maximum independence in daily living and obtaining and maintaining suitable employment.

Because VRCs are fully qualified to perform the duties of this VR&E position, and because the VR&E program's national workforce does not have enough CPs to fulfill all the required duties of this position, we amended our regulations to authorize VRCs to make the same determinations as CPs with regard to Chapter 31 services and benefits. Accordingly, we adopt, without change, the rule published in the **Federal Register** on May 2, 2016.

Administrative Procedure Act

In accordance with 5 U.S.C. 553(b)(B) and (d)(3), the Secretary finds that there is good cause to dispense with the opportunity for prior notice and comment and good cause to publish this rule with an immediate effective date. The Secretary finds that it is impracticable and contrary to the public interest to delay this rule for the purpose of soliciting prior public comment or to have a delayed effective date, or to reverse the changes made on May 2, 2016, while public comment is being received. The Secretary is issuing this rule to clear up confusion among Veterans and prevent a detrimental impact with regard to the VR&E program. Failure to incorporate the VRC position title in VR&E regulations would result ultimately in a long delay in the processing of Veterans' cases and the provision of VR&E services and assistance.

The VR&E program no longer hires employees under the CP title. This is the unavoidable result of the conclusion that the GS–0101 classification series is more appropriate than the GS–0180 classification series. Accordingly, the overwhelming majority of the VR&E program's national workforce providing vocational rehabilitation and employment services are VRCs, with only 10 CPs remaining in the VR&E workforce. Therefore, the program does not have enough CPs to meet workload demands. If we did not maintain the May 2, 2016, changes to our regulations while public comment is being received, and CPs were required to make decisions in every VR&E case as part of the rehabilitation process, many decisions would be delayed and processing Veteran cases would be greatly impacted. As a result, there would be a significant delay in Veterans receiving the VR&E services and assistance to which they are entitled.

The VR&E program provided evaluation and counseling services to 173,599 Veterans in 2016. Although some regulations had already been updated to allow VRCs to perform some VR&E program duties, the regulations governing the majority of evaluation, counseling, and case management services were updated to allow VRCs to provide these services in the May 2, 2016, rulemaking. If we did not maintain the May 2, 2016, changes to our regulations, most of the 173,599 Veterans the VR&E program serves annually would not receive evaluation, counseling, and case management services in a timely manner because the 10 CPs the VR&E program employs could not possibly provide these services to so many Veterans. It would not be in the best interest of veterans to limit hundreds of VRCs to highly circumscribed duties while thousands of Veterans seeking employment services from VA wait for service from the 10 CPs VA still has in its workforce.

Additionally, the rule clears up confusion among VR&E program participants regarding the two positions titles, VRC and CP, and the respective roles of the two positions within the VR&E program. Because of this confusion, it was necessary to update the VR&E regulations to specify that these two positions are both authorized to perform the same duties.

Because this interim final rule will serve to clarify roles with regard to two position titles used within the VR&E program, and alleviate confusion related to the titles, and because it will serve to prevent delay in Veterans receiving the VR&E services and assistance to which they are entitled, the Secretary finds that it is impracticable and contrary to the public interest to delay this rule for the purpose of soliciting advance public comment or to have a delayed effective date. Accordingly, VA is issuing this rule as an interim final rule with an immediate effective date. We will consider and address any comments received within 60 days of the date this interim final rule is published in the **Federal Register**.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a "significant regulatory action" requiring review by the OMB, unless OMB waives such review, as "any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order."

VA has examined the economic, interagency, budgetary, legal, and policy implications of this regulatory action and determined they are not significant under Executive Order 12866. VA's impact analysis can be found as a supporting document at *http://www.regulations.gov,* usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA's Web site at *http://www.va.gov/orpm* by following the link for "VA Regulations Published From FY 2004 Through Fiscal Year To Date."

Paperwork Reduction Act

This rule contains no collections of information under the Paperwork Reduction Act (44 U.S.C. 3501–3521).

Regulatory Flexibility Act

The Secretary hereby certifies that this interim final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This rule will not directly affect any small entities; only individuals will be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this rule is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. This interim final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance number and title for the program affected by this document is 64.116, Vocational Rehabilitation for Disabled Veterans.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on October 23, 2017 for publication.

[EPA–R03–OAR–2017–0149; FRL–9970–82–Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Maryland; 2011 Base Year Inventory for the 2008 8-Hour Ozone National Ambient Air Quality Standard for the Maryland Portion of the Philadelphia-Wilmington-Atlantic City Nonattainment Area; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to the receipt of an adverse comment, the Environmental Protection Agency (EPA) is withdrawing the September 25, 2017 direct final rule that approved the 2011 base year inventory for the Maryland portion of the Philadelphia-Wilmington-Atlantic City marginal nonattainment area for the 2008 8-hour ozone national ambient air quality standard (NAAQS). EPA stated in the direct final rule that if EPA received adverse comments by October 25, 2017, the rule would be withdrawn and not take effect. EPA subsequently received an adverse comment. EPA will address the comment received in a subsequent final action based upon the proposed action also published on September 25, 2017. EPA will not institute a second comment period on this action.

DATES: As of as of November 17, 2017, the direct final rule published at 82 FR 44522 on September 25, 2017 is withdrawn.

FOR FURTHER INFORMATION CONTACT: Sara Calcinore, (215) 814–2043, or by email at *calcinore.sara@epa.gov*.

SUPPLEMENTARY INFORMATION: On May 21, 2012, the Philadelphia-Wilmington-Atlantic City area was designated as marginal nonattainment for the 2008 8-hour ozone NAAQS. 77 FR 30088. The Philadelphia-Wilmington-Atlantic City nonattainment area is comprised of Cecil County in Maryland, as well as counties in Delaware, New Jersey, and Pennsylvania. Under section 172(c)(3) of the Clean Air Act (CAA), Maryland is required to submit a comprehensive, accurate, and current inventory of actual emissions from all sources of the relevant pollutants, *i.e.* the ozone precursors nitrogen oxides (NO_X) and volatile organic compounds (VOCs), in its marginal nonattainment area, *i.e.,* the Maryland portion of the Philadelphia-Wilmington-Atlantic City nonattainment area. On January 19, 2017, the State of Maryland, through the Maryland Department of the Environment (MDE), submitted a formal revision (state implementation plan (SIP) # 16–15) to its SIP. The SIP revision consists of the 2011 base year inventory for the Maryland portion of the Philadelphia-Wilmington-Atlantic City nonattainment area for the 2008 8-hour ozone NAAQS.

EPA approved Maryland's 2011 base year inventory for the Maryland portion of the Philadelphia-Wilmington-Atlantic City nonattainment area for the 2008 8-hour ozone NAAQS in the direct final rule published on September 25, 2017 (82 FR 44522). In this direct final rule, we stated that if we received adverse comment by October 25, 2017, the rule would be withdrawn and not take effect. EPA subsequently received an adverse comment. On September 25, 2017 (82 FR 44522), EPA simultaneously proposed to approve Maryland's 2011 base year inventory for the Maryland portion of the Philadelphia-Wilmington-Atlantic City nonattainment area for the 2008 8-hour ozone NAAQS. EPA will address the comment received in a subsequent final action based upon this proposed action and will not institute a second comment period on this action.

As a result of the comment received, EPA is withdrawing the direct final rule approving Maryland's 2011 base year inventory for the Maryland portion of the Philadelphia-Wilmington-Atlantic City nonattainment area for the 2008 8-hour ozone NAAQS.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: November 3, 2017.

Cosmo Servidio,

Regional Administrator, Region III.

■ Accordingly, the amendment to § 52.1070(e) published on September 25, 2017 (82 FR 44522), which were to become effective November 24, 2017, is withdrawn.

Air Quality Implementation Plans; Nebraska; Infrastructure SIP Requirements for the 2010 Nitrogen Dioxide and Sulfur Dioxide and the 2012 Fine Particulate Matter National Ambient Air Quality Standards; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to adverse comments, the Environmental Protection Agency (EPA) is withdrawing the direct final rule Approval of Nebraska Air Quality Implementation Plans; Infrastructure SIP Requirements for the 2010 Nitrogen Dioxide and Sulfur Dioxide and the 2012 Fine Particulate Matter National Ambient Air Quality Standards, published in the **Federal Register** on September 20, 2017. The direct final rule approved elements of a State Implementation Plan (SIP) submission from the State of Nebraska addressing the applicable requirements of Clean Air Act (CAA) section 110 for the 2010 Nitrogen Dioxide (NO_2) and Sulfur Dioxide (SO_2) National Ambient Air Quality Standards (NAAQS), and the 2012 Fine Particulate Matter ($PM_{2.5}$) NAAQS. Section 110 of the CAA requires that each state adopt and submit a SIP to support implementation, maintenance, and enforcement of each new or revised NAAQS promulgated by EPA. These SIPs are commonly referred to as ''infrastructure'' SIPs.

DATES: As of November 17, 2017, the direct final rule published at 82 FR 43848, September 20, 2017, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Gregory Crable, Environmental Protection Agency, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219 at (913) 551–7391, or by email at *crable.gregory@epa.gov*

SUPPLEMENTARY INFORMATION: Due to adverse comments, EPA is withdrawing the direct final rule to approve three Infrastructure SIPs submitted by the State of Nebraska pertaining to the 2010 NO_2 and SO_2 NAAQS and the 2012 $PM_{2.5}$ NAAQS. In the direct final rule published in the **Federal Register** on September 20, 2017, (82 FR 43848), we stated that if we received adverse comment by Octber 20, 2017, the rule would be withdrawn and not take effect. EPA received adverse comments. EPA will address those comments in a subsequent final action based upon the proposed action also published in the **Federal Register** on September 20, 2017 (82 FR 43926). EPA will not institute a second comment period on this action.

State of Iowa; Elements of the Infrastructure SIP Requirements for the 2010 Nitrogen Dioxide National Ambient Air Quality Standard (NAAQS) Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to an adverse comment, the Environmental Protection Agency (EPA) is withdrawing the direct final rule for Approval of Implementation Plans; State of Iowa; Elements of the Infrastructure SIP Requirements for the 2010 Nitrogen Dioxide National Ambient Air Quality Standard (NAAQS) published in the **Federal Register** on September 20, 2017. Infrastructure SIPs address the applicable requirements of Clean Air Act (CAA) section 110, which requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each new or revised NAAQS promulgated by the EPA. These SIPs are commonly referred to as ''infrastructure'' SIPs. The infrastructure requirements are designed to ensure that the structural components of each state's air quality management program are adequate to meet the state's responsibilities under the CAA.

DATES: The direct final rule published at 82 FR 43846, September 20, 2017, is withdrawn effective November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Heather Hamilton, Environmental Protection Agency, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219 at (913) 551–7039, or by email at *Hamilton.heather@epa.gov.*

SUPPLEMENTARY INFORMATION: Due to an adverse comment, EPA is withdrawing the direct final rule to approve revisions to the Iowa State Implementation Plan (SIP). In the direct final rule published on September 20, 2017, (82 FR 43846), we stated that if we received adverse comment by October 20, 2017, the rule would be withdrawn and not take effect. EPA received an adverse comment. EPA will address the comment in a subsequent final action based upon the proposed action also published on September 20, 2017. EPA will not institute a second comment period on this action.

Approval of Implementation Plans; State of Iowa; Elements of the Infrastructure SIP Requirements for the 2010 Sulfur Dioxide National Ambient Air Quality Standard (NAAQS); Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to an adverse comment, the Environmental Protection Agency (EPA) is withdrawing the direct final rule for Approval of Implementation Plans; State of Iowa; Elements of the Infrastructure SIP Requirements for the 2010 Sulfur Dioxide National Ambient Air Quality Standard (NAAQS) published in the **Federal Register** on September 29, 2017. Infrastructure SIPs address the applicable requirements of Clean Air Act (CAA) section 110, which requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each new or revised NAAQS promulgated by the EPA. These SIPs are commonly referred to as ''infrastructure'' SIPs. The infrastructure requirements are designed to ensure that the structural components of each state's air quality management program are adequate to meet the state's responsibilities under the CAA.

DATES: As of November 17, 2017, the direct final rule published on September 29, 2017 (82 FR 45497), is withdrawn.

FOR FURTHER INFORMATION CONTACT: Heather Hamilton Environmental Protection Agency, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219 at 913–551–7039, or by email at *hamilton.heather@epa.gov.*

SUPPLEMENTARY INFORMATION: Due to an adverse comment, EPA is withdrawing the direct final rule to approve revisions to the Iowa State Implementation Plan (SIP). In the direct final rule published on September 29, 2017, (82 FR 45497), we stated that if we received adverse comment by October 30, 2017, the rule would be withdrawn and not take effect. EPA received an adverse comment. EPA will address the comment in a subsequent final action based upon the proposed action also published on September 29, 2017 (82 FR 45550). EPA will not institute a second comment period on this action.

Approval of Kansas Air Quality State Implementation Plans; Construction Permits and Approvals Program; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to an adverse comment, the Environmental Protection Agency (EPA) is withdrawing the direct final rule for Approval of Kansas Air Quality State Implementation Plans; Construction Permits and Approvals Program, published in the **Federal Register** on September 21, 2017. Kansas's SIP revisions included revisions to Kansas' construction permit rules. Specifically, these revisions implemented the revised National Ambient Air Quality Standard (NAAQS) for fine particulate matter; clarified and refined applicable criteria for sources subject to the construction permitting program; updated the construction permitting program fee structure and schedule; and made minor revisions and corrections.

DATES: As of November 17, 2017, the direct final rule published at 82 FR 44103, on September 21, 2017, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Deborah Bredehoft, Environmental Protection Agency, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219 at (913) 551–7164, or by email at *Bredehoft.Deborah@epa.gov.*

SUPPLEMENTARY INFORMATION: Due to adverse comments, EPA is withdrawing the direct final rule to approve revisions to the Kansas State Implementation Plan (SIP). In the direct final rule published on September 21, 2017 (82 FR 44103), we stated that if we received adverse comment by October 23, 2017, the rule would be withdrawn and not take effect. EPA received adverse comments. EPA will address the comments in a subsequent action.

List of Subjects in 40 CFR Part 52

Approval and Promulgation of Air Quality Implementation Plans; Maryland; Direct Final Rule for the Approval of an Alternative Volatile Organic Compound Emission Standard; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: Due to adverse comments received, the Environmental Protection Agency (EPA) is withdrawing the August 28, 2017 direct final rule that approved a revision to the Maryland state implementation plan (SIP) to incorporate by reference a Maryland Department of the Environment (MDE) order that establishes an alternative volatile organic compound (VOC) emission standard for National Gypsum

Company (NGC) to ensure that it remains a minor VOC source. EPA stated in the direct final rule that if EPA received adverse comments by September 27, 2017, the rule would be withdrawn and not take effect. EPA subsequently received one adverse comment. EPA will address the comment received in a subsequent final action based upon the proposed action also published on August 28, 2017. EPA will not institute a second comment period on this action.

DATES: As of November 17, 2017, the direct final rule published at 82 FR 40715, August 28, 2017, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Gregory Becoat, (215) 814 2036, or by email at *becoat.gregory@epa.gov.*

SUPPLEMENTARY INFORMATION: On June 24, 2016, MDE submitted a formal revision to the Maryland SIP. The SIP revision consisted of a request to incorporate by reference a MDE departmental order that establishes an alternative VOC emission standard for NGC as it appears in the permit-to-construct conditions issued by MDE in order to ensure that it remains a minor stationary source of VOCs. The alternative VOC emissions limit of 195 pounds per operating day with at least a 99% overall VOC control efficiency will achieve a stringent emissions discharge reduction and is more stringent than any established standard for reasonably available control technology (RACT) for major stationary sources of VOCs in Code of Maryland Regulations (COMAR) 26.11.19. Under COMAR 26.11.06.06E—''Exceptions,'' a source may request an exception to a VOC emissions limit from MDE if the source is not subject to new source review (NSR) and if the source is unable to comply with COMAR 26.11.06.06B—''Control of VOC from Installations.'' In the direct final rule published on August 28, 2017 (82 FR 40715), EPA stated that if EPA received adverse comments by September 27, 2017, the rule would be withdrawn and not take effect. EPA subsequently received one adverse comment from an anonymous commenter.

As a result of the comment received, EPA is withdrawing the direct final rule approving the revision to the Maryland SIP that incorporates by reference a MDE order establishing a VOC emission standard for NGC.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: October 31, 2017.

Cosmo Servidio,

Regional Administrator, Region III.

■ Accordingly, the amendment to § 52.1070(d) published on August 28, 2017 (82 FR 40715), which were to become effective November 27, 2017, are withdrawn.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 17–187; RM–11792; DA 17–1062]

Television Broadcasting Services; Anchorage, Alaska

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission grants the request by Gray Television License, LLC (Gray) to substitute channel 7 for channel 5 for station KYES–TV, Anchorage, Alaska. Gray filed comments reaffirming its interest in the proposed channel substitution and stating that if the proposal is granted, it will promptly file an application for the facilities specified in the rulemaking petition and construct the station. As Gray explained in its petition, the antenna currently used by KYES–TV is a repurposed analog antenna the previous station owner built which provides an inefficient signal. In addition, the current remote transmission site does not have a generator and KYES–TV goes silent when there is a power outage. By moving to sister station KTUU's location, and operating with an existing modern broadband antenna on a high-VHF channel, the station will be able to deliver an improved signal. Gray will also add the KYES–TV signal to the translator network used by KTUU, which will reduce most of the loss of service that would result from the proposed move, which will serve the public interest.

DATES: This rule is effective December 18, 2017.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, *Joyce.Bernstein@fcc.gov,* Media Bureau, (202) 418–1647.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Order,* MB Docket No. 17–187, adopted October 31, 2017, and released October 31, 2017. The full text of this document is available for public inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 12th Street SW., Washington, DC 20554. This document will also be available via ECFS (*http://fjallfoss.fcc.gov/ecfs/*). To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980, *see* 5 U.S.C. 601–612, do not apply to this proceeding.

The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Proposed Rules

Federal Register
Vol. 82, No. 221
Friday, November 17, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2017–1022; Product Identifier 2017–NM–098–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 and 787–9 airplanes. This proposed AD was prompted by reports of failures of the lip heater assemblies of the inlet ice protection system of the cabin air compressor (CAC) due to chafing. This proposed AD would require changing the airplane electrical connectors and the routes of certain wire bundles, and installing new or modified left and right CAC inlet duct assemblies. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 2, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Standards Branch, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1022.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1022; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Joe Salemeh, Aerospace Engineer, Systems and Equipment Section, FAA, Seattle ACO Branch, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6454; fax: 425–917–6590; email: *joe.salameh@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2017–1022; Product Identifier 2017–NM–098–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. We will consider all comments received by the closing date and may amend this NPRM because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received reports of failures of the inlet lip heater assemblies of the inlet ice protection system of the CAC due to chafing of the CAC inlet ice protection system (CIPS) inlet lip heater wire harness against adjacent structures. The damage to the wires caused the CIPS lip heater to set a fault. This condition, if not corrected, could result in an electrical short and potential loss of functions essential for safe flight of the airplane.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin B787–81205–SB300019–00, Issue 001, dated March 22, 2017. The service information describes procedures for changing the airplane electrical connectors and the routes of certain wire bundles, and installing new or modified left and right CAC inlet duct assemblies. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishment of the actions identified as ''RC'' (required for compliance) in the Accomplishment Instructions of Boeing Alert Service Bulletin B787–81205–SB300019–00, Issue 001, dated March 22, 2017, described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1022.

Costs of Compliance

We estimate that this proposed AD affects 66 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Change and installation	20 work-hours × $85 per hour = $1,700	$32,937	$34,637	$2,286,042

According to the manufacturer, all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes to the Director of the System Oversight Division.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2017–1022; Product Identifier 2017–NM–098–AD.

(a) Comments Due Date

We must receive comments by January 2, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 and 787–9 airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin B787–81205–SB300019–00, Issue 001, dated March 22, 2017.

(d) Subject

Air Transport Association (ATA) of America Code 30, Ice/Rain protection system wiring.

(e) Unsafe Condition

This AD was prompted by reports of failures of the Cabin Air Compressor (CAC) inlet ice protection system (CIPS) inlet lip heater assemblies due to chafing of the CIPS inlet lip heater wire harness against adjacent structures. We are issuing this AD to prevent any damage to the CIPS inlet lip heater wire bundle, which could cause an electrical short and potential loss of functions essential for safe flight of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Within 36 months after the effective date of this AD, do all applicable actions identified as ''RC'' (required for compliance) in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin B787–81205–SB300019–00, Issue 001, dated March 22, 2017.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) For service information that contains steps that are labeled as RC, the provisions of paragraphs (h)(4)(i) and (h)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled ''RC Exempt,'' then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(i) Related Information

(1) For more information about this AD, contact Joe Salemeh, Aerospace Engineer, Systems and Equipment Section, FAA, Seattle ACO Branch, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6454; fax: 425–917–6590; email: *joe.salameh@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Standards Branch, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 3, 2017.

Jeffrey E. Duven,

Director, System Oversight Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Bombardier, Inc., Model CL–600–2C10 (Regional Jet Series 700, 701, & 702), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. This proposed AD was prompted by several incidents of electrical shorting and sparks caused by de-icing fluid leaks between flight deck windshields and side windows. This proposed AD would require water spray tests and general visual inspections for water in the flight compartment, and water removal and sealant application if necessary. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 2, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Bombardier, Inc., 400 Côte Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1–866–538–1247 or direct-dial telephone 1–514–855–2999; fax 514–855–7401; email *ac.yul@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this service information at the FAA, Transport Standards Branch, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1025; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Steven Dzierzynski, Aerospace Engineer, Avionics and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7367; fax 516–794–5531.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the ADDRESSES section. Include ''Docket No. FAA–2017–1025; Product Identifier 2017–NM–137–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. We will consider all comments received by the closing date and may amend this NPRM based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this NPRM.

Discussion

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Airworthiness Directive CF–2017–28, dated August 23, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Bombardier, Inc., Model CL–600–2C10 (Regional Jet Series 700, 701, & 702), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. The MCAI states:

> Several incidents of electrical shorting and sparks have been reported in the cockpit of CL–600–2C10 and CL–600–2D24 aeroplanes. De-icing fluid can leak between the windshields and side windows, leading to possible damage to the cockpit floodlight wires and electrical connections. If not corrected, this condition may result in a flight compartment fire.
>
> This [Canadian] AD is issued to mandate a water spray test and [general visual] inspection for evidence of fluid ingress into the flight compartment. It also provides mandatory instructions for sealant application if required.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1025.

Related Service Information Under 1 CFR Part 51

Bombardier, Inc., has issued Service Bulletin 670BA–56–003, Revision A, dated April 13, 2016. This service information describes procedures for doing water spray tests on the flight deck windows, doing general visual inspections for water in the flight compartment, removing water, and applying sealant to the flight deck windows. This service information is reasonably available because the interested parties have access to it through their normal course of business

or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Costs of Compliance

We estimate that this proposed AD affects 543 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Spray tests and inspections	2 work-hours × $85 per hour = $170	$0	$170	$92,310

We estimate the following costs to do any necessary water removal and sealant application that would be required based on the results of the proposed inspection. We have no way of determining the number of airplanes that might need this water removal and sealant application:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Water removal and sealant application	4 work-hours × $85 per hour = $340	$308	$648

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes to the Director of the System Oversight Division.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Bombardier, Inc.: Docket No. FAA–2017–1025; Product Identifier 2017–NM–137–AD.

(a) Comments Due Date

We must receive comments by January 2, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD, certificated in any category.

(1) Bombardier, Inc., Model CL–600–2C10 (Regional Jet Series 700, 701, & 702) airplanes, serial numbers 10003 through 10342 inclusive.

(2) Bombardier, Inc., Model CL–600–2D15 (Regional Jet Series 705) and Model CL–600–2D24 (Regional Jet Series 900) airplanes, serial numbers 15001 through 15367 inclusive.

(3) Bombardier, Inc., Model CL–600–2E25 (Regional Jet Series 1000) airplanes, serial numbers 19001 through 19041 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 56, Windows.

(e) Reason

This AD was prompted by several incidents of electrical shorting and sparks caused by de-icing fluid leaks between flight deck windshields and side windows. We are issuing this AD to detect and correct de-icing fluid entering the flight deck, which could damage the flight deck floodlight wires and electrical connections, and ultimately could lead to a fire in the flight compartment.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Left Flight Deck Windshield and Side Window Spray Test, Inspection, Water Removal and Sealant Application

For airplanes on which a left flight deck windshield or a left flight deck side window was replaced as specified in Bombardier Aircraft Maintenance Manual (AMM) task 56–11–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task; or Bombardier AMM task 56–12–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task: At the applicable time specified in paragraph (g)(1) or (g)(2) of this AD, perform a water spray test and do a general visual inspection of the left flight deck windshield and left flight deck side window for evidence of water ingress into the flight deck, in accordance with Part A of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, Revision A, dated April 13, 2016. If water is found in the flight compartment: Before further flight, remove the water, and apply sealant on the left flight deck windows in accordance with Part C of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, Revision A, dated April 13, 2016.

(1) For airplanes on which Bombardier in-service ModSum IS67033110181 has not been incorporated: Within 2,500 flight hours after the effective date of this AD.

(2) For airplanes on which Bombardier in-service ModSum IS67033110181 has been incorporated: Within 6,600 flight hours after the effective date of this AD.

(h) Right Flight Deck Windshield and Side Window Spray Test, Inspection, Water Removal and Sealant Application

For airplanes on which a right flight deck windshield or a right flight deck side window was replaced as specified in Bombardier AMM task 56–11–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task; or Bombardier AMM task 56–12–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task: At the applicable time specified in paragraph (h)(1) or (h)(2) of this AD, perform a water spray test and do a general visual inspection of the right flight deck windshield and right flight deck side window for evidence of water ingress into the flight deck, in accordance with Part B of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, Revision A, dated April 13, 2016. If water is found in the flight compartment: Before further flight, remove the water, and apply sealant on the right flight deck windows in accordance with Part D of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, Revision A, dated April 13, 2016.

(1) For airplanes on which Bombardier in-service ModSum IS67033110181 has not been incorporated: Within 2,500 flight hours after the effective date of this AD.

(2) For airplanes on which Bombardier in-service ModSum IS67033110181 has been incorporated: Within 6,600 flight hours after the effective date of this AD.

(i) Credit for Previous Actions

(1) This paragraph provides credit for actions required by paragraph (g) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraphs (i)(1)(i), (i)(1)(ii), or (i)(1)(iii) of this AD; provided that the left flight deck side window or left flight deck windshield have not been subsequently replaced as specified in Bombardier AMM task 56–11–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task; or Bombardier AMM task 56–12–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task.

(i) Bombardier Alert Service Bulletin A670BA–56–002, dated January 7, 2008.

(ii) Bombardier Alert Service Bulletin A670BA–56–002, Revision A, dated February 26, 2008.

(iii) Part A and Part C, as applicable, of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, dated May 28, 2015.

(2) This paragraph provides credit for actions required by paragraph (h) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraphs (i)(2)(i), (i)(2)(ii), or (i)(2)(iii) of this AD; provided that the right flight deck side window or right flight deck windshield have not been subsequently replaced as specified in Bombardier AMM task 56–11–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task; or Bombardier AMM task 56–12–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task.

(i) Bombardier Alert Service Bulletin A670BA–56–002, dated January 7, 2008.

(ii) Bombardier Alert Service Bulletin A670BA–56–002, Revision A, dated February 26, 2008.

(iii) Part B and Part D, as applicable, of the Accomplishment Instructions of Bombardier Service Bulletin 670BA–56–003, dated May 28, 2015.

(j) Parts Installation Limitations

(1) As of the effective date of this AD, no person may install on any airplane a left or right flight deck windshield as specified in Bombardier AMM task 56–11–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task.

(2) As of the effective date of this AD, no person may install on any airplane a left or right flight deck side window as specified in Bombardier AMM task 56–12–01–400–801, Revision 48, dated March 25, 2015, or any previous revision of that task.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian Airworthiness Directive CF–2017–28, dated August 23, 2017, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1025.

(2) For more information about this AD, contact Steven Dzierzynski, Aerospace Engineer, Avionics and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7367; fax 516–794–5531.

(3) For service information identified in this AD, contact Bombardier, Inc., 400 Côte Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1–866–538–1247 or direct-dial telephone 1–514–855–2999; fax 514–855–7401; email *ac.yul@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this service information at the FAA, Transport Standards Branch, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 8, 2017.

Dionne Palermo,

Acting Director, System Oversight Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 110

[Docket Number USCG–2016–0916]

RIN 1625–AA01

Anchorages; Captain of the Port Puget Sound Zone, WA

AGENCY: Coast Guard, DHS.

ACTION: Notification of intent to withdraw proposed rule; request for comments.

SUMMARY: The Coast Guard intends to withdraw the proposed anchorage rule entitled ''Anchorages; Captain of the Port Puget Sound Zone, WA'' that we published on February 10, 2017. The Coast Guard does not currently plan to pursue this rulemaking and consequently does not intend to schedule tribal consultation on the proposed rule. Given the Coast Guard's intent to withdraw, in this request for comment, the Coast Guard is asking if withdrawal is appropriate and if tribal consultation specific to this rulemaking is still appropriate.

DATES: Your comments and related material must reach the Coast Guard on or before January 16, 2018.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0916 using the Federal portal at *http://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of intent, call or email LCDR Christina Sullivan, U.S. Coast Guard Sector Puget Sound; telephone 206–217–6042, email *SectorPugetSoundWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

FR Federal Register
NPRM Notice of Proposed Rulemaking

II. Background and Purpose

We published a notice of proposed rulemaking (NPRM) in the **Federal Register** on February 10, 2017 (82 FR 10313), entitled ''Anchorages; Captain of the Port Puget Sound Zone, WA.'' In the NPRM, we proposed the creation of several new anchorages, holding areas, and a non-anchorage area as well as the expansion of one existing general anchorage in the Puget Sound area, as detailed in the proposed regulatory text. The Coast Guard received input from a number of tribes expressing concern about the current rulemaking and based on that input, we intend to withdraw the proposed anchorage rule.

Four months after publishing the NPRM, the Coast Guard provided notice of its intent to conduct a government to government consultation with the tribes on the proposed rulemaking. In that published notification of tribal consultation (82 FR 25207, June 1, 2017), the Coast Guard stated that it would post a written summary of the government to government tribal consultation to the docket, and that members of the public would have time to submit further comments between the posting of the summary of the tribal consultation and the closing of the comment period. The tribal consultation was postponed at the request of the participants, and has not been rescheduled.

Because the Coast Guard published a notice of formal tribal government to government consultation on this proposed rule, the Coast Guard wants to ensure that tribal governments have an opportunity to indicate whether they believe tribal consultation is necessary in light of our intent to withdraw the proposed rule. Tribal governments that believe consultation on this proposed rule is necessary should comment in the docket, and may also contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

Canceling tribal consultation on this specific proposed rule does not prevent other consultation from occurring. The Coast Guard supports a separate government to government consultation with the tribes regarding tribal treaty rights and broader issues of waterways usage outside of the rulemaking process. Accordingly, the Coast Guard will conduct outreach regarding the scope of a potential separate government to government consultation independently of this notification of intent and request for comment.

If the Coast Guard decides to withdraw the proposed rule, we will issue a notification of withdrawal.

III. Information Requested

We are requesting comment from interested persons, particularly from tribal officials, tribal governments, tribal organizations, and tribal members on whether withdrawal is appropriate, and whether a government to government consultation on this anchorages rulemaking is desired in light of the Coast Guard's intent to withdraw from the rulemaking. Because the Coast Guard intends to withdraw from this rulemaking, the Coast Guard believes that tribal government to government consultation on this proposed anchorages rulemaking is no longer necessary.

IV. Public Participation and Request for Comments

We encourage you to submit comments through the Federal portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. In your submission, please include the docket number for this notification of intent and provide a reason for each suggestion or recommendation.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, visit *http://www.regulations.gov/privacyNotice.*

Documents mentioned in this notification of intent as being available in the docket, and all public comments, will be in our online docket at *http://www.regulations.gov* and can be viewed by following that Web site's instructions.

This document is issued under authority of 5 U.S.C. 552(a).

Dated: November 9, 2017.

David G. Throop,

Rear Admiral, U.S. Coast Guard, Commander, Thirteenth Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2017–0573; FRL–9970–86-Region 9]

Approval of California Air Plan Revisions, Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Mojave Desert Air Quality Management District (MDAQMD) portion of the California State Implementation Plan (SIP). This revision concerns emissions of volatile organic compounds (VOCs) from marine

and pleasure craft coating operations. We are proposing to approve a local rule to regulate these emission sources under the Clean Air Act (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by December 18, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2017–0573 at *http://www.regulations.gov,* or via email to Arnold Lazarus, Rulemaking Office at *lazarus.arnold@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from *Regulations.gov*. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the Web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Arnold Lazarus, EPA Region IX, (415) 972–3024, *lazarus.arnold@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

II. The EPA's Evaluation and Action
A. How is the EPA evaluating the rule?
B. Does the rule meet the evaluation criteria?
C. EPA Recommendations To Further Improve the Rule
D. Public Comment and Proposed Action
III. Incorporation by reference
IV. Statutory and Executive Order Reviews

I. The State's Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal with the date that it was adopted by the local air agency and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULE

Local agency	Rule #	Rule title	Amended	Submitted
MDAQMD	1106	Marine and Pleasure Craft Coating Operations	10/24/2016	02/24/2017

On August 2, 2017, the EPA determined that the submittal for MDAQMD Rule 1106 met the completeness criteria in 40 CFR part 51 Appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

We approved an earlier version of Rule 1106 into the SIP on July 16, 2008 (73 FR 40754). The MDAQMD adopted revisions to the SIP-approved version on October 24, 2016 and CARB submitted them to us on February 24, 2017.

C. What is the purpose of the submitted rule revision?

VOCs help produce ground-level ozone, smog and particulate matter, which harm human health and the environment. Section 110(a) of the CAA requires states to submit regulations that control VOC emissions. Rule 1106 was revised primarily to implement reasonably available control technology (RACT) recommendations to strengthen the overall VOC capture and control efficiency from 85 to 90%, and to generally adopt more stringent VOC content limits for marine and pleasure craft coatings. The EPA's technical support document (TSD) has more information about this rule.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rule?

SIP rules must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)), and must not modify certain SIP control requirements in nonattainment areas without ensuring equivalent or greater emissions reductions (see CAA section 193).

Generally, SIP rules must require RACT for each category of sources covered by a Control Techniques Guidelines (CTG) document as well as each major source of VOCs in ozone nonattainment areas classified as moderate or above (see CAA section 182(b)(2)). The MDAQMD regulates an ozone nonattainment area classified as Severe for the 1997 and the 2008 8-Hour Ozone National Ambient Air Quality Standards (40 CFR 81.305). In addition, Rule 1106 regulates activities covered by two different CTGs: *Control Techniques Guidelines for Shipbuilding and Ship Repair Operations* (61 FR 44050), August 1996, and *Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings* EPA–453/R–08–003, September 2008. Therefore, this rule must implement RACT.

Guidance and policy documents that we use to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

1. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).
2. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' EPA, May 25, 1988 (the Bluebook, revised January 11, 1990).
3. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' EPA Region 9, August 21, 2001 (the Little Bluebook).
4. ''Control Techniques Guidelines for Shipbuilding and Ship Repair Operations'' (61 FR 44050), August 27, 1996.
5. ''Alternative Control Techniques Document: Surface Coating Operations at Shipbuilding and Ship Repair Facilities EPA 453/R–94–032, April 1994.
6. ''Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings'' EPA–453/R–08–003, September 2008.

B. Does the rule meet the evaluation criteria?

Rule 1106 adds several new marine and pleasure craft specialty coating

categories, lowers the VOC content limit of other specialty coating categories, and lowers the VOC content limit for solvents used for surface preparation. Under the District's October 23, 2006 SIP-approved rule, some of these new specialty coating categories such as Topcoats, Pleasure Craft, One Component, and Two Component, would have been covered under the ''General Use'' category and been subject to a more stringent VOC limit when compared to the October 24, 2016 amended rule. The EPA reviewed the potential gross emissions increase associated with the new specialty coating limits and estimates that total VOC emissions associated with these coatings may increase by approximately 250 pounds per year or approximately 0.001% of MDAQMD's VOC inventory. We conclude that this is a negligible increase and would not impact attainment. Because the potential gross increase is minimal, we have not calculated the net impact of the rule revisions, including the emission reductions from strengthened limits. Our evaluation shows this rule is consistent with CAA requirements and relevant guidance regarding enforceability, RACT, and SIP revisions. The TSD has more information on our evaluation.

C. EPA Recommendations To Further Improve the Rule

The TSD describes additional rule revisions that we recommend for the next time the local agency modifies the rule.

D. Public Comment and Proposed Action

As authorized in section 110(k)(3) of the Act, the EPA proposes to fully approve the submitted rule because we believe it fulfills all relevant requirements. We will accept comments from the public on this proposal until December 18, 2017. If we take final action to approve the submitted rule our final action will incorporate this rule into the federally enforceable SIP.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the MDAQMD rule described in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2017–0564; FRL–9970–87–Region 9]

Approval of California Air Plan Revisions, Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve and conditionally approve revisions to the Mojave Desert Air Quality Management District (MDAQMD or ''District'') portion of the California State Implementation Plan (SIP). These revisions concern the District's demonstration regarding Reasonably Available Control Technology (RACT) requirements for the 1997 8-hour ozone and the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS or ''standard'') in the portion of the Western Mojave Desert ozone nonattainment area under the jurisdiction of the MDAQMD. The EPA is also proposing to approve MDAQMD negative declarations into the SIP for the 2008 ozone standards. We are proposing action on local SIP revisions under the Clean Air Act (CAA or Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Any comments must arrive by December 18, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2017–0564 at *https://www.regulations.gov/,* or via email to

Nancy Levin, Rulemaking Office at *levin.nancy@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from *Regulations.gov*. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the Web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Nancy Levin, EPA Region IX, (415) 942–3848, *levin.nancy@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

I. The State's Submittal

A. What documents did the State submit?

Table 1 lists the documents addressed by this proposal with the dates that they were adopted by the local air agency and submitted to the EPA by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED DOCUMENTS

Local agency	Document	Adopted	Submitted
MDAQMD	MDAQMD 8-Hour Reasonably Available Control Technology—State Implementation Plan Analysis (RACT SIP Analysis) "2006 RACT SIP".	9/25/06	7/11/2007
MDAQMD	MDAQMD 2015 8-Hour Reasonably Available Control Technology —State Implementation Plan Analysis (2015 RACT SIP Analysis) "2015 RACT SIP".	2/23/15	9/9/2015
MDAQMD	MDAQMD Federal Negative Declarations for Nineteen Control Techniques Guidelines Source Categories "Negative Declarations for 19 CTGs".	2/23/15	9/9/2015

In addition to these SIP submittals, the District and CARB transmitted commitment letters to the EPA to adopt and submit specific enforceable measures within a year of our anticipated approval date that would remedy the deficiencies identified in the 2017 MDAQMD and CARB letters to the EPA.[1]

On January 11, 2008, the submittal for MDAQMD's RACT SIP for the 1997 8-hour ozone NAAQS (2006 RACT SIP) was deemed by operation of law to meet the completeness criteria in Title 40 of the Code of Federal Regulations (CFR) part 51 Appendix V, which must be met before formal EPA review. On March 9, 2016, the submittal for the MDAQMD's 2015 RACT SIP, including negative declarations for 19 CTGs, was found to meet the completeness criteria.

B. Are there other versions of these documents?

There are no previous versions of these documents in the MDAQMD portion of the California SIP for the 1997 or 2008 8-hour ozone standards.

C. What is the purpose of the submitted documents?

Volatile Organic Compounds (VOCs) and nitrogen oxides (NO_X) help produce ground-level ozone and smog, which harm human health and the environment. Section 110(a) of the CAA requires states to submit regulations that control VOCs and NO_X emissions. Sections 182(b)(2) and (f) require that SIPs for ozone nonattainment areas classified as Moderate or above implement RACT for any source covered by a Control Techniques Guidelines (CTG) document and for any major source of VOCs or NO_X. The MDAQMD is subject to this requirement as it regulates the San Bernardino portion of the Western Mojave Desert ozone nonattainment area that was previously designated and classified as a Moderate nonattainment area for the 1997 NAAQS and is currently classified as a Severe-15 ozone nonattainment area for the 1997 and the 2008 8-hour ozone NAAQS.[2] Therefore, the MDAQMD must, at a minimum, adopt RACT-level controls for all sources covered by a CTG document and for all major non-CTG sources of VOCs or NO_X within the nonattainment area. Any stationary source that emits or has the potential to emit at least 100 tons per year of VOCs or NO_X is a major stationary source in a Moderate ozone nonattainment area (CAA section 182(b)(2), (f) and 302(j)), and any stationary source that emits or has the potential to emit at least 25 tons per year of VOCs or NO_X is a major stationary source in a Severe ozone nonattainment area (CAA sections 182(d) and (f)).

Section IV.G of the preamble to the EPA's final rule to implement the 1997 8-hour ozone NAAQS (70 FR 71612, November 29, 2005) discusses RACT

[1] Letters from Brad Poiriez, Mojave Desert Air Quality Management District (MDAQMD) to Alexis Strauss, U.S. Environmental Protection Agency (EPA) and Richard Corey, California Air Resources Board (CARB), dated September 25, 2017 and September 27, 2017. Letter from Jon Taylor, CARB, to Alexis Strauss, EPA, dated October 3, 2017.

[2] 40 CFR 81.305; 69 FR 23858 at 23884 (April 30, 2004) (final rule designating and classifying Western Mojave Desert as a Subpart 2/Moderate nonattainment for the 1997 8-hour ozone NAAQS); 77 FR 26950 (May 8, 2012) (final rule reclassifying Western Mojave Desert as Severe-15 nonattainment for the 1997 8-hour ozone NAAQS); and 77 FR 30088 at 30100 (May 21, 2012) (final rule designating and classifying Western Mojave Desert as Severe-15 nonattainment for the 2008 8-hour ozone NAAQS). Western Mojave Desert is listed in the final rulemaking under ''Los Angeles-San Bernardino Cos (W Mojave Desert), CA: Los Angeles County (part).'' The EPA evaluated MDAQMD's 2006 RACT SIP submittal as a Moderate ozone nonattainment area since the District adopted its 2006 certification based on that classification. On March 13, 2014, the MDAQMD provided additional information to supplement its 2006 RACT SIP, to address the EPA's September 11, 2006 comments on the 2006 RACT SIP.

requirements. It states in part that where a RACT SIP is required, states implementing the 8-hour standard generally must assure that RACT is implemented, either through a certification that previously required RACT controls still represent RACT for 8-hour implementation purposes or through a new RACT determination. Section III.D of the preamble to the EPA's final rule to implement the 2008 ozone NAAQS (80 FR 12264, March 6, 2015) discusses similar requirements for RACT. The submitted documents provide MDAQMD's analyses of its compliance with the CAA section 182 RACT requirements for the 1997 and 2008 8-hour ozone NAAQS. The EPA's technical support documents (TSDs) [3] have more information about the District's submissions and the EPA's evaluations thereof.

II. The EPA's Evaluation and Proposed Action

A. How is the EPA evaluating the submitted documents?

SIP rules must require RACT for each category of sources covered by a CTG document as well as each major source of VOCs or NO_X in ozone nonattainment areas classified as Moderate or above (see CAA section 182(b)(2)). The MDAQMD regulates a Severe ozone nonattainment area (see 40 CFR 81.305), so the District's rules must implement RACT.

States should also submit for SIP approval negative declarations for those source categories for which they are not adopting CTG-based regulations (because they have no sources above the CTG recommended threshold) regardless of whether such negative declarations were made for an earlier SIP.[4] To do so, the submittal should provide reasonable assurance that no sources subject to the CTG requirements currently exist or are planned for the MDAQMD.

The District's analysis must demonstrate that each major source of NO_X or VOCs in the nonattainment area is covered by a RACT-level rule. In addition, for each CTG source category, the District must either demonstrate that a RACT-level rule is in place, or submit a negative declaration. Guidance and policy documents that we use to evaluate CAA section 182 RACT requirements include the following:

1. ''Final Rule to Implement the 8-hour Ozone National Ambient Air Quality Standard—Phase 2'': (70 FR 71612; November 29, 2005).
2. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).
3. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' EPA, May 25, 1988 (the Bluebook, revised January 11, 1990).
4. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' EPA Region 9, August 21, 2001 (the Little Bluebook).
5. ''State Implementation Plans; Nitrogen Oxides Supplement to the General Preamble; Clean Air Act Amendments of 1990 Implementation of Title I; Proposed Rule,'' (the NO_X Supplement), 57 FR 55620, November 25, 1992.
6. Memorandum from William T. Harnett to Regional Air Division Directors, (May 18, 2006), ''RACT Qs & As—Reasonably Available Control Technology (RACT) Questions and Answers.''
7. RACT SIPs, Letter dated March 9, 2006 from EPA Region IX (Andrew Steckel) to CARB (Kurt Karperos) describing Region IX's understanding of what constitutes a minimally acceptable RACT SIP.
8. RACT SIPs, Letter dated April 4, 2006 from EPA Region IX (Andrew Steckel) to CARB (Kurt Karperos) listing EPA's current CTGs, ACTs, and other documents which may help to establish RACT.
9. ''Implementation of the 2008 National Ambient Air Quality Standards for Ozone: State Implementation Plan Requirements'' (80 FR 12264; March 6, 2015).

With respect to major stationary sources, because the Western Mojave Desert ozone nonattainment area was classified as ''Moderate'' nonattainment for the 1997 8-hour ozone NAAQS at the time that California submitted the 2006 RACT SIP to the EPA, the EPA evaluated this submission in accordance with the 100 ton per year (tpy) threshold for ''major stationary sources'' of VOCs or NO_X emissions in Moderate ozone nonattainment areas. (see CAA sections 182(b)(2) and (f)).

MDAQMD's 2015 RACT SIP submittal contains the District's RACT evaluation for major stationary sources in accordance with the 25 tpy threshold for major stationary sources of VOCs or NO_X emissions in Severe ozone nonattainment areas. (see CAA sections 182(d) and (f)). The EPA also evaluated MDAQMD's submittals for compliance with the additional RACT requirements that became applicable following the EPA's reclassification of the Western Mojave Desert ozone nonattainment area from ''Moderate'' to ''Severe'' nonattainment for the 1997 8-hour ozone NAAQS and classification as a Severe ozone nonattainment area for the 2008 8-hour ozone NAAQS.

B. Do the documents meet the evaluation criteria?

We find that the District's submissions are largely consistent with the applicable CAA requirements. The District has identified rule deficiencies for certain rules, and in light of the District's commitment to adopt specific enforceable measures to remedy the identified rule deficiencies, the EPA will propose to conditionally approve portions of the submittals.

The SIP submittals and supplementary material demonstrate that all of the identified SIP rules implement RACT for the applicable CTG categories and for the major non-CTG stationary sources of VOCs and NO_X for the 1997 and 2008 8-hour ozone NAAQS, with the exception of the following rules: Rule 461, *Gasoline Transfer and Dispensing;* Rule 462, *Organic Liquid Loading;* Rule 463, *Storage of Organic Liquids;* Rule 1104, *Organic Solvent Degreasing;* Rule 1106, *Marine Coating Operations;* Rule 1114, *Wood Products Coating Operations;* Rule 1115, *Metal Parts & Product Coating Operations;* Rule 1157, *Boilers and Process Heaters;* Rule 1160, *Internal Combustion Engines;* Rule 1161, and *Portland Cements Kilns;* Rule 1162, *Polyester Resin Operations.*

On February 24, 2017, CARB submitted an updated version of Rule 1106, *Marine Coating Operations.* The EPA has concluded that the District's revisions of this rule cure the deficiencies identified by the District in its 2015 RACT SIP Analysis. We are proposing approval of this rule in parallel with the present proposed action.

On September 25, 2017 and September 27, 2017, the District transmitted to CARB and the EPA commitments to adopt new or revised rules that will resolve the identified rule deficiencies in the remaining rules, and to transmit these rules to CARB no later than December 31, 2018. On October 3, 2017, CARB committed to submit these rules to the EPA no later than January 31, 2019.[5] These letters commit the District to adopt specific enforceable measures to correct the rule deficiencies, commit the state to submit them to the EPA by a date certain, and are clear and enforceable. Accordingly, we believe these commitment letters are consistent with CAA requirements regarding conditional approval for the

[3] The docket for this proposed action contains two TSDs, one addressing the 2006 RACT SIP, and one addressing the 2015 RACT SIP and Negative Declarations for 19 CTGs.

[4] 57 FR 13498, 13512 (April 16, 1992). The EPA previously approved several negative declarations submitted by MDAQMD. *See* 76 FR 29153 (May 20, 2011).

[5] Letters from Brad Poiriez, Mojave Desert Air Quality Management District (MDAQMD) to Alexis Strauss, U.S. Environmental Protection Agency (EPA) and Richard Corey, California Air Resources Board (CARB), dated September 25 and September 27, 2017. Letter from Jon Taylor, CARB, to Alexis Strauss, EPA, dated October 3, 2017.

2006 and 2015 RACT SIPs with respect to the rules cited above.[6] See CAA section 110(k)(4).

Where there are no existing sources covered by a particular CTG document, states may, in lieu of adopting RACT requirements for those sources, adopt negative declarations certifying that there are no such sources in the relevant nonattainment area. On September 9, 2015, CARB submitted for SIP inclusion MDAQMD's negative declarations for 19 CTG source categories. The District certified that it examined its permit files, emissions inventory and other documentation and determined that there are no sources in the CTG source categories listed in Table 2.[7] The District adopted the negative declarations on February 23, 2015, after reasonable notice and public comment.[8] We searched CARB's emissions inventory database and verified that there did not appear to be facilities in the MDAQMD that might be subject to the 19 CTG categories. We conclude that these negative declarations are consistent with the relevant policy and guidance regarding RACT. The TSDs for today's action have more information on our evaluation.

TABLE 2—NEGATIVE DECLARATIONS

CTG source category	CTG reference document
Large Petroleum Dry Cleaners	EPA 450/3–82–009, 9/82 Control of VOC Emissions from Large Petroleum Dry Cleaners.
Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.	EPA–450/3–83–008, 11/83 Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins.

Leaks from Petroleum Refinery Equipment	EPA–450/2–77–025, 10/77 Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
Process Unit Turnarounds	EPA–450/2–77–025, 10/77 Control of Refinery Vacuum Producing Systems, Wastewater Separators, and Process Unit Turnarounds.
Equipment Leaks from Natural Gas/Gasoline Processing Plants.	EPA–450/3–83–007,12/83 Control of Volatile Organic Compound Equipment Leaks from Natural Gas/Gasoline Processing Plants.
Manufacture of Synthesized Pharmaceutical Products.	EPA–450/2–78–029, 12/78 Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products.[10]
Air Oxidation Processes (SOCMI)	EPA–450/3–84–015, 12/84 Control of Volatile Organic Compound Emissions from Air Oxidation Process in Synthetic Organic Chemical Manufacturing Industry (SOCMI).
Reactor and Distillation Processes (SOCMI)	EPA–450/4–91–031, 08/93 Control of Volatile Organic Compound Emissions from Reactor Process and Distillation Operations in SOCMI.
Equipment used in Synthetic Organic Chemical Polymers and Resin Manufacturing.	EPA–450/3–83–006, 03/84 Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment.
Leaks from Petroleum Refinery Equipment	EPA–450/2–78–036, 06/78 Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.
Metal Furniture Coating	EPA–450/2–77–032, 12/77 Control of Volatile Organic Emissions from Existing Stationary Sources—Volume III: Surface Coating of Metal Furniture. EPA 453/R–07–005, 09/07 Control Techniques Guidelines for Metal Furniture Coatings.
Flat Wood Paneling	EPA–450/2–78–032, 06/78 Control of Volatile Organic Emissions from Existing Stationary Sources—Volume VII: Factory Surface Coating of Flat Wood Paneling. EPA–453/R–06–004, 09/06 Control Techniques Guidelines for Flat Wood Paneling Coatings.

Accordingly, the District's 2006 and 2015 RACT SIP submittals satisfy the CAA section 182 RACT requirements, with the exception of the rules identified above, which the District has either already corrected, or has committed to correct.

[6] We note that the District has begun acting on its commitment. MDAQMD has drafted revisions to Rules 461, 462, 463 and 1115 and is in the process of responding to EPA's comments on the preliminary draft amendments.

[7] Mojave Desert Air Quality Management District Federal Negative Declaration (8 hr Ozone Standard) for Nineteen CTG Categories, signed by Eldon Heaston, Executive Officer, signed on January 13, 2015, and Board adopted on February 23, 2015.

[8] See Resolution 15–03; February 23, 2015.

[9] The District also lists ''Protocol for Determining the Daily VOC Emission Rate of Automobile and Light-Duty Truck Primer-Surfacer and Topcoat Operations (EPA 453/R–08–002, 09/08),'' however, this document is not a CTG.

[10] The District also lists ''Control Techniques for VOC Emissions from Stationary Sources: Industrial Manufacturing Processes (EPA–453/R–92–018, 12/92, NTIS PB–93–150–258),'' however, this is not a CTG document.

Our 2006 and 2015 RACT SIP TSDs have more information on our evaluation.

C. EPA Recommendations To Further Improve the RACT SIPs

The 2015 RACT SIP TSD describes recommendations if additional emission reductions are needed for the next time the local agency modifies its rules.

D. Public Comment and Proposed Action

If a portion of a plan revision meets all the applicable CAA requirements, section 110(k)(3) authorizes the EPA to approve the plan revision in part. 42 U.S.C. 7410(k)(3). In addition, section 110(k)(4) authorizes the EPA to conditionally approve a plan revision based on a commitment by the state to adopt specific enforceable measures by a date certain but not later than one year after the date of the plan approval. 42 U.S.C. 7410(k)(4). In this instance, the enforceable measures that the state must submit are new or revised rules that correct the rule deficiencies identified above. On October 3, 2017, the state transmitted a commitment letter dated September 25, 2017 from the MDAQMD to adopt and transmit rules or rule revisions to the state that correct the deficiencies identified in Rule 461, *Gasoline Transfer and Dispensing;* Rule 462, *Organic Liquid Loading;* Rule 463, *Storage of Organic Liquids;* Rule 1104, *Organic Solvent Degreasing;* Rule 1114, *Wood Products Coating Operations;* Rule 1115, *Metal Parts and Product Coating Operations;* Rule 1157, *Boilers and Process Heaters;* Rule 1160, *Internal Combustion Engines;* Rule 1161, *Portland Cement Kilns;* and Rule 1162, *Polyester Resin Operations* no later than December 31, 2018. The state also transmitted a second commitment letter from MDAQMD dated September 27, 2017 to adopt and transmit revised Rule 1104, *Organic Solvent Degreasing* and Rule 1162, *Polyester Resin Operations* no later than December 31, 2018. The state's transmittal letter commits the state to submit to the EPA these rules no later than January 31, 2019.

If the MDAQMD or the state fail to comply with this commitment, this proposed conditional approval would convert to a disapproval and start an 18-month clock for sanctions under CAA section 179(a)(2) and a two-year clock for a federal implementation plan under CAA section 110(c)(1).

As authorized in section 110(k)(3) and (4) of the Act, the EPA proposes to partially conditionally approve MDAQMD's 2006 and 2015 RACT SIPs with respect to Rule 461, *Gasoline Transfer and Dispensing;* Rule 462, *Organic Liquid Loading;* Rule 463, *Storage of Organic Liquids;* Rule 1104, *Organic Solvent Degreasing;* Rule 1114, *Wood Products Coating Operations;* Rule 1115, *Metal Parts and Product Coating Operations;* Rule 1157, *Boilers and Process Heaters;* Rule 1160, *Internal Combustion Engines;* Rule 1161, *Portland Cement Kilns;* and Rule 1162, *Polyester Resin Operations.* Simultaneously, EPA proposes to partially approve the remainder of MDAQMD's 2006 and 2015 RACT SIPs, and to fully approve MDAQMD's negative declarations, submitted on September 9, 2015.

We will accept comments from the public on this proposal until December 18, 2017. If we take final action to approve the submitted documents, our final action will incorporate these documents into the SIP.

III. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *http://www2.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is not an Executive Order 13771 regulatory action because actions such as SIP approvals are exempted under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, will result from this action.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of "covered regulatory action" in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not impose additional requirements beyond those imposed by state law.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because

application of those requirements would be inconsistent with the CAA.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

The EPA lacks the discretionary authority to address environmental justice in this rulemaking.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 6, 2017.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 71

RIN 0920–AA14

Foreign Quarantine Regulations, Proposed Revision of HHS/CDC Animal Importation Regulations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Advance notice of proposed rulemaking; withdrawal.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS) announces the withdrawal of its 2007 advance notice of proposed rulemaking (ANPRM). The 2007 ANPRM was issued to begin the process of revising the regulations concerning importation of animals and animal products.

DATES: As of November 17, 2017, the ANPRM published on July 31, 2007, at 72 FR 41676, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Anne E. O'Connor, M.S., MT(ASCP), Office of the Chief of Staff, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–A14, Atlanta, GA 30329; email: *cdcregulations@cdc.gov.*

SUPPLEMENTARY INFORMATION: On July 31, 2007, HHS/CDC published an advance notice of proposed rulemaking (72 FR 41679) requesting input and background information from the public on revisions to HHS/CDC's animal importation regulations found at 42 CFR part 71. The ANPRM had a 60-day comment period. On October 1, 2007, HHS/CDC published another notice (72 FR 55729) that extended the public comment period to December 1, 2007.

In response to the ANPRM, HHS/CDC received 20 public comments including from individuals, organizations, three animal-rescue advocacy groups, one private pet business, and one state government entity. Some commenters asserted that the current regulations fail to take into account the increasing volume of animal imports and new threats to human health and safety posed by these imports. Other commenters asserted that the same rules and fees applicable to commercial importers should be extended to non-profit animal shelters, rescue groups, and animal sanctuaries that effectively function as pet stores. The topics that received the most comments were changing the rabies regimen and requiring health certificate and unique identifiers for dogs, cats, and ferrets; and other strategies for preventing the introduction, spread, and transmission of zoonotic disease in the United States.

HHS/CDC believes the public interest is best served by withdrawing the ANPRM identified in this document from rulemaking. The withdrawal of the ANPRM identified in this document does not preclude HHS/CDC from initiating future rulemaking to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the United States and from one State or possession into another.

The ANPRM published on July 31, 2007 (72 FR 41676), is hereby withdrawn.

Dated: November 13, 2017.

Eric D. Hargan,

Acting Secretary, Department of Health and Human Services.

[Docket No. CDC–2015–0050]

RIN 0920–AA58

Possession, Use, and Transfer of Select Agents and Toxins; Addition of Certain Influenza Virus Strains to the List of Select Agents and Toxins

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of proposed rulemaking; withdrawal.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS) announces the withdrawal of its 2015 notice of proposed rulemaking (NPRM). The 2015 NPRM proposed to add certain influenza virus strains to the list of HHS select agents and toxins.

DATES: The proposed rule published on July 16, 2015 (80 FR 42079), is withdrawn as of November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Samuel S. Edwin, Director, Division of Select Agents and Toxins, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–A46, Atlanta, GA 30329. Telephone: (404) 718–2000.

SUPPLEMENTARY INFORMATION: On July 16, 2015, HHS/CDC published a proposed rule (80 FR 42079) to add certain influenza virus strains to the list of HHS select agents and toxins. Specifically, HHS/CDC proposed to add the influenza viruses that contain the hemagglutinin (HA) from the Goose Guangdong/1/96 lineage (the influenza viruses that contain the hemagglutinin (HA) from the A/Gs/Gd/1/96 lineage), including wild-type viruses as a non-Tier 1 select agent. HHS/CDC also proposed to add any influenza viruses that contain the HA from the A/Gs/Gd/1/96 lineage that were made transmissible among mammals by respiratory droplets in a laboratory as a Tier 1 select agent.

In response to the NPRM, HHS/CDC received 24 comments from industry, academic institutions, professional organizations, and the public. Commenters expressed concern about balancing the risk of impeding research against the risk of an accidental laboratory incident or act of terrorism. Other commenters were concerned that regulation might further limit the ability of veterinarians, researchers, and farmers to identify and respond to influenza outbreaks. Finally, some commenters pointed out that highly pathogenic avian influenza viruses are already regulated as a Department of Agriculture/Animal and Plant Health Inspection Service (USDA/APHIS) select agent. HHS/CDC agreed with the commenters. Since the publication of the NPRM, the U.S. Government has put in place additional controls regarding the funding and approval of dual use research. In addition, HHS/CDC has worked with USDA/APHIS to ensure that biosafety and biosecurity protocols/measures are in place for regulated entities working with highly pathogenic

avian influenza viruses to mitigate the risk to public health and safety. Thus, HHS/CDC believes the public interest is best served by the withdrawal of the NPRM identified in this document. The withdrawal of the proposed rule identified in this document does not preclude HHS/CDC from initiating future rulemaking concerning the influenza viruses that contain the hemagglutinin (HA) from the Goose Guangdong/1/96 lineage (the influenza viruses that contain the hemagglutinin (HA) from the A/Gs/Gd/1/96 lineage), including wild-type viruses or influenza viruses that contain the HA from the A/Gs/Gd/1/96 lineage that were made transmissible among mammals by respiratory droplets.

The NPRM published on July 16, 2015 (82 FR 42079), is hereby withdrawn.

Dated: November 13, 2017.

Eric D. Hargan,

Acting Secretary, Department of Health and Human Services.

RIN 0920–AA33

Total Inward Leakage Requirements for Respirators

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of proposed rulemaking; withdrawal.

SUMMARY: The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS) announces the withdrawal of its 2009 notice of proposed rulemaking (NPRM). The 2009 NPRM proposed to establish total inward leakage requirements for half-mask, air-purifying particulate respirators approved by NIOSH.

DATES: As of November 17, 2017, the proposed rule published on October 30, 2009, at 74 FR 56141, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Rachel Weiss, Office of the Director, National Institute for Occupational Safety and Health, 1090 Tusculum Avenue, MS–C46, Cincinnati, OH 45226. Telephone: (855) 818–1629 (this is a toll-free number); email: *NIOSHregs@cdc.gov.*

SUPPLEMENTARY INFORMATION: On October 30, 2009, HHS published an NPRM (74 FR 56141) that proposed to establish total inward leakage requirements for half-mask, air-purifying particulate respirators approved by NIOSH under regulations found in 42 CFR part 84. The NPRM included a 60-day comment period closing on December 29, 2009, which was eventually extended to September 30, 2010 (April 20, 2010, 75 FR 20546).

In response to the proposed rule, HHS received comments from five respirator manufacturers, one manufacturer of laboratory test equipment, two labor unions, one trade organization, one state's departments of public health and occupational safety and health, three consulting firms, and three private individuals in the field of respiratory protection. Stakeholders presented evidence that the approval decision outcomes could vary significantly between human subject panels that would be constituted according to the proposed test protocol, and expressed concern that the proposed approval requirements would not improve the performance of NIOSH-approved respirators on the market and might eliminate good-performing respirators from the market. Stakeholders also expressed concern that the cost of conducting inward leakage testing using the protocol proposed by NIOSH would be prohibitive and that costs would likely outweigh benefits.

As a result of the stakeholder input submitted to the docket and during public meetings, NIOSH decided instead to pursue improved inward leakage performance of this class of respirators through participation in national and international consensus standard development efforts, rather than rulemaking. Thus, HHS finds that the public interest is best served by withdrawing the 2009 total inward leakage NPRM. The withdrawal of the 2009 total inward leakage NPRM does not preclude HHS from initiating future rulemaking concerning total inward leakage requirements for half-mask, air-purifying particulate respirators.

The NPRM published on October 30, 2009 (74 FR 56141) is hereby withdrawn.

Dated: November 13, 2017.

Notices

Federal Register

Vol. 82, No. 221

Friday, November 17, 2017

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

November 14, 2017.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 18, 2017 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Summer Meal Study.

OMB Control Number: 0584–NEW.

Summary of Collection: The USDA Summer Food Service Program (SFSP) and the National School Lunch Program Seamless Summer Option (SSO) provide healthy meals and snacks to children through 18 years of age, in low-income areas during summer months when school is not in session. Legislation requires programs participating in the SFSP or SSO to participate in program research and evaluation (Section 305 of the Healthy Hunger Free Kids Act).

Need and Use of the Information: In July 2016, the programs served 3.85 million summer meals to participating children. However, summer meals reach only a small percent of the children receiving free or reduced price meals during the school year. This study will help identify strategies to increase participation in summer meals as well as assess the nutritional quality of the meals served to children.

Description of Respondents: Individuals/Households (112,783); Business-not-for-profit (734) and State, Local & Tribal agencies (1,142).

Number of Respondents: 114,659.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 215,196.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Black Hills National Forest Advisory Board

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Black Hills National Forest Advisory Board (Board) will meet in Rapid City, South Dakota. The Board is established consistent with the Federal Advisory Committee Act of 1972, the Forest and Rangeland Renewable Resources Planning Act of 1974, the National Forest Management Act of 1976, and the Federal Public Lands Recreation Enhancement Act. Additional information concerning the Board, including the meeting summary/minutes, can be found by visiting the Board's Web site at: *http://www.fs.usda.gov/main/blackhills/workingtogether/advisorycommittees.*

DATES: The meeting will be held on Wednesday, January 10, 2018, at 1:00 p.m.

All meetings are subject to cancellation. For updated status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Forest Service Center, 8221 Mount Rushmore Road, Rapid City, South Dakota.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION.** All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the Black Hills National Forest Supervisor's Office. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Scott Jacobson, Committee Coordinator, by phone at 605–440–1409 or by email at *sjjacobson@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to provide:

(1) Information Topic: FY 2018 Forest Budget Overview;

(2) Pile burning update;

(3) Over snow use;

(4) Recreation Site Analysis (RSA) update;

(5) Black Hills Resilient Landscape Project update; and

(6) Mountain pine beetle brood survey report.

The meeting is open to the public. If time allows, the public may make oral statements of three minutes or less. Individuals wishing to make an oral statement should submit a request in writing by December 26, 2017, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Board may file

written statements with the Board's staff before or after the meeting. Written comments and time requests for oral comments must be sent to Scott Jacobson, Black Hills National Forest Supervisor's Office, 1019 North Fifth Street, Custer, South Dakota 57730; by email to *sjjacobson@fs.fed.us,* or via facsimile to 605–673–9208.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: October 24, 2017.

Chris French,

Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF COMMERCE

Census Bureau

Proposed Information Collection; Comment Request; American Community Survey Methods Panel Tests

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: To ensure consideration, written comments must be submitted on or before January 16, 2018.

ADDRESSES: Please direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *PRAcomments@doc.gov*). You may also submit comments, identified by Docket number USBC–2017–0006, to the Federal e-Rulemaking Portal: *http://www.regulations.gov.* All comments received are part of the public record. No comments will be posted to *http://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Robin A. Pennington, U.S. Census Bureau, Decennial Census Management Division, 4600 Silver Hill Rd., Washington, DC 20233, or email at *Robin.A.Pennington@census.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The American Community Survey (ACS) collects detailed socioeconomic data from about 3.5 million addresses in the United States and 36,000 in Puerto Rico each year. The ACS also collects detailed socioeconomic data from about 195,000 residents living in Group Quarters (GQ) facilities. Resulting tabulations from this data collection are provided on a yearly basis. The ACS allows the Census Bureau to provide timely and relevant housing and socioeconomic statistics, even for small geographies.

An ongoing data collection effort with an annual sample of this magnitude requires that the ACS continue research, testing, and evaluations aimed at improving data quality, achieving survey cost efficiencies, and improving ACS questionnaire content and related data collection materials. The ACS Methods Panel is a research program designed to address and respond to survey issues and needs. From 2018 to 2021, the ACS Methods Panel may include testing methods for increasing survey efficiencies, reducing survey cost, lessening respondent burden, improving response rates, and improving data quality.

At this time, plans are in place to propose several tests: Self-response mail messaging tests, a respondent burden field test, testing the use of administrative data, GQ testing, and two content tests. Since the ACS Methods Panel is designed to address emerging issues, we may conduct additional testing as needed. Any additional testing would focus on methods for reducing data collection costs, improving data quality, improving the respondent experience, revising content, or testing new questions that have an urgent need to be included on the ACS.

In response to declining response rates and increasing costs, the Census Bureau plans to study methods to increase self-response, the least expensive mode of data collection. The Census Bureau currently sends up to five mailings to a sampled address to inform the occupants that their address has been selected and to encourage them to respond to the ACS. The proposed tests would include changes to messages included in the mailings to motivate the public to respond to the ACS. The proposed tests would also include modifications to the materials, including the mailing type (for example, sending letters versus postcards). Changes to the number of mailings or the timing of the mailings may be explored. The Census Bureau is also considering testing automated phone reminders.

In 2014, the ACS conducted a comprehensive content review to ensure that only the information needed is requested and that the justifications provided by federal agencies for the ACS questions are current and valid (Chappell and Obenski, 2014). The Census Bureau takes very seriously respondent burden and concerns and recognizes that the content review process was only an initial step to addressing them. The Census Bureau has worked hard to identify a range of possibilities for reducing perceived respondent burden while still maintaining the irreplaceable quality and richness of ACS data (Hughes et al., 2015, Griffin and Hughes, 2013, Hughes et al., 2016, Heimel et al., 2016, Oliver et al., 2016). In a workshop held in 2016, the National Academies of Science Committee on National Statistics recommended identifying a way to quantify or measure respondent burden (National Academies of Sciences, Engineering, and Medicine, 2016). The Census Bureau has begun work to understand respondents' experience responding to the ACS through focus groups and cognitive testing. The next step for this work is to conduct a field test, implementing questions to measure respondent burden.

The Census Bureau has made significant progress exploring the use of administrative data in surveys and censuses, potentially as a substitute for questions asked of respondents. Administrative data refer to data collected by government agencies for the purposes of administering programs or providing services. The Census Bureau has evaluated the availability

and suitability of several different data sources for use in the ACS on telephone service, the year a residence was built, condominium status, income, residence one year ago, and self-employment income. We are currently exploring administrative data use for property values, property taxes, and acreage. Additionally, we plan to evaluate the quality, coverage, and feasibility of using administrative records in lieu of enumeration for institutional GQs (U.S. Census Bureau, 2017). In addition to replacing questions on the survey, administrative data may be used to reduce burden of existing questions by allowing for modification of the questions. For example, the ACS currently asks respondents to provide their total income for the past 12 months as well as income received from various sources (for example, wages, interest, retirement income). We are currently cognitively testing modifications to the income questions, including changing the reference year from the past 12 months to the previous calendar year, as well as only asking respondents if income was received from various sources rather than the amount. As a continuation of this research, the Census Bureau proposes a field test of revised content, for income as well as other topics both for the housing unit questionnaire as well as the GQ questionnaire. Some questions may be modified while others would be removed.

The ACS samples about 18,000 GQ facilities each year. A GQ is a place where people live or stay, in a group living arrangement, which is owned or managed by an entity or organization providing housing and/or services for the residents. There are two categories of GQs: Institutional and non-institutional. Institutional GQs include places such as correctional facilities and nursing homes. Non-institutional GQs include college housing, military barracks, and residential treatment centers. Most interviews conducted in GQs are interviewer-administered (over 90 percent of interviews in institutional GQs and just under 75 percent in non-institutional GQs), but some GQ respondents self-respond using a paper questionnaire. The Census Scientific Advisory Committee Working Group on Group Quarters in the ACS recommended that the Census Bureau consider making an ''internet version of the ACS available to non-institutional GQ residents, especially in college dorms, military barracks, and group homes'' (National Academies of Sciences, Engineering, and Medicine, 2016). Additional support was identified for this in a workshop held in 2016 with the National Academies of Science Committee on National Statistics. The Census Bureau proposes a field test of an internet self-response GQ form for residents in non-institutional GQs.

Working through the Office of Management and Budget (OMB) Interagency Committee for the ACS, the Census Bureau will solicit proposals from other Federal agencies to change existing questions or add new questions to the ACS. The Census Bureau proposes testing any new or revised questions in one of two content tests. A content test using all modes of data collection will be conducted in 2021. Conducting a self-response only content test prior to 2021 allows the Census Bureau to be more agile in reacting to changes in society and legislation. The objective of both content tests is to determine the impact of changing question wording and response categories, as well as redefining underlying constructs, on the quality of the data collected. The Census Bureau proposes to evaluate changes to current questions by comparing the revised questions to the current ACS questions. For new questions, the Census Bureau proposes to compare the performance of two versions of any new questions and benchmark results to other well-known sources of such information.

II. Method of Collection

Self-Response Mail Messaging Tests—We will use the same self-response modes we offer in ACS production data collection, that is, internet and a mail-back paper questionnaire. No interviewer-administered interviews are necessary for these tests. Different strategies to encourage self-response may be used, including changes to the number and timing of the mailings, the messages and materials included in each mailing, as well as automated telephone reminders. Testing is usually conducted with split-sample experiments, using current ACS production materials as the control. The Census Bureau expects to conduct up to four self-response mail messaging tests each year.

Respondent Burden Field Test—The Census Bureau proposes adding several optional questions about the respondent's perception of burden at the end of the ACS interview. The questions would allow respondents the opportunity to give feedback after completing the ACS and are intended to measure the burden of the survey, including the contacts we made to reach the respondent, the time it took to complete the survey, and how difficult and sensitive it was for the respondent to answer the questions. The questions would be asked of respondents across all modes of data collection: Internet, paper questionnaires, and interviewer-administered.

Testing the Use of Administrative Data in Housing Units (HUs) and GQs—We will test replacing or substituting all or parts of the ACS with administrative

data, which could make it possible to remove or modify the existing questions on the questionnaire. Respondents could be presented with a new version of the questionnaire with some questions not asked and others modified, as compared to production ACS. Evidence suggests that respondents who respond to the ACS using different modes of data collection (internet, paper questionnaire, and interviewer-administered) have different socioeconomic characteristics. Therefore, this test will include all modes of data collection. This test would include respondents in both HUs and GQs.

Group Quarters Test—A sample of GQ respondents will be given the option of completing the survey via self-response using an internet instrument. We would evaluate the quality of the data received from the internet compared to traditional data collection methods for GQs (paper questionnaires and interviewer-administered) as well as assess operational issues with offering the internet option, including feedback from interviewers.

Content Tests—The self-response content test will include internet and paper-questionnaires for data collection. Additionally, assistance over the phone will be offered to respondents, which can result in an interview being conducted. These interviews are considered self-response in the ACS. The test will be a split-sample experiment with some respondents assigned to receive current production ACS content and some respondents assigned to receive new and revised content. Additionally, a follow-up reinterview may be conducted with all households who responded to measure response burden as well as response bias or response variance. Comparisons will be made between the experimental treatments to determine whether the new or revised content produces better data quality and/or reduces respondent burden. The 2021 ACS Content Test will be similar to the self-response content test in that it will be a split-sample experiment with a follow-up reinterview. However, this test will include all modes of data collection (internet, mail, and interviewer-administered).

III. Data

OMB Control Number: 0607–0936.

Form Number(s): ACS–1, ACS–1(GQ), ACS–1(PR)SP, ACS CAPI(HU) and ACS RI(HU).

Type of Review: Regular submission.

Affected Public: Individuals and households.

Estimated Number of Respondents:

Self-Response Mail Messaging Tests—We estimate that each of the self-response mail messaging tests will include 60,000 respondents. We anticipate there will be up to 14 tests across the 3-year period.

Respondent Burden Field Test—100,000.

Testing the Use of Administrative Data—100,000.

Self-Response Content Test—100,000 respondents plus 63,000 respondents in the follow-up reinterview.

2021 ACS Content Test—100,000 respondents plus 83,000 respondents in the follow-up reinterview.

Estimated Time per Response:

Self-Response Mail Messaging Tests—40 minutes.

Respondent Burden Field Test—50 minutes (10 minutes for the optional follow-up questions).

Testing the Use of Administrative Data in HUs and GQs—40 minutes.

Group Quarters Test—40 minutes (includes both the interview with the facility manager and the interview itself).

Self-Response Content Test—40 minutes for the initial interview plus 20 minutes for the follow-up reinterview.

2021 ACS Content Test—40 minutes for the initial interview plus 20 minutes for the follow-up reinterview.

Estimated Total Annual Burden Hours: 297,445.

Test	Estimated number of respondents	Estimated time per response (in minutes)	Total burden hours
2018 Self-Response Mail Messaging Tests.	Test A—60,000	Test A—40	Test A—40,000.
	Test B—60,000	Test B—40	Test B—40,000.
2019 Self-Response Mail Messaging Tests.	Test A—60,000	Test A—40	Test A—40,000.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Departmental PRA Lead, Office of the Chief Information Officer.

Foreign-Trade Zones Board

[B–69–2017]

Foreign-Trade Zone (FTZ) 52—Suffolk County, New York; Notification of Proposed Production Activity; Estee Lauder Inc., (Hair Straightening Styling Balm), Melville, New York

Estee Lauder Inc. (Estee Lauder) submitted a notification of proposed production activity to the FTZ Board for its facilities in Melville, New York within FTZ 52. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 2, 2017.

Estee Lauder already has authority to manufacture and distribute skin care, fragrance, and cosmetic products within FTZ 52. The current request would add a finished product (hair straightening styling balm) to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the finished product described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Estee Lauder from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, for foreign-status materials/ components in the existing scope of authority, Estee Lauder would be able to choose the duty rate during customs entry procedures that applies to hair straightening styling balm (duty-free). Estee Lauder would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is December 27, 2017.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the "Reading Room" section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Juanita Chen at *Juanita.Chen@trade.gov* or (202) 482–1378.

Dated: November 13, 2017.

Andrew McGilvray,

Executive Secretary.

Certain Steel Nails From the Socialist Republic of Vietnam: Notice of Rescission of Countervailing Duty Administrative Review, 2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is rescinding the administrative review of the countervailing duty (CVD) order on certain steel nails (steel nails) from the Socialist Republic of Vietnam (Vietnam) for the period January 1, 2016, to December 31, 2016, based on the timely withdrawal of the request for review.

DATES: Applicable November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Yasmin Bordas, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3813 and (202) 482–7438, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 3, 2017, the Department published in the **Federal Register** a notice of opportunity to request an administrative review of the CVD order on steel nails from Vietnam for the period January 1, 2016, to December 31, 2016.[1] On July 31, 2017, the Department received a timely request, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), from Mid Continent Steel & Wire Inc. (the petitioner) to conduct an administrative review of this CVD order with respect to 14 companies.[2] Based upon this request, on September 13, 2017, in accordance with section 751(a) of the Act, the Department published in the **Federal Register** a notice of initiation of administrative review for this CVD order.[3] On September 28, 2017, the petitioner timely withdrew its request for an administrative review for each of the 14 companies.[4]

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of the notice of initiation of the requested review. As noted above, the petitioner withdrew its request for review by the 90-day deadline. No other party requested an administrative review. Accordingly, we are rescinding the administrative review of the CVD order on steel nails from Vietnam covering the period January 1, 2016, to December 31, 2016.

Assessment

The Department will instruct U.S. Customs and Border Protection (CBP) to assess CVDs on all appropriate entries at a rate equal to the cash deposit of estimated CVDs required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2016, to December 31, 2016, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of this notice in the **Federal Register**.

[2] *See* Letter from the petitioner re: Certain Steel Nails from Vietnam: Request for Administrative Reviews, dated July 31, 2017.

[3] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 82 FR 42974 (September 13, 2017) (Initiation Notice).

[4] *See* Letter from the petitioner re: Certain Steel Nails from Vietnam: Withdrawal of Request for Administrative Reviews, dated September 28, 2017.

Notification to Importers

This notice serves as the only reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the presumption that reimbursement of the countervailing duties occurred and the subsequent assessment of doubled countervailing duties.

Notification Regarding Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under an APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction. This notice is issued and published in accordance with sections 751 of the Act and 19 CFR 351.213(d)(4).

Dated: November 13, 2017.

James Maeder,

Acting Deputy Assistant Secretary for Antidumping/Countervailing Duty Operations Enforcement and Compliance (E&C).

DEPARTMENT OF COMMERCE

International Trade Administration

Notice of Meeting: Summit on Trade-Related Standards Issues

ACTION: Request for public comments and notice of opportunity to apply to participate in an internal International Trade Administration summit on trade-related standards issues.

SUMMARY: The Department of Commerce International Trade Administration (ITA) is seeking input from U.S. stakeholders (companies, private sector organizations and trade associations active in trade-related standards work) on standards, conformity assessment and regulatory trends and challenges in foreign markets and the assistance they require from ITA to effectively address standards-related trade barriers and trends to take advantage of export opportunities. ITA will use this input in reviewing how to improve services and programs to best meet the needs of U.S. stakeholders in the standards area. In addition, ITA will convene an internal summit on how to improve such services and programs on March 6–7, 2018 in Washington, DC, and is soliciting private sector requests for limited opportunities to participate in portions of the summit.

DATES: Although input is always welcome, for consideration as part of the immediate review, submit comments by December 18, 2017. Requests to participate in the March 6–7, 2018 ITA internal summit also must be received by COB on December 18, 2017.

ADDRESSES: Comments can be submitted online or in writing. Written submissions should be directed to Renee Hancher, Office of Standards and Investment Policy, Industry and Analysis, U.S. Department of Commerce, Room 28019, 14th and Constitution Avenue NW., Washington, DC 20230. Online submissions should be submitted using *http://www.regulations.gov.* To ensure the timely receipt and consideration of comments, ITA strongly encourages commenters to make online submissions using *http://www.regulations.gov.* Comments should be submitted under docket ITA–2017–0007.

FOR FURTHER INFORMATION CONTACT: Contact Renee Hancher in the Office of Standards and Investment Policy, Industry and Analysis, International Trade Administration, by telephone at (202) 482–3493 (this is not a toll-free number) or email at *Renee.Hancher@trade.gov.*

SUPPLEMENTARY INFORMATION:

Background: The International Trade Administration (ITA) is the premier resource for American companies competing in the global marketplace. ITA has more than 2,200 employees assisting U.S. exporters in more than 100 U.S. cities and 75 markets worldwide. For more information on ITA visit *www.trade.gov.* Additional information about ITA's standards activities is available at *http://www.trade.gov/td/standards/index.html.*

Request for Input: ITA is currently reviewing its trade-related standards services and programs in support of U.S. stakeholders to ensure that the services and assistance provided best meet the needs of U.S. stakeholders and support the expansion of the U.S. economy and creation of U.S. jobs. Trade-related standards work includes work related to the adoption and recognition of standards; standards dialogues and other bilateral and regional engagements with trading partners; preparation of standards information in ITA publications such as Top Market reports and Country Commercial Guides; and work to address adoption, implementation, and enforcement of technical regulations and conformity assessment procedures inconsistent with World Trade Organization and free trade agreement obligations. ITA is specifically seeking information on trade-related standards trends in foreign markets, the challenges U.S. exporters are encountering in those markets, and the assistance needed from the U.S. Government, and specifically ITA, to address those challenges and take advantage of export opportunities. ITA will use this input in reviewing how to improve ITA standards-related services and programs to best meet the needs of U.S. stakeholders, including during an internal summit of ITA staff working on trade-related standards issues on March 6–7, 2018 in Washington, DC.

Comments submitted may include information about key standards trends affecting the global competitiveness of U.S. industry; stakeholder experiences, if any, with ITA services that aid stakeholders in understanding and acting on standards-related trade and regulatory issues; and suggestions for improving ITA services in the standards area. Respondents do not need to have detailed knowledge of or experience with ITA standards-related services, but those that do may note this in their submissions.

Submitting Comments Using http://www.regulations.gov: To find the correct docket, enter ITA–2017–0007 in the ''Enter Keyword or ID'' window at the *http://www.regulations.gov* home page and click ''Search.'' The site will provide a search-results page listing all documents associated with the docket number. Find a reference to this notice by selecting ''Notice'' under ''Document Type'' on the search-results page, and click on the link entitled ''Comment now!'' The *http://www.regulations.gov* Web site provides the option of making submissions by filling in a comment field, or by attaching a document. ITA prefers submissions to be provided in an attached document. (For further information on using *http://www.regulations.gov,* please consult the resources provided on the Web site by clicking on the ''Help'' tab.)

Do not include any privileged or confidential business information in comments submitted. The file name should begin with the character ''P''

(signifying that the comments contain no privileged or confidential business information and can be posted publicly), followed by the name of the person or entity submitting the comments. Written submissions should include an original and five (5) copies.

Please do not attach separate cover letters to electronic submissions; rather, include any information that might appear in a cover letter in the comments themselves. Similarly, to the extent possible, please include any exhibits, annexes, or other attachments in the same file as the submission itself, not as separate files.

Opportunity to present during the ITA Internal Summit: The Summit will convene ITA staff from headquarters and the domestic and foreign fields to develop recommendations for improving standards-related services and programs for ITA stakeholders. It will include ''open sessions'' with private sector stakeholders where they may share their priorities and recommendations for ITA's work on trade-related standards issues. To accommodate as many stakeholders as possible, the time per stakeholder will be limited. Stakeholders interested in presenting during a summit open session must apply by December 18, 2017, identifying the name and address of the proposed speaker and including a brief description of the stakeholder interest and intended remarks. Stakeholders are limited to one presenter per company or organization.

In seeking private sector presenters, ITA will consider factors such as: (1) Frequency and type of standards-related trade barriers experienced with the goal of selecting presenters with significant experience working to overcome standards-related barriers in foreign markets, and whose experience represents the spectrum of such barriers experienced by U.S. exporters (*e.g.,* challenges with standards development, testing and conformity assessment, and meeting standards-related regulatory requirements in foreign markets); and (2) balance of industries and roles with the goal of selecting presenters that represent a mix of industries affected by standards-related trade barriers, and who are conversant on issues affecting U.S. stakeholders/exporters (standards development, conformity assessment, and technical regulations).

Chris Rosettie,

Director, Office of Standards and Investment Policy.

Light-Walled Rectangular Pipe and Tube From Mexico: Initiation and Expedited Preliminary Results of Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Department) is simultaneously initiating and issuing the preliminary results of a changed circumstances review (CCR) of the antidumping duty order on light-walled rectangular pipe and tube (LWRPT) from Mexico, consistent with section 751(b) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.216 and 351.221(c)(3)(ii). Based on the information on the record, we preliminarily determine that Perfiles LM, S.A. de C.V. (Perfiles) is the successor-in-interest to Perfiles y Herrajes LM, S.A. de C.V. (Perfiles y Herrajes). Interested parties are invited to comment on these preliminary results.

DATES: Applicable November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Madeline R. Heeren, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–9179.

SUPPLEMENTARY INFORMATION:

Background

On August 5, 2008, the Department published the antidumping duty order on LWRPT from Mexico.[1] On July 31, 2017, Perfiles y Herrajes informed the Department that, effective July 11, 2017, it had changed its name to '' Perfiles LM, S.A. de C.V.,'' (*i.e.,* Perfiles) and requested that the Department conduct a CCR under 19 CFR 351.216(b) to determine that Perfiles is the successor-in-interest to Perfiles y Herrajes for purposes of determining Perfiles' antidumping duty cash deposits and liabilities.[2]

On August 17, 2017, the Department declined to initiate the CCR that Perfiles y Herrajes requested, citing the need for additional information pertaining to any changes in management, production facilities, customers, and suppliers.[3] Therefore, the Department issued Perfiles y Herrajes a questionnaire. On October 2, 2017, Perfiles y Herrajes filed its response, in which it provided additional information to support its request.[4] We have received no comments from any other interested party.

Scope of the Review

The merchandise subject to this order is certain welded carbon-quality light-walled steel pipe and tube, of rectangular (including square) cross section, having a wall thickness of less than 4 mm.

The term carbon-quality steel includes both carbon steel and alloy steel which contains only small amounts of alloying elements. Specifically, the term carbon-quality includes products in which none of the elements listed below exceeds the quantity by weight respectively indicated: 1.80 percent of manganese, or 2.25 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.15 percent vanadium, or 0.15 percent of zirconium.

The description of carbon-quality is intended to identify carbon-quality products within the scope. The welded carbon-quality rectangular pipe and tube subject to this order is currently classified under the Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7306.61.50.00 and 7306.61.70.60. While HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this order is dispositive.[5]

[1] *See Light-Walled Rectangular Pipe and Tube from Mexico, the People's Republic of China, and the Republic of Korea: Antidumping Duty Orders; Light-Walled Rectangular Pipe and Tube from the Republic of Korea: Notice of Amended Final Determination of Sales at Less Than Fair Value,* 73 FR 45403 (August 5, 2008) (*Order*).

[2] *See* Letter, ''Light-Walled Rectangular Pipe and Tube from Mexico—Notice of Change in Company Name,'' dated July 31, 2017 (CCR Request).

[3] *See* Letter, ''Light-Walled Rectangular Pipe and Tube from Mexico: Antidumping Duty Changed Circumstances Review Deficiency Questionnaire,'' dated August 17, 2017 (CCR Questionnaire).

[4] *See* Letter, ''Light-Walled Rectangular Pipe and Tube from Mexico—Response to August 17 Questionnaire,'' dated October 2, 2017 (CCR Questionnaire Response).

[5] For a complete description of the scope of the order, *see* Memorandum, ''Light-Walled Rectangular Pipe and Tube from Mexico: Initiation and Expedited Preliminary Results of Changed Circumstances Review,'' dated concurrently with, and hereby adopted by, these preliminary results (Preliminary Decision Memorandum).

Initiation of Changed Circumstances Review

Pursuant to section 751(b)(1) of the Act and the Department's regulations (19 CFR 351.216 and 351.221(c)(3)), the Department will conduct a CCR upon receipt of information concerning, or a request from an interested party for a review of, an order which shows changed circumstances sufficient to warrant a review of the order. Generally, in the past, the Department has used CCRs to address the applicability of cash deposit rates after there have been changes in the name or structure of a respondent, such as a merger or spinoff (*i.e.,* successor-in-interest, or successorship determinations).[6]

Perfiles y Herrajes states that, effective July 11, 2017, Perfiles y Herrajes changed its name to Perfiles.[7] Consistent with Department practice, as further discussed in the Preliminary Decision Memorandum, we find that the information submitted by Perfiles y Herrajes demonstrates changed circumstances sufficient to warrant a review.[8] Therefore, in accordance with section 751(b)(1) of the Act and 19 CFR 351.216(d), the Department is initiating a CCR to determine whether Perfiles is the successor-in-interest to Perfiles y Herrajes.

Preliminary Results

When it concludes that expedited action is warranted, the Department may publish the notice of initiation and preliminary results of a CCR in a single notice.[9] The Department has combined the notice of initiation and preliminary results in successor-in-interest cases when sufficient documentation has been provided supporting the request to make a preliminary determination.[10] In this instance, because the record contains information necessary to support the request for a preliminary determination, we find that expedited action is warranted, and we are combining the notice of initiation and the notice of preliminary results, in accordance with 19 CFR 351.221(c)(3)(ii).

In a CCR, we generally consider a company to be the successor-in-interest to another company for antidumping cash deposit purposes if the operations of the successor-in-interest are not materially dissimilar from those of its predecessor.[11] In making this determination, the Department examines a number of factors including, but not limited to, changes in: (1) Management; (2) production facilities; (3) suppliers; and (4) customer base.[12] While no one or several of these factors will necessarily provide a dispositive indication of succession, the Department will generally consider one company to be the successor-in-interest to another company if its resulting operation is essentially the same as that of its predecessor.[13] Thus, if the evidence demonstrates that, with respect to the production and sale of the subject merchandise, the new company operates as the same business entity as the prior company, the Department will assign the new company the cash deposit rate of its predecessor.[14]

In its CCR Questionnaire Response, Perfiles y Herrajes provided evidence demonstrating that Perfiles' operations are not materially dissimilar from those of its predecessor, Perfiles y Herrajes.[15] Specifically, the record indicates that there have not been any material changes to management,[16] production facilities,[17] suppliers,[18] or customer base.[19] Based on the foregoing findings, which are explained in greater detail in the Preliminary Decision Memorandum,[20] the Department preliminarily determines that Perfiles is the successor-in-interest to Perfiles y Herrajes and, as such, it is entitled to Perfiles y Herrajes' antidumping cash deposit rate with respect to entries of subject merchandise. Should our final results remain the same as these preliminary results, we will instruct U.S. Customs and Border Protection to suspend liquidation of entries of LWRPT produced and/or exported by Perfiles and apply the antidumping cash deposit rate applicable to Perfiles y Herrajes, effective the date of publication of the final results.

Public Comment

Interested parties may submit case briefs not later than 30 days after the date of publication of this notice.[21] Rebuttal briefs, limited to issues raised in the case briefs, may be filed by no later than five days after the deadline for filing case briefs.[22] Parties who submit case or rebuttal briefs in this CCR are requested to submit with each argument: (1) A statement of the issue; and (2) a brief summary of the argument with an electronic version included.[23]

Any interested party may request a hearing within 30 days of publication of this notice.[24] Hearing requests should contain the following information: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230 in a room to be determined.[25]

All submissions, with limited exceptions, must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). An electronically filed document must be received successfully in its entirety by 5 p.m. Eastern Time (ET) on the due date. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with the APO/Dockets Unit in Room 18022 and stamped with the date and time of receipt by 5 p.m. ET on the due date.[26]

Unless extended, consistent with 19 CFR 351.216(e), we intend to issue the final results of this CCR no later than 270 days after the date on which this review was initiated or within 45 days if all parties agree to the outcome of the review. We intend to issue and publish this initiation and preliminary results

International Trade Administration

[A–570–918]

Steel Wire Garment Hangers From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2015–2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 9, 2017, the Department of Commerce (Department) published in the **Federal Register** the *Preliminary Results* of the administrative review of the antidumping duty order on Steel Wire Garment Hangers from the People's Republic of China (PRC) covering the period October 1, 2015, through September 30, 2016. This review covered Hangzhou Yingqing Material Co. Ltd. and Hangzhou Qingqing Mechanical Co. Ltd. (collectively, Yingqing), and Shanghai Wells Hanger Co., Ltd./Hong Kong Wells Ltd. (collectively, Shanghai Wells).

The Department gave interested parties an opportunity to comment on the *Preliminary Results,* but we received no comments. Hence, the final results are unchanged from the *Preliminary Results* and we continue to find that Shanghai Wells sold merchandise at prices below the normal value and Yingqing is not eligible for a separate rate during the period of review.

DATES: Applicable November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Katrina Clemente, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0783.

SUPPLEMENTARY INFORMATION:

Background

On August 9, 2017, the Department published the *Preliminary Results* and gave interested parties an opportunity to comment.[1] The Department received no comments. The Department conducted this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The merchandise subject to the order is steel wire garment hangers, fabricated from carbon steel wire, whether or not galvanized or painted, whether or not coated with latex or epoxy or similar gripping materials, and/or whether or not fashioned with paper covers or capes (with or without printing) and/or nonslip features such as saddles or tubes. These products may also be referred to by a commercial designation, such as shirt, suit, strut, caped, or latex (industrial) hangers. Specifically excluded from the scope of the order are wooden, plastic, and other garment hangers that are not made of steel wire. Also excluded from the scope of the order are chrome-plated steel wire garment hangers with a diameter of 3.4 mm or greater. The products subject to the order are currently classified under HTSUS subheadings 7326.20.0020, 7323.99.9060, and 7323.99.9080.

Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Final Results of Review

In the *Preliminary Results,* the Department determined the following: (1) Shanghai Wells sold merchandise at prices below normal value; and (2) Yingqing is not eligible for a separate rate and, therefore, is a part of the PRC-wide entity.[2] We have not received information contradicting our preliminary finding; thus, the Department finds there is no reason to modify its analysis. Accordingly, no decision memorandum accompanies this **Federal Register** notice. For further details of the issues addressed in this proceeding, *see* the *Preliminary Results.*[3]

PRC-Wide Entity

The Department's policy regarding the conditional review of the PRC-wide entity applies to this administrative review.[4] Under this policy, the PRC-wide entity will not be under review unless a party specifically requests, or the Department self-initiates, a review of the entity. Because no party requested a review of the PRC-wide entity in this review, the entity is not under review and the entity's rate is not subject to change (*i.e.,* 187.25 percent).[5]

Methodology

The Department conducted this review in accordance with section 751(a)(1)(B) of the Act. In the *Preliminary Results,* the Department calculated constructed export prices and export prices in accordance with section 772 of the Act. Because the PRC is a nonmarket economy (NME) within the meaning of section 771(18) of the Act, normal value is calculated in accordance with section 773(c) of the Act. We have not received any information since the issuance of the *Preliminary Results* that provides a basis for reconsidering this determination. For a full description of the methodology underlying our conclusions, *see* the *Preliminary Decision Memorandum,* available at *http://enforcement.trade.gov/frn/.*

Final Results of Review Margin

The Department determines that the following weighted-average dumping margin exists for the POR from October 1, 2015, through September 30, 2016:

Exporter	Weighted-average dumping margin (%)
Shanghai Wells Hanger Co., Ltd./Hong Kong Wells Ltd.[6]	5.02

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), the Department has determined, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review.

[2] *See Preliminary Results,* 82 FR at 37194–95.

[3] *Id.*

[4] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[5] *See Steel Wire Garment Hangers from the People's Republic of China: Final Results of Antidumping Duty Administrative Review, 2012–2013,* 80 FR 13332, (March 13, 2015), and accompanying Issues and Decision Memorandum; see also Preliminary Decision Memorandum.

[6] As previously stated, we continue to find Shanghai Wells Hanger Co., Ltd. and Hong Kong Wells Ltd. (collectively Shanghai Wells) to be a single entity.

The Department applied the assessment rate calculation method adopted in *Final Modification for Reviews, i.e.,* on the basis of monthly average-to-average comparisons using only the transactions associated with that importer with offsets being provided for non-dumped comparisons.[7] Pursuant to the Department's NME practice, for sales that were not reported in the U.S. sales data submitted by companies individually examined during this review, the Department instructs CBP to liquidate entries associated with those sales at the rate for the PRC-wide entity.[8]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) For the company listed above, Shanghai Wells, the cash deposit rate will be that established in the final results of this review (except, if the rate is zero or *de minimis,* then zero cash deposit will be required); (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recently completed segment of this proceeding in which they were reviewed; (3) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be equal to the weighted-average dumping margin for the PRC-wide entity (*i.e.,* 187.25 percent); and (4) for all non-PRC exporters of subject merchandise which have not received their own separate rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice of the final results of this administrative review is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5) and 19 CFR 351.213(h).

Dated: November 13, 2017.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[A–570–952]

Narrow Woven Ribbon With Woven Selvedge From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2015–2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 19, 2017, the Department of Commerce (the Department) published the preliminary results of the 2015–2016 antidumping duty administrative review (AR) of the antidumping duty order on narrow woven ribbon with woven selvedge from the People's Republic of China (PRC), in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act). The period of review (POR) is September 1, 2015, through August 31, 2016. We received no comments from any interested parties. Accordingly, our final results remain unchanged from the preliminary results.

DATES: Effective November 17, 2017.

FOR FURTHER INFORMATION CONTACT: Aleksandras Nakutis, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3147.

SUPPLEMENTARY INFORMATION:

Background

As stated above, on July 19, 2017, the Department published the *Preliminary Results*[1] of the AR of the antidumping duty order on narrow woven ribbon with woven selvedge from the PRC covering the period September 1, 2015, through August 31, 2016, and invited parties to comment on these preliminary results. No parties submitted comments on the *Preliminary Results.*

Scope of the Order

The products covered by the *Order* are narrow woven ribbons with woven selvedge. The merchandise subject to the *Order* is classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) subheadings 5806.32.1020; 5806.32.1030; 5806.32.1050; and 5806.32.1060. Subject merchandise also may enter under HTSUS subheadings 5806.31.00; 5806.32.20; 5806.39.20;5806.39.30; 5808.90.00; 5810.91.00; 5810.99.90; 5903.90.10; 5903.90.25; 5907.00.60l and 5907.00.80 and under statistical categories 5806.32.1080; 5810.92.9080; 5903.90.3090; and 6307.90.9889. Although the HTSUS subheadings are provided for convenience and customs purposes, the written product description in the *Order* remains dispositive.[2]

Continued

Analysis

In the *Preliminary Results,* the Department preliminarily determined that the two companies under review, Huzhou Kingdom Coating Industry Co., Ltd. (Huzhou Kingdom) and Huzhou Unifull Label Fabric Co., Ltd. (Huzhou Unifull), did not establish their eligibility for separate rate status and would be treated as part of the PRC-wide entity. In these final results of review, we have continued to treat these two companies as part of the PRC-wide entity. For further discussion of the issues addressed in this proceeding, *see* the *Preliminary Results* and Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov* and in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Results Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/index.html.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act, and 19 CFR 351.212(b), the Department has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review. We intend to instruct CBP to liquidate POR entries of subject merchandise exported by Huzhou Kingdom and Huzhou Unifull at the PRC-wide entity rate, which is 247.26 percent.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this review for shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date in the **Federal Register** of the final results of the review, as provided by section 751(a)(2)(C) of the Act: (1) For previously investigated or reviewed PRC and non-PRC exporters not named above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (2) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, including Huzhou Kingdom and Huzhou Unifull, the cash deposit rate will be the rate for the PRC-wide entity, which is 247.26 percent; (3) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter that supplied that non-PRC exporter.

These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

This notice of the final results of this antidumping duty administrative review is issued and published in accordance with sections 751(a)(1) and 777(i) of the Act and 19 CFR 351.213 and 19 CFR 351.221(b)(5).

Dated: November 9, 2017.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF824

Western Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting and hearing.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold Hawaii Regional Ecosystem Advisory Committee (REAC) meeting to discuss and make recommendations on fishery management issues in the Western Pacific Region.

DATES: The Hawaii REAC will meet on Friday, December 1, 2017, between 9 a.m. and 4 p.m. Hawaii Standard Time. For specific times and agendas, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: The Hawaii REAC meeting will be held at the Council office, 1164 Bishop St., Suite 1400, Honolulu, HI 96813 and by teleconference and webinar. The teleconference will be conducted by telephone and by web. The teleconference numbers are U.S. toll-free: 1–888–482–3560 or International Access: +1 647 723–3959, and Access Code: 5228220. The webinar can be accessed at: *https://wprfmc.webex.com/join/info.wpcouncilnoaa.gov.*

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; telephone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: Public comment periods will be provided in the agenda. The order in which agenda items are addressed may change. The meetings will run as late as necessary to complete scheduled business.

Schedule and Agenda for the Hawaii REAC Meeting

Friday, December 1, 2017, 9 a.m.—4 p.m.

1. Welcome and Introductions

2. Essential Fish Habitat (EFH)
A. Update on Habitat Program
B. Review of Non-Fishing Impacts to EFH
C. Precious Coral EFH Review
3. Aquaculture Management
4. Public Comment
5. Other Business
6. Discussion and Recommendations

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 14, 2017.

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold meetings of the Personnel Committee (Closed Session); Habitat Protection and Ecosystem-Based Management Committee; Spiny Lobster Committee; Citizen Science Committee; Data Collection Committee; Snapper Grouper Committee; Southeast Data, Assessment and Review (SEDAR) Committee (Partially Closed); Mackerel Cobia Committee, Information and Education Committee; Standard Operating, Policy and Procedure (SOPPs) Committee, and the Executive Finance Committee. The Council will meet as a Committee of the Whole to address the Acceptable Biological Catch (ABC) Control Rule and a meeting of the full Council. A Recreational Reporting Workshop will also be held during the meeting week. The Council will also hold a formal public comment session and take action as necessary.

DATES: The Council meetings will be held from 8 a.m. on Monday, December 4, 2017 until 1 p.m. on Friday, December 8, 2017.

ADDRESSES:

Meeting address: The meeting will be held at the DoubleTree by Hilton Atlantic Beach Oceanfront, 2717 W. Fort Macon Road, Atlantic Beach, NC 28512; phone: (252) 240–1155; fax: (252) 222–4065.

Council address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, SAFMC; phone (843) 571–4366 or toll free (866) SAFMC–10; fax: (843) 769–4520; email: *kim.iverson@safmc.net.* Meeting information is available from the Council's Web site at: *http://safmc.net/meetings/council-meetings/.*

SUPPLEMENTARY INFORMATION:

Public comment: Written comments may be directed to Gregg Waugh, Executive Director, South Atlantic Fishery Management Council (see **ADDRESSES**) or electronically via the Council's Web site at *http://safmc.net/safmc-meetings/council-meetings/.* The public comment form is open for use when the briefing book is posted to the Web site on the Friday, two weeks prior to the Council meeting (11/17/17). Comments received by close of business the Monday before the meeting 11/27/17) will be compiled, posted to the Web site as part of the meeting materials, and included in the administrative record; please use the Council's online form available from the Web site. For written comments received after the Monday before the meeting (after 11/27/17), individuals submitting a comment must use the Council's online form available from the Web site. Comments will automatically be posted to the Web site and available for Council consideration. Comments received prior to noon on Thursday, December 7, 2017 will be a part of the meeting administrative record.

The items of discussion in the individual meeting agendas are as follows:

Personnel Committee (Closed Session), December 4, 2017, 8 a.m. Until 9 a.m.

1. The Personnel Committee will meet in Closed Session to discuss personnel issues and provide recommendations for Council consideration.

Habitat Protection and Ecosystem-Based Management Committee, Monday, December 4, 2017, 9 a.m. Until 11 a.m.

1. The Committee will receive a report from the Habitat Protection and Ecosystem-Based Management Advisory Panel.

2. The Committee will review and approve the Implementation Plan for the Fishery Ecosystem-Based Management Plan (FEP II), review and approve the Road Map for the FEP II, review the Dashboard and Tools for the FEP II, receive an update on the Conservation Blueprint 2.2, and provide guidance.

3. The Committee will receive updates on other Habitat-related issues and provide recommendations as appropriate.

Committee Meeting of the Whole—Acceptable Biological Catch (ABC) Control Rule, Monday, December 4, 2017, 11 a.m. Until 12:00 noon.

1. The Council will meet as a Committee of the Whole to discuss the ABC Control Rule Amendment currently under development and provide guidance to staff.

Spiny Lobster Committee, Monday, December 4, 2017, 1:30 p.m. Until 3 p.m.

1. The Committee will receive an update on the status of 2016/17 catches versus the annual catch limit (ACLs), and review draft options for Spiny Lobster Amendment 13 addressing bullynets and measures recommended by the Florida Fish and Wildlife Conservation Commission (FWC), and provide recommendations as appropriate.

Citizen Science Committee, Monday, December 4, 2017, 3 p.m. Until 4:30 p.m.

1. The Committee will address policy on the Citizen Science Advisory Panel Pool and Action Team appointments and approve for recommendation to Council.

2. The Committee will receive reports from the Citizen Science Action Teams, discuss items brought forward by the Action Teams, and provide guidance to staff as appropriate.

3. The Committee will receive an update on the Citizen Science Program partnerships and Pilot Project and provide guidance to staff as needed.

Data Collection Committee, Monday, December 4, 2017, 4:30 p.m. Until 5:30 p.m.

1. The Committee will receive status reports on the For-Hire Electronic Reporting Amendment, and the Council's Data Collection Pilot Project and Outreach Plan relative to For-Hire Electronic Reporting. The Committee will provide guidance to staff as necessary.

Recreational Reporting Workshop, Tuesday, December 5, 2017 From 8:30 a.m. Until 12 p.m.

1. The Council will receive an update on the red snapper mini-season, and hold a workshop on recreational reporting with presentations on electronic reporting for big game, the iSnapper voluntary reporting program, Tails'n'Scales mandatory reporting program, and state involvement in reporting for the Marine Recreational Informational Reporting Program (MRIP). Discussion of these programs will be held as part of the workshop.

Snapper Grouper Committee, Tuesday, December 5, 2017, 1:30 p.m. Until 5:30 p.m. and Wednesday, December 6, 2017 From 8:30 a.m. Until 4:30 p.m.

1. The Committee will receive updates from NOAA Fisheries on commercial and recreational catches versus quotas for species under ACLs and the status of amendments under formal Secretarial review.
2. The Committee will receive a Report from the Snapper Grouper Advisory Panel.
3. The Committee will receive an overview of draft Amendment 46 addressing measures for red snapper, review options, and provide guidance to staff.
4. The Committee will receive an overview Vision Blueprint Regulatory Amendment 26 addressing recreational management actions and alternatives as identified in the 2016–2020 Vision Blueprint for the Snapper Grouper Fishery Management Plan. The Committee will review the revised actions and alternatives, updated analyses, and purpose and need. The Committee will modify the document as necessary and provide guidance to staff.
5. The Committee will review Vision Blueprint Regulatory Amendment 27 addressing commercial management actions and alternatives, as identified in the 2016–2020 Vision Blueprint for the Snapper Grouper Fishery. The Committee will review recommendations from the Scientific and Statistical Committee (SSC), review revised actions and alternatives, updated analyses, and the purpose and need, modify the document as necessary, and provide guidance to staff.
6. The Committee will receive presentations from NOAA Fisheries on proposed Exempted Fishing Permits for lionfish and provide recommendations as appropriate.
7. The Committee will receive an overview on options for draft Amendment 38 addressing management measures for blueline tilefish, receive a presentation on the benchmark stock assessment (SEDAR 50), review fishing level recommendations from the SSC, modify the amendment as necessary, and provide guidance to staff.
8. The Committee will receive an overview of options for the draft For-Hire Moratorium Amendment, discuss and provide guidance to staff.
9. The Committee will receive SSC fishing level recommendations for red grouper, review management options, and approve the abbreviated framework document for formal Secretarial Review.
10. The Committee will receive an overview from staff on golden tilefish management, review recommendations from the SSC, and provide guidance to staff.
11. The Committee will receive an update on the Wreckfish Individual Transferable Quota (ITQ) review and provide guidance to staff.
12. The Committee will receive an overview of management issues relative to yellowtail snapper, review a response from the Gulf of Mexico Fishery Management Council on a potential joint amendment to examine jurisdictional annual catch limits, and provide guidance to staff.

Formal Public Comment, Wednesday, December 6, 2017, 4:30 p.m.—Public comment will be accepted on items on the Council agenda. The Council is also accepting public comment on Executive Order 13771 (2 for 1 regulations) to identify regulations that are (1) outdated, (2) unnecessary, or (3) ineffective. The Council Chair, based on the number of individuals wishing to comment, will determine the amount of time provided to each commenter.

SEDAR Committee (Partially Closed), Thursday, December 7, 2017, 8:30 a.m. Until 9:30 a.m.

(Closed Session)

1. The Committee will make recommendations for appointments to the Cobia Stock Identification Workshop and for appointments to stock assessments for greater amberjack and red porgy.

(Open Session)

2. The Committee will receive a report from the SSC.
3. The Committee will review Terms of Reference and schedules for greater amberjack and red porgy stock assessments and provide recommendations as appropriate.
4. The Committee will review the SEDAR Steering Committee Report, discuss, and provide guidance as appropriate.

Mackerel Cobia Committee, Thursday, December 7, 2017, 9:30 a.m. Until 12 p.m.

1. The Committee will receive an update on commercial and recreational catches versus quotas for species managed under ACLs and an update on the status of amendments currently under Secretarial review.
2. The Committee will receive an update on development of the Interstate Atlantic Cobia Management Plan from the Atlantic States Marine Fisheries Commission (ASMFC).
3. The Committee will receive an update on the status of a request for recalculation of the 2015 and 2016 recreational landings for Atlantic cobia.
4. The Committee will receive an overview of Coastal Migratory Pelagics Framework Amendment 6 addressing Atlantic king mackerel trip limits, discuss, and provide recommendations for approval for public scoping.
5. The Committee will receive an overview Coastal Migratory Pelagics Amendment 31 addressing proposed management measures for Atlantic cobia, discuss, and provide recommendations for approval for public hearings.

Information and Education Committee, Thursday, December 7, 2017, 1:30 p.m. Until 2 p.m.

1. The Committee will receive a report from the Information and Education Advisory Panel, discuss and provide recommendations to staff as appropriate.

SOPPs Committee, Thursday, December 7, 2017, 2 p.m. Until 3:30 p.m.

1. The Committee will review policies for inclusion in the SOPPs and/or Council Handbook, discuss and provide direction to staff as appropriate.

Executive/Finance Committee, Thursday, December 7, 2017, 3:30 p.m. Until 5:30 p.m.

1. The Committee will receive an overview of the current Magnuson-Stevens Reauthorization efforts, discuss and provide guidance and approval as needed.
2. The Committee receive an update on the current budget status and outlook, discuss and provide guidance as needed.
3. The Committee will receive an overview on materials available for Council meetings, discuss, and provide guidance to staff.
5. The Committee will receive an overview of the System Management Plan Advisory Panel, discuss and provide additional guidance as needed.

Council Session: Friday, December 8, 2017, 8:30 a.m. Until 1 p.m. (Partially Closed Session if Needed)

The Full Council will begin with the Call to Order, adoption of the agenda, announcements and introductions, and presentations.

The Council will receive a Legal Briefing on Litigation from NOAA General Counsel (if needed) during Closed Session. The Council will receive the Executive Director's Report and an update on results from the Northeast Regional Coordinating Council meeting in November. Updates will be provided by NOAA Fisheries including a discussion with Dr. Francisco ''Cisco'' Werner, Chief Science Advisor and Director of Scientific Programs, reports on the status of commercial and recreational catches versus ACLs for species not covered during an earlier committee meeting, status of Recreational and Commercial Quota Monitoring Tables on the NOAA Fisheries' Southeast Regional Office Web site, a turtle release presentation, and discussion of other issues as necessary. The Council will also receive an update on the status of Bycatch Collection Programs and the pending voluntary commercial electronic logbook reporting effort from NOAA Fisheries' Southeast Fisheries Science Center. The Council will review any Exempted Fishing Permits received by NOAA Fisheries as necessary. The Council will receive Committee reports from the Snapper Grouper, Mackerel Cobia, Spiny Lobster, SEDAR, Data Collection, Habitat and Ecosystem-Based Management, Information and Education, Citizen Science, SOPPs, and Executive Finance Committees; a report from the Committee of the Whole (ABC Control Rule); a report from the Recreational Reporting Workshop; review recommendations; and take action as appropriate.

The Council will receive agency and liaison reports; and discuss other business and upcoming meetings.

Documents regarding these issues are available from the Council office (see **ADDRESSES**).

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the council office (see **ADDRESSES**) 3 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council, NEFMC) will hold a three-day meeting to consider actions affecting New England fisheries in the exclusive economic zone (EEZ).

DATES: The meeting will be held on Tuesday, Wednesday, and Thursday, December 5, 6, and 7, 2017, beginning at 9 a.m. on December 5, 8:30 a.m. on December 6, and 8:30 a.m. on December 7.

ADDRESSES: The meeting will be held at the Hotel Viking, 1 Bellevue Avenue, Newport, RI 02840; telephone: (401) 847–3300; online at *www.hotelviking.com.*

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950; telephone: (978) 465–0492; *www.nefmc.org.*

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492, ext. 113.

SUPPLEMENTARY INFORMATION:

Agenda

Tuesday, December 5, 2017

After introductions and brief announcements, the meeting will begin with reports from the Council Chairman and Executive Director, NMFS's Regional Administrator for the Greater Atlantic Regional Fisheries Office (GARFO), liaisons from the Northeast Fisheries Science Center (NEFSC) and Mid-Atlantic Fishery Management Council, representatives from NOAA General Counsel and the Office of Law Enforcement, and staff from the Atlantic States Marine Fisheries Commission (ASMFC) and U.S. Coast Guard. Next, the Council will receive a short briefing from the Northeast Regional Ocean Council on upgrades to the Northeast Ocean Data Portal. The Skate Committee will report next with a final item related to Framework Adjustment 5 to the Northeast Skate Complex Fishery Management Plan (FMP). The Council addressed most of the framework components during its September meeting. During this December meeting, the Council will: (1) Consider options to exempt vessels from skate regulations when fishing exclusively within the Northwest Atlantic Fisheries Organization (NAFO) Regulatory Area; and (2) take final action on the entire framework. Then, ASMFC will brief the Council on the Commission's Draft Addendum XXVI to the Interstate Fishery Management Plan for American Lobster and Addendum III to the Jonah Crab plan. The Council will discuss data collection needs for these fisheries. The Habitat Committee then will provide a short progress report on the Council's Coral Amendment and Clam Dredge Framework, which will be followed by a Bureau of Ocean Energy Management overview of proposed and ongoing offshore wind energy projects in the Northeast.

After the lunch break, GARFO will provide a presentation on the North Atlantic Right Whale Five-Year Review and the reinitiation of formal consultation due to new information on the changed status of right whales. Next, the Atlantic Herring Committee will report on Draft Amendment 8 to the Atlantic Herring FMP. The Council will select preferred alternatives for localized depletion and user conflicts for the amendment and then approve the document for public hearing. The Council debated acceptable biological catch (ABC) control rule alternatives—the other major component of Amendment 8—during its September meeting. The Council also will approve 2019–2021 research priorities for the Atlantic Herring Research Set-Aside

Program. Following these actions, the Council will adjourn for the day.

Wednesday, December 6, 2017

The second day of the meeting will begin with a report from the Northeast Fisheries Science Center on the results of the 2017 operational assessments for 19 of the 20 groundfish stocks managed under the Council's Northeast Multispecies FMP. The Scientific and Statistical Committee (SSC) will report next with overfishing limits (OFLs) and ABCs for the following stocks and fishing years (FY): Atlantic sea scallops for FY 2018 with defaults for FY 2019; northern and southern silver hake and red hake for FY 2018–2020; and all groundfish stocks for 2018–2020 except Georges Bank yellowtail flounder and Atlantic halibut. The Council then will begin its Groundfish Committee report, during which it will take final action on Framework Adjustment 57 to the Northeast Multispecies FMP. The framework includes: (1) 2018–2020 fishery specifications and other management measures; (2) 2018 TACs for U.S./Canada stocks of Eastern Georges Bank cod, Eastern Georges Bank haddock, and Georges Bank yellowtail flounder; (3) Atlantic halibut accountability measures (AMs); (4) recreational management measures; (5) common pool trimester TAC adjustments; (6) southern windowpane flounder AMs; and (7) potential consideration of a Georges Bank cod sub-annual catch limit for the recreational fishery. Also under groundfish, the Council may consider requesting emergency action to reduce catches of Georges Bank cod by implementing additional measures for the recreational fishery.

Following a lunch break, members of the public will have the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. The Council asks the public to limit remarks to 3–5 minutes. Then, the Groundfish Committee report will resume and continue until related business is concluded. The Council next will discuss its plan to provide input to NMFS on regulatory reform as mandated by Executive Orders 13777, 13771, and 13565. At the conclusion of this discussion, the Council will adjourn for the day.

Thursday, December 7, 2017

The third day of the meeting will begin with a discussion of and final action on 2018 Council priorities covering tasks and actions for all committees. Next, the Council will hear from its Scallop Committee and take final action on Framework Adjustment 29 to the Atlantic Sea Scallop FMP. This framework contains: (1) Fishery specifications for the 2018 fishing year and default specifications for 2019; (2) scallop fishery AMs for yellowtail flounder and windowpane flounder; (3) Northern Gulf of Maine Management Area modifications; and (4) measures to modify and/or create access area and open area boundaries consistent with potential changes to habitat and groundfish closed areas under the Council's Omnibus Essential Fish Habitat Amendment 2.

Following a lunch break, the Scallop Committee discussion will continue until business is concluded. The Whiting Committee will report next. The Council will take final action on 2018–2020 specifications for small-mesh multispecies, which include red, silver, and offshore hakes, and then will deliberate Amendment 22 to the Northeast Multispecies FMP, which was developed to consider limiting access to the small-mesh multispecies fishery. The Council will: (1) Consider whether to pursue or drop consideration of triggered possession limit adjustments in the amendment; and (2) approve the draft amendment for public hearing. Next, the Council will take up spiny dogfish to review the previously set 2018 specifications for the fishery and discuss whether to recommend modifications. Finally, the Council will close out the meeting with ''other business.''

Although non-emergency issues not contained on this agenda may come before the Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies (see **ADDRESSES**) at least 5 days prior to the meeting date.

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2017–24961 Filed 11–16–17; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Scientific Research, Exempted Fishing, and Exempted Activity Submissions.

OMB Control Number: 0648–0471.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 49.

Average Hours per Response: 2 hours for a scientific research plan; 40 minutes for an application for an EFP, Display Permit, SRP, LOA, or Shark Research Permit; 1 hour for an interim report; 40 minutes for an annual fishing report; 15 minutes for an application for an amendment; 5 minutes for notification of departure phone calls to NMFS Enforcement; 10 minutes for calls to request and observer; and 2 minutes for ''no-catch'' reports.

Burden Hours: 143.

Needs and Uses: Exempted fishing permits (EFPs), scientific research permits (SRPs), display permits, letters of acknowledgment (LOAs), and shark research fishery permits are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*) and/or the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. 971 *et seq.*). Issuance of EFPs and related permits is necessary for the collection of Highly Migratory Species (HMS) for public display and scientific research that requires exemption from regulations (*e.g.,* seasons, prohibited species, authorized gear, and minimum sizes) that otherwise may prohibit such collection. Display permits are issued for the collection of HMS for the purpose of public display, and a limited

number of shark research fishery permits are issued for the collection of fishery-dependent data for future stock assessments and cooperative research with commercial fishermen to meet the shark research objectives of the Agency.

Affected Public: Business or other for-profit organizations; not-for-profit institutions; state, local or tribal government; federal government.

Frequency: Annually and within 5 days of fishing.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: November 14, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer.

[FR Doc. 2017–24990 Filed 11–16–17; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF819

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scallop Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Thursday, November 30, 2017 at 9 a.m.

ADDRESSES: The meeting will be held at the Hilton Garden Inn Logan Airport, 100 Boardman Street, Boston, MA 02128; Phone: (617) 567–6789.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Committee will review Framework 29 (FW 29) alternatives and analyses, and make final recommendations. FW 29 will set specifications including acceptable biological catch/annual catch limit (ABC/ACLs), Days at Sea (DAS), access area allocations for Limited Access (LA) and Limited Access General Category (LAGC), Total Allowable Catch (TAC) for Northern Gulf of Maine (NGOM) management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2018 and default specifications for fishing year 2019. Make final recommendations for potential FW 29 specifications that includes areas that may open through Omnibus Habitat Amendment 2 (OHA2). The committee will also review FW 29 management measures and make final recommendations. These measures may include, but are not limited to: (1) NGOM management measures; (2) Flatfish accountability measures for Northern windowpane flounder, Georges Bank yellowtail flounder, and Southern New England yellowtail flounder; (3) Measures to modify and/or create access area and open area boundaries, consistent with potential changes to habitat and groundfish closed areas; (4) measures to allocate unused CAI carryover pounds under certain scenarios of OHA2 approval. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF823

Caribbean Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Caribbean Fishery Management Council's (Council) Scientific and Statistical Committee (SSC) will hold a 5-day meeting in December to discuss the items contained in the agenda in the **SUPPLEMENTARY INFORMATION**.

DATES: The meetings will be held from December 4 to December 8, 2017, from 9 a.m. to 5 p.m. These are new dates due to the passing of hurricanes Irma and Maria through Puerto Rico.

ADDRESSES: The meetings will be held at the Council Office, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918–1903, telephone: (787) 766–5926.

SUPPLEMENTARY INFORMATION:

—Call to Order
—Adoption of Agenda
—Overview
  Review outcomes from previous meeting
—Review Acceptable Biological Catch (ABC) Control Rule Language
  Review suggestions from General Counsel and Southeast Fisheries Science Center (SEFSC) on text of Tier 4 of the control rule
  Develop language to define ''consensus'' as used in determining Tier assignments (or otherwise alter language to remove the term)
—*Action 2:* Finalize establishment of stock/stock complexes for each of the Puerto Rico, St. Croix, St. Thomas/St. John Fishery Management Plans (FMPs)
—Determine use of Indicator Species to recommend to the Council
—*Finalize recommendations on:*

—Criteria used to select indicator species
—How indicator species will be used to determine management reference points for stock complexes
—*Action 3:* Management Reference Points for Stocks/Stock complexes in each of the Puerto Rico, St. Thomas/St. John and St Croix FMPs

Tiered ABC Control Rule:
—*Review and finalize Tier assignments (4a or 4b):* Puerto Rico, St. Croix, St. Thomas/St. John
—Define process for determining the scalars used in Tiered ABC Control Rule
—Define process for determining the buffer from the overfishing limit (OFL) to ABC (scientific uncertainty buffer) used in the Tiered ABC Control Rule.
—Choice of scalar and scientific uncertainty buffer for Tiers 4a and 4b for the applicable stocks.

Stocks/stock complexes to which the Tiered ABC CR cannot be applied:
—Recommendations on time series of landings data (year sequences) to establish reference points for the applicable stocks/stock complexes.
—Recommendations on the establishment of the maximum sustainable yield proxy (*e.g.,* mean, median, following the Caribbean Annual Catch Limit Amendments' approach) for the applicable stocks/stock complexes.
—Recommendations on the scientific uncertainty buffer to determine the ABC for the applicable stocks/stock complexes.
—Recommendations to the Caribbean Fishery Management Council
—Other Business

The order of business may be adjusted as necessary to accommodate the completion of agenda items. The meeting will begin on December 4, 2017 at 9 a.m. Other than the start time, interested parties should be aware that discussions may start earlier or later than indicated. In addition, the meeting may be extended from, or completed prior to the date established in this notice.

Special Accommodations

These meetings are physically accessible to people with disabilities. For more information or request for sign language interpretation and other auxiliary aids, please contact Mr. Miguel A. Rolón, Executive Director, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918–1903, telephone: (787) 766–5926, at least 5 days prior to the meeting date.

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2017–24958 Filed 11–16–17; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Economic Value of the Research in the Olympic Coast and Stellwagen Bank National Marine Sanctuaries.

OMB Control Number: 0648–xxxx.

Form Number(s): None.

Type of Request: Regular (request for a new information collection).

Number of Respondents: 106.

Average Hours Per Response: 15 minutes.

Burden Hours: 27.

Needs and Uses: This request is for a new information collection.

NOAA is conducting research to: (1) Identify if the sanctuary helps to attract research or creates value-added to researchers; (2) estimate the economic impacts (jobs, income, output) supported by research that occurs in sanctuaries because of expenditures occurring within local region. Two sites, Olympic Coast National Marine Sanctuary (OCNMS) and Stellwagen Bank National Marine Sanctuary (SBNMS) will be evaluated. The information will aide in SBNMS and OCNMS condition reports. Further, the research will help to provide baseline data for economic impact and contribution of sanctuaries to local area economies.

The required information will involve surveys of researchers (from profit, non-profit and government agencies including local, state, federal and tribal). Information will be obtained on expenditures, sources of funds, non-market value, type of research, technologies used, use of NOAA equipment, reasons for the chosen location, and the researcher's involvement with sanctuary staff.

ONMS will work to identify all researchers who worked within the sanctuary within the past ten years. This will be the population of interest. Sanctuary site staff, literature reviews and the research permit database will be used to identify the population of researchers for each site.

Affected Public: Business or other for-profit; not-for-profit institutions; state, local or tribal government; federal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at *reginfo.gov.* Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: November 14, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF840

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The North Pacific Fishery Management Council (Council) and its advisory committees will meet in December in Anchorage, AK.

DATES: The Council will hold meetings from Monday, December 4 through Tuesday, December 12, 2017. See **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: The meeting will be held at the Anchorage Hilton Hotel, 500 W. 3rd Ave, Anchorage, AK 99501.

Council address: North Pacific Fishery Management Council, 605 W. 4th Ave., Suite 306, Anchorage, AK 99501–2252; telephone: (907) 271–2809.

FOR FURTHER INFORMATION CONTACT: Diana Evans, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION: The Council will begin its plenary session at 8 a.m. in the Aleutian Room on Wednesday, December 6, continuing

through Tuesday, December 12, 2017. The Scientific and Statistical Committee (SSC) will begin at 8 a.m. in the King Salmon/Iliamna Room on Monday, December 4 and continue through Wednesday, December 6, 2017. The Council's Advisory Panel (AP) will begin at 8 a.m. in the Dillingham/Katmai Room on Tuesday, December 5, and continue through Saturday, December 9, 2017. The Halibut Charter Management Committee will meet Monday, December 4, from 9 a.m. to 4 p.m. (Room TBD). The Legislative Committee will meet Tuesday, December 5, 2017, from 1 p.m. to 4 p.m. (Room TBD).

Agenda

Monday, December 4, 2017 Through Tuesday, December 12, 2017

Council Plenary Session: The agenda for the Council's plenary session will include the following issues as well as an executive session. The Council may take appropriate action on any of the issues identified.

(1) Executive Director's Report
(2) Legislative Report
(3) NMFS Management Report (including year-end inseason management report, Final 2018 Observer Annual Deployment Plan, Draft EM Policy Directive (T))
(4) NOAA GC report (including conflict of interest report (T))
(5) NOAA Enforcement Report
(6) ADF&G Report
(7) USCG Report
(8) USFWS Report
(9) Protected Species Report (including bowhead whale entanglement review)
(10) IPHC Report (T)
(11) 2018 Charter Halibut Management Measures
(12) Charter Halibut Permits: Latent Capacity, RQE Ownership Caps
(13) Self-guided Halibut Rental Boats
(14) BSAI Groundfish Harvest Specifications—Final Specs
(15) GOA Groundfish Harvest Specifications—Final Specs
(16) Small Sideboards
(17) Bering Sea Cod Trawl CV Participation
(18) Western GOA Pcod A Season Halibut PSC Rates
(19) Western GOA Pollock C/D Season Timing Chinook PSC
(20) Western GOA Pollock Trip Limits
(21) Stranded Cod in GOA Trawl B Season
(22) Fixed Gear CV Rockfish Retention
(23) Chinook Salmon Excluder EFP Consultation
(24) Staff Tasking

The Advisory Panel will address most of the same agenda issues as the Council.

The SSC agenda will include the following issues:

(1) BSAI Groundfish Harvest Specifications—Final Specifications
(2) GOA Groundfish Harvest Specifications—Final Specifications
(3) Small Sideboards
(4) Chinook Salmon Excluder EFP

In addition to providing ongoing scientific advice for fishery management decisions, the SSC functions as the Council's primary peer review panel for scientific information as described by the Magnuson-Stevens Act section 302(g)(1)(e), and the National Standard 2 guidelines (78 FR 43066). The peer review process is also deemed to satisfy the requirements of the Information Quality Act, including the OMB Peer Review Bulletin guidelines.

The Agenda is subject to change, and the latest version will be posted at *http://www.npfmc.org/*.

Although other non-emergency issues not on the agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 working days prior to the meeting date.

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF825

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Groundfish Advisory Panel to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, November 28, 2017 at 9 a.m.

ADDRESSES: The meeting will be held at the Courtyard Marriott Boston Logan Airport, 225 McClellan Highway, Boston, MA; phone: (617) 569–5250.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Advisory Panel will review Framework Adjustment 57/Specifications and Management Measures, review the draft alternatives under consideration, the Groundfish Plan Development Team's (PDT) impact analysis, and make recommendations on preferred alternatives to the Groundfish Committee. They will also disucss Amendment 23/Groundfish Monitoring and review an updated draft outline prepared by the PDT of the likely range of alternatives and make recommendations to the Committee. The Advisory Panel will also hold a discussion of possible groundfish priorities for 2018 and make recommendations to the Committee. They also plan to discuss several recent Executive Orders that have been issued about streamlining current regulations, and NOAA is seeking public input on the efficiency and effectiveness of current regulations and whether they can be improved. Discuss whether there are any regulations in the Northeast Multispecies fishery management plan that could be eliminated, improved, or streamlined. Other business will be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action

under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date. This meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 14, 2017.

DATES: The meeting will be held on Friday, December 1, 2017, from 10 a.m. to 4 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held at the Hilton Garden Inn BWI Airport, 1516 Aero Drive, Linthicum, MD 21090; telephone: (410)-691–0500.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331 or on their Web site at *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council; telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review and approve the EAFM based risk assessment for the Mid-Atlantic fishery resources which has been under development since early 2017. The Committee will review the final list of elements and the evaluation of risk posed by each element as recommended by Council staff. The Committee will make recommendations to the full Council for consideration at its December meeting in Annapolis, MD.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526–5251, at least 5 days prior to the meeting date.

Dated: November 14, 2017.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XF801

Endangered Species; File Nos. 20590 and 20610

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of applications.

SUMMARY: Notice is hereby given that Nicole Phillips, Ph.D., The University of Southern Mississippi, Department of Biological Sciences, 118 College Drive #5018, Hattiesburg, MS 39406 (File No. 20590) and David Portnoy, Ph.D., Texas A&M University, Corpus Christi, TX 78412 (File No. 20610), have applied in due form for permits to receive and import sawfish and scalloped hammerhead shark samples for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before December 18, 2017.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov,* and then selecting File Nos. 20590 or 20610 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713–0376, or by email to *NMFS.Pr1Comments@noaa.gov.* Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore (File Nos. 20590 or 20610), Malcolm Mohead (File No. 20590), or Erin Markin (File No. 20610), (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

File No. 20590: The applicant (Dr. Phillips) is requesting authorization to import tissue samples from 5 species of listed sawfish including the smalltooth sawfish (*Pristis pectinata*), largetooth sawfish (*P. pristis*), green sawfish (*P. zijsron*), dwarf sawfish (*P. clavata*), and narrow sawfish (*Anoxypristis cuspidate*) to assess the impact of population decline through genetic diversity. This study will use tissue samples obtained opportunistically from saws with known location data held in museums, educational and private collections to: (1) Assess whether there has been a recent loss of genetic diversity in sawfishes globally, and (2) evaluate the long-term survival outlook for sawfishes. The applicant proposes to import tissue samples from up to a total of 500 sawfish specimens, from all species, annually from at least Mexico, Belize, United Arab Emirates, United Kingdom, and Australia to The University of Southern Mississippi for analysis. The requested duration of the permit is five years.

File No. 20610: The applicant (Dr. Portnoy) is requesting authorization to import scalloped hammerhead (*Sphyrna lewini*) tissue in the form of fin clips or small muscle biopsies from Belize (Central & SW Atlantic DPS, up to 50 samples), Trinidad (Central & SW Atlantic DPS, up to 50 samples), Mexico (Eastern Pacific DPS, up to 100 samples; NW Atlantic & GOM DPS, up to 50

samples), Cuba (Central & SW Atlantic DPS, up to 50 samples), and Sierra Leone (Eastern Atlantic DPS, up to 50 samples) for genetic analysis at Texas A&M University in Corpus Christi. These samples would be used as part of a larger project to characterize the stock structure of *S. lewini* populations within the western Atlantic, as well as between the western Pacific and Atlantic, using next generation sequencing techniques. Tissue samples would be from animals that have been previously collected, or will be taken opportunistically as scalloped hammerheads are encountered in fish markets. The requested duration of the permit is five years.

Dated: November 14, 2017.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Alaska Commercial Operator's Annual Report (COAR)

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before January 16, 2018.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *pracomments@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Suja Hall, (907) 586–7462.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

The Alaska Commercial Operator's Annual Report (COAR) is a report that collects harvest and production information broken out by specific criteria such as gear type, area, delivery and product type, and pounds and value. The COAR is due by April 1 of the year following any buying or processing activity.

Any person or company who received a Fisheries Business License from the Alaska Department of Revenue and an Intent to Operate Permit by Alaska Department of Fish and Game (ADF&G) is required to annually submit the COAR to the ADF&G, under Alaska Administrative Code (AAC), chapter 5 AAC 39.130. In addition, any person or company who receives an Exclusive Economic Zone (EEZ)-only permit from ADF&G annually must submit a COAR to ADF&G. Any owner of a catcher/processor or mothership with a Federal permit operating in the EEZ off Alaska is required to annually submit a COAR to ADF&G under 50 CFR 679.5(p).

The COAR contains data on seafood purchasing, production, ex-vessel values, and first wholesale values for seafood products. Containing information from shoreside processors, stationary floating processors, motherships, and catcher/processors, this data collection yields equivalent annual product value information for all respective processing sectors and provides a consistent time series according to which groundfish resources may be managed more efficiently. Use of the information generated by the COAR is coordinated between NMFS and the ADF&G.

II. Method of Collection

The COAR is available in pdf and Microsoft Word formats on the ADF&G Web site at *http://www.adfg.alaska.gov/index.cfm?adfg=fishlicense.coar.* Respondents complete either a paper form or the fillable file available online and submit the form by mail to the ADF&G.

III. Data

OMB Control Number: 0648–0428.

Form Number(s): None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 179.

Estimated Time per Response: 8 hr.

Estimated Total Annual Burden Hours: 1,432.

Estimated Total Annual Cost to Public: $716 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 14, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2017–ICCD–0116]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Gainful Employment Programs—Subpart Q

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 18, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2017–ICCD–0116. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the

Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 216–34, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Gainful Employment Programs—Subpart Q.

OMB Control Number: 1845–0123.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Private Sector; Individuals or Households; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 42,303,576.

Total Estimated Number of Annual Burden Hours: 3,777,952.

Abstract: The Student Assistance General Provisions regulations were amended by adding Subpart Q to Part 668, to establish measures for determining whether certain postsecondary educational programs lead to gainful employment in recognized occupations, and the conditions under which these educational programs remain eligible for student financial assistance programs authorized under Title IV of the Higher Education Act of 1965, as amended (HEA).

On June 16, 2017, the Department of Education (the Department) published a notice in the **Federal Register** announcing the intention to establish a negotiated rulemaking committee to revise the gainful employment regulations published on October 31, 2014. The Department anticipates scheduling the negotiated rulemaking sessions beginning in November or December 2017. There have been no changes to the regulations since the October 31, 2014 regulatory approval.

This clearance package includes §§ 668.405, 668.410, 668.411, 668.413, and 668.414. The burden related to § 668.412 was removed from this collection and applied to information collection 1845–0107 in February 2017 to more accurately associate the requirements of the regulations with the correct collection package.

Dated: November 14, 2017

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2017–ICCD–0117]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Gainful Employment Program—Subpart Q—Appeals for Debt to Earnings Rates

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 18, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2017–ICCD–0117. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 216–34, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Gainful Employment Program—Subpart Q—Appeals for Debt to Earnings Rates.

OMB Control Number: 1845–0122.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Private Sector; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 792.

Total Estimated Number of Annual Burden Hours: 23,860.

Abstract: The Student Assistance General Provisions regulation was amended by adding Subpart Q to Part 668. This subpart applies to postsecondary educational programs that lead to gainful employment (GE) in recognized occupations. 1845–0122 pertains to § 668.406—Appeals for Debt to Earnings (D/E) rates. The regulations allow an institution to submit alternate earnings appeals to challenge the Secretary's determination of a GE program that is failing or in the zone based on the D/E rates calculated for a specific GE program.

On June 16, 2017, the Department of Education (the Department) published a notice in the **Federal Register** announcing the intention to establish a negotiated rulemaking committee to revise the gainful employment regulations published on October 31, 2014. The Department anticipates scheduling the negotiated rulemaking sessions beginning in November or December 2017.

The Department is requesting an extension without change of burden to the currently approved information collection as any new regulations will not be available before the expiration of this current package. There have been no changes to the regulations since the initial approval of the information collection on November 3, 2014.

Dated: November 14, 2017.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Gainful Employment Program—Subpart R—Cohort Default Rates

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 18, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2017–ICCD–0118. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 216–34, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Gainful Employment Program—Subpart R—Cohort Default Rates.

OMB Control Number: 1845–0121.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Private Sector; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 1,559.

Total Estimated Number of Annual Burden Hours: 5,656.

Abstract: The Student Assistance General Provisions regulation was amended by adding Subpart R to 34 CFR part 668. Subpart R—Program Cohort Default Rates mirrors Subpart N—Cohort Default Rates where applicable. Subpart R established a programmatic cohort default rate (pCDR) for gainful employment (GE) programs, whereas Subpart N established an institutional cohort default rate (iCDR).

On June 16, 2017, the Department of Education (the Department) published a notice in the **Federal Register** announcing the intention to establish a negotiated rulemaking committee to revise the gainful employment regulations published on October 31, 2014. The Department anticipates scheduling the negotiated rulemaking sessions beginning in November or December 2017.

The Department is requesting an extension without change of burden to the currently approved information collection as any new regulations will not be finalized before the expiration of this current package. There have been no changes to the regulations since the initial collection approval.

Dated: November 14, 2017.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2007–0482–0012; FRL—9969–76–OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; SmartWay Transport Partnership (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''SmartWay Transport Partnership'' (EPA ICR No. 2265.03, OMB Control No. 2060–0663) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a reinstatement of the ICR, which was currently approved through July 31, 2017. Public comments were previously requested via the **Federal Register** on July 7, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 18, 2017.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2007–0482–0012 to (1) EPA online using *www.regulations.gov* (our preferred method), by email to *martz.kathleen@epa.gov,* or by mail to:

EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Kathleen Martz, U.S. Environmental Protection Agency, 2000 Traverwood Drive, S–68, Ann Arbor, MI 48105; telephone number: 734–214–4335; Fax: 734–214–4906; email address: *martz.kathleen@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: SmartWay is a voluntary program that focuses on increasing efficiency and lowering air pollution generated by goods movement that is open to organizations that own, operate, or contract with fleet operations, including truck, rail, barge, air and multi-modal carriers, logistics companies, and shippers. Organizations that do not operate fleets, but that are working to strengthen the freight industry, such as industry trade associations, state and local transportation agencies and environmental groups, also may join as SmartWay affiliates. All organizations that join SmartWay are asked to provide EPA with information as part of their SmartWay registration to annually benchmark their transportation-related operations and improve the environmental performance of their freight activities.

A company joins SmartWay when it completes and submits a SmartWay Excel-based tool (''reporting tool'') to EPA. The data outputs from the submitted tool are used by partners and SmartWay in several ways. First, the data provides confirmation that SmartWay partners are meeting established objectives in their Partnership Agreement. The reporting tool outputs enable EPA to assist SmartWay partners as appropriate, and to update them with environmental performance and technology information that empower them to improve their efficiency. This information also improves EPA's knowledge and understanding of the environmental and energy impacts associated with goods movement, and the effectiveness of both proven and emerging strategies to lessen those impacts.

In addition to requesting annual freight transportation-related data, EPA may ask its SmartWay partners for other kinds of information which could include opinions and test data on the effectiveness of new and emerging technology applications, sales volumes associated with SmartWay-recommended vehicle equipment and technologies, the reach and value of partnering with EPA through the SmartWay Partnership, and awareness of the SmartWay brand. In some instances, EPA might query other freight industry representatives (not just SmartWay partners), including trade and professional associations, nonprofit environmental groups, energy and community organizations, and universities, and a small sampling of the general public.

Form Numbers: None.

Respondents/affected entities: Private and public organizations that join SmartWay Transport Partnership; freight industry representatives who engage in activities related to the SmartWay Partnership; and representative samplings of consumers in the general public.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 4,605.

Frequency of response: Once, on occasion and annually.

Total estimated burden: 13,224 hours.

Total estimated cost: $909,828, which includes no capital or operation and maintenance costs.

Changes in the Estimates: There is an increase of 1,720 hours in the total estimated respondent partner burden compared with the ICR currently approved by OMB. This increase reflects the following adjustments and program changes:

(1) Adjustments increase associated with increased interest in SmartWay, and thus, an increase in new annual respondents, as well as robust program retention practices, leading to increased number of existing respondent partners reporting annually, increase in the number of applications for the SmartWay Excellence Awards and the affiliate challenge annually;

(2) Program change increase associated with the new SmartWay Affiliate Program and new requirements under SmartWay Tractor and Trailer program; and,

(3) Adjustment decrease due to EPA's change in policy for submitting Awards materials electronically, rather than by mail.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

[EPA–R09–OAR–2017–0507; FRL–9970–42–Region 9]

Adequacy Status of Motor Vehicle Emissions Budgets in Submitted Reasonable Further Progress Plan for San Diego 8-Hour Ozone for Transportation Conformity Purposes; California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of adequacy.

SUMMARY: The Environmental Protection Agency (EPA or ''Agency'') is notifying the public that the Agency has found that the motor vehicle emissions budgets (''budgets'') for the Reasonable Further Progress (RFP) milestone year 2017 from the ''2008 Eight-Hour Ozone Attainment Plan for San Diego County (December 2016)'' (''2016 San Diego Ozone Plan'' or ''plan''), are adequate for transportation conformity purposes for the 2008 ozone national ambient air quality standards (NAAQS). The California Air Resources Board (CARB) submitted the 2016 San Diego Ozone Plan to the EPA on April 12, 2017, as a revision to the California State Implementation Plan (SIP). Upon the effective date of this notice of adequacy, the previously-approved budgets for the 1997 8-hour ozone standards will no longer be applicable for transportation conformity purposes, and the San Diego Association of Governments (SANDAG) and the U.S. Department of Transportation must use these adequate budgets in future transportation conformity determinations.

DATES: This finding is effective December 4, 2017.

FOR FURTHER INFORMATION CONTACT: John Kelly, EPA, Region IX, Air Division AIR–2, 75 Hawthorne Street, San

Francisco, CA 94105–3901; (415) 947–4151 or *kelly.johnj@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, whenever ''we,'' ''us,'' or ''our'' is used, we mean the EPA.

Today's notice is simply an announcement of a finding that we have already made. The EPA sent a letter to CARB on October 19, 2017 stating that the motor vehicle emissions budgets in the submitted 2016 San Diego Ozone Plan for the RFP milestone year 2017 are adequate for transportation conformity purposes.[1] We announced availability of the plan and related budgets on the EPA's transportation conformity Web site on July 20, 2017, requesting comments by August 21, 2017. We received no comments in response to the adequacy review posting. The finding is available at the EPA's conformity Web site: *https://www.epa.gov/state-and-local-transportation/state-implementation-plans-sip-submissions-epa-has-found-adequate-or.* The adequate motor vehicle emissions budgets are provided in the following table:

ADEQUATE MOTOR VEHICLE EMISSIONS BUDGETS

Budget year	Volatile organic compounds (tons per summer day)	Nitrogen xides (tons per summer day)
2017	23	42

Transportation conformity is required by Clean Air Act section 176(c). The EPA's conformity rule requires that transportation plans, transportation improvement programs, and transportation projects conform to a state's air quality SIP and establishes the criteria and procedures for determining whether or not they conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS.

The criteria we use to determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4), promulgated on August 15, 1997.[2] We have further described our process for determining the adequacy of submitted SIP budgets in our final rule dated July 1, 2004, and we used the information in these resources in making our adequacy determination.[3] Please note that an adequacy review is separate from the EPA's completeness review and should not be used to prejudge the EPA's ultimate action on the SIP. Even if we find a budget adequate, the SIP could later be disapproved.

Pursuant to 40 CFR 93.104(e), within 2 years of the effective date of this notice, SANDAG and the U.S. Department of Transportation will need to demonstrate conformity to the new budgets if the demonstration has not already been made.[4] For demonstrating conformity to the budgets in this plan, the on-road motor vehicle emissions from implementation of the transportation plan or program should be projected consistently with the budgets in this plan, *i.e.,* by taking the county's emissions results derived from CARB's EMFAC model (short for EMission FACtor) and then rounding the emissions up to the nearest ton.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: October 25, 2017.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request; Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of a Federal Government-wide effort to streamline the process to seek feedback from the public on service delivery, the U.S. Equal Employment Opportunity

Commission (EEOC) has submitted a Generic Information Collection Request (Generic ICR): ''Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery'' to OMB for approval under the Paperwork Reduction Act (PRA).

DATES: Written comments on this notice must be submitted on or before December 18, 2017.

ADDRESSES: Comments on this notice must be submitted to Joseph B. Nye, Policy Analyst, Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, email *oira_submission@omb.eop.gov.* Commenters are also encouraged to send comments to the EEOC online at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions on this Web site for submitting comments. In addition, the EEOC's Executive Secretariat will accept comments in hard copy. Hard copy comments should be sent to Bernadette Wilson, Acting Executive Officer, EEOC, 131 M Street NE., Washington, DC 20507. Finally, the Executive Secretariat will accept comments totaling six or fewer pages by facsimile (''fax'') machine before the same deadline at (202) 663–4114. (This is not a toll-free number.) Receipt of fax transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at (202) 663–4070 (voice) or (202) 663–4074 (TTY). (These are not toll-free telephone numbers.) The EEOC will post online at *http://www.regulations.gov* all comments submitted, regardless of whether they are submitted via the Web site, in hard copy, or by fax to the Executive Secretariat. These comments will be posted without change, including any personal information you provide. However, the EEOC reserves the right to refrain from posting libelous or otherwise inappropriate comments including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; that contain hate speech directed at race, color, sex, national origin, age, religion, disability, or genetic information; or that promote or endorse services or products. All comments received, including any personal information provided, also will be available for public inspection during normal business hours by appointment only at the EEOC Headquarters Library, 131 M Street NE., Washington, DC 20507. Upon request, individuals who require assistance viewing comments will be provided appropriate aids such as readers or print magnifiers. To schedule an appointment, contact EEOC Library staff at (202) 663–4630 (voice) or (202) 663–4641 (TTY). (These are not toll-free numbers.)

FOR FURTHER INFORMATION CONTACT: Erin Norris, Senior Attorney, EEOC Office of Legal Counsel, 129 W. Trade Street, Charlotte, NC 28202, 704–954–6491, *erin.norris@eeoc.gov.*

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the government's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

No comments were received by the agency in response to the 60-day notice published in the **Federal Register** of December 22, 2010 (75 FR 80542).

Below we provide EEOC's projected average estimates for the next three years:

Current Actions: New collection of information.

Type of Review: New collection.

Affected Public: Individuals and households, businesses and organizations, State, Local or Tribal Government.

Average Expected Annual Number of Activities: 5.

Respondents: 8,020.

Annual Responses: 11,020.

Frequency of Response: Once per respondent for four activities, twice per respondent for one activity.

Average Minutes per Response: 6.5.

Burden Hours: 1194.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

For the Commission.

Dated: November 9, 2017.

Victoria A. Lipnic,

Acting Chair.

[FR Doc. 2017–24979 Filed 11–16–17; 8:45 am]

BILLING CODE 6570–01–P

FEDERAL MARITIME COMMISSION

[Petition No. P2–17]

Petition of COSCO Shipping Lines Co., Ltd., Orient Overseas Container Line Limited, and OOCL (Europe) Limited for an Exemption From Agreement Filing; Notice of Filing And Request for Comments

Notice is hereby given that COSCO Shipping Lines Co., Ltd., Orient Overseas Container Line Limited, and OOCL (Europe) Limited (''Petitioners''), have petitioned the Commission pursuant to Section 16 of the Shipping Act of 1984, 46 U.S.C. 40103(a), 46 CFR 502.92, and 46 CFR 535.301, for an exemption from agreement filing requirements Petitioners request an exemption ''to replicate as to Cosco and OOCL the exemption automatically applicable to wholly-owned subsidiaries pursuant to 46 CFR 535.307, including its exemption from the provisions of Section 10(c) of the Act, 46 U.S.C. 41105.''

The Petitioners state that a pending business transaction will make them

''. . . part of a single, common business enterprise . . .'' though they will retain the brands as separate legal entities. The Petitioners speculate that ''the transaction will be completed . . . potentially as early as mid-December 2017.'' Petitioners state that ''the exemption would apply to all agreements and activities between Cosco and OOCL that would otherwise be subject to filing under the Act, so long as the parties are commonly owned and controlled.'' The Petitioners claim that ''the requested exemption will not result in a substantial reduction in competition and will not be detrimental to commerce.''

In order for the Commission to make a thorough evaluation of the exemption requested in the Petition, pursuant to 46 CFR 502.92, interested parties are requested to submit views or arguments in reply to the Petition no later than December 1, 2017. Replies shall be sent to the Secretary by email to *Secretary@fmc.gov* or by mail to Federal Maritime Commission, 800 North Capitol Street NW., Washington, DC 20573–0001, and replies shall be served on Petitioners' counsels, David F. Smith, Cozen O' Connor, 1200 Nineteenth Street NW., Suite 300, Washington, DC 20036, *dsmith@cozen.com,* Robert B. Yoshitomi, Nixon Peabody LLP, 300 South Grand Avenue, Suite 4100, Los Angeles, CA 90071–3151, *ryoshitomi@nixonpeabody.com,* and Eric C. Jeffrey, 799 9th Street NW., Suite 500, Washington, DC 20001–5327, *ejeffrey@nixonpeabody.com.*

Non-confidential filings may be submitted in hard copy to the Secretary at the above address or by email as a PDF attachment to *Secretary@fmc.gov* and include in the subject line: P2–17 (Commenter/Company). Confidential filings should not be filed by email. A confidential filing must be filed with the Secretary in hard copy only, and be accompanied by a transmittal letter that identifies the filing as ''Confidential-Restricted'' and describes the nature and extent of the confidential treatment requested. The Commission will provide confidential treatment to the extent allowed by law for confidential submissions, or parts of submissions, for which confidentiality has been requested. When a confidential filing is submitted, there must also be submitted a public version of the filing. Such public filing version shall exclude confidential materials, and shall indicate on the cover page and on each affected page ''Confidential materials excluded.'' Public versions of confidential filings may be submitted by email. The Petition will be posted on the Commission's Web site at *http://www.fmc.gov/P2-17.* Replies filed in response to the Petition will also be posted on the Commission's Web site at this location.

Rachel E. Dickon,

Assistant Secretary.

[FR Doc. 2017–25007 Filed 11–16–17; 8:45 am]

BILLING CODE 6731–AA–P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Submission for OMB Review; Comment Request

AGENCY: Federal Trade Commission (''FTC'' or ''Commission'').

ACTION: Notice.

SUMMARY: The information collection requirements described below will be submitted to the Office of Management and Budget (''OMB'') for review, as required by the Paperwork Reduction Act (''PRA''). The FTC seeks public comments on proposed information requests sent pursuant to compulsory process to a combined ten or more of the largest domestic cigarette manufacturers and smokeless tobacco manufacturers. The information sought would include, among other things, data on annual sales and marketing expenditures. The current FTC clearance from the Office of Management and Budget (''OMB'') to conduct such information collection expires January 31, 2018. The Commission intends to ask OMB for renewed three-year clearance to collect this information.

DATES: Comments on the proposed information requests must be received on or before December 18, 2017.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write: ''Tobacco Reports: Paperwork Comment, FTC File No. P054507'' on your comment, and file the comment online at *https://ftcpublic.commentworks.com/ftc/tobaccoreportspra* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed collection of information should be addressed to Michael Ostheimer, Division of Advertising Practices, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW., Mailstop CC–10603, Washington, DC 20580. Telephone: (202) 326–2699.

SUPPLEMENTARY INFORMATION:

Title: FTC Cigarette and Smokeless Tobacco Data Collection.

OMB Control Number: 3084–0134.

Type of Review: Extension of currently approved collection.

On August 10, 2017, the Commission sought comment on the information collection requirements associated with the Cigarette and Smokeless Tobacco Data Collection. 82 FR 37440 (''August 10, 2017 Notice''). Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.,* the FTC is providing a second opportunity for the public to comment while seeking OMB approval to renew the existing clearance for the information the FTC proposes to seek from the largest domestic cigarette manufacturers and smokeless tobacco manufacturers.

In response to the August 10, 2017 Notice, the Commission received comments from the Campaign for Tobacco-Free Kids (''CTFK'') and Altria Client Services (''Altria'').

The CTFK comment specifically noted the utility and importance of the Commission's Cigarette and Smokeless Tobacco Reports, and urged the agency to continue collecting and reporting industry sales and marketing expenditure data, which CTFK stated provide ''critical data to researchers, policymakers, advocates and the general public.'' CTFK additionally observed:

> The FTC is currently the primary source for data on cigarette and smokeless tobacco companies' marketing and promotional expenditures. No other agency collects and publishes such information directly from the companies, making the FTC reports the most accurate and reliable assessment of tobacco marketing and promotion expenditures available.

CTFK at 1.

CTFK, however, suggested certain modifications to the Commission's reports. Specifically, CTFK recommended that the Commission: (1) Report separately price discount expenditures for retailers and wholesalers; (2) clarify the definitions of certain expenditure categories—specifically, in which category coupons that consumers obtain online are to be counted; (3) report data on a company-

specific or brand-specific basis, rather than on a fully-aggregated basis; (4) require manufacturers to report expenditures related to corporate sponsorships and advertisements; and (5) provide an option to download the published report data in spreadsheet format. *Id.* at 2.

The Commission agrees that collecting and reporting separately price discount expenditures for retailers and wholesalers is useful. Beginning with its 6(b) Orders for 2014, the Commission has been separately collecting and reporting information about price discounts paid to retailers and price discounts paid to wholesalers.

The Commission will clarify in future Orders that expenditures on coupons delivered online should be reported together with coupons delivered by other means. The full impact of couponing by the major cigarette and smokeless tobacco manufacturers can only be seen if expenditures for all coupons are reported together, regardless of how those coupons are delivered to consumers.

Regarding CTFK's suggestion that data be reported on other than a fully-aggregated, nationwide basis, the cigarette and smokeless tobacco companies assert that those data are confidential and, as CTFK acknowledges, the Commission cannot publicly release trade secrets or certain commercial or financial information. *Id.* at 2 n.2.

As for requiring manufacturers to report expenditures related to corporate sponsorships and advertisements, the Commission already requires the recipients of its 6(b) Orders to report certain expenditures made in the name of the company, rather than any of its brands.[1] However, the Commission does not include those data in its Cigarette and Smokeless Tobacco Reports. The Commission will consider whether those expenditures should be reported in the future or whether to cease collecting this information.

The Commission agrees that it would be helpful to provide an option to download the published report data in spreadsheet format and will begin doing so with its next published reports.

Altria stated that the Commission should no longer collect any information from cigarette and smokeless tobacco manufacturers ''in light of the Food and Drug Administration's . . . extensive, active regulatory authority over tobacco products under the Family Smoking Prevention and Tobacco Control Act,'' calling such collections ''superfluous'' and ''unnecessary burdens.'' Altria at 1, 3. Altria contends that the FTC's most recent requests seek ''not only information that the companies already produce to FDA, but also information unrelated to the advertising and promotion of tobacco products.'' *Id.* at 3–4. It gives the following examples:

> (a) cigarette design data, including cigarette length, style, flavor, and filter type; (b) constituent data, including nicotine, carbon monoxide, and tar; (c) lists of cigarettes first sold or discontinued in 2016; and (d) lists of other product information, including brand varieties, pack size, and package type.

Id. at 4 n.15. Altria also suggests that the FTC has recently expanded its requests to seek information on expenditures from parent companies that do not sell or advertise tobacco products. *Id.* at 3.

The FTC staff and FDA staff have a long tradition of working together on the many areas where the two agencies share jurisdiction. The FDA is not collecting cigarette or smokeless tobacco sales and marketing expenditure data like that required by the Commission's 6(b) Orders, so there is no overlap or duplication with respect to such data. Moreover, to the extent there might be some overlap in the collection of information about whether brand styles of cigarettes are filtered or unfiltered, menthol or non-menthol, and their cigarette length, the Commission needs those data so it can combine them with sales information for each brand style in order to report the percentages of cigarettes sold by the leading manufacturers falling into each product type category (*e.g.,* 26% of the cigarettes sold by these manufacturers in 2015 were menthol). FDA is not collecting cigarette sales information, so it cannot calculate sales percentages by product types. The Commission intends to continue collecting cigarette and smokeless tobacco sales and marketing expenditure data, together with cigarette length, flavor, and filter information. To the extent that in the future the FDA duplicates the FTC's data collection, the FTC can modify or cease its collection.

Until 2000, the Commission collected cigarette tar, nicotine, and carbon monoxide yields and published that information by brand style. Because of concerns that the yield information was misleading consumers, the Commission ceased publishing that information, but it has continued to collect tar, nicotine, and carbon monoxide yields to the extent recipients of the 6(b) Orders possess it, and the Commission releases the data to researchers in response to Freedom of Information Act requests. In recent years, however, there have been very few requests for the data. Given that the Commission no longer publishes tar, nicotine, and carbon monoxide reports and the limited interest in these data, the Commission intends to cease collecting tar, nicotine, and carbon monoxide yield data.

There are other information fields that the Commission no longer needs to collect, including information about cigarette package type, cigarette package size, cigarette styles, and whether a cigarette variety's tar yield and its nicotine yield are disclosed on its package. The Commission intends to continue to collect UPC-Codes in order to distinguish one variety from another, but does not need any other variety descriptors beyond cigarette length, flavor, and filter information. The Commission also no longer needs lists of cigarettes first sold or discontinued in a calendar year.

Contrary to Altria's suggestion, the FTC did not recently expand its requests to seek information from parent companies. More than a decade ago, the Commission began directing its orders to the ultimate domestic parents of the cigarette and smokeless tobacco manufacturers because some parent companies owned more than one subsidiary selling those products and the Commission wanted to ensure that no relevant data from affiliated companies went unreported. Moreover, the 6(b) Orders ask several questions about whether the recipient engages in certain practices, such as paying for cigarette or smokeless tobacco product placement in movies, and the Commission wants to be sure that such practices by any related company are reported, even if that company does not itself sell cigarette or smokeless tobacco products. The Commission intends to continuing directing its 6(b) Orders to the parent companies of the leading cigarette and smokeless tobacco manufacturers.

Burden Statement:[2]

Estimated Annual Burden: 1,980 hours.[3]

---

[1] Both the cigarette and smokeless tobacco Orders require the recipients to report expenditures on ''public entertainment events (including, but not limited to, concerts and sporting events) bearing or otherwise displaying the name of the Company or any variation thereof but not bearing or otherwise displaying the name, logo, or an image of any portion of the package'' of any of its cigarettes or smokeless tobacco products, or otherwise referring to those products.

[2] The details and assumptions underlying these estimates were set forth in the August 10, 2017 **Federal Register** notice.

[3] The Commission intends to use this PRA clearance renewal to collect information from the companies concerning their marketing and sales activities for the years 2017, 2018, and 2019. The Commission expects to issue compulsory process orders seeking this information annually, but it is

Continued

Estimated Number of Respondents: 15 maximum.

These estimates include any time spent by separately incorporated subsidiaries and other entities affiliated with the ultimate parent companies that receive the information requests.

Estimated Average Burden per Year per Respondent: 180 hours.

(a) Information requests to the four largest cigarette companies and five largest smokeless tobacco companies, at a per company average each year of 180 hours = 1,620 hours, cumulatively, per year; and

(b) Information requests to six additional respondents, of smaller size, at a per company average each year of 60 hours = 360 hours, cumulatively, per year.

Estimated Annual Labor Cost: $198,000.

Estimated Capital or Other Non-Labor Cost: De minimis.

Request for Comment: You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 18, 2017. Write ''Tobacco Reports: Paperwork Comment, FTC File No. P054507'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm.*

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online, or to send them to the Commission by courier or overnight service. To make sure that the Commission considers your online comment, you must file it at *https://ftcpublic.commentworks.com/ftc/tobaccoreportspra,* by following the instructions on the web-based form. When this Notice appears at *http://www.regulations.gov/#!home,* you also may file a comment through that Web site.

If you file your comment on paper, write ''Tobacco Reports: Paperwork Comment, FTC File No. P054507'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

Because your comment will be placed on the publicly accessible FTC Web site at *https://www.ftc.gov/*, you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on the public FTC Web site—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment from the FTC Web site, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 18, 2017. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

Comments on the information collection requirements subject to review under the PRA should additionally be submitted to OMB. If sent by U.S. mail, they should be addressed to Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Federal Trade Commission, New Executive Office Building, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503. Comments sent to OMB by U.S. postal mail are subject to delays due to heightened security precautions. Thus, comments instead can also be sent via email to *wliberante@omb.eop.gov.*

David C. Shonka,

Acting General Counsel.

[FR Doc. 2017–24915 Filed 11–16–17; 8:45 am]

BILLING CODE 6750–01–P

possible that orders might not be issued in any given year and that orders seeking information for two years would be issued the next year. The figures set forth in this notice for the estimated hours and labor costs associated with this information collection represent average annual burden over the course of the prospective PRA clearance.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–102 and CMS–105]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and

utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by December 18, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *OR*, Email: *OIRA_submission@omb.eop.gov*.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at Web site address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html*.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Reinstatement without change of a previously approved collection; *Title of Information Collection:* Clinical Laboratory Improvement Amendments of 1988 (CLIA) Budget Workload Reports and Supporting Regulations; *Use:* We will use the collected information to determine the amount of Federal reimbursement for surveys conducted. Use of the information includes program evaluation, audit, budget formulation and budget approval. Form CMS–102 is a multi-purpose form designed to capture and record all budget and expenditure data. Form CMS–105 captures the annual projected CLIA workload that the State survey agency will accomplish. Our regional offices also use the information to approve the annual projected CLIA workload. The information is required as part of the section 1864 agreement with the state. *Form Numbers:* CMS–102 and CMS–105 (OMB control number: 0938–0599); *Frequency:* Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 50; *Total Annual Responses:* 50; *Total Annual Hours:* 1,700. (For policy questions regarding this collection contact Jeffrey Pleines at 410–786–0684.)

Dated: November 14, 2017.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB No.: 0970–0401.

Description: Executive Order 12862 directs Federal agencies to provide service to the public that matches or exceeds the best service available in the private sector. In order to work continuously to ensure that the Administration for Children and Families' programs are effective and meet our customers' needs we use a generic clearance process to collect qualitative feedback on our service delivery. This collection of information is necessary to enable ACF to garner customer and stakeholder feedback in an efficient timely manner, in accord with our commitment to improving service delivery. The information collected from our customers and stakeholders will help ensure that users have an effective, efficient and satisfying experience with the programs. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or change in operation might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between ACF and its customer and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

This request is an extension of the ''generic fast-track'' process offered to all government agencies by OMB in 2010. Fast-tack means each request receives approval five days after submission, if no issues are brought to ACF's attention by OMB within the five days.

Respondents:

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Survey	10,000	1	0.5	5,000

Estimated Total Annual Burden Hours:

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 370 L'Enfant Promenade SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov*. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

[FR Doc. 2017–24902 Filed 11–16–17; 8:45 am]

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Variations in Implementation of Quality Interventions (VIQI) Project: Data Collection.

OMB No.: New Collection.

Description: The Administration for Children and Families (ACF), Office of Planning, Research and Evaluation (OPRE) proposes to collect information as part of the Variations in Implementation of Quality Interventions (VIQI): Examining the Quality-Child Outcomes Relationship in Child Care and Early Education Project.

The VIQI Project will inform policymakers, practitioners, and stakeholders about effective ways to support the quality and effectiveness of early care and education (ECE) centers for promoting young children's learning and development. In partnership with ECE centers across the United States that serve young children with diverse economic backgrounds, the VIQI Project aims to (1) identify dimensions of quality within ECE settings that are key levers for promoting children's outcomes; (2) inform what levels of quality are necessary to successfully support children's developmental gains; (3) identify drivers that facilitate and inhibit successful implementation of interventions aimed at strengthening quality; and (4) understand how these relations vary across different ECE settings, staff, and children. To achieve these aims, the VIQI Project will include a year-long pilot study that will pilot up to three curricular and professional development models, followed by a year-long impact evaluation and process study that involve testing the effectiveness of two curricular and professional development models that aim to strengthen teacher practices, the quality of classroom processes, and children's outcomes. The study will include up to 189 community-based and Head Start ECE centers spread across seven different metropolitan areas in the United States.

To test the effectiveness of the curricular and professional development models, the VIQI project will consist of a 3- or 4-group experimental design in the pilot study and a 3-group experimental design in the impact evaluation and the process study in which the initial quality and other characteristics of ECE centers are measured. The centers then will be stratified based upon select information collected—by setting type (*e.g.,* Head Start and community-based ECE centers) and initial levels of quality—and randomly assigned to one of the intervention conditions where they will be offered curricular and professional development supports aimed at strengthening the quality of classroom and teacher practices, or to a business-as-usual comparison condition.

In the pilot study, 24 centers in one metropolitan area will participate in the VIQI Project. Information about center and staff characteristics and classroom and teacher practices will be collected (1) to stratify and randomly assign centers; (2) to describe how the different interventions are implemented and are experienced by centers and teachers; and (3) to document the treatment differentials across research conditions. The information will then be used to adjust and to refine the research design and measures that will be used in the impact evaluation and process study.

In the impact evaluation and process study, 165 centers in seven metropolitan areas will participate in the VIQI Project. Information about center and staff characteristics and classroom and teacher practices will be collected (1) to stratify and randomly assign centers; (2) to identify subgroups of interest; (3) to describe how the interventions are implemented and are experienced by centers and teachers; (4) to document the treatment differentials across research conditions; and (5) to assess the impacts of each of the interventions on different dimensions of quality and teacher practices when compared to a business-as-usual comparison condition for the impact evaluation sample and separately for subgroups of interest. In addition, information about the background characteristics of families and children being served in the centers will be collected, as well as measures of children's skills at the beginning and end of the year-long impact evaluation for a subset of children in these centers. This information will also be used (1) to define subgroups of interest defined by family and child characteristics, and (2) to assess the impacts of each of the interventions on children's skills for the full impact evaluation sample and separately for subgroups of interest. Lastly, the information on quality, teacher practices and children's skills will be used in a set of analyses that will rigorously examine the nature of the quality-to-child outcomes relationship by exploring the effects of different dimensions and thresholds (or levels) of quality on child outcomes for the full impact evaluation sample and separately for subgroups of interest.

The data collection instruments for the VIQI Project include the following:

(1) *Instruments for Screening and Recruitment of ECE Centers* will be used in the pilot study, impact evaluation, and process study to assess ECE centers' eligibility, to inform the sampling strategy, and to recruit ECE centers to participate in the VIQI Project;

(2) *Baseline Instruments for the Pilot Study, Impact Evaluation, and Process Study* will be used to collect background information about centers, classrooms, center staff, and families and children being served in the centers. All of the instruments will be administered at the beginning of the pilot study, impact evaluation, and process study, with the exception of the baseline survey administered to parents of children enrolled in participating ECE centers and the protocol for

baseline assessments of children's skills at the beginning of the impact evaluation and process study;

(3) *Follow-Up Instruments for the Pilot Study, Impact Evaluation, and Process Study* will be used to inform how centers, classrooms, teachers, and children changed and to assess the impacts of each of the interventions over the course of the pilot study, impact evaluation, and process study. All of the instruments will be administered at the end of the pilot study, impact evaluation, and process study, with the exception of the protocol for follow-up assessments of children's skills at the end of the impact evaluation and process study; and,

(4) *Fidelity of Implementation Instruments for Pilot Study and Process Study* will be used to document how the curricular and professional development models are delivered and experienced by staff, to document treatment differentials across research conditions, and to provide context for interpreting the findings of the impact evaluation.

Respondents: The target population of the VIQI Project will include staff members working in Head Start grantee and community-based child care oversight agencies, staff members working in 189 ECE centers in seven metropolitan areas across the United States, and parents and children being served in these centers.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
Instruments for Screening and Recruitment of ECE Centers					
Landscaping protocol with Stakeholder Agencies (staff burden in Head Start (HS) *grantee* and community-based child care *agencies*)	100	33	1	1.50	50
Screening protocol for phone calls (staff burden in HS *grantees* and community-based child care *agencies*)	110	37	1	2	74
Screening protocol for phone calls (HS and community-based child care *center* staff burden)	280	93	1	1.20	112
Protocol for in-person visits for screening and recruitment activities (staff burden in HS *grantees* and community-based child care *agencies*)	488	163	1	1.50	245
Protocol for in-person visits for screening and recruitment activities (HS and community-based child care *center* staff burden)	760	253	1	1.20	304
Baseline Instruments for the Pilot Study, Impact Evaluation, and Process Study					
Baseline administrator survey	236	79	1	0.60	47
Baseline coach survey	223	74	1	0.60	44
Baseline teacher/assistant teacher survey	1,358	453	1	0.60	272
Baseline parent/guardian information form in Impact Evaluation only	8,568	2,856	1	0.20	571
Baseline classroom observation protocol (teacher burden)	543	181	1	0.30	54
Baseline protocol for child assessments in Impact Evaluation only (child burden)	1,980	660	1	0.50	330
Follow-Up Instruments for Pilot Study, Impact Evaluation, and Process Study					
Follow-up administrator survey	189	63	1	0.50	32
Follow-up coach survey	178	59	1	0.50	30
Follow-up teacher/assistant teacher survey	1,086	362	1	0.75	272
Teacher reports to questions about children in classroom (administered as part of the follow-up teacher survey)	543	181	1	0.67	121
Follow-up classroom observation protocol (teacher burden)	543	181	2	0.30	109
Follow-up protocol for child assessments in Impact Evaluation only (child burden)	1,980	660	1	1	660
Fidelity of Implementation Instruments for Pilot Study and Process Study					
Coach log	117	39	55	0.25	536
Teacher/assistant teacher log	1,086	362	36	0.25	3258
Implementation fidelity observation protocol (teacher burden)	72	24	1	0.30	7
Interview/Focus group protocol (administrator, teacher/assistant teacher and coach burden)	322	107	1	1.5	161

Estimated Total Annual Burden Hours: 7,289.

Additional Information: Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street, SW., Washington, DC 20201, Attn: OPRE Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: *OPREinfocollection@acf.hhs.gov.*

OMB Comment: OMB is required to make a decision concerning the

collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, Email: *OIRA_SUBMISSION@OMB.EOP.GOV*, Attn: Desk Officer for the Administration for Children and Families.

Mary Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–23–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity: Comment Request

Proposed Projects:

Community Services Block Grant (CSBG) State Plan Application for States
Community Services Block Grant (CSBG) Eligible Entity Master List
Community Services Block Grant (CSBG) ACSI Survey of Eligible Entities

Title: Community Services Block Grant (CSBG) State Plan Application

OMB Number: 0970–0382

Description: Section 676 of the Community Services Block Grant (CSBG) Act requires states, including the District of Columbia and the Commonwealth of Puerto Rico, and U.S. territories applying for CSBG funds to submit an application and plan (CSBG State Plan). The CSBG State Plan must meet statutory requirements prior to states and territories being funded with CSBG funds. Applicants have the option to submit a detailed plan annually or biannually. Entities that submit a biannual plan must provide an abbreviated plan the following year if substantial changes to the initial plan will occur.

This request is to revise the automated CSBG State Plan format for states and territories by revising questions for clarity and system compatibility. It is not anticipated that these revisions will cause any additional burden to states as they have been completing the automated plan for three years. It is anticipated that the burden will continue to diminish in subsequent years due to improved automation.

In addition to the CSBG State Plan, states will be requested to complete a CSBG Eligible Entity Master List in year one, and then make updates as necessary in subsequent years. As the states have the information about their eligible entities (or sub-grantees), the burden will be minimal to the states to complete this the first year.

Lastly, the request includes a survey for the CSBG eligible entities (or sub-grantees). The survey focuses on the customer service that the eligible entities receive from the CSBG states. The survey is optional, and this will be the third time that the eligible entities that chose to submit will complete it.

Respondents: State Governments, including the District of Columbia and the Commonwealth of Puerto Rico, and U.S. territories, and local level sub-grantees.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
CSBG State Plan Application for States	56	1	31	1,736
CSBG State Plan Eligible Entity List	56	1	1	56
CSBG ACSI Survey of Eligible Entities	1,019	1	.15	152.85

Estimated Total Annual Burden Hours: 1,792 hours for states and territories; 152.85 for eligible entities.

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap. 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington, DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

BILLING CODE 4184–27–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–4179]

Cardiac Troponin Assays; Public Workshop; Request for Comments; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA or Agency) is extending the comment period provided in the notice entitled ''Cardiac Troponin Assays; Public Workshop; Request for Comments'' that appeared in the **Federal Register** on July 31, 2017. That notice announced the public workshop and requested comments by November 28, 2017; FDA is extending the public

workshop's comment period by 30 days to December 28, 2017, in response to requests for an extension to allow interested persons additional time to submit comments.

DATES: FDA is extending the comment period for the public workshop ''Cardiac Troponin Assays'' published on July 31, 2017 (82 FR 35532). Submit either electronic or written comments by December 28, 2017.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before December 28, 2017. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of December 28, 2017. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions''

Instructions: All submissions received must include the Docket No. FDA–2017–N–4179 for ''Cardiac Troponin Assays; Public Workshop; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Paula Caposino, Food and Drug Administration, Center for Devices and Radiological Health, 10903 New Hampshire Ave., Bldg. 66, Rm. 4644, Silver Spring, MD 20993, 301–796–6160, *Paula.Caposino@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 31, 2017 (82 FR 35532), FDA published a notice announcing the public workshop entitled ''Cardiac Troponin Assays; Public Workshop; Request for Comments'' with a 120-day comment period to request comments.

The Agency has received requests for a 30-day extension of the comment period for the public workshop. The request conveyed concern that the current 120-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the public workshop.

FDA has considered the request and is extending the comment period for the public workshop for 30 days, until December 28, 2017. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments.

Dated: November 13, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–D–6154]

Evaluation of Devices Used With Regenerative Medicine Advanced Therapies; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft document entitled ''Evaluation of Devices Used with Regenerative Medicine Advanced Therapies; Draft Guidance for Industry.'' The draft guidance document, when finalized, will provide device manufacturers, applicants, and sponsors engaged in the development of regenerative medicine therapies, with our current thinking regarding evaluation of devices used in the recovery, isolation or delivery of regenerative advanced therapies, which FDA generally refers to as ''regenerative medicine advanced therapies'' or ''RMATs.'' Specifically, as required by the 21st Century Cures Act (Cures Act),

the draft guidance addresses how FDA intends to simplify and streamline its application of regulatory requirements for combination device and cell or tissue products; what, if any, intended uses or specific attributes would result in a device used with a regenerative therapy product to be classified as a class III device; when a device may be limited to a specific intended use with only one particular type of cell; and application of the least burdensome approach to demonstrate how a device may be used with more than one cell type.

DATES: Submit either electronic or written comments on the draft guidance by February 15, 2018 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–D–6154 for ''Evaluation of Devices Used with Regenerative Medicine Advanced Therapies; Draft Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Tami Belouin, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled ''Evaluation of Devices Used with Regenerative Medicine Advanced Therapies; Draft Guidance for Industry.'' The draft guidance, when finalized, will provide device manufacturers, applicants, and sponsors engaged in the development of regenerative medicine therapies, with our current thinking regarding evaluation of devices used in the recovery, isolation or delivery of regenerative advanced therapies, which FDA generally refers to as ''regenerative medicine advanced therapies'' or ''RMATs''. Specifically, as required by section 3034 of the 21st Century Cures Act (Pub. L. 114–255) (Cures Act), the draft guidance addresses how FDA intends to simplify and streamline its application of regulatory requirements for combination device and cell or tissue products; what, if any, intended uses or specific attributes would result in a device used with a regenerative therapy product to be classified as a class III device; when a device may be limited to a specific intended use with only one particular type of cell; and application of the least burdensome approach to demonstrate how a device may be used with more than one cell type.

The issuance of this draft guidance fulfills the statutory requirement set forth in section 3034(a) of the Cures Act. Furthermore, the Agency intends for this document, when finalized, to serve as a source of information about the Agency's current thinking about a wide range of concepts related to the regulation of devices, as they apply to devices used in the recovery, isolation, and delivery of RMATs. FDA has provided general information in the

draft guidance in lieu of specific examples because the Agency does not yet possess a wide body of experience regarding the evaluation of devices used with RMATs, given the recent establishment of the RMAT designation program in the Cures Act.

As we gain more experience with such devices, we intend to incorporate such information into the final guidance. To that end, although you are welcome to comment on any aspect of the guidance, we encourage commenters to support their comments with information related to specific marketed devices or types of devices that are used in the recovery, isolation, and delivery of RMATs.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of a document entitled ''Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry.'' Among other things, that document provides information about the RMAT designation program.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on Evaluation of Devices Used with Regenerative Medicine Advanced Therapies. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 807 have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 812 have been approved under OMB control number 0910–0078; the collections of information in 21 CFR part 814 have been approved under OMB control number 0910–0231; and the collections of information in 21 CFR part 1271 have been approved under OMB control number 0910–0543.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at either *https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: November 13, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–N–0987]

Agency Information Collection Activities; Proposed Collection; Comment Request; Generic Clearance for the Collection of Qualitative Data on Tobacco Products and Communications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the Generic Clearance for the Collection of Qualitative Data on Tobacco Products and Communications.

DATES: Submit either electronic or written comments on the collection of information by January 16, 2018.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 16, 2018. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of January 16, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2014–N–0987 for ''Generic Clearance for the Collection of Qualitative Data on Tobacco Products and Communications.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The

Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Generic Clearance for the Collection of Qualitative Data on Tobacco Products and Communications

OMB Control Number 0910–0796—Extension

Under section 1003(d)(2)(D) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 393(d)(2)(D)), FDA is authorized to conduct educational and public information programs.

In conducting studies relating to the regulation and communications related to tobacco products, FDA will need to employ formative qualitative research including focus groups, usability testing, and/or indepth interviews (IDIs) to assess knowledge and perceptions about tobacco-related topics with specific target audiences. The information collected will serve three major purposes. First, formative research will provide critical knowledge about target audiences. FDA must first understand people's knowledge and perceptions about tobacco related topics prior to developing survey/research questions as well as stimuli for experimental studies. Second, by collecting communications usability information, FDA will be able to serve and respond to the ever-changing demands of consumers of tobacco products. Additionally, we will be able to determine the best way to present messages. Third, initial testing will allow FDA to assess consumer understanding of survey/research questions and study stimuli. Focus groups and/or IDIs with a sample of the target audience will allow FDA to refine the survey/research questions and study stimuli while they are still in the developmental stage. FDA will collect, analyze, and interpret information gathered through this generic clearance in order to: (1) Better understand characteristics of the target audience—its perceptions, knowledge, attitudes, beliefs, and behaviors—and use these in the development of appropriate survey/research questions, study stimuli, or communications; (2) more efficiently and effectively design survey/research questions and study stimuli; and (3) more efficiently and effectively design experimental studies.

FDA is requesting approval of this new generic clearance for collecting information through the use of qualitative methods (*i.e.,* individual interviews, small group discussions, and focus groups) for studies involving all tobacco products regulated by FDA. This information will be used as a first step to explore concepts of interest and assist in the development of quantitative study proposals, complementing other important research efforts in the Agency. This information may also be used to help identify and develop communication messages, which may be used in education campaigns. Focus groups play an important role in gathering information because they allow for an indepth understanding of individuals' attitudes, beliefs, motivations, and feelings. Focus group research serves the narrowly defined need for direct and informal public opinion on a specific topic.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Type of interview	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
In-Person Individual Indepth Interviews	1,092	1	1,092	1	1,092
Indepth Interview (IDI) Screener	1,800	1	1,800	0.083 (5 minutes)	150
Focus Group Interviews	4,701	1	4,701	1.5	7,052
Focus Group Screener	3,996	1	3,996	0.25 (15 minutes)	999
Usability Testing	2,322	1	2,322	0.50 (30 minutes)	1,161

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]—Continued

Type of interview	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Usability Testing Screener	2,028	1	2,028	0.083 (5 minutes)	168
Total					10,622

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The number of respondents to be included in each new pretest may vary, depending on the nature of the material or message being tested and the target audience. Table 1 provides examples of the types of studies that may be administered and estimated burden levels during the 3-year period. Time to read, view, or listen to the message being tested is built into the ''Hours per Response'' figures.

The burden for this collection has decreased by 18,437 hours from 29,059 to 10,622. FDA attributes this decrease to assessing the planned studies for the next 3 years.

Dated: November 9, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

[FR Doc. 2017–24924 Filed 11–16–17; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–0001]

Medical Gas Regulation; Public Workshops; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshops; request for comments.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing two public workshops entitled ''Medical Gas Regulation: Workshop I'' and ''Medical Gas Regulation: Workshop II.'' The topic to be discussed is potential areas of Federal drug regulation that should be revised with respect to medical gases.

DATES: The first public workshop will be held on December 15, 2017, from 9 a.m. to 5 p.m. The second public workshop will be held on February 9, 2018, from 9 a.m. to 5 p.m. However, depending on the level of public participation, the workshops may end early. FDA may announce additional public workshop dates in the future, if needed.

Submit either electronic or written comments on these public workshops by March 15, 2018, for Workshop I, and by May 10, 2018, for Workshop II. See the **SUPPLEMENTARY INFORMATION** section for registration dates and information.

ADDRESSES: The public workshops will be held at FDA's White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, Rm. 1503 B–C (sections B and C of the ''Great Room''), Silver Spring, MD 20993–0002. Entrance for public workshop participants (non-FDA employees) is through Building 1 where routine security-check procedures will be performed. For parking and security information, please refer to *https://www.fda.gov/AboutFDA/WorkingatFDA/BuildingsandFacilities/WhiteOakCampusInformation/ucm241740.htm.*

You may submit comments as follows. Please note that late, untimely filed comments may not be considered. For timely consideration, we request that electronic comments on workshop topics be submitted before or within 90 days after each workshop (*i.e.,* comments should be submitted by or before March 15, 2018, for Workshop I, and May 10, 2018, for Workshop II). FDA will have one shared docket for all workshops. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of May 10, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before the relevant date.

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–N–0001 for ''Medical Gas Regulation.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including

the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:

Christine Kirk, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002, 301–796–2465, Fax: 301–847–8440, email: *MedgasPublicWorkshops@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On May 5, 2017, President Trump signed the Consolidated Appropriations Act, 2017 (Pub. L. 115–31). Section 756 of the Consolidated Appropriations Act, 2017 requires FDA to issue final regulations revising Federal drug regulations with respect to medical gases. These public workshops are being held as part of FDA's implementation of the requirements of section 756.

Since the 2012 enactment of the Food and Drug Administration Safety and Innovation Act (FDASIA) (Pub. L. 112–144), FDA has engaged in multiple activities related to medical gases, including rulemaking. For example, in 2016, FDA issued the final rule ''Medical Gas Containers and Closures: Current Good Manufacturing Practice Requirements'' (81 FR 81685, November 18, 2016). Other activities include FDA's June 2017 revised draft guidance for industry on current good manufacturing practice for medical gases,[1] updated guidance for FDA inspectors regarding medical gases (March 2015),[2] an extensive review of Federal drug regulations related to medical gases from 2012 to 2014 (a report on the review was submitted to Congress in 2015),[3] and implementation of FDASIA's requirements regarding certification of medical gases (to date, over 70 certifications have been granted).

FDA intends to engage in additional rulemaking in this area in accordance with section 756 of the Consolidated Appropriations Act, 2017. To conduct rulemaking as efficiently as possible, FDA intends to build on the information and stakeholder input received since FDASIA's enactment. As noted in more detail below, FDA invites comments from stakeholders on specific medical gas issues that could or should be addressed in regulation.

II. Topics for Discussion at the Public Workshops

We are holding these workshops to provide an opportunity for medical gas manufacturers and any other interested members of the public to provide input on potential areas of Federal drug regulation that should be revised with respect to medical gases.

We are asking stakeholders to comment on existing medical gas issues which, in their view, should be addressed by regulation change (rather than through other means, such as revisions to guidance or inspection practices). Commenters should include concrete and specific reasons that rulemaking is preferable to other options. Commenters' views regarding the prioritization of particular rulemaking proposals would also be helpful. If a stakeholder would like a comment to be discussed at a particular public workshop, it should be submitted with a discussion request by no later than 1 week before the date of the workshop. If a stakeholder would like a comment to be included in FDA's consideration of public comments presented and received for a particular workshop, it should be submitted no later than 90 days after the date of the workshop. As noted above, the *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of May 10, 2018. Late comments will not be considered.

During Workshop I (December 2017), FDA intends to discuss the anticipated scope of the medical gas rulemaking, as well as three regulations to which stakeholders have previously requested changes: 21 CFR part 201 (labeling generally and labeling for medical air specifically), 21 CFR part 207 (registration and listing), and 21 CFR parts 210 and 211 (current good manufacturing practice). Depending on the number of speakers and time available, we may also consider comments on additional regulations.

During Workshop II (February 2018), FDA intends to discuss 21 CFR part 314 (adverse event reporting) and the intersection of regulations for medical gases and regulations for medical devices and animal drugs. Depending on the number of speakers and time available, we may also consider comments on additional regulations and medical gas issues not currently addressed in regulation. FDA is considering whether to schedule one or more additional public workshops in 2018 to hear from stakeholders regarding any remaining topics.

III. Participating in the Public Workshops

Registration: The workshops are free and seating will be on a first-come, first-served basis. Attendees who do not wish to make an oral presentation do not need to register.

If you need special accommodations because of a disability, please contact *MedgGasPublicWorkshops@fda.hhs.gov* (or see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of each workshop.

Requests for Oral Presentations: If you wish to a make an oral presentation, you must register by submitting your name, title, firm name, address, telephone, email address, and Fax number to *MedgasPublicWorkshops@fda.hhs.gov* (see **FOR FURTHER INFORMATION CONTACT**) by December 8, 2017, for Workshop I, or February 2, 2018, for Workshop II. Please also indicate the type of organization you represent (*e.g.,* industry, consumer organization) and a brief summary of your remarks (including the discussion topic(s) that you would like to address).

FDA will try to accommodate all persons who wish to make a presentation; however, the duration of each speaker's presentation may be limited by time constraints. FDA will notify registered presenters of their

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–0878]

Agency Information Collection Activities; Proposed Collection; Comment Request; Premarket Notification for a New Dietary Ingredient

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the procedure by which a manufacturer or distributor of a new dietary ingredient or of a dietary supplement containing a new dietary ingredient is to submit to FDA information upon which it has based its conclusion that a dietary supplement containing the new dietary ingredient will reasonably be expected to be safe.

DATES: Submit either electronic or written comments on the collection of information by January 16, 2018.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 16, 2018. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of January 16, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–N–0878 for ''Premarket Notification for a New Dietary Ingredient.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Ila Mizrachi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD

20852, 301–796–7726, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Premarket Notification for a New Dietary Ingredient—21 CFR 190.6

OMB Control Number 0910–0330—Extension

This information collection supports Agency regulations. Specifically, section 413(a) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 350b(a)) provides that at least 75 days before the introduction or delivery for introduction into interstate commerce of a dietary supplement that contains a new dietary ingredient, the manufacturer or distributor of the dietary supplement or of the new dietary ingredient is to submit to FDA (as delegate for the Secretary of Health and Human Services) information upon which the manufacturer or distributor has based its conclusion that a dietary supplement containing the new dietary ingredient will reasonably be expected to be safe. FDA's implementing regulation, § 190.6 (21 CFR 190.6), requires this information to be submitted to the Office of Nutrition, Labeling, and Dietary Supplements (ONLDS) in the form of a notification. Under § 190.6(b), the notification must include the following: (1) The name and complete address of the manufacturer or distributor; (2) the name of the new dietary ingredient; (3) a description of the dietary supplement(s) that contain the new dietary ingredient, including the level of the new dietary ingredient in the dietary supplement and the dietary supplement's conditions of use; (4) the history of use or other evidence of safety establishing that the new dietary ingredient will reasonably be expected to be safe when used under the conditions recommended or suggested in the labeling of the dietary supplement; and (5) the signature of a responsible person designated by the manufacturer or distributor.

These premarket notification requirements are designed to enable us to monitor the introduction into the marketplace of new dietary ingredients and dietary supplements that contain new dietary ingredients in order to protect consumers from ingredients and products whose safety is unknown. FDA uses the information collected in new dietary ingredient notifications to evaluate the safety of new dietary ingredients in dietary supplements and to support regulatory action against ingredients and products that are potentially unsafe.

FDA has developed an electronic portal that respondents may use to electronically submit their notifications to ONLDS via FDA Unified Registration and Listing System (FURLS). Firms that prefer to submit a paper notification in a format of their own choosing still have the option to do so; however, Form FDA 3880 prompts a submitter to input the elements of a new dietary ingredient notification (NDIN) in a standard format and helps the respondent organize its NDIN to focus on the information needed for FDA's safety review. Safety information may be submitted via a supplemental form entitled ''New Dietary Ingredient Safety Information.'' This form provides a standard format to describe the history of use or other evidence of safety on which the manufacturer or distributor bases its conclusion that the new dietary ingredient is reasonably expected to be safe under the conditions of use recommended or suggested in the labeling of the dietary supplement, as well as related identity information that is necessary to demonstrate safety by showing that the new dietary ingredient and dietary supplement(s) that are the subject of the notification are the same or similar to the ingredients and products for which safety data and information have been provided. We invite comment on Form FDA 3880 and the supplemental safety information form, which may be found on our Web site at *https://www.fda.gov/Food/DietarySupplements/NewDietaryIngredientsNotificationProcess/default.htm.*

Description of Respondents: The respondents to this collection of information are manufacturers and distributors in the dietary supplement industry; specifically, firms that manufacture or distribute new dietary ingredients or dietary supplements that contain a new dietary ingredient.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response (in hours)	Total hours
190.6; Dietary Supplements	55	1	55	20	1,100

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

We have made no adjustments to the currently approved burden estimate for the information collection. While we have received previous comments suggesting our burden estimate may be too low, the comments did not discuss the basis for such a conclusion. We therefore specifically invite those commenters offering an alternative

burden estimate to include the methodology or reasoning used to do so.

Based on our experience with the information collection over the past 3 years, we estimate that 55 respondents will submit 1 premarket notification each. We estimate that extracting and summarizing the relevant information from what exists in the company's files and presenting it in a format that meets the requirements of § 190.6 will take approximately 20 hours of work per notification. We have carefully considered the burden associated with the premarket notification requirement and believe that estimates greater than 20 hours are likely to include burden associated with researching and generating safety data for a new dietary ingredient. We also believe that the burden of the premarket notification requirement on industry is minimal and reasonable because we are requesting only safety and identity information that the manufacturer or distributor should already have developed to satisfy itself that a dietary supplement containing a new dietary ingredient is in compliance with the FD&C Act. Under section 413(a)(2) of the FD&C Act, a dietary supplement that contains a new dietary ingredient is deemed to be adulterated unless there is a history of use or other evidence of safety establishing that the new dietary ingredient will reasonably be expected to be safe under the conditions of use recommended or suggested in the labeling of the dietary supplement. This requirement is separate from and additional to the requirement to submit a premarket notification for the new dietary ingredient. FDA's regulation on new dietary ingredient notifications, § 190.6(a), requires the manufacturer or distributor of the dietary supplement or of the new dietary ingredient to submit to FDA the information that forms the basis for its conclusion that a dietary supplement containing the new dietary ingredient will reasonably be expected to be safe. Thus, § 190.6 only requires the manufacturer or distributor to extract and summarize information that should have already been developed to meet the safety requirement in section 413(a)(2) of the FD&C Act.

Dated: November 9, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–D–0313]

Agency Information Collection Activities; Proposed Collection; Comment Request; Guidance for Industry, Researchers, Patient Groups, and Food and Drug Administration Staff on Meetings With the Office of Orphan Products Development

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the Guidance for Industry, Researchers, Patient Groups, and FDA Staff on Meetings with the Office of Orphan Products Development.

DATES: Submit either electronic or written comments on the collection of information by January 16, 2018.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 16, 2018. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of January 16, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2014–D–0313 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Guidance for Industry, Researchers, Patient Groups, and Food and Drug Administration Staff on Meetings with the Office of Orphan Products Development.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information

redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Guidance for Industry, Researchers, Patient Groups, and Food and Drug Administration Staff on Meetings With the Office of Orphan Products Development

OMB Control Number 0910–0787—Extension

This information collection supports Agency guidance regarding staff meetings with the Office of Orphan Products Development. Each year, the Office of Orphan Products Development (OOPD) staff participates in meetings with stakeholders who seek guidance or clarification relating to orphan drug or humanitarian use device (HUD) designation requests, OOPD grant programs, or other rare disease issues. These meetings can be ''informal'' or ''formal'' and help build a common understanding on FDA's thoughts on orphan products, which may include drugs, biological products, devices, or medical foods for a rare disease or condition. These meetings may represent critical points in the orphan product development process and may even have an impact on the eventual availability of products for patients with rare diseases and conditions. It is important that these meetings be scheduled within a reasonable time, conducted effectively, and documented where appropriate.

Topics addressed in this guidance include: (1) Clarification of what constitutes an ''informal'' or ''formal'' meeting, (2) program areas within OOPD that may be affected by this draft guidance, (3) procedures for requesting and scheduling meetings with OOPD, (4) description of what constitutes a meeting package, and (5) procedures for the conduct and documentation of meetings with OOPD. This guidance provides consistent procedures to promote well-managed meetings between OOPD and stakeholders.

Burden estimate. Table 1 of this document provides an estimate of the annual reporting burden associated with the recommendation found in the guidance.

Request for a meeting. Based upon information collected from OOPD program areas, approximately 2,332 informal and 51 formal meetings were requested with OOPD in fiscal year (FY) 2016 regarding orphan drug designation requests, HUD designation requests, rare pediatric disease designation requests, funding opportunities through the Orphan Products Grants Program and the Pediatric Device Consortia Grants Program, and orphan product patient-related issues. FDA anticipates that the number of meeting requests and stakeholders will remain the same or will only slightly increase and therefore estimates the total number of meeting requests will be 2,383 annually (2332 informal and 51 formal meetings). The hours per response, which is the estimated number of hours that a stakeholder would spend preparing the information to be submitted with a meeting request in accordance with the guidance, is estimated to be approximately 3 hours for informal meetings and approximately 10 hours for formal meetings. Based on FDA's experience, the Agency expects that it will take stakeholders this amount of time to gather and copy brief statements about the product and a description of the purpose and details of the meeting. Therefore, the Agency estimates that stakeholders will spend 7,506 hours per year (6,996 hours for informal meetings and 510 hours for formal meetings) preparing meeting requests to OOPD regarding orphan drug designation requests, HUD designation requests, rare pediatric disease designation requests, funding opportunities through the Orphan Products Grants Program and the Pediatric Device Consortia Grants Program, and orphan product patient-related issues.

Meeting packages. Based upon information collected from OOPD program areas, OOPD held approximately 51 formal meetings in FY 2016 regarding orphan drug designation requests, HUD designation requests, rare pediatric disease designation requests, funding opportunities through the Orphan Products Grants Program and the Pediatric Device Consortia Grants Program, and orphan product patient-related issues. FDA anticipates that the number of formal meetings, and therefore meeting packages, may increase only slightly as a result of this guidance; thus, the Agency estimates that the total responses will be 51 annually. As stated previously, it is current practice for stakeholders to submit meeting packages to the Agency in advance of any such formal meeting. The hours per response, which is the

estimated number of hours that a stakeholder would spend preparing the meeting package in accordance with this guidance, is estimated to be approximately 18 hours. Based on FDA's experience, the Agency expects it will take stakeholders this amount of time to gather and copy brief statements about the product, a description of details for the anticipated meeting, and data and information that generally would already have been compiled for submission to the Agency. Therefore, the Agency estimates that stakeholders will spend 918 hours per year submitting meeting packages to the Agency prior to a formal meeting regarding orphan drug designation requests, HUD designation requests, rare pediatric disease designation requests, funding opportunities through the Orphan Products Grants Program and the Pediatric Device Consortia Grants Program, and orphan product patient-related issues.

Draft meeting minutes. Based upon information collected from OOPD program areas, OOPD received approximately 51 draft meeting minutes for formal meetings and 23 draft meeting minutes for informal meetings in FY 2016 regarding orphan drug designation requests, HUD designation requests, rare pediatric disease designation requests, funding opportunities through the Orphan Products Grants Program and the Pediatric Device Consortia Grants Program, and orphan product patient-related issues. FDA anticipates that the number of stakeholders submitting draft meeting minutes may remain the same or increase only slightly; thus, the Agency estimates that the total number of respondents will be 74 annually. As stated previously, it is current practice for stakeholders to submit draft meeting minutes to the Agency after all formal meetings and certain informal meetings. The hours per response, which is the estimated number of hours that a stakeholder would spend preparing draft meeting minutes in accordance with this guidance, is estimated to be approximately 8 hours. Based on FDA's experience, the Agency expects it will take stakeholders this amount of time to summarize the meeting discussion points, agreements, disagreements, and action items. Therefore, the Agency estimates that stakeholders will spend 592 hours per year submitting draft meeting minutes to the Agency documenting the meeting outcomes, agreements, disagreements, and action items as followup to all formal and certain informal meetings.

FDA therefore estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Meeting requests, packages and minutes	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Meeting requests (informal)	2,332	1	2,332	3	6,996
Meeting requests (formal)	51	1	51	10	510
Meeting packages	51	1	51	18	918
Meeting minutes	74	1	74	8	592
Total					9,016

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Since the last OMB approval, we have increased our estimate by 832 hours and 229 respondents in parallel to an increase in overall orphan drug designation submissions and to correspond meeting requests to the Office of Orphan Products Development.

Dated: November 9, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–6175]

Agency Information Collection Activities; Proposed Collection; Comment Request; Food and Drug Administration Recall Regulations

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on FDA recalls for human drugs, biological products, devices, animal drugs, food, cosmetics, and tobacco.

DATES: Submit either electronic or written comments on the collection of information by January 16, 2018.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 16, 2018. The *https://www.regulations.gov* electronic filing system will accept comments until midnight Eastern Time at the end of January 16, 2018. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–N–6175 for ''Agency Information Collection Activities; Proposed Collection; Food and Drug Administration Recall Regulations.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Ila S. Mizrachi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–7726, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

FDA Recall Regulations—21 CFR Part 7

OMB Control Number 0910–0249—Extension

Section 701 of the Federal Food, Drug, and Cosmetic Act charges the Secretary of Health and Human Services, through FDA, with the responsibility of assuring recalls (21 U.S.C. 371, Regulations and hearings, and 21 CFR part 7, Enforcement Policy, Subpart C, Recalls (Including Product Corrections)—Guidance on Policy, Procedures, and Industry Responsibilities which pertain to the recall regulations and provide guidance to manufacturers on recall responsibilities). The regulations and guidance apply to all FDA-regulated products (*i.e.,* food, including animal feed; drugs, including animal drugs; medical devices, including in vitro diagnostic products; cosmetics; biological products intended for human use; and tobacco).

These responsibilities of companies conducting recalls include providing FDA with complete details of the recall including: (1) Reason(s) for the removal or correction, risk evaluation, quantity produced, distribution information, firm's recall strategy, a copy of any recall communication(s), and a contact official (§ 7.46); (2) notifying direct accounts of the recall, providing guidance regarding further distribution, giving instructions as to what to do with the product, providing recipients with a ready means of reporting to the recalling firm (§ 7.49); and (3) submitting periodic status reports so that FDA may assess the progress of the recall. Status report information may be determined by, among other things, evaluation return reply cards, effectiveness checks and product returns (§ 7.53), and providing the opportunity for a firm to request in writing that FDA terminate the recall (§ 7.55(b)).

A search of the FDA database was performed to determine the number of recalls that took place during fiscal years 2014 to 2016. The resulting number of total recalls (8,560) from this database search were then averaged over the 3 years, and the resulting per year average of recalls (2,853) are used in estimating the current annual reporting burden for this report. The resulting number of total terminations (8,560) from this database search were then averaged over the 3 years, and the resulting per year average of terminations (2,853) are used in estimating the current annual reporting burden for this report.

FDA estimates the total annual industry burden to collect and provide the required information to be 470,745 burden hours.

The following is a summary of the estimated annual burden hours for recalling firms (manufacturers, processors, and distributors) to comply with the reporting requirements of FDA's recall regulations, recognizing that there may be a vast difference in the information collection and reporting time involved in different recalls of FDA's regulated products.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Firm initiated recall (§ 7.46) and recall communications (§ 7.49)	2,853	1	2,853	25	71,325
Recall status reports (§ 7.53)	2,853	13	37,089	10	370,890
Termination of a recall (§ 7.55(b))	2,853	1	2,853	10	28,530
Total					470,745

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

I. Total Annual Reporting

A. Firm Initiated Recall and Recall Communications

We request firms that voluntarily remove or correct foods and drugs (human or animal), cosmetics, medical devices, biologics, and tobacco to immediately notify the appropriate FDA District Office of such actions. The firm is to provide complete details of the recall reason, risk evaluation, quantity produced, distribution information, firms' recall strategy, and a contact official as well as requires firms to notify their direct accounts of the recall and to provide recipients with a ready means of reporting to the recalling firm. Under these portions of the collection of information, the Agency estimates it will receive 2,853 responses annually based on the average number of recalls over the last 3 fiscal years. The number of responses multiplied by the number of respondents equals 2,853. The average burden hours, 25, multiplied by total number of annual responses equal 71,325.

B. Recall Status Reports

We request that recalling firms provide periodic status reports so FDA can ascertain the progress of the recall. This request only applies to firms with active recalls, and periodic status reports are estimated to be reported every 2 to 4 weeks. This collection of information will generate approximately 2,853 responses annually, based on the average number of recalls over the last 3 fiscal years, 8,560. The number of respondents multiplied by the number of responses per respondents (13) equals a total number of annual responses of 37,089. The total number of responses, 37,089, multiplied by an average burden hours of 10 per response equals a total of 370,890 total hours.

C. Termination of a Recall

We provide the firms an opportunity to request in writing that FDA end the recall. The Agency estimates it will receive 2,853 responses annually based on the average number of terminations over the past 3 fiscal years. The total annual responses of 2,853 multiplied by the average burden hours of 10 per response equals a total number of hours of 28,530.

II. Total Annual Third-Party Disclosure Burden

Recall Communications. We request that firms notify their consignees of the recall and to provide recipients with a ready means of reporting to the recalling firm. Under this portion of the collection of information, the Agency estimates firms will provide 4,433,562 notifications annually based on the number of respondents/consignees (2,853) multiplied by the number of disclosures per respondent (1,554). The total number of hours is 248,279 (based on 4,433,562 multiplied by 0.056 hours).

TABLE 2—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN [1]

21 CFR section	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Recall communications (§ 7.49)	2,853	1,554	4,433,562	0.056	248,279

[1] There are no capital costs or operating and maintenance costs associated with this information collections.

FDA regulates many different types of products including, but not limited to, medical products, food and feed, cosmetics, and tobacco products. FDA notes that not all third-party disclosures provided by firms to their consignees are similar in nature and may entail different methods and mediums of communication. FDA estimates the burden for third-party disclosure per recall event to be an average of 25 hours. This burden estimate factored out to the average number of consignees per recall (1,554) results in a burden per disclosure estimate of approximate hours (25 hours per recall/1,554 disclosures/recall = 0.056 hours).

Dated: November 9, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

[FR Doc. 2017–24923 Filed 11–16–17; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–6152]

Authorizations of Emergency Use of In Vitro Diagnostic Devices for Detection of Zika Virus; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the issuance of two Emergency Use Authorizations (EUAs) (the Authorizations) for in vitro diagnostic devices for detection of the Zika virus in response to the Zika virus outbreak in the Americas. FDA issued these Authorizations under the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as requested by Siemens Healthcare Diagnostics, Inc. and Chembio Diagnostic Systems, Inc. The Authorizations contain, among other things, conditions on the emergency use of the authorized in vitro diagnostic devices. The Authorizations follow the February 26, 2016, determination by the Secretary of Health and Human Services (HHS) that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves Zika virus. On the basis of such determination, the Secretary of HHS declared on February 26, 2016, that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under the FD&C Act. The Authorizations, which include an explanation of the reasons for issuance, are reprinted in this document.

DATES: The Authorization for Siemens Healthcare Diagnostics, Inc. is effective as of September 18, 2017; the Authorization for Chembio Diagnostic Systems, Inc. is effective as of September 27, 2017.

ADDRESSES: Submit written requests for single copies of the EUAs to the Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4338, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request or include a fax number to which the Authorizations may be sent. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the Authorizations.

FOR FURTHER INFORMATION CONTACT: Carmen Maher, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4347, Silver Spring, MD 20993–0002, 301–796–8510 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

Section 564 of the FD&C Act (21 U.S.C. 360bbb–3) as amended by the Project BioShield Act of 2004 (Pub L. 108–276) and the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (Pub L. 113–5) allows FDA to strengthen the public health protections against biological, chemical, nuclear, and radiological agents. Among other things, section 564 of the FD&C Act allows FDA to authorize the use of an unapproved medical product or an unapproved use of an approved medical product in certain situations. With this EUA authority, FDA can help ensure that medical countermeasures may be used in emergencies to diagnose, treat, or prevent serious or life-threatening diseases or conditions caused by biological, chemical, nuclear, or radiological agents when there are no adequate, approved, and available alternatives.

Section 564(b)(1) of the FD&C Act provides that, before an EUA may be issued, the Secretary of HHS must declare that circumstances exist justifying the authorization based on one of the following grounds: (1) A determination by the Secretary of Homeland Security that there is a domestic emergency, or a significant potential for a domestic emergency, involving a heightened risk of attack with a biological, chemical, radiological, or nuclear agent or agents; (2) a determination by the Secretary of Defense that there is a military emergency, or a significant potential for a military emergency, involving a heightened risk to U.S. military forces of attack with a biological, chemical, radiological, or nuclear agent or agents; (3) a determination by the Secretary of HHS that there is a public health emergency, or a significant potential for a public health emergency, that affects, or has a significant potential to affect, national security or the health and security of U.S. citizens living abroad, and that involves a biological, chemical, radiological, or nuclear agent or agents, or a disease or condition that may be attributable to such agent or agents; or (4) the identification of a material threat by the Secretary of Homeland Security under section 319F–2 of the Public Health Service (PHS) Act (42 U.S.C. 247d–6b) sufficient to affect national security or the health and security of U.S. citizens living abroad.

Once the Secretary of HHS has declared that circumstances exist justifying an authorization under section 564 of the FD&C Act, FDA may authorize the emergency use of a drug, device, or biological product if the Agency concludes that the statutory criteria are satisfied. Under section 564(h)(1) of the FD&C Act, FDA is required to publish in the **Federal Register** a notice of each authorization, and each termination or revocation of an authorization, and an explanation of the reasons for the action. Section 564 of the FD&C Act permits FDA to authorize the introduction into interstate commerce of a drug, device, or biological product intended for use when the Secretary of HHS has declared that circumstances exist justifying the authorization of emergency use. Products appropriate for emergency use may include products and uses that are not approved, cleared, or licensed under sections 505, 510(k), or 515 of the FD&C Act (21 U.S.C. 355, 360(k), and 360e) or section 351 of the PHS Act (42 U.S.C. 262). FDA may issue an EUA only if, after consultation with the HHS Assistant Secretary for Preparedness and Response, the Director of the National Institutes of Health, and the Director of the Centers for Disease Control and Prevention (to the extent feasible and appropriate given the applicable circumstances), FDA [1] concludes: (1) That an agent referred to in a declaration of emergency or threat can cause a serious or life-threatening disease or condition; (2) that, based on the totality of scientific evidence available to FDA, including data from adequate and well-controlled clinical trials, if available, it is reasonable to believe that: (A) the product may be effective in diagnosing, treating, or preventing (i) such disease or condition; or (ii) a serious or life-threatening disease or condition caused by a product authorized under section 564, approved or cleared under the FD&C Act, or licensed under section 351 of the PHS Act, for diagnosing, treating, or preventing such a disease or condition caused by such an agent; and (B) the known and potential benefits of the product, when used to diagnose, prevent, or treat such disease or condition, outweigh the known and potential risks of the product, taking into consideration the material threat posed by the agent or agents identified in a declaration under section 564(b)(1)(D) of the FD&C Act, if applicable; (3) that there is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating such disease or condition; and (4) that such other criteria as may be prescribed by regulation are satisfied.

No other criteria for issuance have been prescribed by regulation under

[1] The Secretary of HHS has delegated the authority to issue an EUA under section 564 of the FD&C Act to the Commissioner of Food and Drugs.

section 564(c)(4) of the FD&C Act. Because the statute is self-executing, regulations or guidance are not required for FDA to implement the EUA authority.

II. EUA Requests for In Vitro Diagnostic Devices for Detection of the Zika Virus

On February 26, 2016, the Secretary of HHS determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of U.S. citizens living abroad and that involves Zika virus. On February 26, 2016, under section 564(b)(1) of the FD&C Act, and on the basis of such determination, the Secretary of HHS declared that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under section 564 of the FD&C Act. Notice of the determination and declaration of the Secretary was published in the **Federal Register** on March 2, 2016 (81 FR 10878). On September 8, 2017, Siemens Healthcare Diagnostics, Inc. requested, and on September 18, 2017, FDA issued, an EUA for the ADVIA Centaur Zika test, subject to the terms of the Authorization. On September 14, 2017, Chembio Diagnostic Systems, Inc. requested, and on September 27, 2017, FDA issued an EUA for the DPP Zika IgM Assay System, subject to the terms of the Authorization.

III. Electronic Access

An electronic version of this document and the full text of the Authorizations are available on the internet at *https://www.regulations.gov/*.

IV. The Authorizations

Having concluded that the criteria for issuance of the Authorizations under section 564(c) of the FD&C Act are met, FDA has authorized the emergency use of two in vitro diagnostic devices for detection of Zika virus subject to the terms of the Authorizations. The Authorizations in their entirety (not including the authorized versions of the fact sheets and other written materials) follow and provide an explanation of the reasons for issuance, as required by section 564(h)(1) of the FD&C Act:

BILLING CODE 4164–01–P

September 18, 2017

Matthew Gee, M.Sc.
Senior Manager, Regulatory Affairs
Siemens Healthcare Diagnostics Inc.
511 Benedict Avenue
Tarrytown, NY 10591-5097

Dear Mr. Gee:

This letter is in response to your request that the Food and Drug Administration (FDA) issue an Emergency Use Authorization (EUA) for emergency use of Siemens Healthcare Diagnostics Incorporated's ("Siemens Healthcare Diagnostics") ADVIA Centaur Zika test for the presumptive qualitative detection of Zika virus IgM antibodies in human serum and plasma (potassium EDTA or lithium heparin, each collected alongside a patient-matched serum specimen) specimens collected from individuals meeting the Centers for Disease Control and Prevention (CDC) Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated), by laboratories in the United States (U.S.) that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories,[1] pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. § 360bbb-3). Specimens from symptomatic patients or returning travelers from endemic areas should not be collected prior to 8 days after onset of symptoms or risk of exposure, respectively. Where there are presumptive Zika positive results from the ADVIA Centaur Zika test, confirmation of the presence of anti-Zika IgM antibodies requires additional testing, as described in the Scope of Authorization of this letter (Section II) and in the authorized Instructions for Use document, and/or consideration alongside test results for other patient-matched specimens using the latest CDC testing algorithms for the diagnosis of Zika virus infection.[2]

On February 26, 2016, pursuant to section 564(b)(1)(C) of the Act (21 U.S.C. § 360bbb-3(b)(1)(C), the Secretary of Health and Human Services (HHS) determined that there is a significant potential for a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad and that

[1] For ease of reference, this letter will refer to "laboratories in the United States (U.S.) that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories" as "authorized laboratories."
[2] Available at http://www.cdc.gov/zika/laboratories/lab-guidance.html (last updated on July 24, 2017).

involves Zika virus.[3] Pursuant to section 564(b)(1) of the Act (21 U.S.C. § 360bbb-3(b)(1)), and on the basis of such determination, the Secretary of HHS then declared that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under 21 U.S.C. § 360bbb-3(a).[4]

Having concluded that the criteria for issuance of this authorization under section 564(c) of the Act (21 U.S.C. § 360bbb-3(c)) are met, I am authorizing the emergency use of the ADVIA Centaur Zika test (as described in the Scope of Authorization section of this letter (Section II)) in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) (as described in the Scope of Authorization section of this letter (Section II)) for the presumptive qualitative detection of Zika virus infection by authorized laboratories, subject to the terms of this authorization.

I. Criteria for Issuance of Authorization

I have concluded that the emergency use of the ADVIA Centaur Zika test for the presumptive qualitative detection of Zika virus IgM antibodies in the specified population meets the criteria for issuance of an authorization under section 564(c) of the Act, because I have concluded that:

1. The Zika virus can cause Zika virus infection, a serious or life-threatening disease or condition to humans infected with the virus;

2. Based on the totality of scientific evidence available to FDA, it is reasonable to believe that the ADVIA Centaur Zika test may be effective in diagnosing recent Zika virus infection, and that the known and potential benefits of the ADVIA Centaur Zika test for diagnosing Zika virus infection outweigh the known and potential risks of such product, when, for presumptive Zika positive results, additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered; and

3. There is no adequate, approved, and available alternative to the emergency use of the ADVIA Centaur Zika test for diagnosing Zika virus infection.[5]

---

[3] As amended by the Pandemic and All-Hazards Preparedness Reauthorization Act, Pub. L. No. 113-5, under section 564(b)(1)(C) of the Act, the Secretary may make a determination of a public health emergency, or of a significant potential for a public health emergency.

[4] HHS. *Determination and Declaration Regarding Emergency Use of In Vitro Diagnostic Tests for Detection of Zika Virus and/or Diagnosis of Zika Virus Infection.* 81 Fed. Reg. 10878 (March 2, 2016).

[5] No other criteria of issuance have been prescribed by regulation under section 564(c)(4) of the Act.

II. Scope of Authorization

I have concluded, pursuant to section 564(d)(1) of the Act, that the scope of this authorization is limited to the use of the authorized ADVIA Centaur Zika test by authorized laboratories for the presumptive qualitative detection of Zika virus IgM antibodies in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) when, for presumptive Zika positive results, additional testing (as described in the Instructions for Use document) is performed[6] and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered.

The Authorized ADVIA Centaur Zika Test

The ADVIA Centaur Zika test is an immunoassay for the *in vitro* presumptive qualitative detection of Zika virus IgM antibodies in human serum and potassium EDTA or lithium heparin plasma (each collected alongside a patient-matched serum specimen) specimens and other authorized specimen types from individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

The ADVIA Centaur Zika test is comprised of the ADVIA Centaur Zika Ab and ADVIA Centaur Zika IgM assays. All ADVIA Centaur Zika Ab reactive samples must be tested with the ADVIA Centaur Zika IgM assay.

The ADVIA Centaur Zika Ab assay is an antibody capture immunoassay using a 2-pass format. In the first pass, coated microparticles (solid phase) are added to the cuvette, binding antibodies from the patient sample. The captured antibodies are washed and resuspended. In the second pass, the anti-Zika antibodies captured on the Solid Phase are detected by the addition of NS1 antigen labeled with acridinium ester (Lite Reagent) for chemiluminescent detection.

The ADVIA Centaur Zika IgM assay is an IgM capture immunoassay using a 2-pass format. In the first pass, the microparticles, coated with anti-human IgM monoclonal antibody (Solid Phase), are added to the cuvette, binding IgM from the patient sample. The captured IgM antibodies are washed and resuspended. In the second pass, the anti-Zika IgM captured on the Solid Phase is detected by the addition of NS1 antigen labeled with acridinium ester (Lite Reagent) for chemiluminescent detection.

The ADVIA Centaur Zika test includes use of the ADVIA Centaur XP and/or ADVIA Centaur XPT immunoassay analyzers, and other authorized instruments.

[6] As discussed in the Instructions for Use document, the additional testing for presumptive Zika IgM positive results is to be performed using the latest CDC testing algorithms for the diagnosis of Zika virus infection.

Page 4 – Mr. Gee, Siemens Healthcare Diagnostics Inc.

The ADVIA Centaur Zika test requires the following control materials and assay calibrators:

- ADVIA Centaur ZikaM low calibrator
- ADVIA Centaur ZikaM high calibrator
- ADVIA Centaur ZikaM Calibrator Assigned Value Card and barcode labels
- ADVIA Centaur ZikaM Master Curve Card
- ADVIA Centaur ZikaM Quality Control
    - 2 x 2 mL negative control
    - 2 x 2 mL positive control
    - Lot-specific assigned value card and barcode labels
- ADVIA Centaur ZikaAb Quality Control
    - 2 x 2 mL negative control
    - 2 x 2 mL positive control
    - Lot-specific assigned value card and barcode labels

Quality control requirements should be followed in conformance with local, state, and federal regulations or accreditation requirements and the user laboratory's standard quality control procedures.

The ADVIA Centaur Zika test also requires the use of additional materials and ancillary reagents commonly used in clinical laboratories and that are described in the authorized ADVIA Centaur Zika test Instructions for Use.

The above described ADVIA Centaur Zika test, when labeled consistently with the labeling authorized by FDA entitled "ADVIA Centaur Zika test" (available at http://www.fda.gov/MedicalDevices/%20Safety/EmergencySituations/ucm161496.htm), is authorized to be distributed to and used by authorized laboratories under this EUA, despite the fact that it does not meet certain requirements otherwise required by federal law. This labeling may be revised by Siemens Healthcare Diagnostics in consultation with, and with concurrence of, the Division of Microbiology Devices (DMD)/Office of In Vitro Diagnostics and Radiological Health (OIR)/Center for Devices and Radiological Health (CDRH).

The above described ADVIA Centaur Zika test is authorized to be accompanied by the following information pertaining to the emergency use, which is authorized to be made available to healthcare providers and patients:

- Fact Sheet for Healthcare Providers: Interpreting ADVIA Centaur Zika Test Results
- Fact Sheet for Patients: Understanding Results from the ADVIA Centaur Zika Test

Other Fact Sheets developed by Siemens Healthcare Diagnostics in consultation with, and with concurrence of, the Office of Counterterrorism and Emerging Threats (OCET)/Office of the Chief Scientist (OCS)/Office of the Commissioner (OC) and DMD/OIR/CDRH may be authorized to accompany the above described ADVIA Centaur Zika test and to be made available to healthcare providers and patients.

As described in Section IV below, Siemens Healthcare Diagnostics is also authorized to make available additional information relating to the emergency use of the authorized ADVIA Centaur Zika test that is consistent with, and does not exceed, the terms of this letter of authorization.

I have concluded, pursuant to section 564(d)(2) of the Act, that it is reasonable to believe that the known and potential benefits of the authorized ADVIA Centaur Zika test in the specified population, when used for presumptive qualitative detection of Zika virus IgM antibodies and used consistently with the Scope of Authorization of this letter (Section II), outweigh the known and potential risks of such a product.

I have concluded, pursuant to section 564(d)(3) of the Act, based on the totality of scientific evidence available to FDA, that it is reasonable to believe that the authorized ADVIA Centaur Zika test may be effective in the diagnosis of recent Zika virus infection, when used consistently with the Scope of Authorization of this letter (Section II), pursuant to section 564(c)(2)(A) of the Act.

FDA has reviewed the scientific information available to FDA, including the information supporting the conclusions described in Section I above, and concludes that the authorized ADVIA Centaur Zika test, when used to diagnose Zika virus infection in the specified population (as described in the Scope of Authorization of this letter (Section II)), meets the criteria set forth in section 564(c) of the Act concerning safety and potential effectiveness.

The emergency use of the authorized ADVIA Centaur Zika test under this EUA must be consistent with, and may not exceed, the terms of this letter, including the Scope of Authorization (Section II) and the Conditions of Authorization (Section IV). Subject to the terms of this EUA and under the circumstances set forth in the Secretary of HHS's determination described above and the Secretary of HHS's corresponding declaration under section 564(b)(1), the ADVIA Centaur Zika test described above is authorized to diagnose Zika virus infection in individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

This EUA will cease to be effective when the HHS declaration that circumstances exist to justify the EUA is terminated under section 564(b)(2) of the Act or when the EUA is revoked under section 564(g) of the Act.

III. Waiver of Certain Requirements

I am waiving the following requirements for the ADVIA Centaur Zika test during the duration of this EUA:

- Current good manufacturing practice requirements, including the quality system requirements under 21 CFR Part 820 with respect to the design, manufacture, packaging, labeling, storage, and distribution of the ADVIA Centaur Zika test.

- Labeling requirements for cleared, approved, or investigational devices, including labeling requirements under 21 CFR 809.10 and 21 CFR 809.30, except for the intended use statement (21 CFR 809.10(a)(2), (b)(2)); adequate directions for use (21 U.S.C. 352(f)), (21 CFR 809.10(b)(5), (7), and (8)); any appropriate limitations on the use of the device including information required under 21 CFR 809.10(a)(4); and any available information regarding performance of the device, including requirements under 21 CFR 809.10(b)(12).

IV. Conditions of Authorization

Pursuant to section 564 of the Act, I am establishing the following conditions on this authorization:

Siemens Healthcare Diagnostics and Its Authorized Distributor(s)

A. Siemens Healthcare Diagnostics and its authorized distributor(s) will distribute the authorized ADVIA Centaur Zika test with the authorized labeling only to authorized laboratories. Siemens Healthcare Diagnostics may request changes to the authorized labeling. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

B. Siemens Healthcare Diagnostics and its authorized distributor(s) will provide to authorized laboratories the authorized ADVIA Centaur Zika test Fact Sheet for Healthcare Providers and the authorized ADVIA Centaur Zika test Fact Sheet for Patients, and any additional ADVIA Centaur Zika test Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

C. Siemens Healthcare Diagnostics and its authorized distributor(s) will make available on their websites the authorized ADVIA Centaur Zika test Fact Sheet for Healthcare Providers and the authorized ADVIA Centaur Zika test Fact Sheet for Patients, and any additional ADVIA Centaur Zika test Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

D. Siemens Healthcare Diagnostics and its authorized distributor(s) will inform authorized laboratories and relevant public health authority(ies) of this EUA, including the terms and conditions herein.

Page 7 – Mr. Gee, Siemens Healthcare Diagnostics Inc.

E. Siemens Healthcare Diagnostics and its authorized distributor(s) will ensure that authorized laboratories using the authorized ADVIA Centaur Zika test have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[7]

F. Through a process of inventory control, Siemens Healthcare Diagnostics and its authorized distributor(s) will maintain records of device usage.

G. Siemens Healthcare Diagnostics and its authorized distributor(s) will collect information on the performance of the test. Siemens Healthcare Diagnostics will report to FDA any suspected occurrence of false positive and false negative results and significant deviations from the established performance characteristics of the test of which Siemens Healthcare Diagnostics becomes aware.

H. Siemens Healthcare Diagnostics and its authorized distributor(s) are authorized to make available additional information relating to the emergency use of the authorized ADVIA Centaur Zika test that is consistent with, and does not exceed, the terms of this letter of authorization.

Siemens Healthcare Diagnostics

I. Siemens Healthcare Diagnostics will notify FDA of any authorized distributor(s) of the ADVIA Centaur Zika test, including the name, address, and phone number of any authorized distributor(s).

J. Siemens Healthcare Diagnostics will provide its authorized distributor(s) with a copy of this EUA, and communicate to its authorized distributor(s) any subsequent amendments that might be made to this EUA and its authorized accompanying materials (e.g., Fact Sheets, Instructions for Use).

K. Siemens Healthcare Diagnostics may request changes to the authorized ADVIA Centaur Zika test Fact Sheet for Healthcare Providers and the authorized ADVIA Centaur Zika test Fact Sheet for Patients. Siemens Healthcare Diagnostics may also develop new ADVIA Centaur Zika test Fact Sheets for Healthcare Providers and Patients, if appropriate, and may request changes to such Fact Sheets. All such requests listed in this condition of authorization will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, OCET/OCS/OC and DMD/OIR/CDRH.

L. Siemens Healthcare Diagnostics may request the addition of other instruments for use with the authorized ADVIA Centaur Zika test. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

---

[7] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Siemens Healthcare Diagnostics and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

M. Siemens Healthcare Diagnostics may request the addition of other ancillary reagents for use with the authorized ADVIA Centaur Zika test. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

N. Siemens Healthcare Diagnostics may request the addition of other specimen types for use with the authorized ADVIA Centaur Zika test. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

O. Siemens Healthcare Diagnostics may request the addition of other control materials for use with the authorized ADVIA Centaur Zika test. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

P. Siemens Healthcare Diagnostics may request substitution for or changes to the authorized materials used in the detection process of the human anti-Zika IgM in the specimen. Such requests will be made by Siemens Healthcare Diagnostics in consultation with, and require concurrence of, DMD/OIR/CDRH.

Q. Siemens Healthcare Diagnostics will track adverse events and report to FDA under 21 CFR Part 803.

R. Siemens Healthcare Diagnostics will evaluate the performance of the ADVIA Centaur Zika test with any FDA-recommended or established panel(s) of characterized clinical specimens, and will submit that performance data to FDA. After DMD/OIR/CDRH's review of and concurrence with the data, Siemens Healthcare Diagnostics will update its labeling, in consultation with, and with concurrence of, DMD/OIR/CDRH, to reflect the additional testing.

S. Siemens Healthcare Diagnostics will assess traceability[8] of the ADVIA Centaur Zika test with any FDA-recommended reference material(s). After submission to FDA and DMD/OIR/CDRH's review of and concurrence with the data, Siemens Healthcare Diagnostics will update its labeling to reflect the additional testing.

T. Siemens Healthcare Diagnostics will track the performance of the ADVIA Centaur Zika test and report to DMD/OIR/CDRH on a semi-annual basis.

[8] Traceability refers to tracing analytical sensitivity/reactivity back to a FDA-recommended reference material.

Page 9 – Mr. Gee, Siemens Healthcare Diagnostics Inc.

Authorized Laboratories

U. Authorized laboratories will include with reports of the results of the ADVIA Centaur Zika test the authorized Fact Sheet for Healthcare Providers and the authorized Fact Sheet for Patients, and any additional ADVIA Centaur Zika test Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize. Under exigent circumstances, other appropriate methods for disseminating these Fact Sheets may be used, which may include mass media.

V. Authorized laboratories will perform the ADVIA Centaur Zika test on only human serum or plasma (potassium EDTA or lithium heparin, each collected alongside a patient-matched serum specimen) specimens or with other authorized specimen types.

W. If non-serum specimens are used with the ADVIA Centaur Zika test, authorized laboratories responsible for collecting the patient specimen must collect a patient-matched serum specimen, or if this is not possible, an additional serum specimen must be collected soon after the original specimen. This is to facilitate any additional testing that may be required, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, to confirm Zika virus infection.

X. Authorized laboratories must read the results of the ADVIA Centaur Zika test on the ADVIA Centaur XP, ADVIA Centaur XPT, or on other authorized instruments.

Y. Within the United States and its territories, authorized laboratories will report all Presumptive Zika Positive results to Siemens Healthcare Diagnostics.

Z. Authorized laboratories will report only the final interpretation of algorithm test results (Presumptive Zika Positive, Negative for IgM antibodies to Zika virus, or Negative for antibodies to Zika virus), as described in the Instructions for Use document, to healthcare providers.

AA. Authorized laboratories will have a process in place to assure that, for Presumptive Zika Positive results, additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, are considered.

BB. Authorized laboratories will have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[9]

---

[9] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Siemens Healthcare Diagnostics and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

Page 10 – Mr. Gee, Siemens Healthcare Diagnostics Inc.

CC. Authorized laboratories will collect information on the performance of the ADVIA Centaur Zika test and report to DMD/OIR/CDRH (*via* email CDRH-EUA-Reporting@fda.hhs.gov) and Siemens Healthcare Diagnostics any suspected occurrence of false negative and false positive results and significant deviations from the established performance characteristics of which they become aware.

DD. All laboratory personnel using the assay must be appropriately trained in performing and interpreting immunoassay techniques, use appropriate laboratory and personal protective equipment when handling this kit, and use the test in accordance with the authorized labeling. All laboratory personnel using the assay must also be trained in and be familiar with the interpretation of results of the ADVIA Centaur Zika test.

Siemens Healthcare Diagnostics, Its Authorized Distributor(s), and Authorized Laboratories

EE. Siemens Healthcare Diagnostics, its authorized distributor(s), and authorized laboratories will ensure that any records associated with this EUA are maintained until notified by FDA. Such records will be made available to FDA for inspection upon request.

Conditions Related to Advertising and Promotion

FF. All advertising and promotional descriptive printed matter relating to the use of the authorized ADVIA Centaur Zika test shall be consistent with the authorized Fact Sheets and authorized labeling, as well as the terms set forth in this EUA and the applicable requirements set forth in the Act and FDA regulations.

GG. All advertising and promotional descriptive printed matter relating to the use of the authorized ADVIA Centaur Zika test shall clearly and conspicuously state that:

- This test has not been FDA cleared or approved;
- This test has been authorized by FDA under an EUA for use by authorized laboratories;
- This test has been authorized only for the diagnosis of Zika virus infection and not for any other viruses or pathogens; and
- This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection under section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

No advertising or promotional descriptive printed matter relating to the use of the authorized ADVIA Centaur Zika test may represent or suggest that this test is safe or effective for the diagnosis of Zika virus infection.

The emergency use of the authorized ADVIA Centaur Zika test as described in this letter of authorization must comply with the conditions and all other terms of this authorization.

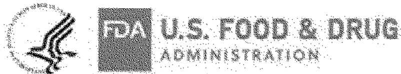
V. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection is terminated under section 564(b)(2) of the Act or the EUA is revoked under section 564(g) of the Act.

Sincerely,

Rachel Sherman, M.D., M.P.H.
Principal Deputy Commissioner

Enclosures



September 27, 2017

Thomas D. Ippolito
Vice President, Clinical and Regulatory Affairs
Chembio Diagnostic Systems, Inc.
3661 Horseblock Road
Medford, NY 11763

Dear Mr. Ippolito:

This letter is in response to your request that the Food and Drug Administration (FDA) issue an Emergency Use Authorization (EUA) for emergency use of Chembio Diagnostic Systems, Inc.'s ("Chembio") DPP Zika IgM Assay System for the presumptive qualitative detection of Zika virus IgM antibodies in human serum (plain or separation gel) and fingerstick whole blood, EDTA venous whole blood, or EDTA plasma (each collected alongside a patient-matched serum specimen) specimens collected from individuals meeting the Centers for Disease Control and Prevention (CDC) Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated), by laboratories in the United States that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories,[1] pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. § 360bbb-3). Specimens from symptomatic patients or returning travelers from endemic areas should not be collected prior to 8 days after onset of symptoms or risk of exposure, respectively. Where there are reactive results (i.e., presumptive Zika IgM positive), from the DPP Zika IgM Assay System, confirmation of the presence of anti-Zika IgM antibodies requires additional testing, as described in the Scope of Authorization of this letter (Section II) and in the authorized Instructions for Use document, and/or consideration alongside test results for other patient-matched specimens using the latest CDC testing algorithms for the diagnosis of Zika virus infection.[2]

On February 26, 2016, pursuant to section 564(b)(1)(C) of the Act (21 U.S.C. § 360bbb-3(b)(1)(C), the Secretary of Health and Human Services (HHS) determined that there is a significant potential for a public health emergency that has a significant potential to affect

[1] For ease of reference, this letter will refer to "laboratories in the United States that are certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, to perform high or moderate complexity tests, or by similarly qualified non-U.S. laboratories" as "authorized laboratories."

[2] Available at http://www.cdc.gov/zika/laboratories/lab-guidance.html (last updated on July 24, 2017).

national security or the health and security of United States citizens living abroad and that involves Zika virus.[3] Pursuant to section 564(b)(1) of the Act (21 U.S.C. § 360bbb-3(b)(1)), and on the basis of such determination, the Secretary of HHS then declared that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection, subject to the terms of any authorization issued under 21 U.S.C. § 360bbb-3(a).[4]

Having concluded that the criteria for issuance of this authorization under section 564(c) of the Act (21 U.S.C. § 360bbb-3(c)) are met, I am authorizing the emergency use of the DPP Zika IgM Assay System (as described in the Scope of Authorization section of this letter (Section II)) in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) (as described in the Scope of Authorization section of this letter (Section II)) for the presumptive qualitative detection of Zika virus infection by authorized laboratories, subject to the terms of this authorization.

I. Criteria for Issuance of Authorization

I have concluded that the emergency use of the DPP Zika IgM Assay System for the presumptive qualitative detection of Zika virus IgM antibodies in the specified population meets the criteria for issuance of an authorization under section 564(c) of the Act, because I have concluded that:

1. The Zika virus can cause Zika virus infection, a serious or life-threatening disease or condition to humans infected with the virus;

2. Based on the totality of scientific evidence available to FDA, it is reasonable to believe that the DPP Zika IgM Assay System may be effective in diagnosing recent Zika virus infection, and that the known and potential benefits of the DPP Zika IgM Assay System for diagnosing Zika virus infection outweigh the known and potential risks of such product, when, for reactive results (i.e., presumptive Zika IgM positive), additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered; and

3. There is no adequate, approved, and available alternative to the emergency use of the DPP Zika IgM Assay System for diagnosing Zika virus infection.[5]

[3] As amended by the Pandemic and All-Hazards Preparedness Reauthorization Act, Pub. L. No. 113-5, under section 564(b)(1)(C) of the Act, the Secretary may make a determination of a public health emergency, or of a significant potential for a public health emergency.

[4] HHS. *Determination and Declaration Regarding Emergency Use of In Vitro Diagnostic Tests for Detection of Zika Virus and/or Diagnosis of Zika Virus Infection.* 81 Fed. Reg. 10878 (March 2, 2016).

[5] No other criteria of issuance have been prescribed by regulation under section 564(c)(4) of the Act.

II. Scope of Authorization

I have concluded, pursuant to section 564(d)(1) of the Act, that the scope of this authorization is limited to the use of the authorized DPP Zika IgM Assay System by authorized laboratories for the presumptive qualitative detection of Zika virus IgM antibodies in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated) when, for reactive results (i.e., presumptive Zika IgM positive), additional testing (as described in the Instructions for Use document) is performed[6] and/or test results for other patient-matched specimens (using the latest CDC testing algorithms for the diagnosis of Zika virus infection) are considered.

The Authorized DPP Zika IgM Assay System

The DPP Zika IgM Assay System is a single-use immunochromatographic lateral flow assay for the *in vitro* presumptive qualitative detection of Zika virus IgM antibodies in human serum (plain or separation gel) and fingerstick whole blood, EDTA venous whole blood, or EDTA plasma (each collected alongside a patient-matched serum specimen) specimens and other authorized specimen types from individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

The DPP Zika IgM Assay System employs a dual path platform technology and consists of a sample path that distributes sample onto a reagent strip containing a TEST (T) area and a CONTROL (C) area in the test-control window of the test device. The reagent strip is for the detection of ZIKV IgM antibodies. The test procedure is based on capturing human IgM antibodies from the patient specimen in the TEST (T) area that is functionalized with Zika NS1 antigens followed by the addition of an antibody-binding colored conjugate. The patient specimen is collected and then diluted with sample buffer before being applied to the SAMPLE+BUFFER Well#1 of the DPP Zika Test Device. The specimen migrates along the sample path membrane and is delivered to the TEST (T) area of the reagent strip, where Zika NS1 antigens are immobilized. Zika-specific antibodies, if present in the sample, bind to the immobilized NS1 antigens in the TEST (T) area, while non-specific antibodies bind to the Protein A in the CONTROL (C) area. Running buffer is then added into the BUFFER Well #2, which hydrates the dried antibody-binding colored conjugate causing it to migrate to the TEST area. ZIKV IgM antibodies bound to the TEST (T) area will capture the antibody-binding colored conjugate and detection is performed using the Chembio DPP Micro Reader, or other authorized instruments, that uses assay-specific algorithms to verify the presence of the control line and measure color intensity in the TEST (T) area position; it interprets the results using

[6] As discussed in the Instructions for Use document, the additional testing for reactive results (i.e., presumptive Zika IgM positive) is to be performed using the latest CDC testing algorithms for the diagnosis of Zika virus infection.

assay-specific cut-off values, and reports a reactive, nonreactive, or invalid result along with a numerical intensity value for the IgM test line.

One of the limitations of this test is the possibility of false positive results in patients with a history of infection with other flaviviruses. For reactive results (i.e., presumptive Zika IgM positive), additional testing (as described in the Instructions for Use document) and/or consideration of test results for other patient-matched specimens, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, is therefore required to confirm Zika virus infection.

The DPP Zika IgM Assay System includes use of the DPP Zika Test Device kit and the DPP Micro Reader kit which are comprised of the following materials and instruments, or other authorized materials and instruments:

- The DPP Zika Test Device kit: individually pouched DPP Zika Test Devices each with a desiccant pouch, Microsafe tubes, sample vials, transfer pipets, DPP Zika IgM Sample Buffer- BLUE Cap, DPP Zika IgM Running Buffer – YELLOW Cap, product insert (authorized Instructions for Use) and a quick reference guide.
- The DPP Micro Reader kit: DPP Micro Reader, holder case, USB cable and user manual.

The DPP Zika IgM Assay System requires the following control materials or other authorized control materials, which are not provided with the test:

- DPP Zika IgM Assay Control Pack: DPP Zika Reactive Control, DPP Nonreactive Control and product insert. The assay controls are used to verify and assess the assay performance and verify the user's ability to properly perform the test and to interpret the results.

Quality control requirements should be followed in conformance with local, state, and federal regulations or accreditation requirements and the user laboratory's standard quality control procedures.

The DPP Zika IgM Assay System also requires the use of additional materials and ancillary reagents commonly used in clinical laboratories and that are described in the authorized DPP Zika IgM Assay System Instructions for Use.

The above described DPP Zika IgM Assay System, when labeled consistently with the labeling authorized by FDA entitled "DPP Zika IgM Assay System," "DPP Micro Reader," "DPP Zika IgM Assay Control Pack," and "DPP Zika IgM Assay System Quick Reference Instructions," (available at
http://www.fda.gov/MedicalDevices/Safety/EmergencySituations/ucm161496.htm), is authorized to be distributed to and used by authorized laboratories under this EUA, despite the fact that it does not meet certain requirements otherwise required by federal law. This labeling may be revised by Chembio in consultation with, and with concurrence of, the Division of Microbiology Devices (DMD)/Office of In Vitro Diagnostics and Radiological Health (OIR)/Center for Devices and Radiological Health (CDRH).

The above described DPP Zika IgM Assay System is authorized to be accompanied by the following information pertaining to the emergency use, which is authorized to be made available to healthcare providers and patients:

- Fact Sheet for Healthcare Providers: Interpreting DPP Zika IgM Assay System Results
- Fact Sheet for Patients: Understanding Results from the DPP Zika IgM Assay System

Other Fact Sheets developed by Chembio in consultation with, and with concurrence of, the Office of Counterterrorism and Emerging Threats (OCET)/Office of the Chief Scientist (OCS)/Office of the Commissioner (OC) and DMD/OIR/CDRH may be authorized to accompany the above described DPP Zika IgM Assay System and to be made available to healthcare providers and patients.

As described in Section IV below, Chembio is also authorized to make available additional information relating to the emergency use of the authorized DPP Zika IgM Assay System that is consistent with, and does not exceed, the terms of this letter of authorization.

I have concluded, pursuant to section 564(d)(2) of the Act, that it is reasonable to believe that the known and potential benefits of the authorized DPP Zika IgM Assay System in the specified population, when used for presumptive qualitative detection of Zika virus IgM antibodies and used consistently with the Scope of Authorization of this letter (Section II), outweigh the known and potential risks of such a product.

I have concluded, pursuant to section 564(d)(3) of the Act, based on the totality of scientific evidence available to FDA, that it is reasonable to believe that the authorized DPP Zika IgM Assay System may be effective in the diagnosis of recent Zika virus infection, when used consistently with the Scope of Authorization of this letter (Section II), pursuant to section 564(c)(2)(A) of the Act.

FDA has reviewed the scientific information available to FDA, including the information supporting the conclusions described in Section I above, and concludes that the authorized DPP Zika IgM Assay System, when used to diagnose Zika virus infection in the specified population (as described in the Scope of Authorization of this letter (Section II)), meets the criteria set forth in section 564(c) of the Act concerning safety and potential effectiveness.

The emergency use of the authorized DPP Zika IgM Assay System under this EUA must be consistent with, and may not exceed, the terms of this letter, including the Scope of Authorization (Section II) and the Conditions of Authorization (Section IV). Subject to the terms of this EUA and under the circumstances set forth in the Secretary of HHS's determination described above and the Secretary of HHS's corresponding declaration under section 564(b)(1), the DPP Zika IgM Assay System described above is authorized to diagnose Zika virus infection in individuals meeting CDC Zika virus clinical criteria (e.g., a history of clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiological criteria for which Zika virus testing may be indicated).

This EUA will cease to be effective when the HHS declaration that circumstances exist to justify the EUA is terminated under section 564(b)(2) of the Act or when the EUA is revoked under section 564(g) of the Act.

III. Waiver of Certain Requirements

I am waiving the following requirements for the DPP Zika IgM Assay System during the duration of this EUA:

- Current good manufacturing practice requirements, including the quality system requirements under 21 CFR Part 820 with respect to the design, manufacture, packaging, labeling, storage, and distribution of the DPP Zika IgM Assay System.

- Labeling requirements for cleared, approved, or investigational devices, including labeling requirements under 21 CFR 809.10 and 21 CFR 809.30, except for the intended use statement (21 CFR 809.10(a)(2), (b)(2)); adequate directions for use (21 U.S.C. 352(f)), (21 CFR 809.10(b)(5), (7), and (8)); any appropriate limitations on the use of the device including information required under 21 CFR 809.10(a)(4); and any available information regarding performance of the device, including requirements under 21 CFR 809.10(b)(12).

IV. Conditions of Authorization

Pursuant to section 564 of the Act, I am establishing the following conditions on this authorization:

Chembio and Its Authorized Distributor(s)

A. Chembio and its authorized distributor(s) will distribute the authorized DPP Zika IgM Assay System with the authorized labeling only to authorized laboratories. Chembio may request changes to the authorized labeling. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

B. Chembio and its authorized distributor(s) will provide to authorized laboratories the authorized DPP Zika IgM Assay System Fact Sheet for Healthcare Providers and the authorized DPP Zika IgM Assay System Fact Sheet for Patients, and any additional DPP Zika IgM Assay System Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

C. Chembio and its authorized distributor(s) will make available on their websites the authorized DPP Zika IgM Assay System Fact Sheet for Healthcare Providers and the authorized DPP Zika IgM Assay System Fact Sheet for Patients, and any additional DPP Zika IgM Assay System Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize.

Page 7 – Mr. Ippolito, Chembio Diagnostic Systems, Inc.

D. Chembio and its authorized distributor(s) will inform authorized laboratories and relevant public health authority(ies) of this EUA, including the terms and conditions herein.

E. Chembio and its authorized distributor(s) will ensure that authorized laboratories using the authorized DPP Zika IgM Assay System have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[7]

F. Through a process of inventory control, Chembio and its authorized distributor(s) will maintain records of device usage.

G. Chembio and its authorized distributor(s) will collect information on the performance of the assay. Chembio will report to FDA any suspected occurrence of false positive and false negative results and significant deviations from the established performance characteristics of the assay of which Chembio becomes aware.

H. Chembio and its authorized distributor(s) are authorized to make available additional information relating to the emergency use of the authorized DPP Zika IgM Assay System that is consistent with, and does not exceed, the terms of this letter of authorization.

I. Chembio and its authorized distributor(s) will make available the DPP Zika IgM Control Pack control material or other authorized control materials for purchase at the same time as the DPP Zika IgM Assay System.

Chembio

J. Chembio will notify FDA of any authorized distributor(s) of the DPP Zika IgM Assay System, including the name, address, and phone number of any authorized distributor(s).

K. Chembio will provide its authorized distributor(s) with a copy of this EUA, and communicate to its authorized distributor(s) any subsequent amendments that might be made to this EUA and its authorized accompanying materials (e.g., Fact Sheets, Instructions for Use).

L. Chembio may request changes to the authorized DPP Zika IgM Assay System Fact Sheet for Healthcare Providers and the authorized DPP Zika IgM Assay System Fact Sheet for Patients. Chembio may also develop new DPP Zika IgM Assay System Fact Sheets for Healthcare Providers and Patients, if appropriate, and may request changes to such Fact Sheets. All such requests listed in this condition of authorization will be made by Chembio in consultation with, and require concurrence of, OCET/OCS/OC and DMD/OIR/CDRH.

---

[7] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Chembio and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

M. Chembio may request the addition of other instruments for use with the authorized DPP Zika IgM Assay System. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

N. Chembio may request the addition of other ancillary reagents for use with the authorized DPP Zika IgM Assay System. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

O. Chembio may request the addition of other specimen types for use with the authorized DPP Zika IgM Assay System. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

P. Chembio may request the addition of other control materials for use with the authorized DPP Zika IgM Assay System. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

Q. Chembio may request substitution for or changes to the authorized materials used in the detection process of the human anti-Zika IgM in the specimen. Such requests will be made by Chembio in consultation with, and require concurrence of, DMD/OIR/CDRH.

R. Chembio will track adverse events and report to FDA under 21 CFR Part 803.

S. Chembio will evaluate the performance of the DPP Zika IgM Assay System with any FDA-recommended or established panel(s) of characterized clinical specimens, and will submit that performance data to FDA. After DMD/OIR/CDRH's review of and concurrence with the data, Chembio will update its labeling, in consultation with, and with concurrence of, DMD/OIR/CDRH, to reflect the additional testing.

T. Chembio will assess traceability[8] of the DPP Zika IgM Assay System with any FDA-recommended reference material(s). After submission to FDA and DMD/OIR/CDRH's review of and concurrence with the data, Chembio will update its labeling to reflect the additional testing.

U. Chembio will track the performance of the DPP Zika IgM Assay System and report to DMD/OIR/CDRH on a semi-annual basis.

Authorized Laboratories

V. Authorized laboratories will include with reports of the results of the DPP Zika IgM Assay System the authorized Fact Sheet for Healthcare Providers and the authorized Fact Sheet for Patients, and any additional DPP Zika IgM Assay System Fact Sheets for Healthcare Providers and Patients that OCET/OCS/OC and DMD/OIR/CDRH may authorize. Under exigent circumstances, other appropriate methods for disseminating

[8] Traceability refers to tracing analytical sensitivity/reactivity back to a FDA-recommended reference material.

these Fact Sheets may be used, which may include mass media.

W. Authorized laboratories will perform the DPP Zika IgM Assay System on only human serum (plain or separation gel) and fingerstick whole blood, EDTA venous whole blood, or EDTA plasma (each collected alongside a patient-matched serum specimen) specimens or with other authorized specimen types.

X. If non-serum specimens are used with the DPP Zika IgM Assay System, authorized laboratories responsible for collecting the patient specimen must collect a patient-matched serum specimen, or if this is not possible, an additional serum specimen must be collected soon after the original specimen. This is to facilitate any additional testing that may be required, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, to confirm Zika virus infection.

Y. Authorized laboratories must read the results of the DPP Zika IgM Assay System on the DPP Micro Reader or on other authorized instruments. Authorized laboratories must not attempt to interpret the results of the DPP Zika IgM Assay System visually.

Z. Within the United States and its territories, authorized laboratories will report all reactive results (i.e., presumptive Zika IgM positive) to Chembio.

AA. Authorized laboratories will have a process in place to ensure that, for reactive results (i.e., presumptive Zika IgM positive), additional testing (as described in the Instructions for Use document) is performed and/or test results for other patient-matched specimens, using the latest CDC testing algorithms for the diagnosis of Zika virus infection, are considered.

BB. Authorized laboratories will have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.[9]

CC. Authorized laboratories will collect information on the performance of the DPP Zika IgM Assay System and report to DMD/OIR/CDRH (*via* email CDRH-EUA-Reporting@fda.hhs.gov) and Chembio any suspected occurrence of false negative and false positive results and significant deviations from the established performance characteristics of which they become aware.

DD. All laboratory personnel using the assay must be appropriately trained in performing and interpreting immunochromatographic techniques, use appropriate laboratory and personal protective equipment when handling this kit, and use the test in accordance with the authorized labeling. All laboratory personnel using the assay must also be trained in and be familiar with the interpretation of results of the DPP Zika IgM Assay System.

[9] For questions related to reporting Zika test results to relevant public health authorities, it is recommended that Chembio and authorized laboratories consult with the applicable country, state, or territory health department(s). According to CDC, Zika is a nationally notifiable condition (see http://www.cdc.gov/zika/).

Chembio, Its Authorized Distributor(s), and Authorized Laboratories

EE. Chembio, its authorized distributor(s), and authorized laboratories will ensure that any records associated with this EUA are maintained until notified by FDA. Such records will be made available to FDA for inspection upon request.

Conditions Related to Advertising and Promotion

FF. All advertising and promotional descriptive printed matter relating to the use of the authorized DPP Zika IgM Assay System shall be consistent with the authorized Fact Sheets and authorized labeling, as well as the terms set forth in this EUA and the applicable requirements set forth in the Act and FDA regulations.

GG. All advertising and promotional descriptive printed matter relating to the use of the authorized DPP Zika IgM Assay System shall clearly and conspicuously state that:

- This test has not been FDA cleared or approved;
- This test has been authorized by FDA under an EUA for use by authorized laboratories;
- This test has been authorized only for the diagnosis of Zika virus infection and not for any other viruses or pathogens; and
- This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection under section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

No advertising or promotional descriptive printed matter relating to the use of the authorized DPP Zika IgM Assay System may represent or suggest that this test is safe or effective for the diagnosis of Zika virus infection.

The emergency use of the authorized DPP Zika IgM Assay System as described in this letter of authorization must comply with the conditions and all other terms of this authorization.

V. Duration of Authorization

This EUA will be effective until the declaration that circumstances exist justifying the authorization of the emergency use of *in vitro* diagnostic tests for detection of Zika virus and/or diagnosis of Zika virus infection is terminated under section 564(b)(2) of the Act or the EUA is revoked under section 564(g) of the Act.

BILLING CODE 4164–01–C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–D–6159]

Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft document entitled ''Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry.'' The draft guidance, when finalized, will provide stakeholders engaged in the development of regenerative medicine therapies with FDA's current thinking on the expedited development and review of these products. The draft guidance describes the expedited programs available to sponsors of regenerative medicine therapies for serious or life-threatening diseases or conditions (referred to in the draft guidance as serious conditions), including those products designated as regenerative advanced therapies (which FDA refers to as ''regenerative medicine advanced therapy'' (RMAT) designation); describes how the Center for Biologics Evaluation and Research (CBER) will work with sponsors and encourage flexibility in clinical trial design to facilitate the development of data to demonstrate the safety and effectiveness of regenerative medicine therapies being developed to address unmet medical needs in patients with serious or life-threatening diseases or conditions; and describes the opportunities for sponsors of regenerative medicine therapies to interact with CBER review staff.

DATES: Submit either electronic or written comments on the draft guidance by February 15, 2018 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–D–6159 for ''Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20

and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Tami Belouin, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled ''Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry.'' The draft guidance document describes the expedited programs available to sponsors of regenerative medicine therapies for serious or life-threatening diseases or conditions (referred to in the draft guidance as serious conditions), including those products designated as RMATs; provides information about the provisions in the 21st Century Cures Act (Cures Act) (Pub. L. 114–225) regarding the use of the accelerated approval pathway for regenerative medicine therapies that have been granted designation as an RMAT; describes how CBER will encourage flexibility in clinical trial design to facilitate the development of data to demonstrate the safety and effectiveness of regenerative medicine therapies that are being developed to address unmet needs in patients with serious conditions; and describes the opportunities for sponsors of regenerative medicine therapies to interact with CBER review staff.

The draft guidance document addresses regenerative medicine therapies, which are defined in section 506(g)(8) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act), as amended by the Cures Act, as including cell therapies, therapeutic tissue engineering products, human cell and tissue products, and combination products using any such therapies or products, except for those regulated solely under section 361 of the Public Health Service Act (PHS Act) (42 U.S.C. 264) and 21 CFR part 1271. Gene therapies, including genetically modified cells, that lead to a durable modification of cells or tissues can meet the definition of a regenerative medicine therapy. Under section 506(g) of the FD&C Act, RMAT designation is available for a drug (*i.e.,* a human drug, including a drug that is a biological product) that meets the definition of regenerative medicine therapy; is intended to treat, modify, reverse, or cure a serious or life-threatening disease or condition; and with respect to which preliminary clinical evidence indicates the potential to address unmet medical needs for such disease or condition. A combination product (biologic-device, biologic-drug, or biologic-device-drug) can be eligible for RMAT designation when the biological product provides the greatest contribution to the overall intended therapeutic effects of the combination product (*i.e.,* the primary mode of action in the combination product is conveyed by the biological product component).

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of a document entitled ''Evaluation of Devices Used with Regenerative Medicine Advanced Therapies; Draft Guidance for Industry.''

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Expedited Programs for Regenerative Medicine Therapies for Serious Conditions; Draft Guidance for Industry.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014; the collections of information regarding formal meetings in ''Guidance for Formal Meetings Between the FDA and Sponsors or Applicants of PDUFA Products'' have been approved under OMB control number 0910–0429; the collections of information in 21 CFR part 601 have been approved under OMB control number 0910–0338; the collections of information for expedited programs in ''Guidance for Industry: Expedited Programs for Serious Conditions—Drugs and Biologics,'' have been approved under OMB control number 0910–0765; the collections of information in 21 CFR part 314 have been approved under OMB control number 0910–0001.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either *https://www.fda.gov/BiologicsBloodVaccines/GuidanceCompliance RegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: November 13, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

Food and Drug Administration

[Docket No. FDA–2014–D–1167]

Controlled Correspondence Related to Generic Drug Development; Draft Guidance for Industry; Availability; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration is correcting a notice entitled ''Controlled Correspondence Related to Generic Drug Development; Draft Guidance for Industry; Availability'' that appeared in the

Federal Register of November 3, 2017. The document announced the availability of a draft guidance for industry. The document was published with the incorrect docket number. This document corrects that error.

FOR FURTHER INFORMATION CONTACT: Lisa Granger, Office of Policy, Food and Drug Administration, 10903 New Hampshire Ave. Bldg. 32, Rm. 3330, Silver Spring, MD 20993–0002, 301–796–9115, *lisa.granger@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In the **Federal Register** of Friday, November 3, 2017 (82 FR 51277), in FR Doc. 2017–23947, the following correction is made:

On page 51277, in the second column, in the header of the document, ''[Docket FDA–2014–D–1147]'' is corrected to read ''[Docket No. FDA–2014–D–1167]''.

Dated: November 9, 2017.

Anna K. Abram,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

Food and Drug Administration

[Docket No. FDA–2015–D–2245]

Unique Device Identification: Direct Marking of Devices; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the guidance entitled ''Unique Device Identification: Direct Marking of Devices.'' This document is intended to clarify when direct marking of devices with a unique device identifier (UDI) is required, and to assist industry and FDA staff in understanding direct marking requirements.

DATES: The announcement of the guidance is published in the **Federal Register** on November 17, 2017.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–2245 for ''Unique Device Identification: Direct Marking of Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled ''Unique Device Identification: Direct Marking of Devices'' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002, or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Christina Savisaar, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3303, Silver Spring, MD 20993–0002, 301–496–6404, email: *GUDIDSupport@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 801.45 (21 CFR 801.45) requires a device to be directly marked with a UDI when the device is intended to be used more than once and intended to be reprocessed before each use. However, ''intended to be used more than once'' and ''intended to be reprocessed'' are not defined in the UDI regulations. This guidance provides FDA's interpretation of these terms, clarifies when direct marking of devices with a UDI is required, provides recommendations for how labelers should comply with the UDI direct marking requirements, and clarifies the criteria for exceptions to the direct marking requirement.

In the **Federal Register** of June 26, 2015, FDA published the notice of availability of ''Draft Guidance for Industry and Food and Drug Administration Staff: Unique Device Identification: Direct Marking of Devices'' (80 FR 36821) (the ''Draft Guidance''). In the notice of availability, FDA also solicited feedback on two questions related to interpretation of ''intended to be reprocessed'': (1) Should the definition of ''reprocessing'' for purposes of UDI direct marking requirements include cleaning alone without subsequent disinfection and/or sterilization of the device? and (2) what public health benefits would be served by requiring a UDI direct marking to be affixed to devices intended to be reused for which reprocessing instructions include cleaning only and not disinfection and/or sterilization? Interested persons were invited to comment by September 24, 2015. FDA considered the comments received on the draft guidance, including comments responding to the specific questions in the notice of availability, and revised the guidance as appropriate in response to these comments.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Unique Device Identification: Direct Marking of Devices.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* Guidance documents are also available at *https://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/default.htm* or *https://www.regulations.gov.* Persons unable to download an electronic copy of ''Unique Device Identification: Direct Marking of Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 1400031 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information described in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 801 have been approved under OMB control number 0910–0485; the collections of information in 21 CFR part 807, subpart E, have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 814, subparts A through E, have been approved under OMB control number 0910–0231; the collections of information in 21 CFR part 820 have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR part 830 pertaining to GUDID labeler accounts and data submissions addressed in this draft guidance document have been approved under OMB control number 0910–0720.

Dated: November 14, 2017.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The purpose of this meeting is to evaluate requests for preclinical development resources for potential new therapeutics for the treatment of cancer. The outcome of the evaluation will provide information to internal NCI committees that will decide whether NCI should support requests and make available contract resources for development of the potential therapeutic to improve the treatment of various forms of cancer. The research proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposed research projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Special Emphasis Panel; Oct2017 Cycle 27 NExT SEP Committee Meeting.
Date: December 13, 2017.
Time: 8:30 a.m. to 4:30 p.m.
Agenda: To evaluate the NCI Experimental Therapeutics Program Portfolio.
Place: National Institutes of Health, 9000 Rockville Pike, Building 31, Wing C, 6th Floor, Conference Room 10, Bethesda, MD 20892.
Contact Persons: Barbara Mroczkowski, Ph.D., Executive Secretary, Discovery

Experimental Therapeutics Program, National Cancer Institute, NIH, 31 Center Drive, Room 3A44, Bethesda, MD 20817, (301) 496–4291, *mroczkoskib@mail.nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Notice of Meeting for the Interdepartmental Serious Mental Illness Coordinating Committee (ISMICC)

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Secretary of Health and Human Services (Secretary), in accordance with section 6031 of the 21st Century Cures Act, announces a meeting of the Interdepartmental Serious Mental Illness Coordinating Committee (ISMICC). The meeting will be held virtually by webcast.

DATES: The ISMICC will meet on December 14, 2017, from 10:30 a.m. to 12:00 p.m., Eastern Daylight Time.

SUPPLEMENTARY INFORMATION: The meeting will focus on the Report to Congress that includes information on federal advances related to serious mental illness (SMI) and serious emotional disturbance (SED), including data evaluation, and recommendations for action. Members of the public can attend the meeting via telephone or webcast. The meeting can be accessed via webcast at *www.hhs.gov/live.* To obtain the call-in number and access code, submit written or brief oral comments, or request special accommodations for persons with disabilities, please visit the SAMHSA Advisory Committees Web page at *https://www.samhsa.gov/about-us/advisory-councils/smi-committee* or contact Pamela Foote, Designated Federal Official (see contact information below).

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written statements should be submitted to the DFO on or before November 30, 2017. Oral presentations from the public will be scheduled at the conclusion of the meeting. Individuals interested in making oral presentations must notify the DFO on or before November 30, 2017. Two minutes will be allotted for each presentation as time permits. Substantive meeting information and a roster of Committee members is available at the Committee's Web site *https://www.samhsa.gov/about-us/advisory-councils/smi-committee* or by contacting Pamela Foote, DFO.

Committee Name: Interdepartmental Serious Mental Illness Coordinating Committee

Dates/Time/Type: Thursday, December 14, 2017, 10:30 a.m. 12:00 p.m./OPEN

Place: Webcast and teleconference (see information above).

Contact: Pamela Foote, Designated Federal Official, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Room14E53C, Rockville, MD 20857, Telephone: 240–276–1279, Fax: 301–480–8491, Email: *ismicc@samhsa.hhs.gov*.

Background and Authority

The ISMICC was established on March 15, 2017, in accordance with section 6031 of the 21st Century Cures Act, and the Federal Advisory Committee Act, 5 U.S.C. App., as amended, to report to the Secretary, Congress, and any other relevant federal department or agency on advances in serious mental illness (SMI) and serious emotional disturbance (SED), research related to the prevention of, diagnosis of, intervention in, and treatment and recovery of SMIs, SEDs, and advances in access to services and support for adults with SMI or children with SED. In addition, the ISMICC will evaluate the effect federal programs related to serious mental illness have on public health, including public health outcomes such as (A) rates of suicide, suicide attempts, incidence and prevalence of SMIs, SEDs, and substance use disorders, overdose, overdose deaths, emergency hospitalizations, emergency room boarding, preventable emergency room visits, interaction with the criminal justice system, homelessness, and unemployment; (B) increased rates of employment and enrollment in educational and vocational programs; (C) quality of mental and substance use disorders treatment services; or (D) any other criteria as may be determined by the Secretary. Finally, the ISMICC will make specific recommendations for actions that agencies can take to better coordinate the administration of mental health services for adults with SMI or children with SED. Not later than 1(one) year after the date of enactment of the 21st Century Cures Act, and 5 (five) years after such date of enactment, the ISMICC shall submit a report to Congress and any other relevant federal department or agency.

This ISMICC consists of federal members listed below or their designees, and non-federal public members.

A roster of Committee members is available at the Committee's Web site: *https://www.samhsa.gov/about-us/advisory-councils/smi-committee*

The ISMICC is required to meet twice per year.

Carlos Castillo,

Committee Management Officer.

BILLING CODE 4162–20–P

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Notice of Proposed Draft Program Comment To Exempt Effects of Transportation-Related Undertakings Within Rail Rights-of-Way

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice of availability and request for comments.

SUMMARY: The Advisory Council on Historic Preservation, in coordination with the U.S. Department of Transportation, proposes a program comment to exempt effects of transportation-related undertakings within railroad and rail transit rights-of-way. This program comment would exempt from Section 106 review certain activities that have the potential to affect historic properties within railroad and rail transit rights-of-way where those effects are likely to be minimal or not adverse. Further, this program comment includes an optional approach that could streamline the Section 106 review for additional types of transportation-related undertakings involving railroad and rail transit properties, including those that may cause adverse effects. Issuance of this program comment would fulfill the

requirements of Section 11504 of the Fixing America's Surface Transportation Act.

DATES: Submit comments on or before December 8, 2017.

ADDRESSES: Address all comments concerning the draft program comment to both the ACHP and the U.S. Department of Transportation's Federal Railroad Administration (FRA) by U.S. mail as follows: Charlene Dwin Vaughn, AICP, Office of Federal Agency Programs, Advisory Council on Historic Preservation, 401 F Street NW., Suite 308, Washington, DC 20001–2637, and Laura Shick, U.S. Department of Transportation, Federal Railroad Administration, Office of Railroad Policy and Development, RPD–13, 1200 New Jersey Avenue SE., Washington, DC 20590. Comments may also be submitted through electronic mail to *RailROW@achp.gov* and *FRA.106Exemption@dot.gov.* Please submit comments to both the ACHP and FRA to ensure timely consideration.

FOR FURTHER INFORMATION CONTACT: Charlene Dwin Vaughn, Assistant Director, Federal Permitting, Licensing, and Assistance Section, Office of Federal Agency Programs, ACHP (202) 517–0207, *cvaughn@achp.gov;* Laura Shick, Federal Preservation Officer, Federal Railroad Administration, (202) 366–0340, *laura.shick@dot.gov;* or Sharyn LaCombe, Federal Preservation Officer, Federal Transit Administration, (202) 366–5213, *sharyn.lacombe@dot.gov.*

SUPPLEMENTARY INFORMATION: Section 106 of the National Historic Preservation Act (''NHPA'') (54 U.S.C. 306108) requires federal agencies to take into account the effects of undertakings they carry out, license, permit, or assist on historic properties and provide the Advisory Council on Historic Preservation (''ACHP'') a reasonable opportunity to comment with regard to such undertakings. Historic properties are those that are listed on the National Register of Historic Places (''National Register'') or eligible for such listing. The definition of historic properties and other terms relevant to the proposed Section 106 program comment for railroad and rail transit rights-of-way (''rail ROW'') are provided in Section VI, Definition of Terms, and are consistent with the NHPA and the Section 106 regulations.

The Section 106 implementing regulations allow federal agencies to tailor the Section 106 process to meet their needs through a variety of program alternatives (36 CFR 800.14). Types of Section 106 program alternatives include program comments and exemptions. The process for establishing an exemption is detailed in 36 CFR 800.14(c). In accordance with 36 CFR 800.14(c)(1), the ACHP may approve an exemption for a program or category of undertakings if: (i) The actions within the program or category would otherwise qualify as ''undertakings'' as defined in 36 CFR 800.16; (ii) the potential effects of the undertakings within the program or category upon historic properties are foreseeable and likely to be minimal or not adverse; and (iii) exemption of the program or category is consistent with the purposes of the NHPA. The ACHP takes into account the magnitude of the exempted undertaking or program and the likelihood of impairment of historic properties in reviewing a proposed exemption. Further, at 36 CFR 800.14(e), the Section 106 implementing regulations provide a process for the ACHP to issue a program comment. Through a program comment, the ACHP comments on a category of undertakings in lieu of conducting individual reviews under 36 CFR 800.4–800.6.

Section 11504 of the Fixing America's Surface Transportation Act (''FAST Act'') (49 U.S.C. 24202), enacted on December 4, 2015, mandated the development of a Section 106 exemption for ''railroad rights-of-way.'' The FAST Act requires that ''the Secretary [of the United States Department of Transportation (''USDOT'')] shall submit a proposed exemption of railroad rights-of-way from the review under section 306108 of title 54 to the [ACHP] for consideration, consistent with the exemption for interstate highways approved on March 10, 2005 (70 FR 11928).'' The FAST Act continues that, ''Not later than 180 days after the date on which the Secretary submits the proposed exemption. . .to the Council, the Council shall issue a final exemption of railroad rights-of-way from review under chapter 3061 of title 54 consistent with the exemption for interstate highways approved on March 10, 2005 (70 FR 11928).'' While the Section 106 regulations provide the process and criteria for development of program alternatives, the FAST Act modified the timeframe and directed agency actions.

This proposed Section 106 program comment includes an activities-based exemption that would fulfill the FAST Act mandate by exempting certain routine transportation-related undertakings that occur within rail ROW. The list of activities proposed to be exempt from Section 106 review is provided in Appendix A. Based on the past experience of USDOT Operating Administrations (''USDOT OAs''), undertakings limited to the activities specified in Appendix A have typically resulted in effects to historic properties that are either minimal or not adverse. In addition to incorporating exempt activities that meet the criteria specified in the Section 106 regulations at 36 CFR 800.14(c)(1), this program comment includes an optional, Project Sponsor-led property-based approach that ultimately could provide additional streamlining for undertakings that may cause adverse effects.

I. Background

The railroad industry in the United States has developed for nearly two centuries. Ongoing activities such as maintenance, improvements, and upgrades are necessary to allow rail infrastructure to continue to serve the transportation needs of the nation safely and efficiently. Further, these activities when carried out properly preserve the infrastructure and historic transportation purpose of moving goods and passengers. Most of the nation's railroads are privately-owned and maintained through the continuous investments of private owners. According to the Association of American Railroads (AAR), privately-owned freight railroads spent more than $630 billion on rail equipment and infrastructure, including tracks, bridges, and tunnels, during the 36-year period from 1980 to 2016.[1]

The federal government also makes substantial investments in and has oversight of the nation's railroads and rail transit systems. This includes maintaining and expanding intercity passenger rail, rail transit, and freight rail services, and regulating and improving the safety and efficiency of rail operations. USDOT serves both an investment (*e.g.,* grants, loans) role and a regulatory and safety oversight role, with activities carried out most frequently by the following USDOT OAs: The Federal Railroad Administration (''FRA''), the Federal Transit Administration (''FTA''), and the Federal Highway Administration (''FHWA'').

For example, FRA provides financial and technical assistance for planning and infrastructure projects that enable the nation's railroads to move passengers and goods across the United States. FRA's investments are principally, but not exclusively, in support of intercity passenger rail operations and often provide financial assistance for maintenance, improvements, and upgrades to railroad infrastructure, equipment, and

[1] *https://www.aar.org/Pages/Railroad-101.aspx.*

technologies, including those focused on improving the safety of railroad operations and roadway/railroad grade crossings, as well as for research and development activities and training. FTA provides financial and technical assistance to transit agencies for investment in public transportation systems that include various forms of rail transit that occupy existing or former rail ROW, such as heavy rail, commuter rail, streetcar, and light rail. FHWA supports state, local, and tribal governments and federal agencies in the design, construction, and maintenance of the nation's highway systems. Highways frequently cross over, go under, or are parallel to rail ROW, requiring extensive coordination between the entities responsible for the highway and the railroad or rail transit lines, including safety considerations. FHWA's Railway-Highway Crossings Program [2] provides funds for safety improvements to reduce the number of fatalities, injuries, and crashes at public railway-highway grade crossings.

On June 5, 2008, a congressional hearing before the Subcommittee on Railroads, Pipelines, and Hazardous Materials, within the House Committee on Transportation and Infrastructure, included testimonies by the ACHP, the Alaska Railroad Corporation, the National Conference of State Historic Preservation Officers (''NCSHPO''), the National Trust for Historic Preservation (''NTHP''), the North Carolina Department of Transportation, and the Rails-to-Trails Conservancy.[3] The purpose of the hearing was to consider whether federal requirements for the preservation of historic properties created unnecessary delays and administrative burdens for improvements to rail infrastructure. This hearing revealed that while the nation's railroad system is historically important, the existing federal review process in some cases could be carried out more efficiently to expedite project delivery. As a result, Congress mandated a study to explore these issues and to recommend solutions.

Pursuant to Section 407 of the Passenger Rail Investment and Improvement Act of 2008 (''PRIIA''), FRA, in partnership with other USDOT OAs, state departments of transportation (''state DOTs''), and historic preservation organizations and agencies, including the ACHP, NCSHPO, and NTHP, conducted a study assessing the current state of historic preservation for federally funded railroad projects and the potential for expediting compliance with Section 106 and Section 4(f) (23 U.S.C. 138, 49 U.S.C. 303). In 2013, FRA submitted to Congress the resulting study, titled ''Streamlining Compliance with Section 4(f) of the Department of Transportation Act and Section 106 of the National Historic Preservation Act for Federally Funded Railroad Infrastructure and Improvement Projects'' (''2013 FRA Study'').[4]

The 2013 FRA Study drew upon the experiences shared by the participating agencies and organizations, SHPOs, and other stakeholders, and on best practices and data extrapolated from case studies. The 2013 FRA Study concluded that there is no consistent approach on how to address the National Register eligibility of railroad corridors or how to avoid, minimize, or mitigate impacts to individual rail properties along a corridor once it is determined to be eligible for the National Register. The lack of consistency was attributed to a multitude of entities conducting National Register evaluations, including SHPOs, Tribal Historic Preservation Officers (''THPOs''), federal agencies, consultants, state DOTs and railroad and rail transit operators. These inconsistency issues raised concerns regarding the lack of specific nationwide guidance for identifying, evaluating, and classifying rail properties and differentiation based on likely importance of particular historic resources on the part of each evaluator. This variety of approaches leads to inconsistent standards for evaluation and procedures to consider and address impacts, an overly burdensome process, delays in project delivery, and some projects failing to advance. The substantial experience of USDOT OAs over the years in funding maintenance, improvements, and upgrades to railroads and rail transit systems, and highway/rail grade crossings, has provided further evidence of this conclusion. Furthermore, the experience of USDOT OAs has been that undertakings involving maintenance, improvements, and upgrades to rail infrastructure often do not result in adverse effects to historic properties under Section 106 when early planning involves diverse stakeholders.

The 2013 FRA Study offered several streamlining recommendations, including the development of a Section 106 administrative exemption and a program comment. In 2015, Congress mandated a proposed administrative exemption in the FAST Act and directed USDOT that the exemption be consistent with the Interstate Highway Exemption. Developed by FHWA and approved by the ACHP in 2005, the Section 106 exemption for the Interstate Highway System acknowledges ''the importance of the Interstate System in American history, but also recognizes that ongoing maintenance, improvements and upgrades are necessary to allow the system to continue to serve the transportation needs of the nation.'' [5] Further, the concept for the exemption for the Interstate Highway System stated that, ''While actions carried out by federal agencies to maintain or improve the Interstate System will, over time, alter various segments of the system, such changes are considered to be 'minimal or not adverse' when viewing the system as a whole. Moreover, the exemption does not apply to certain historically important elements of the system.'' Therefore, in exempting only certain effects of undertakings to the interstate highway system, the exemption met the requirements of 36 CFR 800.14(c)(1).

In accordance with Section 11504 of the FAST Act, the USDOT, led by FRA and FTA, proposed to the ACHP in July 2017 a Section 106 exemption that would have applied to certain types of undertakings within rail ROW that would result in effects to rail properties that were likely to be minimal or not adverse. FRA's and FTA's proposed exemption drew upon the collective expertise and experience of the USDOT OAs and acknowledged the unique history, construction, and technological improvements of railroads and rail transit systems. The exemption as initially drafted also included an optional Project Sponsor-led property-based approach that could have streamlined the review process for other types of undertakings having the potential to adversely affect historic properties.

To develop the proposed exemption, FRA and FTA held early coordination meetings with the ACHP, NCSHPO, and NTHP. The purpose of these meetings was to discuss the most effective approach to an exemption that would satisfy the FAST Act requirement. It was also identified during these meetings that more information on the history of

[2] http://safety.fhwa.dot.gov/xings/.

[4] *Report to Congress: Streamlining Compliance with the Section 4(f) of the Department of Transportation Act and Section 106 of the National Historic Preservation Act for Federally Funded Railroad Infrastructure Repair and Improvement Projects,* Federal Railroad Administration, March 2013, *https://www.fra.dot.gov/eLib/details/L04483.*

[5] *Exemption Regarding Historic Preservation Review Process for Effects to the Interstate Highway System,* 70 FR 11928, Mar. 10, 2005.

rail transit development in the country was needed to have comparable information to what was contained in FRA's 2013 Study. Subsequently, in 2017 FTA prepared a broad historic context report entitled, ''Historic Context Report for Transit Rail System Development.'' [6] Also during the early coordination meetings, the ACHP, NCSHPO, and USDOT acknowledged that opportunities for stakeholder outreach would be provided to obtain input from railroad and rail transit industries, state agencies (*e.g.,* state DOTs), SHPOs and THPOs, Indian tribes and Native Hawaiian organizations, and historic preservation interest groups.

FRA's and FTA's original approach to the proposed exemption was to treat the ROW in which railroads and rail transit systems operate as a resource unto itself that would be exempt from Section 106 review. FRA and FTA conducted outreach to discuss and seek feedback from stakeholders regarding how such a property-based approach might be developed and implemented. The ACHP expressed concern that a property-based approach would exceed the limit of its authority to exempt activities under 54 U.S.C. 304108(c) and 36 CFR 800.14(c)(1) because it did not define the program or category of undertakings that would be subject to its terms and as proposed, it could allow adverse effects to historic properties without requiring Section 106 review. The ACHP recommended that FRA and FTA take an activities-based approach to the Section 106 exemption that focused on routine undertakings involving rail properties located within rail ROW, with effects that would be foreseeable and likely to be minimal or not adverse. This recommendation was echoed in comments submitted to FRA and FTA by numerous stakeholders, particularly from the preservation community. The ACHP also recommended FRA and FTA consider developing a separate program comment to provide for the property-based approach along a parallel track.

Subsequently, in response to the concerns and requests of Project Sponsors, particularly transportation stakeholders, that the program alternative should include the flexibility to address a broader range of undertakings and effects to historic properties, FRA, FTA, and the ACHP decided to incorporate the proposed activities-based exemption within a proposed program comment in order to restore the two-part concept within a single program alternative, including the property-based approach, as originally proposed by FRA and FTA. The proposed program comment recognizes that many properties in the national railroad network and rail transit systems have historic significance and that important historic rail properties (as defined in the draft program comment, Section VI: Definition of Terms) located within rail ROW should remain subject to Section 106 review when proposed undertakings cannot avoid adverse effects on such properties.

The proposed program comment is intended to balance the need for continued safe and efficient transportation with the goals of historic preservation, and takes into account the differences between the Interstate Highway System and railroad and rail transit operations. Each railroad and rail transit system has its own unique history of construction and operation, including private or public ownership; periods of economic success; opening of key markets or geographic areas; and improvements, acquisition, and consolidation or abandonment. Many buildings and structures within rail ROW followed the common standard plans of a specific carrier, but there were exceptions for individual buildings, bridges, and other structures that may have unique qualities or unusual design characteristics. Similarly, many rail corridors follow a simple natural grade and alignment, but there were exceptions made for difficult terrain, climate, and topography that may have involved unique or unusual engineering techniques and structures. Railroads have been adapted to accommodate modern freight, passenger train operations, higher speeds, and much heavier freight loads than those for which the original rail infrastructure was designed and built. Finally, rail ROW is typically privately-owned, making it challenging or impossible to perform the cultural resources surveys usually necessary to develop a comprehensive inventory of rail properties.

The nation's rail ROW and rail properties located therein have a long history, dating to the mid-1800s, and maintenance, improvements, and upgrades are necessary to their preservation and continued safe use. These activities have occurred and continue to occur regularly within rail ROW to maintain the efficient use and safety of the nation's railroads, rail transit systems, and roads; and support the continued function for which surface transportation is historically important.

II. Program Comment Concept

The continued operation of railroads and rail transit systems is vital to enabling the efficient and safe movement of people and goods throughout America. Various linear segments of rail lines, as well as individual buildings and structures along those rail lines, were determined eligible for and/or listed on the National Register prior to Congress's mandate to develop a Section 106 exemption for rail ROW.

A primary objective of the proposed program comment is to expedite certain types of maintenance, improvements, and upgrades to railroad and rail transit infrastructure located within rail ROW that typically have not resulted in adverse effects to historic properties based on years of experience gained through the Section 106 consultations among USDOT OAs, SHPOs, and consulting parties for individual undertakings. Under such an approach, fewer routine undertakings involving rail properties would be subject to Section 106 review thereby enabling federal agencies to focus their time and resources on undertakings that have the potential to cause adverse effects on historic properties. Federal agency staff, Project Sponsors, SHPOs, THPOs, and other stakeholders would be able to devote more time and resources to developing solutions that avoid, minimize, or resolve adverse effects to important historic rail properties and non-rail historic properties located within an undertaking's Area of Potential Effects (''APE'').

Recognizing the concerns and needs of industry stakeholders and seeking to achieve further efficiencies in project reviews, the ACHP, FRA and FTA incorporated the originally proposed exemption into a different program alternative under 36 CFR 800.14: a program comment. Unlike an exemption, which the ACHP can only approve for undertakings that have effects to historic properties that are foreseeable and likely to be minimal or not adverse, a program comment may provide an optional alternative process for compliance with Section 106 for a category of undertakings, including those that may result in adverse effects. Therefore, the proposed program comment includes both an activities-based exemption and an optional Project Sponsor-led approach to identify important historic rail properties and streamline the review process for other transportation-related activities. It is important to note that this Project Sponsor-led approach would require an investment of time and resources and

[6] *https://www.transit.dot.gov/regulations-and-guidance/environmental-programs/historic-context-report-transit-rail-system.*

would not likely result in immediate efficiencies as would the approval of the list of exempted activities under Appendix A. To ensure the requirements of the FAST Act are met, the program comment would incorporate the substance of the exemption for certain activities within rail ROW, as well as add the property-based approach as envisioned by FRA and FTA and discussed during the agencies' outreach to stakeholders in late 2016 and early 2017.

Given the unique history of the rail industry and the challenge of conducting the cultural resources surveys that would be needed to develop a comprehensive nationwide inventory of rail properties (including restrictions regarding access to privately-owned rail ROW, the extensive linear miles of rail ROW nationwide, and the number of qualified professionals and financial resources that would be needed), it is not feasible for USDOT OAs or Project Sponsors to identify all important historic rail properties nationwide concurrently with the development of this program alternative. The program comment would include a modified review process for transportation-related undertakings that would only apply after completion of the optional Project Sponsor-led approach to identify important historic rail properties within a study area.

Under the program comment, Project Sponsors, in coordination with the appropriate USDOT OA(s), the ACHP, NCSHPO, individual SHPOs/THPOs, NTHP, railroad and rail transit operators, state DOTs, and other appropriate stakeholders, would have the option to follow an established process to develop a list of important historic rail properties within a designated study area. The Project Sponsor would ensure that the public would be given an opportunity to provide input on the proposed list of such properties. The appropriate USDOT OA(s), in consultation with Project Sponsors, the ACHP, SHPOs/THPOs, and other stakeholders, would confirm the significance and integrity of these important historic rail properties consistent with National Register criteria.

The intent of this optional Project Sponsor-led identification and evaluation effort would be to (1) revisit those rail properties that have been previously determined eligible for listing or listed on the National Register to confirm that the property meets one or more of the National Register eligibility criteria, retains integrity, and is considered important (as defined in Section VI, Definitions of Terms), and (2) identify previously unevaluated rail properties located within the study area that should be recognized as important historic rail properties. Once the identification process is complete, federal agencies would be able to carry out, license, permit, or assist transportation-related undertakings that meet the terms listed in the Program Comment without further Section 106 review.

Project Sponsors could benefit from this optional property-based approach because it would expedite Section 106 reviews for non-routine undertakings through the early identification of and agreement on important historic rail properties located in rail ROW. The upfront identification of such properties would allow Project Sponsors to plan for and design projects within rail ROW in a manner that could avoid or minimize effects to such important properties. Furthermore, if a Project Sponsor completes the process to identify important historic rail properties, another review efficiency would apply. Future transportation-related activities within the same study area that require a license, permit, or assistance from any federal agency and that would affect rail properties that are not included on a USDOT OA-approved list of important historic rail properties would not be subject to further Section 106 review.

The lead federal agency for a proposed transportation-related undertaking in rail ROW will be responsible for determining if the program comment applies. Approval by the lead federal agency would be required in the form of written approval or through another established review and decision-making process normally used by the lead federal agency (*e.g.,* grant-making processes or permit issuance).

III. Public Participation

In accordance with 36 CFR 800.14(e)(2), USDOT, in coordination with the ACHP, is arranging for public participation appropriate to the subject matter and scope of the category of undertakings to be included within this program comment. This notice invites the public to comment on the proposed draft program comment.

In addition to this notice, FRA and FTA have previously solicited the views of a diverse group of stakeholders and subject matter experts. While that outreach was conducted with the intent to develop a Section 106 exemption (as defined in 36 CFR 800.14(c)), the substance of FRA's and FTA's original proposal is essentially the same as the content of the draft program comment that is being made available for public review and comment in this notice. This outreach included in-person meetings, webinars followed up with attendees' submittal of written comments and questions, teleconferences, and presentations at national transportation conferences with representatives from the following: USDOT OAs, the ACHP, NCSHPO, the National Association of Tribal Historic Preservation Officers, NTHP, tribal governments, individual SHPOs and their staff, THPOs, and state DOTs; national transportation associations (*e.g.,* AAR, American Public Transportation Association); private railroad companies; intercity passenger rail service providers (*e.g.,* Amtrak) and rail transit agencies; the Surface Transportation Board (STB);[7] and historic preservation organizations (*e.g.,* American Cultural Resources Association). These agencies and organizations shared their unique and varied perspectives and concerns and provided valuable feedback. Prior to transitioning the approach from an exemption to a program comment and when proposing to request an exemption, in response to the ACHP's recommendation to satisfy its consultation responsibilities under 36 CFR 800.14(c)(3), FRA and FTA provided a draft exemption to all SHPOs and THPOs for review and requested their feedback regarding any significant issues. Pursuant to 36 CFR 800.14(c)(4), the ACHP shared a draft of the proposed exemption with Indian tribes and Native Hawaiian organizations and hosted two conference calls to solicit their input and feedback. Comments were received from nine SHPOs and 14 tribes in October 2017. FRA and FTA considered these comments and made further revisions to the draft of the proposed exemption primarily to clarify the scope of the proposed exemption to make it clear that the focus was strictly on rail properties and would not apply to other types of historic properties that could be located within or adjacent to rail ROW. FRA and FTA also refined some of the proposed exempted activities in Appendix A in response to comments from SHPOs and Indian tribes, but did not eliminate any activities from the draft list because the agencies felt that all stakeholders should have the opportunity to review and provide

[7] The Surface Transportation Board (STB) is an independent agency that has broad economic regulatory oversight of the nation's freight rail system and jurisdiction over railroad rate and service issues; new rail line constructions; abandonments of existing rail lines; and railroad mergers and line acquisitions. Refer to STB's Web site at *https://www.stb.gov/stb/about/overview.html.*

comments. The draft exemption shared with SHPOs, THPOs, Indian tribes, and Native Hawaiian organizations in September and October 2017 focused only on exempted activities and did not include the optional Project Sponsor-led approach for identifying important historic rail properties.

The feedback received over the past year has been helpful in informing the development of the proposed program alternative and generally related to the following topics: (1) The scope, applicability, and implementation of exempt activities; (2) how important historic rail properties could be identified; (3) what types of resources, including archaeological sites, should explicitly not be covered by the program alternative; and (4) developing and clarifying the definitions of terms used in the proposed exemption. FRA and FTA used this feedback to refine the proposed list of exempt activities included in Appendix A and to revise key definitions (such as the definition of rail ROW). As FRA and FTA refined the approach to and scope of the proposed exemption based on stakeholder input, they determined that certain actions, such as those approved by STB (*e.g.,* rail line abandonments, new rail line constructions) as well as conversion of rail ROW to shared use (*e.g.,* bicycle, pedestrian) trails (sometimes referred to as ''rails-to-trails'' initiatives), have the potential to cause adverse effects or greater than minimal effects on historic properties, and therefore are not appropriate for inclusion in the proposed list of exempt activities included in Appendix A. The fundamental purpose of the proposed exempted activities list is to enable federal agencies to expedite reviews and approvals of proposed transportation-related undertakings for certain types of maintenance, improvements, and upgrades to railroad and rail transit infrastructure; accordingly, FRA and FTA expect that these activities would primarily involve extant buildings, structures, and equipment in existing rail ROW. Therefore, and in consideration of stakeholder comments received to date, FRA and FTA determined that effects to archaeological resources of any nature, including those associated with railroads and rail transit, should not be covered by the proposed exemption. Lastly, in response to feedback from NCSHPO and several individual SHPOs, the draft program comment includes an annual reporting requirement to help assess the effectiveness of Section 106 review streamlining as well as to help ensure that the program comment's terms are being appropriately applied.

In addition to providing substantive comments regarding the scope and content of the proposed exemption, some SHPOs questioned the type of Section 106 program alternative itself. The FAST Act specifically mandates development of an exemption; however, after further consideration and in order to fulfill the intent of that statutory mandate, USDOT and the ACHP have revised the exemption to this draft program comment. The program comment would have a broader scope and include more types of undertakings than would have the exemption.

IV. Proposed Text of the Program Comment

The following is the draft text of the proposed program comment:

Program Comment To Exempt Effects of Transportation-Related Undertakings Within Rail Rights-of-Way

Section 106 of the National Historic Preservation Act (''NHPA''), 54 U.S.C. 306108 (''Section 106''), requires federal agencies to ''take into account'' the effects of their undertakings on historic properties and to provide the Advisory Council on Historic Preservation (ACHP) a reasonable opportunity to comment with regard to such undertakings. The ACHP has issued regulations that set forth the process through which federal agencies comply with these duties. Those regulations are codified under 36 CFR part 800 (''Section 106 regulations'').

Under section 800.14(e) of those regulations, agencies can request the ACHP to provide a ''program comment'' on a particular category of undertakings in lieu of conducting separate reviews of each individual undertaking under such category, as set forth in 36 CFR 800.3 through 800.7. Federal agencies can meet their Section 106 responsibilities with regard to the effects of transportation-related undertakings on rail properties located in railroad and rail transit rights-of-way (''rail ROW'') by following this program comment and the steps set forth therein.

I. Introduction

This program comment exempts from Section 106 review the activities listed in Appendix A provided the conditions specified therein are met. It also establishes an optional Project Sponsor-led property-based approach. This optional approach could be followed to identify important historic rail properties in rail ROW in advance of specific transportation-related undertakings. Undertakings affecting such important historic rail properties and that involve activities not included in Appendix A would remain subject to Section 106 review, in order to ensure potential adverse effects are avoided, minimized, or mitigated. However, the optional property-based approach, described in Section IV below, if completed by an interested Project Sponsor, would also create efficiencies by (1) allowing transportation-related undertakings proposed to be carried out, licensed, permitted, or assisted by any federal agency to proceed without Section 106 review if the affected rail property(ies) is not on the USDOT OA-approved list of important historic rail properties and (2) providing Project Sponsors with an early awareness of which rail properties are important so that they could design projects in a manner to either avoid adverse effects or to factor sufficient time into project planning and design to resolve any unavoidable adverse effects.

The proposed program alternative has been developed in accordance with section 11504 of the FAST Act (49 U.S.C. 24202). Section 11504 mandated the development of a Section 106 exemption for ''railroad rights-of-way.'' More specifically, it required the Secretary of Transportation to submit a proposed exemption to the ACHP for consideration, and for the ACHP to issue a final exemption not later than 180 days after the date of receipt of U.S. Department of Transportation's (''USDOT's'') submittal.

Pursuant to 36 CFR 800.14(e), the ACHP can issue a program comment on its own initiative or at the request of another agency. This program comment would provide the ACHP's comment on those transportation-related undertakings that may affect rail properties within rail ROW. If a federal agency responsible for carrying out, licensing, permitting, or assisting such an undertaking with the potential to affect rail-related historic properties meets the terms of this program comment, its Section 106 responsibility to take into accounts those effects would be satisfied.

Under 36 CFR 800.14(c), an exemption from Section 106 for federal undertakings must be consistent with the purposes of the NHPA. Furthermore, in order to be exempted, the potential effects of those undertakings on historic properties must be ''foreseeable and likely to be minimal or not adverse.'' The substance of USDOT's originally proposed exemption, incorporated within this program comment, meets these criteria. The transportation-related undertakings that federal agencies carry out, license, permit, and assist to

maintain, improve, or upgrade rail properties located within rail ROW will alter over time various elements of rail ROW, but such changes are minimal or not adverse when viewing rail ROW as a whole and when limited to the activities specified in Appendix A.

II. Applicability

The program comment would apply to (1) those undertakings that are strictly limited to the activities listed in Appendix A and are carried out, licensed, permitted, or assisted by any federal agency and involve rail properties located within existing rail ROW; and (2) any transportation-related undertaking that would be carried out, licensed, permitted, or assisted by any federal agency and meets the terms for the completed optional Project-Sponsor led approach to identify important historic rail properties. The activities listed in Appendix A are for the intended purpose of routine maintenance, improvements, and upgrades to transportation infrastructure. Should the Program Comment be issued by the ACHP, federal agencies would be able to proceed with carrying out, licensing, permitting, or assisting undertakings that are limited to the activities listed in Appendix A and that meet the certain conditions specified therein without further Section 106 review regardless of whether the rail properties involved or affected are eligible for or listed on the National Register. Undertakings involving activities that are not included in Appendix A would not be included within the proposed exemption section of the program comment (*e.g.,* demolition; decommissioning, abandonment and/or conversion of rail infrastructure to a non-transportation use; double-tracking a historically single-tracked rail corridor; major new construction activities such as construction of a new or substantially expanded passenger station; or construction of a new railroad or rail transit line on new right-of-way (commonly referred to as ''greenfield construction'')). However, some of these activities may fall within the other section of the program comment regarding the optional Project Sponsor-led property-based approach.

Activities requiring a federal license, permit, or assistance that are not listed in Appendix A but constitute a transportation-related undertaking with the potential to affect rail properties located within rail ROW, as defined in Section VI, Definitions of Terms, would not require Section 106 review provided the optional Project Sponsor-led approach for identifying important historic rail properties has been completed for a defined study area and the affected rail property(ies) within that study area are not included on a USDOT OA-approved list of important historic rail properties.

If the optional Project Sponsor-led approach to identify important historic rail properties has been completed for a defined study area, transportation-related undertakings involving activities that are not included in Appendix A and would affect properties included on a USDOT OA-approved list of important historic rail would require Section 106 review. This would ensure that potential adverse effects to important historic rail properties are appropriately avoided, minimized, or mitigated consistent with the purposes of the NHPA.

Federal agencies remain responsible for determining whether a proposed undertaking, including those activities listed in Appendix A, has the potential to cause effects to non-rail historic properties, such as those of religious and cultural significance to Indian tribes or Native Hawaiian organizations or archaeological sites of any nature, in the undertaking's APE. If a federal agency determines such potential exists, the federal agency must follow the requirements of 36 CFR part 800 or follow an applicable program alternative executed pursuant to 36 CFR 800.14 in order to consider the potential effects to such properties located within that APE.

Under the Surface Transportation Project Delivery Program, codified at 23 U.S.C. 327, a state may assume the Secretary of Transportation's responsibilities to comply with Section 106 for certain projects or classes of projects. In such cases, the state may rely on this program comment to fulfill its Section 106 responsibilities. Where a program alternative developed pursuant to 36 CFR 800.14, such as a statewide programmatic agreement, delegates Section 106 responsibility to another entity, that entity may also utilize the terms of this program comment for relevant transportation-related undertakings.

III. Activities Exempt From Section 106 Review

Undertakings that are carried out by a federal agency or require a federal license, permit, or assistance to maintain, improve, or upgrade rail properties located in railroad and rail transit rights-of-way (''rail ROW'') and are limited to the activities specified in Appendix A: Exempted Activities, are exempt from the requirements of Section 106 of the National Historic Preservation Act, 54 U.S.C. 306108 (''Section 106'') because their effects on rail historic properties are foreseeable and likely to be minimal or not adverse.

IV. Optional Project Sponsor-Led Property-Based Approach

If a Project Sponsor wishes to carry out a transportation-related activity that requires a federal license, permit, or assistance and is not included in Appendix A and therefore has the potential to cause adverse effects to historic rail properties, it must either: (1) Notify the lead federal agency, which will then determine whether the standard Section 106 process or an available program alternative applies to the proposed undertaking; or (2) follow the Project-Sponsor led approach outlined in this section to identify important historic rail properties. Important historic rail properties, as defined further in Section VI, are individual rail properties or rail property types that meet the National Register eligibility criteria (36 CFR part 63), illustrate the history of the development of the nation's railroads or rail transit systems, and either possess national significance or are of certain state or local importance.

Given the variety and number of rail properties nationwide, the fact that many systems cross state boundaries, and the challenges of a ''one size fits all'' nationwide approach, important historic rail properties would be initially identified within defined study areas by Project Sponsors that wish to get additional benefit from this program comment beyond the list of exempted activities included in Appendix A. The process would intentionally provide a great deal of flexibility for Project Sponsors to identify important historic rail properties to meet state and local needs and interests and to take into account state and local historic contexts. Within six months of the ACHP's issuance of the final Program Comment, FRA, FTA, and FHWA, in coordination with the ACHP, and other federal agencies who may have an interest in utilizing the Program Comment (*e.g.,* permitting agencies such as US Army Corps of Engineers or US Coast Guard), will develop supplemental guidance for implementing the optional Project Sponsor-led property-based approach described below to identify important historic rail properties.

A. Process for Identifying Important Historic Rail Properties

1. Individual Project Sponsors or multiple Project Sponsors working collaboratively must clearly identify the study area to be subject to this process: The portion of rail ROW (*i.e.,* by

location (state, county); name of rail corridor, railroad, rail transit system or line; mile-post information; etc.). Project Sponsors must propose to the appropriate USDOT OA(s) (*i.e.,* FRA, FTA and/or FHWA), rail properties to be included on a list of important historic rail properties. To develop such a list, Project Sponsors will consult with the appropriate USDOT OA(s), appropriate State Historic Preservation Officers (''SHPOs''), appropriate Tribal Historic Preservation Officers (''THPOs''), and other interested parties, *i.e.* those parties that would typically be involved in the standard Section 106 process to identify historic properties as specified in 36 CFR 800.4(a)–(c), that have knowledge and expertise regarding rail properties and of the history and operations of the nation's railroads and rail transit systems. The proposed list of important historic rail properties may include particular individual properties (*i.e.,* a building, structure, object, or district) or a property type (*e.g.,* bridges of a certain type (stone arch, metal truss, covered, or moveable); roundhouses). The Project Sponsor's efforts to develop a list of important historic rail properties will be informed by available background research, historic context studies, surveys and evaluations performed by persons meeting the Secretary of the Interior's Professional Qualification Standards for Architectural Historians, and other relevant documentation and professional experience and expertise.

2. Once a Project Sponsor proposes a list of important rail properties located within a study area, the Project Sponsor will coordinate with the appropriate USDOT OA(s) to determine an appropriate method(s) for seeking public input on the proposed list and to determine which entity(ies) will be responsible for implementing the agreed-upon public outreach strategy. The Project Sponsor and/or the USDOT OA(s), as appropriate, will then implement the agreed-upon strategy. The USDOT OA(s) will consider input from interested parties and the public before approving the list of important historic rail properties.

3. The USDOT OAs make the final decision regarding the list of important historic rail properties within each study area, and will publish all finalized lists on their respective agency Web sites (*www.fra.dot.gov, www.fta.dot.gov,* or *www.fhwa.dot.gov*). The relevant USDOT OA will update the list anytime a Project Sponsor completes the process described herein to identify important historic rail properties located within another study area.

4. Once approved by the appropriate USDOT OA(s), the list of important historic rail properties will be available for use by any Project Sponsor and any federal agency.

B. No Further Section 106 Review Required

Should any of the exempted activities in Appendix A referred to in Section III be proposed and affect important historic rail properties included on a USDOT OA-approved list, no further Section 106 review would be required for those activities.

For rail properties in a given study area that are not included on a USDOT OA-approved list of important historic rail properties, the effects of transportation-related undertakings to those rail properties would be exempt from Section 106 review.

V. Continued Applicability of Section 106

Section 106 review is still required for transportation-related undertakings within rail ROW in the following situations under both the activities-based exemption and Project Sponsor-led property-based approach:

A. Undertakings that are located within, or would affect historic properties located on tribal lands;

B. Undertakings, within a study area that has completed the optional Project Sponsor-led approach that involve activities that are not included in Appendix A and would affect important historic rail properties

C. Undertakings that could affect historic buildings, structures, sites, objects, or districts that do not have a demonstrable association with the function and operation of a railroad or rail transit system;

D. Undertakings that could affect archaeological sites located within, partially within, or bisected by rail ROW, regardless of whether the sites are associated with railroads or rail transit systems; [8] and

E. Undertakings that could affect historic properties of religious and cultural significance to federally recognized Indian tribes or Native Hawaiian organizations.

In addition, federal agencies remain responsible for determining whether a proposed undertaking has the potential to cause effects to non-rail above-ground historic properties (buildings, structures, objects and districts) and archaeological sites of any nature (regardless of a rail nexus) that are located in the undertaking's area of potential effects (''APE'') but outside of or adjacent to rail ROW under both the activities-based exemption and Project Sponsor-led property-based approach.

Likewise, if an unanticipated discovery of a non-rail historic property, archaeological site, or human remains is made during implementation of an exempt activity listed in Appendix A, the Project Sponsor must cease the activity and consult with the lead federal agency, who must follow the requirements of 36 CFR 800.13(b) and/or applicable state burial law with regard to the discovery; if an undertaking involves multiple exempted activities, those that do not involve or effect the discovery may continue.

VI. Definition of Terms

A. Area of potential effects, as defined in 36 CFR 800.16(d), means the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, if any such properties exist. The area of potential effects is influenced by the scale and nature of an undertaking and may be different for different kinds of effects caused by the undertaking.

B. Historic properties, as defined in 36 CFR 800.16(l), means any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register of Historic Places maintained by the Secretary of the Interior. This term includes artifacts, records and remains that are related to and located within such properties. The term includes properties of religious and cultural importance to a federally recognized Indian tribe or Native Hawaiian organization that meet the National Register criteria.

C. Important historic rail properties means rail properties located in rail ROW that have been identified through the Project-Sponsor led approach established in Section IV. Such properties must meet the National Register eligibility criteria (36 CFR part 63), illustrate the history of the development of the nation's railroads or rail transit systems, and either possess national significance (see the definition

[8] Examples include: Archaeological remains of non-extant rail properties that have been determined eligible for the National Register under Criterion D or warrant evaluation for such eligibility because they may yield data and information on the development and operation of railroads and rail transit systems in U.S. history; archaeological sites that represent worker camps associated with the construction of a railroad and have been determined eligible for the National Register under Criterion A or warrant evaluation for such eligibility; prehistoric or historic archaeological sites that pre-date construction of a railroad or rail transit line and are historically significant for reasons that do not have a nexus with rail transportation.

below) or be of certain state or local importance. Examples of properties of certain state or local importance may include extant architectural properties, such as passenger depots, roundhouses, bridges, and tunnels that are not included in common standard plans; that met unique engineering challenges; that have exceptional design quality and characteristics; or that are of unusual or noteworthy importance, or are a rare property type.

D. National significance means a historic property that is either, (1) designated as a National Historic Landmark; (2) designated as a Civil Engineering Landmark; (3) listed as nationally significant in its nomination or listing in the National Register; or (4) determined to have significance at the national level.[9]

E. Project Sponsor means an entity such as a state, tribal or local government, joint venture, or private company that is eligible to receive financial assistance under a federal transportation–related financial assistance program (*e.g.,* grant, loan). A project sponsor may also be an entity that requires a federal permit, license, or approval in order to carry out a proposed activity in rail ROW (*e.g.,* a permit under Section 404 of the Clean Water Act issued by the Army Corps of Engineers or a permit under Section 9 of the Rivers and Harbors Act of 1899 issued by the United States Coast Guard).

F. Rail properties means, for the purpose of this program comment, infrastructure within the rail ROW that has a demonstrable relationship to the past or current function and operation of a railroad or rail transit system, including but not limited to: Rails and tracks, ties, ballast, rail beds, signal and communication systems, switches, overhead catenary systems, signage, traction power substations, passenger stations/depots and associated infrastructure and utilities, freight transfer facilities, boarding areas and platforms, boarding platform shelters and canopies, bridges, culverts, tunnels, retaining walls, ancillary facilities, ventilation structures, equipment maintenance and storage facilities, railyards, parking lots and structures, landscaping, passenger walkways, and security and safety fencing. The definition does not include properties with no demonstrable relationship to the function and operation of a railroad or rail transit system, such as: Adjacent residential, commercial or municipal buildings; archaeological resources underneath rail ROW that are unrelated to the railroad or rail transit line; or property unrelated to existing or former railroads and rail transit lines that is proposed to be used for new rail infrastructure.

G. Railroad and Rail Transit Rights-of-Way (rail ROW) means, for the purpose of this program comment, the land and infrastructure that have been developed for existing or former intercity passenger rail, freight rail, or rail transit operations, or that are maintained for the purpose of such operations. Rail ROW includes current or former railroad or rail transit lines regardless of current ownership and whether there is rail service operating on the railroad or rail transit line. It does not include land that was never developed and lacks visual evidence of historic railroad or rail transit use. Rail ROW includes and may be identifiable by the presence of infrastructure that has a demonstrable relationship to the past or current function and operation of a railroad or rail transit system that commonly includes but is not limited to the rail properties specified in the definition above.

H. Section 106 means Section 106 of the National Historic Preservation Act, 54 U.S.C. 306108, and its implementing regulations, 36 CFR part 800.

I. Undertaking, as defined at 36 CFR 800.16(y), means a project, activity, or program funded in whole or in part under the direct or indirect jurisdiction of a federal agency, including those carried out by or on behalf of a federal agency; those carried out with federal financial assistance; and those requiring a federal permit, license or approval.

VII. Effective Date

This program comment shall go into effect on the date it is issued by the ACHP, at which time federal agencies may immediately utilize the list of exempted activities in Appendix A, including undertakings that have not yet been initiated and undertakings for which the Section 106 review process is underway but not completed.

VIII. Reporting

Any lead federal agency that utilizes this program comment shall report annually to NCSHPO, NATHPO, and the ACHP regarding the application of the exempt activities in Appendix A. The USDOT OAs will also report annually to NCSHPO, NATHPO, and the ACHP regarding any coordination with Project Sponsors to pursue the property-based approach.

XIV. Amendment

The Chairman of the ACHP may amend this program comment after consulting with the USDOT and other relevant federal agencies, NCSHPO, NATHPO, tribal representatives, the National Trust for Historic Preservation, and industry representatives, as appropriate. The ACHP will publish a notice in the **Federal Register** informing the public of any amendments that are made to the program comment.

XV. Sunset Clause

This program comment will expire twenty (20) years from the date of its issuance, unless it is amended prior to that date to extend the period in which it is in effect.

XVI. Withdrawal

The Chairman of the ACHP may withdraw this program comment, pursuant to 36 CFR 800.14(e)(6), by publication of a notice in the **Federal Register** 30 days before the withdrawal will take effect.

Appendix A: Exempted Activities

Undertakings limited to the activities listed below and when occurring within rail ROW are exempt from Section 106 review because their effects on rail-related historic properties are foreseeable and likely to be minimal and not adverse.

The lead federal agency for a proposed transportation-related undertaking in rail ROW is responsible for determining if the program comment applies. Approval by the lead federal agency of undertakings involving exempt activities specified below will be required in the form of written approval or through another established review and decision-making process normally used by the lead federal agency (*e.g.,* grant-making processes or permit issuance). In particular, activities denoted with (*) and (**) require evaluation by professionals meeting the Secretary of the Interior's (''SOI'') Professional Qualification Standards for Archaeologists or Architectural Historians, as appropriate. If the appropriate SOI-qualified professionals are not available to assist in the design and evaluation of activities denoted with (*) and (**), such activities are not exempt and remain subject to Section 106 review. Additional information regarding activities denoted with (*), (**) and (***) is provided following the list.

Before approving an undertaking, the lead federal agency (or a Project Sponsor that has been delegated or assigned responsibility for Section 106 compliance) must determine if the undertaking has the potential to cause effects to non-rail historic properties located within or in the vicinity of the rail ROW. For example, the construction of a new equipment maintenance building in an existing rail yard could introduce a visual, atmospheric, vibratory, and/or audible

[9] Properties that have previously been determined to be nationally significant may be re-evaluated as part of the optional Project Sponsor-led approach. Properties may be newly determined to be nationally significant as part of the consultation that would occur under the optional Project Sponsor-led approach.

element that could affect nearby non-rail historic properties. If such potential exists, the lead federal agency (or a Project Sponsor that has been delegated or assigned Section 106 responsibility) must follow the requirements of 36 CFR part 800, including establishing an Area of Potential Effects (APE) as defined in 36 CFR 800.16(d), or an applicable program alternative executed pursuant to 36 CFR 800.14 in order to consider the potential effects to non-rail historic properties located within that APE. This requires the federal agency and/or Project Sponsor to complete the four-step Section 106 review process for such non-rail historic properties in the APE: Initiating the process; identifying historic properties; assessing adverse effects; and resolution of adverse effects to historic properties. Nevertheless, the effects of the activities listed below on rail properties within rail ROW remain exempt from Section 106 review.

If an unanticipated discovery of a non-rail historic property, archaeological site of any nature, or human remains is made during the implementation of an exempt activity, the Section 106 requirements at 36 CFR 800.13 and/or state burial law, as appropriate depending on the nature of the discovery, would apply because such resources are not covered by the program comment. In addition, although the activities listed below are exempted from Section 106, the Project Sponsor must still comply with the requirements of any easements, covenants, or state or local historic designations applicable to the affected rail property(ies). At minimum, the Project Sponsor must cease all work in and secure the area of the discovery while the appropriate notifications are made and the parties consult to determine the appropriate course of action.

A. Track and Trackbed [10]

1. Replacement of rails, fasteners, ties, or bridge timbers. This includes replacing jointed rail with continuous welded rail. This does not include changing the gauge of the rail.

2. Addition of switches in an existing trackbed.

3. Replacement of Y-tracks, turn-outs, frogs, or switches within existing footprint.

4. Installation of new turn-outs, sidings, and crossovers in areas of previously disturbed soils or when construction methods do not require surface removal (*).

5. Replacement of subgrade, ballast, and sub-ballast materials.

6. Addition of fill free of debris or other clean borrow materials on top of existing soils or fill.

7. Excavation of clean borrow material from sources within the rail ROW (*).

8. Scraping and undercutting of an existing subgrade or embankment to restore a horizontal profile or increase vertical clearance (*). This includes modifying the subgrade only, not modifications to bridges, tunnels, or other infrastructure.

9. Widening an existing embankment for the addition of turn-outs (*).

10. Reinstallation of track in the same location where it existed previously but had been removed (*e.g.,* reinstallation of double tracking on a currently single-tracked line that had historically been double-tracked).

11. Removal of abandoned sidings, rails, ties, or ballast.

B. Bridges and Tunnels

1. The following bridge and tunnel structure maintenance actions: Cleaning; in-kind painting of the bridge superstructure or substructure; in-kind masonry repointing; deck overlay with the same or similar materials as existing; application of preservative and corrosion protection treatments; ballast cribbing; affixing stiffeners; or patching spalled concrete.[11]

2. Repair or replacement of brackets, hardware, angles, rivets, flanges, bearings, fasteners, motors, locking devices, or similar elements.

3. In-kind repair or replacement of structural or non-structural bridge members (*e.g.,* I-beams, T-beams, girders, box beams, abutments, piers, parapets, bents, bridge protective systems (*e.g.,* fenders, pile clusters, dolphins, sheer booms, sheer fences, island protection systems, or floating protection systems)) that do not alter character-defining features of the bridge (**). This does not include full or partial demolition of a bridge.

4. Actions to strengthen or address deteriorating structural conditions of bridges that are intended to preserve their useful life and that do not alter character—defining features of the bridge (**). Examples include converting the bridge deck from an open deck to a ballast deck; the replacement of traditional roller bearing assemblies to elastomeric or similar pad bearings; or changing the material beneath the ballast such that the change in material would not be visually discernable from outside of the ROW.

5. Repair or replacement of tunnel ventilation structures and associated equipment (*e.g.,* fans, ducting) (**). Replaced structures must be substantially the same size as or smaller than existing and be visually compatible with the surrounding built environment.

6. Removal or replacement of any bridge or tunnel material or added-on element that is not part of the original construction or that was not added during a period of major alteration dating back to 45 years or earlier (**).

C. Rail Buildings (i.e., Passenger Stations and Depots, Maintenance and Equipment Buildings, Interlocking Towers, Signal Houses)

1. In-kind repair or replacement of light fixtures in public spaces, such as passenger waiting areas.

2. Repair, extensions to the width, or extension or shortening of the length of boarding platforms, as necessary to meet federally-mandated ADA-compliant boarding requirements or to accommodate longer or shorter trains, that are constructed with common concrete methods (*e.g.,* concrete slab) (*). This does not include platforms constructed with brick, stone, tile, wood, or other materials. This does not include platform modifications that would result in the need to modify paths of travel, such as through the installation of ramps, to achieve ADA compliant access to/from associated passenger stations.

3. In-kind repair of platforms constructed with brick, stone, tile, wood, or other non-concrete materials (**). This does not include increasing the height of an existing platform to meet ADA requirements.

4. Maintenance, repair, or replacement (**) of escalators and elevators.

5. Cleaning, painting, or refinishing of surfaces with a like color and where the products or methods used would not damage the original surface.

6. In-kind masonry repointing.

7. Repair or replacement of passenger walkways constructed with common concrete or asphalt methods when consistent with existing materials.

8. The following federally mandated ADA improvements at passenger stations do not damage, cover, alter, or remove character-defining architectural spaces, features, or finishes:

a. Installation or replacement (**) of the following: Restroom stalls/partitions, and hardware and fixtures such as grab bars, tilt frame mirrors, sinks, and toilets; tactile warning strips on floors, passenger walkways, and platforms; cane detectors; sidewalk curb cuts; automatic door openers; station identifier and wayfinding signage; public information display systems (PIDS); wheelchair lifts; and wheelchair lift enclosures. This does not include ADA improvements involving the installation, modification, or removal of ramps, stairs, doors, windows, roofs, platform boarding canopies and supports, or ticket counters.

b. Widening of or adjustments to the slope of passenger walkways constructed with common concrete or asphalt methods (*).

9. Interior maintenance work or alterations in stations or other railroad facilities that is limited to non-public spaces that lack architectural distinction (**).

10. Replacement of pumps, air compressors, or fueling stations (*).

11. Removal of mechanical equipment inside railroad facilities not visible to the public (***). Examples include relay panels, switchgear, and track diagram boards.

12. Addition of new mechanical equipment in basements, beneath platforms, in designated mechanical equipment areas, or in areas that are otherwise out of public view.

13. Paving, painting, or striping of parking surfaces.

[10] These activities do not include alterations to the trackbed that would result in a substation visual change (*i.e.,* elevation) in the relationship between the trackbed and the surrounding landscape.

[11] "In-kind" as used here and elsewhere in Appendix A means that new materials used in repairs or replacements must match the material being replaced in composition, design, color, texture, and other visual and material properties. Substitute materials should be used only on a limited basis and only when they will match the appearance and general properties of the historic material and will not damage the historic property. For more information, see *https://www.nps.gov/tps/standards/rehabilitation/rehab/stand.htm.*

14. In-kind repair and replacement of platform boarding canopies and supports (*,**).

15. State-of-good-repair (''SOGR'') activities (**) not otherwise on this list that are necessary to keep a station, depot, or other rail building inhabitable, safe,[12] and in use, and may affect character-defining architectural features of the property, such as the repair or in-kind replacement of the following: Elevator head houses and portals; roofs; doors; windows; stairs; or railings. SOGR activities do not include demolition, decommissioning, or mothballing of rail buildings that are not in use, or reconfiguring the interior spaces of passenger stations for a new use (*e.g.,* enclosing a passenger waiting area to create new office, baggage handling, or event space).

D. Signals, Communications, and Power Generation

1. Maintenance, repair, or replacement of component parts of signal, communications, catenary, electric power systems, or other mechanical equipment that retains the visual appearance of the existing infrastructure (**). This includes replacement of individual signal masts, but does not include wholesale removal or replacement of a catenary system or signal bridge.

2. Maintenance, repair, or replacement (*) of radio base stations.

3. Maintenance, repair, or replacement (*) of the mechanical components of traction power substations, *i.e.,* transformers, circuit breakers, electrical switches. This does not include replacement of an entire substation.

4. Maintenance or repair of signal instrument houses and signal bungalows (**).

5. Installation, repair, or replacement of communications equipment on locomotives and rolling stock that are actively used for intercity passenger rail, rail transit, or freight rail. This does not apply to historic trains used for tourism.

E. Rail/Roadway At-Grade Crossings and Grade Separations

1. Maintenance of existing at-grade railroad crossings including installation of railroad crossing signs, signals, gates, warning devices and signage, highway traffic signal preemption, road markings, and similar safety upgrades (*).

2. In-kind repair, rehabilitation, or replacement of existing at-grade railroad crossings including installation of railroad crossing signs, signals, gates, warning devices and signage, highway traffic signal preemption, road markings, and similar safety upgrades (*,**).

3. Installation of new, at-grade railroad crossings on existing railroads and roadways, including installation of railroad crossing signs, signals, gates, warning devices and signage, highway traffic signal pre-emption, road markings, and similar safety features (*). This does not apply when the crossing involves an individual National Register-listed or eligible roadway or a roadway that is a contributing resource to a National Register-listed or eligible historic district.

[12] As required by applicable federal or municipal fire, life safety, or health codes or standards.

4. Expansion of existing sidewalks, constructed with common concrete or asphalt methods, along the sides of an existing at-grade rail crossing (*).

5. Maintenance, repair, or rehabilitation of existing grade-separated crossings of other transportation modes (highways, local roads, pedestrian underpasses) (*,**). This does not include modifications to existing grade separation structures (*e.g.,* bridges, overpasses) that would result in a substantial increase in height or overall massing.

6. Addition of lanes, turning lanes, road widening, and pavement markings for at-grade crossings (*). This does not apply when the crossing involves an individual National Register-listed or eligible roadway or a roadway that is a contributing resource to a National Register-listed or eligible historic district.

7. Construction of curbs, gutters, or sidewalks adjacent to existing roadway for at-grade crossings (*). This does not apply when the crossing involves an individual National Register-listed or eligible roadway or a roadway that is a contributing resource to a National Register-listed or eligible historic district.

F. Safety

1. Repair, replacement, or installation of the following security and intrusion prevention devices (*,**): security cameras, closed captioned television (CCTV) systems, light poles and fixtures, bollards, emergency call boxes, access card readers, and warning signage.

2. Replacement of security and safety fencing where the replacement is substantially the same appearance as existing (*). This does not include replacement of an open-fence design with a closed design that would create a visual barrier.

3. Replacement or installation of safety equipment/fall protection equipment on rail bridges, signal bridges, or other non-station structures for the protection of rail workers or the public (**). Examples include railings, walkways, gates, tie-off safety cables, anchors, or warning signage.

4. Repair, replacement, or installation of wayside detection devices (*).

5. Repair, replacement (*), or installation (*,**) of bridge clearance/strike beams.

G. Erosion Control, Rock Slopes, and Drainage

1. Placement of rip rap to prevent erosion affecting bridges and waterways.

2. Erosion control through slide and slope corrections (*).

3. Rock removal and re-stabilization activities such as scaling and bolting.

4. Maintenance, repair, or replacement (*) of pre-cast concrete, cast iron, and corrugated metal culverts that lack stone headwalls. This does not include uniquely constructed culverts such as those built by the Civilian Conservation Corps or those made out of unusual materials (*e.g.,* a hollowed log).

5. Expansion, through horizontal elongation, of pre-cast concrete, cast iron, and corrugated metal culverts that lack stone headwalls for the purpose of improved drainage (*).

6. Embankment stabilization or the re-establishment of ditch profiles where no new grading is involved.

7. Corrections to drainage slopes, ditches, and pipes to alleviate improper drainage or changing alluvial patterns (*).

8. In-kind repair or replacement of retaining walls (*,**).

9. Maintenance, repair, or alterations to the interiors of culverts and related drainage pathways.

H. Environmental Abatement

1. Removal of environmental hazards on bridge structures, *e.g.,* treated wood that may leak into waterways or sensitive habitat, removal of graffiti; and abatement of lead/heavy-metal coatings and paintings. Activities that replace coatings or paint must be of the same color and appearance as the materials that have been abated.

2. Removal of asbestos-containing pipe insulation or transmitter relay panels in or on rail operations buildings, bridges, or tunnels.

3. Removal of contaminated ballast and sub-ballast materials.

4. Removal of contaminated soils (*).

I. Operations

1. Establishment of quiet zones, including the installation of required warning devices and additional safety measures installed at grade crossings, that do not entail closing of existing roadways.[13]

2. Increased frequency of train operations that do not result in noise or vibration impacts. (Note: A noise and vibration study would be prepared by a qualified subject matter expert as part of the NEPA process).

3. Temporary storage of rail cars on active rail lines.

4. Repair, maintenance, or replacement (*) of noise barriers. Replacements must be substantially the same size and visual appearance as existing.

J. Landscaping, Access Roads, and Laydown Areas

1. In-kind replacement of existing landscaping.

2. Mowing, seeding/reseeding, planting, tree trimming, brush removal, or other similar groundcover maintenance activities.

3. Herbicidal spraying.

4. Maintenance of existing access roads and lay-down areas (*).

K. Utilities

1. Installation, maintenance, repair, relocation, or replacement of underground utilities (*). Examples include electrical, sewer, compressed air lines, fuel lines, and fiberoptic cable.

2. Maintenance, repair, or replacement (*) of above-ground utilities. Replacements must be substantially the same size and scale (including height) as existing.

[13] A quiet zone is an FRA exemption to the rule requiring trains to sound their horns when approaching public highway-rail grade crossings. More information on the creation of quiet zones is available in FRA's regulations at 49 CFR part 222, Use of Locomotive Horns at Public Highway-Rail Grade Crossings, and in guidance promulgated by FRA's Office of Railroad Safety (for example, see *https://www.fra.dot.gov/Page/P0841* and *https://www.fra.dot.gov/eLib/Details/L04781*).

3. Installation, maintenance, repair, or replacement of utility lines and conduit inside tunnels that does not involve affixing new equipment to the exterior face of tunnel portals.

4. Affixing conduit, repeaters, antennae, and similar small-scale equipment on the exterior masonry face of tunnel portals where the color of the equipment matches the existing masonry in order to limit its visibility and does not damage the masonry construction (**).

L. Bicycle and Pedestrian Facilities, Shared Use Paths, and Other Trails

1. Maintenance, repair, or replacement (*) of existing bicycle lanes, pedestrian walkways, shared use paths (*e.g.,* bicycle, pedestrian), and other trails intended for non-motorized transportation that are constructed with common materials.

2. Adding lanes to existing shared use paths or other trails constructed with common materials (*).

3. Adding crossings for pedestrians and bicycle facilities, shared use paths, or other trails (*).

4. Installation of bicycle aid stations, bicycle racks and storage units, and similar amenities (*, **).

5. Maintenance, repair, or replacement (*) of bicycle aid stations, bicycle racks, and storage units, and similar amenities. Replacements must be substantially the same size and appearance as existing.

6. Installation of information kiosks, panels, and similar amenities for pedestrian, bicyclists, or other path or trail users (***).

7. Maintenance, repair, or replacement (*) of information kiosks, panels, and similar amenities. Replacements must be substantially the same size and appearance as existing.

8. Maintenance, repair, or replacement (*) of existing curbs, gutters, or sidewalks constructed with common materials (*e.g.,* non-decorative concrete or asphalt).

M. Construction/Installation of New Rail Infrastructure

1. Minor new construction and installation of rail infrastructure that is compatible with the scale, size, and type of existing rail infrastructure, such as buildings for housing telecommunications equipment, signal instruments, and similar equipment; storage buildings that house landscaping or maintenance of way equipment or specialty vehicles for track repairs or inspections; locomotive and train car service and inspection (S&I) facilities; trailers or temporary structures for housing rail personnel; and safety/security fencing that uses an open design and does not create a visual barrier. (*,**) applies to all activities in this bullet. This does not include the construction of new passenger stations, rail yards, bridges, or tunnels, or demolition of existing structures.

2. Installation of utility and communications poles, transmission lines, and related equipment within electrified rail ROW (*i.e.,* rail ROW with existing overhead transmission lines) (*). New poles and overhead lines must be substantially the same height as existing. *(Note: If another existing Section 106 Program Alternative, such as the ACHP Program Comment for Positive Train Control or the ACHP Program Comment for Wireless Communications Facilities, would apply to the proposed activities, defer to that Program Alternative.)*

3. Installation of new culverts beneath the trackbed in areas not visible or accessible to the public (*).

N. Rail Properties Less Than 45 Years Old

1. Maintenance, repair, replacement, rehabilitation, or demolition of any rail property less than 45 years old is an exempt activity (unless the rail property is of exceptional importance as defined under NHRP Criterion Consideration G [14] and as determined through consultation between the lead federal agency and the State Historic Preservation Officer (SHPO)). However, as with all other activities in this list, the Project Sponsor and lead federal agency must consider whether the activity may cause effects to adjacent or nearby non-rail historic properties (*e.g.,* demolition of a tall rail building could alter the existing viewshed or eliminate a noise buffer). Depending on the nature of the proposed undertaking, such consideration of effects to non-rail properties may require the involvement of an SOI-qualified professional and consultation with SHPO and other consulting parties, as well as establishment of an APE and identification of historic properties in that APE, assessment of effects to those properties, and resolution of any adverse effects to those properties.

(*) The proposed undertaking must be located entirely within previously disturbed soils or fill. Previously disturbed soils are those that show visible evidence that construction techniques used during previous construction activities required the grading or removal of soil or the addition of fill. A project engineer may be able to determine whether the ground has been previously disturbed or the project location consists of fill based on a review of relevant engineering plans from earlier construction activities at that location. If it cannot be readily demonstrated from a review of available documentation or a non-intrusive site investigation that the entire vertical and horizontal limits of ground disturbance for a proposed undertaking would be entirely located within previously disturbed soils or fill, the lead federal agency (or a Project Sponsor that has been delegated or assigned responsibility for Section 106 compliance) must ensure a Secretary of the Interior (SOI)-qualified archeologist confirms the presence or absence of previously disturbed soils. The Project Sponsor, if it has not been delegated or assigned responsibility for Section 106 compliance, must submit to the lead federal agency the archaeologist's recommendation, with supporting justification, that the undertaking would only affect disturbed soils, and the lead federal agency must provide written concurrence to the Project Sponsor before the undertaking can proceed. If the archaeologist determines that undisturbed soils are present in areas of proposed ground disturbance or if there is uncertainty, this program comment does not apply and the proposed activity remains subject to standard Section 106 review or another applicable program alternative.

(**) The proposed undertaking must meet one of the following circumstances:

- The affected rail property(ies) is listed on the National Register of Historic Places (NRHP), has previously been determined eligible for listing on the NRHP, or the lead federal agency and Project Sponsor agree to treat the affected rail property(ies) as eligible for listing on the NRHP based on factors such as the date of construction (generally 45 years old or older) and the establishment of the period(s) of significance, an assessment of integrity, and the identification of character-defining features of the affected rail property(ies) by an SOI-qualified professional. SOI-qualified professionals may be federal agency staff, federal agency contractors, Project Sponsor staff, and/or consultants hired by Project Sponsors. The value of treating a rail property as being historic is the time-savings achieved by not having to go through the full identification, evaluation, and consultation steps of the standard Section 106 process. When the affected rail property(ies) is considered historic, the work must be performed in accordance with SOI standards. The work must follow the National Park Service Standards for Preservation and Guidelines for Preserving Historic Buildings, as appropriate. Whenever possible, historic fabric must be repaired rather than replaced. The Project Sponsor, if it has not been delegated or assigned responsibility for Section 106 compliance, must provide written justification to the lead federal agency explaining why repair is not feasible. In cases where existing historic materials are beyond repair, replacement must be carried out in-kind. The lead federal agency must ensure the Project Sponsor is performing the work using or under the direct supervision of an SOI-qualified professional in the relevant discipline(s). Verification and approval in writing by the lead federal agency is required before the Project Sponsor can implement the proposed undertaking. Lastly, the lead federal agency must notify the relevant SHPO(s) in writing of the proposed undertaking upon the lead federal agency's approval and prior to the Project Sponsor's commencement of the undertaking. Or,
- The rail property is less than 45 years old and does not meet NHRP Criterion Consideration G. In such cases, the Project Sponsor may carry out maintenance, repair, rehabilitation, or replacement activities of any nature and does not need to follow SOI standards *with regard to the subject rail property.* However, the restrictions noted in Section N of the preceding list apply.

(***) If the equipment to be removed includes obsolete or outdated technology, the Project Sponsor must contact the relevant SHPO, railroad museums or railroad historical societies, museums, educational institutions, or similar entities to determine if there is an entity that may be interested in purchasing or receiving the equipment as a donation, as appropriate. The Project Sponsor, if it has not been delegated or

[14] For information regarding the NRHP Criteria for Evaluation, see *https://www.nps.gov/nr/publications/bulletins/nrb15/.*

assigned responsibility for Section 106 compliance, must demonstrate to the lead federal agency that it has made a good faith effort to contact such parties prior to removal and disposition of such equipment.

Authority: 36 CFR 800.14(e).

Dated: November 14, 2017.

Kelly Y. Fanizzo,

Associate General Counsel.

BILLING CODE 4310–K6–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2014–0022]

Technical Mapping Advisory Council

AGENCY: Federal Emergency Management Agency, DHS

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting.

SUMMARY: The Federal Emergency Management Agency (FEMA) Technical Mapping Advisory Council (TMAC) will meet via conference call on December 6, 2017. The meeting will be open to the public.

DATES: The TMAC will meet via conference call on Wednesday, December 6, 2017 from 10:30 a.m. to 5:30 p.m. Eastern Standard Time (EST). Please note that the meeting will close early if the TMAC has completed its business.

ADDRESSES: For information on how to access the conference call, information on services for individuals with disabilities, or to request special assistance for the meeting, contact the person listed in **FOR FURTHER INFORMATION CONTACT** below as soon as possible. Members of the public who wish to dial in for the meeting must register in advance by sending an email to *FEMA–TMAC@fema.dhs.gov* (attention Mark Crowell) by 11 a.m. EST on Friday, December 1, 2017.

To facilitate public participation, members of the public are invited to provide written comments on the issues to be considered by the TMAC, as listed in the **SUPPLEMENTARY INFORMATION** section below. The Agenda and other associated material will be available for review at *www.fema.gov/TMAC* by Friday, December 1, 2017. Written comments to be considered by the committee at the time of the meeting must be received by Monday, December 4, 2017, identified by Docket ID FEMA–2014–0022, and submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email:* Address the email TO: *FEMA–RULES@fema.dhs.gov* and CC: *FEMA–TMAC@fema.dhs.gov.* Include the docket number in the subject line of the message. Include name and contact detail in the body of the email.
- *Mail:* Regulatory Affairs Division, Office of Chief Counsel, FEMA, 500 C Street SW., Room 8NE, Washington, DC 20472–3100.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the docket number for this action. Comments received will be posted without alteration at *http://www.regulations.gov,* including any personal information provided. *Docket:* For docket access to read background documents or comments received by the TMAC, go to *http://www.regulations.gov* and search for the Docket ID FEMA–2014–0022.

A public comment period will be held on December 6, 2017, from 1:30–1:50 p.m. EST. Speakers are requested to limit their comments to no more than two minutes. Please note that the public comment periods may end before the time indicated, following the last call for comments. Contact Mark Crowell, below, to register as a speaker by close of business on Friday, December 1, 2017.

FOR FURTHER INFORMATION CONTACT: Mark Crowell, Designated Federal Officer for the TMAC, FEMA, 500 C Street SW., Washington, DC 20472–3100, telephone (202) 646–3432, and email *mark.crowell@fema.dhs.gov.* The TMAC Web site is: *http://www.fema.gov/TMAC.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. Appendix.

As required by the *Biggert-Waters Flood Insurance Reform Act of 2012,* the TMAC makes recommendations to the FEMA Administrator on: (1) How to improve, in a cost-effective manner, the (a) accuracy, general quality, ease of use, and distribution and dissemination of flood insurance rate maps and risk data; and (b) performance metrics and milestones required to effectively and efficiently map flood risk areas in the United States; (2) mapping standards and guidelines for (a) flood insurance rate maps, and (b) data accuracy, data quality, data currency, and data eligibility; (3) how to maintain, on an ongoing basis, flood insurance rate maps and flood risk identification; (4) procedures for delegating mapping activities to State and local mapping partners; and (5) (a) methods for improving interagency and intergovernmental coordination on flood mapping and flood risk determination, and (b) a funding strategy to leverage and coordinate budgets and expenditures across Federal agencies. Furthermore, the TMAC is required to submit an Annual Report to the FEMA Administrator that contains: (1) A description of the activities of the Council; (2) an evaluation of the status and performance of flood insurance rate maps and mapping activities to revise and update Flood Insurance Rate Maps; and (3) a summary of recommendations made by the Council to the FEMA Administrator.

Agenda: On December 6, 2017, the TMAC will review the final narrative content for the TMAC 2017 Annual Report and conduct a vote on the final content and, if approved, submit the report including the previously approved 2017 recommendations and implementation actions to the FEMA Administrator. Members of the public will be afforded an opportunity to comment (no more than 2 minutes per individual) prior to any votes taken by the TMAC. A more detailed agenda will be posted by November 30, 2017, at *http://www.fema.gov/TMAC.*

Dated: November 3, 2017.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Federal Emergency Management Agency.

[FR Doc. 2017–24969 Filed 11–16–17; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2017–0034; OMB No. 1660–0015]

Agency Information Collection Activities: Proposed Collection; Comment Request; Revisions to National Flood Insurance Program Maps: Application Forms and Instructions for (C)LOMAs and (C)LOMR–Fs

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity

to comment on a reinstatement, without change, of a previously approved information collection for which approval has expired. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning information required by the Federal Emergency Management Agency to amend or revise National Flood Insurance Program maps to remove certain property from the 1-percent annual chance floodplain.

DATES: Comments must be submitted on or before January 16, 2018.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID FEMA–2017–0034. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., 8NE, Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Todd Steiner, Program Analyst, FEMA, Federal Insurance & Mitigation Administration, at (202) 679–4061 or *Todd.Steiner2@fema.dhs.gov.* You may contact the Records Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) is authorized by the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4001 *et seq.* The Federal Emergency Management Agency (FEMA) administers the NFIP and maintains the maps that depict flood hazard information. The land area covered by the floodwaters of the base flood is the Special Flood Hazard Area (SFHA) on NFIP maps. The SFHA is the area where the NFIP's floodplain management regulations must be enforced and the area where the mandatory purchase of flood insurance applies. If a SFHA has been determined to exist for property and the owner or lessee of the property believes his/her property has been incorrectly included in a SFHA, information can be provided to support removal of the SFHA designation. NFIP regulations, at 44 CFR parts 65 and 70, outline the data that must be submitted by an owner or lessee of property who believes his/her property has been incorrectly included in a SFHA. In order to remove an area from a SFHA, the owner or lessee of the property must submit scientific or technical data demonstrating that the area is ''reasonably safe from flooding'' and not in the SFHA.

This information collection expired on September 30, 2017. FEMA is requesting a reinstatement, without change, of a previously approved information collection for which approval has expired.

Collection of Information

Title: Revisions to National Flood Insurance Program Maps: Application Forms and Instructions for (C)LOMAs and (C)LOMR-Fs.

Type of information collection: Reinstatement, without change, of a previously approved information collection for which approval has expired.

OMB Number: 1660–0015.

Form Titles and Numbers: FEMA Form 086–0–26, Property Information; FEMA Form 086–0–26A, Elevation Form; FEMA Form 086–0–26B, Community Acknowledgement Form; FEMA Form 086–0–22 and FEMA Form 086–0–22A (Spanish), Application Form for Single Residential Lot or Structure Amendments to National Flood Insurance Program Maps.

Abstract: FEMA collects scientific and technical data submissions to determine whether a specific, single-lot property is located within or outside of a Special Flood Hazard Area (SFHA). If the property is determined not to be within a SFHA, FEMA provides a written determination and the appropriate map is modified by a Letter of Map Amendment (LOMA) or a Letter of Map Revision-Based on Fill (LOMR-F). The owner or lessee of a property uses a LOMA or LOMR-F to show that a property is not located within the SFHA, making it possible for the lending institution to waive the flood insurance requirement. If the policyholder decides to maintain insurance on the property, the new determination should result in lower rates.

Affected Public: Individuals and Households; and Business or Other for-Profit Institutes.

Estimated Number of Respondents: 121,116.

Estimated Number of Responses: 121,116.

Estimated Total Annual Burden Hours: 150,725 hours.

Estimated Total Annual Respondent Cost: $6,501,379.

Estimated Respondents' Operation and Maintenance Costs: $24,099,750.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $268,401.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Tammi Hines,

Acting Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–52–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–3394–EM; Docket ID FEMA–2017–0001]

Alabama; Amendment No. 1 to Notice of an Emergency Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of an emergency declaration for the State of Alabama (FEMA–3394–EM), dated October 8, 2017, and related determinations.

DATES: This amendment was issued October 26, 2017.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the incident period for this emergency is closed effective October 10, 2017.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Brock Long,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA–2011–0008]

Aviation Security Advisory Committee (ASAC) Meeting

AGENCY: Transportation Security Administration, DHS.

ACTION: Committee Management; Notice of Federal Advisory Committee Meeting.

SUMMARY: The Transportation Security Administration (TSA) will hold a meeting of the Aviation Security Advisory Committee (ASAC) on Thursday, December 7, 2017, to discuss issues listed in the ''Meeting Agenda'' section below. This meeting will be open to the public as stated in the **SUMMARY** section below.

DATES: The Committee will meet on Thursday, December 7, 2017, from 9:00 a.m. to 12:00 p.m. This meeting may end early if all business is completed.

ADDRESSES: The meeting will be held at TSA Headquarters, 601 12th Street South, Arlington, VA 20598–6028.

FOR FURTHER INFORMATION CONTACT: Dean Walter, Aviation Security Advisory Committee Designated Federal Official, Transportation Security Administration (TSA–28), 601 South 12th Street, Arlington, VA 20598–6028, *ASAC@tsa.dhs.gov,* 571–227–2645.

SUPPLEMENTARY INFORMATION:

Summary

Notice of this meeting is given in accordance with the Aviation Security Stakeholder Participation Act, codified at 49 U.S.C. 44946. Pursuant to 49 U.S.C. 44946(f), ASAC is exempt from the Federal Advisory Committee Act (5 U.S.C. App.). The committee provides advice and recommendations for improving aviation security measures to the Administrator of TSA.

The meeting will be open to the public and will focus on items listed in the ''Meeting Agenda'' section below. Members of the public, and all non-ASAC members and non-TSA staff must register in advance with their full name and date of birth to attend. Due to space constraints, the meeting is limited to 75 people, including ASAC members and staff, on a first to register basis. Attendees are required to present government-issued photo identification to verify identity.

In addition, members of the public must make advance arrangements, as stated below, to present oral or written statements specifically addressing issues pertaining to the items listed in the ''Meeting Agenda'' section below. The public comment period will begin at approximately 11:00 a.m., depending on the meeting progress. Speakers are requested to limit their comments to three minutes. Contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section no later than November 30, 2017, to register to attend the meeting and/or to present oral or written statements addressing issues pertaining to the items listed in the ''Meeting Agenda'' section below. Anyone in need of assistance or a reasonable accommodation for the meeting should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Meeting Agenda

The Committee will meet to discuss items listed in the agenda below:

- Committee recommendations update
- Subcommittee briefings on calendar year (CY) 2017 activities, key issues, and areas of focus for CY 2018:
  - Commercial airports
  - International aviation
  - Air cargo
  - General aviation
  - Security Technology
- Legislative Update
- REAL ID Act of 2005 implementation update
- Discussion of the CY 2018 Committee Agenda

Dated: November 9, 2017.

Eddie D. Mayenschein,

Assistant Administrator, Office of Security Policy and Industry Engagement.

BILLING CODE 9110–05–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6067–N–01]

Revocation of Orders of Succession for the Office of the Deputy Secretary

AGENCY: Office of the Deputy Secretary, HUD.

ACTION: Revocation of Orders of Succession.

SUMMARY: In this document, the Deputy Secretary of the Department of Housing and Urban Development rescinds all previous Orders of Succession for the Office of the Deputy Secretary.

DATES: November 13, 2017.

FOR FURTHER INFORMATION CONTACT: Office of Deputy Secretary, U.S. Department of Housing and Urban Development, 451 7th Street SW., Room 10100, Washington, DC 20410–6000, telephone (202) 402–5430. (This is not a toll-free number). Persons with hearing- or speech-impairments may access this number through TTY by calling the toll-free Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Section A. Revocation of Orders of Succession

The Deputy Secretary of the Department of Housing and Urban Development revokes and rescinds any Orders of Succession for the Office of Deputy Secretary that was signed by a previous Deputy Secretary or Acting Deputy Secretary, including Orders of Succession published in the **Federal Register** or published by memorandum.

Section B. Authority Superseded

This publication supersedes all prior Orders of Succession for the Office of the Deputy Secretary, including Orders of Succession published by memorandum on January 8, 2017 and August 4, 2017.

Authority: Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: November 13, 2017.

Pamela H. Patenaude,

Deputy Secretary.

Issuance of Import Permits for Zimbabwe Elephant Trophies Taken on or After January 21, 2016, and on or Before December 31, 2018

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The U.S. Fish and Wildlife Service (Service) has made a finding that the killing of African elephant trophy animals in Zimbabwe, on or after January 21, 2016, and on or before December 31, 2018, will enhance the survival of the African elephant. Applications to import trophies hunted during this time period will be considered to have met the enhancement requirement, unless we issue a new finding based on available information. The Service may replace this finding, without any notification in the **Federal Register,** at any time that this finding no longer reflects the available information consistent with the regulatory requirements. In reviewing each application received for import of such specimens, the Service evaluates the information provided in the application, as well as other information available to the Service on the status of the elephant population and the management program for elephants in the country to ensure that the program is promoting the conservation of the species. Each application to import sport-hunted elephant trophies must also meet all other applicable permitting requirements before it may be authorized. This determination does not affect previous determinations by the Service regarding trophy animals taken before January 21, 2016.

DATES: This finding is made November 17, 2017.

ADDRESSES: Timothy J. Van Norman, Chief, Branch of Permits, Division of Management Authority, U.S. Fish and Wildlife Service, MS: IA, 5275 Leesburg Pike, Falls Church, VA 22041–3803; fax (703) 358–2280; or email *DMAFR@fws.gov.*

FOR FURTHER INFORMATION CONTACT: Timothy J. Van Norman, (703) 358–2104 (telephone); (703) 358–2280 (fax); or *DMAFR@fws.gov* (email).

SUPPLEMENTARY INFORMATION:

Background

The African elephant (*Loxodonta africana*) is listed as threatened under the Endangered Species Act of 1973, as amended (ESA or Act; 16 U.S.C. 1531 *et seq.),* on the List of Endangered and Threatened Wildlife in title 50 of the Code of Federal Regulations (50 CFR 17.11(h)). It is also regulated under the provisions of section 4(d) of the Act (known as a ''section 4(d) rule'') with a rule found at 50 CFR 17.40(e). The section 4(d) rule includes specific requirements for the import of sport-hunted trophies. Under § 17.40(e)(6)(i)(B), in order for the Service to authorize the import of a sport-hunted elephant trophy, the Service must find that the killing of the trophy animal will enhance the survival of the species in the wild (known as an ''enhancement finding'').

The Zimbabwe elephant population, along with elephant populations in Botswana, Namibia, and South Africa, are also included in Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) for the exclusive purpose of allowing certain trade subject to annotation, including trade in hunting trophies for noncommercial purposes. All specimens not included in the annotation are deemed Appendix I specimens, and trade in them is regulated accordingly. On August 22, 1997, the U.S. Fish and Wildlife Service (Service) published a proposed rule announcing decisions by the Conference of the Parties to CITES and seeking comment on whether the United States should enter a reservation for any of the species that had been listed on CITES Appendices I and II (62 FR 44627). We discussed how the populations of African elephants in Zimbabwe, Botswana, and Namibia had been down-listed from CITES Appendix I to Appendix II and noted that, because African elephants are listed under the ESA as threatened, the African elephant section 4(d) rule found at 50 CFR 17.40(e) would continue to apply. This rule required that we find that the killing of the animal whose trophy was intended for import would enhance the survival of the species before a sport-hunted trophy could be imported. We also stated that, in making the required enhancement finding for the import of sport-hunted trophies, the Service must review the status of the elephant population and the total management program for the elephant in each country to ensure the program is promoting the conservation of the species.

The preamble to the 1997 proposed rule noted that positive enhancement findings for the countries of Zimbabwe, Botswana, and Namibia had been made and would remain in effect until the Service found that the conditions of the section 4(d) rule are no longer met and published notice of a changed finding in the **Federal Register.** On May 18, 2001, we published a final rule again announcing decisions made at a meeting of the Conference of the Parties to CITES, including the decision to down-list the South African population of African elephants from CITES Appendix I to Appendix II (66 FR 27601). We again discussed the import requirements for African elephant sport-hunted trophies and stated that the enhancement finding for South African elephants would remain in effect until the Service found that conditions of the rule are no longer met and published notice of a changed finding in the **Federal Register.** The U.S. District Court for the District of Columbia, in *Safari Club International, et al.* v. *Jewell, et al.,* 213 F. Supp. 3d 48 (D.D.C. Sept. 30, 2016), has held that the Service created a binding duty on itself when it stated in the preamble of the 1997 proposed rule that it would publish notice in the **Federal Register** before making a change in its 1997 enhancement finding for Zimbabwe, and that the Service then violated this commitment when it published the **Federal Register** notice on May 12, 2014, several weeks after making an interim negative enhancement finding for Zimbabwe on April 4, 2014. As remedy, the Court ordered that the effective date of the 2014 enhancement finding is the date of the **Federal Register** notice, May 12, 2014, meaning that trophies taken on or before May 11, 2014 were allowed to meet the enhancement requirement. We did not intend to create a legal duty to publish changed enhancement findings through these **Federal Register** preamble statements.

On June 6, 2016, the Service amended the African elephant section 4(d) rule (81 FR 36388). With this amendment, ESA permits are required to import all African elephant sport-hunted trophies, including those from the CITES Appendix II populations of Zimbabwe, Botswana, Namibia, and South Africa. Because all imports will be accompanied by a threatened species permit evaluated through the ESA permit application process found at 50 CFR 17.32(a), we will no longer publish

notice of changed enhancement findings for African elephant sport-hunted trophies in the **Federal Register**. In the future, when there are subsequent changes to the determination, the individual applicant will be notified regarding whether his or her permit application was granted or denied, including a brief statement of the grounds for any denial. We may also post information on the import of African elephant hunting trophies on the Service's Web page (*www.fws.gov/international*), as appropriate and consistent with applicable laws and regulations.

Import Suspension

On April 4, 2014, the Service announced an interim suspension of imports of sport-hunted elephant trophies taken in Zimbabwe during the 2014 season. We revised this finding on April 17, 2014, primarily to clarify that the suspension applied only to elephants hunted on or after April 4, 2014. This determination was announced in the **Federal Register** on May 12, 2014 (79 FR 26986). Our decision to establish an interim suspension of imports of elephant trophies from Zimbabwe was due to having insufficient information on the status of elephants in Zimbabwe and on Zimbabwe's current elephant management program to make an enhancement finding. On July 17, 2014, the Service found that the import of elephant trophies taken in Zimbabwe in 2014 on or after April 4, 2014, would be suspended. We revised this finding on July 22, 2014, to make non-substantive corrections and announced this determination in the **Federal Register** on July 31, 2014 (79 FR 44459). The July 17, 2014, decision to uphold the April 4, 2014, suspension was due to the Service being unable to make an enhancement finding even after receiving additional materials from the Zimbabwe Parks and Wildlife Management Authority (ZPWMA) and others. On March 26, 2015, the Service made another determination to continue the suspension (80 FR 42524, July 17, 2015). This decision was again due to the Service being unable to make an enhancement finding even after receiving additional materials from ZPWMA and others. The suspension that resulted from the negative enhancement findings did not prohibit U.S. hunters from traveling to Zimbabwe and participating in an elephant hunt. The Act does not prohibit take (*e.g.,* hunting) within a foreign country; it prohibits import of trophies taken during such hunts without required authorization under the Act.

Following the Service's March 26, 2015, finding, the Service sent a letter on May 12, 2015, to the Honorable Saviour Kasukuwere, (formerly) Zimbabwe's Minister of Environment, Water and Climate, outlining the concerns the Service still had regarding elephant trophy imports from Zimbabwe. The letter identified six areas of concern: the lack of a current management plan; the current population status of elephants in Zimbabwe; poaching levels and prevention; regulations and enforcement concerns; the sustainable utilization of elephants in Zimbabwe; and the utilization of hunting revenues.

On July 20, 2015, ZPWMA responded to each of the questions outlined in the Service's letter and included a draft version of the *Action Plan for Elephant Conservation and Management in Zimbabwe (2015–2020).* In January 2016, the Service received the final version of the action plan, the *Zimbabwe National Elephant Management Plan (2015–2020),* that had been approved and signed by the (then) Director-General of ZPWMA Edson Chidziya, on January 20, 2016, and the Honorable Oppah Muchinguri-Kashiri, Minister of Environment, Water and Climate, on January 21, 2016.

In September 2016, during the 17th Meeting of the Conference of the Parties to CITES, the Service met with representatives from Zimbabwe to further discuss the current status of the Service's evaluation of the importation of elephant trophies. As a result of those conversations, the Service received a letter dated November 8, 2016, with supplemental information regarding Zimbabwe's elephant management plan priorities. Further, on January 27, 2017, the Service received a letter from ZPWMA containing a report, ''The Role of Trophy Hunting of Elephants in Support of the Zimbabwe's Communal Areas Management Programme for Indigenous Resources (CAMPFIRE) Program: December 2016'' that more fully discussed the source and amount of revenue generated between 2010 and 2015 through the CAMPFIRE program, the current role of CAMPFIRE, and how revenue generated by elephant hunting has been utilized within communal areas over this 6-year period and into the future.

Under 50 CFR 17.40(e)(6)(i)(B), the Service evaluates a number of factors to determine whether the killing of the trophy animal taken in a range country will enhance the survival of African elephants as well as taking into consideration the permit issuance criteria outlined in 50 CFR 17.32(a)(2). In evaluating each of these criteria, the Service has considered the information currently available to the Service as of the date of this finding on elephant hunting in Zimbabwe in 2016, 2017, and 2018, including information provided by the Government of Zimbabwe, current applicants for permits to import sport-hunted elephant trophies, interested individuals and organizations, and other information available to the Service.

Zimbabwe's Conservation Efforts for Elephants

On January 21, 2016, Zimbabwe adopted the *Zimbabwe National Elephant Management Plan (2015–2020)* (EMP) that replaced *The Policy and Plan for Elephant Management in Zimbabwe* (1997) and *Elephant Management in Zimbabwe, third edition* (July 1996), the former management plans. The EMP incorporates an adaptive management framework with higher level targets, with key components, strategic objectives, and outputs. Each key component has management actions that can be measured and verified through ''Key Performance Indicators.'' A set deadline for each action was identified. These measurable provisions allow ZPWMA to monitor the success of the new management plan and, through an adaptive management approach, address newly emerging concerns and long-term management needs. The EMP addresses the challenges identified by the 2014 workshop participants and concerns identified by the Service about the previous management plans. The EMP was developed as an outcome of several national and regional workshops that included government officials, nongovernmental organizations (NGOs), rural community leaders, and safari outfitters and landowners.

The 2014 Pan African Elephant Aerial Survey, also known as the Great Elephant Census (GEC), available in 2015, provided ZPWMA with a better elephant baseline population abundance estimate to assess future hunting quotas, management efforts, and anti-poaching activities. Confirmed results from the GEC reported an estimate for elephant abundance in Zimbabwe to be 82,304 individuals (73,715–90,893). The International Union for Conservation of Nature's African Elephant Specialist Group (IUCN AfESG) *African Elephant Status Report–2016* estimated Zimbabwe's elephant population at 82,630 ± 8,589 across a range of 81,228 km². The results of the 2014 GEC, and subsequent survey data reported in the 2016 AfESG report, are more reliable and provide a better basis for

establishing management priorities than previous surveys and guesses, and are now utilized in the EMP and quota setting.

As identified in the 2015 finding, the Service explained that, if properly implemented, the ZPWMA regulatory mechanisms for managing elephants appear to be adequate. A key issue in the 2015 finding was whether an adequate mechanism is in place to reliably document the financial benefits that U.S. hunters provide for elephant conservation through participation in a hunting program that addresses management needs of the species and whether the funds were utilized in a meaningful manner. Since the 2015 finding, the Service has received information regarding the Tourism Receipts Accounting System (TRAS) and its web-based system (TRAS2) under which the Reserve Bank of Zimbabwe, in collaboration with relevant stakeholders, can now track all revenue generated through hunting activities. Under this system, all authorized hunts are now being registered, allowing for the capture of hunting data, such as the origin of clients, value of trophies and hunts, and area hunted, so that officials can monitor hunting quota utilization and track hunted trophies. This system will provide data that was not previously easily obtained and greatly improve the ability to track hunting revenue.

One concern expressed by the Service in its previous findings was whether ZPWMA was responding to the apparent poaching crisis facing Zimbabwe. Based on communication from ZPWMA, as well as information received from other sources, ZPWMA has stepped up its anti-poaching efforts nationally by adopting a number of ''Urgent Measures.'' As shown in their July 2015 response to Service questions, most of ZPWMA's budget (77 percent) is allocated to staff costs and patrol provisions. These expenditures reportedly fund anti-poaching efforts throughout the elephant range. ZPWMA reportedly has a staff of 1,504 active field rangers and has stated that there is intent to increase this number. According to ''The Zimbabwe National Elephant Supplementary Management Plan (2015–2020)'', provided to the Service in late 2016, over 80 percent of spending under the new EMP has been on law enforcement (anti-poaching) and training, with law enforcement identified as the top priority going forward.

With the adoption of the EMP on January 21, 2016, it appears that ZPWMA has the means to successfully implement these laws and regulations. Moreover, ZPWMA has a mechanism in place to monitor the effects of the EMP and adapt to changing environmental and social factors that would adversely affect elephant populations within Zimbabwe.

According to the information provided to the Service in late 2014 and 2015, Zimbabwe had established hunting quotas for all areas of the country. However, it was not until late 2015 and early 2016 that the Service received more specific information on how these quotas are established, including how other forms of take, such as poaching and problem animal control, were taken into account. Further, it was not until the EMP was signed into effect on January 21, 2016, that the Service had confidence that ZWPMA had in place effective mechanisms to ensure long-term sustainability of its elephant population.

According to ZPWMA, quotas that were established before the EMP were set to maximize the sustainable production of high-quality trophies without detriment to the population. With the establishment of the EMP, there is a more systematic, scientific approach to establish national quotas. While ZPWMA still currently starts with an annual quota of 500 elephants, the quota is not immediately divided among all of the hunting areas. Instead, ZPWMA takes into consideration the results of the 2014 survey and subsequent surveys, results from research efforts, the size of the hunting area in relation to elephant habitat requirements, illegal harvest and other forms of take, how the hunting areas are managed in relation to land use or fencing, human–wildlife conflicts that have occurred previously, and recommended sustainable harvest levels developed based on ecological assessments of the hunting area. This information is then further evaluated in consideration of other species within the hunting area, past elephant trophy quality, and community benefits of proposed harvests.

Since our findings in 2014 and 2015, CAMPFIRE has provided more information on how their programs support the conservation of elephants and provide benefits to and promote greater tolerance of wildlife in rural communities, including new efforts to improve the effectiveness of CAMPFIRE and new revenue-sharing guidelines. An overarching analysis of CAMPFIRE, supported by a grant of 12 million Euros from the European Union, is currently being conducted and is scheduled to be completed by the end of 2017. Although this review is still under way, more information has been provided to the Service regarding how funds are utilized and the basis for hunting quotas.

Since our 2014 and 2015 findings, there are strong indications that the efforts of private landowners and consortiums to manage elephants within their areas of control have received greater support from ZPWMA and the Zimbabwean Government. ZPWMA has devolved authority to manage and benefit from wildlife on communal and private lands to the landholders. There now appears to be a greater effort on the part of ZPWMA to work with NGOs, landowners, and safari area concessionaires to improve elephant management and anti-poaching efforts. According to their July 2015 response to the Service, and supported by the report on the implementation of the EMP, ZPWMA is engaging private players in co-management in some areas and entering into long-term lease agreements (10–25 years) to manage some protected areas. In certain areas, ZPWMA is reportedly collaborating with safari operators; in others, they collaborate with NGOs, such as the Tashinga Initiative in the Zambezi Valley and World Wildlife Fund in the Hwange-Sanyati Biological Corridor. There is increased support from the Central Government and Rural District Councils to expand and support local conservation efforts, and there is evidence that local conservation efforts are meeting management deficiencies that the Service identified previously.

Current Finding

Therefore, in accordance with the regulatory requirements, the Service is able to make a determination that the killing of trophy animals in Zimbabwe, on or after January 21, 2016, and on or before December 31, 2018, will enhance the survival of the African elephant. With the information currently available, applications to import trophies hunted during this time period will be considered to have met this requirement unless we issue a new finding based on available information. In accordance with the section 4(d) rule for the African elephant at 50 CFR 17.40(e), the Service will review each application received for import of such specimens on a case-by-case basis and each application also needs to meet all other applicable permitting requirements before it may be authorized. On an ongoing basis and as it evaluates each application, the Service will continue to monitor the status of the elephant population, the management program for elephants in the country to ensure that the program is promoting the conservation of the species, and whether the participation

of U.S. hunters in the program provides a clear benefit to the species. Accordingly, the Service may modify its determination based on available information consistent with the regulatory requirements. In addition, the Service will reevaluate the status of African elephants in Zimbabwe before the end of 2018 and make a new finding in the beginning of 2019 for, at least, the 2019 hunting season.

Today's enhancement finding has been posted at *http://www.fws.gov/international/pdf/enhancement-finding-2017-elephant-Zimbabwe.PDF.* In addition, a list of frequently asked questions regarding the importation of sport-hunted elephant trophies from Zimbabwe is available on the Service's web page at *https://www.fws.gov/international/permits/by-activity/sport-hunted-trophies-elephants.html.*

Brenda Tapia,

Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[XXX.LLAZG02000.71220000.KD0000 .LVTFA0958340;AZA3116]

Notice of Availability of the Draft Ray Land Exchange/Plan Amendment Supplemental Environmental Impact Statement, Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, and the Federal Land Policy and Management Act of 1976 (FLPMA), as amended, the Bureau of Land Management (BLM), Gila District, Tucson Field Office has prepared a Draft Supplemental Environmental Impact Statement (EIS) for the Ray Land Exchange/Plan Amendment and by this Notice is announcing its availability and the opening of the comment period.

DATES: To ensure comments will be considered, the BLM must receive written comments on the Ray Land Exchange/Plan Amendment Draft Supplemental EIS within 90 days following the date the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register**. The BLM will announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases, or mailings.

ADDRESSES: You may submit comments related to the Ray Land Exchange/Plan Amendment Draft Supplemental EIS by any of the following methods:

- *Web site: http://go.usa.gov/xn2FG.*
- *Email: blm_az_raylandexchange@blm.gov.*
- *Fax:* 602–417–9454.
- *Mail:* BLM Arizona State Office, Attn: Ray Land Exchange, One North Central Avenue, Suite 800, Phoenix, AZ 85004–4427.

Copies of the Ray Land Exchange/Plan Amendment Draft Supplemental EIS are available in the BLM Arizona State Office at the above address; the BLM Tucson Field Office at 3201 East Universal Way, Tucson, AZ 85756; the BLM Kingman Field Office at 2755 Mission Boulevard, Kingman, AZ 86401; and the Kearny Public Library at 912–A Tilbury Road, Kearny, AZ 85137.

FOR FURTHER INFORMATION CONTACT: Michael Werner, Project Manager, telephone 602–417–9561; address: One North Central Avenue, Suite 800, Phoenix, AZ 85004–4427; email: *mwerner@blm.gov.*

SUPPLEMENTARY INFORMATION: The BLM Gila District, Tucson Field Office, is issuing the Ray Land Exchange/Plan Amendment Supplemental EIS to augment the environmental impact analysis in the Ray Land Exchange/Plan Amendment Final EIS completed by the BLM in 1999. The BLM issued the Final EIS for the Ray Land Exchange/Plan Amendment in June 1999 and the Record of Decision in May 2000. The decision approved a land exchange between ASARCO LLC (ASARCO) and the BLM for approximately 10,976 acres of public lands and federally owned mineral estate for acquisition by ASARCO (the Selected Lands) in exchange for approximately 7,304 acres of private land owned by ASARCO and identified by the BLM as desirable for improving access for hunting and other recreation (the Offered Lands). The decision was challenged administratively and in Federal court, with the plaintiffs ultimately prevailing in the Ninth Circuit Court of Appeals in November 2010. The court concluded that the BLM violated NEPA and FLPMA ''in assuming without explanation that ASARCO would perform mining operations on the selected lands in the same manner regardless of the land exchange'' *(Center for Biological Diversity* v. *U.S. Department of Interior*, 623 F.3d 633 [9th Cir. 2010]). The court recognized that ASARCO has the right to conduct mining and related activities under the General Mining Law, based on ASARCO's mining and mill site claims on the Selected Lands. But the court believed that the manner and extent of mining were likely to differ, depending on whether the Selected Lands are owned by the United States as public lands subject to the BLM's surface use regulations at 43 CFR 3809 or by ASARCO as private lands in fee simple, in which case the BLM's surface-use regulations would not apply. The Ninth Circuit Court stated that ASARCO is not required to prepare and submit a Mine Plan of Operations (MPO) for future activities on the Selected Lands to complete the exchange. Instead, ''the BLM must make a meaningful comparison of the environmental consequences of ASARCO's likely mining operations with and without the requirement that MPOs be prepared by ASARCO and approved by the BLM—that is, with and without the proposed exchange.'' Because the BLM did not perform this ''with and without'' comparison, the court held that the BLM did not adequately consider the environmental impacts of the land exchange or Resource Management Plan (RMP) amendments. For the same reason, the court also held that the BLM did not properly analyze whether the public interest will be served by making the exchange under FLPMA, section 206(a).

In accordance with the courts' rulings and remand orders, the Draft Supplemental EIS for the Ray Land Exchange provides the ''with and without'' comparative analysis found lacking by the Ninth Circuit Court. The ''with and without'' analysis compares two scenarios of potential environmental impacts on the Selected Lands from mining operations. One scenario analyzes potential impacts that could occur as a result of mining activities on the Selected Lands if they are not exchanged and remain under BLM jurisdiction (*i.e.,* mining occurs with BLM regulations). The other scenario analyzes potential impacts that could occur as a result of mining activities if the Selected Lands are exchanged and become privately owned lands (*i.e.,* mining occurs without BLM regulations). The Draft Supplemental EIS also addresses any substantial changes in the land exchange or plan amendments and any significant new information or circumstances that are relevant to analyzing the impacts of the land exchange or plan amendments (see 40 CFR 1502.9(c); BLM NEPA Handbook, Section 5.3 [January 2008]).

The purpose of the proposed Ray Land Exchange would be to exchange

ownership of Federal lands for private lands. ASARCO proposed the Ray Land Exchange with the BLM in order to acquire public lands adjacent to its Ray Complex (Ray Mine and associated processing facilities near Hayden) and in the Casa Grande vicinity. In exchange, ASARCO is offering to the BLM private lands that will consolidate checkerboard land ownership and improve access to existing Federal land for traditional uses such as hunting and other recreation. By acquiring the Selected Lands, ASARCO is seeking to consolidate its land holdings within and near areas of ongoing mineral development and to use the Selected Lands to support and expand current and future mining-related operations. Through the exchange, the BLM would have an opportunity to improve resource management efficiency by disposing of heavily encumbered, isolated and difficult to manage public lands; and acquire lands that will consolidate ownership patterns in order to improve public access.

The Proposed Action and alternatives presented and analyzed in the Ray Land Exchange/Plan Amendment Draft Supplemental EIS are generally the same as those presented and analyzed in the 1999 Final EIS. The environmental analysis is based on the foreseeable uses of the Selected Lands. The Draft Supplemental EIS includes an analysis of cumulative impacts to all resources and land uses, including an evaluation of potential impacts to Native American traditional values.

The Proposed Action (Agency Preferred Alternative) is to complete the Ray Land Exchange between the BLM and ASARCO. The Selected Lands total approximately 10,976 acres and consist of 31 parcels of public lands located in Pinal and Gila Counties in south-central Arizona. Twenty-eight of the parcels occur in the Middle Gila River Basin between Mineral Creek to the north, the White Canyon Wilderness to the northwest, and the Dripping Spring Mountains to the east, and the Gila River to the south. These 28 parcels are clustered in three areas (the Ray Complex, Copper Butte/Buckeye, and Chilito/Hayden) near ASARCO's Ray Mine and the communities of Kearny, Hayden, and Winkelman, Arizona. The remaining three mineral estate only parcels are located about 50 miles west of the Ray Complex, near the community of Casa Grande in Pinal County. The Offered Lands total approximately 7,304 acres and consist of 18 parcels owned by ASARCO located in Pinal and Mohave Counties, also in Arizona. These parcels, which are presented throughout the Draft Supplemental EIS as five units (two single parcels and three parcel groups), include parcels along the Gila and Big Sandy Rivers, the Black Mountains, and the Cerbat Mountains. The Offered Lands are private inholdings within the jurisdictional boundaries of the Tucson and Kingman Field Offices of the BLM.

The Draft Supplemental EIS also includes a No-Action Alternative under which no land exchange would occur nor would the Phoenix or Safford District RMPs need to be amended under this option. Two additional action alternatives are also analyzed in which less than the full amounts of land would be exchanged: The Buckeye Land Exchange Action Alternative and the Copper Butte Land Exchange Action Alternative. The Buckeye Land Exchange Alternative involves reducing the total acreage included in the land exchange under this alternative. The amount of the Selected Lands is reduced from approximately 10,976 acres to approximately 10,176 acres by excluding about 800 surface and subsurface acres in the Copper Butte area and removing 640 acres of the McCracken Mountains Parcels from the Offered Lands. The Copper Butte Land Exchange Alternative also involves a reduced acreage exchange from the full exchange Proposed Action. The Copper Butte Land Exchange Alternative involves reducing the total acreage of the Selected Lands from approximately 10,976 acres to approximately 9,161 acres by excluding surface and subsurface acres in the Copper Butte area and removing 1,703 acres of the McCracken Mountains Parcels from the Offered Lands.

A plan amendment to the Phoenix and Safford RMPs is required as the selected lands have not been designated for disposal through previous BLM planning processes. The amendment to the Phoenix and Safford District RMPs would change the land tenure designation from ''retention'' to ''disposal'' for a total of approximately 10,339 acres. Specifically:

1. Approximately 9,906 acres designated in the 1988 Phoenix RMP as part of the White Canyon Resource Conservation Area to be changed from retention to disposal; and

2. Approximately 433 acres designated in the 1993 Safford District RMP as part of the former Safford District Long-Term Management Area to be changed from retention to disposal.

The BLM was not required to conduct scoping for the Draft Supplemental EIS. However, the agency has conducted public outreach activities to inform the public and answer questions regarding the proposed land exchange. The efforts included updating the mailing list for the project, contacting mailing list persons via postcard and newsletter, providing a detailed project Web site, and interviewing key stakeholders to present the land exchange details and answer questions.

Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours, Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

A. Scott Feldhausen,

Gila District Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLORV0000. L51010000. ER0000. LVRWH09H0480. 17XL5017AP. ORОR065375. ID036029.HAG 17–0063]

Notice of Availability of the Record of Decision for the Boardman to Hemingway Transmission Line Project and Approved Land-use Plan Amendments, Oregon

AGENCY: Bureau of Land Management, Interior

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Boardman to Hemingway Transmission Line Project (B2H Project) and Approved Land-use Plan Amendments of the Baker and Southeastern Oregon Resource Management Plans (RMPs). The ROD constitutes the BLM's final decision regarding: (1) Approval to grant a Right-of-Way (ROW) to Idaho Power Company to construct, operate and maintain an extra-high-voltage, alternating-current transmission system; and (2) Amending portions of the BLM Baker and Southeastern Oregon RMPs.

DATES: This decision takes effect immediately.

ADDRESSES: The complete text of the ROD, along with the B2H Project Final Environmental Impact Statement (EIS) and supporting documents, is available on the BLM Web site at *http://www.boardmantohemingway.com/* Copies of the ROD will be placed in all involved BLM offices and, for public review, at the locations identified in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Tamara Gertsch, National Project Manager, Bureau of Land Management, Vale District Office, P.O. Box 655, Vale, OR 97918; telephone: (307) 775–6115; email: *comment@boardmantohemingway.com.* Persons who use a telecommunications device for the deaf may call the Federal Relay Service at (800) 877–8339 to contact the above individual during normal business hours. The service is available 24 hours a day, 7 days a week, to assist you in leaving a message or question for the above individual. You will receive a reply during normal business hours.

For information related to the U.S. Forest Service's (USFS) involvement in the B2H Project, contact: Arlene Blumton, USFS Project Lead, telephone: (541) 962–8522, email: *ablumton@fs.fed.us.* The USFS will provide a mailing address in its Notice of Availability (NOA) of the B2H Project Final EIS and Proposed Land-use Plan Amendments, and a notice of the draft USFS Record of Decision will be published in the *Baker City Herald* shortly after the BLM ROD.

SUPPLEMENTARY INFORMATION: Idaho Power Company filed with the BLM an application for a ROW grant to use BLM-managed lands to construct, operate, and maintain the B2H Project, which is an approximately 294-mile-long overhead, single-circuit, 500-kilovolt (kV), alternating-current electric transmission line with additional ancillary facilities. The B2H Project will connect the northern terminus, the Longhorn Substation proposed by Bonneville Power Administration (BPA), which is approximately 4 miles northeast of the city of Boardman in Morrow County, Oregon, to the existing Hemingway Substation, which is near the city of Melba in Owyhee County, Idaho. When completed, the B2H Project will provide additional electrical load capacity between the Pacific Northwest Region and the Intermountain Region of Southwestern Idaho. The B2H Project also will alleviate existing transmission constraints and ensure that there is sufficient electrical capacity to meet present and forecasted customer needs as described in Idaho Power Company's 2015 Integrated Resource Plan (available online at *https://www.idahopower.com/AboutUs/PlanningForFuture/irp/2015*).

The ROW width is 250 feet for its entire length, except for an approximately 7-mile section that will replace an existing 69-kV transmission line and will require a 90-foot-wide ROW within and parallel to the eastern boundary of the Naval Weapons Systems Training Facility, Boardman, as well as a 0.9-mile-long section that will require a 125-foot-wide ROW to relocate an existing 230-kV transmission line.

Construction of the B2H Project will take 2 to 3 years and will consist of the following permanent facilities:

- A single-circuit 500-kV electric transmission line (including structures and conductors, as well as other associated facilities) between the proposed Longhorn Substation and the existing Hemingway Substation;
- Access roads and access-control gates;
- A communication regeneration site every 40 miles;
- Removal of approximately 7 miles of the existing Boardman to Tap 69-kV transmission line; and
- Rerouting 0.9 mile of the existing Quartz to Tap 230-kV transmission line.

The BLM will issue a separate, short-term ROW grant for temporary facilities, including temporary access roads (if any), and geotechnical investigation (also analyzed in the Final EIS) for a period of 5 years.

The BLM prepared an EIS in accordance with the National Environmental Policy Act (NEPA) to analyze the direct, indirect, and cumulative environmental impacts associated with the proposed action and the alternatives. The BLM also identified and considered mitigation measures in the EIS to address the environmental impacts of the B2H Project and proposed plan amendments.

The ROD approved the Agency Preferred Alternative identified in the Final EIS. The BLM issued the ROD based on compliance with relevant laws, regulations, policies, and plans, including those guiding agency decisions that may have an impact on resources and their values, services, and functions.

The ROD approving the ROW grant requires, among other things, that the applicant satisfy specific mitigation measures. In particular, the sequence of mitigation actions will be the mitigation hierarchy (avoid, minimize, or compensate) as identified by the White House Council on Environmental Quality's (CEQ) NEPA implementing regulations (40 CFR 1508.20). Siting and design of the B2H Project required the application of design features of the B2H Project for environmental protection. Additionally, selective mitigation measures and implementation plans have been developed to consider the full mitigation hierarchy to avoid, minimize, or compensate for residual impacts on important, scarce, or sensitive resources. The priority is to mitigate impacts at sites of B2H Project activity in conformance with the land-use plan goals and objectives through impact avoidance or minimization of the impact, including those measures described in laws, regulations, policies, and land-use plans. If these types of mitigation measures are not sufficient to ameliorate anticipated direct, indirect, and cumulative impacts, and if substantial or significant residual impacts remain on important, scarce, or sensitive resources, the BLM is requiring compensatory mitigation to reduce these residual impacts or meet applicable land-use plan goals and objectives, consistent with the requirements of NEPA, as well as the BLM's statutory obligations under the Federal Land Policy and Management Act (FLPMA). Compensatory mitigation may be required for Greater sage-grouse, riparian conservation areas, cultural resources, and national historic trails.

Based on the analysis in the Final EIS, the ROD also amends two BLM RMPs as follows:

- Baker RMP—modifies 23 acres of visual resource management (VRM) Class II to Class IV in Burnt River Canyon;
- Southeastern Oregon RMP—modifies 51 acres of VRM Class III to Class IV in the vicinity of the Oregon Trail—Birch Creek Area of Critical Environmental Concern (ACEC); and
- Southeastern Oregon RMP—modifies 20 acres of VRM Class II to Class IV outside of and north of the Owyhee River below the Dam ACEC.

The approved Land-use Plan Amendments specifically revise the RMPs to allow for the development of the B2H Project and ancillary facilities on land managed by the BLM. Consistent with NEPA, the BLM has integrated its land-use planning process with its evaluation of the B2H Project, including the scoping and public availability periods for the EIS. With approval of these Land-use Plan Amendments, the B2H Project will conform to the approved RMPs (43 CFR 1610.5–3).

The evaluation of B2H Project compliance with Land and Resource

Management Plans will be described by the USFS in its NOA for the B2H Project Final EIS and Approved Land-use Plan Amendments and its draft USFS ROD to be issued for comment following the BLM ROD.

Copies of the Final EIS and ROD are available for public review during normal business hours at the following locations in Oregon:

- Baker County Planning Department, 1995 Third St., Baker City
- Baker County Library, 2400 Resort St., Baker City

- Nampa Public Library, 215 12th Avenue South Nampa, ID 83651
- Lizard Butte Library, 111 S 3rd Ave. W., Marsing

On November 28, 2016, the NOA for the B2H Project Final EIS and Proposed Land-use Plan Amendments (81 FR 85632) was published in the **Federal Register**. The publication of the NOA initiated a 30-day protest period for the proposed land-use planning decision, as well as a simultaneous 60-day review by the Governor of Oregon to identify any inconsistencies with State or local plans, policies, or programs. At the close of the 30-day protest period, 53 protests were received. These protests were resolved by the BLM Director; individual protest response letters were sent to all protesting parties. Protest resolution is contained in the Director's Protest Summary Report, which is available online at *http://www.blm.gov/pgdata/content/wo/en/prog/planning/planningoverview/protest_resolution.html*. The proposed Land-use Plan Amendments were not modified as a result of the protest resolution, and the Oregon Governor's review did not identify any inconsistencies.

Approval of this decision by the Acting Assistant Secretary—Land and Minerals Management is not subject to administrative appeal (43 CFR 4.410(a)(3)). Additionally, any challenge to this decision must be brought in Federal District Court and is subject to 42 U.S.C. 4370m-6.

Authority: 40 CFR 1506.6.

Jamie E. Connell,

State Director, Oregon/Washington.

BILLING CODE 4310–33–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Microperforated Packaging Containing Fresh Produce, DN 3273;* the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov,* and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000.

General information concerning the Commission may also be obtained by accessing its Internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Windham Packaging, LLC on November 13, 2017. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain microperforated packaging containing fresh produce. The complaint names as respondents Alpine Fresh, Inc. of Miami, FL; Apio, Inc. of Guadalupe, CA; B & G Foods North America, Inc. of Parsippany, NJ; Glory Foods, Inc. of Columbus, OH; Mann Packing Co., Inc. of Salinas, CA; and Taylor Farms California, Inc. of Salinas, CA. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, and members of the public are invited to file comments, not to exceed five (5) pages in length, inclusive of attachments, on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would

affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) Identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) Identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) Indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) Explain how the requested remedial orders would impact United States consumers.

Written submissions must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to § 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the docket number (''Docket No. 3273'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures.[1]) Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: November 13, 2017.

Lisa R. Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–860 (Third Review)]

Tin- and Chromium-Coated Steel Sheet From Japan

AGENCY: United States International Trade Commission.

ACTION: Notice of revised schedule for full five-year review.

DATES: November 7, 2017.

FOR FURTHER INFORMATION CONTACT: Robert Casanova (202–708–2719), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION: On October 20, 2017, the Commission established a schedule for the conduct of this full five-year review (82 FR 49661, October 26, 2017). The Commission is revising its schedule.

The Commission's new schedule for the review is as follows: The prehearing conference (if needed) will be held on February 26, 2018; the hearing will be held at the U.S. International Trade Commission Building at 9:30 a.m. on February 27, 2018; and the deadline for filing posthearing briefs is March 7, 2018.

For further information concerning this review see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: November 14, 2017.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1028]

Certain Mobile Device Holders and Components Thereof; Commission's Determination To Review In-Part a Final Initial Determination Finding a Violation of Section 337; Request for Written Submissions

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to review in-part the final initial determination (''ID'') issued by the presiding administrative law judge (''ALJ'') on September 12, 2017, finding a violation of section 337 in the above-captioned investigation. Specifically, the Commission has determined to review the ID's analysis and findings with respect to the economic prong of the domestic industry. The Commission also requests written submissions, under the schedule set forth below, on remedy, the public interest, and bonding.

FOR FURTHER INFORMATION CONTACT: Amanda Pitcher Fisherow, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2737. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on November 14, 2016, based on a complaint and supplements, filed on behalf of Nite Ize, Inc. of Boulder, Colorado (''Nite Ize''). 81 FR 79519–20 (Nov. 14, 2016). The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain mobile device holders and components thereof by reason of infringement of certain claims of U.S. Patent No. 8,602,376 (''the '376 patent''), U.S. Patent No. 8,870,146 (''the '146 patent''), U.S. Patent No. D734,746 (''the '746 patent''), and U.S. Patent No. D719,959 (''the '959 patent''). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337. The Commission's notice of investigation named the following respondents: REXS LLC of Lewes, Delaware; Spinido, Inc. of Brighton, Colorado; Guangzhou Kuaguoyi E-commerce Co., Ltd. d/b/a Kagu Culture (''Kagu Culture'') of Baiyum, China; Sunpauto Co., Ltd. of Kowloon, Hong Kong; Shenzhen Topworld Technology Co. d/b/a IdeaPro (''IdeaPro'') of Hong Kong, Hong Kong; Ninghuaxian Wangfulong Chaojishichang Youxian Gongsi, Ltd., d/b/a EasybuyUS of Shanghai, China; Chang Lee d/b/a Frentaly of Duluth, Georgia; Trendbox USA LLC d/b/a Trendbox (''Trendbox'') of Scottsdale, Arizona; Tenswall d/b/a Shenzhen Tenswall International Trading Co. of La Puente, California; Luo Jieqiong d/b/a Wekin of Chang Sha, China; Pecham d/b/a Baichen Technology Ltd. of Wan Chai, Hong Kong; Cyrift d/b/a Guangzhou Sunway Ecommerce LLC. of Guangzhou, China; Rymemo d/b/a Global Box, LLC of Dunbar, Pennsylvania; Yuan I d/b/a Bestrix of Hubei, China; Zhongshan Feiyu Hardware Technology Co., Ltd d/b/a YouFo (''YouFo'') of ZhongShan City, China; and Shenzhen Youtai Trade Company Limited, d/b/a NoChoice; Luo, Qiben, d/b/a Lita International Shop of Nanshan; Shenzhen New Dream Technology Co., Ltd., d/b/a Newdreams (''Newdreams''); Shenznen Gold South Technology Co., Ltd. d/b/a Baidatong; Wang Zhi Gang d/b/a IceFox (''Icefox''); Dang Yuya d/b/a Sminiker; Lin Zhen Mei d/b/a Anson (''Anson''); Wu Xuying d/b/a Novoland; Shenzhen New Dream Sailing Electronic Technology Co., Ltd. d/b/a MegaDream; Tontek d/b/a Shenzhen Hetongtai Electronics Co., Ltd.; Scotabc d/b/a ShenChuang Optoelectronics Technology Co., Ltd.; Zhiping Zhou d/b/a Runshion; Huijukon d/b/a Shenzhen Hui Ju Kang Technology Co. Ltd.; Barsone d/b/a Shenzhen Senweite Electronic Commerce Ltd.; Oumeiou d/b/a Shenzhen Oumeiou Technology Co., Ltd. (''Oumeiou''); Grando d/b/a Shenzhen Dashentai Network Technology Co., Ltd.; Shenzhen Yingxue Technology Co., Ltd. (''Shenzhen Yingxue''); Shenzhen Longwang Technology Co., Ltd., d/b/a LWANG; Hu Peng d/b/a AtomBud; Wang Guoxiang d/b/a Minse (''Minse'') all of Shenzhen, China. The Office of Unfair Import Investigations (''OUII'') was named as a party to the investigation.

Global Box, LLC and Chang Lee d/b/a Frentaly were terminated on the basis of a consent order. Commission Notice (March 21, 2017); Commission Notice (May 15, 2017). Barsone d/b/a Shenzhen Senweite Electronic Commerce Ltd., Shenzhen Youtai Trade Company Limited, d/b/a NoChoice, Ninghuaxian Wangfulong Chaojishichang Youxian Gongsi, Ltd., d/b/a EasybuyUS, Shenzhen Gold South Technology Co., Ltd. d/b/a Baidatong, Cyrift d/b/a Guangzhou Sunway E-Commerce LLC, Hu Peng d/b/a AtomBud, Grando d/b/a Shenzhen Dashentai Network Technology Co., Ltd., Huijukon d/b/a Shenzhen Hui Ju Kang Technology Co. Ltd., Luo, Qiben, d/b/a Lita International Shop, Shenzhen New Dream Sailing Electronic Technology Co., Ltd. d/b/a MegaDream, Spinido Inc., Dang Yuya d/b/a Sminiker, and Yuan I d/b/a Bestrix were terminated because service could not be effected. Commission Notice (June 13, 2017). The remaining respondents were previously found in default (collectively, ''the Defaulting Respondents''). Commission Notice (May 26, 2017). In addition, the '746 and '959 patents were previously terminated from the investigation. Commission Notice (July 28, 2017).

On May 18, 2017, Nite Ize filed a Motion for Summary Determination of Violation by the Defaulting Respondents and for a Recommended Determination on Remedy and Bonding, Including Issuance of a General Exclusion Order, Limited Exclusion Orders, and Cease and Desist Orders. On June 16, 2017, the ALJ issued Order No. 14 granting in-part Nite Ize's motion for summary determination. The Commission determined not to review that ID. Commission Notice (July 14, 2017).

On September 12, 2017, the ALJ issued his final ID finding a violation of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337. On the same day, the ALJ issued his Recommended Determination on Remedy and Bonding. No petitions for review were filed.

The Commission has determined to review the subject ID in-part. Specifically, the Commission has determined to review the ID's analysis and findings with respect to the economic prong of the domestic industry requirement. The Commission

does not request any submissions on the issue under review.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue one or more cease and desist orders that could result in the respondent(s) being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, *see Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843 (Dec. 1994) (Comm'n Op.). In particular, the written submissions should address any request for a cease and desist order in the context of recent Commission opinions, including those in *Certain Arrowheads with Deploying Blades and Components Thereof and Packaging Therefor,* Inv. No. 337–TA–977, Comm'n Op. (Apr. 28, 2017) and *Certain Electric Skin Care Devices, Brushes and Chargers Therefor, and Kits Containing the Same,* Inv. No. 337–TA–959, Comm'n Op. (Feb. 13, 2017). Specifically, if Complainant seeks a cease and desist order against a defaulting respondent, the written submissions should respond to the following requests:

(1) Please identify with citations to the record any information regarding commercially significant inventory in the United States as to each respondent against whom a cease and desist order is sought. If Complainant also relies on other significant domestic operations that could undercut the remedy provided by an exclusion order, please identify with citations to the record such information as to each respondent against whom a cease and desist order is sought.

(2) In relation to the infringing products, please identify any information in the record, including allegations in the pleadings, that addresses the existence of any domestic inventory, any domestic operations, or any sales-related activity directed at the United States for each respondent against whom a cease and desist order is sought.

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Each party's written submission must be filed no later than close of business on Thursday, November 30, 2017. Reply submissions must be filed no later than the close of business on Thursday, December 7, 2017. No further submissions on these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to Commission Rule 210.4(f), 19 CFR 210.4(f). Submissions should refer to the investigation number (''Inv. No. 337–TA–1028'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/secretary/documents/handbook_on_filing_procedures.pdf*). Persons with questions regarding filing should contact the Secretary, (202) 205–2000.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[1] solely for cybersecurity purposes. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in Part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: November 13, 2017.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Workforce Flexibility (Workflex) Plan Submission and Reporting Requirements

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), Employment and Training Administration is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, ''Workforce Flexibility (Workflex) Plan Submission and Reporting Requirements.'' This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA).

DATES: Consideration will be given to all written comments received by January 16, 2018.

[1] All contract personnel will sign appropriate nondisclosure agreements.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained free at *https://doleta.gov/wioa/State_Plan_Resources.cfm* or by contacting Heather Fleck by telephone at 202–693–2956, TTY 877–889–5627 (these are not toll-free numbers), or by email at *fleck.heather@dol.gov.*

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Employment and Training Administration, Division of WIOA Adult Services and Workforce Systems, U.S. Department of Labor, 200 Constitution Avenue NW., Room S4209, Washington, DC 20210; by email: *fleck.heather@dol.gov*; or by Fax 202–693–3015.

FOR FURTHER INFORMATION CONTACT: Heather Fleck by telephone at 202–693–2956 (this is not a toll-free number) or by email at *fleck.heather@dol.gov.*

SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

Section 190 of the Workforce Innovation and Opportunity Act (WIOA) (Pub. L. 113–128, July 22, 2014) permits states to apply for Workflex waiver authority. The Act and 20 CFR 679.630 provide that the Secretary may grant Workflex waiver authority for up to five years pursuant to a Workflex plan submitted by a state. Under Workflex, governors are granted the authority to approve requests submitted by their local areas to waiver certain statutory and regulatory provisions of WIOA Title I programs. States may also request waivers from the Secretary of certain requirements of the Wagner-Peyser Act (Sections 8–10) as well as certain provisions of the Older Americans Act of 1965 (OAA) (42 U.S.C. 3056d(b)) for state agencies on aging with respect to activities carried out using funds allotted under OAA section 506(b). One of the underlying principles for granting Workflex waivers is that the waivers will result in improved performance outcomes for persons served and that waiver authority will be granted in consideration of improved performance.

This is a continuation of the previous collection instructions request under WIA, and WIOA continues to authorize this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB Number: 1205–0432.

Submitted comments will also be a matter of public record for this ICR and posted on the Internet, without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Type of Review: Revision.

Title of Collection: Workflex Plan Submission and Reporting Requirements.

Form: Workforce Flexibility (Workflex) Plan Collection Form.

OMB Control Number: 1205–0432.

Affected Public: State and local governments.

Estimated Number of Respondents: 5.

Frequency: 5 state plans annually; 204 quarterly reports.

Total Estimated Annual Responses: 5 state plans annually; 204 quarterly reports.

Estimated Average Time per Response: 18 hours.

Estimated Total Annual Burden Hours: 210 hours.

Total Estimated Annual Other Cost Burden: $0.

Authority: 44 U.S.C. 3506(c)(2)(A).

Nancy M. Rooney,

Deputy Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Office of the Secretary

Meeting of the Labor Advisory Committee for Trade Negotiation and Trade Policy

AGENCY: Bureau of International Labor Affairs, U.S. Department of Labor and Office of the United States Trade Representative, Labor Advisory Committee for Trade Negotiations and Trade Policy.

ACTION: Meeting notice.

SUMMARY: Notice is hereby given of a meeting of the Labor Advisory Committee for Trade Negotiation and Trade Policy.

DATES: December 15, 2017 2:00 p.m. to 4:00 p.m.

ADDRESSES: U.S. Department of Labor, Secretary's Conference Room, 200 Constitution Ave. NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Anne M. Zollner, Chief, Trade Policy and Negotiations Division; Phone: (202) 693–4890.

SUPPLEMENTARY INFORMATION: The meeting will include a review and discussion of current issues which influence U.S. trade policy. Potential U.S. negotiating objectives and bargaining positions in current and anticipated trade negotiations will be discussed. Pursuant to 19 U.S.C. 2155(f)(2)(A), it has been determined

that the meeting will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions. Therefore, the meeting is exempt from the requirements of subsections (a) and (b) of sections 10 and 11 of the Federal Advisory Committee Act (relating to open meetings, public notice, public participation, and public availability of documents). 5 U.S.C. app. Accordingly, the meeting will be closed to the public.

Signed at Washington, DC, the 14th day of November 2017.

Martha E. Newton,

Deputy Undersecretary, Bureau of International Labor Affairs.

[FR Doc. 2017–25011 Filed 11–16–17; 8:45 am]

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Hazard Communication Standard

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA) sponsored information collection request (ICR) titled, ''Hazard Communication Standard,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before December 18, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the *RegInfo.gov* Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201706-1219-001* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–MSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Hazard Communication Standard information collection requirements codified in regulations 30 CFR part 47. The Standard requires a mine operator to use labels or other forms of warning necessary to inform miners of all hazards to which the miners are exposed, relevant symptoms and emergency treatment, and proper conditions of safety use or exposure. Federal Mine Safety and Health Act of 1977 sections 101(a)(7) and 103(h) authorize this information collection. *See* 30 U.S.C. 811(a)(7), 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0133.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on June 12, 2017 (82 FR 26955).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219–0133. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–MSHA.

Title of Collection: Hazard Communication Standard.

OMB Control Number: 1219–0133.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 21,910.

Total Estimated Number of Responses: 1,253,295.

Total Estimated Annual Time Burden: 182,835 hours.

Total Estimated Annual Other Costs Burden: $11,108.

Authority: 44 U.S.C. 3507(a)(1)(D).

Dated: November 13, 2017.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2017–24994 Filed 11–16–17; 8:45 am]

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Information Collection Activities; Comment Request

AGENCY: Bureau of Labor Statistics, Department of Labor.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information, in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments on the proposed revision of the "*BLS Occupational Safety and Health Statistics (OSHS) Cooperative Agreement application package.*" A copy of the proposed information collection request can be obtained by contacting the individual listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before January 16, 2018.

ADDRESSES: Send comments to Nora Kincaid, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202–691–5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Nora Kincaid, BLS Clearance Officer, telephone number 202–691–7628 (this is not a toll free number.) (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of Labor has delegated to the BLS the authority to collect, compile, and analyze statistical data on work-related injuries and illnesses, as authorized by the Occupational Safety and Health Act of 1970 (Pub. L. 91–596). The Cooperative Agreement is designed to allow the BLS to ensure conformance with program objectives. The BLS has full authority over the financial operations of the statistical program. The existing collection of information allows Federal staff to negotiate the Cooperative Agreement with the State Grant Agencies and monitor their financial and programmatic performance and adherence to administrative requirements imposed by the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (2 CFR 200) and other grant related regulations. The information collected also is used for planning and budgeting at the Federal level and in meeting Federal reporting requirements. The BLS requires financial reporting that will produce the information that is needed to monitor the financial activities of the BLS Occupational Safety and Health Statistics grantees.

The Cooperative Agreement application package being submitted for approval is representative of the package sent every year to state agencies. The work statements included in the Cooperative Agreement application also are representative of what is included in the whole OSHS Cooperative Agreement package. The final Cooperative Agreement, including the work statements, will be submitted separately to the Office of Management and Budget for review of any minor year-to-year information collection burden changes they may contain.

II. Current Action

Office of Management and Budget clearance is being sought for the OSHS Cooperative Agreement application package. Two new forms, the OSHS Budget Variance form and the OSHS Federal Reconciliation Worksheet (FRW–B): Additional Activity to Maintain Currency (AAMC) form, are being included in this application package. The OSHS Budget Variance form will be used to request budget variances, or small movements of funds between the OSHS programs prior to closeout. The OSHS FRW–B: AAMC form will be used to reconcile OSHS AAMC expenditures and obligations as part of the closeout process.

III. Desired Focus of Comments

The BLS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Title of Collection: BLS Occupational Safety and Health Statistics Cooperative Agreement Application Package.

OMB Number: 1220–0149.

Type of Review: Revision of a currently approved collection.

Affected Public: State Governments.

Information collection	Respondents	Frequency	Responses	Time	Total hours
BLS–OSHS Work Statements	56	1	56	2 hours	112
BLS–OSHS2	56	4	224	1 hour	224
BLS–OSHS TCF	56	1	56	5–10 minutes	4.7–9.3
OSHS Budget Variance Request Form	0–40	1	0–40	5–25 minutes	0–16.7
BLS–OSHS FRW–A: Base Programs	56	1	56	20–30 minutes	18.7–28
BLS–OSHS FRW–B: AAMC	0–10	1	0–10	20–30 minutes	0–5
BLS–OSHS Property Listing	0–56	1	0–56	20–30 minutes	0–28
Total	56		392–498		359.4–423
Average Totals	56		445		391

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 9th day of November 2017.

Kimberley D. Hill,

Chief, Division of Management Systems.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Information Collection Activities; Comment Request

AGENCY: Bureau of Labor Statistics, Department of Labor.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information, in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments on the proposed extension without change of a currently approved collection of the ''*Labor Market Information (LMI) Cooperative Agreement application package.*'' A copy of the proposed information collection request can be obtained by contacting the individual listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before JANUARY 16, 2018.

ADDRESSES: Send comments to Nora Kincaid, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202–691–5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Nora Kincaid, BLS Clearance Officer, at 202–691–7628 (this is not a toll free number). (See Addresses section.)

SUPPLEMENTARY INFORMATION:

I. Background

The BLS enters into Cooperative Agreements with State Workforce Agencies (SWAs) annually to provide financial assistance to the SWAs for the production and operation of the following LMI statistical programs: Current Employment Statistics, Local Area Unemployment Statistics, Occupational Employment Statistics, and Quarterly Census of Employment and Wages. The Cooperative Agreement provides the basis for managing the administrative and financial aspects of these programs.

The existing collection of information allows Federal staff to negotiate the Cooperative Agreement with the SWAs and monitor their financial and programmatic performance and adherence to administrative requirements imposed by the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (2 CFR 200) and other grant related regulations. The information collected also is used for planning and budgeting at the Federal level and in meeting Federal reporting requirements.

The Cooperative Agreement application package being submitted for approval is representative of the package sent every year to state agencies. The work statements included in the Cooperative Agreement application also are representative of what is included in the whole LMI Cooperative Agreement package. The final Cooperative Agreement, including the work statements, will be submitted separately to the Office of Management and Budget for review of any minor year-to-year information collection burden changes they may contain.

II. Current Action

Office of Management and Budget clearance is being sought for the LMI Cooperative Agreement application package.

III. Desired Focus of Comments

The BLS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Title of Collection: Labor Market Information (LMI) Cooperative Agreement Application Package.

OMB Number: 1220–0079.

Type of Review: Extension without change of a currently approved collection.

Affected Public: State, Local, or Tribal Governments.

Frequency: Monthly, quarterly, annually.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0066]

Proposed Extension of Information Collection; Permissible Equipment Testing

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Permissible Equipment Testing.

DATES: All comments must be received on or before January 16, 2018.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments for docket number MSHA–2017–0034.
- *Regular Mail:* Send comments to USDOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.
- *Hand Delivery:* USDOL—Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

MSHA is responsible for the inspection, testing approval and certification, and quality control of mining equipment and components, materials, instruments, and explosives used in both underground and surface coal, metal, and nonmetal mines. Title 30 Code of Federal Regulations parts 6 through 36 contain procedures by which manufacturers may apply for and have equipment approved as "permissible" for use in mines.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Permissible Equipment Testing. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

The information collection request will be available on *http://www.regulations.gov.* MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on *www.regulations.gov* and *www.reginfo.gov.*

The public may also examine publicly available documents at USDOL—Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Permissible Equipment Testing. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0066.

Affected Public: Business or other for-profit.

Number of Respondents: 139.

Frequency: On occasion.

Number of Responses: 296.

Annual Burden Hours: 3,198 hours.

Annual Respondent or Recordkeeper Cost: $1,732,175.

MSHA Forms: MSHA Form 2000–38, Electrically Operated Mining Equipment U.S. Department of Labor Field Approval Application (Coal Operator).

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Sheila McConnell,

Certifying Officer.

MERIT SYSTEMS PROTECTION BOARD

Public Availability of the Merit Systems Protection Board FY 2015 Service Contract Inventory

AGENCY: Merit Systems Protection Board.

ACTION: Notice.

SUMMARY: The Merit Systems Protection Board (MSPB) is publishing this notice to advise the public of the availability of its FY 2015 Service Contract Inventory as required by the Consolidated Appropriations Act of 2010. This inventory provides information on service contract actions over $25,000 awarded in FY 2015. The inventory was developed in accordance with guidance issued on November 5, 2010 by the Office of Management and Budget's Office of Federal Procurement Policy (OFPP). The OFPP's guidance is available at: *https://obamawhitehouse.archives.gov/sites/default/files/omb/procurement/memo/service-contract-inventories-guidance-11052010.pdf.* The MSPB posted its inventory on its Web site at *https://www.mspb.gov/contact/contracting.htm.*

FOR FURTHER INFORMATION CONTACT: Cynthia Richardson, Contracting Officer, Office of Finance and Administrative Management, Merit Systems Protection Board, 1615 M Street NW., Washington, DC 20419; telephone 202–254–4408; email *cynthia.richardson@mspb.gov.*

Jennifer Everling,

Acting Clerk of the Board.

NATIONAL FOUNDATION OF THE ARTS AND THE HUMANITIES

Sunshine Act Meeting of the National Museum and Library Services Board

AGENCY: Institute of Museum and Library Services (IMLS), NFAH.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the agenda of the forthcoming meeting of the National Museum and Library Services Board. This notice also describes the function of the Board. Notice of the meeting is required under the Sunshine in Government Act.

DATE AND TIME: Thursday, November 30 2017, from 9:00 a.m. to 12:15 p.m. and 1:15 p.m. to 2:30 p.m. EST

Agenda: Thirty-Sixth Meeting of the National Museum and Library Service Board Meeting: 9:00 a.m.–12:15 p.m. Thirty-Sixth Meeting of the National Museum and Library Service Board Meeting:

I. Welcome and Director's Report
II. Approval of Minutes
III. Program Speaker
IV. Financial and Operations Report
V. Office of Museum Services Report
VI. Office of Library Report
VII. Office of Digital and Information Strategy Report
VIII. Special Report—Office of Communications
IX. Adjourn
(Open to the Public)
1:15 p.m. to 2:30 p.m.—Executive Session
(Closed to the Public)

PLACE: The meeting will be held at the IMLS Offices, Panel Room, Suite 4000, 955 L'Enfant Plaza North SW., Washington, DC 20024

FOR FURTHER INFORMATION CONTACT: Katherine Maas, Program Specialist, Institute of Museum and Library Services, Suite 4000, 955 L'Enfant Plaza North SW., Washington, DC 20024. Telephone: (202) 653–4798.

SUPPLEMENTARY INFORMATION: The National Museum and Library Services Board, which advises the Director of the Institute of Museum and Library Services on general policies with respect to the duties, powers, and authority of the Institute relating to museum, library and information services, will meet on November 30, 2017. The Thirty-Sixth Meeting on Thursday, November 30, 2017, from 9:00 a.m. to 12:15 p.m., is open to the public. The Executive Session, which will be held from 1:15–2:30 p.m., will be closed pursuant to subsections (c)(4) and (c)(9) of section 552b of Title 5, United States Code because the Board will consider information that may disclose: Trade secrets and commercial or financial information obtained from a person and privileges or confidential; and information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action.

If you need special accommodations due to a disability, please contact: Institute of Museum and Library Services, 955 L'Enfant Plaza North SW., Suite 4000, Washington, DC 20024, Telephone: (202) 653–4796, at least seven (7) days prior to the meeting date.

Dated: November 15, 2017.

Danette Hensley,

Staff Assistant, Office of General Counsel.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Integrative Activities: Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

NAME AND COMMITTEE CODE: Advisory Committee for Integrative Activities (#1373).

DATES AND TIMES:
December 13, 2017; 9:00 a.m.–5:00.p.m.
December 14, 2017; 8:00 a.m.–5:00 p.m.

PLACE: National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314.

To help facilitate your entry into the building, please contact Dr. Bernice Anderson via email at *banderso@nsf.gov* or by phone: 703.292.8040 on or prior to December 12, 2017.

TYPE OF MEETING: Part-Open.

CONTACT PERSON: Dr. Bernice Anderson, Senior Advisor, Office of Integrative Activities (OIA), Room W17124, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314. Contact Information: 703–292–8040/*banderso@nsf.gov.*

PURPOSE OF MEETING: To provide advice and recommendations concerning the use of and the need for the Science and Technology Policy Institute.

Agenda

Wednesday, December 13, 2017

- 9:30 a.m.–Noon (Open): Welcome, Charge to the Panel, Overview and History of the Science and Technology Policy Institute (STPI), and STPI Research Presentation
- 1:30 p.m.–4:30 p.m. (Open): Presentation and Briefings by the Office of Science and Technology Representatives; Discussions about the Need for and Use of STPI

Thursday, December 14, 2017

- 9:00 a.m.–11:30 a.m.: (Open)—Presentations/Briefings by NSF and other Government Clients
- 11:30 a.m.–5:00 p.m.: (Closed) Review of the Contract and Report Writing

REASON FOR CLOSING: The contract being reviewed includes information of a proprietary or confidential nature, including technical and personal information that must be considered in the evaluation and the development of recommendation(s). These matters are exempt under 5 U.S.C. 552b(c), (4), (6) and (9)(B) of the Government in the Sunshine Act.

Dated: November 14, 2017.

Crystal Robinson,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2017–0127]

Information Collection: Licenses and Radiation Safety Requirements for Irradiators

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for a renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Licenses and Radiation Safety Requirements for Irradiators.''

DATES: Submit comments by December 18, 2017.

ADDRESSES: Submit comments directly to the OMB reviewer at: Brandon De Bruhl, Desk Officer, Office of Information and Regulatory Affairs (OMB 3150–0158), NEOB–10202, Office of Management and Budget, Washington, DC 20503; telephone: 202–395–0710, email: *oira_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2017–0127 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web Site: Go to http://www.regulations.gov* and search for Docket ID NRC–2017–0127.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The supporting statement is available in ADAMS under Accession No. ML17276B478.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *http://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''Licenses and Radiation Safety Requirements for Irradiators.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 27, 2017 (82 FR 34994).

1. *The title of the information collection:* 10 CFR part 36 ''Licenses and Radiation Safety Requirements for Irradiators.''
2. *OMB approval number:* 3150–0158.
3. *Type of submission:* Extension.
4. *The form number if applicable:* N/A.
5. *How often the collection is required or requested:* Applications for new licenses and amendments may be submitted at any time (on occasion). Applications for renewal are submitted every 10 years. Reports are submitted as events occur.
6. *Who will be required or asked to respond:* Applicant for and holders of specific licenses authorizing the use of licensed radioactive material for irradiators.
7. *The estimated number of annual responses:* 2,389.
8. *The estimated number of annual respondents:* 70.
9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 42,612.
10. *Abstract:* Part 39 of title 10 of the *Code of Federal Regulations* (10 CFR), establishes radiation safety requirements for the use of radioactive material for irradiators. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that the licensee possession and use of source or byproduct material is in compliance with license and regulatory requirements.

Dated at Rockville, Maryland, this 13th day of November, 2017.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[Docket Nos. CP2017–55; MC2018–22 and CP2018–44; MC2018–23 and CP2018–45; MC2018–24 and CP2018–46; CP2018–47]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 20, 2017.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Docketed Proceeding(s)

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's Web site (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2017–55; *Filing Title:* USPS Notice of Change in Prices Pursuant to Amendment to Priority Mail Contract 263*; Filing Acceptance Date:* November 9, 2017; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Katalin K. Clendenin; *Comments Due:* November 20, 2017.

2. *Docket No(s).:* MC2018–22 and CP2018–44; *Filing Title:* USPS Request to Add Priority Mail Contract 373 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 9, 2017; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Timothy J. Schwuchow*; Comments Due:* November 20, 2017.

3. *Docket No(s).:* MC2018–23 and CP2018–45; *Filing Title:* USPS Request to Add Priority Mail Contract 374 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 9, 2017; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Timothy J. Schwuchow; *Comments Due:* November 20, 2017.

4. *Docket No(s).:* MC2018–24 and CP2018–46; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & First-Class Package Service Contract 26 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 9, 2017; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Timothy J. Schwuchow; *Comments Due:* November 20, 2017.

5. *Docket No(s).:* CP2018–47; *Filing Title:* Notice of United States Postal Service of Filing a Functionally Equivalent Global Expedited Package Services 9 Negotiated Service Agreement and Application for Non-Public Treatment of Materials Filed Under Seal; *Filing Acceptance Date:* November 9, 2017; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Katalin K. Clendenin; *Comments Due:* November 20, 2017.

This notice will be published in the **Federal Register**.

Stacy L. Ruble,

Secretary.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copy Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736

Extension:

Form N–CSR, SEC File No. 270–512, OMB Control No. 3235–0570

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information

summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Form N–CSR (17 CFR 249.331 and 274.128) is a combined reporting form used by registered management investment companies (''funds'') to file certified shareholder reports under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) (''Investment Company Act'') and the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act''). Specifically, Form N–CSR is to be used for reports under section 30(b)(2) of the Investment Company Act (15 U.S.C. 80a–29(b)(2)) and section 13(a) or 15(d) of the Exchange Act (15 U.S.C. 78m(a) and 78o(d)), filed pursuant to rule 30b2–1(a) under the Investment Company Act (17 CFR 270.30b2–1(a)). Reports on Form N–CSR are to be filed with the Securities and Exchange Commission (''Commission'') no later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under rule 30e–1 under the Investment Company Act (17 CFR 270.30e–1). The information filed with the Commission permits the verification of compliance with securities law requirements and assures the public availability and dissemination of the information.

The current total annual burden hour inventory for Form N–CSR is 172,899 hours.[1] The hour burden estimates for preparing and filing reports on Form N–CSR are based on the Commission's experience with the contents of the form. The number of burden hours may vary depending on, among other things, the complexity of the filing and whether preparation of the reports is performed by internal staff or outside counsel.

The Commission's new estimate of burden hours that will be imposed by Form N–CSR is as follows:

HOUR BURDEN FOR REPORTS ON FORM N–CSR

Number of funds	[2] 11,856
Number of filings per fund per year	2
Hour burden per fund per filing	7.31
Hour burden per fund per year (7.31 hours per filing × 2 filings per year)	14.62
Additional aggregate annual burden for closed-end funds	[3] 750
Total annual hour burden for all funds	[4] 174,085

In total, the Commission estimates it will take 174,085 burden hours per year for all funds to prepare and file reports on Form N–CSR. Based on the Commission's estimate of 174,085 burden hours and an estimated wage rate of approximately $324 per hour,[5] the total internal annual cost to registrants of the hour burden for complying with Form N–CSR requirements is approximately $56 million.[6]

Estimates of average burden hours and costs are made solely for purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even representative survey or study of the costs of Commission rules and forms. Compliance with the information collection requirements of Form N–CSR is mandatory. Responses to the collection of information will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Written comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

Please direct your written comments to Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, C/O Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

Dated: November 14, 2017.

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2017–24945 Filed 11–16–17; 8:45 am]

BILLING CODE 8011–01–P

---

[1] This estimate is based on the following calculations: 172,899 hours = (11,856 management investment companies × 14.52 hour burden per fund per year) + 750 additional hours for closed-end funds.

[2] This estimate is based on the following calculation: 11,856 management investment companies = (1,594 exchange-traded funds—eight organized as unit investment trusts + 750 closed-end funds + 481 money market funds + 9,039 other mutual funds).

[3] This estimate is based on the following calculation: 750 hours = (750 closed-end funds × 1 hour per closed-end fund).

[4] This estimate is based on the following calculation: 174,085 hours = 750 hours + (11,856 funds × 14.62 burden hours per fund per year).

[5] The Commission's estimate concerning the wage rate is based on salary information for the securities industry compiled by the Securities Industry and Financial Markets Association. The estimated wage figure is based on published rates for compliance attorneys and senior programmers, modified to account for an 1,800-hour work year and inflation; multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead; and adjusted to account for the effects of inflation, yielding effective hourly rates of $340 and $308, respectively. *See* Securities Industry and Financial Markets Association, Report on Management & Professional Earnings in the Securities Industry 2013. We estimate that compliance attorneys and senior programmers would divide their time equally, yielding an estimated hourly wage rate of $324. ($340 per hour for compliance attorneys + $308 per hour for senior programmers) ÷ 2 = $324 per hour.

[6] 174,085 hours × $324 per hour = $56,403,540 per year.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82063; File No. SR–ICEEU–2017–011]

Self-Regulatory Organizations; ICE Clear Europe Limited; Notice of Filing of Proposed Rule Change, Security Based Swap Submission, or Advance Notice Relating to Amendments to the ICE Clear Europe Collateral and Haircut Policy

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 2, 2017, ICE Clear Europe Limited (''ICE Clear Europe'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule changes described in Items I, II, and III below, which Items have been primarily prepared by ICE Clear Europe. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the changes is to modify the ICE Clear Europe

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Collateral and Haircut Policy to incorporate certain changes to the calculation of absolute collateral limits for bonds provided as Permitted Cover by Clearing Members. The changes also make certain clarifications and updates and add certain general provisions addressing overall risk appetite and risk limits.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICE Clear Europe included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. ICE Clear Europe has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICE Clear Europe proposes revising its Collateral and Haircut Policy (the ''Collateral and Haircut Policy'') to incorporate certain changes to the calculation of absolute collateral limits for bonds provided as Permitted Cover by Clearing Members and certain other revisions as described below. The amendments do not involve any changes to the ICE Clear Europe Clearing Rules or Procedures.

The Collateral and Haircut Policy establishes a maximum amount of bonds from an individual issuer that ICE Clear Europe will accept from a Member Group (an ''Absolute Limit''). The Absolute Limit is designed to take into account the trading liquidity of the bond, and accordingly the ability of ICE Clear Europe to liquidate the collateral when required. Currently, the underlying data used in the calculation of the Absolute Limit is based on the bi-annual International Capital Market Associate repo survey of market participants (the ''ICMA Data''), as a proxy for secondary market trading activity. Under the revised Collateral and Haircut Policy, the Absolute Limit will be determined using actual secondary market trading volume data provided by ICE Data Services (the ''IDS Data''). The IDS Data is compiled from a wide range of market data sources for transactions in government and corporate bonds. In certain circumstances where official trading volume data is published from a primary source, such as a governmental or central bank, such data will be used in lieu of the IDS Data. (For example, for bonds issued by Canada and Japan, ICE Clear Europe will utilize data provided by the Bank of Canada and the Japan Securities Dealers Association, respectively, instead of IDS Data.) In either case, the Absolute Limit for each bond issuer and collateral type will be 10% of the average daily volume over the past three months, rounded to the nearest million. ICE Clear Europe believes that the revised approach will provide a more direct and accurate estimation of liquidity than under the current approach, which will facilitate calculation of conservative and appropriate absolute concentration limits.

The revisions also provide that in order to capture price volatility information on a conservative basis, the haircut calculation methodology, which incorporates a historical VaR model, among other factors, will use a two-sided VaR estimation based on the largest absolute returns.

The Collateral and Haircut Policy has also been amended to more clearly take into account the existence of ICE Clear Europe's approximately U.S. $1 billion in committed repo facilities. As under the existing policy, in certain circumstances the Clearing House may permit a Clearing Member to maintain a collateral bond position in excess of normal absolute limits, in reliance on the Clearing House's ability to obtain cash for any excess securities using the committed repo facility. The amendments clarify that the repo facilities are available at any time there is an intra-day liquidity need, and are not limited to use in case of Clearing Member default.

The amendments also note certain particular scenarios in which the clearing risk department may, consistent with the current policy, consider other qualitative and quantitative factors in setting prudent haircuts. These include the need to clean the bond price input data to remove spurious effects caused by changes in the different underlying bonds used to build bond price time-series. In this regard, the time series of bond price data in some instances may be spliced together from bonds with the same maturities but certain differences in other terms. These differences may cause the bonds to trade at different price levels, which could introduce spurious price spikes into the time series. To avoid an effect on the calculated haircut levels, ICE Clear Europe removes such spurious price spikes from the time series. The policy also notes that the clearing house may also need to consider the impact of unexpected currency de-pegging events on the calculation of cross-currency FX haircuts (such as the Swiss franc de-pegging from the Euro in January 2015, which caused unexpected sharp movements in the underlying exchange rate), as such events may not be fully captured by the quantitative approach in the Collateral and Haircut Policy.

In addition, the Collateral and Haircut Policy has been revised to add certain general provisions, consistent with the approach taken in other ICE Clear Europe policies, addressing overall risk appetite and risk limits in the context of the purposes of the Collateral and Haircut Policy. Certain references in the policy to internal ICE Clear Europe personnel, departments and committees have been updated. The amendments also provide further detail as to the process for annual independent validation and governance oversight of relevant models used to support the Collateral and Haircut Policy. The policy owner, with the support of risk department personnel, will be responsible for the continuous review and reporting of the risk profile of the policy. The policy will be reviewed at least annually by the CDS and F&O Risk Committees and approved by the Board. Any material changes to the policy must be discussed with the Executive Risk Committee, reviewed by the CDS and F&O Risk Committees and the Board Risk Committee and approved by the Board. A ''red-amber-green'' escalation process has also been implemented to handle identified risks or situations as they arise.

(b) Statutory Basis

ICE Clear Europe believes that the changes described herein are consistent with the requirements of Section 17A of the Act [3] and the regulations thereunder applicable to it, including the standards under Rule 17Ad–22,[4] and in particular are consistent with the prompt and accurate clearance of and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts and transactions, the safeguarding of securities and funds in the custody or control of ICE Clear Europe or for which it is responsible and the protection of investors and the public interest, within the meaning of Section 17A(b)(3)(F) of the Act.[5] The amendments are intended, among other matters, to adopt a more robust and direct method for obtaining relevant bond trading volume data that is used

[3] 15 U.S.C. 78q–1.

[4] 17 CFR 240.17Ad–22.

[5] 15 U.S.C. 78q–1(b)(3)(F).

to determine concentration limits and to clarify certain other matters relating to calculation of haircuts and limits. The amendments also enhance the governance process around the Collateral and Haircut Policy. In ICE Clear Europe's view, the amendments will help ICE Clear Europe more clearly determine the liquidity of relevant bonds, which in turn will facilitate establishment of accurate concentration limits. As a result, ICE Clear Europe believes the amendments are consistent with the requirements of Section 17A(b)(3)(F) [6] of the Act. In addition, for the foregoing reasons, the amendments will facilitate setting and enforcing appropriately conservative haircuts and concentration limits, and provide for a review of the sufficiency of such haircuts and limits not less than annually, within the meaning of Rule 17Ad–22(e)(5).[7]

(B) Clearing Agency's Statement on Burden on Competition

ICE Clear Europe does not believe the proposed changes to the rules would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purpose of the Act. ICE Clear Europe is adopting the amendments to the Collateral and Haircut Policy in order to enhance the calculations of concentration limits and haircuts and make certain other governance and related enhancements to the Collateral and Haircut Policy. The amendments will apply to all Clearing Members and products. ICE Clear Europe does not believe the amendments would materially affect the cost of clearing, adversely affect access to clearing in these products for Clearing Members or their customers, or otherwise adversely affect competition in clearing services. Although the amendments may change the haircuts or concentration limits for particular bonds, which may affect the costs and benefits of using those bonds as collateral, ICE Clear Europe believe that such changes are appropriate in light of the risk management enhancements provided by the revised policy. As a result, ICE Clear Europe believes that any impact or burden on competition from such amendments would be appropriate in furtherance of the purpose of the Act.

[6] 15 U.S.C. 78q–1(b)(3)(F).

[7] 17 CFR 240.17Ad–22(e)(5).

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed changes to the rules have not been solicited or received. ICE Clear Europe will notify the Commission of any written comments received by ICE Clear Europe.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*) or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ICEEU–2017–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ICEEU–2017–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of ICE Clear Europe and on ICE Clear Europe's Web site at *https://www.theice.com/notices/Notices.shtml?regulatoryFilings.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ICEEU–2017–011 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82058; File No. SR–IEX–2017–39]

Self-Regulatory Organizations: Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Rules Pertaining to Certain Listing Regulatory Reporting and Operational Requirements

November 13, 2017.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on October 31, 2017, the Investors Exchange LLC (''IEX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to

[8] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Securities Exchange Act of 1934 (''Act''),[4] and Rule 19b–4 thereunder,[5] Investors Exchange LLC (''IEX'' or ''Exchange'') is filing with the Commission a proposed rule change to adopt rules pertaining to certain listing regulatory reporting and operational requirements. The Exchange has designated this proposal as non-controversial and provided the Commission with the notice required by Rule 19b–4(f)(6)(iii) under the Act.[6] The text of the proposed rule change is available at the Exchange's Web site at *www.iextrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statement [sic] may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

On June 17, 2016 the Commission granted IEX's application for registration as a national securities exchange under Section 6 of the Act including approval of rules applicable to the qualification, listing and delisting of companies on the Exchange.[7] The Exchange plans to begin a listing program in 2017 and is proposing to adopt rules pertaining to certain listing regulatory reporting and operational requirements, as described below.

Short-Interest Reporting

The Financial Industry Regulatory Authority (''FINRA''), the Nasdaq Stock Market (''Nasdaq'') and the New York Stock Exchange (''NYSE'') each have rules requiring that members of such self-regulatory organization (''SRO'') record and report specified short positions in all customer and proprietary accounts.[8] This data is also referred to as short interest. In the case of Nasdaq, the recording and reporting requirements apply to positions in securities listed on Nasdaq, while the FINRA and NYSE rules apply to all equity securities. The FINRA, Nasdaq and NYSE rules each require reporting on a bi-monthly basis by their member firms. FINRA, NYSE and Nasdaq firms provide their short position reports to FINRA through the Firm Gateway.[9] Firms must report their mid-month short positions as of the close of business on the settlement date of the 15th of each month, or, where the 15th is a non-settlement date, on the preceding settlement date. Firms must report their end-of-month short positions as of the close of business on the last business day of the month on which transactions settle pursuant to FINRA and exchange rules. Both reports must be received by FINRA no later than the second business day after the reporting settlement date.

FINRA consolidates the short position reports submitted by each firm, and provides such reports to the relevant listing exchange for each listed security (*i.e.,* NYSE, Nasdaq and Bats BZX Exchange, Inc. (''Bats'')). In order to provide transparency [10] regarding aggregate short interest in equities securities, the listing exchanges publish the consolidated short interest data seven business days after the reporting settlement date. Similarly, FINRA publishes consolidated short interest data for securities that are not listed on an exchange on the same time frame. Short interest data is also used by FINRA for regulatory purposes, including to assess compliance with Regulation SHO.

IEX proposes to adopt a comparable rule requiring short interest recording and reporting in securities listed on IEX by Members. Specifically, IEX proposes to adopt new Rule 3.293, entitled Short-Interest Reporting, that requires IEX Members, to the extent such information is not otherwise reported to FINRA in conformance with FINRA Rule 4560, to comply with FINRA Rule 4560 with respect to securities listed on IEX, as if such rule were part of IEX's rules, and to report required information in the form and manner specified by IEX. Thus, as proposed, IEX Members are subject to the following requirements:

(a) Each Member shall maintain a record of total ''short'' positions in all customer and proprietary firm accounts in securities listed on IEX [11] and shall regularly report such information to FINRA in such a manner as may be prescribed by IEX. Reports shall be received by FINRA no later than the second business day after the reporting settlement date designated by IEX.

(b) Members shall record and report all gross short positions existing in each individual firm or customer account, including the account of a broker-dealer, that resulted from (1) a ''short sale'', as that term is defined in Rule 200(a) of SEC Regulation SHO, or (2) where the transaction(s) that caused the short position was marked ''long,'' consistent with SEC Regulation SHO, due to the firm's or the customer's net long position at the time of the transaction. Members shall report only those short positions resulting from short sales that have settled or reached settlement date by the close of the reporting settlement date designated by IEX.

(c) The recording and reporting requirements shall not apply to:

(1) Any sale by any person, for an account in which he has an interest, if such person owns the security sold and intends to deliver such security as soon as is possible without undue inconvenience or expense; and

(2) any sale by an underwriter, or any member of a syndicate or group participating in the distribution of a security, in connection with an over-allotment of securities, or any lay-off sale by such a person in connection with a distribution of securities through rights or a standby underwriting commitment.

While FINRA Rule 4560 requires such recording and reporting in all equity securities, not all IEX Members are also members of FINRA. Therefore, the Exchange believes that with the launch of its listing program, it is appropriate to add an IEX rule requiring recording and reporting of short interest positions

[4] 15 U.S.C. 78s(b)(1).

[5] 17 CFR 240.19b–4.

[6] 17 CFR 240.19b–4(f)(6)(iii).

[7] *See* Securities Exchange Act Release No. 34–78101 (June 17, 2016), 81 FR 41141 (June 23, 2016) (File No. 10–222).

[8] *See* FINRA Rule 4560, Nasdaq Rule 3360, and NYSE Rule 4560.

[9] FINRA members are required to report short interest positions through a web-based interface which is accessible via the Firm Gateway. *See,* Regulatory Notice 16–32 entitled ''Short Interest Reporting'' accessible at *http://www.finra.org/sites/default/files/notice_doc_file_ref/Regulatory-Notice-16-32.pdf.*

[10] Short interest reporting and publication began in 1986 in connection with a study and recommendation by Irving M. Pollack (a former Commissioner of the SEC) on behalf of the National Association of Securities Dealers, Inc., the predecessor to FINRA.

[11] FINRA Rule 4560(a) provides that the short interest recording and reporting requirements are not applicable to Restricted Equity Securities, as defined in FINRA Rule 6420 which further references the definition of ''restricted security'' in Rule 144(a)(3) under the Securities Act of 1933. Restricted securities are not eligible for listing on IEX since they are subject to trading restrictions, so this limitation is not necessary for inclusion in IEX Rule 3.293.

in securities listed on IEX, so that IEX Members that are not FINRA members are subject to such requirements and their short positions in IEX listed securities will be consolidated for publication and available to FINRA for regulatory purposes.

Further, as proposed, IEX Rule 3.293 specifies that information required to be reported pursuant to FINRA Rule 4560 shall be reported to IEX in the form and manner specified by IEX.[12] As proposed, IEX Rule 3.293 is substantially similar to FINRA Rule 4560 except that Members are only required to record and report short positions in securities listed on IEX. This limitation is substantially similar to Nasdaq Rule 3360, which also limits short interest reporting to securities listed on Nasdaq.[13]

Notification Requirements for Offering Participants

SEC Regulation M is designed to prevent manipulation by individuals with an interest in the outcome of an offering of securities, and prohibits activities and conduct that could artificially influence the market for an offered security.[14] Regulation M generally prohibits underwriters, broker-dealers, issuers and other persons participating in a distribution from directly or indirectly bidding for or purchasing the offered security (or inducing another person to do so) during the applicable ''restricted period,'' [15] which commences on the later of one or five business days prior to determination of the offering price [16] or such time that a person becomes a distribution participant, and ends upon such person's completion of participation in the distribution. Regulation M also governs certain market activities (*i.e.,* stabilizing bids, syndicate covering transactions and penalty bids [17]) in connection with an offering and requires that notification of such activity be provided to the SRO with direct authority over the principal market in the United States for the security for which the syndicate covering transaction is effected or the penalty bid is imposed. In the case of a stabilizing bid, such notice must be provided to the market on which the stabilizing bid will be posted. Further, Regulation M prohibits any person from selling short a security that is the subject of a public offering and purchasing the security in the offering, if the short sale was effected during the restricted period.

IEX and FINRA are parties to a regulatory services agreement pursuant to which FINRA performs certain regulatory functions on behalf of IEX.[18] IEX and FINRA also entered into an agreement to reduce regulatory duplication for IEX Members that are also members of FINRA whereby IEX has allocated certain regulatory responsibilities to FINRA pursuant to Rule 17d–2 under the Act.[19] Compliance with Regulation M is included within the regulatory functions and responsibilities that FINRA performs with respect to IEX Members. As part of FINRA's program to monitor for compliance with Regulation M, FINRA reviews trading and quoting activity for prohibited purchases, bids or attempts to induce bids or purchases during the applicable restricted period and for prohibited short sales during the restricted period prior to the pricing of an offering. Thus, FINRA must receive pertinent distribution related information in a timely fashion to facilitate its review of IEX Members' compliance with Regulation M.

Accordingly, in preparation for becoming a listing market, the Exchange proposes to amend Rule 11.160, which is currently reserved, to adopt provisions requiring notification requirements for offering participants that are substantially identical to those specified in NYSE Rule 5190.[20] As proposed, Rule 11.160 is entitled ''Notification Requirements for Offering Participants'' and includes the following provisions:

- Paragraph (a) provides general information and states that IEX Rule 11.160 sets forth the notice requirements applicable to Members participating in offerings of listed securities for purposes of monitoring compliance with the provisions of SEC Regulation M. In addition, the paragraph notes that Members also must comply with all applicable rules governing the withdrawal of quotations in accordance with SEC Regulation M.
- Paragraph (b) states that the terms shall have the meanings as set forth in Rules 100 and 101 of SEC Regulation M: ''actively traded'', ''affiliated purchaser'', ''covered security'', ''distribution'', ''distribution participant'', ''offering price'', ''penalty bid'', ''restricted period'', ''selling security holder'', ''stabilizing'' and ''syndicate covering transaction''.
- Paragraph (c) is entitled ''Notice Relating to Distributions of Listed Securities Subject to a Restricted Period Under SEC Regulation M'' and sets forth the notification requirements applicable to distributions of listed securities that are ''covered securities'' [21] subject to a restricted period under Rule 101 or 102 of Regulation M. Required notices must be provided in such form as specified by the Exchange with respect to: The Member's determination as to whether a one-day or five-day restricted period applies under Rule 101 of Regulation M and the basis for such determination, including the contemplated date and time of the commencement of the restricted period, the listed security name and symbol, and identification of the distribution participants and affiliated purchasers, no later than the business day prior to the first complete trading session of the applicable restricted period, unless later notification is necessary under specific circumstances; the pricing of the distribution, including the listed security name and symbol, the type of security, the number of shares offered, the offering price, the last sale before the distribution, the pricing basis, the SEC effective date and time, the trade date, the restricted period, and identification of the distribution participants and affiliated purchasers, no later than the

[12] IEX Members will use the FINRA Gateway to report short interest positions. IEX believes that virtually all IEX Members already have access to the FINRA Firm Gateway. To the extent there are any Members that do not already have access, FINRA will provide such Members with access to the Firm Gateway. Following effectiveness of this rule change, and prior to listing launch, IEX will disseminate a notice to Members advising of the reporting process and timelines.

[13] *See* Nasdaq Rule 3360(a).

[14] *See* Securities Exchange Act Release No. 38067 (December 20, 1996), 62 FR 520 (January 3, 1997) (File No. S7–11–96) (Anti-Manipulation Rules Concerning Securities Offerings; Final Rules). See also generally SEC Staff Legal Bulletin No. 9, Frequently Asked Questions About Regulation M (April 12, 2002 update) at *https://www.sec.gov/interps/legal/mrslb9.htm.*

[15] The term ''restricted period'' is defined in Rule 100(b) of Regulation M. *See* 17 CFR 242.100(b).

[16] The term ''offering price'' means the price at which the security is to be or is distributed. *See* 17 CFR 242.100(b).

[17] *See* 17 CFR 242.100(b) (definitions of ''stabilizing,'' ''syndicate covering transaction,'' and ''penalty bid''). Generally, a ''stabilizing bid'' is a bid that is intended to maintain the price of the offered security and is necessary to prevent or retard a decline in the security's price. A ''penalty bid'' allows a lead underwriter to reclaim a selling concession paid to a syndicate member if that member's customers sell their allocated shares in the immediate aftermarket. A ''syndicate covering transaction'' is generally defined as placing a bid or effecting a purchase to reduce a syndicate short position.

[18] *See* IEX Rule 1.160(hh).

[19] *See* Securities Exchange Act Release No. 78434 (July 28, 2016), 81 FR 51256 (August 3, 2016) (File No. 4–700).

[20] Proposed IEX Rule 11.160 is also substantially similar to FINRA Rule 5190, except that the FINRA rule has a broader scope since the IEX rule applies only to offerings in securities listed on IEX, and minor terminology differences.

[21] The term ''covered security'' is defined in Rule 100(b) of Regulation M. *See* 17 CFR 242.100(b).

close of business the next business day following the pricing of the distribution, unless later notification is necessary under specific circumstances; and the cancellation or postponement of any distribution for which prior notification of commencement of the restricted period has been submitted under paragraph (c)(1)(A) of Rule 11.160, immediately upon the cancellation or postponement of such distribution. If no Member is acting as a manager (or in a similar capacity) of such distribution, then each Member that is a distribution participant or affiliated purchaser shall provide the notice required under paragraph (c)(1) of Rule 11.160, unless another Member has assumed responsibility in writing for compliance therewith. Paragraph (c) also provides that any Member that is an issuer or selling security holder in a distribution of any listed security that is a covered security subject to a restricted period under Rule 102 of SEC Regulation M shall comply with the notice requirements of paragraph (c)(1) Rule 11.160, unless another Member has assumed responsibility in writing for compliance therewith.

- Paragraph (d) is entitled ''Notice Relating to Distributions of ''Actively Traded'' Securities Under Regulation M'' and sets forth the notification requirements applicable to distributions of any listed security that is considered an ''actively traded'' security under Rule 101 of Regulation M. Required notices must be provided in such form as specified by the Exchange with respect to: The Member's determination that no restricted period applies under Rule 101 of SEC Regulation M and the basis for such determination; and the pricing of the distribution, including the listed security name and symbol, the type of security, the number of shares offered, the offering price, the last sale before the distribution, the pricing basis, the SEC effective date and time, the trade date, and identification of the distribution participants and affiliated purchasers. Paragraph (d) also provides that such notice shall be provided no later than the close of business the next business day following the pricing of the distribution, unless later notification is necessary under specific circumstances. Further if no Member is acting as a manager (or in a similar capacity) of such distribution, then each Member that is a distribution participant or an affiliated purchaser shall provide the notice required, unless another Member has assumed responsibility in writing for compliance therewith.
- Paragraph (e) is entitled ''Notice of Stabilizing Bids, Penalty Bids and Syndicate Covering Transactions in Listed Securities'' and sets forth the notification requirements for such activities. Required notices must be provided in such form as specified by the Exchange with respect to: The Member's intention to conduct such activity, prior to placing or transmitting the stabilizing bid, imposing the penalty bid or engaging in the first syndicate covering transaction, including identification of the listed security and its symbol and the date such activity will occur; and confirmation that the Member has placed or transmitted a stabilizing bid, imposed a penalty bid or engaged in a syndicate covering transaction, within one business day of completion of such activity, including identification of the listed security and its symbol, the total number of shares and the date(s) of such activity.

All required notifications pursuant to IEX Rule 11.160 will be submitted by IEX Members to FINRA through the Firm Gateway.[22] Upon effectiveness of this rule change and prior to the first IEX listing, the Exchange will disseminate a regulatory circular to Members advising of the form and manner for submission of required notifications through the FINRA Firm Gateway.

Short Sale Circuit Breaker Restriction

Rule 201 of Regulation SHO[23] provides for the imposition of a short sale circuit breaker, in a covered security by trading centers in the event that the price of a covered security[24] decreases by 10% or more from the covered security's closing price as determined by the listing market[25] for the covered security as of the end of regular trading hours[26] on the prior day. If the circuit breaker is triggered, paragraph (b)(1) of Rule 201 requires each trading center to establish, maintain, and enforce written policies and procedures reasonably designed to prevent the execution or display of a short sale order of a covered security at a price that is less than or equal to the current national best bid (subject to certain specified exceptions) for the remainder of the trading day on which it is triggered and the following day.

Paragraph (b)(3) of Rule 201 further provides that the listing market for a covered security shall determine whether the price of such covered security has decreased by 10% or more from the covered security's closing price as of the end of regular trading hours on the prior day, and, if such decrease has occurred shall immediately notify the single plan processor responsible for consolidation of information for the covered security pursuant to Rule 603(b) of Regulation NMS.[27] The single plan processor must then disseminate this information, thereby triggering the short sale circuit breaker restriction.[28]

Accordingly, in preparation for becoming a listing market, the Exchange proposes to amend IEX Rule 11.290 to adopt provisions regarding the required determinations and processes related to the short sale circuit breaker. As proposed, paragraph (b) of IEX Rule 11.290 is amended to add ''Trigger Price'' as a defined term with respect to the existing description of the Short Sale Price Test. Paragraph (c) of IEX Rule 11.290 (which is currently reserved) is titled ''Determination of Trigger Price'' and provides that, for covered securities for which the Exchange is the listing market, the System[29] shall determine whether a transaction in a covered security has occurred at a Trigger Price[30] and shall immediately notify the responsible single plan processor. Further, the System will not calculate the Trigger Price of a covered security outside of the Regular Market Session,[31] and, if a covered security did not trade on the Exchange on the prior trading day (due to a trading halt, trading suspension, or otherwise), the Exchange's determination of the Trigger Price shall be based on the last sale price on the Exchange for that security on the most recent day on which the security traded. In addition, the Exchange proposes to add provisions to paragraph (d)(1) of IEX Rule 11.290 to provide that the Exchange may lift the Short Sale Price

[22] Information regarding FINRA's Firm Gateway is available at: *http://www.finra.org/sites/default/files/NoticeDocument/p125975.pdf.* IEX believes that virtually all IEX Members that would be required to submit notifications pursuant to IEX Rule 11.160 already have access to the FINRA Firm Gateway. Generally, such Members must be members of FINRA in order to distribute shares to the public, unless such Member is an issuer or selling security holder in a distribution of a listed security pursuant to Rule 102 of Regulation M. To the extent there are any Members that fall into this exception, and do not already have access to the Firm Gateway, such Members will be provided with access to the Firm Gateway.

[27] 17 CFR 242.603(b).

[28] *See,* FAQ 1.3 of ''Division of Trading and Markets: Responses to Frequently Asked Questions Concerning Rule 201 of Regulation SHO.''

[29] The term ''System'' is defined in IEX Rule 1.160(nn).

[30] *See* amendments to Rule 11.290(b).

[31] *See* Rule 1.160(gg).

Test[32] before the Short Sale Period[33] ends for securities for which the Exchange is the listing market if the Exchange determines pursuant to IEX Rule 11.270 that the triggering transaction was a clearly erroneous execution as soon as practicable following such determination. Further, the Exchange may also lift the Short Sale Price Test before the Short Sale Period ends, for a covered security for which the Exchange is the listing market, if the Exchange has been informed by another exchange or a self-regulatory organization (''SRO'') that a transaction in the covered security that occurred at the Trigger Price was a clearly erroneous execution, as determined by the rules of that exchange or SRO. Finally, proposed paragraph (d)(2) of IEX Rule 11.290 provides that if the Exchange determines that the prior day's closing price for a listed security is incorrect in the System and resulted in an incorrect determination of the Trigger Price, the Exchange may correct the prior day's closing price and lift the Short Sale Price Test before the Short Sale Period ends.

As proposed, the amendments to IEX Rule 11.290 are substantially identical to Bats Rule 11.19.

2. Statutory Basis

IEX believes that the proposed rule change is consistent with the provisions of Section 6 of the Act, in general and with Sections 6(b)[34] of the Act in general, and furthers the objectives of Sections 6(b)(5) of the Act,[35] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule change supports these objectives because it provides for certain listing regulatory reporting and operational requirements which are consistent with the public interest and the protection of investors.

Short-Interest Reporting

The Exchange believes that it is consistent with the Act to require IEX Members to record and report short interest in securities listed on IEX, to the extent not otherwise reported to FINRA. As discussed in the Purpose section, recording and reporting of short interest provides transparency regarding aggregate short interest and is also used by FINRA for regulatory purposes, including to assess compliance with Regulation SHO. The Exchange believes that requiring short interest recording and reporting by IEX Members in securities listed on IEX is thus consistent with the public interest and the protection of investors in support of these objectives. Further, the Exchange believes that the requirement that all IEX Members record and report short interest is equitable and not unfairly discriminatory because the requirement will result in all IEX Members being subject to such requirements, regardless of whether such Member is a member of FINRA.

The Exchange also notes that proposed Rule 3.293 is substantially identical to FINRA Rule 4560 and Nasdaq Rule 3360, as described in the Purpose section, and thus the Exchange does not believe it raises any new or novel issues not already considered by the Commission.

Notification Requirements for Offering Participants

The Exchange believes that it is consistent with the Act to require IEX Members that are offering participants to provide the specified notifications to IEX in such form as specified by IEX, which, as discussed in the Purpose section, will be to FINRA through the Firm Gateway. The Exchange believes that imposing the specified notification requirements, and specifying that notification be to FINRA through the Firm Gateway, is consistent with the public interest and the protection of investors, since FINRA must receive such notifications in order to monitor IEX Members and other market participants for compliance with Regulation M. As described in the Purpose section, as part of FINRA's program to monitor for compliance with Regulation M, and pursuant to IEX regulatory services agreement with FINRA and allocation to FINRA pursuant to Rule 17d–2 under the Act, FINRA reviews trading and quoting activity for prohibited purchases, bids or attempts to induce bids or purchases during the applicable restricted period and for prohibited short sales during the restricted period prior to the pricing of an offering. Thus, FINRA must receive pertinent distribution related information in a timely fashion to facilitate its review of IEX Members' compliance with Regulation M. Accordingly, IEX believes that requiring such notifications is consistent with the protection of investors and the public interest.

Further, the Exchange believes that imposition of the notification requirements is equitable and not unfairly discriminatory because all IEX Members will be subject to such requirements in the same manner.

The Exchange also notes that the proposed amendments to Rule 11.160 are substantially identical to those specified in NYSE Rule 5190 and substantially similar to FINRA Rule 5190, as described in the Purpose section, and thus the Exchange does not believe that the proposed amendments raise any new or novel issues not already considered by the Commission.

Short Sale Circuit Breaker Restriction

The Exchange believes that it is consistent with the Act to amend IEX Rule 11.290 to adopt provisions regarding the required determinations and processes related to the short sale circuit breaker, as required by Rule 201 of Regulation SHO, as described in the Purpose section. Further, the Exchange believes that the rule amendments are equitable and not unfairly discriminatory because such amendments will apply to all IEX Members in the same manner.

The Exchange also believes that the rule amendments are consistent with the Act, since they are designed to encourage fair and orderly trading and markets. Additionally, as proposed the rule amendments are substantially identical to Bats Rule 11.19, and thus the Exchange does not believe that the proposed amendments raise any new or novel issues not already considered by the Commission.

B. Self-Regulatory Organization's Statement on Burden on Competition

IEX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. As described in the Purpose and Statutory Basis sections, the proposed rule change effectuates listing regulatory reporting and operational requirements and is not designed to address or advance any competitive issues. To the contrary, the Exchange believes that the proposed rule change facilitates competition since

[32] The term ''Short Sale Price Test'' is defined in IEX Rule 11.290(b), and encompasses the restrictions of the short sale circuit breaker pursuant to Rule 201 of Regulation SHO. 17 CFR 242.201.

[33] The term ''Short Sale Period'' is defined in IEX Rule 11.290(d), and encompasses the duration of the short sale circuit breaker pursuant to Rule 201(b)(1)(ii) of Regulation SHO. 17 CFR 242.201(b)(1)(ii).

[34] 15 U.S.C. 78f.

[35] 15 U.S.C. 78f(b)(5).

it is designed to effectuate IEX's operation as a listing market thereby enhancing competition with the other listing markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [36] and Rule 19b–4(f)(6) thereunder.[37]

A proposed rule change filed under Rule 19(b)–4(f)(6) normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii), the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.[38] The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because the proposed rule change is substantially identical to the rules of other self-regulatory organizations and thus raises no novel issues.[39] Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[40]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [41] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–IEX–2017–39 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–IEX–2017–39. This file number should be included in the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Section, 100 F Street NE., Washington, DC 20549–1090. Copies of the filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–IEX–2017–39 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[42]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82056; File No. SR–OCC–2017–806]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Advance Notice Concerning Liquidity for Same-Day Settlement

November 13, 2017.

Pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) of the Securities Exchange Act of 1934 (''Act''),[2] notice is hereby given that on October 13, 2017, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') an advance notice as described in Items I, II and III below, which Items have been prepared by OCC. The Commission is publishing this notice to solicit comments on the advance notice from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

This advance notice is filed in connection with a proposed change to modify the tools available to OCC in order to provide a mechanism for addressing the risks of liquidity shortfalls, specifically, in the extraordinary situation where OCC faces a liquidity need to meet its same-day settlement obligations as a result of a bank or securities or commodities clearing organization failing to achieve daily settlement.

The proposed changes to OCC's By-Laws were submitted as Exhibit 5 of the

filing.[3] The proposed change is described in detail in Item 10 below. All terms with initial capitalization not defined herein have the same meaning as set forth in OCC's By-Laws and Rules.[4]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the advance notice and discussed any comments it received on the advance notice. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections A and B below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed change and none have been received. OCC will notify the Commission of any written comments received by OCC.

(B) Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing, and Settlement Supervision Act

Description of the Proposed Change

The purpose of the proposed change is to modify the tools available to OCC in order to provide a mechanism for addressing the risks of liquidity shortfalls, specifically, in the extraordinary situation where OCC faces a liquidity need to meet its same-day settlement obligations as a result of a bank or securities or commodities clearing organization failing to achieve daily settlement.

Current Practice

Presently, Article VIII, Section 5(e) of OCC's By-Laws provides OCC with the authority to borrow against the Clearing Fund in two circumstances. First, Article VIII, Section 5(e) of OCC's By-Laws provides OCC the authority to borrow where OCC ''deems it necessary or advisable to borrow or otherwise obtain funds from third parties in order to meet obligations arising out of the default or suspension of a Clearing Member or any action taken by the Corporation in connection therewith pursuant to Chapter XI of the Rules or otherwise.'' Second, Article VIII, Section 5(e) of OCC's By-Laws provides OCC the authority to borrow against the Clearing Fund where OCC ''sustains a loss reimbursable out of the Clearing Fund pursuant to [Article VIII, Section 5(b) of OCC's By-Laws] but [OCC] elects to borrow or otherwise obtain funds from third parties in lieu of immediately charging such loss to the Clearing Fund.'' In order for a loss to be reimbursable out of the Clearing Fund under Article VIII, Section 5(b) of OCC's By-Laws, it must arise from a situation in which any bank or securities or commodities clearing organization has failed ''to perform any obligation to [OCC] when due because of its bankruptcy, insolvency, receivership, suspension of operations, or because of any similar event.''[5]

Under either of the two aforementioned circumstances, OCC is authorized to borrow against the Clearing Fund for a period not to exceed 30 days, and during such period, the borrowing shall not affect the amount or timing of any charges otherwise required to be made against the Clearing Fund pursuant to Article VIII, Section 5. However, if any part of the borrowing remains outstanding after 30 days, then at the close of business on the 30th day (or the first Business Day thereafter) such amount must be considered an actual loss to the Clearing Fund, and OCC must immediately allocate such loss in accordance with Article VIII, Section 5.

Proposed Change

While Article VIII, Section 5(e) of OCC's By-Laws currently provides for borrowing authority in the more extreme scenarios involving a bank's or securities or commodities clearing organization's bankruptcy, insolvency, receivership, suspension of operations or similar event, such authority does not extend to the similar, but less extreme scenarios in which a bank or securities or commodities clearing organization might be temporarily unable to timely make daily settlement with OCC for reasons other than its bankruptcy, insolvency, receivership or suspension of operations or similar events. An example of such a related scenario would be a disruption of the ordinary operations of a settlement bank that temporarily prohibits the bank from timely effecting settlement payments in accordance with OCC's daily settlement cycle.

The proposed change would expand upon the existing borrowing authority in Article VIII, Section 5(e) of OCC's By-Laws. As expanded, OCC would be authorized to borrow (or otherwise obtain funds through any means determined to be reasonable by the Executive Chairman, COO or CAO) against the Clearing Fund in the extraordinary event that OCC faces a liquidity need in order to complete same-day settlement. As specified in the proposed rule text, the funds obtained from any such transaction can be used only for their stated purpose, namely, to satisfy a need for liquidity for same-day settlement. Consistent with the existing borrowing authority in Article VIII, Section 5(e) of OCC's By-Laws, OCC would be authorized to borrow against the Clearing Fund for a period not to exceed 30 days, and during such period, the funds obtained would not be deemed to be charges against the Clearing Fund, irrespective of how such funds are applied, and the borrowing shall not affect the amount or timing of any charges otherwise required to be made against the Clearing Fund pursuant to Article VIII, Section 5. However, in the unlikely event that any part of the borrowing were to remain outstanding after 30 days, then at the close of business on the 30th day (or the first Business Day thereafter), such amount would be considered an actual loss to the Clearing Fund, and OCC must immediately allocate such loss in accordance with Article VIII, Section 5.

Like the existing borrowing authority in Article VIII, Section 5(e) of OCC's By-Laws, OCC envisions that the proposed expanded authority only would be relevant in extraordinary circumstances and, even then, only would be used where OCC, exercising its discretion, believes the employment of this particular authority would be appropriate to address OCC's immediate liquidity need.

OCC proposes to amend Sections 1(a), 5(b) and 5(e) of Article VIII of its By-Laws in order to give effect to the expanded borrowing authority discussed herein. Section 5(e) of Article VIII of OCC's By-Laws would be amended to permit OCC to borrow against the Clearing Fund if it reasonably believes such borrowing is necessary to meet its liquidity needs for same-day settlement as a result of the failure of any bank or securities or commodities clearing organization to achieve daily settlement.

[3] OCC has filed a proposed rule change with the Commission in connection with the proposed change. *See* SR–OCC–2017–017.

[4] OCC's By-Laws and Rules can be found on OCC's public Web site: *http://optionsclearing.com/about/publications/bylaws.jsp.* Other terms not defined herein or in the OCC By-Laws and Rules can be found in the Rules & Procedures of NSCC (''NSCC Rules''), *available at http://www.dtcc.com/~/media/Files/Downloads/legal/rules/nscc_rules.pdf,* as the context implies.

[5] To the extent that a loss resulting from any of the events referred to in Article VIII, Section 5(b) is recoverable out of the Clearing Fund pursuant to Article VIII, Section 5(a), the provisions of Article VIII, Section 5(a) control and render the provisions of Article VIII, Section 5(b) inapplicable.

Section 1(a) of Article VIII of OCC's By-Laws would be amended to include conforming changes that would reflect that the purpose of the Clearing Fund includes borrowing against the Clearing Fund as permitted under Section 5(e) of Article VIII of the By-Laws.

Section 5(b) of Article VIII of the By-Laws would be amended to include conforming changes that would declare that any borrowing remaining outstanding for less than 30 days may be considered, in OCC's discretion, an actual loss and the amount of any such loss then shall be charged proportionately against all Clearing Members' computed contributions to the Clearing Fund as fixed at the time, and any borrowing remaining outstanding on the 30th day shall be considered an actual loss to the Clearing Fund and the amount of any such loss shall be charged proportionately against all Clearing Members' computed contributions to the Clearing Fund as fixed at the time. OCC proposes to include discretionary authority to declare any borrowing outstanding for less than 30 days as an actual loss chargeable against the Clearing Fund because the proposed borrowing authority is intended only to address same-day liquidity needs, and intended to be promptly repaid upon the bank's or securities or commodities clearing organization's resolution of the temporary disruption. In the unlikely circumstance that a disruption of a bank or securities or commodities clearing organization is not timely resolved, OCC may need to exercise its discretion to declare an actual loss, depending on the size of the borrowing, to ensure that OCC replenishes its ''Cover 1'' financial resources.[6] The requirement to recognize any borrowing outstanding after 30 days as an actual loss chargeable against the Clearing Fund would be consistent with the requirements of the borrowing authority currently permitted by Section 5(e) of Article VIII of the By-Laws.

Expected Effect on and Management of Risk

OCC believes the proposed change would enable it to better manage the risks associated with the failure of a settlement bank or securities or commodities clearing organization's to achieve timely settlement. As noted above, OCC's By-Laws currently provide for borrowing authority in the more extreme scenarios involving a bank's or securities or commodities clearing organization's bankruptcy, insolvency, receivership, suspension of operations or similar event, such authority does not extend to the similar, but less extreme scenarios in which a bank or securities or commodities clearing organization might be temporarily unable to timely make daily settlement with OCC for reasons other than its bankruptcy, insolvency, receivership or suspension of operations or similar events. The proposed change would expand upon this existing borrowing authority to allow OCC to borrow (or otherwise obtain funds through any means determined to be reasonable by the Executive Chairman, COO or CAO) against the Clearing Fund in the extraordinary event that OCC faces a liquidity need in order to complete same-day settlement. As a result, the proposed change would enhance OCC's ability to manage its liquidity risks and ensure that it is able to continue making timely settlements in the event of such a disruption.

As stated above, it is conceivable, though extremely unlikely, that a bank or securities or commodities clearing organization may fail to make timely settlement with OCC as a result of a temporary disruption to its ordinary operations. The proposed change would not alter this risk, but would provide OCC with a mechanism for addressing it, should such risk ever be realized. The proposed mechanism for addressing this risk—discretionary authority to borrow from the Clearing Fund—would require OCC's senior and executive management to exercise discretion and judiciousness and could, if ever deployed, present an arguably new, though very limited, risk to Clearing Members.

Modifying OCC's existing authority to borrow against the Clearing Fund introduces a new, and potentially competing, demand on OCC's Clearing Fund resources in that any amount of Clearing Fund resources borrowed to address the failure of a bank or securities or commodities clearing organization to make timely settlement would subtract from the available resources to address other losses that could be charged against the Clearing Fund (most common among those, losses related to Clearing Member defaults). To manage the potential for competing demands on Clearing Fund resources, OCC would exercise discretion and judiciousness in selecting when this new borrowing authority could be prudently deployed, in light of then-existing facts and circumstances. In the alternative, OCC's could elect to deploy an alternative tool, such as OCC's ability to extend the settlement window under Rule 505, if such tool would be more appropriate given anticipated demands on Clearing Fund resources in light of then-existing facts and circumstances. Because of the low probability that a bank or securities or commodities clearing organization would suffer a temporary disruption to its ordinary operations that could threaten its ability to make timely settlement, and the extremely low probability that such a disruption would result in the bank or securities or commodities clearing organization actually failing to make timely settlement, OCC believes that the potential for competing demands on Clearing Fund resources can be managed sufficiently through the tools available in its default management rules, policies and procedures.[7]

The proposed change could arguably present a new, though very limited, risk to Clearing Members in that OCC's authority to borrow against the Clearing Fund would be expanded, albeit slightly, to permit borrowing in a new scenario where a bank or securities or commodities clearing organization fails to make timely settlement (but otherwise is not in bankruptcy, insolvency, receivership, suspension of operations or a similar state). In order for Clearing Members to be impacted by this risk, a borrowing under the proposed authority would need to be declared an actual loss by OCC prior to 30 days lapsing or remain outstanding for 30 days, at which point, such amount would be considered an actual loss to the Clearing Fund, and OCC would be required to immediately allocate such loss in accordance with Article VIII, Section 5. However, given that the proposed borrowing authority is intended to be deployed to address immediate liquidity needs arising from *temporary* disruptions of the ordinary operation of a bank or securities or commodities clearing organization, OCC believes that it is extremely unlikely that any amount of any such borrowing ultimately would need to be declared as an actual loss in advance of 30 days or remain outstanding for a period of 30

[6] ''Cover 1'' financial resources refers to the requirement that a CCA maintains financial resources sufficient to enable it to cover the ''default of the participant family that would potentially cause the largest aggregate credit exposure for the [CCA] in extreme but plausible market conditions.'' 17 CFR 240.17Ad–22(e)(7)(viii).

[7] In addition, the bank or securities or commodities clearing organization would need to be in deficit for the settlement cycle in question in order for OCC to face an immediate liquidity need. Further, OCC must reasonably anticipate an imminent or near imminent failure by one or more Clearing Members for there to be a potential competing demand on Clearing Fund resources. OCC believes that the alignment of all of these occurrences represents an extraordinarily low probability occurrence.

days. If, however, any amount of any such borrowing in fact did remain outstanding for longer than expected, OCC believes there would be a high probability that the bank or securities or commodities clearing organization in question has actually failed, and therefore entered bankruptcy, insolvency, receivership, suspension of operations or a similar state—which events would have independently triggered the already-existing borrowing authority in Article VIII, Section 5(e).

Consistency With the Clearing Supervision Act

The stated purpose of the Clearing Supervision Act is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.[8] Section 805(a)(2) of the Clearing Supervision Act [9] also authorizes the Commission to prescribe risk management standards for the payment, clearing and settlement activities of designated clearing entities, like OCC, for which the Commission is the supervisory agency. Section 805(b) of the Clearing Supervision Act [10] states that the objectives and principles for risk management standards prescribed under Section 805(a) shall be to:

- Promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and the Act in furtherance of these objectives and principles, including those standards adopted pursuant to the Commission rules cited below.[11] For the reasons set forth below, OCC believes that the proposed change is consistent with the risk management standards promulgated under Section 805(a) of the Clearing Supervision Act.[12]

Rule 17Ad–22(e)(7)(viii) requires that a covered clearing agency (''CCA'') address foreseeable liquidity shortfalls that would not be covered by the CCA's liquid resources and seek to avoid unwinding, revoking, or delaying the same-day settlement of payment obligations.[13] As stated above, OCC believes that it could be foreseeable, though extremely unlikely, that a bank or securities or commodities clearing organization may fail to make timely settlement with OCC as the result of an event that does not result in a loss to OCC from the bankruptcy, insolvency, resolution, suspension of operations or similar event of such bank or securities or commodities clearing organization. The proposed change would improve OCC's ability to address such situations by expanding OCC's borrowing authority to enable OCC to borrow against the Clearing Fund in order to avoid disrupting its ordinary settlement cycle (and thusly, to avoid imposing the same disruption on Clearing Members).

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date the proposed change was filed with the Commission or (ii) the date any additional information requested by the Commission is received. OCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

OCC shall post notice on its Web site of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the advance notice is consistent with the Clearing Supervision Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–OCC–2017–806 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–OCC–2017–806. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the advance notice that are filed with the Commission, and all written communications relating to the advance notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of OCC and on OCC's Web site at *http://www.theocc.com/components/docs/legal/rules_and_bylaws/sr_occ_17_806.pdf.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–OCC–2017–806 and should be submitted on or before December 8, 2017.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82066; File No. SR–NYSEArca–2017–85]

Self-Regulatory Organizations; NYSEArca, Inc.; Notice of Filing of Amendment No. 3, and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Amend NYSE Arca Rule 8.700–E and To List and Trade Shares of the ProShares European Volatility Futures ETF

November 13, 2017.

I. Introduction

On July 28, 2017, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to: (1) Amend NYSE Arca Rule 8.700–E to expand the list of financial instruments that may be held by a trust that issues Managed Trust Securities; and (2) to list and trade shares (''Shares'') of the ProShares European Volatility Futures ETF (''Fund'') under proposed amended NYSE Arca Rule 8.700–E. The proposed rule change was published for comment in the **Federal Register** on August 16, 2017.[3] On September 21, 2017, the Exchange filed Amendment No. 1 to the proposed rule change, which amended and replaced the original filing in its entirety. On September 26, 2017, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On November 2, 2017, the Exchange filed Amendment No. 2 to the proposed rule change, which amended and replaced in its entirety the proposed rule change as modified by Amendment No. 1. On November 9, 2017, the Exchange filed Amendment No. 3 to the proposed rule change.[6] The Commission has received no comments on the proposed rule change. The Commission is publishing this notice to solicit comments on Amendment No. 3 from interested persons, and is approving the proposed rule change, as modified by Amendment No. 3 on an accelerated basis.

II. Summary of the Proposed Rule Change, as Modified by Amendment No. 3 [7]

The Exchange proposes to amend NYSE Arca Rule 8.700–E to add the VSTOXX as a reference asset to the futures contracts and swaps that may be held by trusts that issue Managed Trust Securities.[8] NYSE Arca Rule 8.700–E governs the listing and trading of Managed Trust Securities on the Exchange. Additionally, the Exchange proposes to list and trade the Shares under the proposed rule.

A. Proposed Amendments to NYSE Arca Rule 8.700–E

The Exchange proposes to amend NYSE Arca Rule 8.700–E (c)(1) to add the VSTOXX as a reference asset to the futures contracts and swaps that may be held by trusts that issue Managed Trust Securities.

The VSTOXX is a non-investable index that seeks to measure the volatility of the Index over a future time horizon as implied by the price of option contracts on the Index.[9] It is based on real-time prices of options on the Index listed on the Eurex Exchange (''Eurex''),[10] and is designed to reflect the market expectations of near-term up to long-term volatility by measuring the square root of the implied variances across all options of a given time to expiration. The Index includes 50 stocks that are among the largest free-float market capitalization stocks from 11 Eurozone countries.[11] STOXX Limited (''STOXX'') computes the Index on a real-time basis throughout each trading day, from 3:50 a.m. until 12:30 p.m. Eastern Time. The Index value is widely disseminated by major market data vendors on a real-time basis throughout each trading day.

Futures Contracts are cash settled and trade exclusively on Eurex between the hours of 2:30 a.m. and 5:30 p.m. Eastern

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 81373 (August 10, 2017), 82 FR 38973.

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 81721, 82 FR 45922 (October 2, 2017) (designating November 11, 2017 as the date by which the Commission will approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change).

[6] In Amendment No. 3, the Exchange: (1) Represented that the EURO STOXX 50 Volatility Index (''VSTOXX'') levels will be widely disseminated by major market data vendors on a real-time basis throughout each trading day; (2) expanded its representation regarding when the sponsor would erect a ''fire wall'' to include the circumstance where the sponsor becomes a broker-dealer and represented that the sponsor will maintain the ''fire wall'' it implemented regarding access to information concerning the composition and/or changes to the Fund's portfolio; (3) narrowed the list of the Fund's permitted investments to exclude forwards; (4) described the Fund's policies concerning swap counterparties; (5) analyzed the impacts on arbitrage of the 9 a.m. Eastern Time creation and redemption order deadline and 11:30 a.m. Eastern Time net asset value (''NAV'') calculation time; (6) represented that, to the extent that the sponsor permits an exchange of a futures contract for a related position or block trade with the Fund, such transactions will be effected on that day in the same manner for all authorized participants; (7) supplemented its description of the Fund's NAV calculation methodology and the availability of price information for the Fund's permitted investments; (8) modified its description of the Indicative Optimized Portfolio Value (''IOPV'') methodology; (9) provided information regarding the dissemination of the NAV and the availability of pricing for the EURO STOXX 50 Index (''Index''), VSTOXX, and the Fund's benchmark; (10) represented that its surveillance procedures are adequate to continue to properly monitor the trading of the Managed Trust Securities that hold futures on VSTOXX (''Futures Contracts'') and/or swaps on VSTOXX in all trading sessions and to deter and detect violations of Exchange rules; (11) clarified where Futures Contracts are listed; (12) clarified the Fund's primary investment objective; and (13) made certain technical changes. Amendment No. 3 is available on the Commission's Web site at: *https://www.sec.gov/comments/sr-nysearca-2017-85/nysearca201785-2678502-161479.pdf.*

[7] Additional information regarding the Shares and the Trust, including investment strategies, risks, NAV calculation, creation and redemption procedures, fees, Trust (as defined herein) holdings, and taxes, among other information, is included in Amendment No. 3, *supra* note 7, and the Registration Statement, *infra* note 12.

[8] Managed Trust Security is a security that is registered under the Securities Act of 1933 (15 U.S.C. 77a), as amended (the ''Securities Act''), and (1) is issued by a trust that (a) is a commodity pool as defined in the Commodity Exchange Act (7 U.S.C. 1), and that is managed by a commodity pool operator registered with the Commodity Futures Trading Commission, and (b) holds long and/or short positions in exchange-traded futures contracts and/or certain currency forward contracts and/or swaps selected by the trust's advisor consistent with the trust's investment objectives, which will only include, exchange-traded futures contracts involving commodities, commodity indices, currencies, currency indices, stock indices, fixed income indices, interest rates and sovereign, private and mortgage or asset backed debt instruments, and/or forward contracts on specified currencies, and/or swaps on stock indices, fixed income indices, commodity indices, commodities, currencies, currency indices, or interest rates, each as disclosed in the trust's prospectus as such may be amended from time to time, and cash and cash equivalents; and (2) is issued and redeemed continuously in specified aggregate amounts at the next applicable NAV. *See* NYSE Arca Rule 8.700–E (c)(1).

[9] The VSTOXX does not measure the actual volatility of the Index.

[10] Eurex is a member of the Intermarket Surveillance Group (''ISG'') and, as such, the Exchange may obtain information regarding trading in the futures contracts on VSTOXX listed by Eurex.

[11] The countries are: Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain.

Time.[12] The value of these futures contracts is 100 Euros per index point of the underlying, and it is traded to two decimal places with a minimum price change of 0.05 points (equivalent to a value of 5 Euros). The daily settlement price of these futures contracts is determined during the closing auctions. The last trading day and final settlement day is 30 calendar days prior to the third Friday of the expiration month of the underlying options, which is usually the Wednesday prior to the second to last Friday of the respective maturity month. Information regarding the VSTOXX and the overlying futures can be found on STOXX's Web site and the Eurex Web site, respectively.

B. The Listing and Trading of the Shares

The Exchange proposes to list and trade the Shares under proposed NYSE Arca Rule 8.700–E. The Fund will be a commodity pool that is a series of the ProShares Trust II (''Trust'').[13] The Fund's sponsor, ProShare Capital Management LLC (''Sponsor''), is registered as a commodity pool operator and is affiliated with a Financial Industry Regulatory Authority (''FINRA'')-registered broker-dealer. Brown Brothers Harriman & Co. will be the administrator, custodian and transfer agent of the Fund and the Shares. SEI Investments Distribution Co. (''SEI'') will be the distributor for the Shares. The Fund's primary investment objective will be to provide long exposure to lead-month Futures Contracts, and the Fund will use the Futures Contracts as a performance benchmark (''Benchmark''). The Fund will be actively managed and will have a secondary investment objective to outperform the Benchmark by actively managing the ''rolling'' of its Futures Contracts.[14]

Under normal market conditions,[15] the Fund generally will seek to remain fully invested at all times in lead-month Futures Contracts in a manner consistent with its investment objectives without regard to market conditions, trends, or direction.[16] The Fund will invest the remainder of its un-invested assets in high-quality, short-term debt instruments that have terms-to-maturity of less than 397 days, such as U.S. government securities and repurchase agreements (''Money Market Instruments'').

Under limited circumstances, the Fund also may invest in swap contracts (''Swap Contracts'') that reference the Benchmark. In the event position price or accountability limits are reached with respect to lead month Futures Contracts, the Sponsor may, in its commercially reasonable judgment, cause the Fund to invest in Swap Contracts.[17] The Fund may also invest in Swap Contracts if the market for a specific Futures Contract experiences an emergency (*e.g.,* natural disaster, terrorist attack or an act of God) or disruption (*e.g.,* a trading halt or a flash crash) which, in the Sponsor's commercially reasonable judgment, prevent, or otherwise make it impractical, for the Fund to obtain the appropriate amount of investment exposure to the affected Futures Contracts.

The Fund will also hold cash or cash equivalents, such as U.S. Treasury securities or other high credit quality, short-term fixed-income or similar securities (such as shares of money market funds and collateralized repurchase agreements), for direct investment, as collateral for its futures and Swap Contracts, or pending investment in Futures Contracts and Swap Contracts. The Fund may invest up to 100% of its assets in any of these types of cash or cash equivalent securities.

III. Discussion and Commission's Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of Section 6 of the Act[18] and the rules and regulations thereunder applicable to a national securities exchange.[19] In particular, the Commission finds that the proposal is consistent with Section 6(b)(5) of the Act,[20] which requires, among other things, that the Exchange's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Commission also finds that the proposal is consistent with Section 11A(a)(1)(C)(iii) of the Act,[21] which sets forth Congress' finding that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure the availability to brokers, dealers, and investors of information with respect to quotations for, and transactions in, securities.

A. Exchange's Proposal To Amend Rule 8.700–E[22]

With respect to the proposal to amend NYSE Arca Rule 8.700–E (c)(1) to add the VSTOXX as a reference asset to the futures contracts and swaps that may be held by trusts that issue Managed Trust Securities, the Commission notes that VSTOXX is included as a reference asset for Futures-Linked Securities,[23] and notwithstanding the addition of VSTOXX as a reference asset, the existing initial and continued listing criteria applicable to Managed Trust Securities would continue to apply. These continued listing standards require, among other things, that: (1) The Disclosed Portfolio (as defined in NYSE Arca Rule 8.700–E (c)(2)) be disseminated at least daily and to all market participants at the same time; (2) an Intraday Indicative Value be calculated and widely disseminated by one or more major market data vendors on at least a 15-second basis during the Exchange's Core Trading Session; and (3) following the initial 12-month period after the commencement of trading of an issue of Managed Trust Securities, (a) the trust must have 50,000 or more

[12] *See* Amendment No. 3, *supra* note 7, at 7, n.10, and 5.

[13] On May 12, 2017, the Trust filed with the Commission a registration statement on Form S–1 under the Securities Act relating to the Fund (File No. 333–217962) (''Registration Statement''). The description of the operation of the Trust and the Fund herein is based, in part, on the Registration Statement.

[14] The Fund will not seek to track or outperform either the VSTOXX or the Index, and the performance of the Fund will be very different from the performance of either the VSTOXX Index or the Index.

[15] ''Normal market conditions'' is defined in NYSE Arca Rule 8.600–E (c)(5).

[16] *See* Amendment No. 3, *supra* note 7, at 8.

[17] *See id.* The Fund intends to enter into Swap Contracts only with major, global financial institutions; however, there are no limitations on the percentage of its assets the Fund may invest in Swap Contracts with a particular counterparty. The Fund may use various techniques to minimize credit risk. The Fund will seek to mitigate risks in connection with the uncleared OTC swaps by generally requiring that the counterparties for the Fund agree to post collateral for the benefit of the Fund, marked to market daily, subject to certain minimum thresholds.

[18] 15 U.S.C. 78f.

[19] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[20] 17 U.S.C. 78f(b)(5).

[21] 15 U.S.C. 78k–1(a)(1)(C)(iii).

[22] *See* Securities Exchange Act Release No. 79975 (February 6, 2017), 82 FR 10418 (February 10, 2017) (SR–NYSEArca–2017–08) (adding EURO STOXX 50 Volatility Futures to the definition of Futures Reference Asset in Rule 5.2(j)(6)); Securities Exchange Act Release No. 79069 (October 7, 2016), 81 FR 70714 (October 13, 2016) (SR–BatsBZX–2016–26) (amending Bats BZX Exchange Rule 14.11(d) to add EURO STOXX 50 Volatility Futures to the definition of Futures Reference Asset).

[23] *See* NYSE Arca Rule 5.2–E (j)(6)(v).

Managed Trust Securities issued and outstanding, (b) the market value of all Managed Trust Securities issued and outstanding must be $1,000,000 or more, and (c) there must be 50 or more record and/or beneficial holders.[24]

Additionally, the Commission notes that the Exchange has represented that its surveillance procedures are adequate to continue to properly monitor the trading of the Managed Trust Securities that hold Futures Contracts and/or swaps on VSTOXX in all trading sessions and to deter and detect violations of Exchange rules.[25]

B. Exchange's Proposal To List and Trade the ProShares European Volatility Futures ETF

The Commission notes the Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Quotation and last-sale information for the Shares will be available via the Consolidated Tape Association (''CTA'') high-speed line, and the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers. In addition, information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services.

The Commission believes that the proposal to list and trade the Shares is reasonably designed to promote fair disclosure of information that may be necessary to price the Shares appropriately and to prevent trading when a reasonable degree of transparency cannot be assured. The Trust's NAV and the NAV per Share will be calculated and disseminated daily. The Exchange will disseminate for the Trust on a daily basis by means of the CTA high-speed line information with respect to the most recent NAV per Share, and the number of Shares outstanding. The Exchange also will make available on its Web site daily trading volume, closing prices and the NAV per Share. The IOPV for the Shares will be widely disseminated by one or more major market data vendors at least every 15 seconds during the Exchange's Core Trading Session. On a daily basis, the Trust will disclose on its Web site (*www.Proshares.com*) for all of the assets held by the Fund the following information: Name; ticker symbol (if applicable); CUSIP or other identifier (if applicable); description of the holding; with respect to derivatives, the identity of the security, commodity, index or other underlying asset; the quantity or aggregate amount of the holding as measured by par value, notional value or amount, number of contracts or number of units (if applicable); maturity date; coupon rate (if applicable); effective date or issue date (if applicable); market value; percentage weighting in the Disclosed Portfolio; and expiration date (if applicable). The Trust's Web site will also include the current prospectus of the Trust and additional data relating to NAV and other applicable quantitative information. The Web site information will be publicly available at no charge. Pricing for the Index, VSTOXX, the Benchmark, Swap Contracts, cash equivalents, and Money Market Instruments will be available from major market data vendors. Pricing for Futures Contracts will be available from Eurex.

The Exchange will obtain a representation from the Trust that the NAV and the NAV per Share will be calculated daily and that the NAV, the NAV per Share, and the composition of the Disclosed Portfolio will be made available to all market participants at the same time. Further, trading in the Shares will be subject to NYSE Arca Rules 7.12–E and 8.700–E(e)(2)(D), which set forth circumstances under which trading in the Shares may be halted. Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable.[26]

Further, the Reporting Authority that provides the Disclosed Portfolio must implement and maintain, or be subject to, procedures designed to prevent the use and dissemination of material, non-public information regarding the actual components of the portfolio.[27] The Exchange represents that it has a general policy prohibiting the distribution of material, non-public information by its employees.

In support of this proposal, the Exchange has made the following representations:

(1) The Trust will be subject to the criteria in NYSE Arca Rule 8.700–E for initial and continued listing of the Shares.

(2) In the event (a) the Sponsor becomes a broker-dealer or newly affiliated with a broker-dealer, or (b) any new sponsor becomes affiliated with a broker-dealer, such broker-dealer shall erect and maintain a ''fire wall'' around the personnel of the sponsor who have access to information concerning changes and adjustments to the Disclosed Portfolio.[28]

(3) Personnel of the Sponsor who make decisions regarding the composition of the Disclosed Portfolio must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the Disclosed Portfolio.

(4) The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions.

(5) Trading in the Shares will be subject to the existing trading surveillances administered by the Exchange, as well as cross-market surveillances administered by FINRA on behalf of the Exchange, and these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws.[29]

(6) The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares and Futures Contracts with other markets or other entities that are members of the ISG, and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in the Shares and Futures Contracts from such markets or entities. In addition, the Exchange may obtain information regarding trading in the Shares and Futures Contracts from markets or other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain Money Market Instruments held by the Fund reported to FINRA's TRACE.

(7) Prior to the commencement of trading, the Exchange will inform its ETP Holders in an Information Bulletin (''Bulletin'') of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss the following: (a) The procedures for purchases and

[24] *See* NYSE Arca Rule 8.700–E(e)(2).

[25] *See* Amendment No. 3, *supra* note 7, at 6.

[26] These may include: (1) The extent to which trading is not occurring in the underlying futures contracts or swaps; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present.

[27] *See* NYSE Arca Rule 8.700–E(e)(2)(B)(ii).

[28] The Exchange also states that the Sponsor's Code of Ethics and internal controls are designed to prevent and detect improper exchanges of information concerning the composition and/or changes to the Fund's portfolio.

[29] The Exchange states that FINRA conducts cross-market surveillances on behalf of the Exchange pursuant to a regulatory services agreement, and that the Exchange is responsible for FINRA's performance under this regulatory services agreement.

redemptions of Shares (and that Shares are not individually redeemable); (b) NYSE Arca Rule 9.2–E (a), which imposes a duty of due diligence on its ETP Holders to learn the essential facts relating to every customer prior to trading the Shares; (c) the requirement that ETP Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; (d) how information regarding the IOPV and the Disclosed Portfolio is disseminated; (e) the risks involved in trading the Shares during the opening and late trading sessions when an updated IOPV will not be calculated or publicly disseminated; and (f) trading information.

(8) The Exchange represents that, for the initial and continued listing of the Shares, the Trust must be in compliance with NYSE Arca Rule 5.3–E and Rule 10A–3 under the Act.

(9) A minimum of 100,000 Shares will be outstanding at the start of trading on the Exchange.

(10) All statements and representations made in this filing regarding (a) the description of the portfolio of the Fund and Benchmark, (b) limitations on portfolio of the Fund and Benchmark, or (c) the applicability of Exchange listing rules specified in this rule filing shall constitute continued listing requirements for listing the Shares on the Exchange.

(11) In addition, the issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If a Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Rule 5.5–E (m).

This approval order is based on all of the Exchange's representations, including those set forth above and in Amendment No. 3.

IV. Solicitation of Comments on Amendment No. 3 to the Proposed Rule Change

Interested persons are invited to submit written data, views, and arguments concerning whether Amendment No. 3 are consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2017–85 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2017–85. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2017–85, and should be submitted on or before December 8, 2017.

V. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 3

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 3, prior to the thirtieth day after the date of publication of notice of the filing of Amendment No. 3 in the **Federal Register**. Amendment No. 3 supplements the proposed rule change by, among other things: (1) Representing that the VSTOXX levels will be widely disseminated by major market data vendors on a real-time basis throughout each trading day; (2) expanding its representation regarding when the Sponsor would erect a ''fire wall,'' and representing that the Sponsor will maintain the ''fire wall'' it implemented regarding access to information concerning the composition and/or changes to the Fund's portfolio; (3) narrowing the list of the Fund's permitted investments to exclude forwards; (4) supplementing its description of the availability of price information for the Fund's permitted investments; (5) providing information regarding the dissemination of the Trust's NAV; and (6) making representations regarding the Exchange's surveillance of Managed Trust Securities. These changes assisted the Commission in evaluating whether the proposal would be consistent with Section 6(b)(5) of the Act. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[30] to approve the proposed rule change, as modified by Amendment No. 3, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[31] that the proposed rule change (SR–NYSEArca–2017–85), as modified by Amendment No. 3 be, and it hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82065; File No. SR–NASDAQ–2017–117]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Fees at Rule 7036 To Withdraw the Nasdaq Market Analytics Data Package From Sale

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2017, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule

[30] 15 U.S.C. 78s(b)(2).

[31] *Id.*

[32] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees at Rule 7036 to withdraw the Nasdaq Market Analytics Data Package from sale.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to withdraw the Nasdaq Market Analytics Data Package from sale. The Nasdaq Market Analytics Data Package, established in 2006,[3] consists of four products: (i) Market Velocity, (ii) Market Forces, (iii) Competitive Volume Weighted Average Price (VWAP) Benchmark, and (iv) Competitive VWAP Leaders.

Market Velocity and Market Forces are real-time data products. Market Velocity measures the frequency and size of orders submitted to the trading system. Market Forces separates orders into buy and sell categorizes to indicate market direction. Market Velocity and Market Forces may include orders not visible in existing quote and order data feeds.

The Competitive VWAP Benchmark is an intra-day, query-response product that provides the best and worst average price performance by market makers trading on the Nasdaq Market Center execution system. The Benchmark is used to compare the purchaser's trade performance to those benchmarks. Competitive VWAP Leaders is a delayed product that identifies participants with the most experience trading a particular stock or type of stock, ranking participants by share volume, weighted by the difference between market participant VWAP and overall VWAP.

The Exchange proposes to withdraw the Nasdaq Market Analytics Data Package from the market. The Package was introduced in 2006, and has remained basically unchanged since then, notwithstanding substantial changes in technology and analytical techniques over that period. The product has generated little customer interest, and only a small number of customers currently purchase subscriptions.[4]

Recently, customers have inquired about possible modifications to the product. Specifically, customers expressed concern that data contained in the product may reveal too much information about the trading strategies of participants on the Exchange. While the Exchange does not believe that these concerns are well-founded, given that the information content of the product has been stable over time and the number of customer for the product is extremely small, the Exchange continually evaluates the views of its customers in developing and maintaining its product offerings and initiated a review of the product.

Upon such review, the Exchange has determined that modifying the product in keeping with customer requests would not be cost-effective in light of the small amount of revenue that the product generates. Given the age of the product, the small amount of revenue generated, and the cost of modifications, the Exchange has decided to withdraw the product from the market, effective immediately.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[5] in general, and furthers the objectives of Section 6(b)(5) of the Act,[6] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Specifically, the proposed withdrawal of the Nasdaq Market Analytics Data Package will remove a potentially controversial product from the market. In light of the age of the product, the small number of subscribers for that product, the fact that modifying the product would not be cost-effective, and the concerns expressed by some market participants, the Exchange believes that the proposal to remove this product from the market strikes the correct balance to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

The proposed withdrawal of the Nasdaq Market Analytics Data Package is an example of the impact of market forces on the Exchange. Because customers had not purchased the product in sufficient numbers to economically justify further investment, the Exchange decided to discontinue the product. This is precisely how competitive markets operate.

The withdrawal of the Nasdaq Market Analytics Data Package will not impose any burden on competition as the Package will no longer be offered.

[6] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [7] and Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [9] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [10] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. The Commission notes that the Exchange's customers have expressed concern that data contained in the Nasdaq Market Analytics Data Package may reveal too much information about the trading strategies of participants on the Exchange, and have inquired about possible modifications to the product. The Commission also notes that, in light of the age of the product, the small number of subscribers, the cost of modifying the product, and the concerns raised by some market participants, the Exchange has determined to remove the product. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2017–117 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2017–117. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2017–117 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2017–24937 Filed 11–16–17; 8:45 am]

[7] 15 U.S.C. 78s(b)(3)(A).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived this requirement.

[9] 17 CFR 240.19b–4(f)(6).

[10] 17 CFR 240.19b–4(f)(6)(iii).

[11] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[12] 17 CFR 200.30–3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82067; File No. SR–OCC–2015–02]

In the Matter of the Petitions of: Virtu Financial Inc. and Virtu Americas, LLC and Susquehanna International Group, et al.; Order Granting Motion To Substitute Parties and Motion for Extension of Time; Securities Exchange Act of 1934

November 13, 2017.

On November 2, 2017, Virtu Financial Inc. and Virtu Americas LLC (collectively ''Virtu'') filed an Unopposed Motion to Substitute Virtu Financial Inc. and Virtu Americas LLC for Petitioner KCG Holdings, Inc. (''KCG'') pursuant to Rules 102 and 200(d) of the Commission Rules of Practice.[1] In its motion, Virtu represents that it acquired KCG earlier this year and represents the successor in interest to KCG and its subsidiary. Virtu represents that it intends to participate in the matter pertaining to SR–OCC–2015–02 moving forward. Virtu also represents that the motion is unopposed. The Commission believes that it is appropriate to grant the motion.

On November 7, 2017, Petitioners Susquehanna International Group, LLP, BOX Options Exchange, LLC, MIAX International Securities Exchange, LLC, and Virtu, (collectively ''Petitioners'') filed an Unopposed Motion for Extension of Time pursuant to Rule 161 of the Commission Rules of Practice [2] to extend the time previously provided for in the Commission's September 14, 2017 Corrected Order Scheduling Filing

[1] 17 CFR 201.102 and 200(d).

[2] 17 CFR 201.161.

of Statements on Review (''Corrected Order'').[3] The Petitioners represent that the motion is unopposed by the Options Clearing Corporation (''OCC''). The Petitioners also represent that they have entered into a confidentiality agreement with OCC on November 1, 2017 to obtain access to the confidential filings that OCC submitted to the Commission on October 13, 2017 to support OCC's proposed rule change. The Petitioners request an extension of time so that they may review these confidential materials and provide the Commission with informed and deliberate comments. The Petitioners further represent that extending the time for comment would allow them the same amount of time, thirty days, to review the materials as was contemplated by the Corrected Order. Given the unopposed nature of the request and the surrounding facts regarding this matter, the Commission believes that granting the extension will serve the interests of justice.

Accordingly, *it is ordered,* that the Unopposed Motion to Substitute Virtu Financial Inc. and Virtu Americas LLC for Petitioner KCG Holdings, Inc., is hereby *granted;* and

It is further ordered, that the Unopposed Motion for Extension of Time is hereby *granted*. The time for any party or other person to file any additional statement, which may include statements previously submitted or otherwise available, or any new information such party or other person considers relevant, is extended from November 13, 2017 to November 30, 2017.

By the Commission.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82061; File No. SR–BatsEDGA–2017–30]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Its Fees for Physical Ports

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 7, 2017, Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') (formerly known as Bats EDGA Exchange, Inc.) filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members[5] and non-Members of the Exchange pursuant to EDGA Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.markets.cboe.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: $2,000 per physical port that connects to the System[6] via 1 gigabyte circuit; and $6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from $6,000 per month to $7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services.[7] The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain $2,000 per month. The Exchange proposes to implement this amendment to its fee schedule on January 2, 2018.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of

[6] The term ''System'' is defined as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(cc).

[7] The Exchange also proposes a minor technical amendment to change the title of the first column from ''Connection Service Type'' to ''Service''.

[8] 15 U.S.C. 78f.

[9] 15 U.S.C. 78f(b)(4).

connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of $7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC (''Nasdaq'') and NYSE Arca, Inc. (''Arca''), which range from $10,000–$15,000 per month for 10 gigabyte circuits.[10]

[10] *See* Nasdaq Rule 7034(b) *and* the NYSE Arca fee schedule *available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf* (dated October 11, 2017).

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[11] and paragraph (f) of Rule 19b–4 thereunder.[12] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

[11] 15 U.S.C. 78s(b)(3)(A).

[12] 17 CFR 240.19b–4(f).

- Send an email to *rule-comments@sec.gov.* Please include File No. SR–BatsEDGA–2017–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BatsEDGA–2017–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–BatsEDGA–2017–30 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82064; File No. SR–BatsEDGX–2017–46]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Its Fees for Physical Ports as They Relate to the Exchange's Equity Options Platform

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 2, 2017, Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') (formerly known as Bats EDGX Exchange, Inc.) filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members [5] and non-Members of the Exchange pursuant to EDGX Rules 15.1(a) and (c) to modify its fees for physical ports as they apply to the Exchange's equity options platform (''EDGX Options'').

The text of the proposed rule change is available at the Exchange's Web site at *www.markets.cboe.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: $2,000 per physical port that connects to the System [6] via 1 gigabyte circuit; and $6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from $6,000 per month to $7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services.[7] The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain $2,000 per month. The Exchange proposes to implement this amendment to its fee schedule on January 2, 2018.

[6] The term ''System'' is defined as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(cc).

[7] The Exchange also proposes two minor technical amendments to this section of its fee schedule. First is to change the word ''Connection'' to ''Connectivity'' in the section's title. The second is to change references to ''G'' for gigabyte to ''Gb''.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of

[8] 15 U.S.C. 78f.

[9] 15 U.S.C. 78f(b)(4).

reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of $7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC (''Nasdaq'') and NYSE Arca, Inc. (''Arca''), which range from $10,000–$15,000 per month for 10 gigabyte circuits.[10]

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [11] and paragraph (f) of Rule 19b–4 thereunder.[12] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–BatsEDGX–2017–46 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BatsEDGX–2017–46. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–BatsEDGX–2017–46 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82057; File No. SR–BatsEDGX–2017–48]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for Its Recently Adopted Functionality for the Handling of Complex Orders on Its Equity Options Platform

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2017, Cboe EDGX Exchange, Inc. (formerly known as Bats EDGX Exchange, Inc.) (''EDGX'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to

Members[5] and non-Members of the Exchange pursuant to EDGX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.markets.cboe.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify the Fee Schedule applicable to the Exchange's equity options platform (''EDGX Options'') to adopt fees for its recently adopted functionality for the handling of complex orders on EDGX Options.[6]

The Exchange proposes to adopt twelve new fee codes in connection with this new complex order functionality, which would be added to the Fee Codes and Associated Fees table of the Fee Schedule. These fee codes represent the fees applicable to complex orders, as described below. In addition, the Exchange proposes to adopt new footnote 8, which would again summarize complex order fees and rebates in a table form and would provide additional details regarding the applicability of such fees and rebates. In particular, the proposed tables for footnote 8 highlight that the proposed fees and rebates for complex orders vary depending on the contra-party for each transaction. Finally, the Exchange proposes a change to the Marketing Fees section of the Fee Schedule in connection with this proposal.

Customer Pricing for Transactions on Complex Order Book

The Exchange proposes to adopt three fee codes for Customer[7] complex orders that trade on the EDGX Options complex order book (''COB''), fee codes ZA, ZB, and ZC. As proposed, the Exchange would apply fee code ZA to Customer complex orders that are executed on the COB with a non-Customer[8] as the contra-party in Penny Pilot Securities[9] and would provide such orders a rebate of $0.47 per contract. The Exchange would apply fee code ZB to Customer complex orders that are executed on the COB with a non-Customer as the contra-party in Non-Penny Pilot Securities[10] and would provide such orders a rebate of $0.97 per contract. The Exchange would apply fee code ZC to Customer complex orders that are executed on the COB with another Customer as the contra-party and would not assess a fee or provide any rebate for such orders. There is no proposed distinction between pricing for such orders in Penny Pilot Securities and Non-Penny Pilot Securities.

Market Maker Pricing—Customer as Contra-Party

The Exchange proposes to adopt two fee codes for Market Maker[11] complex orders that trade on the COB against Customer orders, fee codes ZM and ZN. As proposed, the Exchange would apply fee code ZM to Market Maker complex orders that are executed on the COB with a Customer as the contra-party in Penny Pilot Securities and would charge such orders a fee of $0.50 per contract. The Exchange would apply fee code ZN to Market Maker complex orders that are executed on the COB with a Customer as the contra-party in Non-Penny Pilot Securities and would charge such orders a fee of $1.10 per contract.

Other Non-Customer Pricing—Customer as Contra-Party

Next, the Exchange proposes to adopt two fee codes for non-Customer/non-Market Maker complex orders that trade on the COB against Customer orders, fee codes ZT and ZR. The origin codes included in the category of non-Customer/non-Market Maker include: Professional,[12] Firm,[13] Broker Dealer,[14] Joint Back Office,[15] and Away Market Maker.[16]

As proposed, the Exchange would apply fee code ZT to non-Customer/non-Market Maker complex orders that are executed on the COB with a Customer as the contra-party in Penny Pilot Securities and would charge such orders a fee of $0.50 per contract. The Exchange would apply fee code ZR to non-Customer/non-Market Maker complex orders that are executed on the COB with a Customer as the contra-party in Non-Penny Pilot Securities and would charge such orders a fee of $1.10 per contract. The Exchange notes that while the pricing for non-Customer/non-Market Maker orders executed on the COB with Customer orders as contra-party is the same as that proposed for Market Maker orders executed on the COB with Customer orders as contra-party, the Exchange believes it is necessary to create different fee codes in order to maintain the ability to later differentiate such pricing, for instance to encourage Market Maker participate on the COB.

Non-Customer Pricing—Non-Customer as Contra-Party

Finally, the Exchange proposes to adopt four fee codes to cover all transactions between non-Customers (including Market Makers) on the COB, fee codes ZF, ZG, ZH, and ZJ. In contrast to the fee codes described above, all of which involve a Customer

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

[6] *See* Securities Exchange Act Release No. 81891 (October 17, 2017) (SR–BatsEDGX–2017–29) (order approving rules for EDGX complex order book).

[7] ''Customer'' applies to any transaction identified by a Member for clearing in the Customer range at the OCC, excluding any transaction for a Broker Dealer or a ''Professional'' as defined in Exchange Rule 16.1. *See* the Exchange's Fee Schedule *available at: https://markets.cboe.com/us/options/membership/fee_schedule/edgx/.*

[8] ''Non-Customer'' applies to any transaction that is not a Customer order. *Id.*

[9] ''Penny Pilot Securities'' are those issues quoted pursuant to Exchange Rule 21.5, Interpretation and Policy .01. *Id.*

[10] The term ''Non-Penny Pilot Security'' applies to those issues that are not Penny Pilot Securities quoted pursuant to Exchange Rule 21.5, Interpretation and Policy .01.

[11] ''Market Maker'' applies to any transaction identified by a Member for clearing in the Market Maker range at the OCC, where such Member is registered with the Exchange as a Market Maker as defined in Rule 16.1(a)(37). *See* the Exchange's Fee Schedule *available at: https://markets.cboe.com/us/options/membership/fee_schedule/edgx/.*

[12] ''Professional'' applies to any transaction identified by a Member as such pursuant to Exchange Rule 16.1. *Id.*

[13] ''Firm'' applies to any transaction identified by a Member for clearing in the Firm range at the OCC, excluding any Joint Back Office transaction. *Id.*

[14] ''Broker Dealer'' applies to any order for the account of a broker dealer, including a foreign broker dealer, that clears in the Customer range at the Options Clearing Corporation (''OCC''). *Id.*

[15] ''Joint Back Office'' applies to any transaction identified by a Member for clearing in the Firm range at the OCC that is identified with an origin code as Joint Back Office. A Joint Back Office participant is a Member that maintains a Joint Back Office arrangement with a clearing broker-dealer. *Id.*

[16] ''Away Market Maker'' applies to any transaction identified by a Member for clearing in the Market Maker range at the OCC, where such Member is not registered with the Exchange as a Market Maker, but is registered as a market maker on another options exchange. *Id.*

on one side of the transaction occurring on the COB, for non-Customer to non-Customer transactions (including transactions involving Market Makers), the Exchange proposes to vary fees depending on which party to the transaction added liquidity and which party to the transaction removed liquidity. As proposed, the Exchange would apply fee code ZF to non-Customer complex orders executed on the COB that add liquidity in Penny Pilot Securities and do not have a Customer contra-party, and would charge such orders a fee of $0.10 per contract. The Exchange would apply fee code ZG to non-Customer complex orders executed on the COB that remove liquidity in Penny Pilot Securities and do not have a Customer contra-party, and would charge such orders a fee of $0.47 per contract. The Exchange would apply fee code ZH to non-Customer complex orders executed on the COB that add liquidity in Non-Penny Pilot Securities and do not have a Customer contra-party, and would charge such orders a fee of $0.10 per contract. Last, the Exchange would apply fee code ZJ to non-Customer complex orders executed on the COB that remove liquidity in Non-Penny Pilot Securities and do not have a Customer contra-party, and would charge such orders a fee of $0.75 per contract.

Pricing for ''Leg'' Transactions

As described in Rule 21.20, in addition to complex orders executing against other complex orders on the COB, complex orders will, in certain circumstances instead ''leg'' into the EDGX Options Simple Book [17] and execute against interest resting on the Simple Book. In addition to the pricing proposed above, the Exchange proposes to adopt fee code ZD, which would be applicable to Customer complex orders that are not executed on the COB but instead leg into the Simple Book. The Exchange does not propose to assess a fee or provide any rebate for such orders. The Exchange notes that a Customer order on the Simple Book is currently provided a standard rebate of $0.05 per contract, subject to pricing incentives that may result in higher rebates.

Other than the proposed fee code specific to Customer complex orders that leg into the Simple Book, fee code ZD, as described above, the Exchange does not propose to adopt any specific pricing for complex orders that leg into the Simple Book. Instead, the Exchange proposes to apply standard pricing applicable to transactions on the Simple Book for complex orders that leg into the Simple Book. For instance, the Exchange currently applies fee code PT to Market Maker orders that remove liquidity from EDGX Options in Penny Pilot Securities and charges a standard fee of $0.19 per contract for such orders, subject to tiered pricing incentives offered by the Exchange as described in footnote 3 of the Fee Schedule. The Exchange proposes to apply fee code PT to Market Maker complex orders that leg into the Simple Book and remove liquidity and does not propose to change the pricing with respect to fee code PT. Accordingly, the Exchange proposes to state in proposed footnote 8 that with the exception of fee code ZD, standard fee codes shall apply for orders that leg into the Simple Book.

Other Changes

As discussed above, in addition to setting forth the proposed fees and rebates in the Fee Codes and Associated Fees table, the Exchange proposes to adopt footnote 8 to again summarize fees and rebates for complex orders in a table form that is organized differently in order to provide clarity to market participants. Footnote 8 would be organized similar to existing footnotes on the Fee Schedule and would first make clear that the footnote is applicable to the following twelve fee codes: ZA, ZB, ZC, ZD, ZM, ZN, ZT, ZR, ZF, ZG, ZH, and ZJ, and that the rates provided in the tables apply to executions on the Exchange's complex order book. The footnote would then re-state the fees applicable to complex orders, including the statement described above that other than fee code ZD, standard fee codes shall apply for orders that leg into the Simple Book as well as the proposed inclusion of the definition of the term ''Simple Book'' from Rule 21.20.

The first proposed table would represent fees for an order that interacts with a Customer order with three rows for each origin code or set of origin codes that yields a different fee code when interacting with a Customer Order: (i) Customer; (ii) Market Maker; and (iii) Professional Customer (or ''Pro''), Firm, Broker Dealer (or ''BD''), Joint Back Office (or ''JBO''), and Away Market Maker. The table would then have four columns, first a pair of columns to provide the fee code and rate for Penny Pilot Securities and second a pair of columns to provide the fee code and rate for Non-Penny Pilot Securities.

The second proposed table would represent fees for an order that interacts with a Non-Customer order with three rows for each origin code or set of origin codes that yields a different fee code when interacting with a Non-Customer Order, with the additional detail that for the two Non-Customer groupings the distinction is between an order that adds liquidity and an order that removes liquidity. Thus, the table would have the following rows: (i) Customer; (ii) Non-Customer Add; and (iii) Non-Customer Remove. The table would then again have four columns, first a pair of columns to provide the fee code and rate for Penny Pilot Securities and second a pair of columns to provide the fee code and rate for Non-Penny Pilot Securities.

The fee codes and rates included in each table of proposed footnote 8 are the same as proposed and described above but the Exchange believes that presenting them in a table format will assist market participants in understanding the rates applicable to executions on the COB.

Marketing Fees

The Fee Schedule currently contains a section entitled ''Marketing Fees'' that specifies that marketing fees are charged to all Market Makers who are counterparties to a trade with a Customer. In connection with the adoption of fees applicable to complex orders, the Exchange proposes to specify that marketing fees shall not apply to executions of complex orders on the COB.

Implementation Date

The Exchange proposes to implement the proposed changes immediately.[18]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6 of the Act.[19] Specifically, the Exchange believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[20] in that it provides for the equitable allocation of reasonable dues, fees and other charges among Members and other persons using any facility or system

[17] As defined in Rule 21.20, the Simple Book is the Exchange's regular electronic book of orders. The Exchange notes that it proposes to include this definition in proposed footnote 8 for clarity.

[18] The Exchange initially filed the proposed rule changes on October 23, 2017 (SR–BatsEDGX–2017–42). On October 31, 2017 the Exchange withdrew SR–BatsEDGX–2017–42 and then subsequently submitted this filing (SR–BatsEDGX–2017–48).

[19] 15 U.S.C. 78f.

[20] 15 U.S.C. 78f(b)(4).

which the Exchange operates or controls.

The Exchange's proposal establishes fees and rebates regarding complex orders, which is new functionality adopted by the Exchange.[21] The Exchange's launch of a complex order book is a competitive offering, and believes that its proposed pricing will allow the Exchange to recoup the costs associated with developing the COB while also incentivizing its use.

In sum, the Exchange believes that the proposed fee and rebate structure is designed to promote the entry of complex orders to the Exchange and, in particular, to attract Customer liquidity, which benefits all market participants by providing additional trading opportunities. This attracts liquidity providers and an increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow originating from other market participants.

Moreover, the Exchange believes that charging market participants, other than Customers, a higher effective rate for complex order transactions is reasonable, equitable, and not unfairly discriminatory because these types of market participants are more sophisticated and have higher levels of order flow activity and system usage. Facilitating this level of trading activity requires a greater amount of system resources than that of Customers, and thus, generates greater ongoing operational costs for the Exchange. The proposed fees and rebates, which are further discussed below, will allow the Exchange to promote and maintain the COB, which is beneficial to market participants.

With respect to the proposal to adopt a rebate for Customer orders that interact with non-Customer orders on the COB, the Exchange believes this is reasonable because it encourages participation on the COB by entry of Customer orders to the Exchange. The rebate for Customer complex orders is designed to encourage Customer orders entered into the Exchange, which is reasonable for the reasons further discussed below. The proposed fees for Market Maker orders and other non-Customer complex orders that trade with Customer orders are also reasonable because the associated revenue will allow the Exchange to promote and maintain the COB, and continue to enhance its services.

Providing Customers a rebate for complex orders, while assessing Non-Customers a fee for complex orders, is reasonable because of the desirability of Customer activity. The proposed new fees and rebates for complex orders are generally intended to encourage greater Customer trade volume to the Exchange. Customer activity enhances liquidity on the Exchange for the benefit of all market participants and benefits all market participants by providing more trading opportunities, which attracts market makers and other liquidity providers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The practice of incentivizing increased Customer order flow through a fee and rebate schedule in order to attract professional liquidity providers is, and has been, commonly practiced in the options markets, and the Exchange.[22] The proposed fee and rebate schedule similarly attracts Customer order flow. Other competing exchanges offer different fees and rebates for orders executed on behalf of different market participants (*i.e.,* orders with different origin codes).[23] Other competing exchanges also charge different rates for transactions on their complex order books for customers versus their non-customers in a manner similar to the proposal, including the provision of rebates to customers.[24]

The fee and rebate schedule as proposed continues to reflect differentiation among different market participants typically found in options fee and rebate schedules.[25] The Exchange believes that the differentiation is reasonable and notes that unlike others (*e.g.,* Customers) some market participants like EDGX Options Market Makers commit to various obligations. For example, transactions of an EDGX Options Market Maker must constitute a course of dealings reasonably calculated to contribute to the maintenance of a fair and orderly market, and Market Makers should not make bids or offers or enter into transactions that are inconsistent with such course of dealings.[26] Further, all Market Makers are designated as specialists on EDGX Options for all purposes under the Act or rules thereunder.[27]

Establishing a rebate for Customer orders and a fee for Non-Customer Orders is also equitable and not unfairly discriminatory. This is because the Exchange's proposal to provide rebates and assess fees will apply the same to all similarly situated participants. Moreover, all similarly situated complex orders are subject to the same proposed Fee Schedule, and access to the Exchange is offered on terms that are not unfairly discriminatory. In addition, the proposed fee for complex orders is equitable and not unfairly discriminatory because, while other market participants (Non-Customers) will be assessed a fee, Customers will receive a rebate because an increase in Customer order flow will bring greater volume and liquidity, which benefits all market participants by providing more trading opportunities and tighter spreads.

Similarly, the Exchange believes that fees include different rates for Penny Pilot Securities and Non-Penny Pilot Securities is well-established in the options industry, including on the Exchange's current fee schedule.[28] The Exchange believes it is reasonable, equitably allocated and non-discriminatory to impose higher fees and provide higher rebates in Non-Penny Pilot Securities than Penny Pilot Securities because Penny Pilot Securities and Non-Penny Pilot Securities have different liquidity, spread and trading characteristics. In particular, spreads in Penny Pilot Securities are tighter than those in Non-Penny Pilot Securities (which trade in increments of $0.05 or greater). The wider spreads in Non-Penny Pilot Securities allow for greater profit potential.

With respect to the fees applicable to non-Customer complex orders, the Exchange believes the proposed fees are reasonable and equitably allocated as they are similar to fees charged on the Exchange for certain other orders executed, such as orders executed through the Bats Auction Mechanism (''BAM''), and on other options exchanges, and because the associated revenue will allow the Exchange to maintain and enhance its services. The proposed fees are not unreasonably discriminatory as compared to Customer orders for the reasons described above, and vis-à-vis other non-Customers

[21] *See supra,* note 6.

[22] *See* the Exchange's Fee Schedule, *available at: https://markets.cboe.com/us/options/membership/fee_schedule/edgx/; see also, e.g.,* MIAX Fee Schedule, NYSE Amex Options Fee Schedule.

[23] *Id.*

[24] *Id.*

[25] *Id; see also, e.g.,* MIAX Fee Schedule, NYSE Amex Options Fee Schedule, BX Options Fee Schedule and Nasdaq Options Market Fee Schedule.

[26] *See* Exchange Rule 22.5, entitled ''Obligations of Market Makers''.

[27] *See* Exchange Rule 22.2, entitled ''Options Market Maker Registration and Appointment''.

[28] *See* the Exchange's Fee Schedule, *available at: https://markets.cboe.com/us/options/membership/fee_schedule/edgx/; see also, e.g.,* MIAX Fee Schedule, NYSE Amex Options Fee Schedule.

because all types of non-Customers will be charged identical fees as proposed.

The Exchange also believes the proposed fees are reasonable, equitably allocated and not unreasonably discriminatory despite a proposed distinction between fees for non-Customer complex orders that add liquidity and those that remove liquidity. The Exchange currently applies this distinction to Market Maker orders on the Simple Book, and this pricing structure, the ''make-take'' pricing structure, is common on other options exchanges as well.[29] The make-take pricing structure is designed to incentivize market participants to provide liquidity on an exchange, and such liquidity in turn, benefits all market participants. Thus, the proposal to charge a higher rate to Non-Customer orders that remove liquidity than those that add liquidity is reasonable, equitably allocated and not unreasonably discriminatory despite a proposed distinction between orders that add liquidity and those that remove liquidity.

With respect to the Customer against Customer transactions, establishing no Customer fee or rebate for either side of the transaction is also reasonable, equitably allocated and not unreasonably discriminatory because it still encourages the entry of Customer orders to the Exchange while treating, from the Exchange's perspective, each side of the order neutrally rather than providing one Customer a rebate but charging another Customer a fee. Similarly, providing that Customer orders that leg into the Simple Book will be executed without application of any fee and rebate is reasonable, equitably allocated, and not unreasonably discriminatory because it provides fee certainty to Customer orders, as such orders are guaranteed to either pay no fee or to receive a rebate, again encouraging the entry of Customer orders to the Exchange.

In connection with the adoption of fees applicable to complex orders, the Exchange proposes to modify the description of Marketing Fees applicable on the Exchange to make clear that such fees do not apply to complex orders. The Exchange believes this proposal is a reasonable and equitable allocation of fees and dues and is not unreasonably discriminatory because the proposed initial rates for Market Makers on the complex order book are designed to be consistent with pricing with other non-Customers and adding an additional marketing fee to Market Maker transactions would instead increase such rates to a level higher than that paid by other non-Customers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rebate would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed pricing for complex orders represents a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Rather, the Exchange believes the proposal will enhance competition as it is a competitive proposal that seeks to further the growth of the Exchange by encouraging Members to enter complex orders.

The Exchange's proposal to adopt complex order functionality was a competitive response to complex order books operated by other options exchanges. The Exchange believes this proposed rule change is necessary to permit fair competition among the options exchanges. The Exchange anticipates that the COB will create new opportunities for EDGX to attract new business to the Exchange. While the proposed fees and rebates are intended to attract participation on the Exchange, particularly complex orders, the Exchange does not believe that its proposed pricing significantly departs from pricing in place on other options exchanges that accept complex orders. Accordingly, the Exchange does not believe that the proposal creates an undue burden on inter-market competition.

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe that its proposal to establish fees and rebates for complex orders will impose any burden on competition, as discussed below.

The Exchange operates in a highly competitive market in which many sophisticated and knowledgeable market participants can readily and do send order flow to competing exchanges if they deem fee levels or rebate incentives at a particular exchange to be excessive or inadequate. Additionally, new competitors have entered the market consistently in recent years. These market forces ensure that the Exchange's fees and rebates remain competitive with the fee structures at other trading platforms. In that sense, the Exchange's proposal is actually pro-competitive because the Exchange is simply establishing rebates and fees in order to remain competitive in the current environment.

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the proposed charges assessed and credits available to member firms in respect of complex orders do not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition. If the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result and/or will be unable to attract participants to the COB. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets. Additionally, the changes proposed herein are pro-competitive to the extent that they allow the Exchange to promote and maintain the COB, which has the potential to result in efficient executions to the benefit of market participants.

The Exchange believes that the proposed change would increase both inter-market and intra-market competition by incentivizing members to direct their orders, and particularly Customer orders, to the Exchange, which benefits all market participants by providing more trading opportunities, which attracts Market Makers. To the extent that there is a differentiation between proposed fees assessed and rebates offered to Customers as opposed to other market participants, the Exchange believes that

[29] *See* the Exchange's Fee Schedule, *available at: https://markets.cboe.com/us/options/membership/fee_schedule/edgx/; see also, e.g.,* MIAX Fee Schedule, BX Options Fee Schedule and Nasdaq Options Market Fee Schedule.

this is appropriate because the fees and rebates should incentivize Members to direct additional order flow to the Exchange and thus provide additional liquidity that enhances the quality of its markets and increases the volume of contracts traded on the Exchange. To the extent that this purpose is achieved, all the Exchange's market participants should benefit from the improved market liquidity. Enhanced market quality and increased transaction volume that results from the anticipated increase in order flow directed to the Exchange will benefit all market participants and improve competition on the Exchange. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive.

As noted above, while the Exchange has proposed to establish different fee codes for Market Maker complex orders that interact with Customer orders on the COB and other non-Customer complex orders that interact with Customer orders on the COB, the Exchange has not proposed to differentiate the pricing applicable to these fee codes at this time.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [30] and paragraph (f) of Rule 19b–4 thereunder.[31] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGX–2017–48 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsEDGX–2017–48. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGX–2017–48, and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82055; File No. SR–OCC–2017–805]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Advance Notice Concerning the Use of the Society of Worldwide Interbank Financial Telecommunication Messaging Network in OCC's Cash Settlement Process

November 13, 2017.

Pursuant to Section 806(e)(1) of Title VIII of the Dodd–Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) of the Securities Exchange Act of 1934 (''Act''),[2] notice is hereby given that on October 10, 2017, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') an advance notice as well as a proposed cash settlement agreement procedures agreement (''CSPA'') template as described in Items I and II below, which Items have been prepared by OCC. The Commission is publishing this notice to solicit comments on the advance notice from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

In accordance with Section 806(e)(1) of the Clearing Supervision Act [3] and Rule 19b–4(n)(1)(i) [4] of the Act,[5] this advance notice is filed by OCC in connection with proposed changes to improve OCC's cash settlement process by implementing Society of Worldwide Interbank Financial Telecommunication (''SWIFT'') messaging as the primary means of transmitting daily cash settlement instructions between OCC and its Clearing Banks.[6] The proposed change is designed to: (1) Increase the efficiency, accuracy, and resiliency of OCC's cash settlement process, (2) eliminate certain risks associated with the current use of OCC's proprietary online cash settlement system within the ENCORE clearing system (''OCS''), and (3) adopt communication procedures and standards that are internationally accepted and therefore

[6] *See OCC Rule 101.C.(1) (defining the term ''Clearing Bank'').*

are consistent with the requirements in Rule 17Ad–22(e)(22).[7]

All terms with initial capitalization that are not otherwise defined herein have the same meaning as set forth in the OCC By-Laws and Rules.[8]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the advance notice and discussed any comments it received on the advance notice. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections A and B below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants or Others

Communications With Clearing Banks

There are currently eight banks or trust companies that act as OCC Clearing Banks.[9] The Clearing Banks were first informed in early 2016 via phone communications regarding OCC's initiative to utilize SWIFT messaging and the SWIFT network for cash settlement processing. This initiative was positively received by existing Clearing Banks since they utilize SWIFT-based messaging in other areas of their businesses. Moreover, several Clearing Banks have informally expressed their desire to OCC in the past for OCC to integrate use of the SWIFT messaging network in the cash settlement process.

Beginning in October 2016, OCC distributed a draft template cash settlement procedures agreement to all Clearing Banks that would implement SWIFT messaging as the primary means of transmitting daily cash settlement instructions between OCC and the Clearing Banks along with a request for feedback. In response, all of the existing Clearing Banks have expressed support for the transition to SWIFT. This is in part because the existing use of OCC's online cash settlement system is not integrated with the internal systems used by Clearing Banks for processing settlement instructions. Processing the settlement instructions therefore requires manual intervention by the Clearing Banks to enter the instructions into their own systems. According to comments from all Clearing Banks, this lack of integration elongates the timeframe to process and approve settlement instructions, which causes delays and increases the risk of errors in preparing, posting, transmitting, receiving, and executing timely settlement instructions.

Following the receipt of questions and comments, OCC began negotiating the cash settlement procedures agreement with each Clearing Bank based on the standardized template. The definitive documentation between OCC and each Clearing Bank is expected to be consistent with the template agreement, however, areas of negotiation to date have generally included such matters as acceptable backup communication methods for transmitting settlement instructions (*e.g.,* facsimile, email, or other means), standards of care associated with duties and potential liabilities under the agreement (*e.g.,* negligence, gross negligence, or willful misconduct), certain defined terms (*e.g.,* the meaning of a ''business day''), and allocations of responsibility regarding the detection of errors associated with settlement instructions.

(B) Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing, and Settlement Supervision Act

Description of the Proposed Change

Background

The Existing Online Cash Settlement System

In connection with OCC's performance of clearance and settlement services for cleared contracts[10] and Stock Loans, OCC and Clearing Members are obligated under OCC's By-Laws and Rules to perform cash settlement of related obligations.[11] This cash settlement process is facilitated by Clearing Banks, which are banks or trust companies that have entered agreements with OCC to settle on behalf of Clearing Members and at which OCC and Clearing Members each maintain accounts.[12] Currently, there are eight Clearing Banks with which OCC effects cash settlements through OCS, which is a proprietary web-based system OCC developed in conjunction with the gradual phase-in of its ENCORE clearing system in the early- to-mid 2000's.[13] OCS replaced OCC's previous cash settlement system, the Options Automated Settlement Instructions System, which required the use of dedicated terminals at each Clearing Bank. Because OCS is a web-based system, it provides greater flexibility to OCC and Clearing Banks because users are not limited to only using dedicated terminals to access the system.

On a daily basis, OCC generates settlement instructions associated with Cleared Contracts and Stock Loans of Clearing Members by running specific predefined settlement profiles[14] throughout the day. The resulting settlement instructions are generally transmitted by OCC to Clearing Banks by way of OCS, at which point the Clearing Banks are able to view batches of settlement instructions within OCS.[15] Clearing Bank staff review the settlement instructions by logging into OCS and opening the settlement batch. Thereafter, the Clearing Bank either approves or rejects the settlement instructions in OCS. One of the Clearing Banks, however, currently does not utilize OCS as its primary means of effecting cash settlement. Instead, the Clearing Bank primarily receives settlement instructions from OCC via facsimile, reviews the settlement instructions, approves or rejects them, and then returns a facsimile confirmation to OCC. After receipt of the confirmation, OCC staff manually enters the approvals or rejections into OCS.

Cash settlement instructions that OCC transmits to Clearing Banks are generally categorized in two groups: Start-of-day and intra-day. Start-of-day settlement instructions are generated through OCC's nightly processing cycle and relate to cash settlement obligations that arise from Cleared Contracts and Stock Loans of Clearing Members, including, but not limited to, premium payments, margin requirements, mark-to-market activity, and cash settlement amounts for exercised options that are cash settled. Intra-day settlement

[9] OCC Rule 101.C.(1) defines the term ''Clearing Bank'' to mean ''a bank or trust company which has entered into an agreement with [OCC] in respect of settlement of confirmed trades on behalf of Clearing Members.''

[10] *See* Article I., Section 1.C.(11).

[11] *See, e.g.,* Article I, Section 1.S.(16) of OCC's By-Laws (defining the term ''settlement time''); Article VI, Sections 4 and 6 of OCC's By-Laws (addressing obligations of Purchasing Clearing Members and obligations of OCC as a central counterparty); and Chapter V of OCC's Rules (regarding daily cash settlement).

[12] *See* OCC Rule 101.C.(1) (defining the term ''Clearing Bank'').

[13] *See generally* OCC Completes Second Major Installation of Encore™ Clearing System(November 25, 2002), *available at https://www.theocc.com/about/newsroom/releases/2002/11_25.jsp.*

[14] Predefined settlement profiles are programmed to track various types of obligations to pay or collect cash in connection with Cleared Contracts and Stock Loans that are in turn used to generate settlement instructions.

[15] A settlement batch is a set of individual debit or credit settlement instructions that may either instruct a Clearing Bank to move funds to or from an OCC settlement account or to or from a Clearing Member's account at the same Clearing Bank.

instructions represent any settlement instruction other than a start-of-day instruction and may be transmitted by OCC to a Clearing Bank throughout the day. For example, intra-day settlement instructions may be generated to credit excess cash to a Clearing Member in connection with its margin requirement,[16] to complete a cash substitution regarding a Clearing Member's margin deposit or to effect an intra-day margin call that OCC may issue to a Clearing Member pursuant to its authority under Rule 609.[17] The settlement timeline for processing intra-day settlement instructions depends on the time at which the Clearing Bank receives the instructions, as discussed below.

Existing Cash Settlement Procedures Agreements

Each Clearing Bank entered into a CSPA with OCC that details the substantive rights and responsibilities of the parties and specifies operational procedures for which they are responsible regarding start-of-day and intra-day settlement instructions. This includes prescribed communication methods and settlement procedures and generally contemplates the use of OCS as the primary means to facilitate the cash settlement process, with the exception of the one instance described above in which the primary means of communication between OCC and the Clearing Bank is facsimile.

For start-of-day settlement instructions, the CSPA requires the Clearing Bank on the morning of each business day and by a standard time to access OCS and act upon the settlement instructions transmitted by OCC. Once the Clearing Bank reviews the settlement instructions, it either accepts or rejects each instruction through OCS.[18] If an instruction is to be rejected, the Clearing Bank must immediately notify OCC in advance by telephone that it intends to reject the instruction and provide the reason. OCC then has an opportunity to submit a revised settlement instruction by telephone or other mutually agreed upon means. All settlement instructions must be acted upon by the Clearing Bank before a defined settlement time, which differs for credit instructions (*i.e.,* transfers of funds from an OCC account to a Clearing Member account) and debit instructions (*i.e.,* transfers of funds from a Clearing Member account to an OCC account). If a Clearing Bank does not expressly accept or reject a settlement instruction by the specified settlement time, the bank is deemed to have accepted the instruction.

For intra-day settlement instructions, OCC transmits the instructions through OCS for the Clearing Bank to review and then notifies the Clearing Bank by telephone or other agreed upon means. With respect to Clearing Banks with access to OCS, the Clearing Bank must then use commercially reasonable efforts to access OCS immediately and act upon the settlement instruction by the earlier of either: (a) Thirty (30) minutes following the time the bank first views the settlement instruction in OCS or (b) sixty (60) minutes after OCC notifies the Clearing Bank that is has submitted settlement instructions via OCS. The same provisions related to backup procedures, acceptance, rejection, and implied acceptance for morning settlement also apply to such intra-day settlement instructions.

Proposed Changes

Under the Proposed CSPA, OCC and all Clearing Banks would use the SWIFT network as the primary means of transmitting settlement instructions to each other, and Clearing Bank staff would no longer log in to OCS and accept or reject settlement instructions. OCC would, however, continue using OCS for more limited purposes to manage its settlement instruction processing, including with respect to the initiation, processing, and tracking of settlement instructions. Under the new process in which SWIFT would be the primary means of transmitting settlement instructions, OCC would integrate OCS with the SWIFT network, and SWIFT would be used to communicate settlement instructions to Clearing Banks and allow Clearing Banks to approve settlement instructions. OCC would also implement a new monitoring screen to complement OCS that would allow OCC to track the lifecycle of all SWIFT messages sent or received by OCC in connection with its cash settlement activities.

SWIFT would not be a new communication channel for OCC even though the proposed change would increase the extent to which OCC utilizes the SWIFT messaging network in connection with its clearance and settlement activities. This is because Clearing Members may currently deposit letters of credit denominated in U.S. dollars issued by banks or trust companies approved by OCC as margin assets[19] and the issuer of any such letter of credit submits amendments to OCC using the SWIFT network. OCC manages this process through a SWIFT system that interfaces with OCC's ENCORE clearing system so that OCC is able to track and process the amendment messages. Under the proposed change, OCC would also use the same SWIFT system to support cash settlement processing. Based upon settlement profiles created by OCC, settlement instructions in the form of SWIFT messages would be automatically transmitted to Clearing Banks over the SWIFT network. In response, OCC would then receive acceptances from Clearing Banks via the SWIFT network. If an acceptance is not provided, OCC would have discretion to treat a settlement instruction as rejected, and in any case would promptly contact the Clearing Bank to determine the reason and coordinate with the Clearing Bank to ensure that appropriate action is taken with respect to the instruction.

OCC believes the proposed change would significantly increase the resiliency of OCC's cash settlement process by reducing manual processing steps that are more prone to error. For example, upon a Clearing Bank's acceptance of a settlement instruction sent by OCC using SWIFT, debits or credits, as appropriate, would be automatically made as between OCC's account at the Clearing Bank and the Clearing Member's account at the Clearing Bank. This means that Clearing Banks would no longer need to view settlement instructions in OCS and manually enter them into their systems to effect them as they do today. Moreover, use of the SWIFT network would eliminate facsimile, telephone, and email communications as primary communication methods for settlement processing. If SWIFT is unavailable, OCC and Clearing Banks would communicate by using contingency methods as specified in the applicable CSPA.

The Proposed CSPA would also introduce significant efficiencies to OCC's cash settlement process by reducing manual processing steps that elongate the time frame for processing and approving settlement instructions. Notably, OCC expects significantly faster response times from Clearing Banks because the banks would be able to communicate with OCC using the same SWIFT transmission method that they already typically use to process funds transfer instructions. OCC believes that efficiencies and time savings would also be experienced by

[16] *See* OCC Rule 608 (Withdrawals of Margin).

[17] *See* OCC Rule 609 (Intra-Day Margin).

[18] In the event OCS is unavailable, the CSPA specifies backup procedures, which may include transmission by telephone or facsimile.

[19] *See* OCC Rule 604(c).

significantly reducing manual steps associated with the processing of settlement instructions, such as manual data entry by Clearing Banks to enter settlement instruction information into their own systems based on computer printouts of instructions contained in OCS or instructions that are received by facsimile. In addition, the proposed change would allow Clearing Banks to forward SWIFT messages from OCC to internal staff at the Clearing Bank who have responsibility for the cash settlement process.

The Proposed CSPA would also harmonize the primary process by which OCC performs cash settlement with Clearing Banks by having all Clearing Banks use the SWIFT messaging system. In addition to the efficiency and risk mitigation benefits described above, the Proposed CSPA would directly respond to the Clearing Bank requests for OCC to implement an enhanced process to mitigate the manual processing challenges that are associated with the existing cash settlement process.

Finally, OCC believes that the Proposed CSPA would also promote compliance with Rule 17Ad–22(e)(22),[20] which requires OCC as a covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to ''use, or at a minimum accommodate, relevant internationally accepted communication procedures and standards in order to facilitate efficient payment, clearing, and settlement.'' In adopting this requirement, the Commission stated that ''[r]elevant internationally accepted communication procedures and standards could include messaging standards such as *SWIFT,* FIX and FpML.'' [emphasis added].[21] Accordingly, use of the SWIFT messaging network as the primary process to support daily cash settlement is consistent with Rule 17Ad–22(e)(22).

New Cash Settlement Procedures Agreement

As part of the transition to SWIFT, Clearing Banks would enter into the Proposed CSPA with OCC. The Proposed CSPA is based on a standardized template developed by OCC in collaboration with its Clearing Banks. The Proposed CSPA template agreement is not a public document, and OCC has separately submitted a request for confidential treatment regarding the Proposed CSPA template agreement, which is included in this filing as Exhibit 3. The definitive Proposed CSPA between OCC and each Clearing Bank is expected to be consistent with the template agreement, however, OCC and each Clearing Bank may negotiate certain modifications.

As is the case today, the Proposed CSPA would continue to be the principal form of agreement that governs the rights and responsibilities of OCC and each Clearing Bank, details operational procedures (including backup procedures) and security protocols, and identifies individuals at OCC and at the Clearing Bank who are authorized to act on behalf of each party with respect to cash settlement instructions.

Under the Proposed CSPA, the timelines for OCC and Clearing Banks to perform the actions needed to effect settlement would be bifurcated as they are under the current agreement into start-of-day settlement instructions and intra-day settlement instructions. Also as with the current CSPA, there would be defined deadlines by which OCC must submit settlement instructions and by which the Clearing Bank must accept and execute the settlement instructions. In the event the SWIFT network is unavailable during a time at which settlement instructions are to be communicated, each Proposed CSPA would detail backup procedures with corresponding security protocols by which OCC and the Clearing Bank could effect settlement. For example, such alternative communication methods may include secure email messages, telephone instructions with the use of personal identification codes, facsimile instructions, the Clearing Bank's proprietary online account system, or other methods agreed upon by OCC and the Clearing Bank.

Under the Proposed CSPA, however, Clearing Banks would not be deemed to have accepted settlement instructions in the event the Clearing bank does not explicitly communicate acceptance or rejection to OCC. Instead, any acceptance would be required to be made by affirmative SWIFT confirmation message, and if a Clearing Bank did not respond OCC would have discretion to treat the failure to respond as a rejection and OCC would communicate with the Clearing Bank to understand the reason(s) why no response to the settlement instruction was provided and appropriate action is taken. These measures are intended to ensure that potentially erroneous instructions are identified and acted upon in a timely manner and to evidence settlement finality.

The CSPAs currently in effect between OCC and its Clearing Banks were implemented incrementally over a number of years as OCC's operations expanded and it became appropriate to maintain service agreements with a range of Clearing Banks, and in many cases they have not been renegotiated in a significant amount of time. For these reasons, there is variation between the terms and conditions of the relevant CSPA and the corresponding practices with the Clearing Banks. In some cases the differences are relatively substantial, such as in the one case described above where the primary means of communication between the Clearing Bank and OCC to support the cash settlement process is facsimile. The Proposed CSPA would address these issues by increasing consistency in the respective rights and responsibilities of OCC and the Clearing Banks and in turn promoting harmonization across OCC's daily cash settlement process. Negotiation of the Proposed CSPA to adopt the SWIFT messaging network as the primary process to support daily cash settlement would also update the agreements to rely on current industry communication procedures and standards that the Commission has recognized as consistent with the requirements of Rule 17Ad–22(e)(22).[22]

Testing and Implementation

Prior to implementation of the Proposed CSPA, the existing CSPA and current processes regarding daily cash settlement would continue in effect while OCC completes the development of the new SWIFT interface. OCC would also complete roundtrip certification testing of the proposed SWIFT network messaging operations. Upon execution of the Proposed CSPA by a Clearing Bank, an implementation date would be coordinated between OCC and the Clearing Bank and OCC would provide advance notice of the implementation to Clearing Members through an Information Memo. OCC generally expects a total timeframe of approximately 90 days would be necessary to migrate a Clearing Bank to SWIFT messaging-based cash settlement. Though OCC would be able to begin migration to SWIFT messaged–based cash settlement with each Clearing Bank on an individual basis, it would expect to complete the migration with all of its Clearing Banks by the end of Q1 2018.

[20] 17 CFR 240.17Ad–22(e)(22).

[21] Securities Exchange Act Release No. 78961 (September 28, 2016), 81 FR 70786, 70842 (October 13, 2016).

[22] 17 CFR 240.17Ad–22(e)(22).

Anticipated Effect on and Management of Risk

OCC anticipates that the Proposed CSPA would reduce the nature and level of risk presented by OCC because, as described above, it would enhance the resiliency, efficiency and consistency of the cash settlement process and thereby reduce risks that are associated with the existing cash settlement process. Specifically, the Proposed CSPA would increase the resiliency of the cash settlement process by reducing manual processing steps that are more prone to risk of delay or error. Due to implementation of the SWIFT messaging network as the primary means of transmitting settlement instructions, a Clearing Bank's acceptance of settlement instructions would automatically result in debits or credits, as appropriate, and Clearing Banks would no longer manually enter settlement instructions in their own systems.

OCC also anticipates the Proposed CSPA would enhance the efficiency of the cash settlement process by reducing manual processing steps that elongate the timeframe for processing and approving settlement instructions. In this regard, using SWIFT as the primary means of transmitting settlement instructions would reduce the risk of uncertainty in the cash settlement process by allowing OCC and the Clearing Banks to communicate using the same transmission method that is already typically used by the Clearing Banks to process funds transfer instructions with other institutions. OCC expects that this would lead to significantly faster response times from Clearing Banks to accept or reject instructions, which, in turn, would better manage the risk of untimely settlement by providing greater certainty concerning prompt settlement.

In addition, the Proposed CSPA would enhance consistency in the agreements between OCC and the Clearing Banks and harmonize the use of SWIFT as the primary process used to conduct cash settlement. OCC anticipates that this greater consistency would reduce the risk of delay or error in the settlement process that might result from OCC's management of the greater inconsistency across practices with the Clearing Banks that exists today.

Finally, OCC anticipates the Proposed CSPA would reduce regulatory risk to OCC by helping to ensure that the primary means of communicating settlement instructions uses relevant internationally accepted communications procedures and standards to facilitate efficient payment, clearing and settlement in a manner that is consistent with the requirements of Rule 17Ad–22(e)(22).[23]

For all of these reasons, OCC anticipates that the Proposed CSPA would reduce the nature and level of risk presented by OCC.

Consistency With the Payment, Clearing and Settlement Supervision Act

The stated purpose of the Clearing Supervision Act is to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.[24] Section 805(a)(2) of the Clearing Supervision Act[25] also authorizes the Commission to prescribe risk management standards for the payment, clearing and settlement activities of designated clearing entities, like OCC, for which the Commission is the supervisory agency. Section 805(b) of the Clearing Supervision Act[26] states that the objectives and principles for risk management standards prescribed under Section 805(a) shall be to:

- Promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and the Act in furtherance of these objectives and principles.[27] In particular, Rule 17Ad–22(e)(22)[28] requires that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to ''use, or at a minimum accommodate, relevant internationally accepted communication procedures and standards in order to facilitate efficient payment, clearing, and settlement.''

OCC believes that the proposed change concerning cash settlement described above is consistent with Section 805(b)(2) of the Clearing Supervision Act[29] because it would promote safety and soundness in OCC's daily cash settlement process by mitigating risks that arise in the existing process due to manual processing steps and inconsistent practices across OCC's Clearing Banks and thereby enhancing the resiliency, efficiency and consistency of the process. As described in detail above, the proposed change would promote safety and soundness by implementing the SWIFT messaging network as the primary means of transmitting daily cash settlement instructions between OCC and each Clearing Bank that performs cash settlement on behalf of Clearing Members. This represents the use of a primary communication procedure that would be integrated with the systems that are already typically used by the Clearing Banks to process funds transfer instructions with other institutions and that would cause the acceptance of settlement instructions by Clearing Banks to automatically result in debits or credits, as appropriate, in the accounts of OCC and Clearing Members at the Clearing Banks. OCC believes that these changes promote the safety and soundness of the cash settlement process by, among other things, reducing manual processing steps that are more prone to risk of delay or error and by facilitating faster response times regarding the acceptance or rejection of settlement instructions by Clearing Banks, which, in turn, would provide greater certainty regarding prompt settlement.

OCC also believes that the proposed change to enhance the consistency of the CSPA between OCC and each Clearing Bank would promote safety and soundness by reducing the risk of settlement delay or error that may arise due to the existing degree of variability in the practices between Clearing Banks, including but not limited to the current use by one Clearing Bank of facsimile as a primary method for transmitting settlement instructions.

OCC further believes that the proposed change would promote compliance with Rule 17Ad–22(e)(22),[30] which requires OCC as a covered clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to ''use, or at a minimum accommodate, relevant internationally accepted communication procedures and standards in order to facilitate efficient payment, clearing, and settlement.'' In

[23] 17 CFR 240.17Ad–22(e)(22).

[24] 12 U.S.C. 5461(b).

[25] 12 U.S.C. 5464(a)(2).

[26] 12 U.S.C. 5464(b).

[27] 17 CFR 240. 17Ad–22. *See* Securities Exchange Act Release Nos. 68080 (October 22, 2012), 77 FR 66220 (November 2, 2012) (S7–08–11) (''Clearing Agency Standards''); 78961 (September 28, 2016), 81 FR 70786 (October 13, 2016) (S7–03–14) (''Standards for Covered Clearing Agencies''). The Standards for Covered Clearing Agencies became effective on December 12, 2016. As a ''covered clearing agency'' under Rule 17Ad–22(a)(5), OCC became obligated to comply with new section (e) of Rule 17Ad–22 as of the Commission's compliance date of April 11, 2017.

[28] 17 CFR 240.17Ad–22(e)(22).

[29] 12 U.S.C. 5464(b)(2).

[30] 17 CFR 240.17Ad–22(e)(22).

adopting this requirement, the Commission stated that ''[r]elevant internationally accepted communication procedures and standards could include messaging standards such as *SWIFT,* FIX and FpML.'' [emphasis added].[31] Accordingly, use of the SWIFT messaging network as the primary process to support daily cash settlement is consistent with Rule 17Ad–22(e)(22).

In these ways, OCC believes the proposed changes are consistent with Section 805(b)(2) of the Clearing Supervision Act[32] and Rule 17Ad–22(e)(22).[33]

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of: (i) The date the proposed change was filed with the Commission or (ii) the date any additional information requested by the Commission is received. OCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

OCC shall post notice on its Web site of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the advance notice is consistent with the Clearing Supervision Act and the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR-OCC–2017–805 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–OCC–2017–805. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the advance notice that are filed with the Commission, and all written communications relating to the advance notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of OCC and on OCC's Web site at *http://www.theocc.com/components/docs/legal/rules_and_bylaws/sr_occ_17_805.pdf.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–OCC–2017–805 and should be submitted on or before December 8, 2017.

By the Commission.

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82060; File No. SR–BatsEDGX–2017–47]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Its Fees for Physical Ports

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 2, 2017, Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') (formerly known as Bats EDGX Exchange, Inc.) filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members[5] and non-Members of the Exchange pursuant to EDGX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.markets.cboe.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: $2,000 per physical port that connects to the System [6] via 1 gigabyte circuit; and $6,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from $6,000 per month to $7,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services.[7] The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain $2,000 per month. The Exchange proposes to implement this amendment to its fee schedule on January 2, 2018.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange.

The Exchange believes that the proposed rate is equitable and non-discriminatory in that it applies uniformly to all Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fee will also enable the Exchange to continue to maintain and improve its market technology and services.

Lastly, the Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members. For instance, the proposed fees for a 10 gigabyte circuit of $7,000 per month is less than analogous fees charged by the Nasdaq Stock Market LLC (''Nasdaq'') and NYSE Arca, Inc. (''Arca''), which range from $10,000–$15,000 per month for 10 gigabyte circuits.[10]

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [11] and paragraph (f) of Rule 19b–4 thereunder.[12] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[6] The term ''System'' is defined as ''the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away.'' *See* Exchange Rule 1.5(cc).

[7] The Exchange also proposes a minor technical amendment to change the title of the first column from ''Connection Service Type'' to Service''.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–BatsEDGX–2017–47 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BatsEDGX–2017–47. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–BatsEDGX–2017–47 and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82053; File No. SR–MSRB–2017–06]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of Amendment No. 1 to Proposed Rule Change To Amend MSRB Rule G–34, on CUSIP Numbers, New Issue, and Market Information Requirements

November 13, 2017.

I. Introduction

On August 30, 2017, the Municipal Securities Rulemaking Board (''MSRB'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change consisting of amendments to Rule G–34 on CUSIP numbers, new issue, and market information requirements. The proposed rule change was published for comment in the **Federal Register** on September 18, 2017.[3] The Commission received eleven comment letters on the proposal.[4] On October 18, 2017, the MSRB granted an extension of time for the Commission to act on the filing until December 15, 2017. On November 7, 2017, the MSRB responded to the comments [5] and filed Amendment No. 1 to the proposed rule change (''Amendment No. 1''). The text of Amendment No. 1 is available on the MSRB's Web site.[6] The Commission is publishing this notice to solicit comments on Amendment No. 1 to the proposed rule change from interested persons.

II. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Amendment

In response to concerns raised in the comments, the MSRB is proposing to amend proposed paragraph Rule G–34(a)(i)(F) of the proposed rule change to require dealers (and municipal advisors in a competitive sale) seeking to rely on the principles-based exception to reasonably believe the purchaser's present intent is to hold the municipal securities to maturity ''or earlier redemption or mandatory tender.'' [7] The MSRB believes the proposed rule change should be amended to more accurately reflect the terms of direct purchase transactions including the potential for earlier redemption or mandatory tender.[8] The MSRB is proposing this same amendment to the proposed principles-based exception for dealers from the depository eligibility requirements of the rule set forth in proposed subparagraph Rule G–34(a)(ii)(A)(3) for consistency.[9] The MSRB stated that this provision would clarify that the depository eligibility requirements of Rule G–34(a)(ii)(A) do not apply to municipal securities included in the principles-based exception.[10]

In response to concerns raised in the comments, the MSRB also is proposing amending the proposed rule change to

expand the principles-based exception in proposed paragraph Rule G–34(a)(i)(F) to include cases where a municipal entity purchases the municipal securities with funds that are at least in part proceeds of the purchasing entity's issue of municipal obligations, or the municipal securities being purchased are used to fully or partially secure or pay the purchasing entity's issue of municipal obligations.[11] The MSRB believes that certain sales of municipal securities to municipal entities should be excepted from the CUSIP number requirements for the same policy reasons underlying the principles-based exception for purchases by banks and their non-dealer control affiliates.[12] In particular, the MSRB believes that where a municipal entity is purchasing municipal securities using funds that are at least in part proceeds of that purchasing entity's issuance of other municipal obligations, or where the municipal securities being purchased are used to fully or partially secure or pay the purchasing entity's issue of municipal obligations, there is a strong expectation that the purchase of the underlying municipal securities is intended to be held and not traded in the secondary market.[13] As with the exception for dealers (or municipal advisors in a competitive sale) engaging in direct purchase transactions of new issue municipal securities to banks, the MSRB believes that requiring a CUSIP number in these scenarios would not serve the purposes of Rule G–34 to, among other things, improve efficiencies in the processing, receiving, delivering and safekeeping of municipal securities.[14] The MSRB also believes that, just as in the case of purchases by banks and their non-dealer control affiliates, for a dealer (or municipal advisor in a competitive sale) to rely on the principles-based exception in this instance, it would be required to have a reasonable belief (*e.g.,* by obtaining a written representation) that the purchasing municipal entity has the present intent to hold the municipal securities to maturity or earlier redemption or mandatory tender.[15] The MSRB is also proposing this same amendment to the principles-based exception for dealers from the depository eligibility requirements of the rule set forth in subparagraph Rule G–34(a)(ii)(A).[16]

In response to comments that the principles-based exception should apply to all sales of municipal securities from one municipal entity to another where a dealer (or municipal advisor in a competitive sale) is engaged, the MSRB stated that it disagrees.[17] The MSRB stated that the principles-based exception is meant to facilitate financings by permitting the underwriting of new issue municipal securities by dealers (or advising by municipal advisors in a competitive sale) without requiring application be made for a CUSIP number where such new issues are not intended to trade in the secondary market.[18] However, the MSRB stated that it understands that a municipal entity purchasing municipal securities for investment purposes may find itself in need of liquidity and thus may look to resell those municipal securities into the secondary market.[19] In this instance, the MSRB stated, the holder of the municipal securities may find itself unable to readily resell the municipal securities because there is no CUSIP number and, based on discussions with industry participants, the MSRB stated that it understands there is also no established process for obtaining a CUSIP number at that late stage for secondary market trading.[20] The MSRB believes that by applying for the CUSIP number on the new issue up front, the dealer (or municipal advisor in a competitive sale) avoids these potential problems and ensures that this important aspect needed for secondary market trading is in place.[21] As a result, the MSRB stated that it does not believe the principles-based exception should be expanded to create a generalized private placement exception for all sales of municipal securities to another municipal entity where a dealer (or a municipal advisor in a competitive sale) is engaged, but rather, should be limited as set forth above.[22]

The MSRB is proposing to make the proposed rule change effective six months after Commission approval and is requesting accelerated approval of Amendment No. 1.[23] The MSRB believes the Commission has good cause, pursuant to Section 19(b)(2) of the Act, for granting accelerated approval of Amendment No. 1.[24] The MSRB believes that the only substantive change to the proposed rule change is responsive to commenters and expands the application of the previously proposed principles-based exception to include sales of new issue municipal securities to municipal entities that are purchasing the underlying municipal securities with funds that are at least in part proceeds of the purchasing entity's issue of municipal obligations, or the municipal securities being purchased are used to fully or partially secure or pay the purchasing entity's issue of municipal obligations.[25] The MSRB believes that the other amendment to the proposed rule change merely clarifies that in a direct purchase transaction there may be a redemption or mandatory tender that occurs prior to the municipal security's maturity.[26] The MSRB also stated that, in light of one of the purposes of the principles-based exception in the proposed rule change—to allow dealers and municipal advisors to provide services without inhibiting their issuer clients' access to certain financings—the revisions are consistent with the proposed rule change and are unlikely to be controversial.[27]

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the filing as amended by Amendment No. 1 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MSRB–2017–06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2017–06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82062; File No. SR–NASDAQ–2017–119]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7014

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2017, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to (1) change the volume requirement for purposes of determining eligibility for a transaction fee under the Qualified Market Maker Program; and (2) eliminate one of the tiers of the Nasdaq Growth Program.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's transaction fees at Rule 7014 to (1) change the volume requirement for purposes of determining eligibility for a transaction fee under the Qualified Market Maker (''QMM'') Program; and (2) eliminate one of the tiers of the Nasdaq Growth Program.

QMM Program

A QMM is a member that makes a significant contribution to market quality by providing liquidity at the national best bid and offer (''NBBO'') in a large number of stocks for a significant portion of the day.[3] In addition, the member must avoid imposing the burdens on Nasdaq and its market participants that may be associated with excessive rates of entry of orders away from the inside and/or order cancellation. The designation reflects the QMM's commitment to provide meaningful and consistent support to market quality and price discovery by extensive quoting at the NBBO in a large number of securities. In return for its contributions, certain financial benefits are provided to a QMM with respect to its order activity, as described under Rule 7014(e). For example, Nasdaq will provide QMMs a rebate per share executed with respect to all other displayed orders (other than Designated Retail Orders, as defined in Rule 7018) in securities priced at $1 or more per share that provide liquidity and were for securities listed on the New York Stock Exchange LLC (''NYSE''), securities listed on exchanges other than Nasdaq and NYSE, or securities listed on Nasdaq.

Nasdaq also charges QMMs a lower rate for executions of orders in securities priced at $1 or more per share that access liquidity on the Nasdaq Market Center.[4] Under Rule 7014(e), the Exchange charges a QMM $0.0030 per share executed for removing liquidity on Nasdaq in Nasdaq-listed securities priced at $1 or more. The Exchange also charges a QMM $0.00295 per share executed for removing liquidity on Nasdaq in securities priced at $1 or more per share that are listed on exchanges other than Nasdaq, if the QMM's volume of liquidity added through one or more of its Nasdaq Market Center MPIDs during the month (as a percentage of Consolidated Volume) is not less than 0.80%.[5] For a QMM that meets the criteria of Tier 2,[6] the Exchange assesses a charge of $0.0029 per share executed for removing liquidity in securities priced at $1 or more per share listed on exchanges other than Nasdaq if the QMM has a combined Consolidated Volume (adding and removing liquidity) of at least 3.7%.

Nasdaq is now proposing to change the volume threshold needed to qualify for the transaction fee of $0.00295 per share executed for non-Nasdaq-listed securities for removing liquidity on Nasdaq in securities priced at $1 or more. Currently, the QMM's volume of liquidity added through one or more of its Nasdaq Market Center MPIDs during

---

[28] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Rule 7014(d).

[4] *See* Rule 7014(e).

[5] As set forth in Rule 7014(h), the term ''Consolidated Volume'' has the same meaning as the term has under Rule 7018(a). That term is defined in Rule 7018(a) to mean ''the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity.''

[6] As set forth in Rule 7014(e), the QMM Tier 2 qualification criteria requires a QMM to execute shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent above 0.90% of Consolidated Volume during the month.

the month (as a percentage of Consolidated Volume) must be not less than 0.80%. Nasdaq proposes to increase this threshold to 0.85%. Nasdaq believes that this increased volume threshold is more closely aligned to the corresponding transaction fee than the current volume threshold. This increase is also reflective of the Exchange's desire to provide incentives to attract order flow to the Exchange in return for significant market-improving behavior. By modestly increasing the volume of liquidity that a QMM must add during the month in order to qualify for the corresponding transaction fee, this change will help ensure that QMMs are providing significant market-improving behavior in return for a reduced fee.

Nasdaq Growth Program

Nasdaq also proposes to eliminate one of the tiers of the Nasdaq Growth Program (''Growth Program'').[7] Nasdaq introduced the Growth Program in 2016.[8] The purpose of the Growth Program is to provide a credit per share executed for members that meet certain growth criteria. The credit is designed to provide an incentive to members that do not qualify for other credits under Rule 7018 in excess of the Growth Program credit to increase their participation on the Exchange. The Growth Program provides a member either a $0.0025 per share executed credit in securities priced $1 or more per share, or a $0.0027 per share executed credit in securities priced at $1 or more if the member meets certain criteria. The credit is provided in lieu of other credits provided to the member for displayed quotes/orders (other than Supplemental Orders or Designated Retail Orders) that provide liquidity under Rule 7018, if the credit under the Growth Program is greater than the credit attained under Rule 7018.

Rule 7014(j) currently provides three ways in which a member may qualify for the $0.0025 rebate in a given month. First, the member may qualify for this rebate by: (i) Adding greater than 750,000 shares a day on average during the month through one or more of its Nasdaq Market Center MPIDs; and (ii) increasing its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume by 20% versus the member's Growth Baseline.[9] Second, the member may qualify for the $0.0025 rebate by: (i) Adding greater than 750,000 shares a day on average during the month through one or more of its Nasdaq Market Center MPIDs; and (ii) meeting the criteria set forth above (increasing its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume by 20% versus the member's Growth Baseline) in the preceding month, and maintaining or increasing its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume as compared to the preceding month. Third, a member may qualify for the Growth Program by: (i) Adding greater than 750,000 shares a day on average during the month through one or more of its Nasdaq Market Center MPIDs in three separate months; (ii) increasing its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume by 20% versus the member's Growth Baseline in three separate months; and (iii) maintaining or increasing its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume compared to the Growth Baseline established when the member met the criteria for the third month.

To be eligible for a $0.0027 per share executed rebate, in lieu of the $0.0025 per share executed rebate above, a member must (i) add at least 0.04% or more of Consolidated Volume during the month through non-displayed orders through one or more of its Nasdaq Market Center MPIDs; and (ii) increase its shares of liquidity provided through one or more of its Nasdaq Market Center MPIDs in all securities during the month as a percent of Consolidated Volume by at least 50% versus its August 2016 share of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume.[10]

Nasdaq now proposes to eliminate the $0.0025 rebate and the criteria for determining that rebate. Members will continue [sic] qualify for the $0.0027 rebate if they meet the criteria for qualifying for that rebate, which remains unchanged.

Nasdaq is making this change to simplify the operation of the Growth Program. To the extent that it is eliminating one of the rebates in the Growth Program, Nasdaq has determined that it is preferable to retain the $0.0027 rebate and its corresponding requirements. First, by eliminating the $0.0025 rebate, members that wish to qualify for the remaining $0.0027 rebate must meet the performance obligations that accompany that rebate, including the requirement that the member add at least 0.04% or more of Consolidated Volume during the month through non-displayed orders through one or more of its Nasdaq Market Center MPIDs. The purpose of the $0.0027 rebate is to incentivize firms to provide both displayed and non-displayed liquidity. Nasdaq notes that non-displayed orders generally provide improvement to the size of orders executed on the Exchange. As such, eliminating the $0.0025 rebate will incentivize members to qualify for the remaining $0.0027 rebate and to meet its corresponding requirement to add non-displayed size, which, among other things, will improve overall market quality on Nasdaq by increasing the size of executed orders.

Second, Nasdaq notes that, unlike the $0.0025 rebate, which requires a member to show an increase in Consolidated Volume compared to the member's Growth Baseline, with each successive month maintaining or improving upon that baseline to continue to qualify for the rebate, the $0.0027 rebate requires an initial significant increase in Consolidated Volume compared to that member's share of liquidity provided in all securities in August 2016, with the member maintaining that level to continue receiving the $0.0027 rebate. Thus, the measure against which Consolidated Volume is compared remains static month to month under the criteria of the $0.0027 rebate, whereas it can vary month to month under the qualification criteria for the $0.0025 rebate. Nasdaq believes that members may therefore be more able to

[7] As part of this change, Nasdaq proposes to re-number Rule 7014(j) to reflect this elimination of one of the rebate tiers.

[8] *See* Securities Exchange Act Release No. 78977 (September 29, 2016), 81 FR 69140 (October 5, 2016) (SR–NASDAQ–2016–132).

[9] The Growth Baseline is defined as the member's shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume during the last month a member qualified for the Nasdaq Growth Program under current Rule 7014(j)(1)(B)(i) (increasing its Consolidated Volume by 20% versus its Growth Baseline). If a member has not yet qualified for a credit under this program, its August 2016 share of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs as a percent of Consolidated Volume will be used to establish a baseline.

As noted above, the term ''Consolidated Volume'' has the same meaning for Rule 7014 as the term has under Rule 7018(a).

[10] As is currently the case, members that were not members of the Exchange in August 2016 may still qualify for the $0.0027 rebate. For such ''new'' members, the Exchange will consider their share of liquidity provided in all securities in August 2016 as zero.

satisfy the criteria to qualify for the $0.0027 rebate over successive months than the criteria to qualify for the $0.0025 rebate.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[11] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[12] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

QMM Program

The Exchange believes that the change to the volume threshold needed to qualify for the $0.00295 QMM transaction fee is reasonable. The Exchange notes that it is not changing the amount of fees charged to QMMs, which have been addressed in previous filings,[13] and believes that those fees continue to be reasonable because they remain unchanged. Nasdaq believes that the change to the volume threshold is reasonable because the increased volume threshold is more closely aligned to the corresponding $0.00295 transaction fee than the current volume threshold. Nasdaq also believes that this proposed change is reasonable because it will help ensure that QMMs are providing significant market-improving behavior in return for the corresponding fee, by modestly increasing the volume of liquidity that a QMM must add during the month in order to qualify for the reduced transaction fee.

Nasdaq believes that the proposed change to the volume threshold is an equitable allocation and is not unfairly discriminatory because the Exchange will apply the same volume threshold to all members that otherwise qualify for the corresponding fee (*e.g.,* the member quotes at the NBBO at least 25% of the time during regular market hours in an average of at least 1,000 securities per day during the month). The Exchange believes that the new volume threshold will not significantly impact the number of QMMs that will likely qualify for the corresponding transaction fee, since the new volume threshold is a modest increase over the current volume threshold, and members may always elect to qualify for the corresponding fee by adding sufficient liquidity to the Exchange to meet the new volume requirement. Finally, the QMM Program is intended to encourage members to promote price discovery and market quality by quoting at the NBBO for a significant portion of each day in a large number of securities, thereby benefitting Nasdaq and other investors by committing capital to support the execution of orders.

Growth Program

The Exchange believes that eliminating the $0.0025 rebate tier of the Growth Program is reasonable. Nasdaq believes that eliminating this rebate tier and its corresponding requirements to qualify for that tier will simplify the operation of the Growth Program. To the extent that Nasdaq has determined to eliminate one of the current rebate tiers, Nasdaq believes it is reasonable to eliminate the $0.0025 rebate, rather than the $0.0027 rebate. By eliminating the $0.0025 rebate, members that wish to qualify for the remaining $0.0027 rebate must meet the performance obligations that accompany that rebate, including the requirement that the member add at least 0.04% or more of Consolidated Volume during the month through non-displayed orders through one or more of its Nasdaq Market Center MPIDs. Nasdaq notes that the $0.0027 rebate is designed to incentivize members to add both displayed and non-displayed liquidity and that, among other things, non-displayed orders generally provide improvement to the size of orders executed on the Exchange. As such, eliminating the $0.0025 rebate will incentivize members to qualify for the remaining $0.0027 rebate and to meet its corresponding requirement to add non-displayed size, which will improve overall market quality on Nasdaq by increasing the size of executed orders.

The Exchange believes that the elimination of the $0.0025 rebate tier is an equitable allocation and is not unfairly discriminatory. The $0.0025 rebate tier will be eliminated for all members. Additionally, all members may continue to qualify for the remaining $0.0027 rebate tier if they meet the qualifying criteria, *e.g.,* the member adds at least 0.04% or more of Consolidated Volume during the month through non-displayed orders through one or more of its Nasdaq Market Center MPIDs. The Exchange believes that eliminating the $0.0025 rebate tier, while maintaining the $0.0027 rebate tier, will not significantly impact the number of members that will qualify for the Growth Program. Unlike the $0.0025 rebate, which requires a member to show an increase in Consolidated Volume compared to the member's Growth Baseline, with each successive month maintaining or improving upon that baseline to continue to qualify for the rebate, the $0.0027 rebate requires an initial significant increase in Consolidated Volume compared to that member's share of liquidity provided in all securities in August 2016, with the member maintaining that level to continue receiving the $0.0027 rebate. Thus, the measure against which Consolidated Volume is compared remains static month to month under the criteria of the $0.0027 rebate, whereas it can vary month to month under the qualification criteria for the $0.0025 rebate. Nasdaq believes that members may therefore be more able to satisfy the criteria to qualify for the $0.0027 rebate over successive months than the criteria to qualify for the $0.0025 rebate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the proposed change to the volume threshold for the QMM Program does not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from other exchanges and from off-exchange venues. The Exchange will apply the same new volume threshold to all members, and does not believe that the new volume threshold will significantly impact the number of QMMs that will likely qualify for the corresponding transaction fee, since the new volume threshold is a modest increase over the current

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(4) and (5).

[13] *See, e.g.,* Securities Exchange Act Release No. 72810 (August 11, 2014), 79 FR 48281 (August 15, 2014) (SR–NASDAQ–2014–078).

volume threshold, and members may always elect to qualify for the corresponding fee by adding sufficient liquidity to the Exchange to meet the new volume requirement. As such, the Exchange believes that the proposed volume threshold will not negatively impact who will qualify for the corresponding transaction fee, but will rather have a positive impact on overall market quality as QMMs increase their participation in the market to qualify for those fees. If, however, the Exchange is incorrect and the changes proposed herein are unattractive to QMMs, it is likely that Nasdaq will lose market share as a result. Accordingly, Nasdaq does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

Similarly, Nasdaq believes that the elimination of the $0.0025 rebate tier for the Growth Program does not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from other exchanges and from off-exchange venues. Nasdaq notes that the $0.0025 rebate tier will be eliminated for all members. Additionally, all members may continue to qualify for the remaining $0.0027 rebate tier if they meet the qualifying criteria, *e.g.,* the member adds at least 0.04% or more of Consolidated Volume during the month through non-displayed orders through one or more of its Nasdaq Market Center MPIDs. The Exchange believes that eliminating the $0.0025 rebate tier, while maintaining the $0.0027 rebate tier, will not significantly impact the number of members that will qualify for the Growth Program. Unlike the $0.0025 rebate, which requires a member to show an increase in Consolidated Volume compared to the member's Growth Baseline, with each successive month maintaining or improving upon that baseline to continue to qualify for the rebate, the $0.0027 rebate requires an initial significant increase in Consolidated Volume compared to that member's share of liquidity provided in all securities in August 2016, with the member maintaining that level to continue receiving the $0.0027 rebate. Thus, the measure against which Consolidated Volume is compared remains static month to month under the criteria of the $0.0027 rebate, whereas it can vary month to month under the qualification criteria for the $0.0025 rebate. Nasdaq believes that members may therefore be more able to satisfy the criteria to qualify for the $0.0027 rebate over successive months than the criteria to qualify for the $0.0025 rebate. Ultimately, if members conclude that the qualification requirements for the remaining tier in the Growth Program are set too high, or the rebate too low, it is likely that the Exchange will realize very little benefit from the Growth Program. Accordingly, the Exchange does not believe that this proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2017–119 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2017–119. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2017–119, and should be submitted on or before December 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–82059; File No. SR–BX–2017–051]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Options Pricing at Chapter XV, Section 2

November 13, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November

[14] 15 U.S.C. 78s(b)(3)(A)(ii).

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

1, 2017, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Options Pricing at Chapter XV, Section 2, entitled ''BX Options Market—Fees and Rebates,'' which governs pricing for BX members using the BX Options Market (''BX Options''). The Exchange proposes to modify certain fees for transactions in options overlying Select Symbols,[3] as further discussed below.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Chapter XV, Section 2(1), which includes pricing for transactions in Select Symbol options, to increase the Firm[4] fee to add liquidity and fee to remove liquidity in Select Symbols. Select Symbols represent some of the highest volume Penny Pilot options traded on the Exchange and in the industry. The fees and rebates applicable to Select Symbol options in Chapter XV, Section 2(1) are designed to attract more order flow to BX Options, particularly in these high volume symbols, and apply to Customers,[5] BX Options Market Makers,[6] Non-Customers[7] and Firms as follows:

(1) Fees for Execution of Contracts on the BX Options Market:

* * * * *

SELECT SYMBOLS OPTIONS TIER SCHEDULE

		Rebate to add liquidity	Fee to add liquidity	Rebate to remove liquidity	Fee to remove liquidity	Fee to add liquidity
	When:	Customer	BX options market maker	Customer	BX options market maker	BX options market maker
	Trading with:	Non-customer or BX options market maker, or firm	Customer	Non-customer or BX options market maker, or firm	Customer	Non-customer or BX options market maker, or firm
Tier 1	Participant executes less than 0.05% of total industry customer equity and ETF option ADV contracts per month.	$0.00	$0.44	$0.00	$0.42	$0.14
Tier 2	Participant executes 0.05% to less than 0.15% of total industry customer equity and ETF option ADV contracts per month.	0.10	0.44	0.25	0.42	0.10
Tier 3	Participant executes 0.15% or more of total industry customer equity and ETF option ADV contracts per month.	0.20	0.40	0.37	0.39	0.04
Tier 4	Participant executes greater than 10,000 PRISM Agency Contracts per month; or Participant executes BX Options Market Maker volume of 0.30% or more of total industry customer equity and ETF options ADV per month.	0.25	0.29	0.37	0.25	0.00

[3] The following are Select Symbols: ASHR, DIA, DXJ, EEM, EFA, EWJ, EWT, EWW, EWY, EWZ, FAS, FAZ, FXE, FXI, FXP, GDX, GLD, HYG, IWM, IYR, KRE, OIH, QID, QLD, QQQ, RSX, SDS, SKF, SLV, SRS, SSO, TBT, TLT, TNA, TZA, UNG, URE, USO, UUP, UVXY, UYG, VXX, XHB, XLB, XLE, XLF, XLI, XLK, XLP, XLU, XLV, XLY, XME, XOP, XRT. *See* Chapter XV, Section 2(1).

[4] The term ''Firm'' or (''F'') applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC. *See* Chapter XV.

[5] The term ''Customer'' or (''C'') applies to any transaction that is identified by a Participant for clearing in the Customer range at OCC which is not for the account of broker or dealer or for the account of a ''Professional'' (as that term is defined in Chapter I, Section 1(a)(48)). *See* Chapter XV.

[6] The term ''BX Options Market Maker'' or (''M'') is a Participant that has registered as a Market Maker on BX Options pursuant to Chapter VII, Section 2, and must also remain in good standing pursuant to Chapter VII, Section 4. In order to receive Market Maker pricing in all securities, the Participant must be registered as a BX Options Market Maker in at least one security. *See* Chapter XV.

[7] As set forth in note 1 to Chapter XV, Section 2(1), a Non-Customer includes a Professional, Broker-Dealer and Non-BX Options Market Maker.

BX Options Select Symbol List

The following are Select Symbols: ASHR, DIA, DXJ, EEM, EFA, EWJ, EWT, EWW, EWY, EWZ, FAS, FAZ, FXE, FXI, FXP, GDX, GLD, HYG, IWM, IYR, KRE, OIH, QID, QLD, QQQ, RSX, SDS, SKF, SLV, SRS, SSO, TBT, TLT, TNA, TZA, UNG, URE, USO, UUP, UVXY, UYG, VXX, XHB, XLB, XLE, XLF, XLI, XLK, XLP, XLU, XLV, XLY, XME, XOP, XRT.

- Firm fee to add liquidity and fee to remove liquidity in Select Symbols Options will be $0.33 per contract, regardless of counterparty.
- Non-Customer fee to add liquidity and fee to remove liquidity in Select Symbols Options will be $0.46 per contract, regardless of counterparty.
- BX Options Market Maker fee to remove liquidity in Select Symbols Options will be $0.46 per contract when trading with Firm, Non-Customer, or BX Options Market Maker.
- Customer fee to add liquidity in Select Symbols Options when contra to another Customer is $0.33 per contract.
- Volume from all products listed on BX Options will apply to the Select Symbols Options Tiers.

* * * * *

The Exchange proposes to increase the $0.33 per contract Firm fee to add liquidity and fee to remove liquidity in Select Symbols to raise revenue for the Exchange and help defray costs. As proposed, the Firm fee to add liquidity and fee to remove liquidity in Select Symbols will be $0.37 per contract, regardless of counterparty. The pricing for all other transactions in Select Symbol options as set forth above will remain unchanged.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[9] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that its proposal to increase the Firm fee to add liquidity and fee to remove liquidity in Select Symbols, as discussed above, is reasonable because the proposed change is a modest increase to help defray costs and remains lower than the Firm fee to add liquidity and fee to remove liquidity in all other Penny Pilot options that are not options in Select Symbols.[10] As discussed above, the pricing for all other transactions in Select Symbol options will remain unchanged. Furthermore, the Exchange notes that the proposed Firm fees for Select Symbols remain competitive with the fees of other options markets.[11] Accordingly, the Exchange believes that despite the proposed increase in Firm fees as described above, the pricing model in Chapter XV, Section 2(1) for Select Symbols will continue to attract order flow to BX Options, particularly in these high volume symbols, to the benefit of all market participants.

The Exchange also believes that the proposed increase of the Firm fee to add liquidity and fee to remove liquidity in Select Symbols is equitable and not unfairly discriminatory because the Exchange will apply the same fee to all similarly situated members. For the reasons discussed above, the proposed fee continues to provide an incentive for Firms to transact order flow on the Exchange, which order flow brings increased liquidity to the Exchange for the benefit of all Exchange participants. To the extent the purpose of the proposed Firm fee is achieved, all market participants should benefit from the improved market liquidity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that the proposed Firm fees for Select Symbol options remain competitive with those on other options markets and will continue to attract order flow to the Exchange. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually review, and consider adjusting, its fees and rebates to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed fee changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2017–051 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2017–051. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #15298 and #15299; PUERTO RICO Disaster Number PR–00029]

Presidential Declaration Amendment of a Major Disaster for the Commonwealth of Puerto Rico

AGENCY: U.S. Small Business Administration.

ACTION: Amendment 4.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for the Commonwealth of Puerto Rico (FEMA–4336–DR), dated 09/10/2017.

Incident: Hurricane Irma.

Incident Period: 09/05/2017 through 09/07/2017.

DATES: Issued on 11/10/2017.

Physical Loan Application Deadline Date: 03/20/2018.

Economic Injury (EIDL) Loan Application Deadline Date: 06/11/2018.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW., Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for the Commonwealth of PUERTO RICO, dated 09/10/2017, is hereby amended to extend the deadline for filing applications for physical damages as a result of this disaster to 03/20/2018.

All other information in the original declaration remains unchanged.

(Catalog of Federal Domestic Assistance Number 59008)

James E. Rivera,

Associate Administrator for Disaster Assistance.

DEPARTMENT OF STATE

[Public Notice 10204]

Determination Under Section 7070(c)(1) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2017 Regarding the Central Government of Nicaragua

Pursuant to section 7070(c)(1) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2017 (Div. J, Pub. L. 115–31), I hereby determine that the Government of Nicaragua has recognized the independence of, or has established diplomatic relations with, the Georgian territories of Abkhazia and Tskhinvali Region/South Ossetia.

This determination shall be published in the **Federal Register** and, along with the accompanying Memorandum of Justification, shall be reported to Congress.

Rex W. Tillerson,

Secretary of State.

BILLING CODE 4710–29–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 55 (Sub-No. 757X)]

CSX Transportation, Inc.—Discontinuance of Service Exemption—in Dickenson County, VA

CSX Transportation, Inc. (CSXT), has filed a verified notice of exemption under 49 CFR part 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over approximately 13.65 miles of rail line from milepost ZF 0.0 to milepost ZF 13.65 on CSXT's Southern Region, Florence Division, Kingsport Subdivision in Dickenson County, Va. (the Line). The Line traverses United States Postal Service Zip Codes 24226, 24228, and 24230. CSXT states that there are 12 internal CSXT stations on the line that can be closed.[1]

CSXT has certified that: (1) No local traffic has moved over the Line for at least two years; (2) overhead traffic on the Line can be rerouted over other lines; (3) no formal complaint filed by a user of a rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line is either pending with the Surface Transportation Board or with any U.S. District Court or has been decided in favor of a complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication) and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance of service shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will be effective on December 17, 2017, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2)[2] must be filed by November 27, 2017.[3]

[1] These stations are at Caney, Cranes Nest DTC, Dickenson, Cranes Nest, Holly Creek, Crabtree, Clintwood Mills, Mullin, Delp, Victor, Lick Fork, and Phipps.

[2] Each OFA must be accompanied by the filing fee, which currently is set at $1,800. *See Regulations Governing Fees for Servs. Performed in Connection with Licensing & Related Servs.—2017 Update,* EP 542 (Sub-No. 25), slip op. App. C at 20 (STB served July 28, 2017).

[3] Because this is a discontinuance proceeding and not an abandonment, trail use/rail banking and public use conditions are not appropriate. Because there will be an environmental review during abandonment, this discontinuance does not require environmental review.

Petitions for reconsideration must be filed by December 7, 2017, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to CSXT's representative, Louis E. Gitomer, Law Offices of Louis E. Gitomer, LLC, 600 Baltimore Avenue, Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available on our Web site at ''*WWW.STB.GOV.*''

Decided: November 13, 2017.

By the Board, Scott M. Zimmerman, Acting Director, Office of Proceedings.

Tammy Lowery,

Clearance Clerk.

BILLING CODE 4915–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Projects Approved for Consumptive Uses of Water

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: This notice lists the projects approved by rule by the Susquehanna River Basin Commission during the period set forth in **DATES**.

DATES: October 1–31, 2017.

ADDRESSES: Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, PA 17110–1788.

FOR FURTHER INFORMATION CONTACT: Jason E. Oyler, General Counsel, 717–238–0423, ext. 1312, *joyler@srbc.net.* Regular mail inquiries may be sent to the above address.

SUPPLEMENTARY INFORMATION: This notice lists the projects, described below, receiving approval for the consumptive use of water pursuant to the Commission's approval by rule process set forth in 18 CFR 806.22(e) and 806.22 (f) for the time period specified above:

Approvals by Rule Issued Under 18 CFR 806.22(e)

1. Panda Patriot, LLC, ABR–201301006.1, Clinton Township, Lycoming County, Pa.; Modification of Consumptive Use of Up to 0.2000 mgd; Approval Date: October 5, 2017.
2. Panda Liberty, LLC, ABR–201301007.1, Asylum Township, Bradford County, Pa.; Modification of Consumptive Use of Up to 0.2000 mgd; Approval Date: October 5, 2017.

Approvals by Rule Issued Under 18 CFR 806.22(f)

1. Chesapeake Appalachia, LLC, Pad ID: Jes, ABR–201303008.R1, Wilmot Township, Bradford County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: October 2, 2017.
2. SWN Production Company, LLC, Pad ID: Bolles South Well Pad, ABR–201210017.R1, Franklin Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: October 4, 2017.
3. SWN Production Company, LLC, Pad ID: SHELDON EAST PAD, ABR–201211013.R1, Thompson Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: October 4, 2017.
4. SWN Production Company, LLC, Pad ID: LOKE PAD, ABR–201211014.R1, New Milford Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: October 4, 2017.
5. SWN Production Company, LLC, Pad ID: Mordovancey Well Pad, ABR–201209023.R1, Choconut Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.9990 mgd; Approval Date: October 16, 2017.
6. Chesapeake Appalachia, LLC, Pad ID: Lasher, ABR–201303010.R1, Auburn Township, Susquehanna County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: October 16, 2017.
7. SWN Production Company, LLC, Pad ID: Wootton East Well Pad, ABR–201209020.R1, Liberty Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: October 16, 2017.
8. SWN Production Company, LLC, Pad ID: Reber-Dozier Well Pad, ABR–201210005.R1, Liberty Township, Susquehanna County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: October 16, 2017.
9. Seneca Resources Corporation, Pad ID: DCNR 100 Pad T, ABR–201301013.R1, Lewis Township, Lycoming County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: October 17, 2017.
10. Chief Oil & Gas, LLC, Pad ID: Lightcap, ABR–201303009.R1, Overton Township, Bradford County and Elkland Township, Sullivan County, Pa.; Consumptive Use of Up to 7.5000 mgd; Approval Date: October 19, 2017.
11. Cabot Oil & Gas Corporation, Pad ID: AldrichL P1, ABR–201210002.R1, Gibson Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: October 23, 2017.
12. Cabot Oil & Gas Corporation, Pad ID: RutkowskiB P1, ABR–201210003.R1, Lenox Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: October 23, 2017.
13. Cabot Oil & Gas Corporation, Pad ID: BrayB P1, ABR–201210004.R1, Auburn Township, Susquehanna County, Pa.; Consumptive Use of Up to 5.0000 mgd; Approval Date: October 23, 2017.
14. SWEPI LP, Pad ID: Delaney 651, ABR–201209013.R1, Sullivan Township, Tioga County, Pa.; Consumptive Use of Up to 4.0000 mgd; Approval Date: October 23, 2017.

Authority: Pub. L. 91–575, 84 Stat. 1509 *et seq.,* 18 CFR parts 806, 807, and 808.

Dated: November 14, 2017.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2017–0084; Notice No. 2017–03]

Hazardous Materials: Proposed Termination of M-Number and R-Number Approvals Issued Without an Expiration Date

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: To standardize manufacturer and reconditioner approvals, PHMSA is proposing to terminate any M-number and R-number approvals that were previously issued without an expiration date. The termination of these approvals will take effect one year from the publication date of this notice. Approval holders must either show cause why their approvals should not be terminated or apply for a modification of their approval prior to the effective date to avoid termination. Once terminated, requests for reconsideration of the termination must be submitted within 20 days of the date of termination.

FOR FURTHER INFORMATION CONTACT: Mr. Ryan Paquet, Director, Approvals and Permits Division, Office of Hazardous Materials Safety, (202) 366–4512, PHMSA, 1200 New Jersey Avenue SE., Washington, DC 20590 or at *approvals@dot.gov.*

Correspondence regarding the proposed M-number and R-number terminations should be sent to *approvals@dot.gov* with the subject line ''Termination of M-numbers/ Termination of R-numbers.''

SUPPLEMENTARY INFORMATION:

I. Introduction

PHMSA is proposing to terminate the approvals discussed below to standardize all approvals issued by the Approvals and Permits Division. Previously approved R-numbers and M-numbers that were issued without an expiration date will be terminated unless approval holders either show cause why their approvals should not be terminated as provided in 49 CFR 107.713(c)(1) or apply for a modification of their approval in accordance with 49 CFR 107.705 prior to the effective date. Modified approvals will conform to the Approvals and Permits Division's standardized format in which all approvals have a 5-year expiration date.

II. Background

The Approvals and Permits Division issues registration numbers, referred to as ''M-numbers,'' to companies that manufacture or recondition packaging related to hazardous materials. This registration number is used for identification purposes in place of the manufacturer or reconditioner's name and address, as authorized in 49 CFR 178.503. In previous years, PHMSA issued reconditioner approvals, known as an ''R-number,'' to companies that reconditioned packages related to hazardous materials. PHMSA no longer issues R-numbers and now issues M-numbers in their place. However, many R-number approvals are still active.

Standardization of the M-number and R-number approval processes will allow PHMSA to regularly review approval documents and track changes. It will ensure that all applicants are subject to the same renewal timelines and requirements to contact PHMSA when pertinent information pertaining to the approval holder has changed. PHMSA is concerned that holders of approvals issued without expiration dates may have stopped operations, or changed their names or principal places of business without notifying PHMSA. Requiring these holders to modify their approvals will require them to re-establish contact and communication with PHMSA. Although this process will assist PHMSA in monitoring and communicating with the regulated industry, PHMSA has also communicated with the regulated community on its proposed actions, at various public meetings with several companies and industry associations, to gauge the effect and benefits of this action to the regulated public. The comments received by PHMSA from the regulated public reflect that this action will greatly assist the regulated community by allowing approval holders, and other entities, to monitor the validity of their approval, renew in a timely manner, and search and determine compliance by using the updated listing on PHMSA's Web page. Lastly, this action will allow companies that are still identifiable and known within the public realm, by a previously registered ''R-Number,'' to maintain their public notoriety, while updating their approval to current standards and requirements without disruption.

III. Action

The proposed termination of these approvals will take effect one year from the publication date of this notice. Holders of R-numbers and any M-numbers that were issued without an

expiration date must either show cause why their approvals should not be terminated as provided in 49 CFR 107.713(c)(1) or apply for a modification of their approval in accordance with 49 CFR 107.705 prior to the effective date to avoid termination. R-number modification applicants will be issued an M-number but may continue to use their R-number. All modified approvals will be standardized and will have a 5-year expiration date.

A holder of an M-number or R-number that is terminated according to this notice may request that the Associate Administrator reconsider the termination. Pursuant to 49 CFR 107.715, such a request must: (1) Be in writing and filed within 20 days of the date of termination; (2) state in detail any alleged errors of fact and law; (3) enclose any additional information needed to support the request to reconsider; and (4) state in detail the modification of the final decision sought. This notice serves as service of process pursuant to 49 CFR 105.35(a)(3).

Issued in Washington, DC, on November 13, 2017, under authority of 49 U.S.C. 5101–5128, as delegated in 49 CFR part 107.

William S. Schoonover,

Associate Administrator, Pipeline and Hazardous Materials Safety Administration.

[FR Doc. 2017–24981 Filed 11–16–17; 8:45 am]

BILLING CODE 4909–60–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; or the Department of the Treasury's Office of the General Counsel: Office of the Chief Counsel (Foreign Assets Control), tel.: 202–622–2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The list of Specially Designated Nationals and Blocked Persons (SDN List) and additional information concerning OFAC sanctions programs are available on OFAC's Web site (*http://www.treasury.gov/ofac*).

Notice of OFAC Actions

On November 9, 2017, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

1. FERNANDEZ MELENDEZ, Manuel Angel (Latin: FERNÁNDEZ MELÉNDEZ, Manuel Ángel), Miranda, Venezuela; DOB 11 Jun 1966; citizen Venezuela; Gender Male; Cedula No. 6873122 (Venezuela) (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

2. HERNANDEZ DE HERNANDEZ, Socorro Elizabeth (Latin: HERNÁNDEZ DE HERNÁNDEZ, Socorro Elizabeth), Caracas, Capital District, Venezuela; DOB 11 Mar 1952; citizen Venezuela; Gender Female; Cedula No. 3977396 (Venezuela); Rector of Venezuela's National Electoral Council; Member of Venezuela's National Electoral Board (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

3. HIDROBO AMOROSO, Elvis Eduardo, Aragua, Venezuela; DOB 04 Aug 1963; POB Caracas, Venezuela; citizen Venezuela; Gender Male; Cedula No. 7659695 (Venezuela); Second Vice President of Venezuela's Constituent Assembly (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

4. MARQUEZ MONSALVE, Jorge Elieser, Caracas, District Capital, Venezuela; DOB 20 Feb 1971; citizen Venezuela; Gender Male; Cedula No. 8714253 (Venezuela); Venezuela's Minister of the Office of the Presidency (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

5. OBLITAS RUZZA, Sandra, Caracas, Capital District, Venezuela; DOB 07 Jun 1969; POB Ecuador; citizen Venezuela; Gender Female; Cedula No. 10517860 (Venezuela); Vice President of Venezuela's National Electoral Council; Rector of Venezuela's National Electoral Council; President of Venezuela's Civil and Electoral Registry Commission (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

6. OSORIO ZAMBRANO, Carlos Alberto, Miranda, Venezuela; DOB 10 Oct 1966; citizen Venezuela; Gender Male; Cedula No. 6397281 (Venezuela); President of the Superior Organ of Venezuela's Transport Mission (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

7. QUINTERO CUEVAS, Carlos Enrique, Caracas, Capital District, Venezuela; DOB 16 Feb 1972; citizen Venezuela; Gender Male; Cedula No. 10719241 (Venezuela); Alternate Rector of Venezuela's National Electoral Council; Member of Venezuela's National Electoral Board (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

8. RODRIGUEZ DIAZ, Julian Isaias (Latin: RODRÍGUEZ DÍAZ, Julián Isaías), Miranda, Venezuela; DOB 16 Dec 1942; POB Guarico, Venezuela; citizen Venezuela; Gender Male; Cedula No. 2218534 (Venezuela); Venezuelan Ambassador to Italy (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

9. VILLEGAS POLJAK, Ernesto Emilio, Caracas, Capital District, Venezuela; DOB 29 Apr 1970; citizen Venezuela; Gender Male; Cedula No. 9487963 (Venezuela); Venezuela's Minister of Culture (individual) [VENEZUELA]. Designated pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela.

Additionally, on November 9, 2017, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person are blocked pursuant to section 1(a)(ii)(C) of E.O. 13692 for being a current or former official of the Government of Venezuela. Accordingly, OFAC updated the SDN List for the following person, whose property and interests in property continue to be blocked under the Foreign Narcotics Kingpin Designation Act.

BERNAL ROSALES, Freddy Alirio; DOB 16 Jun 1962; POB San Cristobal, Tachira State, Venezuela; Cedula No. 5665018 (Venezuela); Passport B0500324 (Venezuela); Congressman, United Socialist Party of Venezuela (individual) [SDNTK].

The listing for this person now appears as follows:

BERNAL ROSALES, Freddy Alirio; Caracas, Capital District, Venezuela; DOB 16 Jun 1962; POB San Cristobal, Tachira State, Venezuela; Gender Male; Cedula No. 5665018 (Venezuela); Passport B0500324 (Venezuela); Venezuela's Minister of Urban Agriculture (individual) [SDNTK] [VENEZUELA].

Dated: November 14, 2017.

John E. Smith,

Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of 41 persons whose property and interests in property are blocked pursuant to the Global Terrorism Sanctions Regulations, and whose entries on OFAC's Specially Designated National and Blocked Persons List (SDN List) have been amended accordingly. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; Assistant Director for Licensing, tel.: 202–622–2480; or the Department of the Treasury's Office of the General Counsel: Office of the Chief Counsel (Foreign Assets Control), tel.: 202–622–2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's Web site (*www.treas.gov/ofac*).

Notice of OFAC Actions

On June 6, 2003, OFAC issued the GTSR (68 FR 34196, June 6, 2003) to implement E.O. 13224. OFAC has amended the GTSR on several occasions.

On August 2, 2017, the President signed into law the Countering America's Adversaries Through Sanctions Act, Public Law 115–44, Aug. 2, 2017, 131 Stat. 886 (22 U.S.C. 9401 *et seq.*) (CAATSA). Section 105(b) of CAATSA requires the President to impose the sanctions applicable with respect to a foreign person pursuant to the global terrorism Executive Order 13224 of September 23, 2001 (66 FR 49079, September 25, 2001) (E.O. 13224) on Iran's Islamic Revolutionary Guard Corps (IRGC) and foreign persons that are officials, agents, or affiliates of the IRGC. Such sanctions must be imposed beginning on the date that is 90 days after enactment of CAATSA, which was October 31, 2017.

Consistent with Section 105(b) of CAATSA, OFAC designated the IRGC on October 13, 2017, pursuant to E.O. 13224 for providing support to the IRGC-Qods Force, which previously had been designated for its support to various terrorist groups. OFAC also issued an amendment to the GTSR, effective October 31, 2017, adding § 594.201(a)(5) to Subpart B of the GTSR to include the following as persons whose property and interests in property are blocked pursuant to the GTSR: Foreign persons that are identified on the SDN List maintained by OFAC as officials, agents, or affiliates of the IRGC (82 FR 50313, October 31, 2017).

The names of persons whose property and interests in property are blocked pursuant to section 594.201(a) of the GTSR are published in the **Federal Register** and incorporated into the SDN List with the identifier ''[SDGT].'' Upon publication of the above-referenced GTSR amendment in the **Federal Register** on October 31, 2017, the following 41 persons became persons whose property and interests in property are blocked pursuant to section 594.201(a)(5) of the GTSR. Accordingly, OFAC has added the reference ''[SDGT]'' to their SDN List entries.

Individuals

1. AHMADIAN, Ali Akbar (a.k.a. AHMADIYAN, Ali Akbar); DOB circa 1961; POB Kerman, Iran; nationality Iran; citizen Iran; Additional Sanctions Information—Subject to Secondary Sanctions (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

2. ARAGHI, Abdollah (a.k.a. ARAQI, Abdollah; a.k.a. ARAQI, Abdullah; a.k.a. ERAGHI, Abdollah; a.k.a. ERAQI, Abdollah); DOB 1945; POB Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Lieutenant Commander, IRGC Ground Force; Deputy Commander, IRGC Ground Forces; Brigadier General; Former Commander, Greater Tehran's Mohammad Rasulollah IRGC; Former Chief, Greater Tehran Revolutionary Guards (individual) [SDGT] [IRGC] [IRAN–HR].

3. FATTAH, Parviz (a.k.a. FATTAH-QAREHBAGHI, Parviz); DOB 1961; alt. DOB 1962; POB Urmia, Iran; Additional Sanctions Information—Subject to Secondary Sanctions (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

4. FORUZANDEH, Ahmed (a.k.a. FAYRUZI, Ahmad; a.k.a. FOROOZANDEH, Ahmad; a.k.a. FORUZANDEH, Ahmad; a.k.a. FRUZANDAH, Ahmad; a.k.a. ''ABU AHMAD ISHAB''; a.k.a. ''ABU SHAHAB''; a.k.a. ''JAFARI''), Qods Force Central Headquarters, Former U.S. Embassy Compound, Tehran, Iran; DOB circa 1960; alt. DOB 1957; alt. DOB circa 1955; alt. DOB circa 1958; alt. DOB circa 1959; alt. DOB circa 1961; alt. DOB circa 1962; alt. DOB circa 1963; POB Kermanshah, Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Brigadier General, Commanding Officer of the Iranian Islamic Revolutionary Guard Corps-Qods Force Ramazan Corps; Deputy Commander of the Ramazan Headquarters; Chief of Staff of the Iraq Crisis Staff (individual) [SDGT] [IRAQ3] [IRGC].

5. HEJAZI, Mohammad; DOB circa 1959; nationality Iran; citizen Iran; Additional Sanctions Information—Subject to Secondary Sanctions (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

6. JAFARI, Mohammad Ali (a.k.a. JAFARI, Ali; a.k.a. JA'FARI, Mohammad Ali; a.k.a. JAFARI-NAJAFABADI, Mohammad Ali; a.k.a. ''JA'FARI, Aziz''), c/o IRGC, Tehran, Iran; DOB 01 Sep 1957; POB Yazd, Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Commander-in-Chief, Islamic Revolutionary Guard Corps; Commander, Islamic Revolutionary Guard Corps; Major General; Brigadier Commander (individual) [SDGT] [NPWMD] [IRGC] [IFSR] [IRAN–HR].

7. NAQDI, Mohammad Reza (a.k.a. NAGHDI, Mohammad Reza; a.k.a. NAQDI, Muhammad; a.k.a. SHAMS, Mohammad Reza); DOB circa 1952; alt. DOB circa Mar 1961; alt. DOB circa Apr 1961; alt. DOB 1953; POB Najaf, Iraq; alt. POB Tehran, Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Brigadier General and Commander of the IRGC Basij Resistance Force; President of the Organization of the Basij of the Oppressed; Chief of the Mobilization of the Oppressed Organization; Head of the Basij (individual) [SDGT] [NPWMD] [IRGC] [IFSR] [IRAN–HR].

8. QASEMI, Rostam (a.k.a. GHASEMI MOHAMMADALI, ROSTAM), Iran; nationality Iran; citizen Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Passport A2463775 (Iran) (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

9. REZAIE, Morteza (a.k.a. REZAI, Morteza); DOB circa 1956; nationality Iran; citizen Iran; Additional Sanctions Information—Subject to Secondary Sanctions (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

10. SAFAVI, Yahya Rahim (a.k.a. AL-SIFAWI, Yahya Rahim; a.k.a. RAHIM SAFAWI, Yahia; a.k.a. RAHIM-SAFAVI, Yahya; a.k.a. SAFAVI, Rahim; a.k.a. YAHYA RAHIM-SAFAVI, Seyyed; a.k.a. YAHYA SAFAVI, Sayed); DOB circa 1952; POB Esfahan, Iran; Additional Sanctions Information—Subject to Secondary Sanctions (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

11. SALIMI, Hosein (a.k.a. SALAMI, Hoseyn; a.k.a. SALAMI, Hossein; a.k.a. SALAMI, Hussayn); nationality Iran; citizen Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Passport D08531177 (Iran) (individual) [SDGT] [NPWMD] [IRGC] [IFSR].

12. TAEB, Hossein (a.k.a. TAEB, Hassan; a.k.a. TAEB, Hosein; a.k.a. TAEB, Hussayn); DOB 1963; POB Tehran, Iran; Additional Sanctions Information—Subject to Secondary Sanctions; Deputy Commander for Intelligence, Islamic Revolutionary Guard Corps; Hojjatoleslam; Former Commander of the Basij Forces (individual) [SDGT] [IRGC] [IRAN–HR].

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee: National Academic Affiliations Council, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act that a meeting of the National Academic Affiliations Council (NAAC) will be held December 6, 2017—December 7, 2017 in Washington, DC The December 6, 2017 session will be held in the Sonny Montgomery Conference Center, Room 230, 810 Vermont Avenue NW., Washington, DC 20420. This session will begin at 8:30 a.m. and end at 4:30 p.m. The December 7, 2017 session will held in the Sonny Montgomery Conference Center, Room 230, 810 Vermont Avenue NW., Washington, DC 20420. This session will begin at 8:30 a.m. and adjourn by 2:15 p.m. The meetings are open to the public.

The purpose of the Council is to advise the Secretary on matters affecting partnerships between VA and its academic affiliates.

On December 6, 2017, the Council will review the status of its previous recommendations and receive a series of informational briefings on the budget, staffing, and functional alignment of the VA Office of Academic Affiliations. During the afternoon, the Council will explore several proposed physician recruitment initiatives to strengthen VA's clinical workforce pipeline, review efforts to minimize the adverse impact of several VA IT security policies on affiliate trainees; and receive a progress report on VA's newly launched Trainee Satisfaction Survey.

On December 7, 2017, the Council will receive presentations on VA's efforts to strengthen its academic affiliations between historically black colleges and universities and VA medical centers as well as the NAAC's Subcommittee on Diversity and Inclusion. The Members will also discuss the themes and outcomes of Secretary Shulkin's November 2017 address to the Association of American Medical Colleges and an update on plans to constitute an internal VA advisory committee on affiliation issues. During lunch, the Council will receive a series of short updates on areas of continuing interest: The revised waiver process for those VA employees with relationships with for-profit educational institutions and the Office of Personnel Management's proposed rule to limit the availability of administrative leave for Federal employees. The Council will receive public comments from 4:15 p.m. to 4:30 p.m. on December 6, 2017 and again at or before 2:00 p.m. to 2:15 p.m. on December 7, 2017.

Interested persons may attend and present oral statements to the Council. A sign-in sheet for those who want to give comments will be available at the meeting. Individuals who speak are invited to submit a 1–2 page summary of their comments at the time of the meeting for inclusion in the official meeting record. Oral presentations will be limited to five minutes or less, depending on the number of participants. Interested parties may also provide written comments for review by the Council prior to the meeting or at any time, via email to, *Steve.Trynosky@va.gov,* or by mail to Stephen K. Trynosky JD, MPH, MMAS, Designated Federal Officer, Office of Academic Affiliations (10A2D), 810 Vermont Avenue NW., Washington, DC 20420. Any member of the public wishing to attend or seeking additional information should contact Mr. Trynosky via email or by phone at (202) 461–6723. Because the meeting will be held in a Government building, anyone attending must be prepared to submit to security screening and present a valid photo I.D. Please allow at least 15 minutes prior to the meeting for this process.

Dated: November 14, 2017.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

Part II

Bureau of Consumer Financial Protection

12 CFR Part 1041

Payday, Vehicle Title, and Certain High-Cost Installment Loans; Final Rule

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Part 1041

[Docket No. CFPB–2016–0025]

RIN 3170–AA40

Payday, Vehicle Title, and Certain High-Cost Installment Loans

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Final rule; official interpretations.

SUMMARY: The Bureau of Consumer Financial Protection (Bureau or CFPB) is issuing this final rule establishing regulations creating consumer protections for certain consumer credit products and the official interpretations to the rule. First, the rule identifies it as an unfair and abusive practice for a lender to make covered short-term or longer-term balloon-payment loans, including payday and vehicle title loans, without reasonably determining that consumers have the ability to repay the loans according to their terms. The rule exempts certain loans from the underwriting criteria prescribed in the rule if they have specific consumer protections. Second, for the same set of loans along with certain other high-cost longer-term loans, the rule identifies it as an unfair and abusive practice to make attempts to withdraw payment from consumers' accounts after two consecutive payment attempts have failed, unless the consumer provides a new and specific authorization to do so. Finally, the rule prescribes notices to consumers before attempting to withdraw payments from their account, as well as processes and criteria for registration of information systems, for requirements to furnish and obtain information from them, and for compliance programs and record retention. The rule prohibits evasions and operates as a floor leaving State and local jurisdictions to adopt further regulatory measures (whether a usury limit or other protections) as appropriate to protect consumers.

DATES:

Effective Date: This regulation is effective January 16, 2018. *Compliance Date:* Sections 1041.2 through 1041.10, 1041.12, and 1041.13 have a compliance date of August 19, 2019.

Application Deadline: The deadline to submit an application for preliminary approval for registration pursuant to § 1041.11(c)(1) is April 16, 2018.

FOR FURTHER INFORMATION CONTACT: Sarita Frattaroli, Counsel; Mark Morelli, Michael G. Silver, Steve Wrone, Senior Counsels; Office of Regulations; Consumer Financial Protection Bureau, at 202–435–7700 or *cfpb_reginquiries@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

I. Summary of the Final Rule

On June 2, 2016, the Bureau issued proposed consumer protections for payday loans, vehicle title loans, and certain high-cost installment loans. The proposal was published in the **Federal Register** on July 22, 2016.[1] Following a public comment period and review of comments received, the Bureau is now issuing this final rule with consumer protections governing the underwriting of covered short-term and longer-term balloon-payment loans, including payday and vehicle title loans. The rule also contains disclosure and payment withdrawal attempt requirements for covered short-term loans, covered longer-term balloon-payment loans, and certain high-cost covered longer-term loans.

Covered short-term loans are typically used by consumers who are living paycheck to paycheck, have little to no access to other credit products, and seek funds to meet recurring or one-time expenses. The Bureau has conducted extensive research on these products, in addition to several years of outreach and review of the available literature. The Bureau issues these regulations primarily pursuant to its authority under section 1031 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) to identify and prevent unfair, deceptive, or abusive acts or practices.[2] The Bureau is also using authorities under section 1022 of the Dodd-Frank Act to prescribe rules and make exemptions from such rules as is necessary or appropriate to carry out the purposes and objectives of the Federal consumer financial laws,[3] section 1024 of the Dodd-Frank Act to facilitate supervision of certain non-bank financial service providers,[4] and section 1032 of the Dodd-Frank Act to require disclosures to convey the costs, benefits, and risks of particular consumer financial products or services.[5]

The Bureau is not, at this time, finalizing the ability-to-repay determination requirements proposed for certain high-cost installment loans, but it is finalizing those requirements as to covered short-term and longer-term balloon-payment loans. The Bureau is also finalizing certain disclosure, notice, and payment withdrawal attempt requirements as applied to covered short-term loans, longer-term balloon-payment loans, and high-cost longer-term loans at this time.

The Bureau is concerned that lenders that make covered short-term loans have developed business models that deviate substantially from the practices in other credit markets by failing to assess consumers' ability to repay their loans according to their terms and by engaging in harmful practices in the course of seeking to withdraw payments from consumers' accounts. The Bureau has concluded that there is consumer harm in connection with these practices because many consumers struggle to repay unaffordable loans and in doing so suffer a variety of adverse consequences. In particular, many consumers who take out these loans appear to lack the ability to repay them and face one of three options when an unaffordable loan payment is due: Take out additional covered loans (''re-borrow''), default on the covered loan, or make the payment on the covered loan and fail to meet basic living expenses or other major financial obligations. As a result of these dynamics, a substantial population of consumers ends up in extended loan sequences of unaffordable loans. Longer-term balloon-payment loans, which are less common in the marketplace today, raise similar risks.

In addition, many lenders may seek to obtain repayment of covered loans directly from consumers' accounts. The Bureau is concerned that consumers may be subject to multiple fees and other harms when lenders make repeated unsuccessful attempts to withdraw funds from their accounts. In these circumstances, further attempts to withdraw funds from consumers' accounts are very unlikely to succeed, yet they clearly result in further harms to consumers.

A. Scope of the Rule

The rule applies to two types of covered loans. First, it applies to short-term loans that have terms of 45 days or less, including typical 14-day and 30-day payday loans, as well as short-term vehicle title loans that are usually made for 30-day terms, and longer-term balloon-payment loans. The underwriting portion of the rule applies to these loans. Second, certain parts of the rule apply to longer-term loans with terms of more than 45 days that have (1) a cost of credit that exceeds 36 percent per annum; and (2) a form of ''leveraged

[1] Payday, Vehicle Title, and Certain High-Cost Installment Loans, 81 FR 47864 (July 22, 2016).

[2] Public Law 111–203, section 1031(b), 124 Stat. 1376 (2010) (hereinafter Dodd-Frank Act).

[3] Dodd-Frank Act section 1022(b).

[4] Dodd-Frank Act section 1024(b)(7).

[5] Dodd-Frank Act section 1032(a).

payment mechanism'' that gives the lender a right to withdraw payments from the consumer's account. The payments part of the rule applies to both categories of loans. The Bureau had proposed parallel underwriting requirements for high-cost covered longer-term loans. However, at this time, the Bureau is not finalizing the ability-to-repay portions of the rule as to covered longer-term loans other than those with balloon payments.

The rule excludes or exempts several types of consumer credit, including: (1) Loans extended solely to finance the purchase of a car or other consumer good in which the good secures the loan; (2) home mortgages and other loans secured by real property or a dwelling if recorded or perfected; (3) credit cards; (4) student loans; (5) non-recourse pawn loans; (6) overdraft services and lines of credit; (7) wage advance programs; (8) no-cost advances; (9) alternative loans (similar to loans made under the Payday Alternative Loan program administered by the National Credit Union Administration); and (10) accommodation loans.

B. Ability-to-Repay Requirements and Alternative Requirements for Covered Short-Term Loans

The rule identifies it as an unfair and abusive practice for a lender to make covered short-term or longer-term balloon-payment loans without reasonably determining that the consumers will have the ability to repay the loans according to their terms. The rule prescribes requirements to prevent this practice and thus the specific harms to consumers that the Bureau has identified as flowing from the practice, including extended loan sequences for a substantial population of consumers.

The first set of requirements addresses the underwriting of these loans. A lender, before making a covered short-term or longer-term balloon-payment loan, must make a reasonable determination that the consumer would be able to make the payments on the loan and be able to meet the consumer's basic living expenses and other major financial obligations without needing to re-borrow over the ensuing 30 days. Specifically, a lender is required to:

- Verify the consumer's net monthly income using a reliable record of income payment, unless a reliable record is not reasonably available;
- Verify the consumer's monthly debt obligations using a national consumer report and a consumer report from a ''registered information system'' as described below;
- Verify the consumer's monthly housing costs using a national consumer report if possible, or otherwise rely on the consumer's written statement of monthly housing expenses;
- Forecast a reasonable amount for basic living expenses, other than debt obligations and housing costs; and
- Determine the consumer's ability to repay the loan based on the lender's projections of the consumer's residual income or debt-to-income ratio.

Furthermore, a lender is prohibited from making a covered short-term loan to a consumer who has already taken out three covered short-term or longer-term balloon-payment loans within 30 days of each other, for 30 days after the third loan is no longer outstanding.

Second, and in the alternative, a lender is allowed to make a covered short-term loan without meeting all the specific underwriting criteria set out above, as long as the loan satisfies certain prescribed terms, the lender confirms that the consumer meets specified borrowing history conditions, and the lender provides required disclosures to the consumer. Among other conditions, under this alternative approach, a lender is allowed to make up to three covered short-term loans in short succession, provided that the first loan has a principal amount no larger than $500, the second loan has a principal amount at least one-third smaller than the principal amount on the first loan, and the third loan has a principal amount at least two-thirds smaller than the principal amount on the first loan. In addition, a lender is not allowed to make a covered short-term loan under the alternative requirements if it would result in the consumer having more than six covered short-term loans during a consecutive 12-month period or being in debt for more than 90 days on covered short-term loans during a consecutive 12-month period. A lender is not permitted to take vehicle security in connection with loans that are made according to this alternative approach.

C. Payment Practices Rules

The rule identifies it as an unfair and abusive practice for a lender to make attempts to withdraw payment from consumers' accounts in connection with a short-term, longer-term balloon-payment, or high-cost longer-term loan after the lender's second consecutive attempts to withdraw payments from the accounts from which the prior attempts were made have failed due to a lack of sufficient funds, unless the lender obtains the consumers' new and specific authorization to make further withdrawals from the accounts. The Bureau found that in these circumstances, further attempted withdrawals are highly unlikely to succeed, but clearly impose harms on consumers who are affected. This prohibition on further withdrawal attempts applies whether the two failed attempts are initiated through a single payment channel or different channels, such as the automated clearinghouse system and the check network. The rule requires that lenders must provide notice to consumers when the prohibition has been triggered and follow certain procedures in obtaining new authorizations.

In addition to the requirements related to the prohibition on further payment withdrawal attempts, a lender is required to provide a written notice, depending on means of delivery, a certain number of days before its first attempt to withdraw payment for a covered loan from a consumer's checking, savings, or prepaid account or before an attempt to withdraw such payment in a different amount than the regularly scheduled payment amount, on a date other than the regularly scheduled payment date, by a different payment channel than the prior payment, or to re-initiate a returned prior transfer. The notice must contain key information about the upcoming payment attempt and, if applicable, alert the consumer to unusual payment attempts. A lender is permitted to provide electronic notices as long as the consumer consents to electronic communications.

D. Additional Requirements

The rule requires lenders to furnish to provisionally registered and registered information systems certain information concerning covered short-term and longer-term balloon-payment loans at loan consummation, during the period that the loan is an outstanding loan, and when the loan ceases to be an outstanding loan. To be eligible to become a provisionally registered or registered information system, an entity must satisfy the eligibility criteria prescribed in the rule. The rule provides for a registration process that will allow information systems to be registered, and lenders to be ready to furnish required information, at the time the furnishing obligation in the rule takes effect. Consumer reports provided by registered information systems will include a reasonably comprehensive record of a consumer's recent and current use of covered short-term and longer-term balloon-payment loans. Before making covered short-term and longer-term balloon-payment loans, a lender is required to obtain and consider a consumer report from a registered information system.

A lender is required to establish and follow a compliance program and retain certain records. A lender is also required to develop and follow written policies and procedures that are reasonably designed to ensure compliance with the requirements in this rule. Furthermore, a lender is required to retain the loan agreement and documentation obtained for any covered loan or an image thereof, as well as electronic records in tabular format regarding origination calculations and determinations for a short-term or longer-term balloon-payment loan, and regarding loan type and terms. The rule also includes an anti-evasion clause to address the kinds of concerns the Bureau noted in connection with the evasive actions that lenders in this market took in response to the regulations originally adopted on loans made to servicemembers under the Military Lending Act.

E. Effective and Compliance Dates/ Application Deadline [6]

The final rule will become effective January 16, 2018, 60 days after publication of the final rule in the **Federal Register**. Compliance with §§ 1041.2 through 1041.10, 1041.12, and 1041.13 will be required beginning August 19, 2019, 21 months after publication of the final rule in the **Federal Register**. The deadline to submit an application for preliminary approval for registration pursuant to § 1041.11(c)(1) will be April 16, 2018, 150 days after publication of the final rule in the **Federal Register**. The effective and compliance dates and application deadline are structured to facilitate an orderly implementation process.

II. Background

A. Introduction

For most consumers, credit provides a means of purchasing goods or services and spreading the cost of repayment over time. This is true of the three largest consumer credit markets: The market for mortgages ($10.3 trillion in outstanding balances), for student loans ($1.4 trillion), and for auto loans ($1.1 trillion). This is also one way in which certain types of open-end credit—including home equity loans ($0.13 trillion) and lines of credit ($0.472 trillion)—and at least some credit cards and revolving credit ($1.0 trillion)—can be used.[7]

In addition to the credit markets described above, consumers living paycheck to paycheck and with little to no savings have also used credit as a means of coping with financial shortfalls. These shortfalls may be due to mismatched timing between income and expenses, misaligned cash flows, income volatility, unexpected expenses or income shocks, or expenses that simply exceed income.[8] According to a recent survey conducted by the Board of Governors of the Federal Reserve System (Federal Reserve Board), 44 percent of adults reported they would either be unable to cover an emergency expense costing $400 or would have to sell something or borrow money to cover it, and 30 percent reported that they found it ''difficult to get by'' or were ''just getting by'' financially.[9] Whatever the cause of these financial shortfalls, consumers in these situations sometimes seek what may broadly be termed a ''liquidity loan.'' [10] There are a variety of loans and products that consumers use for these purposes including credit cards, deposit account overdraft, pawn loans, payday loans, vehicle title loans, and installment loans.

Credit cards and deposit account overdraft services are each already subject to specific Federal consumer protection regulations and requirements. The Bureau generally considers these markets to be outside the scope of this rulemaking as discussed further below. The Bureau is also separately engaged in research and evaluation of potential rulemaking actions on deposit account overdraft.[11]

---

[6] The description of effective dates in this document differs from the description of effective dates in the final rule as issued on the Bureau's Web site on October 5, 2017, which provided that the regulation would be effective 21 months after date of publication in the **Federal Register**, except for § 1041.11, which would be effective 60 days after date of publication in the **Federal Register**. The rule published in the **Federal Register** provides that, for purposes of codification in the Code of Federal Regulations, this regulation is effective 60 days after date of publication in the **Federal Register**. Sections 1041.2 through 1041.10, 1041.12, and 1041.13 have a compliance date of 21 months after date of publication in the **Federal Register**. This change is a technical correction to allow for clear cross-references within sections in the Code of Federal Regulations. It is not substantive and does not affect the dates by which regulated entities must comply with sections of the regulation.

Other minor technical corrections and clarifications have been made to the final rule as issued on the Bureau's Web site on October 5, 2017. To the extent that section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553, applies, there is good cause to publish all of these changes without notice and comment. Under the APA, notice and opportunity for public comment are not required if the Bureau finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). The Bureau has determined that notice and comment are unnecessary because the technical corrections in this final rule allow for proper formatting in the Code of Federal Regulations, correct inadvertent technical errors, and align and harmonize provisions of the regulation. These changes are routine and insignificant in nature and impact, and do not change the scope of the rule or regulatory burden. Therefore, the technical corrections are adopted in final form.

[10] If a consumer's expenses consistently exceed income, a liquidity loan is not likely to be an appropriate solution to the consumer's needs.

[11] Credit cards and deposit overdraft services would have been excluded from the proposed rule under proposed § 1041.3(e)(3) and (6) as discussed further below. On October 5, 2016, the Bureau released a final rule on prepaid accounts. Among other things, the rule regulates overdraft credit features offered in connection with prepaid accounts, and generally covers under Regulation Z's credit card rules any such credit feature that is offered by the prepaid account issuer, its affiliate, or its business partner where credit can be accessed in the course of a transaction conducted with a prepaid card. 81 FR 83934 (Nov. 22, 2016). The Bureau later published a final rule delaying the October 1, 2017, effective date of that rule by six months, to April 1, 2018. 82 FR 18975 (Apr. 25, 2017). In preparation for a potential rulemaking regarding possible consumer protection concerns with overdraft programs on checking accounts, the Bureau issued the Notice and Request for Information on the Impacts of Overdraft Programs on Consumers, 77 FR 12031 (Feb. 28, 2012); *see* Kelly Cochran, ''Spring 2017 Rulemaking Agenda,'' CFPB Blog (July 20, 2017), *available at https://www.consumerfinance.gov/about-us/blog/spring-2017-rulemaking-agenda/.* In 2015, banks with over $1 billion in assets reported overdraft and NSF (nonsufficient funds) fee revenue of $11.16 billion. *See* Gary Stein, ''New Insights on Bank Overdraft Fees and 4 Ways to Avoid Them,'' CFPB Blog (Feb. 25, 2016), *available at https://www.consumerfinance.gov/about-us/blog/new-insights-on-bank-overdraft-fees-and-4-ways-to-avoid-them/.* The $11.16 billion total does not include credit union overdraft fee revenue and does not separate out overdraft from NSF amounts but overall, overdraft fee revenue accounts for about 72 percent of that amount. Bureau of Consumer Fin. Prot., ''Data Point: Checking Account Overdraft,'' at 10 (2014), *available at http://files.consumerfinance.gov/f/201407_cfpb_report_data-point_overdrafts.pdf.* The Federal Reserve Board has adopted a set of regulations of overdraft services. *See* Electronic Fund Transfers, 75 FR 31665 (June 4, 2010). In addition, the Bureau has published three research reports on overdraft. *See* Bureau of Consumer Fin. Prot., ''Data Point: Frequent Overdrafters'' (2017), *available at http://*

Another liquidity option—pawn—generally involves non-recourse loans made against the value of whatever item a consumer chooses to give the lender in return for the funds.[12] The consumer has the option to either repay the loan or permit the pawnbroker to retain and sell the pawned property at the end of the loan term, relieving the borrower from any additional financial obligation. This feature distinguishes pawn loans from most other types of liquidity loans. The Bureau is excluding non-recourse possessory pawn loans, as described in proposed § 1041.3(e)(5), from the scope of this rulemaking.

This rulemaking is focused on two general categories of liquidity loan products: (1) Short-term loans and longer-term balloon-payment loans; and (2) with regard to payment practices, a broader set of liquidity loan products that also includes certain higher-cost longer-term installment loans. The largest category of short-term loans are ''payday loans,'' which are generally required to be repaid in a lump-sum single-payment on receipt of the borrower's next income payment, and short-term vehicle title loans, which are also almost always due in a lump-sum single-payment, typically within 30 days after the loan is made. The final rule's underwriting requirements also apply to depository advance products and other loans of 45 days or less in duration, as well as certain longer-term balloon-payment loans that generally involve a series of small, often interest-only, payments followed by a single final large lump sum payment. The final rule's payment presentment requirements apply to short-term and longer-term balloon-payment products, as well as to certain higher-cost longer-term installment loans. That latter category includes what are often referred to as ''payday installment loans''—that is, loans that are repaid in multiple installments with each installment typically due on the borrower's payday or regularly scheduled income payment and with the lender having the ability to automatically collect payments from an account into which the income payment is deposited. In addition, the latter category includes certain high-cost installment loans made by more traditional finance companies.

This rulemaking includes both closed-end loans and open-end lines of credit.[13] As described in the section-by-section analysis, the Bureau has been studying these markets for liquidity loans for over five years, gaining insights from a variety of sources. During this time the Bureau has conducted supervisory examinations of a number of payday lenders and enforcement investigations of a number of different types of liquidity lenders, which have given the Bureau insights into the business models and practices of such lenders. Through these processes, and through market monitoring activities, the Bureau also has obtained extensive loan-level data that the Bureau has studied to better understand risks to consumers.[14] The Bureau has published five reports based upon these data.[15] The Bureau has also carefully reviewed the published literature with respect to small-dollar liquidity loans and a number of outside researchers have presented their research at seminars for Bureau staff. In addition, over the course of the past five years the Bureau has engaged in extensive outreach with a variety of stakeholders in both formal and informal settings, including several Bureau field hearings across the country specifically focused on the subject of small-dollar lending, meetings with the Bureau's standing advisory groups, meetings with State and Federal regulators, meetings with consumer advocates, religious groups, and industry trade associations, Tribal consultations, and through a Small Business Review Panel process as described further below. As described in Summary of the Rulemaking Process, the Bureau received and reviewed over one million comments on its proposal, mostly from lenders and borrowers within the respective markets.

This Background section provides a brief description of the major components of the markets for short-term loans and longer-term balloon-payment loans, describing the product parameters, industry size and structure, lending practices, and business models of major market segments. The Background section also provides a brief overview of the additional markets for higher-cost longer-term installment loans that are subject to the payment practices components of the final rule. This section also describes recent State and Federal regulatory activity in connection with these various product markets. Market Concerns—Underwriting below, provides a more detailed description of consumer experiences with short-term loans describing research about which consumers use the products, why they use the products, and the outcomes they experience as a result of the product structures and industry practices. The Background section also includes an

Caskey, ''Fringe Banking: Cash-Checking Outlets, Pawnshops, and the Poor,'' at Chapter 2 (New York: Russell Sage Foundation 1994).

[13] The Dodd-Frank Act does not define ''payday loan,'' though it refers to the term in section 1024(a)(1)(E), and the Bureau is not proposing to define it in this rulemaking. The Bureau may do so in a subsequent rulemaking or in another context. In addition, the Bureau notes that various State, local, and Tribal jurisdictions may define ''payday loans'' in ways that may be more or less coextensive with the coverage of the Bureau's rule.

[14] Information underlying this proposed rule is derived from a variety of sources, including from market monitoring and outreach, third-party studies and data, consumer complaints, the Bureau's enforcement and supervisory work, and the Bureau's expertise generally. In publicly discussing information, the Bureau has taken steps not to disclose confidential information inappropriately and to otherwise comply with applicable law and its own rules regarding disclosure of records and information. *See* 12 CFR 1070.41(c).

extensive description of the methods by which lenders initiate payments from consumers' accounts. Market Concerns—Payments, below, describes consumer experiences and concerns with these payment practices. Most of the comments received on the proposal's Background section agreed in general terms with the descriptions of the markets and products described below, although there may be slight differences in individual lenders' loan products and business practices. Comments that provided significantly different information are noted below.

B. Short-Term, Hybrid, and Balloon-Payment Loans

Providing short-term loans for liquidity needs has been a long-term challenge in the consumer financial services market due to the fixed costs associated with loan origination regardless of loan size. At the beginning of the twentieth century, concern arose with respect to companies that were responding to liquidity needs by offering to ''purchase'' a consumer's paycheck in advance of it being paid. These companies charged fees that, if calculated as an annualized interest rate, were as high as 400 percent.[16] To address these concerns, between 1914 and 1943, 34 States enacted a form of the Uniform Small Loan Law, which was a model law developed by the Russell Sage Foundation. That law provided for lender licensing and permitted interest rates of between 2 and 4 percent per month, or 24 to 48 percent per year. Those rates were substantially higher than pre-existing usury limits (which generally capped interest rates at between 6 and 8 percent per year) but were viewed by proponents as ''equitable to both borrower and lender.''[17]

New forms of short-term small-dollar lending appeared in several States in the 1990s,[18] starting with check cashing outlets that would hold a customer's personal check for a period of time for a fee before cashing it (''check holding'' or ''deferred presentment''). One of the larger payday lenders began making payday loans in Kansas in 1992, and that same year at least one State regulator issued an administrative interpretation holding that deferred presentment activities were consumer loans subject to that State's licensing and consumer lending laws.[19] One commenter described his role in developing and expanding the deferred presentment lending industry in Tennessee in the early 1990s prior to any regulation in that State, while noting that those same activities required lending licenses in two nearby States.

Several market factors converged around the same time that spurred the development of these new forms of short-term small-dollar lending. Consumers were using credit cards more frequently for short-term liquidity lending needs, a trend that continues today.[20] Storefront finance companies, described below in part II.C, that had provided small loans changed their focus to larger, collateralized products, including vehicle financing and real estate secured loans. At the same time there was substantial consolidation in the storefront installment lending industry. Depository institutions similarly moved away from short-term small-dollar loans.

Around the same time, a number of State legislatures amended their usury laws to allow lending by a broader group of both depository and non-depository lenders by increasing maximum allowable State interest rates or eliminating State usury laws, while other States created usury carve-outs or special rules for short-term loans.[21] The confluence of these trends has led to the development of markets offering what are commonly referred to as payday loans (also known as cash advance loans, deferred deposit, and deferred presentment loans depending on lender and State law terminology), and short-term vehicle title loans that are much shorter in duration than vehicle-secured loans that have traditionally been offered by storefront installment lenders and depository institutions. Although payday loans initially were distributed through storefront retail outlets, they are now also widely available on the Internet. Vehicle title loans are typically offered exclusively at storefront retail outlets.

These markets as they have evolved over the last two decades are not strictly segmented. There is substantial overlap between market products and the borrowers who use them. For example, in a 2015 survey, almost 14.8 percent of U.S. households that had used a payday loan in the prior year had also used a vehicle title loan.[22] There is also an established trend away from ''monoline'' or single-product lending companies. Thus, for example, a number of large payday lenders also offer vehicle title and installment loans.[23] The following discussion nonetheless provides a description of major product types.

Storefront Payday Loans

The market that has received the greatest attention among policy makers, advocates, and researchers is the market for single-payment payday loans. These payday loans are short-term small-dollar loans generally repayable in a single payment due when the consumer is scheduled to receive a paycheck or other inflow of income (*e.g.,* government

[16] Salary advances were structured as wage assignments rather than loans to evade much lower State usury caps of about 8 percent per annum or less. John P. benefits).[24] For most borrowers, the loan is due in a single payment on their payday, although State laws with minimum loan terms—seven days for example—or lender practices may affect the loan duration in individual cases. The Bureau refers to these short-term payday loans available at retail locations as ''storefront payday loans,'' but the requirements for borrowers taking online payday loans are generally similar, as described below. There are now 35 States that either have created a carve-out from their general usury cap for payday loans or have no usury caps on consumer loans.[25] The remaining 15 States and the District of Columbia either ban payday loans or have fee or interest rate caps that payday lenders apparently find too low to sustain their business models. As discussed further below, several of these States previously had authorized payday lending but subsequently changed their laws.

Product definition and regulatory environment. As noted above, payday loans are typically repayable in a single payment on the borrower's next payday. In order to help ensure repayment, in the storefront environment the lender generally holds the borrower's personal check made out to the lender—usually post-dated to the loan due date in the amount of the loan's principal and fees—or the borrower's authorization to electronically debit the funds from her checking account, commonly known as an automated clearing house (ACH) transaction.[26] Payment methods are described in more detail below in part II.D.

Payday loan sizes vary depending on State law limits, individual lender credit models, and borrower demand. Many States set a limit on payday loan size; $500 is a common loan limit although the limits range from $300 to $1,000.[27] In 2013, the Bureau reported that the median loan amount for storefront payday loans was $350, based on supervisory data.[28] This finding is broadly consistent with other studies using data from one or more lenders as well as with self-reported information in surveys of payday borrowers[29] and State regulatory reports.[30]

The fee for a payday loan is generally structured as a percentage or dollar amount per $100 borrowed, rather than a periodic interest rate based on the amount of time the loan is outstanding. Many State laws set a maximum amount for these fees, with 15 percent ($15 per $100 borrowed) being the most common limit.[31] The median storefront payday loan fee is $15 per $100; thus for a $350 loan, the borrower must repay $52.50 in finance charges together with the $350 borrowed for a total repayment amount of $402.50.[32] The annual percentage rate (APR) on a 14-day loan with these terms is 391 percent.[33] For payday borrowers

[24] For convenience, this discussion refers to the next scheduled inflow of income as the consumer's next ''payday'' and the inflow itself as the consumer's ''paycheck'' even though these are misnomers for consumers whose income comes from government benefits.

[31] Of the States that expressly authorize payday lending, Rhode Island has the lowest cap at 10 percent of the loan amount. Florida has the same fee amount but also allows a flat $5 verification fee. Oregon's fees are $10 per $100 capped at $30 plus 36 percent interest. Some States have tiered caps depending on the size of the loan. Generally, in these States the cap declines with loan size. However, in Mississippi, the cap is $20 per $100 for loans under $250 and $21.95 for larger loans (up to the State maximum of $500). Six States do not cap fees on payday loans or are silent on fees (Delaware, Idaho, Nevada, and Texas (no cap on credit access business fees) and Utah and Wisconsin (silent on fees)). Depending on State law, the fee may be referred to as a ''charge,'' ''rate,'' ''interest,'' or other similar term. R.I. Gen. Laws sec. 19–14.4–4(4); Fla. Stat. sec. 560.404(6); Or. Rev. [33] Throughout part II, APR refers to the annual percentage rate calculated as required by the Truth in Lending Act, 15 U.S.C. 1601 *et seq.* and

Continued

who receive monthly income and thus receive a 30-day or monthly payday loan—many of whom are Social Security recipients [34]—a $15 per $100 charge on a $350 loan for a term of 30 days equates to an APR of about 180 percent. The Bureau has found the median loan term for a storefront payday loan to be 14 days, with an average term of 18.3 days. The longer average loan duration is due to State laws that require minimum loan terms that may extend beyond the borrower's next pay date.[35] Fees and loan amounts are higher for online loans, described in more detail below.

On the loan's due date, the terms of the loan obligate the borrower to repay the loan in full. Although the States that created exceptions to their usury limits for payday lending generally did so on the theory these were short-term loans to which the usual usury rules did not easily apply, in 18 of the States that authorize payday lending the lender is permitted to roll over the loan when it comes due. A rollover occurs when, instead of repaying the loan in full at maturity, the consumer pays only the fees due and the lender agrees to extend the due date.[36] By rolling over, the loan repayment of the principal is extended for another period of time, usually equivalent to the original loan term, in return for the consumer's agreement to pay a new set of fees calculated in the same manner as the initial fees (*e.g.,* 15 percent of the loan principal). The rollover fee is not applied to reduce the loan principal or amortize the loan. As an example, if the consumer borrows $300 with a fee of $45 (calculated as $15 per $100 borrowed), the consumer will owe $345 on the due date, typically 14 days later. On the due date, if the consumer cannot afford to repay the entire $345 due or is otherwise offered the option to roll over the loan, she will pay the lender $45 for another 14 days. On the 28th day, the consumer will owe the original $345 and if she pays the loan in full then, will have paid a total of $90 for the loan.

In some States in which rollovers are permitted they are subject to certain limitations such as a cap on the number of rollovers or requirements that the borrower amortize—repay part of the original loan amount—on the rollover. Other States have no restrictions on rollovers. Specially, 17 of the States that authorize single-payment payday lending prohibit lenders from rolling over loans and 11 more States impose some rollover limitations.[37] However, in most States where rollovers are prohibited or limited, there is no restriction on the lender immediately making a new loan to the consumer (with new fees) after the consumer has repaid the prior loan. New loans made the same day, or ''back-to-back'' loans, effectively replicate a rollover because the borrower remains in debt to the lender on the borrower's next payday.[38]

Ten States have implemented a cooling-off period before a lender may make a new loan. The most common cooling-off period is one day, although some States have longer periods following a specified number of rollovers or back-to-back loans.[39]

At least 17 States have adopted laws that require payday lenders to offer borrowers the option of taking an extended repayment plan when they encounter difficulty in repaying payday loans.[40] Details about the extended repayment plans vary including: Borrower eligibility (in some States only prior to the lender instituting collections or litigation); how borrowers may elect to participate in repayment plans; the number and timing of payments; the length of plans; permitted fees for plans; requirements for credit counseling; requirements to report plan payments to a statewide database; cooling-off or ''lock-out'' periods for new loans after completion of plans; and the consequences of plan defaults.

Regulation Z, 12 CFR part 1026, except where otherwise specified.

[34] ''CFPB Payday Loans and Deposit Advance Products White Paper,'' at 16, 19 (33 percent of payday loans borrowers receive income monthly; 18 percent of payday loan borrowers are public benefits recipients, largely from Social Security including Supplemental Security Income and Social Security Disability, typically paid on a monthly basis).

[35] For example, Washington requires the due date to be on or after the borrower's next pay date but if the pay date is within seven days of taking out the loan, the due date must be on the second pay date after the loan is made. Wash. Rev. Code sec. 31.45.073(2). A number of States set minimum loan terms, some of which are tied directly to the consumer's next payday.

[36] This rulemaking uses the term ''rollover'' but this practice is sometimes described under State law or by lenders as a ''renewal'' or an ''extension.''

[37] States that prohibit rollovers include California, Florida, Hawaii, Illinois, Indiana, Kentucky, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, Oklahoma, South Carolina, Tennessee, Virginia, Washington, and Wyoming. Cal. Fin. Code sec. 23037(a); Fla. Stat. sec. 560.404(18); Haw. Rev. Stat. sec. 480F–4(d); 815 Ill. Comp. Stat. 122/2–30; Ind. Code sec. 24–4.5–7–402(7); Ky. Rev. Stat. Ann. sec. 286.9–100(14); Mich. Two States more generally allow lenders the discretion to offer borrowers an extension of time to repay or enter into workout agreements with borrowers having repayment difficulties.[41] The effects of these various restrictions are discussed further below in Market Concerns—Underwriting.

Industry size and structure. There are various estimates as to the number of consumers who use payday loans on an annual basis. One survey found that 2.5 million households (2 percent of U.S. households) used payday loans in 2015.[42] In another survey, 3.4 percent of households reported taking out a payday loan in the past year.[43] These surveys referred to payday loans generally, and did not specify whether they were referring to loans made online or at storefront locations. One report estimated the number of individual borrowers, rather than households, was higher at approximately 12 million annually and included both storefront and online loans.[44] See Market Concerns—Underwriting for additional information on borrower characteristics.

There are several ways to gauge the size of the storefront payday loan industry. Typically, the industry has been measured by counting the total dollar value of each loan made during the course of a year, counting each rollover, back-to-back loan or other re-borrowing as a new loan that is added to the total. By this metric, one industry analyst estimated that from 2009 to 2014, storefront payday lending generated approximately $30 billion in new loans per year and that by 2015 the volume had declined to $23.6 billion,[45] although these numbers may include products other than single-payment loans. The analyst's estimate for combined storefront and online payday loan volume was $45.3 billion in 2014 and $39.5 billion in 2015, down from a peak of about $50 billion in 2007.[46]

Alternatively, the industry can be measured by calculating the dollar amount of loan balances outstanding. Given the amount of payday loan re-borrowing, which results in the same funds of the lender being used to finance multiple loan originations to the same borrower, the dollar amount of loan balances outstanding may provide a more nuanced sense of the industry's scale. Using this metric, the Bureau estimates that in 2012, storefront payday lenders held approximately $2 billion in outstanding single-payment loans.[47] In 2015, industry revenue (fees paid on storefront payday loans) was an estimated $3.6 billion, representing 15 percent of loan originations. Combined storefront and online payday revenue was estimated at $8.7 billion in 2014 and $6.7 billion in 2015, down from a peak of over $9 billion in 2012.[48]

In the last several years, it has become increasingly difficult to identify the largest payday lenders due to firm mergers, diversification by many lenders into a range of products including installment loans and retraction by others into pawn loans, and the lack of available data because most firms are privately held. However, there are at least 10 lenders with approximately 200 or more storefront locations.[49] Only a few of these firms are publicly traded companies.[50] Most large payday lenders are privately held,[51] and the remaining payday loan stores are owned by smaller regional or local entities. The Bureau estimates there are about 2,400 storefront payday lenders that are small entities as defined by the Small Business Administration (SBA).[52] Several industry commenters, an industry trade association commenter, and a number of payday

[41] California (no fees permitted) and Delaware are States that permit payday lenders to extend the time for repayment of payday loans. Cal. Fin. Code sec. 23036(b); Del. Code Ann. tit. 5, sec. 2235A(a)(2).

[46] Hecht, ''Short-Term Credit Amid Ambiguity.''

[47] The Bureau's staff estimate is based on public company financial information, confidential information gathered in the course of statutory functions, and industry analysts' reports. The estimate is derived from lenders' single-payment payday loans gross receivables and gross revenue and industry analysts' reports on loan volume and revenue. No calculations were done for 2013 to 2016, but that estimate would be less than $2 billion due to changes in the market as the industry has shifted away from single-payment payday loans to products discussed below.

[48] Hecht, ''Short-Term Credit Amid Ambiguity.''

[49] These firms include: ACE Cash Express, Advance America, Amscot Financial, Axcess Financial (CNG Financial, Check 'n Go, Allied Cash), Check Into Cash, Community Choice Financial (Checksmart), CURO Financial Technologies (Speedy Cash/Rapid Cash), DFC Global Corp (Money Mart), FirstCash, and QC Holdings. *See* Ace Cash Express, ''Store Locator,'' *available at https://www.acecashexpress.com/locations*; Advance America, ''Find an Advance America Store Location,'' *available at https://www.advanceamerica.net/locations/find*; Amscot Financial, Inc., ''Amscot Locations,'' *available at https://www.amscot.com/locations.aspx*; Check 'n Go, ''State Center,'' *available at https://www.checkngo.com/resources/state-center*; Allied Cash Advance, ''Allied Cash Advance Store Directory,'' *available at https://locations.alliedcash.com/index.html*; Check Into Cash, ''Payday Loan Information By State,'' *available at https://checkintocash.com/payday-loan-information-by-state*; Community Choice Financial (CheckSmart), ''Locations,'' *available at https://www.ccfi.com/locations/*; SpeedyCash, ''Speedy Cash Stores Near Me,'' *available at https://www.speedycash.com/find-a-store*; DFC Global Corp., ''Home,'' *available at http://www.dfcglobalcorp.com/index.html*; FirstCash Inc., ''Find a Location Near You,'' *available at http://www.firstcash.com/*; QC Holdings, Inc., ''Branch Locator,'' *available at https://www.qcholdings.com/branchlocator.aspx* (all sites last visited Jul. 26, 2017).

[50] The publicly traded firms are Community Choice Financial Inc./Cash Central/Checksmart (CCFI), EZCORP, Inc. (EZPW), FirstCash Inc. (FCFS), and QC Holdings (QCCO). As noted above, in September 2016, FirstCash Financial Services merged with Cash America, resulting in the company FirstCash Inc. Prior to the merger, in November 2014, Cash America migrated its online loans to a spin-off company, Enova. Cash America International, Inc., 2015 Annual Report (Form 10–K), at 3 (Dec. 14, 2016). Both FCFS and Cash America had been deemphasizing payday lending in the U.S., and shifting towards pawn. In 2016, the new company, FirstCash, had only 45 stand-alone consumer loan locations, in Texas, Ohio, and California, and 326 pawn locations that also offered consumer loans, compared to 1,085 pawn locations. Only 4 percent of its revenue was from non-pawn consumer loans and credit services operations. (Credit services organizations are described below.) FirstCash Inc., 2016 Annual Report (Form 10–K), at 5, 7. In 2015, EZCORP exited payday, installment, and auto title lending, focusing domestically on pawn lending. EZCORP, Inc., 2016 Annual Report (Form 10–K), at 3 (Dec. 14, 2016). QC Holdings delisted from Nasdaq in February 2016 and is traded over-the-counter. QC Holdings, Inc., Suspension of Duty to File Reports Under Sections 13 and 15(d) (Form 15).

[51] The larger privately held payday lending firms include Advance America, ACE Cash Express, Axcess Financial (CNG Financial, Check 'n Go, Allied Cash), Check Into Cash, DFC Global (Money Mart), PLS Financial Services, and Speedy Cash Holdings Corporation. *See* Susanna Montezemolo, ''Payday Lending Abuses and Predatory Practices: The State of Lending in America & Its Impact on U.S. Households'' at 9–10 (Ctr. for Responsible Lending, 2013); John Hecht, ''Alternative Financial Services: Innovating to Meet Customer Needs in an Evolving Regulatory Framework'' (2014) (Stephens, Inc., slide presentation) (on file).

[52] Bureau staff estimated the number of storefront payday lenders using licensee information from State financial regulators, firm revenue information from public filings and non-public sources, and, for a small number of States, industry market research relying on telephone directory listings from Steven Graves and Christopher Peterson, *available at http://www.csun.edu/~sg4002/research/data/US_pdl_addr.xls.* Based on these sources, there are approximately 2,503 storefront payday lenders, including those operating primarily as loan arrangers or brokers, in the United States. Based on the publicly-available revenue information, at least 56 of the firms have revenue above the small entity threshold. Most of the remaining firms operate a very small number of storefronts. Therefore, while some of the firms without publicly available information may have revenue above the small entity threshold, in the interest of being inclusive they are all assumed to be small entities.

lenders noted that they offer non-credit products and services at their locations including check cashing, money transmission and bill payments, sale of prepaid cards, and other services, some of which require them to comply with other laws as ''money service businesses.''

According to one industry analyst, there were an estimated 16,480 payday loan stores in 2015 in the United States, a decline from 19,000 stores in 2011 and down from the industry's 2007 peak of 24,043 storefronts.[53]

The average number of payday loan stores in a county with a payday loan store is 6.32.[54] The Bureau has analyzed payday loan store locations in States which maintain lists of licensed lenders and found that half of all stores are less than one-third of a mile from another store, and three-quarters are less than a mile from the nearest store.[55] Even the 95th percentile of distances between neighboring stores is only 4.3 miles. Stores tend to be closer together in counties within metropolitan statistical areas (MSA).[56] In non-MSA counties the 75th percentile of distance to the nearest store is still less than one mile, but the 95th percentile is 22.9 miles.

Research and the Bureau's own market outreach indicate that payday loan stores tend to be relatively small with, on average, three full-time equivalent employees.[57] An analysis of loan data from 29 States found that the average store made 3,541 advances in a year.[58] Given rollover and re-borrowing rates, a report estimated that the average store served fewer than 500 customers per year.[59]

Marketing, underwriting, and collections practices. Payday loans tend to be marketed as a short-term bridge to cover emergency expenses. For example, one lender suggests that, for consumers who have insufficient funds on hand to meet such an expense or to avoid a penalty fee, late fee, or utility shut-off, a payday loan can ''come in handy'' and ''help tide you over until your next payday.''[60] Some lenders offer new borrowers their initial loans at no fee (''first loan free'') to encourage consumers to try a payday loan.[61] Stores are typically located in high-traffic commuting corridors and near shopping areas where consumers obtain groceries and other staples.[62]

The evidence of price competition among payday lenders is mixed. In their financial reports, publicly traded payday lenders have reported their key competitive factors to be non-price related. For instance, they cite location, customer service, and convenience as some of the primary factors on which payday lenders compete with one another, as well as with other financial service providers.[63] Academic studies have found that, in States with rate caps, loans are almost always made at the maximum rate permitted.[64] Another study likewise found that in States with rate caps, firms lent at the maximum permitted rate, and that lenders operating in multiple States with varying rate caps raise their fees to those caps rather than charging consistent fees company-wide. The study found, however, that in States with no rate caps, different lenders operating in those States charged different rates. The study reviewed four lenders that operate in Texas[65] and observed differences in the cost to borrow $300 per two-week pay period: two lenders charged $61 in fees, one charged $67, and another charged $91, indicating some level of price variation between lenders (ranging from about $20 to $32 per $100 borrowed).[66] One industry commenter cited the difference in average loan pricing between storefront (generally lower) and online loans (generally higher), as evidence of price competition but that is more likely due to the fact that state-licensed lenders are generally constrained in the amount they can charge rather than competitive strategies adopted by those lenders. That commenter also notes as evidence of price competition that it sometimes discounts its own loans from its advertised prices; the comment did not address whether such discounts were offered to meet competition.

The application process for a payday loan is relatively simple. For a storefront payday loan, a borrower must generally provide some verification of income (typically a pay stub) and evidence of a personal deposit account.[67] Although a few States impose limited requirements that lenders consider a borrower's ability to repay,[68] storefront payday

[53] Hecht, ''*Short-Term Credit Amid Ambiguity,*'' at 7. Although there is no estimate for 2016, the number of storefronts offering payday loans is likely smaller due to the regulatory changes in South Dakota, the exit of EZCORP from payday lending, and the merger of First Cash Financial and Cash America, and its shift away from payday lending. However, it is difficult to precisely measure the number of stores that have shifted from payday to pawn lending, rather than closing. By way of comparison, in 2015 there were 14,259 McDonald's fast food outlets in the United States. McDonald's Corp., 2015 Annual Report (Form 10–K), at 23 (Feb. 25, 2016).

[68] For example, Utah requires lenders to make an inquiry to determine that the borrower has the ability to repay the loan, which may include rollovers or extended payment plans. This determination may be made through borrower affirmation of ability to repay, proof of income, repayment history at the same lender, or information from a consumer reporting agency.

lenders generally do not consider a borrower's other financial obligations or require collateral (other than the check or electronic debit authorization) for the loan. Most storefront payday lenders do not consider traditional credit reports or credit scores when determining loan eligibility, nor do they report any information about payday loan borrowing history to the nationwide consumer reporting agencies, TransUnion, Equifax, and Experian.[69] From market outreach activities and confidential information gathered in the course of statutory functions, the Bureau is aware that a number of storefront payday lenders obtain data from one or more specialty consumer reporting agencies during the loan application process to check for previous payday loan defaults, identify recent inquiries that suggest an intention to not repay the loan, and perform other due diligence such as identity and deposit account verification. Some storefront payday lenders use analytical models and scoring that attempt to predict likelihood of default.[70] Through market outreach and confidential information gathered in the course of statutory functions, the Bureau is aware that many storefront payday lenders only conduct their limited underwriting for first-time borrowers or those returning after an absence.

From market outreach, the Bureau is aware that the specialty consumer reporting agencies contractually require any lender that obtains data to also report data to them, although compliance may vary. Reporting usually occurs on a real-time or same-day basis. Separately, 14 States require lenders to check statewide databases before making each loan in order to ensure that their loans comply with various State restrictions.[71] These States likewise require lenders to report certain lending activity to the database, generally on a real-time or same-day basis. As discussed in more detail above, these State restrictions may include prohibitions on consumers having more than one payday loan at a time, cooling-off periods, or restrictions on the number of loans consumers may take out per year.

Although a consumer is generally required when obtaining a loan to provide a post-dated check or authorization for an electronic debit of the consumer's account which could be presented to the consumer's bank,[72] consumers in practice generally return to the store when the loan is due to ''redeem'' the check either by repaying the loan or by paying the finance charges and rolling over the loan.[73] For example, a major payday lender with a predominantly storefront loan portfolio reported that in 2014, over 90 percent of its payday loan volume was repaid in cash at its branches by consumers either paying in full or by paying the ''original loan fee'' (finance charges) and rolling over the loan (signing a new promissory note and leaving a new check or payment authorization).[74]

An industry commenter stated that repayment in cash reflects customers' preferences. However, borrowers are strongly encouraged and in some cases required by lenders to return to the store when payment is due. Some lenders give borrowers appointment cards with a date and time to encourage them to return with cash. For example, one major storefront payday lender explained that after loan origination ''the customer then makes an appointment to return on a specified due date, typically his or her next payday, to repay the cash advance . . . . Payment is usually made in person, in cash at the center where the cash advance was initiated . . . .'' [75]

The Bureau is aware, from confidential information gathered in the course of statutory functions and from market outreach, that lenders routinely make reminder calls to borrowers a few days before loan due dates to encourage borrowers to return to the store. One large lender reported this practice in a public filing.[76] Another storefront payday lender requires its borrowers to return to the store to repay. Its Web site states: ''All payday loans must be repaid with either cash or money order. Upon payment, we will return your original check to you.'' [77]

The Bureau is also aware, from confidential information gathered in the course of statutory functions, that one or more storefront payday lenders have operating policies that specifically state that cash is preferred because only half of their customers' checks would clear if deposited on the loan due dates. Encouraging or requiring borrowers to return to the store on the due date provides lenders an opportunity to offer borrowers the option to roll over the loan or, where rollovers are prohibited by State law, to re-borrow following repayment or after the expiration of any cooling-off period. Most storefront lenders examined by the Bureau employ monetary incentives that reward employees and store managers for loan volumes, although one industry commenter described the industry's incentives to employees as rewards for increases in net revenue. Since as discussed below, a majority of loans result from rollovers of existing loans or re-borrowing contemporaneously with or shortly after loans have been repaid, rollovers and re-borrowing contribute substantially to employees'

Utah Code sec. 7–23–401. Missouri requires lenders to consider borrower financial ability to reasonably repay under the terms of the loan contract, but does not specify how lenders may satisfy this requirement. Mo. Rev. Stat sec. 408.500(7). Effective July 1, 2017, Nevada lenders must assess borrowers' reasonable ability to repay by considering, to the extent available, their current or expected income; current employment status based on a pay stub, bank deposit, or other evidence; credit history; original loan amount due, or for installment loans or potential repayment plans, the monthly payment amount; and other evidence relevant to ability to repay including bank statements and borrowers' written representations. Other States prohibit loans that exceed a certain percentage of the borrower's gross monthly income (generally between 20 and 35 percent) as a proxy for ability to repay as described above.

compensation. From confidential information gathered in the course of statutory functions, the Bureau is aware that rollover and re-borrowing offers are made when consumers log into their accounts online, during ''courtesy calls'' made to remind borrowers of upcoming due dates, and when borrowers repay in person at storefront locations. In addition, some lenders train their employees to offer rollovers during courtesy calls when borrowers notified lenders that they had lost their jobs or suffered pay reductions.

Store personnel often encourage borrowers to roll over their loans or to re-borrow, even when consumers have demonstrated an inability to repay their existing loans. In an enforcement action, the Bureau found that one lender maintained training materials that actively directed employees to encourage re-borrowing by struggling borrowers. It further found that if a borrower did not repay or pay to roll over the loan on time, store personnel would initiate collections. Store personnel or collectors would then offer the option to take out a new loan to pay off an existing loan, or refinance or extend the loan as a source of relief from the potentially negative outcomes (*e.g.,* lawsuits, continued collections). This ''cycle of debt'' was depicted graphically as part of ''The Loan Process'' in the company's new hire training manual.[78] In Mississippi, another lender employed a companywide practice in which store personnel encouraged borrowers with monthly income or benefits payments to use the proceeds of one loan to pay off another loan, although State law prohibited these renewals or rollovers.[79]

In addition, though some States require lenders to offer borrowers the option of extended repayment plans and some trade associations have designated provision of such plans as a best practice, individual lenders may often be reluctant to offer them. In Colorado, for instance, some payday lenders reported, prior to a regulatory change in 2010, that they had implemented practices to restrict borrowers from obtaining the number of loans needed to be eligible for the State-mandated extended payment plan option and that some lenders had banned borrowers who had exercised their rights to elect payment plans from taking new loans.[80] The Bureau is also aware, from confidential information gathered in the course of statutory functions, that one or more lenders used training manuals that instructed employees not to mention these plans until after employees first offered rollovers, and then only if borrowers specifically asked about the plans. Indeed, details on implementation of the repayment plans that have been designated by two national trade associations for storefront payday lenders as best practices are unclear, and in some cases place a number of limitations on exactly how and when a borrower must request assistance to qualify for these ''off-ramps.'' For instance, one trade association representing more than half of all payday loan stores states that as a condition of membership, members must offer an ''extended payment plan'' but that borrowers must request the plan at least one day prior to the date on which the loan is due, generally in person at the store where the loan was made or otherwise by the same method used to originate the loan.[81] Another trade association with over 1,300 members, including both payday lenders and firms that offer non-credit products such as check cashing and money transmission, states that members will provide the option of extended payment plans in the absence of State-mandated plans to customers unable to repay, but details of the plans are not publicly available on its Web site.[82]

From confidential information gathered in the course of statutory functions and market outreach, the Bureau is aware that if a borrower fails to return to the store when a loan is due, the lender may attempt to contact the consumer and urge the consumer to make a cash payment before eventually depositing the post-dated check that the consumer had provided at origination or electronically debiting the account. The Bureau is also aware of some situations in which lenders have obtained electronic payments from borrowers' bank accounts and also accepted cash payments from borrowers at storefronts.[83] The Bureau is aware, from confidential information gathered in the course of its statutory functions and from market outreach, that lenders may use various methods to try to ensure that a payment will clear before presenting a check or ACH. These efforts may range from storefront lenders calling the borrower's bank to ask if a check of a particular size would clear the account to the use of software offered by a number of vendors that attempts to model likelihood of repayment (''predictive ACH'').[84] If

these attempts are unsuccessful, store personnel at either the storefront level or at a centralized location will then generally engage in collection activity.

Collection activity may involve further in-house attempts to collect from the borrower's bank account.[85] If the first attempt fails, the lender may make subsequent attempts at presentment by splitting payments into smaller amounts in hopes of increasing the likelihood of obtaining at least some funds, a practice for which the Bureau recently took enforcement action against a small-dollar lender.[86] Or, the lender may attempt to present the payment multiple times, a practice that the Bureau has noted in supervisory examinations.[87] A more detailed discussion of payments practices is provided in part D and Markets Concerns—Payments.

Eventually, the lender may attempt other means of collection. The Bureau is aware of in-house debt collections activities, by both storefront employees and employees at centralized collections divisions, including calls, letters, and visits to consumers and their workplaces,[88] as well as the sale of debt to third-party collectors.[89] The Bureau recently conducted a survey of consumer debt collection experiences; 11 percent of consumers contacted about a debt in collection reported the collection activity was related to payday loan debt.[90] Further, the Bureau observed in its consumer complaint data that from November 2013 through December 2016, more than 31,000 debt collection complaints had ''payday loan'' as the underlying debt. In more than 11 percent of the complaints the Bureau handled about debt collection, consumers selected ''payday loans'' as the underlying debt.[91]

In addition, in 2016, the Bureau handled approximately 4,400 complaints in which consumers reported ''payday loan'' as the complaint product and about 26,600 complaints about credit cards.[92] As noted above, there are about 12 million payday loan borrowers annually, and approximately 156 million consumers have one or more credit cards.[93] Therefore, by way of comparison, for every 10,000 payday loan borrowers, the Bureau handled about 3.7 complaints, while for every 10,000 credit card holders, the Bureau handled about 1.7 complaints.

Some payday lenders sue borrowers who fail to repay their loans. A study of small claims court cases filed in Utah from 2005 to 2010 found that 38 percent of cases were attributable to payday loans.[94] A recent news report found that the majority of non-traffic civil cases filed in 14 Utah justice courts are payday loan collection lawsuits, and in one justice court, the percentage was as high as 98.8 percent.[95] In 2013, the Bureau entered into a Consent Order with a large national payday and installment lender based, in part, on the filing of flawed court documents in about 14,000 debt collection lawsuits.[96] However, an industry trade association commenter states that many payday lenders do not file lawsuits on defaulted debt.

Business model. As previously noted, the storefront payday industry has built a distribution model that involves a large number of small retail outlets, each serving a relatively small number of consumers. That implies that the overhead cost on a per consumer basis is relatively high.

Additionally, the loss rates on storefront payday loans—the percentage or amounts of loans that are charged off by the lender as uncollectible—are relatively high. Loss rates on payday loans often are reported on a per-loan basis but, given the frequency of rollovers and renewals, that metric understates the amount of principal lost to borrower defaults. For example, if a lender makes a $100 loan that is rolled over nine times, at which point the consumer defaults, the per-loan default rate would be 10 percent whereas the lender would have in fact lost 100

www.microbilt.com/bank-account-verification.aspx (last visited Apr. 8, 2016); DataX. Ltd., ''Know Your Customer,'' *http://www.dataxltd.com/ancillary-services/successful-collections/* (last visited Apr.8, 2016).

[85] For example, one payday lender stated in its public documents that it ''subsequently collects a large percentage of these bad debts by redepositing the customers' checks, ACH collections or receiving subsequent cash repayments by the customers.'' FirstCash Fin. Servs., 2014 Annual Report (Form 10–K), at 5 (Feb. 12, 2015). As noted above, FirstCash has now largely exited payday lending.

[96] Press Release, Bureau of Consumer Fin. Prot., ''Consumer Financial Protection Bureau Takes Action Against Payday Lender for Robo-Signing,'' (Nov. 20, 2013), *available at http://www.consumerfinance.gov/newsroom/consumer-financial-protection-bureau-takes-action-against-payday-lender-for-robo-signing/*.

percent of the amount loaned. In this example, the lender would still have received substantial revenue, as the lender would have collected fees for each rollover prior to default. The Bureau estimates that during the 2011–2012 time frame, charge-offs (*i.e.,* uncollectible loans defaulted on and never repaid) equaled nearly one-half of the average amount of outstanding loans during the year. In other words, for every $1.00 loaned, only $.50 in principal was eventually repaid.[97] One academic study found loss rates to be even higher.[98]

To sustain these significant costs, the payday lending business model is dependent upon a large volume of re-borrowing—that is, rollovers, back-to-back loans, and re-borrowing within a short period of paying off a previous loan—by those borrowers who do not default on their first loan. The Bureau's research found that over the course of a year, 90 percent of all loan fees comes from consumers who borrowed seven or more times and 75 percent comes from consumers who borrowed 10 or more times.[99] Similarly, when the Bureau identified a cohort of borrowers and tracked them over 10 months, the Bureau found that more than two-thirds of all loans were in sequences of at least seven loans, and that over half of all loans were in sequences of 10 or more loans.[100] The Bureau defines a sequence as an initial loan plus one or more subsequent loans renewed within 30 days after repayment of the prior loan; a sequence thus captures not only rollovers and back-to-back loans but also re-borrowing that occurs within a short period of time after repayment of a prior loan either at the point at which a State-mandated cooling-off period ends or at the point at which the consumer, having repaid the prior loan, runs out of money.[101] A more detailed discussion of sequence length is provided in the section-by-section discussion of §§ 1041.2(a)(14) and 1041.5 and in Market Concerns—Underwriting.

Other studies are broadly consistent. For example, a 2013 report based on lender data from Florida, Kentucky, Oklahoma, and South Carolina found that 85 percent of loans were made to borrowers with seven or more loans per year, and 62 percent of loans were made to borrowers with 12 or more loans per year. These four States have restrictions on payday loans such as cooling-off periods and limits on rollovers that are enforced by State-regulated databases, as well as voluntary extended repayment plans.[102] An updated report on Florida payday loan usage derived from the State database noted this trend has continued, with 83 percent of payday loans in 2015 made to borrowers with seven or more loans and 57 percent of payday loans that same year made to borrowers with 12 or more loans.[103] In Alabama's first year of tracking payday loans with a single database, it reported that almost 50 percent of borrowers had seven or more payday loans and almost 37 percent of borrowers had 10 or more payday loans.[104] Other reports have found that over 80 percent of total payday loans and loan volume is due to repeat borrowing within 30 days of a prior loan.[105] One trade association has acknowledged that ''[i]n any large, mature payday loan portfolio, loans to repeat borrowers generally constitute between 70 and 90 percent of the portfolio, and for some lenders, even more.'' [106] A recent report by a specialty consumer reporting agency confirms that the industry's business model relies on repeat customers, noting that over half of all loans are made to returning customers and stating ''[t]his finding suggests that even though new customers are critical, existing customers are the most productive.'' [107] Market Concerns—Underwriting below discusses the impact of these outcomes for consumers who are unable to repay and either default or re-borrow.

Recent regulatory and related industry developments. A number of Federal and State regulatory developments have occurred over the last 15 years as concerns about the effects of payday lending have spread. Regulators have found that the industry has tended to shift to new models and products in response.

Since 2000, it has been clear from commentary added to Regulation Z, that payday loans constitute ''credit'' under the Truth in Lending Act (TILA) and that cost of credit disclosures are required to be provided in payday loan transactions, regardless of how State law characterizes payday loan fees.[108]

In 2006, Congress enacted the Military Lending Act (MLA) to address concerns that servicemembers and their families were becoming over-indebted in high-cost forms of credit.[109] The MLA, as

[97] The Bureau's staff estimate is based on public company financial statements and confidential information gathered in the course of the Bureau's statutory functions. Ratio of gross charged off loans to average balances, where gross charge-offs represent single-payment loan losses and average balance is the average of beginning and end of year single-payment loan receivables.

[108] 12 CFR part 1026, supplement I, comment 2(a)(14)–2.

[109] The Military Lending Act, part of the John Warner National Defense Authorization Act for Fiscal Year 2007, was signed into law in October 2006. The interest rate cap took effect October 1, 2007. *See* 10 U.S.C. 987.

implemented by the Department of Defense's regulation, imposes two broad classes of requirements applicable to a creditor. First, the creditor may not impose a military annual percentage rate (MAPR) [110] greater than 36 percent in connection with an extension of consumer credit to a covered borrower. Second, when extending consumer credit, the creditor must satisfy certain other terms and conditions, such as providing certain information, both orally and in a form the borrower can keep, before or at the time the borrower becomes obligated on the transaction or establishes the account; refraining from requiring the borrower to submit to arbitration in the case of a dispute involving the consumer credit; and refraining from charging a penalty fee if the borrower prepays all or part of the consumer credit. In 2007, the Department of Defense issued its initial regulation under the MLA, limiting the Act's application to closed-end loans with a term of 91 days or less in which the amount financed did not exceed $2,000; closed-end vehicle title loans with a term of 181 days or less; and closed-end tax refund anticipation loans.[111] However, the Department found that evasions developed in the market as ''the extremely narrow definition of 'consumer credit' in the [then-existing rule] permits a creditor to structure its credit products in order to reduce or avoid altogether the obligations of the MLA.'' [112]

As a result, effective October 2015 the Department of Defense expanded its definition of covered credit to include open-end credit and longer-term loans so that the MLA protections generally apply to all credit subject to the requirements of Regulation Z of the Truth in Lending Act, other than certain products excluded by statute.[113] In general, creditors must comply with the new regulations for extensions of credit after October 3, 2016; for credit card accounts, creditors are required to comply with the new rule starting October 3, 2017.[114]

At the State level, the last States to enact legislation authorizing payday lending—Alaska and Michigan—did so in 2005.[115] At least 11 States and jurisdictions that previously had authorized payday loans have taken steps to restrict or eliminate payday lending. In 2001, North Carolina became the first State that had previously permitted payday loans to adopt an effective ban by allowing the authorizing statute to expire. In 2004, Georgia also enacted a law banning payday lending.

In 2008, the Ohio legislature adopted the Short Term Lender Act with a 28 percent APR cap, including all fees and charges, for short-term loans and repealed the existing Check-Cashing Lender Law that authorized higher rates and fees.[116] In a referendum later that year, Ohioans voted against reinstating the Check-Cashing Lender Law, leaving the 28 percent APR cap and the Short Term Lending Act in effect.[117] After the vote, some payday lenders began offering vehicle title loans. Other lenders continued to offer payday loans utilizing Ohio's Credit Service Organization Act [118] and the Mortgage Loan Act; [119] the latter practice was upheld by the State Supreme Court in 2014.[120] Also in 2008, the District of Columbia banned payday lending which had been a permissible activity under the District's check cashing law, making the loans subject to the District's 24 percent per annum maximum interest rate cap.[121]

In 2010, Colorado's legislature banned short-term single-payment balloon loans in favor of longer-term, six-month loans. Colorado's regulatory framework is described in more detail in the discussion of payday installment lending below.

As of July 1, 2010, Arizona effectively prohibited payday lending after the authorizing statute expired and a statewide referendum that would have continued to permit payday lending failed to pass.[122] However, small-dollar lending activity continues in the State. The State financial regulator issued an alert in 2013, in response to complaints about online unlicensed lending, advising consumers and lenders that payday and consumer loans of $1,000 or less are generally subject to a rate of 36 percent per annum and loans in violation of those rates are void.[123] In addition, vehicle title loans continue to be made in Arizona as secondary motor vehicle finance transactions.[124] The number of licensed vehicle title lenders has increased by about 300 percent since the payday lending law expired and now exceeds the number of payday lenders that were licensed prior to the ban.[125]

In 2009, Virginia amended its payday lending law. It extended the minimum loan term to the length of two income periods, added a 45-day cooling-off period after substantial time in debt (the fifth loan in a 180-day period) and a 90-day cooling-off period after completing an extended payment plan, and implemented a database to enforce limits on loan amounts and frequency. The payday law applies to closed-end loans. Virginia has no interest rate regulations or licensure requirements for open-end credit.[126] After the amendments, a number of lenders that were previously licensed as payday lenders in Virginia, and that offer closed-end payday loans in other States, switched to offering open-end credit in Virginia without State licenses.[127]

Washington and Delaware have restricted repeat borrowing by imposing limits on the number of payday loans consumers may obtain. In 2009,

[110] The military annual percentage rate is an ''all-in'' APR that includes a broader range of fees and charges than the APR that must be disclosed under the Truth in Lending Act. *See* 32 CFR 232.4.

Washington made several changes to its payday lending law. These changes, effective January 1, 2010, include a cap of eight loans per borrower from all lenders in a rolling 12-month period where there had been no previous limit on the number of total loans, an extended repayment plan for any loan, and a database to which lenders are required to report all payday loans.[128] In 2013, Delaware, a State with no fee restrictions for payday loans, implemented a cap of five payday loans, including rollovers, in any 12-month period.[129] Delaware defines payday loans as loans due within 60 days for amounts up to $1,000. Some Delaware lenders have shifted from payday loans to longer-term installment loans with interest-only payments followed by a final balloon payment of the principal and an interest fee payment—sometimes called a ''flexpay'' loan.[130]

In 2016, South Dakota voters approved a ballot measure instituting a 36 percent APR limit for all consumer loans made by licensed lenders.[131] The measure passed with approximately 75 percent of voters supporting it.[132] Subsequently, a number of lenders previously licensed to do business in the State either declined to renew their licenses or indicated that they would not originate new loans that would be subject to the cap.[133]

New Mexico enacted legislation in 2017 that will effectively prohibit single payment payday loans. It requires small-dollar loans to have minimum loan terms of 120 days and be repaid in four or more installments.[134] The legislation will take effect on January 1, 2018.[135] The legislation also sets a usury limit of 175 percent APR and will apply to short-term vehicle title loans.

In 2017, several other States also passed legislation related to payday lending. Arkansas passed a law clarifying that fees charged by credit service organizations are interest under the State's constitutional usury limit of 17 percent per annum.[136] Utah amended its existing law that prohibits rollovers of payday loans for more than 10 weeks by prohibiting lenders from originating new loans for borrowers to repay prior ones.[137]

At least 41 Texas municipalities have adopted local ordinances setting business regulations on payday lending (and vehicle title lending).[138] Some of the ordinances, such as those in Dallas, El Paso, Houston, and San Antonio, include requirements such as limits on loan amounts (no more than 20 percent of the borrower's gross annual income for payday loans), limits on the number of rollovers, required amortization of the principal loan amount on repeat loans—usually in 25 percent increments, record retention for at least three years, and a registration requirement.[139] On a statewide basis, there are no Texas laws specifically governing payday lenders or payday loan terms; credit access businesses that act as loan arrangers or broker payday loans (and vehicle title loans) are regulated and subject to licensing, reporting, and requirements to provide consumers with disclosures about repayment and re-borrowing rates.[140]

Online Payday Lending

With the growth of the Internet, a significant online payday lending industry has developed. Some storefront lenders use the Internet as an additional method of originating payday loans in the States in which they are licensed to do business. In addition, there are now a number of lenders offering what are referred to as ''hybrid'' payday loans, through the Internet. Hybrid payday loans are structured so that rollovers occur automatically unless the consumer takes affirmative action to pay off the loan, thus effectively creating a series of interest-only payments followed by a final balloon payment of the principal amount and an additional fee.[141] Hybrid loans structured as single payment loans with automatic rollovers[142] and longer-term loans with a final balloon payment[143] are covered by the final rule's Ability-to-Repay

[137] 2017 Utah H.B. 40, Utah 62nd Legislature, 2017 General Session, Title: Check Cashing and Deferred Deposit Lending Amendments Sess.

[138] A description of the municipalities is available at Texas Municipal League. An additional 16 Texas municipalities have adopted land use ordinances on payday or vehicle title lending. Texas Municipal League, ''City Regulation of Payday and Auto Title Lenders,'' *http://www.tml.org/payday-updates* (last visited April 26, 2017).

[139] Other municipalities have adopted similar ordinances. For example, at least seven Oregon municipalities, including Portland and Eugene, have enacted ordinances that include a 25 percent amortization requirement on rollovers and a requirement that lenders offer a no-cost payment plan after two rollovers. *See* Portland, Or., Code sec. 7.26.050; Eugene Or., Code sec. 3.556.

[140] CABs must include a pictorial disclosure with the percentage of borrowers who will repay the loan on the due date and the percentage who will roll over (called renewals) various times. *See* Texas Off. of Consumer Credit Commissioner, ''Credit Access Businesses'' *http://occc.texas.gov/industry/cab* (last visited Sept. 16, 2017). The CABs, rather than the lenders, maintain storefront locations, and qualify borrowers, service and collect the loans for the lenders. CABs may also guaranty the loans. There is no cap on CAB fees and when these fees are included in the loan finance charges, the disclosed APRs for Texas payday and vehicle title loans are similar to those in other States with deregulated rates. *See* Ann Baddour, ''Why Texas' Small Dollar Lending Market Matter,'' (Fed. Reserve Bank of Dallas, e-Perspectives Issue 2, 2012), *available at https://www.fedinprint.org/items/feddep/y2012n2x1.html.* In 2004, a Federal appellate court dismissed a putative class action related to these practices. *Lovick* v. *RiteMoney, Ltd.,* 378 F.3d 433 (5th Cir. 2004).

[141] nonPrime101, ''Report 1: Profiling Internet Small Dollar Lending—Basic Demographics and Loan Characteristics,'' at 2–3, (2014), *available at https://www.nonprime101.com/wp-content/uploads/2015/02/Profiling-Internet-Small-Dollar-Lending-Final.pdf.* The report refers to these automatic rollovers as ''renewals.''

[142] Examples of hybrid payday loans requiring borrower affirmative action to opt out of automatic rollovers are described in recent litigation by the Bureau and the Federal Trade Commission. Loans by Integrity Advance contained default terms that caused loans to automatically roll over four times with charges added at each rollover before any payments were applied to the principal. *See* Press Release, Bureau of Consumer Fin. Prot., ''CFPB Takes Action Against Online Lender for Deceiving Borrowers,'' (Nov.18, 2015), *available at https://www.consumerfinance.gov/about-us/newsroom/cfpb-takes-action-against-online-lender-for-deceiving-borrowers/.* Similarly, OneClickCash was an online lender that offered loans with a TILA disclosure as a single repayment loan, but unless borrowers satisfied certain pre-conditions they were automatically enrolled in a 10 pay-period renewal plan with new finance charges accruing each pay period and no payments applied to the principal balance until the fifth payment. *See* Order, Fed. Trade Comm'n v. AMG Services, Inc., No. 12–00536 (D. Nev. Mar. 07, 2014), ECF No. 559, *available at https://www.ftc.gov/system/files/documents/cases/140319amgorder.pdf. See also,* Sierra Lending, ''FAQ, How do I repay?,'' *https://www.sierralending.com/Home/FAQ* (last visited July 20, 2017) (consumer must call online payday lender at least three business days prior to due date or lender will automatically withdraw only the finance charge and loan will roll over).

[143] The Bureau is aware of a number of examples of storefront and online longer-term loans with final balloon payments. For instance, a loan agreement for a $200 loan from National Financial LLC d/b/a Loan Till Payday LLC required the borrower to pay 26 bi-weekly payments of $60 with a final balloon payment of $260. *See, James* v. *National Financial, LLC,* 132 A.3d 799, 837 (2016) (holding loan agreement unconscionable and invalid). Additionally the Bureau is aware of a Texas loan for $365.60, arranged through a credit access business, to be repaid in five payments of $108 with a sixth, final payment of $673.70.

requirements as discussed more fully below.

Industry size, structure, and products. The size of the online payday market is difficult to measure for a number of reasons. First, many online lenders offer a variety of products beyond single-payment loans (what the Bureau refers to as payday loans) and hybrid loans (which the Bureau views as a form of payday lending and falls within the final rule's definition of short-term loans), including longer-term installment loans; this poses challenges in sizing the portion of these firms' business that is attributable to payday and hybrid loans. Second, most online payday lenders are not publicly traded, which means that minimal financial information is available about this market segment. Third, many online payday lenders claim exemption from State lending laws and licensing requirements on the basis that they are located and operated from other jurisdictions. Consequently, these lenders report less information publicly, whether individually or in aggregate compilations, than lenders holding traditional State licenses. Finally, storefront payday lenders who are also using the online channel generally do not separately report their online originations. Bureau staff's reviews of the largest storefront lenders' Web sites indicate an increased focus in recent years on online loan origination.

With these caveats, a frequently cited industry analyst has estimated that by 2012, online payday loans had grown to generate nearly an equivalent amount of fee revenue as storefront payday loans on roughly 62 percent of the origination volume, about $19 billion, but originations had then declined somewhat to roughly $15.9 billion by 2015.[144] This trend appears consistent with storefront payday loans, as discussed above, and is likely related at least in part to increasing lender migration from short-term into longer-term products. Online payday loan fee revenue has been estimated at $3.1 billion for 2015, or 19 percent of origination volume.[145] However, these estimates may be both over- and under-inclusive; they may not differentiate precisely between online lenders' short-term and longer-term loans, and they may not account for the online lending activities by storefront payday lenders.

Whatever the precise size, the online industry can broadly be divided into two segments: online lenders licensed in the State in which the borrower resides and lenders that are not licensed in the borrower's State of residence.

The first segment consists largely of storefront lenders with an online channel to complement their storefronts as a means of originating loans, as well as a few online-only payday lenders who lend to borrowers in States where they have obtained State lending licenses. Because this segment of online lenders is State-licensed, State administrative payday lending reports include these data but generally do not differentiate loans originated online from those originated in storefronts. Accordingly, this portion of the market is included in the market estimates summarized above, and the lenders consider themselves to be subject to, or generally follow, the relevant State laws discussed above.

The second segment consists of lenders that claim exemption from State lending laws. Some of these lenders claim exemption because their loans are made from physical locations outside of the borrower's State of residence, including from off-shore locations outside of the United States.[146] Other lenders claim exemption because they are lending from Tribal lands, with such lenders claiming that they are regulated by the sovereign laws of ''federally recognized Indian tribes.'' [147] These lenders claim immunity from suit to enforce State or Federal consumer protection laws on the basis of their sovereign status.[148] A Federal appellate court recently rejected claims of immunity from the Bureau's civil investigative demands by several Tribal-related lenders, finding that ''Congress did not expressly exclude tribes from the Bureau's enforcement authority.'' [149]

A frequently cited source of data on this segment of the market is a series of reports using data from a specialty consumer reporting agency serving certain online lenders, most of whom are unlicensed.[150] These data are not representative of the entire online industry, but nonetheless cover a large enough sample (2.5 million borrowers over a period of four years) to be significant. These reports indicate the following concerning this market segment:

- Although the mean and median loan size among the payday borrowers in this dataset are only slightly higher than the information reported above for storefront payday loans,[151] the online payday lenders charge higher rates than storefront lenders. As noted above, most of the online lenders reporting this data claim exemption from State laws and do not comply with State rate caps. The median loan fee in this dataset is $23.53 per $100 borrowed, compared to $15 per $100 borrowed for storefront payday loans. The mean fee amount is even higher at $26.60 per $100 borrowed.[152] Another study based on a similar dataset from three online payday lenders is generally consistent, putting the

range of online payday loan fees at between $18 and $25 per $100 borrowed.[153]

- More than half of the payday loans made by these online lenders are hybrid payday loans. As described above, a hybrid loan involves automatic rollovers with payment of the loan fee until a final balloon payment of the principal and fee.[154] For the hybrid payday loans, the most frequently reported payment amount is 30 percent of principal, implying a finance charge during each pay period of $30 for each $100 borrowed.[155]
- Unlike storefront payday loan borrowers who generally return to the same store to re-borrow, the credit reporting data may suggest that online borrowers tend to move from lender to lender. As discussed further below, however, it is difficult to evaluate whether some of this apparent effect is due to online lenders simply not consistently reporting lending activity.[156]

Marketing, underwriting, and collection practices. As with most online lenders in other markets, online payday lenders have utilized direct marketing, lead generators, and other forms of advertising for customer acquisition. Lead generators, via Web sites advertising payday loans usually in the form of banner advertisements or paid search results (the advertisements that appear at the top of an Internet search on Google, Bing, or other search engines) operated by ''publishers,'' collect consumers' personal and financial information and electronically offer it to lenders that have expressed interest in consumers meeting certain criteria.[157] In July 2016, Google banned ads for loans with APRs over 36 percent or with repayment due in 60 days or less.[158] From the Bureau's market outreach activities it is aware that the payday lending industry's use of lead generators has decreased but that payday lenders may be using other forms of advertising for customer acquisition and retention.

Online lenders view fraud (*i.e.,* consumers who mispresent their identity) as a significant risk and also express concerns about ''bad faith'' borrowing (*i.e.,* consumers with verified identities who borrow without the intent to repay).[159] Consequently, online payday and hybrid payday lenders attempt to verify the borrower's identity and the existence of a bank account in good standing. Several specialty consumer reporting agencies have evolved primarily to serve the online payday lending market. The Bureau is aware from market outreach that online lenders also generally report loan closure information on a real-time or daily basis to the specialty consumer reporting agencies. In addition, some online lenders report to the Bureau that they use nationwide credit report information to evaluate both credit and potential fraud risk associated with first-time borrowers, including recent bankruptcy filings. However, there is evidence that online lenders do not consistently utilize credit report data for every loan, and instead typically check and report data only for new borrowers or those returning after an extended absence from the lender's records.[160]

Typically, proceeds from online payday loans are disbursed electronically into the consumer's bank account and the consumer authorizes the lender to electronically debit her account to repay the loan as payments are due. The Bureau is aware from market monitoring that lenders employ various practices to encourage consumers to agree to authorize electronic debits for repayment. Some lenders generally will not disburse electronically if consumers do not agree to ACH repayment, but instead will require the consumer to wait for a paper loan proceeds check to arrive in the mail.[161] Some online payday lenders charge higher interest rates or fees to consumers who do not commit to electronic debits.[162] In addition, some online payday lenders have adopted policies that may delay the crediting of non-ACH payments.[163]

As noted above, online lenders typically collect payday loans via electronic debits. For a hybrid payday loan the lender seeks to collect the finance charges a pre-set number of times and then eventually collect the principal; for a true payday loan the lender will seek to collect the principal and finance charges when the loan is due. Online payday lenders, like their

[153] G. Michael Flores, ''The State of Online Short-Term Lending, Second Annual Statistical Analysis Report'' Bretton-Woods, Inc., at 15 (Feb. 28, 2014), *available at http://onlinelendersalliance.org/wp-content/uploads/2015/07/2015-Bretton-Woods-Online-Lending-Study-FINAL.pdf.*

[157] For more information about the use of lead generators in the payday market, *see* Fed. Trade Comm'n, ''Follow the Lead Workshop: Staff Perspective'' (Sept. 2016), *available at https://www.ftc.gov/system/files/documents/reports/staff-perspective-follow-lead/staff_perspective_follow_the_lead_workshop.pdf.*

[158] Google announced that it was ''banning payday loans and some related products from our ads systems,'' in an attempt to ''protect our users from deceptive or harmful financial products.'' The changes to Google's advertising service, AdWords, went into effect on July 13, 2016, and on its face apply to lenders, lead generators, and others. In the six months following the new policy's introduction, Google reported removing five million payday loan ads from its services. However, some observers have questioned the effectiveness of Google's policy. *See* David Graff, ''An Update to Our AdWords Policy on Lending Products,'' Google The Keyword Blog (May 11, 2016), *https://blog.google/topics/public-policy/an-update-to-our-adwords-policy-on/;* Scott Spencer, ''How We Fought Bad Ads, Sites and Scammers in 2016,'' Google The Keyword Blog (Jan. 25, 2017), *https://blog.google/topics/ads/how-we-fought-bad-ads-sites-and-scammers-2016/;* David Dayen, ''Google Said It Would Ban All Payday Loan Ads. It Didn't'' The Intercept, Oct. 7, 2016, *https://theintercept.com/2016/10/07/google-said-it-would-ban-all-payday-loan-ads-it-didnt/.*

[159] For example, Enova states that it uses its own analysis of previous fraud incidences and third party data to determine if applicant information submitted matches other indicators and whether the applicant can authorize transactions from the submitted bank account. In addition, it uses proprietary models to predict fraud. Enova Int'l Inc., 2016 Annual Report (Form 10–K), at 8–9.

[160] Based on the Bureau's market outreach with lenders and specialty consumer reporting agencies.

[161] *See, e.g.,* Mobiloans, ''Line of Credit Terms and Conditions,'' *www.mobiloans.com/terms-and-conditions* (last visited Feb. 5, 2016) (''If you do not authorize electronic payments from your Demand Deposit Account and instead elect to make payments by mail, you will receive your Mobiloans Cash by check in the mail.'').

[162] One online payday lender's Web site FAQs states: ''Q: Am I only able to pay through ACH? A: Paying your cash advance via an electronic funds transfer (EFT) or ACH is certainly the easiest, most efficient, and least expensive method. However, should the need for an alternative payment method arises [sic], we will be happy to discuss that with you.'' National Payday, ''Frequently Asked Questions,'' *https://www.nationalpayday.com/faq/* (last visited July 20, 2017). LendUp's Web site states there may be a fee to make a MoneyGram payment. LendUp, ''Frequently Asked Questions, Paying back your LendUp Loan,'' *https://www.lendup.com/faq#paying-loan* (last visited July 20, 2017).

Under the Electronic Fund Transfer Act (EFTA) and its implementing regulation (Regulation E), lenders cannot condition the granting of credit on a consumer's repayment by preauthorized (recurring) electronic fund transfers, except for credit extended under an overdraft credit plan or extended to maintain a specified minimum balance in the consumer's account. 12 CFR 1005.10(e). The summary in the text of current lender practices is intended to be purely descriptive. The Bureau is not addressing in this rulemaking the question of whether any of the practices described in text are consistent with EFTA.

[163] LendUp's Web site states payment by Moneygram or check may involve ''processing times'' of ''1–2 business days'' to apply the payment. LendUp, ''Frequently Asked Questions, Paying back your LendUp Loan,'' *https://www.lendup.com/faq#paying-loan* (last visited July 20, 2017). LendUp offers both single payment and installment loans, depending on the borrower's State.

storefront counterparts, use various models and software, described above, to predict when an electronic debit is most likely to succeed in withdrawing funds from a borrower's bank account. As discussed further below, the Bureau has observed lenders seeking to collect multiple payments on the same day. This pattern may be driven by a practice of dividing the payment amount in half and presenting two debits at once, presumably to reduce the risk of a larger payment being returned for nonsufficient funds. Indeed, the Bureau found that about one-third of presentments by online payday lenders occur on the same day as another request by the same lender from the same account. The Bureau also found that split presentments almost always result in either payment of all presentments or return of all presentments (in which event the consumer will likely incur multiple nonsufficient funds (NSF) fees from the bank). The Bureau's study indicates that when an online payday lender's first attempt to obtain a payment from the consumer's account is unsuccessful, it will make a second attempt 75 percent of the time and if that attempt fails the lender will make a third attempt 66 percent of the time.[164] As discussed further at part II.D, the success rate on these subsequent attempts is relatively low, and the cost to consumers may be correspondingly high.[165]

There is limited information on the extent to which online payday lenders that are unable to collect payments through electronic debits resort to other collection tactics.[166] The available evidence indicates, however, that online lenders sustain higher credit losses and risk of fraud than storefront lenders. One lender with publicly available financial information that originated both storefront and online single-payment loans reported in 2014, a 49 percent and 71 percent charge-off rate, respectively, for these loans.[167] Online lenders generally classify as ''fraud'' both consumers who misrepresented their identity in order to obtain a loan and consumers whose identity is verified but default on the first payment due, which is viewed as reflecting the intent not to repay.

Business model. While online lenders tend to have fewer costs relating to operation of physical facilities than do storefront lenders, as discussed above, they face higher costs relating to lead acquisition and marketing, loan origination screening to verify applicant identity, and potentially larger losses due to what they classify as ''fraud'' than their storefront competitors.

Accordingly, it is not surprising that online lenders—like their storefront counterparts—are dependent upon repeated re-borrowing. Indeed, even at a cost of $25 or $30 per $100 borrowed, a typical single online payday loan would generate fee revenue of under $100, which is not sufficient to cover the typical origination costs. Consequently, as discussed above, hybrid loans that roll over automatically in the absence of affirmative action by the consumer account for a substantial percentage of online payday business. These products, while nominally structured as single-payment products, effectively build a number of rollovers into the loan. For example, the Bureau has observed online payday lenders whose loan documents suggest that they are offering a single-payment loan but whose business model is to collect only the finance charges due, roll over the principal, and require consumers to take affirmative steps to notify the lender if consumers want to repay their loans in full rather than allowing them to roll over. The Bureau recently initiated an action against an online lender alleging that it engaged in deceptive practices in connection with such products.[168] In a recent survey conducted of online payday borrowers, 31 percent reported that they had experienced loans with automatic renewals.[169]

As discussed above, a number of online payday lenders claim exemption from State laws and the regulations and limitations established under those laws. As reported by a specialty consumer reporting agency with data from that market, more than half of the payday loans for which information is furnished to it are hybrid payday loans with the most common fee being $30 per $100 borrowed, twice the median amount for storefront payday loans.[170]

Similar to associations representing storefront lenders as discussed above, a national trade association representing online lenders includes loan repayment plans as one of its best practices, but does not provide many details in its public material.[171] A trade association that represents Tribal online lenders has adopted a set of best practices, but the list does not address repayment plans.[172]

Vehicle Title Loans, Including Short-Term Loans and Balloon-Payment Products

Vehicle title loans—also known as ''automobile equity loans''—are another form of liquidity lending permitted in certain States. In a title loan transaction, the borrower must provide identification and usually the title to the vehicle as evidence that the borrower owns the vehicle ''free and clear.'' [173]

[164] *See generally CFPB Online Payday Loan Payments,* at 14.

[165] Because these online lenders may offer single-payment payday, hybrid, and installment loans, reviewing the debits does not necessarily distinguish the type of loan involved. Storefront payday lenders were not included. *See* CFPB Online Payday Loan Payments, at 7, 13.

[166] One publicly traded online-only lender that makes single-payment payday loans as well as online installment loans and lines of credit reports that its call center contacts borrowers by phone, email, and in writing after a missed payment and periodically thereafter and that it also may sell uncollectible charged off debt. Enova Int'l Inc., 2016 Annual Report (Form, 10–K), at 9 (Feb. 24, 2017).

[167] Net charge-offs over average balance based on data from Cash America and Enova Forms 10–K. *See* Cash America Int'l, Inc., 2014 Annual Report (Form 10–K), at 102 (Mar. 13, 2015); Enova Int'l Inc., 2014 Annual Report (Form 10–K), at 95 (Mar. 20, 2015). Net charge-offs represent single-payment loan losses less recoveries for the year. Averages balance is the average of beginning and end of year single-payment loan receivables. Prior to November 14, 2014, Enova comprised the e-commerce division of Cash America. Using the 2014 Forms 10–K allows for a better comparison of payday loan activity, than the 2015 Forms 10–K, as Cash America's payday loan operations declined substantially after 2014.

[173] Arizona also allows vehicle title loans to be made against as secondary motor vehicle finance transactions. Ariz. Rev. Stat. sec. 44–281, 44–291G; Arizona Dep.t of Fin. Inst., ''Frequently Asked Questions from Licensees, Question #6 'What is a Title Loan.'''

Unlike payday loans, there is generally no requirement that the borrowers have a bank account, and some lenders do not require a copy of a pay stub or other evidence of income.[174] Rather than holding a check or ACH authorization for repayment as with a payday loan, the lender generally retains the vehicle title or some other form of security interest that provides it with the right to repossess the vehicle, which may then be sold with the proceeds used for repayment.[175]

The lender retains the vehicle title or some other form of security interest during the duration of the loan, while the borrower retains physical possession of the vehicle. In some States either the lender files a lien with State officials to record and perfect its interest in the vehicle or charges a fee for non-filing insurance. In a few States, a clear vehicle title is not required, and vehicle title loans may be made as secondary liens against the title or against the borrower's automobile registration.[176] In some States, such as Georgia, vehicle title loans are made under pawnbroker statutes that specifically permit borrowers to pawn vehicle certificates of title.[177] Almost all vehicle title lending is conducted at storefront locations, although some title lending does occur online.[178]

Product definition and regulatory environment. There are three types of vehicle title loans: Single-payment loans, installment loans, and in at least one State, balloon payment loans.[179] Of the 24 States that permit some form of vehicle title lending, six States permit only single-payment title loans, 13 States allow the loans to be structured as single-payment or installment loans, and five permit only title installment loans.[180] (The payment practices of installment title loans are discussed briefly below.) All but three of the States that permit some form of title lending (Arizona, Georgia, and New Hampshire) also permit payday lending.

Single-payment vehicle title loans are typically due in 30 days and operate much like payday loans: The consumer is charged a fixed price per $100 borrowed, and when the loan is due the consumer is obligated to repay the full amount of the loan plus the fee but is typically given the opportunity to roll over or re-borrow.[181] The Bureau recently studied anonymized data from vehicle title lenders consisting of nearly 3.5 million loans made to over 400,000 borrowers in 20 States. For single-payment vehicle title loans with a typical duration of 30 days, the median loan amount was $694 with a median APR of 317 percent; the average loan amount was $959 and the average APR was 291 percent.[182] Two other studies contain similar findings.[183] Vehicle title loans are therefore for substantially larger amounts than typical payday loans, but carry similar APRs for similar terms. Some States that authorize vehicle title loans limit the rates lenders may charge to a percentage or dollar amount per $100 borrowed, similar to some State payday lending pricing structures. A common fee limit is 25 percent of the loan amount per month, but roughly half of the authorizing States have no restrictions on rates or fees.[184] Some, but not all, States limit the maximum amount that may be borrowed to a fixed dollar amount, a percentage of the borrower's monthly income (50 percent of the borrower's gross monthly income in Illinois), or a

[184] States with a 15 percent to 25 percent per month cap include Alabama, Georgia (rate decreases after 90 days), Mississippi, and New Hampshire; Tennessee limits interest rates to 2 percent per month, but also allows for a fee up to 20 percent of the original principal amount. Virginia's fees are tiered at 22 percent per month for amounts up to $700 and then decrease on larger loans. Ala. Code sec. 5–19A–7(a); Ga. Code Ann. sec. 44–12–131(a)(4); Miss. Code Ann. sec. 75–67–413(1); N.H. Rev. Stat. Ann. sec. 399–A:18(I)(f); Tenn. Code Ann. sec. 45–15–111(a); Va. Code Ann. sec. 6.2–2216(A).

percentage of the vehicle's value.[185] Some States limit the initial loan term to one month but several States authorize rollovers (including, in Idaho and Tennessee, automatic rollovers arranged at the time of the original loan, resembling the hybrid payday structure described above), with a few States requiring mandatory amortization in amounts ranging from five to 20 percent on rollovers.[186] Unlike payday loan regulation, few States require cooling-off periods between loans or optional extended repayment plans for borrowers who cannot repay vehicle title loans.[187]

State vehicle title regulations also sometimes address default, repossession and related fees; any cure periods prior to and after repossession; whether the lender must refund any surplus after the repossession and sale or disposition of the vehicle; and whether the borrower is liable for any deficiency remaining after sale or disposition.[188] Of the States that expressly authorize vehicle title lending, nine are ''non-recourse'' meaning that a lender's remedy upon the borrower's default is limited to repossession of the vehicle unless the borrower has impaired the vehicle by concealment, damage, or fraud.[189] Other vehicle title lending statutes are silent and do not directly specify whether a lender has recourse against a borrower for any deficiency balance remaining after repossessing the vehicle. An industry trade association commenter stated that title lenders do not sue borrowers or garnish their wages for deficiency balances.

Some States have enacted general requirements that vehicle title lenders consider a borrower's ability to repay before making a title loan. For example, both South Carolina and Utah require lenders to consider borrower ability to repay, but this may be accomplished through a borrower affirmation that she has provided accurate financial information and has the ability to repay.[190] Until July 1, 2017, Nevada required title lenders to generally consider a borrower's ability to repay and obtain an affirmation of this fact. Effective July 1st, an amendment to Nevada law requires vehicle title lenders (and payday lenders, as noted above) to assess borrowers' reasonable ability to repay by considering, to the extent available, their current or expected income; current employment status based on a pay stub, bank deposit, or other evidence; credit history; original loan amount due, or for installment loans or potential repayment plans, the monthly payment amount; and other evidence relevant to ability to repay including bank statements and borrowers' written representations.[191] Missouri requires that lenders consider a borrower's financial ability to reasonably repay the loan under the loan's contract, but does not specify how lenders may satisfy this requirement.[192]

Industry size and structure. Information about the vehicle title market is more limited than the storefront payday industry because there are currently no publicly traded monoline vehicle title loan companies, most payday lending companies that offer vehicle title loans are not publicly traded, and less information is generally available from State regulators and other sources.[193] One national survey conducted in June 2015 found that 1.7 million households reported obtaining a vehicle title loan over the preceding 12 months.[194] Another study extrapolating from State regulatory reports estimated that about two million Americans used vehicle title loans annually.[195] In 2014, new vehicle title loan originations were estimated at roughly $2 billion with revenue estimates of $3 to $5.6 billion.[196] These estimates may not include the full extent of rollovers, as well as vehicle title loan expansion by payday lenders.

There are approximately 8,000 title loan storefront locations in the United States, about half of which also offer payday loans.[197] Of those locations that

[185] For example, some maximum vehicle title loan amounts are $2,500 in Mississippi, New Mexico, and Tennessee, and $5,000 in Missouri. Illinois limits the loan amount to $4,000 or 50 percent of monthly income, Virginia and Wisconsin limit the loan amount to 50 percent of the vehicle's value and Wisconsin also has a $25,000 maximum loan amount. Examples of States with no limits on loan amounts, limits of the amount of the value of the vehicle, or statutes that are silent about loan amounts include Arizona, Idaho, South Dakota, and Utah. Miss. Code Ann. sec. 75–67–415(f); N.M. Stat. Ann. sec. 58–15–3(A); Tenn. Code Ann. sec. 45–15–115(3); Mo. Rev. Stat. sec. 367.527(2); Ill. Admin. Code tit. 38; sec. 110.370(a); Va. Code Ann. sec. 6.2–2215(1)(d); Wis. Stat. sec. 138.16(1)(c); (2)(a); Ariz. Rev. Stat. Ann. sec. 44–291(A); Idaho Code Ann. sec. 28–46–508(3); S.D. Codified Laws sec. 54–4–44; Utah Code Ann. sec. 7–24–202(3)(c). As noted above, as of January 1, 2018, New Mexico vehicle title loans will be limited to $5,000, with minimum loan terms of 120 days. N.M. H.B. 347.

[186] States that permit rollovers include Delaware, Georgia, Idaho, Illinois, Mississippi, Missouri, Nevada, New Hampshire, Tennessee, and Utah. Idaho and Tennessee limit title loans to 30 days but allow automatic rollovers and require a principal reduction of 10 percent and 5 percent respectively, starting with the third rollover. Virginia prohibits rollovers and requires a minimum loan term of at least 120 days. *See* Del. Code Ann. tit. 5 sec. 2254 (rollovers may not exceed 180 days from date of fund disbursement); Ga. Code Ann. sec. 44–12–138(b)(4); Idaho Code Ann. sec. 28–46–506(1) & (3); Ill. Admin. Code tit. 38; sec. 110.370(b)(1) (allowing refinancing if principal is reduced by 20 percent); Miss. Code Ann. sec. 75–67–413(3); Mo. Rev. Stat. sec. 367.512(4); Nev. Rev. Stat. sec. 604A.445(2); N.H. Rev. Stat. Ann. sec. 399–A:19(II) (maximum of 10 rollovers); Tenn. Code Ann. sec. 45–15–113(a); Utah Code Ann. sec. 7–24–202(3)(a); Va. Code Ann. sec. 6.2–2216(F).

[187] Illinois requires 15 days between title loans. Delaware requires title lenders to offer a workout agreement after default but prior to repossession that repays at least 10 percent of the outstanding balance each month. Delaware does not cap fees on title loans and interest continues to accrue on workout agreements. Ill. Admin. Code tit. 38; sec. 110.370(c); Del. Code Ann. 5 secs. 2255 & 2258 (2015).

[188] For example, Georgia allows repossession fees and storage fees. Arizona, Delaware, Idaho, Missouri, South Dakota, Tennessee, Utah, Virginia, and Wisconsin specify that any surplus must be returned to the borrower. Mississippi requires that 85 percent of any surplus be returned. Ga. Code Ann. sec. 44–12–131(a)(4)(C); Ariz. Rev. Stat. Ann. sec. 47–9608(A)(4); Del. Code Ann. tit. 5, sec. 2260; Idaho Code Ann. sec. 28–9–615(d); Mo. Rev. Stat. sec. 408.553; S.D. Codified Laws sec. 54–4–72; Tenn. Code Ann. sec. 45–15–114(b)(2); Utah Code Ann. sec. 7–24–204(3); Va. Code Ann. sec. 6.2–2217(C); Wis. Stat. sec. 138.16(4)(e); Miss. Code Ann. sec. 75–67–411(5).

[189] The non-recourse States include Delaware, Florida (short-term loans), Idaho (short-term loans), Nevada, South Carolina, Tennessee (short-term loans), Utah, Virginia, and Wisconsin. Del. Code 5–22–V sec. 2260; Fla. Stat. sec. 33.537.012 (5) (2016); Idaho Code 28–46–508 (2); NRS 604A.455–2; S.C. Code of Laws sec. 37–2–413(5); Tenn. Code Ann. sec. 45–15–115 (2); Utah Code Ann. sec.7–24–204(1); Va. Code sec. 6.2–2217.A & E; and Wis. Stats. 138.16(4)(f). Kentucky and South Dakota's title lending laws are also non-recourse but those States also have low rate caps that effectively prohibit title loans. Ky. Rev Stat 286.10–275 (2015); S.D. Codified Laws 54–4–72. In addition, vehicle title loans are sometimes made under State pawn lending laws that may provide that borrowers have no personal liability to repay pawn loans or obligation to redeem pledged items. *See, e.g.,* O.C.G.A. 44–12–137(a)(7) (2010); La. Rev Stat sec. 37:1803 (2016); Minn. Statutes 325J.08(6) (2016).

predominately offer vehicle title loans, three privately held firms dominate the market and together account for about 3,000 stores in about 20 States.[198] These lenders are concentrated in the southeastern and southwestern regions of the country.[199] In addition to the large title lenders, smaller vehicle title lenders are estimated to have about 800 storefront locations,[200] and as noted above several companies offer both title loans and payday loans.[201] The Bureau understands that for some firms whose core business had been payday loans, the volume of vehicle title loan originations now exceeds payday loan originations.

State loan data also show an overall trend of vehicle title loan growth. The number of borrowers in Illinois taking vehicle title loans increased 77 percent from 2009 to 2013, and then declined 14 percent from 2013 to 2015.[202] The number of title loans taken out in California increased 183 percent between 2011 and 2016.[203] In Virginia, from 2011 to 2013, the number of motor vehicle title loans made increased by 38 percent from 128,446 to a peak of 177,775, and the number of individual consumers taking title loans increased by 44 percent, from 105,542 to a peak of 152,002. By 2016, the number of title loans in Virginia decreased to 155,996 and the number of individual consumers taking title loans decreased to 114,042. The average number of loans per borrower remained constant at 1.2 from 2011 to 2015; in 2016 the number of loans per borrower increased to 1.4.[204] In addition to loans made under Virginia's vehicle title law, a series of reports noted that some Virginia title lenders offered ''consumer finance'' installment loans without the corresponding consumer protections of the vehicle title lending law and, accounted for about ''a quarter of the money loaned in Virginia using automobile titles as collateral.''[205] In Tennessee, the number of licensed vehicle title (title pledge) locations at year-end has been measured yearly since 2006. The number of Tennessee locations peaked in 2014 at 1,071, 52 percent higher than the 2006 levels. In 2015, the number of locations declined to 965. However, in each year from 2013 to 2016, the State regulator has reported more licensed locations than existed prior to the State's title lending regulation, the Tennessee Title Pledge Act.[206]

Vehicle title loan storefront locations serve a relatively small number of customers. One study estimated that the average vehicle title loan store made 218 loans per year, not including rollovers.[207] Another study using data from four States and public filings from the largest vehicle title lender estimated that the average vehicle title loan store serves about 300 unique borrowers per year—or slightly more than one unique borrower per business day.[208] The same report estimated that the largest vehicle title lender had 4.2 employees per store.[209] But, as mentioned, a number of large payday firms offer both products from the same storefront and may use the same employees to do so. In addition, small vehicle title lenders are likely to have fewer employees per location than do larger title lenders.

Marketing, underwriting, and collections practices. Vehicle title loans are marketed to appeal to borrowers with impaired credit who seek immediate funds. The largest vehicle title lender described title loans as a ''way for consumers to meet their liquidity needs'' and described their customers as those who ''often . . . have a sudden and unexpected need for cash due to common financial challenges.''[210] Advertisements for vehicle title loans suggest that title loans can be used ''to cover unforeseen costs this month . . . [if] utilities are a little higher than you expected,'' if consumers are ''in a bind,'' for a ''short term cash

[198] The largest vehicle title lender is TMX Finance, LLC formerly known as Title Max Holdings, LLC with about 1,200 stores in 17 States. It was publicly traded until 2013 when it was taken private. flow'' problem, or for ''fast cash to deal with an unexpected expense.'' [211] Vehicle title lenders advertise quick loan approval ''in as little as 15 minutes.'' [212] Some lenders offer promotional discounts for the initial loan and bonuses for referrals,[213] for example, a $100 prepaid card for referring friends for vehicle title loans.[214]

The underwriting policies and practices that vehicle title lenders use vary and may depend on such factors as State law requirements and individual lender practices. As noted above, some vehicle title lenders do not require borrowers to provide information about their income and instead rely on the vehicle title and the underlying collateral that may be repossessed and sold in the event the borrower defaults—a practice known as asset-based lending.[215] The largest vehicle title lender stated in 2011 that its underwriting decisions were based entirely on the wholesale value of the vehicle.[216] Other title lenders' Web sites state that proof of income is required,[217] although it is unclear whether employment information is verified or used for underwriting, whether it is used for collections and communication purposes upon default, or for both purposes. The Bureau is aware, from confidential information gathered in the course of its statutory functions, that one or more vehicle title lenders regularly exceed their maximum loan amount guidelines and instruct employees to consider a vehicle's sentimental or use value to the borrower when assessing the amount of funds they will lend.

As in the market for payday loans, there have been some studies about the extent of price competition in the vehicle title lending market. Vehicle title lending is almost exclusively a storefront market, as discussed above. The evidence of price competition is mixed. One large title lender stated that it competes on factors such as location, customer service, and convenience, and also highlights its pricing as a competitive factor.[218] An academic study found evidence of price competition in the vehicle title market, citing the abundance of price-related advertising and evidence that in States with rate caps, such as Tennessee, approximately half of the lenders charged the maximum rate allowed by law, while the other half charged lower rates.[219] However, another report found that like payday lenders, title lenders compete primarily on location, speed, and customer service, gaining customers by increasing the number of locations rather than underpricing their competition.[220]

Loan amounts are typically for less than half the wholesale value of the consumer's vehicle. Low loan-to-value ratios reduce a lender's risk. A survey of title lenders in New Mexico found that the lenders typically lend between 25 and 40 percent of a vehicle's wholesale value.[221] At one large title lender, the weighted average loan-to-value ratio was found to be 26 percent of Black Book retail value.[222] The same lender has two principal operating divisions; one division requires that vehicles have a minimum appraised value greater than $500, but the lender will lend against vehicles with a lower appraised value through another brand.[223]

When a borrower defaults on a vehicle title loan, the lender may repossess the vehicle. The Bureau believes, based on market outreach, that the decision whether to repossess a vehicle will depend on factors such as the amount due, the age and resale value of the vehicle, the costs to locate and repossess the vehicle, and State law requirements to refund any surplus amount remaining after the sale proceeds have been applied to the remaining loan balance.[224] Available information indicates that lenders are unlikely to repossess vehicles they do not expect to sell. The largest vehicle title lender sold 83 percent of the vehicles it repossessed but did not report overall repossession rates.[225] In 2012, its firm-wide gross charge-offs equaled 30 percent of its average outstanding title loan balances.[226] The Bureau is aware of vehicle title lenders engaging in illegal debt collection activities in order to collect amounts claimed to be due under title loan agreements. These practices include altering caller ID information on outgoing calls to borrowers to make it appear that calls were from other businesses, falsely threatening to refer borrowers for criminal investigation or prosecution, and unlawfully disclosing debt information to borrowers' employers, friends, and family.[227] In

Continued

addition, approximately 16 percent of consumer complaints handled by the Bureau about vehicle title loans involved consumers reporting concerns about repossession issues.[228]

Some vehicle title lenders have installed electronic devices on the vehicles, known as starter interrupt devices, automated collection technology, or more colloquially as ''kill switches,'' that can be programmed to transmit audible sounds in the vehicle before or at the payment due date. The devices may also be programmed to prevent the vehicle from starting when the borrower is in default on the loan, although they may allow a one-time re-start upon the borrower's call to obtain a code.[229] One of the starter interrupt providers states that ''[a]ssuming proper installation, the device will *not* shut off the vehicle while driving.'' [230] Due to concerns about consumer harm, a State Attorney General issued a consumer alert about the use of starter interrupt devices specific to vehicle title loans.[231] The alert also noted that some title lenders require consumers to provide an extra key to their vehicles. In an attempt to avoid illegal repossessions, Wisconsin's vehicle title law prohibits lenders from requiring borrowers to provide the lender with an extra key to the vehicle.[232] The Bureau has received several complaints about starter interrupt devices.

Business model. As noted above, short-term vehicle title lenders appear to have overhead costs relatively similar to those of storefront payday lenders. Default rates on vehicle title loans and lender reliance on re-borrowing activity appear to be even greater than that of storefront payday lenders.

Based on data analyzed by the Bureau, the default rate on single-payment vehicle title loans is six percent and the sequence-level default rate is 33 percent, compared with a 20 percent sequence-level default rate for storefront payday loans. One-in-five single-payment vehicle title loan borrowers have their vehicle repossessed by the lender.[233] One industry trade association commenter stated that 15 to 25 percent of repossessed vehicles are subsequently redeemed by borrowers after paying off the deficiency balance owed (along with repossession costs).

Similarly, the rate of vehicle title re-borrowing appears high. In the Bureau's data analysis, more than half—56 percent—of single-payment vehicle title loan sequences stretched for at least four loans; over a third—36 percent—were seven or more loans; and 23 percent of loan sequences consisted of 10 or more loans. While other sources on vehicle title lending are more limited than for payday lending, the Tennessee Department of Financial Institutions publishes a biennial report on vehicle title lending. Like the single-payment vehicle title loans the Bureau has analyzed, the vehicle title loans in Tennessee are 30-day single-payment loans. The most recent report shows similar patterns to those the Bureau found in its research, with a substantial number of consumers rolling over their loans multiple times. According to the report, of the total number of loan agreements made in 2014, about 15 percent were paid in full after 30 days without rolling over. Of those loans that are rolled over, about 65 percent were at least in their fourth rollover, about 44 percent were at least in their seventh rollover, and about 29 percent were at least in their tenth, up to a maximum of 22 rollovers.[234]

The impact of these outcomes for consumers who are unable to repay and either default or re-borrow is discussed in Market Concerns—Underwriting.

Short-Term Lending by Depository Institutions

As noted above, within the banking system, consumers with liquidity needs rely primarily on credit cards and overdraft services. Some depository institutions, particularly community banks and credit unions, provide occasional small loans on an accommodation basis to their customers.[235] The Bureau's market monitoring indicates that a number of the banks and credit unions offering these accommodation loans are located in small towns and rural areas and that it is not uncommon for borrowers to be in non-traditional employment or have seasonal or variable income. In addition, some depository institutions have experimented with short-term payday-like products or partnered with payday lenders, but such experiments have had mixed results and in several cases have prompted prudential regulators to take action discouraging certain types of activity. For a period of time, a handful of banks also offered a deposit advance product as discussed below; that product also prompted prudential regulators to issue guidance that effectively discouraged the offering of the product.

National banks, most State-chartered banks, and State credit unions are permitted under existing Federal laws to charge interest on loans at the highest rate allowed by the laws of the State in which the lender is located (lender's home State).[236] The bank or State-chartered credit union may then charge the interest rate of its home State on loans it makes to borrowers in other States without needing to comply with the usury limits of the States in which it makes the loans (borrower's home State). Federal credit unions generally must not charge more than an 18 percent interest rate. However, the National Credit Union Administration

Tactics,'' (Oct. 1, 2015), *available at https://www.consumerfinance.gov/about-us/newsroom/cfpb-orders-indirect-auto-finance-company-to-provide-consumers-44-1-million-in-relief-for-illegal-debt-collection-tactics/.* In September 2016, the CFPB took action against TMX Finance, alleging that employees made in-person visits to borrowers' references and places of employment, and disclosed the existence of borrowers' past due debts to these third-parties. Alternatively, these lenders may charge a rate that is no more than 1 percent above the 90-day commercial paper rate in effect at the Federal Reserve Bank in the Federal Reserve district in which the lender is located (whichever is higher). *Id.*

(NCUA) has taken some steps to encourage federally chartered credit unions to offer ''payday alternative loans,'' which generally have a longer term than traditional payday products. Federal credit unions are authorized to make these small-dollar loans at rates up to 28 percent interest plus an application fee. This program is discussed in more detail below.

Agreements between depository institutions and payday lenders. In 2000, the Office of the Comptroller of the Currency (OCC) issued an advisory letter alerting national banks that the OCC had significant safety and soundness, compliance, and consumer protection concerns with banks entering into contractual arrangements with vendors seeking to avoid certain State lending and consumer protection laws. The OCC noted it had learned of nonbank vendors approaching federally chartered banks urging them to enter into agreements to fund payday and title loans. The OCC also expressed concern about unlimited renewals (what the Bureau refers to as rollovers or re-borrowing), and multiple renewals without principal reduction.[237] The agency subsequently took enforcement actions against two national banks for activities relating to payday lending partnerships.[238]

The Federal Deposit Insurance Corporation (FDIC) has also expressed concerns with similar agreements between payday lenders and the depositories under its purview. In 2003, the FDIC issued Guidelines for Payday Lending applicable to State-chartered FDIC-insured banks and savings associations; the guidelines were revised in 2005 and most recently in 2015. The guidelines focus on third-party relationships between the chartered institutions and other parties, and specifically address rollover limitations. They also indicate that banks should ensure borrowers exhibit both a willingness and ability to repay when rolling over a loan. Among other things, the guidelines indicate that institutions should: (1) Ensure that payday loans are not provided to customers who had payday loans outstanding at any lender for a total of three months during the previous 12 months; (2) establish appropriate cooling-off periods between loans; and (3) provide that no more than one payday loan is outstanding with the bank at a time to any one borrower.[239] In 2007, the FDIC issued guidelines encouraging banks to offer affordable small-dollar loan alternatives with APRs of 36 percent or less, reasonable and limited fees, amortizing payments, underwriting focused on a borrower's ability to repay but allowing flexible documentation, and to avoid excessive renewals.[240]

Deposit advance product lending. As the payday lending industry grew, a handful of banks decided to offer their deposit customers a similar product termed a deposit advance product (DAP). While one bank started offering deposit advances in the mid-1990s, the product began to spread more rapidly in the late 2000s and early 2010s. DAP could be structured a number of ways but generally involved a line of credit offered by depository institutions as a feature of an existing consumer deposit account with repayment automatically deducted from the consumer's next qualifying deposit. Deposit advance products were available to consumers who received recurring electronic deposits if they had an account in good standing and, for some banks, several months of account tenure, such as six months. When an advance was requested, funds were deposited into the consumer's account. Advances were automatically repaid when the next qualifying electronic deposit, whether recurring or one-time, was made to the consumer's account rather than on a fixed repayment date. If an outstanding advance was not fully repaid by an incoming electronic deposit within about 35 days, the consumer's account was debited for the amount due and could result in a negative balance on the account.

The Bureau estimates that at the product's peak from mid-2013 to mid-2014, banks originated roughly $6.5 billion of advances, which represents about 22 percent of the volume of storefront payday loans issued in 2013. The Bureau estimates that at least 1.5 million unique borrowers took out one or more DAP loans during that same period.[241]

DAP fees, like payday loan fees, did not vary with the amount of time that the advance was outstanding but rather were set as dollars per amount advanced. A typical fee was $2 per $20 borrowed, the equivalent of $10 per $100. Research undertaken by the Bureau using a supervisory dataset found that the median duration of an episode of DAP usage was 12 days, yielding an effective APR of 304 percent.[242]

The Bureau further found that while the median draw on a DAP was $180, users typically took more than one draw before the advance was repaid. The multiple draws resulted in a median average daily DAP balance of $343, which is similar to the size of a typical payday loan. With the typical DAP fee of $2 per $20 advanced, the fees for $343 in advances equate to about $34.30. The median DAP user was indebted for 112 days over the course of a year and took advances in seven months. Fourteen percent of borrowers took advances totaling over $9,000 over the course of the year; these borrowers had a median number of days in debt of 254.[243]

In 2010, the Office of Thrift Supervision (OTS) issued a supervisory directive ordering one bank to terminate its DAP program, which the bank offered in connection with prepaid accounts, after determining the bank engaged in unfair or deceptive acts or

practices and violated the OTS' Advertising Regulation.[244] Consequently, in 2011, pursuant to a cease and desist order, the bank agreed to remunerate its DAP consumers nearly $5 million and pay a civil monetary penalty of $400,000.[245]

In November 2013, the FDIC and OCC issued final supervisory guidance on DAP.[246] This guidance stated that banks offering DAP should adjust their programs in a number of ways, including applying more scrutiny in underwriting DAP loans and discouraging repetitive borrowing. Specifically, the OCC and FDIC stated that banks should ensure that the customer relationship is of sufficient duration to provide the bank with adequate information regarding the customer's recurring deposits and expenses, and that the agencies would consider sufficient duration to be no less than six months. In addition, the guidance said that banks should conduct a more stringent financial capacity assessment of a consumer's ability to repay the DAP advance according to its terms without repeated re-borrowing, while meeting typical recurring and other necessary expenses, as well as outstanding debt obligations. In particular, the guidance stated that banks should analyze a consumer's account for recurring inflows and outflows at the end, at least, of each of the preceding six months before determining the appropriateness of a DAP advance. Additionally, the guidance noted that in order to avoid re-borrowing, a cooling-off period of at least one monthly statement cycle after the repayment of a DAP advance should be completed before another advance could be extended. Finally, the guidance stated that banks should not increase DAP limits automatically and without a fully underwritten reassessment of a consumer's ability to repay, and banks should reevaluate a consumer's eligibility and capacity for DAP at least every six months.[247]

Following the issuance of the FDIC and OCC guidance, banks supervised by the FDIC and OCC ceased offering DAP. Of two DAP-issuing banks supervised by the Federal Reserve Board and therefore not subject to either the FDIC or OCC guidance, one eliminated its DAP program while another continues to offer a modified version of DAP to its existing DAP borrowers.[248] Today, with the exception of some short-term lending within the NCUA's Payday Alternative Loan (PAL) program, described in detail below, relatively few banks or credit unions offer large-scale formal loan programs of this type.

Federal credit union payday alternative loans. As noted above, Federal credit unions may not charge more than 18 percent interest. However, in 2010, the NCUA adopted an exception to the interest rate limit under the Federal Credit Union Act that permitted Federal credit unions to make PALs at an interest rate of up to 28 percent plus an application fee, ''that reflects the actual costs associated with processing the application'' up to $20.[249] PALs may be made in amounts of $200 to $1,000 to borrowers who have been members of the credit union for at least one month. PAL terms range from one to six months, PALs may not be rolled over, and borrowers are limited to one PAL at a time and no more than three PALs from the same credit union in a rolling six-month period. PALs must fully amortize and the credit union must establish underwriting guidelines such as verifying borrowers' employment from at least two recent pay stubs.[250]

In 2016, about 650 Federal credit unions (nearly 20 percent of all Federal credit unions) offered PALs, with originations at $134.7 million, representing a 9.7 percent increase from 2015.[251] In 2015, the average PAL amount was about $700 and carried a median interest rate of 25 percent; in 2016, the average PAL loan amount increased to about $720 with a similar median interest rate of 25 percent.[252]

C. Longer-Term, High-Cost Loans

In addition to short-term loans, certain longer-term, high-cost loans will be covered by the payments protections provisions of this rule. These are longer-term, high-cost loans with a leveraged payment mechanism, as described in more detail in part II.D and Markets Concerns—Payments. The category of longer-term high-cost loans most directly impacted by the payments protections in this rule are payday installment loans.

Payday Installment Loans

Product definition and regulatory environment. The term ''payday installment loan'' refers to a high-cost loan repaid in multiple installments, with each installment typically due at the consumer's payday and with the lender generally having the ability to collect the payment from the consumer's bank account as money is deposited or directly from the consumer's paycheck.[253]

Two States, Colorado and Illinois, have authorized payday installment loans.[254] Through 2010 amendments to its payday loan law, Colorado no longer permits short-term single-payment payday loans. Instead, in order to charge fees in excess of the 36 percent APR cap for most other consumer loans, the minimum loan term must be six months and lenders are permitted to take a series of post-dated checks or payment authorizations to cover each payment under the loan, providing lenders with the same access to borrower's accounts as a single-payment payday loan.[255] In Illinois, lenders have been permitted to make payday installment loans since 2011. These loans must be fully-amortizing for terms of 112 to 180 days and the loan amounts are limited to the

[253] Lenders described in part II.C as payday installment lenders may not use this terminology.

[254] As noted above, as of January 1, 2018, New Mexico payday loans (and vehicle title loans) must be payable in four substantially equal payments over at least 120 days with an APR of 175 percent or less.

[255] Colo. Rev. Stat. sec. 5–3.1–103. Although loans may be structured in multiple installments of substantially equal payments or a single installment, almost all lenders contract for repayment in monthly or bi-weekly installments. 4 Colo. Code Regs. sec. 902–1, Rule 17(B); Adm'r of the Colo. Consumer Credit Unit, ''Colorado Payday Lending—July Demographic and Statistical Information: July 2000 through December 2012,'' at 15–16, *available at https://coag.gov/uccc/info/ar.*

lesser of $1,000 or 22.5 percent of gross monthly income.[256]

A number of other States have adopted usury laws that some payday lenders use to offer payday installment loans in lieu of, or in addition to, more traditional payday loans. Since July 2016, Mississippi lenders can make ''credit availability loans''—closed-end fully-amortizing installment loans with loan terms of four to 12 months, whether secured by personal property or unsecured.[257] The maximum loan amount on a credit availability loan is limited to $2,500, and lenders may charge a monthly handling fee of up to 25 percent of the outstanding principal balance plus an origination fee of the greater of 1 percent of the amount disbursed or $5.[258]

As of 2015, Tennessee lenders may offer ''flex loans''—open-end lines of credit that need not have a fixed maturity date and that may be secured by personal property or unsecured.[259] The maximum outstanding balance on a flex loan may not exceed $4,000, with an interest rate of up to 24 percent per annum and ''customary fees'' for underwriting and other purposes not to exceed a daily rate of 0.7 percent of the average daily principal balance.[260] At least one lender offering flex loans states that loan payments are ''aligned with your payday.'' [261] Similar legislation has been unsuccessful in other States. For example, in May 2017 the Governor of Oklahoma vetoed legislation that would have authorized high-cost installment loans with interest rates of up to 17 percent per month, or 204 percent APR.[262]

None of these laws authorizing payday installment loans, credit access loans, or flex loans appear to limit the use of electronic repayment or ACH options for repayment.

In addition to States that authorize a specific form of payday installment loan, credit access loan, or flex loan, several other States provide room within their usury laws for high-cost installment products. A recent report found that seven States have no rate or fee limits for closed-end loans of $500 and that 10 States have no rate or fee limits for closed-end loans of $2,000.[263] The same report noted that for open-end credit, 13 States do not limit rates for a $500 advance and 15 States do not limit them for a $2,000 advance.[264] Another recent study of the Web sites of five payday lenders that operate both online and at storefront locations found that these five lenders offered payday installment loans in at least 17 States.[265]

In addition, as discussed above, a substantial segment of the online payday industry operates outside of the constraints of State law, and this segment, too, has migrated towards payday installment loans. For example, a study commissioned by a trade association for online lenders surveyed seven lenders and concluded that, while single-payment loans are still a significant portion of these lenders' volume, they are on the decline while installment loans are growing. Several of the lenders represented in the report had either eliminated single-payment products or were migrating to installment products while still offering single-payment loans.[266] For the practical reasons associated with having no retail locations, online lenders prefer repayment by electronic methods and use various approaches to secure consumers' authorization for payments electronically through ACH debits.

As with payday loans, and as noted above, as authorized or permitted by some State laws, payday installment lenders often hold borrowers' checks or obtain their authorization for ACH repayment. Some borrowers may prefer ACH repayment methods for convenience. The Bureau is aware of certain practices used by payday installment lenders to secure repayment through consumers' accounts including longer waits for distribution of loan proceeds and higher fees for non-electronic payment methods, described above in the Online Payday Loans section, and discussed in more detail in part II.D and Markets Concerns—Payments. To the extent that longer-term payday installment loans meet the cost of credit threshold and include leveraged payment mechanisms, they are subject to this rule's payments protections.[267]

Finance Company Installment Loans

Product definition and regulatory environment. Before the advent of single-payment payday loans or online lending, and before widespread availability of credit cards, ''personal loans'' or ''personal installment loans'' were offered by storefront nonbank installment lenders, often referred to as ''finance companies.'' Personal loans are typically unsecured loans used for any variety of purposes and distinguished from loans where the lender generally requires the funds be used for a specific intended purpose, such as automobile purchase loans, student loans, and mortgage loans. As discussed below, these finance companies (and their newer online counterparts) have a different business model than payday installment lenders. Some of these finance companies limit the APRs on their loans to 36 percent or less,

[267] Installment vehicle title loans are title loans that are contracted to be repaid in multiple installments rather than in a single payment. Vehicle title lending almost exclusively occurs at retail storefront locations and consequently, borrowers often repay both in cash at the lender's location. However, some installment vehicle title lenders allow repayment by ACH from the borrower's account or by debit card, a practice common to payday installment loans. *See, e.g.,* Auto Loan Store, ''Auto Title Loan FAQ,'' *https://www.autotitlelending.com/faq/* (last visited June 20, 2017); TFC Title Loans, ''How Are Title Loans Paid Back?,'' TFC Title Loans Blog, *https://www.tfctitleloans.com/blog/how-are-title-loans-paid-back/* (last visited Sept. 17, 2017); Presto Title Loans, ''You Can Make Payments Online!,'' *http://prestoautoloans.com/pay-online/!/* (last visited June 20, 2017). To the extent that longer-term installment vehicle title loans meet the cost of credit threshold and the lender obtains a leveraged payment mechanism, the loans are subject to this rule's protections for payment presentments.

whether required by State law or as a matter of company policy. However, there are other finance companies and installment lenders that offer loans that fall within the rule's definition of ''covered longer-term loan,'' as they carry a cost of credit that exceeds 36 percent APR and include repayment through a leveraged payment mechanism—access to the borrower's account.

According to a report from a consulting firm using data derived from a nationwide consumer reporting agency, in 2016 finance companies originated 8.6 million personal loans (unsecured installment loans) totaling $41.7 billion in originations; approximately 6.9 million of these loans worth $25.8 billion, with an average loan size of about $3,727, were made to nonprime consumers (categorized as near prime, subprime, and deep subprime, with VantageScores of 660 and below).[268]

APRs at storefront locations in States that do not cap rates on installment loans can be 50 to 90 percent for subprime and deep subprime borrowers; APRs in States with rate caps are 24 to 36 percent APR for near prime and subprime borrowers.[269] A survey of finance companies conducted in conjunction with a national trade association reported that 80 percent of loans were for $2,000 or less and 85 percent of loans had durations of 24 months or less (60 percent of loans had durations of one year or less).[270] The survey did not report an average loan amount. Almost half of the loans had APRs between 49 and 99 percent; 9 percent of loans of $501 or less had APRs between 100 and 199 percent, but there was substantial rate variation among States.[271] Except for loans subject to the Military Loan Act described above, APR calculations under Regulation Z include origination fees, but lenders generally are not required to include within the APR costs such as application fees and add-on services such as optional credit insurance and guaranteed automobile protection.[272] A wider range and number of such up-front fees and add-on products and services appear to be charged by the storefront lenders than by their newer online counterparts.

Finance companies typically engage in underwriting that includes a monthly net income and expense budget, a review of the consumer's credit report, and an assessment of monthly cash flow.[273] One trade association representing traditional finance companies has described the underwriting process as evaluating the borrower's ''stability, ability, and willingness'' to repay the loan.[274] Many finance companies report loan payment history to one or more of the nationwide consumer reporting agencies,[275] and the Bureau believes from market outreach that these lenders generally furnish payment information on a monthly basis.

With regard to newer online counterparts, the Bureau is aware from its market monitoring activities that some online installment lenders in this market offer products that resemble the types of loans made by finance companies. Many of these online installment lenders engage in highly-automated underwriting that involves substantial use of analytics and technology. The APRs on the loans are over 36 percent and can reach the triple digits.[276]

Finance companies and online installment lenders offer various methods for consumers to repay their loans. Particularly for online loans, repayment through ACH is common.[277] Some online installment lenders also allow other repayment methods, such as check, debit or credit card, MoneyGram, or Western Union, but may require advance notice for some of these payment methods.[278] From its market monitoring functions, the Bureau is aware that finance companies with storefront locations tend to offer a wider array of repayment options. Some finance companies will accept ACH payments in person, set up either during the loan closing process or at a later date, or by phone.[279] Finance companies also traditionally take payments in-store, generally by cash or check, or by mail. Some finance companies charge consumers a fee to use certain payment methods.[280]

D. Initiating Payment From Consumers' Accounts

As discussed above, payday and payday installment lenders nearly universally obtain at origination one or more authorizations to initiate withdrawal of payment from the consumer's account. There are a variety of payment options or channels that they use to accomplish this goal, and lenders frequently obtain authorizations for multiple types. Different payment channels are subject to different laws and, in some cases, private network rules, leaving lenders with broad control over the parameters of how a particular payment will be pulled from a consumer's account, including the date, amount, and payment method.

Obtaining Payment Authorization

A variety of payment methods enable lenders to use a previously-obtained authorization to initiate a withdrawal from a consumer's account without further action from the consumer. These methods include paper signature checks, remotely created checks (RCCs) and remotely created payment orders (RCPOs),[281] and electronic payments like ACH[282] and debit and prepaid card transactions. Payday and payday installment lenders—both online and in storefronts—typically obtain a post-dated check or electronic payment authorization from consumers for repayments of loans.[283] For storefront payday loans, lenders typically obtain a post-dated check (or, where payday installment products are authorized, a series of postdated checks) that they can use to initiate a check or ACH transaction from a consumer's account. For an online loan, a consumer often provides bank account information to receive the loan funds, and the lender often uses that bank account information to obtain payment from the consumer.[284] This account information can be used to initiate an ACH payment from a consumer's account. Typically, online lenders require consumers to authorize payments from their account as part of their agreement to receive the loan proceeds electronically.[285] Some traditional installment lenders also obtain an electronic payment authorization from their customers.

Payday and payday installment lenders often take authorization for multiple payment methods, such as taking a post-dated check along with the consumer's debit card information.[286] Consumers usually provide the payment authorization as part of the loan origination process.[287]

For storefront payday loans, providing a post-dated check is typically a requirement to obtain a loan. Under the Electronic Fund Transfer Act (EFTA) lenders cannot condition credit on obtaining an authorization from the consumer for ''preauthorized'' (recurring) electronic fund transfers,[288] but in practice online payday and payday installment lenders are able to obtain such authorizations from consumers for almost all loans. The EFTA provision concerning compulsory use does not apply to paper checks and one-time electronic fund transfers. Moreover, even for loans subject to the EFTA compulsory use provision, lenders use various methods to obtain electronic authorizations. For example, although some payday and payday installment lenders provide consumers with alternative methods to repay loans, these options may be burdensome and may significantly change the terms of the loan. For example, one lender increases its APR by an additional 61 percent or 260 percent, depending on the length of the loan, if a consumer elects a cash-only payment option for its installment loan product, resulting in a total APR of 462 percent (210 day loan) to 780 percent (140 day loan).[289] Other lenders change the origination process if consumers do not immediately provide account access. For example, some online payday lenders require prospective customers to contact them by phone if they do not want to provide a payment authorization and wish to

---

[281] A RCC or RCPO is a type of check that is created by the payee—in this case, it would be created by the lender—and processed through the check clearing system. Given that the check is created by the lender, it does not bear the consumer's signature. *See* Regulation CC, 12 CFR 229.2(fff) (defining remotely created check); Telemarketing Sales Rule, 16 CFR 310.2(cc) (defining ''remotely created payment order'' as a payment instrument that includes remotely created checks).

[282] In order to initiate an ACH payment from a consumer's account, a lender must send a request (also known as an ''entry'') through an originating depository financial institution (ODFI). An ODFI is a bank or other financial institution with which the lender or the lender's payment processor has a relationship. ODFIs aggregate and submit batches of entries for all of their originators to an ACH operator. The ACH operators sort the ACH entries and send them to the receiving depository financial institutions (RDFI) that hold the individual consumer accounts. The RDFI then decides whether to debit the consumer's account or to send it back unpaid. ACH debit transactions generally clear and settle in one business day after the payment is initiated by the lender. The private operating rules for the ACH network are administered by the National Automated Clearinghouse Association (NACHA), an industry trade organization.

[283] *See, e.g.,* QC Holdings, Inc., 2014 Annual Report (Form 10–K), at 6 (Mar. 12, 2015) (''Upon completion of a loan application, the customer signs a promissory note with a maturity of generally two to three weeks. The loan is collateralized by a check (for the principal amount of the loan plus a specified fee), ACH authorization or a debit card.''); Advance America, 2011 Annual Report (Form 10–K) at 45 (Mar. 15, 2012) (''After the required documents presented by the customer have been reviewed for completeness and accuracy, copied for record-keeping purposes, and the cash advance has been approved, the customer enters into an agreement governing the terms of the cash advance. The customer then provides a personal check or an Automated Clearing House (''ACH'') authorization, which enables electronic payment from the customer's account, to cover the amount of the cash advance and charges for applicable fees and interest of the balance due under the agreement.''); ENOVA Int'l, Inc., 2014 Annual Report (Form 10–K), at 6 (Mar. 20, 2015)) (''When a customer takes out a new loan, loan proceeds are promptly deposited in the customer's bank account or onto a debit card in exchange for a preauthorized debit for repayment of the loan from the customer's account.'').

pay by money order or check at a later time. Other lenders delay the disbursement of the loan proceeds if the consumer does not immediately provide a payment authorization.[290]

Banks and credit unions have additional payment channel options when they lend to consumers who have a deposit account at the same institution. As a condition of certain types of loans, many financial institutions require consumers to have a deposit account at that same institution.[291] The loan contract often authorizes the financial institution to pull payment directly from the consumer's account. Since these payments can be processed through an internal transfer within the bank or credit union, these institutions do not typically use external payment channels to complete an internal payment transfer.

Exercising Payment Authorizations

For different types of loans that will be covered under the rule, lenders use their authorizations to collect payment differently. As discussed above, most storefront lenders encourage or require consumers to return to their stores to pay in cash, roll over, or otherwise renew their loans. The lender often will deposit a post-dated check or initiate an electronic fund transfer only where the lender considers the consumer to be in ''default'' under the contract or where the consumer has not responded to the lender's communications.[292] Bureau examiners have cited one or more payday lenders for threatening to initiate payments from consumer accounts that were contrary to the agreement, and that the lenders did not intend to initiate.[293]

In contrast, online lenders typically use the authorization to collect all payments, not just those initiated after there has been some indication of distress from the consumer. Moreover, as discussed above, online lenders offering ''hybrid'' payday loan products structure them so that the lender is authorized to collect a series of interest-only payments—the functional equivalent of paying finance charges to roll over the loan—before full payment or amortizing payments are due.[294] The Bureau also is aware that some online lenders, although structuring their product as nominally a two-week loan, automatically roll over the loan every two weeks unless the consumer takes affirmative action to make full payment.[295] The payments processed in such cases are for the cost of the rollover rather than the full balance due.

As a result of these distinctions, storefront and online lenders have different success rates in exercising such payment authorizations. Some large storefront lenders report that they initiate payment attempts in less than 10 percent of cases, and that 60 to 80 percent of those attempts are returned for non-sufficient funds.[296] Bureau analysis of ACH payments by online payday and payday installment lenders, which typically collect all payments by initiating a transfer from consumers' accounts, indicates that for any given payment only about 6 percent fail on the first try. However, over an eighteen-month observation period, 50% of online borrowers were found to experience at least one payment attempt that failed or caused an overdraft and one-third of the borrowers experienced more than one such incident.

Lenders typically charge fees for these returned payments, sometimes charging both a returned payment fee and a late fee.[297] These fees are in addition to fees, such as NSF fees, that may be charged by the financial institution that holds the consumer's account.

The Bureau found that if an electronic payment attempt failed, online lenders try again three-quarters of the time. However, after an initial failure the lender's likelihood of failure jumps to 70 percent for the second attempt and 73 percent for the third. Of those that succeed, roughly one-third result in an overdraft.

Both storefront and online lenders also frequently change the ways in which they attempt to exercise authorizations after one attempt has failed. For example, many typically make additional attempts to collect initial payment due.[298] Some lenders attempt to collect the entire payment

[292] Payday and payday installment lenders may contact consumers a few days before the payment is due to remind them of their upcoming payment. This is a common practice, with many lenders calling the consumer 1 to 3 days before the payment is due, and some providing reminders through text or email.

The Company subsequently collects a large percentage of these bad debts by redepositing the customers' checks, ACH collections or receiving subsequent cash repayments by the customers.''); Advance America, ''FAQs on Payday Loans/Cash Advances,'' *https://www.advanceamerica.net/questions/payday-loans-cash-advances* (last visited Sept. 17, 2017) (''Once we present your bank with your ACH authorization for payment, your bank will send the specified amount to CashNetUSA. If the payment is returned because of insufficient funds, CashNetUSA can and will re-present the ACH Authorization to your bank.'').

amount once or twice within a few weeks of the initial failure. The Bureau, however, is aware of online and storefront lenders that use more aggressive and unpredictable payment collection practices, including breaking payments into multiple smaller payments and attempting to collect payment multiple times in one day or over a short period of time.[299] The cost to lenders to repeatedly attempt payment depends on their contracts with payment processors and commercial banks, but is generally nominal; the Bureau estimates the cost is in a range of 5 to 15 cents for an ACH transaction.[300] These practices are discussed in more detail in Market Concerns—Payments.

As noted above, banks and credit unions that lend to their account holders can use their internal system to transfer funds from the consumer accounts and do not need to utilize the payment networks. Deposit advance products and their payment structures are discussed further in part II.B. The Bureau believes that many small-dollar loans with depository institutions are paid through internal transfers.

Due to the fact that lenders obtain authorizations to use multiple payment channels and benefit from flexibility in the underlying payment systems, lenders generally enjoy broad discretion over the parameters of how a particular payment will be pulled from a consumer's account, including the date, amount, and payment method. For example, although a check specifies a date, lenders may not present the check on that date. Under UCC section 4–401, merchants can present checks for payment even if the check specifies a later date.[301] Lenders sometimes attempt to collect payment on a different date from the one stated on a check or original authorization. They may shift the attempt date in order to maximize the likelihood that funds will be in the account; some use their own models to determine when to collect, while others use predictive payment products provided by third parties that estimate when funds are most likely to be in the account.[302]

Moreover, the checks provided by consumers during origination often are not processed as checks. Rather than sending these payments through the check clearing network, lenders often process these payments through the ACH network. They are able to use the consumer account number and routing number on a check to initiate an ACH transaction. When lenders use the ACH network in a first attempt to collect payment, the lender has used the check as a source document and the payment is considered an electronic fund transfer under EFTA and Regulation E,[303] which generally provide additional consumer protections—such as error resolution rights—beyond those applicable to checks. However, if a transaction is initially processed through the check system and then processed through the ACH network because the first attempt failed for insufficient funds, the subsequent ACH attempt is *not* considered an electronic fund transfer under current Regulation E.[304] Similarly, consumers may provide their account and routing number to lenders for the purposes of an ACH payment, but the lender may use that information to initiate a remotely created check that is processed through the check system and thus may not receive Regulation E protections.[305]

Payment System Regulation and Private Network Requirements

Different payment mechanisms are subject to different laws and, in some cases, private network rules that affect how lenders can exercise their rights to initiate withdrawals from consumers' accounts and how consumers may attempt to limit or stop certain withdrawal activity after granting an initial authorization. Because ACH payments and post-dated checks are the most common authorization mechanisms used by payday and payday installment lenders, this section briefly outlines applicable Federal laws and National Automated Clearinghouse Association (NACHA) rules concerning stop-payment rights, prohibitions on unauthorized payments, notices where payment amounts vary, and rules governing failed withdrawal attempts.

NACHA recently adopted several changes to the ACH network rules in response to complaints about problematic behavior by payday and payday installment lenders, including a rule that allows it to more closely scrutinize originators who have a high rate of returned payments.[306] Issues around monitoring and enforcing those rules and their application to problems in the market for covered loans are discussed in more detail in Market Concerns—Payments. But it should be noted here at the outset that the NACHA rules only apply to payment attempts through ACH and are not enforceable by the Bureau.

Stop-payment rights. For preauthorized (recurring) electronic fund transfers,[307] EFTA grants consumers a right to stop paym ent by issuing a stop-payment order through their depository institution.[308] The

[299] *See generally* CFPB Online Payday Loan Payments.

[300] The Bureau reviewed publicly available litigation documents and fee schedules posted online by originating depository institutions to compile these estimates. However, because of the limited availability of private contracts and variability of commercial bank fees, these estimates are tentative. Originators typically also pay their commercial bank or payment processor fees for returned ACH and check payments. These fees appear to range widely, from 5 cents to several dollars.

[301] UCC section 4–401(c) (''A bank may charge against the account of a customer a check that is otherwise properly payable from the account, even though payment was made before the date of the check, unless the customer has given notice to the bank of the postdating describing the check with reasonable certainty.'').

[302] *See, e.g.,* Press Release, Clarity Servs., Inc., ''ACH Presentment Will Help Lenders Reduce Failed ACH Pulls'' (Aug. 1, 2013), *available at https://www.clarityservices.com/clear-warning-ach-presentment-will-help-lenders-reduce-failed-ach-pulls/;* FactorTrust, ''Service Offerings,'' *http://ws.factortrust.com/products/* (last visited May 4, 2016); Microbilt, ''Bank Account Verify,'' *http://www.microbilt.com/bank-account-verification.aspx* (last visited May 4, 2016); DataX, ''Credit Risk Mitigation,'' *http://www.dataxltd.com/ancillary-services/successful-collections/* (last visited May 4, 2016).

[303] 12 CFR 1005.3(b)(2)(i) (''This part applies where a check, draft, or similar paper instrument is used as a source of information to initiate a one-time electronic fund transfer from a consumer's account. The consumer must authorize the transfer.'').

[304] Supplement I, Official Staff Interpretations, 12 CFR part 1005, comment 3(c)(1) (''The electronic re-presentment of a returned check is not covered by Regulation E because the transaction originated by check.'').

[305] Remotely created checks are particularly risky for consumers because they have been considered to fall outside of protections for electronic fund transfers under Regulation E. Also, unlike signature paper checks, they are created by the entity seeking payment (in this case, the lender)—making such payments particularly difficult to track and reverse in cases of error or fraud. Due to concerns about remotely created checks and remotely created payment orders, the FTC recently banned the use of these payment methods by telemarketers. *See* FTC Final Amendments to Telemarketing Sales Rule, 80 FR 77520 (Dec. 14, 2015).

[306] *See* NACHA, ''ACH Network Risk and Enforcement Topics,'' *https://www.nacha.org/rules/ach-network-risk-and-enforcement-topics* (last visited Sept. 23, 2017) (providing an overview of changes to the NACHA Rules); NACHA, ''ACH Operations Bulletin #1–2014: Questionable ACH Debit Origination: Roles and Responsibilities of ODFIs and RDFIs'' (Sept. 30, 2014), *available at https://www.nacha.org/news/ach-operations-bulletin-1-2014-questionable-ach-debit-origination-roles-and-responsibilities* (''During 2013, the ACH Network and its financial institution participants came under scrutiny as a result of the origination practices of certain businesses, such as online payday lenders, in using the ACH Network to debit consumers' accounts.'').

[307] A preauthorized transfer is ''an electronic fund transfer authorized in advance to recur at substantially regular intervals. EFTA, 15 U.S.C. 1693a(10); Regulation E, 12 CFR 1005.2(k).

[308] ''A consumer may stop payment of a preauthorized electronic fund transfer by notifying the financial institution orally or in writing at any time up to three business days preceding the

Continued

NACHA private rules adopt this EFTA provision along with additional stop-payment rights. In contrast to EFTA, NACHA provides consumers with a stop-payment right for both one-time and preauthorized transfers.[309] Specifically, for recurring transfers, NACHA Rules require financial institutions to honor a stop-payment order as long as the consumer notifies the bank at least 3 banking days before the scheduled debit.[310] For one-time transfers, NACHA Rules require financial institutions to honor the stop-payment order as long as the notification provides them with a ''reasonable opportunity to act upon the order.'' [311] Consumers may notify the bank or credit union verbally or in writing, but if the consumer does not provide written confirmation the oral stop-payment order may not be binding beyond 14 days. If a consumer wishes to stop all future payments from an originator, NACHA Rules allow a bank or credit union to require the consumer to confirm in writing that she has revoked authorization from the originator.

Checks are also subject to a stop-payment right under the Uniform Commercial Code (UCC).[312] Consumers have a right to stop payment on any check by providing the bank with oral (valid for 14 days) or written (valid for 6 months) notice. To be effective, the stop-payment notice must describe the check ''with reasonable certainty'' and give the bank enough information to find the check under the technology then existing.[313] The stop-payment notice also must be given at a time that affords the bank a reasonable opportunity to act on it before the bank becomes liable for the check under U.C.C. 4–303.

Although EFTA, the UCC, and NACHA Rules provide consumers with stop-payment rights, financial institutions typically charge a fee of approximately $32 for consumers to exercise those rights.[314] Further, both lenders and financial institutions often impose a variety of requirements that make the process for stopping payments confusing and burdensome for consumers. See the discussion of these requirements in Market Concerns—Payments.

Protection from unauthorized payments. Regulation E and NACHA Rules both provide protections with respect to payments by a consumer's financial institution if the electronic transfer is unauthorized.[315] Payments originally authorized by the consumer can become unauthorized under EFTA if the consumer notifies his or her financial institution that the originator's authorization has been revoked.[316] NACHA has a specific threshold for unauthorized returns, which involve transactions that originally collected funds from a consumer's account but that the consumer is disputing as unauthorized. Under NACHA Rules, originators are required to operate with an unauthorized return rate below 0.5 percent or they risk fines and loss of access to the ACH network.[317]

Notice of variable amounts. Regulation E and the NACHA Rules both provide that if the debit amount for a preauthorized transfer changes from the previous transfer or from the preauthorized amount, consumers must receive a notice 10 calendar days prior to the debit.[318] However, both of these rules have an exception from this requirement if consumers have agreed to a range of debit amounts and the payment does not fall outside that range.[319]

Based on outreach and market research, the Bureau does not believe that most payday and payday installment lenders making loans that will be covered under the rule are providing a notice of transfers varying in amount. However, the Bureau is aware that many of these lenders take authorizations for a range of amounts. As a result, lenders use these broad authorizations rather than fall under the Regulation E requirement to send a notice of transfers varying in amount even when collecting for an irregular amount (for example, by adding fees or a past due amount to a regularly scheduled payment). Some of these contracts provide that the consumer is authorizing the lender to initiate payment for any amount up to the full amount due on the loan.[320]

Reinitiation Cap. After a payment attempt has failed, NACHA Rules allow an originator—in this case, the lender that is trying to collect payment—to attempt to collect that same payment no more than two additional times through the ACH network.[321] NACHA Rules also require the ACH files [322] for the two additional attempts to be labeled as ''reinitiated'' transactions. Because the rule applies on a per-payment basis, for lenders with recurring payment

scheduled date of such transfer.'' EFTA, 15 U.S.C. 1693e(a); Regulation E, 12 CFR 1005.10(c).

[309] *See* NACHA Rule 3.7.1.2, RDFI Obligation to Stop Payment of Single Entries (''An RDFI must honor a stop-payment order provided by a Receiver, either verbally or in writing, to the RDFI at such time and in such manner as to allow the RDFI a reasonable opportunity to act upon the order prior to acting on an ARC, BOC, POP, or RCK Entry, or a Single Entry IAT, PPD, TEL, or WEB Entry to a Consumer Account.'').

[321] NACHA Rule 2.12.4.

[322] ACH transactions are transferred in a standardized electronic file format between financial institutions and ACH network operators. These files contain information about the payment itself along with routing information for the applicable consumer account, originator (or in this case, the lender) account, and financial institution.

authorizations, the count resets to zero when the next scheduled payment comes due.

III. Summary of the Rulemaking Process

As described in more detail below, the Bureau has conducted broad outreach with a multitude of stakeholders on a consistent basis over more than five years to learn more about the market for small-dollar loans of various kinds. This outreach has comprised many public events, including field hearings, and hundreds of meetings with both consumer and industry stakeholders on the issues raised by small-dollar lending. In addition to meeting with lenders and other market participants, trade associations, consumer groups, community groups, and others, the Bureau has engaged with individual faith leaders and coalitions of faith leaders from around the country to gain their perspective on how these loans affect their communities and the people they serve. And the Bureau has met frequently with Federal, State, and Tribal officials to consult and share information about these kinds of loans and their consequences for consumers.

The Bureau's understanding of these loans, and how they affect consumers, has also been furthered by its ongoing supervisory activity, which involves exercising its legally mandated authority to conduct formal examinations of companies who make such loans and of debt collectors who collect on such loans. These examinations have canvassed the operations, marketing, underwriting, collections, and compliance management systems at such lenders and continue to do so on an ongoing basis. In addition, the Bureau has investigated and taken enforcement actions against a number of small-dollar lenders, which has provided further insight into various aspects of their operations and the practical effects of their business models on consumers.

The Bureau has also undertaken extensive research and analysis over several years to develop the factual foundation for issuance of this final rule. That research and analysis has included multiple white papers and data points on millions of such loans,[323] as well as careful review of studies and reports prepared by others and the relevant academic literature.[324] The Bureau has analyzed its own data on consumer complaints about the issues raised by small-dollar loans and the collections efforts made by lenders and debt collectors on such loans. And the Bureau has consistently engaged in market monitoring activities to gain insights into developing trends in the market for small-dollar loans.

All of the input and feedback the Bureau has received from its outreach over the years, its extensive experience of examining and investigating small-dollar lenders, and its research and analysis of the marketplace, have assisted the Bureau in developing and issuing this final rule. The material presented in this section summarizes the Bureau's work relating to the rule in three categories:

- The Bureau's background and processes in developing the rule;
- the key elements of the notice of proposed rulemaking; and
- the receipt and consideration of feedback prior to finalizing the rule.

A. Bureau Outreach to Stakeholders

Birmingham Field Hearing. The Bureau's formal outreach efforts on this subject began in January 2012, when it held its first public field hearing in Birmingham, Alabama, focused on small-dollar lending. At the field hearing, the Bureau heard testimony and received input from consumers, civil rights groups, consumer advocates, religious leaders, industry and trade association representatives, academics, and elected representatives and other governmental officials about consumers' experiences with small-dollar loan products. At the same time, the Bureau announced the launch of its program to conduct supervisory examinations of payday lenders pursuant to the Bureau's authority under section 1024 of the Dodd-Frank Act. As part of this initiative, the Bureau put in place a process to obtain loan-level records from a number of large payday lenders to assist in analyzing the nature and effects of such loans.

The Bureau transcribed the field hearing and posted the transcript on its Web site.[325] Concurrently, the Bureau placed a notice in the **Federal Register** inviting public comment on the issues discussed in the field hearing. The Bureau received 664 public comments in response to that request, which were reviewed and analyzed.

Nashville Field Hearing. In March 2014, the Bureau held a field hearing in Nashville, Tennessee to gather further input from a broad range of stakeholders.[326] The Bureau heard testimony from consumer groups, industry representatives, academics, and members of the public, including consumers of payday loans. The field hearing was held in conjunction with issuing the second of two research reports on findings by Bureau staff using the supervisory data that it had collected from a number of large payday lenders. In the Director's opening remarks, he noted three concerns associated with covered loans that had been identified in recent Bureau research: That a significant population of consumers were ending up in extended loan sequences; that some lenders use the electronic payments system in ways that pose risks to consumers; and that a troubling number of companies engage in collection activities that may be unfair or deceptive in one or more ways. While the Bureau was working on these reports and in the period following their release, the Bureau held numerous meetings with stakeholders on small-dollar lending in general and to hear their views on potential policy approaches.

Richmond Field Hearing. In March 2015, the Bureau held another field hearing in Richmond, Virginia to gather further input from a broad range of stakeholders.[327] The focus of this field hearing was the announcement the Bureau simultaneously made of the rulemaking proposals it had under consideration that would require lenders to take steps to make sure consumers can repay their loans and would restrict certain methods of collecting payments from consumers' bank accounts in ways that lead to substantial penalty fees. The Bureau heard testimony from consumer groups, industry representatives, faith leaders, and members of the public, including consumers of payday loans. In addition to the field hearing, the Bureau held separate roundtable discussions with consumer advocates and with industry

members and trade associations to hear feedback on the rulemaking proposals under consideration.

A summary of the rulemaking proposals under consideration was released at the time of the Richmond field hearing. This marked the first stage in the process the Bureau is required to follow under the Small Business Regulatory Enforcement and Fairness Act (SBREFA),[328] which is discussed in more detail below. The summary was formally known as the Small Business Review Panel Outline. In addition to the discussions that occurred at the time of the Richmond field hearing, the Bureau has met on a number of other occasions with industry members and trade associations, including those representing storefront payday lenders, to discuss their feedback on the issues presented in the Outline.

Omaha Meeting and Other Events. At the Bureau's Consumer Advisory Board (CAB) meeting in June 2015 in Omaha, Nebraska, a number of meetings and field events were held about payday, vehicle title, and similar loans. The CAB advises and consults with the Bureau in the exercise of its functions under the Federal consumer financial laws, and provides information on emerging practices in the consumer financial products and services industry, including regional trends, concerns, and other relevant information. The CAB members over several years have included, among others, a payday lending executive and consumer advocates on payday lending. The Omaha events included a visit to a payday loan store to learn more about its operations first-hand and a day-long public session that focused on the Bureau's proposals in the Small Business Review Panel Outline and trends in payday and vehicle title lending. The CAB also held six subcommittee discussions on the Outline in the spring and summer of 2015, and three more subcommittee discussions on the proposed rule in the summer of 2016.

Kansas City Field Hearing. In June 2016, the Bureau held a field hearing in Kansas City, Missouri to gather further input on the issues surrounding potential new Federal regulations of small-dollar lending.[329] The focus of this field hearing was the announcement that the Bureau simultaneously made of the release of its notice of proposed rulemaking on payday, vehicle title, and certain high-cost installment loans. The proposed rule would require lenders to take steps to make a reasonable determination that consumers can afford to repay their loans and would restrict certain methods of collecting payments from consumers' bank accounts in ways that can lead to substantial penalty fees. The Bureau heard testimony on the proposed rule from consumer groups, industry representatives, and members of the public, including consumers of payday loans.

The release of the notice of proposed rulemaking commenced the formal notice-and-comment process under the Administrative Procedure Act. In the notice of proposed rulemaking, the Bureau stated that comments on the proposed rule would have to be received on or before October 7, 2016 to be considered by the Bureau. The notice of proposed rulemaking further specified the details of the methods by which comments would be received, which included email, electronic, mail, and hand delivery/courier. The Bureau also noted that all comments submitted would become part of the public record and would be subject to public disclosure.

Little Rock Meeting and Other Events. In June 2016, just a week after the field hearing in Kansas City announcing the public release of the proposed rule, the CAB held another public meeting on this topic in Little Rock, Arkansas. Among other things, Bureau officials gave a public briefing on the proposed rule to the CAB members, and the Bureau heard testimony from the general public on the subject.

Two of the Bureau's other advisory bodies have also provided input and feedback on the Bureau's work to develop appropriate provisions to regulate small-dollar loans. The Community Bank Advisory Council (CBAC) held two subcommittee discussions of the proposals contained in the Small Business Review Panel Outline in March 2015 and November 2015, a Council discussion on the proposed rule in July 2016, and two more subcommittee discussions of the proposed rule in the summer of 2016. In addition, the Bureau's Credit Union Advisory Council (CUAC) held two subcommittee discussions of the proposals in April 2015 and October 2015, discussed the Outline in its full meeting in March 2016, and held two subcommittee discussions of the proposed rule during the summer of 2016.

Faith Leaders. The Bureau has taken part in a large number of meetings with faith leaders, and coalitions of faith leaders, of all denominations to hear their perspective on how small-dollar loans affect their communities and the people they serve. In April 2016, the White House convened a meeting of national faith leaders for this purpose, which included the Bureau's director. The Bureau has also engaged in outreach to local and national leaders from churches, synagogues, mosques, and temples—both in Washington, DC and in many locations around the country. In these sessions, the Bureau has heard from faith leaders about the challenges some of them have faced in seeking to develop alternatives to payday loans that would mitigate what they perceive to be the harms caused to consumers.

General Outreach. Various Bureau leaders, including its director, and Bureau staff have participated in and spoken at dozens of events and conferences throughout the country, which have provided further opportunities to gather insight and recommendations from both industry and consumer groups about how to approach the issue of whether and how to regulate small-dollar loans. In addition to gathering information from meetings with lenders and trade associations and through regular supervisory and enforcement activities, Bureau staff made fact-finding visits to at least 12 non-depository payday and vehicle title lenders.

Inter-Agency Consultation. As discussed in connection with section 1022 of the Dodd-Frank Act below, the Bureau has consulted with other Federal consumer protection and prudential regulators about these issues and the approaches that the other regulators have taken to small-dollar lending over the years. The Bureau has provided other regulators with information about the proposals under consideration, sought their input, and received feedback that has assisted the Bureau in preparing this final rule. In addition, the Bureau was involved, along with its fellow Federal regulatory agencies, in meetings and other efforts to assist the U.S. Department of Defense as it developed and adopted regulations to implement updates to the Military Lending Act. That statute governs small-dollar loans in addition to various other loan products, and the Bureau developed insights from this work that have been germane to this rulemaking, especially in how to address the potential for lenders to find ways to evade or circumvent its provisions.

Consultation with State and Local Officials. The Bureau's outreach also has included a large number of meetings

[328] Public Law 104–1.21, 110 Stat. 847 (1996).

[329] Bureau of Consumer Fin. Prot., ''Field Hearing on Small Dollar Lending in Kansas City, MO,'' Archive of Past Events (June 2, 2016), *available at https://www.consumerfinance.gov/about-us/events/archive-past-events/field-hearing-small-dollar-lending-kansas-city-mo/.*

and calls with State Attorneys General, State financial regulators, and municipal governments, along with the organizations representing the officials charged with enforcing applicable Federal, State, and local laws on small-dollar loans. These discussions have occurred with officials from States that effectively disallow such loans by imposing strict usury caps, as well as with officials from States that allow such loans and regulate them through various frameworks with different substantive approaches. The issues discussed have involved both storefront and online loans. In particular, as the Bureau has worked to develop the proposed registered information system requirements, it has consulted with State agencies from those States that require lenders to provide information about certain small-dollar loans to statewide databases. A group of State Attorneys General submitted a comment claiming that the extent to which the Bureau consulted State and local officials was insufficient. Some other State officials submitted similar comments. Although it is true that the Bureau did not meet with every attorney general or interested official from every State to discuss issues involving the regulation of small-dollar loans, it did meet with many of them, some on multiple occasions. In addition, the Bureau did receive public comments from groups of State Attorneys General and other officials, including both regulators and legislators, and has carefully considered the issues they discussed, which presented many conflicting points of view.

Several State Attorneys General requested that the Bureau commit to consulting with State officials before enforcing this regulation. The Bureau will coordinate and consult with State regulators and enforcement officials in the same manner that it does in other enforcement and supervisory matters.

Tribal Consultations. The Bureau has engaged in consultation with Indian tribes about this rulemaking. The Bureau's Policy for Consultation with Tribal Governments provides that the Bureau ''is committed to regular and meaningful consultation and collaboration with tribal officials, leading to meaningful dialogue with Indian tribes on Bureau policies that would be expressly directed to tribal governments or tribal members or that would have direct implications for Indian tribes.'' [330] To date, the Bureau has held three formal consultation sessions related to this rulemaking. The first was held on October 27, 2014, at the National Congress of American Indians 71st Annual Convention and Marketplace in Atlanta, Georgia and before the release of the Bureau's small-dollar lending SBREFA materials. The timing of the consultation gave Tribal leaders an opportunity to speak directly with the small-dollar lending team about Tribal lender and/or consumer experiences prior to the drafting of proposals that would become the Small Business Review Panel Outline. A second consultation was held on June 15, 2015, at the Bureau's headquarters. At that consultation, Tribal leaders responded to the proposals under consideration set forth in the Outline that had recently been released. A third consultation was held on August 17, 2016, at the Sandra Day O'Connor College of Law in Phoenix, Arizona, after the release of the proposed rule. All Federally recognized Indian tribes were invited to attend these consultations, which generated frank and valuable input from Tribal leaders to Bureau senior leadership and staff about the effects such a rulemaking could have on Tribal nations and lenders. In addition, the Bureau has met individually with Tribal leaders, Tribal lenders, and Tribal lending associations in an effort to further inform its small-dollar lending work. A Tribal trade association dealing with financial services issues informed the Bureau that it believed these consultations were inadequate.

B. Supervisory and Enforcement Activity

In addition to these many channels of outreach, the Bureau has developed a broader understanding of small-dollar lending through its supervisory and enforcement work. This work is part of the foundation of the Bureau's expertise and experience with this market, which is informed by frequent contact with certain small-dollar lenders and the opportunity to scrutinize their operations and practices up close through supervisory examinations and enforcement investigations. Some illustrative details of this work are related below.

The Bureau's Supervisory Work. The Bureau has been performing supervisory examinations of small-dollar lenders for more than five years. During this time, the Bureau has written and published its guidelines on performing such examinations, which its exam teams have applied and refined further over time.[331] All of this work has provided the Bureau with a quite comprehensive vantage point on the operations of payday and other small-dollar lenders and the nature and effects of their loan products for consumers.

In its regular published reports known as *Supervisory Highlights,* the Bureau has summarized, while maintaining confidentiality of supervised entities, the types of issues and concerns that arise in its examinations of non-bank financial companies in general, and of small-dollar lenders in particular. In its Summer 2013 edition, for example, the Bureau emphasized its general finding that ''nonbanks are more likely to lack a robust [Compliance Management System] as their consumer compliance-related activities have not been subject to examinations at the federal level for compliance with the Federal consumer financial laws prior to the Bureau's existence.'' [332] The Bureau noted that it had identified ''one or more instances of nonbanks that lack formal policies and procedures, have not developed a consumer compliance program, or do not conduct independent consumer compliance audits. Lack of an effective CMS has, in a number of instances, resulted in violations of Federal consumer financial laws.'' [333]

In the Spring 2014 edition, the Bureau addressed its supervisory approach to short-term, small-dollar lending in more detail. At that time, the Bureau noted that its exercise of supervisory authority marked the first time any of these lenders had been subject to Federal compliance examinations. The Bureau described a number of shortcomings it had found and addressed with the compliance management systems implemented by small-dollar lenders, including lack of oversight, inadequate complaint management, lack of written policies and procedures, failure to train staff adequately, lack of effective compliance audit programs, and more generally a pervasive lack of accountability within the compliance program. It also catalogued many different violations and abuses in the collection methods these lenders used with their customers. Finally, the report noted that Bureau examinations found

deceptive practices in the use of preauthorized ACH withdrawals from borrower checking accounts.[334]

The Summer 2016 edition included a discussion of debt collection issues, which are relevant to many payday lenders, and also included a section explicitly dedicated to small-dollar lending and issues associated with compliance with the Electronic Fund Transfer Act. The Bureau's examiners found that the ''loan agreements of one or more entities failed to set out an acceptable range of amounts to be debited, in lieu of providing individual notice of transfers of varying amounts. These ranges could not be anticipated by the consumer because they contained ambiguous or undefined terms in their descriptions of the upper and lower limits of the range.'' [335] And the Spring 2017 edition expressed concerns about production incentives relevant to many providers of financial services, noting that ''many supervised entities choose to implement incentive programs to achieve business objectives. These production incentives can lead to significant consumer harm if not properly managed.'' [336]

In the most recent Summer 2017 edition, the Bureau again described problems that it had addressed with short-term, small-dollar lending, including payday and vehicle title loans. Among them were a variety of collections issues, along with misrepresentations that several lenders had made in the marketing of such loans. Examiners reported that lenders had promised consumers that they could obtain such a loan without a credit check, yet this turned out to be untrue and, in some instances, to lead to loan denials based on the information obtained from the consumers' credit reports. They also found that certain lenders advertised products and services in their outdoor signage that they did not, in fact, offer. And some lenders advertised their products by making unsubstantiated claims about how they compared with those of competing lenders. These practices were found to be deceptive and changes were ordered to be made.[337]

The Bureau further found that some lenders misrepresented their processes to apply for a loan online, and others misused references provided by loan applicants on applications for origination purposes by marketing products to the persons listed. Finally, examiners observed that one or more lenders mishandled the payment process by debiting accounts automatically for payments that had already been made, leading to unauthorized charges and overpayments. The entities also failed to implement adequate processes to accurately and promptly identify and refund borrowers who paid more than they owed, who were unable to avoid the injury.[338]

The Bureau's Enforcement Work. The Bureau also has developed expertise and experience in this market over time by pursuing public enforcement actions against more than 20 small-dollar lenders, including brick-and-mortar storefront lenders, online lenders, and vehicle title lenders (as well as pawn lenders, which are not covered under the rule). A number of these actions have been resolved, but some remain pending in the courts at this time. In every instance, however, before the enforcement action was brought, it was preceded by a thorough investigation of the underlying facts in order to determine whether legal violations had occurred. The issues raised in these actions include engaging in misleading and deceptive marketing practices, making improper disclosures, training employees to hide or obfuscate fees, pushing customers into a cycle of debt by pressuring them to take out additional loans they could not afford, making false statements about whether and how transactions can be canceled or reversed, taking unauthorized and improper electronic withdrawals from customer accounts, and engaging in collections efforts that generate wide-ranging problems.[339] The Bureau has determined many of these practices to be violations of the prohibition against unfair, deceptive, or abusive acts or practices. The information and insights that the Bureau has gleaned from these investigations and enforcement actions has further advanced its understanding of this market and of the factual foundations for the policy interventions contained in this final rule.

For example, in 2013 the Bureau resolved a public enforcement action against Cash America, Inc. that arose out of an examination of this large national payday lender. The Bureau cited Cash America for committing three distinct unfair and deceptive practices: Robo-signing court documents in debt collection lawsuits; violating the Military Lending Act by overcharging servicemembers and their families; and improperly destroying records in advance of the Bureau's examination. Cash America was ordered to pay $14 million in refunds to consumers and to pay a civil penalty of $5 million for these violations.[340]

In 2014, the Bureau filed a public enforcement action against Ace Cash Express that developed out of the Bureau's prior exam work. The Bureau found through its examination and subsequent investigation that ACE had engaged in unfair, deceptive, and abusive practices by using illegal debt collection tactics to pressure overdue borrowers into taking out additional loans they could not afford. In fact, ACE's own training manual for its employees had a graphic illustrating this cycle of debt. According to the graphic, consumers begin by applying to ACE for a loan, which ACE approved.

Next, if the consumer ''exhausts the cash and does not have the ability to pay,'' ACE ''contacts the customer for payment or offers the option to refinance or extend the loan.'' Then, when the consumer ''does not make a payment and the account enters collections,'' the cycle starts all over again—with the formerly overdue borrower applying for another payday loan.[341]

The Bureau's examination of ACE was conducted in coordination with the Texas Office of Consumer Credit Commissioner and resulted in an order imposing $5 million in consumer refunds and a $5 million civil penalty. The enforcement action was partially based on ACE's creation of a false sense of urgency to get delinquent borrowers to take out more payday loans—all while charging new fees each time.[342]

In September 2015, the Bureau took action against Westlake Services, an indirect auto finance company, and Wilshire Consumer Credit, its auto title lending subsidiary, which offered auto title loans directly to consumers, largely via the Internet, and serviced those loans; Wilshire also purchased and serviced auto title loans made by others. The Bureau concluded that Westlake and Wilshire had committed unfair and deceptive acts or practices by pressuring borrowers through the use of illegal debt collection tactics. The tactics included illegally deceiving consumers by using phony caller ID information (sometimes masquerading as pizza delivery services or flower shops), falsely threatening to refer borrowers for investigation or criminal prosecution, calling under false pretenses, and improperly disclosing information about debts to borrowers' employers, friends, and family. Wilshire also gave consumers incomplete information about the true cost of the loans it offered. The consent order resolving the matter required the companies to overhaul their debt collection practices and to cease advertising or marketing their products untruthfully. The companies were also ordered to provide consumers with $44.1 million in cash relief and balance reductions, and to pay a civil penalty of $4.25 million.

In December 2015, the Bureau resolved another enforcement action with EZCORP, Inc., a short-term, small-dollar lender. The action was initially generated from a supervisory exam that had exposed significant and illegal debt collection practices. These included in-person collection visits at consumers' homes or workplaces (which risked disclosing the consumer's debt to unauthorized third parties), falsely threatening consumers with litigation for not paying their debts, misrepresenting consumers' rights, and unfairly making multiple electronic withdrawal attempts from consumer accounts that caused mounting bank fees. These practices were found to be unfair and deceptive and to violate the Electronic Fund Transfer Act; as a result, the Bureau ordered EZCORP to refund $7.5 million to 93,000 consumers and pay a $3 million civil penalty, while halting collection of remaining payday and installment loan debts associated with roughly 130,000 consumers. That action also prompted the Bureau to issue an industry-wide warning about potentially unlawful conduct during in-person collections at homes or workplaces.[343]

In September 2016, the Bureau took action against TitleMax's parent company TMX Finance, one of the country's largest auto title lenders, for luring consumers into costly loan renewals by presenting them with misleading information about the terms and costs of the deals. The Bureau's investigation found that store employees, as part of their sales pitch for the 30-day loans, offered consumers a ''monthly option'' for making loan payments using a written guide that did not explain the true cost of the loan if the consumer renewed it multiple times, though TMX personnel were well aware of these true costs. In fact, the guide and sales pitch distracted consumers from the fact that repeatedly renewing the loan, as encouraged by TMX Finance employees, would dramatically increase the loan's cost, while making it difficult, if not impossible, for a consumer to compare costs for renewing the loan over a given period. The company then followed up with those who failed to repay by making intrusive visits to homes and workplaces that put consumers' personal information at risk. TMX Finance was ordered to stop its unlawful practices and pay a $9 million penalty.[344]

Likewise, in December 2016 the Bureau filed a public enforcement action against Moneytree, which offers payday loans and check-cashing services, for misleading consumers with deceptive online advertisements and collections letters. The company was ordered to cease its illegal conduct, refund $255,000 to consumers, and pay a civil penalty of $250,000. In addition to the deceptive advertising, the company was found to have deceptively told consumers that their vehicles could be repossessed when it had no right or ability to do so, and to have improperly withdrawn money from consumers' accounts without authorization to do so.[345]

From the Bureau's experience of carrying out investigations of these kinds of illegal practices and halting them through its enforcement efforts, the Bureau has become much more aware of the nature and likelihood of unfair, deceptive, or abusive practices in this market. And though the Bureau generally has devoted less attention in its supervisory and enforcement programs to issues that it has long intended to address separately, as here, through its rulemaking authority, the Bureau nonetheless has gained valuable experience and expertise from all of this work that it now brings to this rulemaking process. Since the inception of its supervision and enforcement program, the Bureau has worked continually to maximize compliance with the Federal consumer financial laws as they apply to payday and other types of small-dollar lenders. Sustained attention to compliance through the Bureau's supervision and enforcement work is an important adjunct to this rulemaking, but is not a sufficient substitute for it.

C. Research and Analysis of Small-Dollar Loans

Bureau White Papers. In April 2013, the Bureau issued a white paper on payday loans and deposit advance products, including findings by Bureau staff. For each of these loan products,

the Bureau examined loan characteristics, borrower characteristics, intensity of use, and sustained use of the product. These findings were based largely on the data the Bureau had collected from some of the larger payday lenders under its supervisory authority, and covered approximately 15 million loans generated in 33 States and on approximately 15,000 deposit advance product transactions. The report took a snapshot of borrowers at the beginning of the study period and traced their usage of these products over the course of the study period. The report demonstrated that though some consumers use payday loans and deposit advances at relatively low to moderate levels, a sizable share of users conduct transactions on a long-term basis, suggesting they are unable to fully repay the loan and pay other expenses without taking out a new loan shortly thereafter.[346]

In March 2014, the Bureau issued another white paper on payday lending. This report was based on the supervisory data the Bureau had received from larger payday lenders, truncated somewhat to cover 12-month windows into borrowing patterns. These limitations yielded a dataset of over 12 million loans in 30 States. Responding to criticisms of the Bureau's white paper, this report focused on ''fresh borrowers,'' *i.e.,* those who did not have a payday loan in the first month of the Bureau's data and whose usage began in the second month. After reviewing this data, the report yielded several key findings. First, of the loans taken out by these borrowers over a period of eleven months over 80 percent are rolled over or followed by another loan within 14 days. Half of all loans are made as part of a sequence that is at least ten loans long, and few borrowers amortize, meaning their principal amounts are not reduced between the first and last loan of a sequence. Monthly borrowers (the majority of whom are receiving government benefits) are disproportionately likely to stay in debt for eleven months or longer. And most borrowing involves multiple renewals following an initial loan, rather than multiple distinct borrowing episodes separated by more than fourteen days.[347]

Both before and after the release of these white papers, the Bureau held numerous meetings with stakeholders to obtain their perspectives and comments on the methodology and contents of this research. As is also noted below, the Bureau also hosted individual scholars in the field for research presentations

Additional Research Reports. In April and May of 2016, the Bureau published two additional research reports on small-dollar loans. In conducting this research, the Bureau used not only the data obtained from the supervisory examinations previously described but also data obtained through orders the Bureau had issued pursuant to section 1022(c)(4) of the Dodd-Frank Act, data obtained through civil investigative demands made by the Bureau pursuant to section 1052 of the Dodd-Frank Act, and data voluntarily supplied to the Bureau by several lenders.

The first report addressed how online payday and payday installment lenders use access to consumers' bank accounts to collect loan payments. It found that after a failed ACH payment request made by an online lender, subsequent payment requests to the same account are unlikely to succeed, though lenders often continue to present them, with many online lenders submitting multiple payment requests on the same day. The resulting harm to consumers is shown by the fact that accounts of borrowers who use loans from online lenders and experience a payment that is returned for insufficient funds are more likely to be closed by the end of the sample period than accounts experiencing a returned payment for products other than payday or payday installment loans.[348]

The other report addressed consumer usage and default patterns on short-term vehicle title loans. Similar to payday loans, the report determined that single-payment vehicle title lenders rely on borrowers who take out repeated loans, with borrowers stuck in debt for seven months or more supplying two-thirds of the title loan business. In over half the instances where the borrower takes out such a loan, they end up taking out four or more consecutive loans, which becomes an unaffordable, long-term debt load for borrowers who are already struggling with their financial situations. In addition to high rates of default, the Bureau found that these loans carried a further adverse consequence for many consumers, as one out of every five loan sequences ends up with the borrower having their vehicle seized by the lender in repossession for failure to repay.[349]

In June 2016, the Bureau issued a supplemental report on payday, payday installment, vehicle title loan, and deposit advance products that addressed a wide range of subjects pertinent to the proposed rule. The report studied consumers' usage and default patterns for title and payday installment loans; analyzed whether deposit advance consumers overdrew accounts or took out payday loans more frequently after banks stopped offering deposit advance products; examined the impact of State laws on payday lending; compared payday re-borrowing rates across States with different renewal and cooling-off period laws; provided findings on payday borrowing and default patterns, using three different loan sequence definitions; and simulated effects of certain lending and collection restrictions on payday and vehicle title loan markets.[350]

Consumer Complaint Information. The Bureau also has conducted analysis on its own consumer complaint information. Specifically, the Bureau had received, as of April 1, 2017, approximately 51,000 consumer complaints relating to payday and other small-dollar loan products. Of these complaints, about one-third were submitted by consumers as payday or other small-dollar loan complaints and two-thirds as debt collection complaints where the source of the debt was a payday loan.[351]

Industry representatives have frequently expressed the view that consumers seem to be satisfied with payday and other covered short-term loan products, as shown by low numbers of complaints and the submission of positive stories about them to the ''Tell Your Story'' function on the Bureau's Web site. Yet, the Bureau has observed from its consumer complaint data that from November 2013 through December 2016, approximately 31,000 debt collection complaints cited payday loans as the underlying debt, and over 11 percent of the complaints the Bureau has handled about debt collection stemmed directly from payday loans.[352]

In fact, when complaints about payday loans are normalized in comparison to other credit products, the numbers do not turn out to be low at all. For example, in 2016, the Bureau

[346] CFPB Payday Loans and Deposit Advance Products White Paper.

[347] *See* CFPB Data Point: Payday Lending.

[348] *See* CFPB Online Payday Loan Payments.

[349] *See* CFPB Single-Payment Vehicle Title Lending.

[350] *See* CFPB Report on Supplemental Findings.

[351] The Bureau took a phased approach to accepting complaints from consumers. The Bureau began accepting payday loan complaints in November of 2013, and vehicle title loan complaints in July of 2014, which means that the complaint data it has accumulated on these markets does not cover the same periods as the complaint data it has collected, for example, on the mortgage or credit card markets.

[352] Bureau of Consumer Fin. Prot., ''Monthly Complaint Report, Vol. 9,'' at 12 fig. 3 (Mar. 2016), *available at http://files.consumerfinance.gov/f/201603_cfpb_monthly-complaint-report-vol-9.pdf.*

received about 4,400 complaints in which consumers reported ''payday loan'' as the complaint product and about 26,600 complaints about credit cards.[353] Yet there are only about 12 million payday loan borrowers annually, and about 156 million consumers have one or more credit cards.[354] Therefore, by way of comparison, for every 10,000 payday loan borrowers, the Bureau received about 3.7 complaints, while for every 10,000 credit cardholders, the Bureau received about 1.7 complaints. In addition, the substance of some of the consumer complaints about payday loans as catalogued by the Bureau mirrored many of the concerns that constitute the justification for this rule here.[355]

Moreover, faith leaders and faith groups of many denominations from around the country collected and submitted comments indicating that many borrowers may direct their personal complaints or dissatisfactions with their experiences elsewhere than to government officials.

Market Monitoring. The Bureau has also continuously engaged in market monitoring for the small-dollar loan market, just as it does for the other markets within its jurisdiction. This work involves regular outreach to industry members and trade associations, as well as other stakeholders in this marketplace. It also involves constant attention to news, research, trends, and developments in the market for small-dollar loans, including regulatory changes that may be proposed and adopted by the States and localities around the country. The Bureau has also carefully reviewed the published academic literature on small-dollar liquidity loans, along with research conducted or sponsored by stakeholder groups. In addition, a number of outside researchers have presented their own research at seminars for Bureau staff.

D. Small Business Review Panel

Small Business Regulatory Enforcement Fairness Act (SBREFA) Process. In April 2015, in accordance with SBREFA, the Bureau convened a Small Business Review Panel with the Chief Counsel for Advocacy of the SBA and the Administrator of the Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB).[356] As part of this process, the Bureau prepared an outline of the proposals then under consideration and the alternatives considered (the Small Business Review Panel Outline), which it posted on its Web site for review and comment by the general public as well as the small entities participating in the panel process.[357]

Before formally convening, the Panel took part in teleconferences with small groups of the small entity representatives (SERs) to introduce the Outline and get feedback on the Outline, as well as a series of questions about their business operations and other issues. The Panel gathered information from representatives of 27 small entities, including small payday lenders, vehicle title lenders, installment lenders, banks, and credit unions. The meeting participants represented storefront and online lenders, State-licensed lenders, and lenders affiliated with Indian tribes. The Panel held a full-day meeting on April 29, 2015, to discuss the Small Business Review Panel Outline. The 27 small entities also were invited to submit written feedback, and 24 of them did so. The Panel considered input from the small entities about the potential compliance costs and other impacts on those entities and about impacts on access to credit for small businesses and made recommendations about potential options for addressing those costs and impacts. These recommendations are set forth in the Small Business Review Panel Report, which is made part of the administrative record in this rulemaking.[358] The Bureau carefully considered these findings and recommendations in preparing the proposed rule and completing this final rule, as detailed below in the section-by-section analysis of various provisions and in parts VII and VIII. The Bureau also continued its outreach and engagement with stakeholders on all sides since the SBREFA process concluded.

Comments Regarding the Bureau's SBREFA Process. Following the release of the proposed rule, a number of commenters criticized the SBREFA process. Some of these commenters were third parties such as trade associations who were familiar with the SBREFA process. Others were the SERs themselves. Some commenters argued that the Bureau failed to adequately consider the concerns raised and alternatives suggested by the SERs. Some commenters also expressed concerns about the SBREFA procedures.

Some commenters objected that in developing the proposed rule the Bureau did not consider policy suggestions made by SERs or recommendations made by the SBREFA Panel. For example, some commenters argued that the Bureau failed to consider whether, as some SERs contended, disclosures could prevent

[353] Bureau of Consumer Fin. Prot., ''Consumer Response Annual Report, January 1–December 31, 2016,'' at 27, 34 (Mar. 2017), *available at https://www.consumerfinance.gov/documents/3368/201703_cfpb_Consumer-Response-Annual-Report-2016.pdf*.

[354] Bureau staff estimate based on finding that 63 percent of American adults hold an open credit card and Census population estimates. *See* Bureau of Consumer Fin. Prot., ''The Consumer Credit Card Market Report,'' at 36 (Dec. 2015), *available at http://files.consumerfinance.gov/f/201512_cfpb_report-the-consumer-credit-card-market.pdf*; U.S. Census Bureau, ''Annual Estimates of Resident Population for Selected Age Groups by Sex for the United States, States, Counties, and Puerto Rico Commonwealth and Municipios: April 1, 2010 to July 1, 2016,'' (June 2017), *available at https://factfinder.census.gov/bkmk/table/1.0/en/PEP/2016/PEPAGESEX*. Other estimates of the number of credit card holders have been higher, meaning that 1.7 complaints per 10,000 credit card holders would be a high estimate. The U.S. Census Bureau estimated there were 160 million credit card holders in 2012, U.S. Census Bureau, ''Statistical Abstract of the United States: 2012,'' at 740 tbl.1188 (Aug. 2011), *available at https://www.census.gov/library/publications/2011/compendia/statab/131ed.html,* and researchers at the Federal Reserve Bank of Boston estimated that 72.1 percent of U.S. consumers held at least one credit card in 2014, Claire Greene et al., ''The 2014 Survey of Consumer Payment Choice: Summary Results,'' at 18 (Fed. Reserve Bank of Boston, No. 16–3, 2016), *available at https://www.bostonfed.org/-/media/Documents/researchdatareport/pdf/rdr1603.pdf*. As noted above in the text, additional complaints related to both payday loans and credit cards are submitted as debt collection complaints with ''payday loan'' or ''credit card'' listed as the type of debt.

[355] ''Consumer confusion relating to repayment terms was frequently expressed. These consumers complained of the lack of clarity about repayment of the loan using automatic withdrawal features on a bank card, on a prepaid card, or by direct deposit. Consumers with multiple advances stated their difficulty managing a short repayment period and more often rolled-over the loan, resulting in an inflated total cost of the loan.'' Bureau of Consumer Fin. Prot., ''Consumer Response 2016 Annual Report, January 1–December 31, 2016,'' (Mar. 2017), *available at https://www.consumerfinance.gov/documents/3368/201703_cfpb_Consumer-Response-Annual-Report-2016.pdf*.

[356] The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), as amended by section 1100G(a) of the Dodd-Frank Act, requires the Bureau to convene a Small Business Review Panel before proposing a rule that may have a substantial economic impact on a significant number of small entities. See Public Law 104–121, tit. II, 110 Stat. 847, 857 (1996) as amended by Public Law 110–28, sec. 8302 (2007), and Public Law 111–203, sec. 1100G (2010).

Prot., ''Small Business Advisory Review Panel for Potential Rulemakings for Payday, Vehicle Title, And Similar Loans: Outline of Proposals under Consideration and Alternatives Considered,'' (Mar. 26, 2015), *available at http://files.consumerfinance.gov/f/201503_cfpb_outline-of-the-proposals-from-small-business-review-panel.pdf*.

[358] Bureau of Consumer Fin Prot., U.S. Small Bus. Admin., & Office of Mgmt. & Budget, ''Final Report of the Small Business Review Panel on CFPB's Rulemaking on Payday, Vehicle Title, and Similar Loans'' (June 25, 2015), *available at http://files.consumerfinance.gov/f/documents/3a_-_SBREFA_Panel_-_CFPB_Payday_Rulemaking_-_Report.pdf* (hereinafter Small Business Review Panel Report).

the consumer injury the Bureau is seeking to address in this rulemaking. Some commenters also suggested that the Bureau failed to adequately consider alternative approaches employed by various States. Some commenters criticized the Bureau for ignoring the Panel's recommendations in developing the proposal, including, for example, the recommendation that the Bureau consider whether the rule should permit loan sequences of more than three short-term loans. Other SER commenters argued that the Bureau should adopt the requirements imposed by certain States (like Illinois or Michigan or Utah) or should require lenders to offer off-ramps instead of the requirements herein. Some commenters indicated that they believed the Bureau ultimately ignored or underestimated the rule's potential impact on small businesses and inadequately considered the rule's potential impact on rural communities. Some commenters argued that the Bureau did not adequately address issues around the cost of credit to small entities. One commenter noted that some credit unions offer certain short-term loan products and that the Bureau did not consider the impact of the rule on credit union products and small credit unions.

The SBA Office of Advocacy submitted comments of its own on the proposed rule and on how it responded to the SBREFA process. Although Advocacy had no complaints about the procedures used or the input received in the process, it did present its views on whether the proposed rule sufficiently reflected the discussions and debates that had occurred during the Panel discussions and the SBREFA process as a whole. To begin with, Advocacy agreed with the Bureau that the proposed rule would have a significant economic impact on small entities, which it found to be a matter of concern and felt had been underestimated by the Bureau. It stated that the ability-to-repay requirements in the proposed rule would be burdensome, and the cooling-off periods in particular would harm small businesses. It encouraged the Bureau to exempt from the rule small businesses that operate in States that currently have payday lending laws and to mitigate its impact on credit unions, Indian tribes, and small communities. Advocacy also commented that the proposed rule would restrict access to credit for consumers and for certain small businesses, and suggested that an exception be made for situations where such a loan may be necessary to address an emergency.

The procedural objections to the SBREFA process raised by other commenters included concerns about the make-up of the SBREFA panel and whether it was representative of the small entities who would be most affected by the proposal; the timing of SBREFA meetings; the administration and management of SBREFA-related phone calls; the overall ''sufficiency'' of the process; and unheeded requests to convene additional Panel sessions or to conduct additional research on specific topics. One trade group commenter incorporated portions of a comment letter from a SER that was sent to the Bureau during the SBREFA process, which raised a number of procedural objections. Another stated the panel excluded open-end lenders. Some expressed concern that the process did not provide them adequate time to realize the full ramifications of the proposed rule and the effects it would have on their business activity. Others suggested that the process was flawed because the Bureau's analysis allegedly ignored the rule's potential costs. One commenter also suggested that the SBREFA process was tainted by the Bureau Director's public comments regarding small-dollar lending in the years preceding the rulemaking.

Some commenters noted that the SBREFA process had been effective in considering and responding to certain concerns, including input regarding PAL loans and checking customer borrowing history.

Responses to Comments. The Bureau disagrees with commenters arguing that the Bureau did not adequately consider the suggestions of SERs and the Panel. In the proposed rule, the Bureau modified certain aspects of the approach in the Small Business Review Panel Outline in response to feedback from SERs (and others). For example, the Outline included a 60-day cooling-off period after sequences of three short-term loans, but the proposed rule included a 30-day cooling-off period, and that change is retained in the final rule. In addition, the Bureau followed the Panel's recommendation to request comment on numerous specific issues. The feedback received by the Bureau also informed its decision to revise various aspects of the rule. For example, as discussed below, the Bureau revised the ability-to-repay requirements in a number of ways to provide greater flexibility and reduce the compliance burden, such as by not requiring income verification if evidence is not reasonably available. In addition, the rule no longer requires lenders to verify or develop estimates of rental housing expenses based on statistical data. And the Bureau considered all of the alternatives posited by the SERs, as noted where applicable throughout part V and in part VIII. More generally, the Bureau considered and made appropriate modifications to the rule based upon feedback received during the SBREFA process and in response to other feedback provided by the small business community. The Bureau obtained important input through the SBREFA process and all articulated viewpoints were understood—and considered—prior to the promulgation of the final rule.

The Bureau disagrees with commenters that it did not consider alternative approaches. For example, in the proposal, the Bureau explained why it believed that disclosures would not be sufficient to address the identified harms and why the approaches of various States also appeared to be insufficient to address those harms. The Bureau likewise explains in this final rule its conclusions about why those approaches would not be sufficient.

The Bureau both agrees and disagrees with various comments from Advocacy, and a fuller treatment of these issues is presented below in part VII, which addresses the potential benefits, costs, and impacts of the final rule, including reductions in access to financial products and services and impacts on rural issues, and in part VIII, which addresses among other things the economic impact of the final rule on small entities, including small businesses. But more briefly here, the Bureau would note that it has made many changes in the final rule to reduce the burdens of the specific underwriting criteria in the ability-to-repay requirements; that Advocacy has stated that it appreciates the modification of the 60-day cooling-off period presented in the SBREFA Panel Outline to the 30-day cooling-off period in the proposed rule and now in the final rule; that Advocacy thanked the Bureau for clarifying that the proposed rule (and now the final rule) will not apply to business loans; that adoption of the conditional exemption from the final rule for alternative loans mitigates its impact on credit unions; that the Bureau did engage in another formal Tribal consultation after release of the proposed rule as Advocacy had urged; that the Bureau had consulted further with a range of State officials prior to finalizing the rule; and that the Bureau has extended the implementation period of the final rule.

The Bureau also disagrees with commenters who criticized procedural aspects of the SBREFA process. With respect to the composition of the SERs that participated in the SBREFA process, the Bureau followed legal

requirements for categorizing which entities qualified as small entities. The Bureau collaborated with the SBA Office of Advocacy so that the SERs included a variety of different types of lenders that could be affected by the rulemaking, ensuring that participants included a geographically diverse group of storefront payday lenders, online lenders, vehicle title lenders, installment lenders, and banks and credit unions. As noted above, to help ensure that the formal Panel meeting would allow for efficient and effective discussion of substantive issues, the Panel convened several telephone conferences before the formal meeting to provide information about the Outline and to obtain information from the SERs.

The Bureau disagrees, further, with the comments raising more specific procedural objections about the teleconferences and the Panel meeting. The Bureau provided agendas in advance of the calls and extended the length of the calls as needed to ensure that SERs were able to participate and provide feedback. While the Bureau appreciates that some SERs may have desired additional time to consider and provide feedback on the Outline, the Bureau notes that the Panel is required by law to report on the SERs' comments and advice within 60 days after the Panel is convened. The Bureau conducted the process diligently and in accordance with its obligations under the Regulatory Flexibility Act and consistent with prior SBREFA processes.

With respect to comments suggesting that the Bureau failed to adequately consider the costs and impact on small businesses and in rural areas, the Bureau notes that the costs and impacts were addressed in the notice of proposed rulemaking, and, for the final rule, are addressed in parts VII and VIII.

E. Consumer Testing

In developing the disclosures for this rule, the Bureau engaged a third-party vendor, Fors Marsh Group (FMG), to coordinate qualitative consumer testing for the disclosures that were being considered. The Bureau developed several prototype disclosure forms and tested them with participants in one-on-one interviews. Three categories of forms were developed and tested: (1) Origination disclosures that informed consumers about limitations on their ability to receive additional short-term loans; (2) upcoming payment notices that alerted consumers about lenders' future attempts to withdraw money from consumers' accounts; and (3) expired authorization notices that alerted consumers that lenders would no longer be able to attempt to withdraw money from the consumers' accounts. Observations and feedback from the testing were incorporated into the model forms developed by the Bureau.

Through this testing, the Bureau sought to observe how consumers would interact with and understand prototype forms developed by the Bureau. In late 2015, FMG facilitated two rounds of one-on-one interviews, each lasting 60 minutes. The first round was conducted in September 2015 in New Orleans, Louisiana, and the second round was conducted in October 2015 in Kansas City, Missouri. At the same time the Bureau released the proposed rule, it also made available a report that FMG had prepared on the consumer testing.[359] The testing and focus groups were conducted in accordance with OMB Control Number 3170–0022. A total of 28 individuals participated in the interviews. Of these 28 participants, 20 self-identified as having used a small-dollar loan within the past two years.

Highlights from Interview Findings. FMG asked participants questions to assess how well they understood the information on the forms.

For the origination forms, the questions focused on whether participants understood that their ability to roll this loan over or take out additional loans may be limited. Each participant reviewed one of two different prototype forms: Either one for loans that would require an ability-to-repay determination (ATR Form) or one for loans that would be offered under the conditional exemption for covered short-term loans (Alternative Loan Form). During Round 1, many participants for both form types recognized and valued information about the loan amount and due date; accordingly, that information was moved to the beginning of all the origination forms for Round 2. For the ATR Forms, few participants in Round 1 understood that the ''30 days'' language was describing a period when future borrowing may be restricted. Instead, several read the language as describing the loan term. In contrast, nearly all participants reviewing the Alternative Loan Form understood that it was attempting to convey that each successive loan they took out after the first in this series had to be smaller than the previous loan, and that after taking out three loans they would not be able to take out another for 30 days. Some participants also reviewed a version of this Alternative Loan Form for when consumers are taking out their third loan in a sequence. The majority of participants who viewed this notice understood it, acknowledging that they would have to wait until 30 days after the third loan was paid off to be considered for another similar loan.

During Round 2, participants reviewed two new versions of the ATR Form. One adjusted the ''30 days'' phrasing and the other completely removed the ''30 days'' language, replacing it with the phrase ''shortly after this one.'' The Alternative Loan Form was updated with similar rephrasing of the ''30 days'' language. In order to simplify the table, the ''loan date'' column was removed.

The results in Round 2 were similar to Round 1. Participants reviewing the ATR forms focused on the language notifying them they should not take out this loan if they are unable to pay the full balance by the due date. Information about restrictions on future loans went largely unnoticed. The edits appeared to have a positive impact on comprehension since no participants interpreted either form as providing information on their loan term. There did not seem to be a difference in comprehension between the group with the ''30 days'' version and the group with the ''shortly'' version. As in Round 1, participants who reviewed the Alternative Loan Form noticed and understood the schedule detailing maximum borrowable amounts. These participants understood that the purpose of the Alternative Loan Form was to inform them that any subsequent loans must be smaller.

Questions for the payment notices focused on participants' ability to identify and understand information about the upcoming payment. Participants reviewed one of two payment notices: An Upcoming Withdrawal Notice or an Unusual Withdrawal Notice. Both forms provided details about the upcoming payment attempt and a payment breakdown table. The Unusual Withdrawal Notice also indicated that the withdrawal was unusual because the payment was higher than the previous withdrawal amount. To obtain feedback on participants' likelihood to open notices delivered in an electronic manner, these notices were presented as a sequence to simulate an email message.

In Round 1, all participants, based on seeing the subject line in the email

[359] *See* Fors Marsh Group, ''Qualitative Testing of Small Dollar Loan Disclosures, Prepared for the Consumer Financial Protection Bureau,'' (Apr. 2016) *available at http://files.consumerfinance.gov/f/documents/Disclosure_Testing_Report.pdf* (for a detailed discussion of the Bureau's consumer testing) (hereinafter FMG Report).

inbox, said that they would open the Upcoming Withdrawal email and read it. Nearly all participants said they would consider the email legitimate. They reported having no concerns about the email because they would have recognized the company name, and because it included details specific to their account along with the lender contact information. When shown the full Upcoming Withdrawal Notice, participants understood that the lender would be withdrawing $40 from their account on a particular date. Several participants also pointed out that the notice described an interest-only payment. Round 1 results were similar for the Unusual Withdrawal Notice; all participants who viewed this notice said they would open the email, and all but one participant—who was deterred due to concerns with the appearance of the link's URL—would click on the link leading to additional details. The majority of participants indicated that they would want to read the email right away, because the words ''alert'' and ''unusual'' would catch their attention, and would make them want to determine what was going on and why a different amount was being withdrawn.

For Round 2, the payment amount was increased because some participants found it too low and would not directly answer questions about what they would do if they could not afford payment. The payment breakdown tables were also adjusted to address feedback about distinguishing between principal, finance charges, and loan balance. The results for both the Upcoming Payment and Unusual Payment Notices were similar to Round 1 in that the majority of participants would open the email, thought it was legitimate and from the lender, and understood the purpose.

For the consumer rights notice (referred to an ''expired authorization notice'' in the report), FMG asked questions about participant reactions to the notice, participant understanding of why the notice was being sent, and what participants might do in response to the notice information. As with the payment notices, these notices were presented as a sequence to simulate an email message.

In Round 1, participants generally understood that the lender had tried twice to withdraw money from their account and would not be able to make any additional attempts to withdraw payment. Most participants expressed disappointment with themselves for being in a position where they had two failed payments and interpreted the notice to be a reprimand from the lender.

For Round 2, the notice was edited to clarify that the lender was prohibited by Federal law from making additional withdrawals. For example, the email subject line was changed from ''Willow Lending can no longer withdraw loan payments from your account'' to ''Willow Lending is no longer permitted to withdraw loan payments from your account.'' Instead of simply saying ''federal law prohibits us from trying to withdraw payment again,'' language was added to both the email message and the full notice saying, ''In order to protect your account, federal law prohibits us from trying to withdraw payment again.'' More information about consumer rights and the CFPB was also added. Some participants in Round 2 still reacted negatively to this notice and viewed it as reflective of something they did wrong. However, several reacted more positively to this prototype and viewed the notice as protection.

To obtain feedback about consumer preferences on receiving notices through text message, participants were also presented with an image of a text of the consumer rights notice and asked how they would feel about getting this notice by text. Overall, the majority of participants in Round 1 (8 of 13) disliked the idea of receiving notices via text. One of the main concerns was privacy; many mentioned that they would be embarrassed if a text about their loan situation displayed on their phone screen while they were in a social setting. In Round 2, the text image was updated to match the new subject line of the consumer rights notice. The majority (10 of the 14) of participants had a negative reaction to the notification delivered via text message. Despite this, the majority of participants said that they would still open the text message and view the link.

Most participants (25 out of 28) also listened to a mock voice message of a lender contacting the participant to obtain renewed payment authorization after two payment attempts had failed. In Round 1, most participants reported feeling somewhat intimidated by the voicemail message and were inclined to reauthorize payments or call back based on what they heard. Participants had a similar reaction to the voicemail message in Round 2.

F. The Bureau's Proposal

Overview. In June 2016, the Bureau released for public comment a notice of proposed rulemaking on payday, vehicle title, and certain high-cost installment loans, which were referred to as ''covered loans.'' The proposal was published in the **Federal Register** in July 2016.[360]

Pursuant to its authority under the Dodd-Frank Act,[361] the Bureau proposed to establish new regulatory provisions to create consumer protections for certain consumer credit products. The proposed rule was primarily grounded on the Bureau's authority to identify and prevent unfair, deceptive, or abusive acts or practices,[362] but also drew on the Bureau's authority to prescribe rules and make exemptions from such rules as is necessary or appropriate to carry out the purposes and objectives of the Federal consumer financial laws,[363] its authority to facilitate supervision of certain non-bank financial service providers (including payday lenders),[364] and its authority to require disclosures to convey the costs, benefits, and risks of particular consumer financial products or services.[365]

In the proposal, the Bureau stated its concern that lenders that make covered loans have developed business models that deviate substantially from the practices in other credit markets by failing to assess consumers' ability to repay their loans and by engaging in harmful practices in the course of seeking to withdraw payments from consumers' accounts. The Bureau preliminarily concluded that there may be a high likelihood of consumer harm in connection with these covered loans because a substantial population of consumers struggles to repay their loans and find themselves ending up in extended loan sequences. In particular, these consumers who take out covered loans appear to lack the ability to repay them and face one of three options when an unaffordable loan payment is due: Take out additional covered loans, default on the covered loan, or make the payment on the covered loan and fail to meet other major financial obligations or basic living expenses. Many lenders may seek to obtain repayment of covered loans directly from consumers' accounts. The Bureau stated its concern that consumers may be subject to multiple fees and other harms when lenders make repeated unsuccessful attempts to withdraw funds from consumers' accounts.

Scope of the Proposed Rule. The Bureau's proposal would have applied to two types of covered loans. First, it would have applied to short-term loans

[360] 81 FR 47864 (July 22, 2016).

[361] Public Law 111–203, 124 Stat. 1376 (2010).

[362] Dodd-Frank Act section 1031(b).

[363] Dodd-Frank Act section 1022(b).

[364] Dodd-Frank Act section 1024(b)(7).

[365] 12 U.S.C. 5532.

that have terms of 45 days or less, including typical 14-day and 30-day payday loans, as well as single-payment vehicle title loans that are usually made for 30-day terms. Second, the proposal would have applied to longer-term loans with terms of more than 45 days that have (1) a total cost of credit that exceeds 36 percent; and (2) either a lien or other security interest in the consumer's vehicle or a form of ''leveraged payment mechanism'' that gives the lender a right to initiate transfers from the consumer's account or to obtain payment through a payroll deduction or other direct access to the consumer's paycheck. Included among covered longer-term loans was a subcategory of loans with a balloon payment, which require the consumer to pay all of the principal in a single payment or make at least one payment that is more than twice as large as any other payment.

The Bureau proposed to exclude several types of consumer credit from the scope of the proposal, including: (1) Loans extended solely to finance the purchase of a car or other consumer good in which the good secures the loan; (2) home mortgages and other loans secured by real property or a dwelling if recorded or perfected; (3) credit cards; (4) student loans; (5) non-recourse pawn loans; and (6) overdraft services and lines of credit.

Underwriting Requirements for Covered Short-Term Loans. The proposed rule preliminarily identified it as an unfair and abusive practice for a lender to make a covered short-term loan without reasonably determining that the consumer will have the ability to repay the loan, and would have prescribed requirements to prevent the practice. Before making a covered short-term loan, a lender would first be required to make a reasonable determination that the consumer would be able to make the payments on the loan and be able to meet the consumer's other major financial obligations and basic living expenses without needing to re-borrow over the ensuing 30 days. Specifically, a lender would have to:

- Verify the consumer's net income;
- verify the consumer's debt obligations using a national consumer report and, if available, a consumer report from a ''registered information system'' as described below;
- verify the consumer's housing costs or use a reliable method of estimating a consumer's housing expense based on the housing expenses of similarly situated consumers;
- estimate a reasonable amount of basic living expenses for the consumer—expenditures (other than debt obligations and housing costs) necessary for a consumer to maintain the consumer's health, welfare, and ability to produce income;
- project the amount and timing of the consumer's net income, debt obligations, and housing costs for a period of time based on the term of the loan; and
- determine the consumer's ability to repay the loan and continue paying other obligations and basic living expenses for a period of thirty days thereafter based on the lender's projections of the consumer's income, debt obligations, and housing costs and estimate of basic living expenses for the consumer.

Under certain circumstances, a lender would be required to make further assumptions or presumptions when evaluating a consumer's ability to repay a covered short-term loan. The proposal specified certain assumptions for determining the consumer's ability to repay a line of credit that is a covered short-term loan. In addition, if a consumer were to seek a covered short-term loan within 30 days of a covered short-term or longer-term balloon-payment loan, a lender generally would be required to presume that the consumer is not able to afford the new loan. A lender could overcome the presumption of unaffordability for a new covered short-term loan only if it could document a sufficient improvement in the consumer's financial capacity. Furthermore, a lender would have been prohibited for a period of 30 days from making a covered short-term loan to a consumer who has already taken out three covered short-term loans within 30 days of each other.

Under the proposal, a lender would also have been allowed to make a covered short-term loan without complying with all the underwriting criteria just specified, as long as the conditionally exempt loan satisfied certain prescribed terms to prevent and mitigate the risks and harms of unaffordable loans leading to extended loan sequences, and the lender confirmed that the consumer met specified borrowing history conditions and provided required disclosures to the consumer. Among other conditions, a lender would have been allowed to make up to three covered short-term loans in short succession, provided that the first loan had a principal amount no larger than $500, the second loan had a principal amount at least one-third smaller than the principal amount on the first loan, and the third loan had a principal amount at least two-thirds smaller than the principal amount on the first loan. In addition, a lender would not have been allowed to make a covered short-term loan under the alternative requirements if it would result in the consumer having more than six covered short-term loans during a consecutive 12-month period or being in debt for more than 90 days on covered short-term loans during a consecutive 12-month period. Under the proposal, a lender would not be permitted to take vehicle security in connection with these loans.

Underwriting Requirements for Covered Longer-Term Loans. The proposed rule would have identified it as an unfair and abusive practice for a lender to make certain covered longer-term loans without reasonably determining that the consumer will have the ability to repay the loan. The coverage would have been limited to high-cost loans of this type and for which the lender took a leveraged payment mechanism, including vehicle security. The proposed rule would have prescribed requirements to prevent the practice for these loans, subject to certain exemptions and conditions. Before making a covered longer-term loan, a lender would have had to make a reasonable determination that the consumer has the ability to make all required payments as scheduled. This determination was to be made by focusing on the month in which the payments under the loan would be the highest. The proposed ability-to-repay requirements for covered longer-term loans closely tracked the proposed requirements for covered short-term loans with an added requirement that the lender, in assessing the consumer's ability to repay a longer-term loan, must reasonably account for the possibility of volatility in the consumer's income, obligations, or basic living expenses during the term of the loan.

The Bureau has determined not to finalize this aspect of the proposal at this time (other than for covered longer-term balloon-payment loans), and will take any appropriate further action on this subject after the issuance of this final rule.

Payments Practices Related to Small-Dollar Loans. The proposed rule would have identified it as an unfair and abusive practice for a lender to attempt to withdraw payment from a consumer's account in connection with a covered loan after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains from the consumer a new and specific authorization to make further withdrawals from the account. This prohibition on further withdrawal attempts would have applied whether the two failed attempts are initiated through a single payment channel or different channels, such as the

automated clearinghouse system and the check network. The proposed rule would have required that lenders provide notice to consumers when the prohibition has been triggered and follow certain procedures in obtaining new authorizations.

In addition to the requirements related to the prohibition on further payment withdrawal attempts, the proposed rule would require a lender to provide a written notice at least three business days before each attempt to withdraw payment for a covered loan from a consumer's checking, savings, or prepaid account. The notice would have contained key information about the upcoming payment attempt, and, if applicable, alerted the consumer to unusual payment attempts. A lender could provide electronic notices as long as the consumer consented to electronic communications.

Additional Requirements. The Bureau also proposed to require lenders to furnish to provisionally registered and registered information systems certain information concerning covered loans at loan consummation, any updates to that information over the life of the loan, and certain information when the loan ceases to be outstanding. To be eligible to become a provisionally registered or registered information system, an entity would have to satisfy the eligibility criteria prescribed in the proposed rule. The Bureau proposed a sequential process to allow information systems to be registered and lenders to be ready to furnish at the time the furnishing obligation in the proposed rule would take effect. For most covered loans, registered information systems would provide a reasonably comprehensive record of a consumer's recent and current borrowing. Before making most covered loans, a lender would have been required to obtain and consider a consumer report from a registered information system.

The proposal would require a lender to establish and follow a compliance program and retain certain records, which included developing and following written policies and procedures that are reasonably designed to ensure compliance with the proposed requirements. A lender would also be required to retain the loan agreement and documentation obtained for a covered loan, and electronic records in tabular format regarding origination calculations and determinations for a covered loan, for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan, and regarding loan type, terms, payment history, and loan performance. The proposed rule also included an anti-evasion clause and a severability clause.

Effective Date. The Bureau proposed that, in general, the final rule would become effective 15 months after publication of the final rule in the **Federal Register**. It also proposed that certain provisions necessary to implement the consumer reporting components of the proposal would become effective 60 days after publication of the final rule in the **Federal Register** to facilitate an orderly implementation process.

G. Public Comments on the Proposed Rule

Overview. Reflecting the broad public interest in this subject, the Bureau received more than 1.4 million comments on the proposed rulemaking. This is the largest comment volume associated with any rulemaking in the Bureau's history. Comments were received from consumers and consumer advocacy groups, national and regional industry trade associations, industry participants, banks, credit unions, nonpartisan research and advocacy organizations, members of Congress, program managers, payment networks, payment processors, fintech companies, Tribal leaders, faith leaders and coalitions of faith leaders, and State and local government officials and agencies. The Bureau received well over 1 million comments from individuals regarding the proposed rule, often describing their own circumstances or those of others known to them in order to illustrate their views, including their perceptions of how the proposed rule might affect their personal financial situations. Some individuals submitted multiple separate comments.

The Bureau has not attempted to tabulate precise results for how to tally the comments on both sides of the rule. Nor would it be easy to do so in any practical way, and of course some of the comments did not appear to take a side in advocating for or against the rule, though only a small number would fall in this category. Nonetheless, it was possible to achieve a rough approximation that broke down the universe of comments in this manner and the Bureau made some effort to do so. As an approximation, of the total comments submitted, more than 300,000 comments generally approved of the Bureau's proposal or suggested that the Bureau should adopt a rule that is more restrictive of these kinds of loans in some way or other. Over one million comments generally opposed the proposed rule and took the view that its provisions would be too restrictive of these kinds of loans.

The Bureau received numerous submissions generated through mass mail campaigns and other organized efforts, including signatures on a petition or multiple letters, postcards, emails, or web comments. These campaigns were conducted by opponents and supporters of the proposed rule. The Bureau also received stand-alone comments submitted by a single commenter, individual, or organization.

Of the approximately 1.4 million comments submitted, a substantial majority were generated by mass-mail campaigns or other organized efforts. In many cases, these submissions contained the same or similar wording. Of those 1.4 million comments, approximately 300,000 were handwritten and often had either the same or similar content or advanced substantially similar themes and arguments. These comments were posted as attachments to the electronic docket at *www.regulations.gov.*

For many of the comments that were submitted as part of mass mail campaigns or other organized efforts, a sample comment was posted to the electronic docket at *www.regulations.gov,* with the total number of such comments received reflected in the docket entries. Accordingly, these comments, whose content is represented on the electronic docket via the sample comment, were not individually posted to the electronic docket at *www.regulations.gov.*

In addition, the 1.4 million comments included more than 100,000 signatures or comments contained on petitions, with some petitions containing tens of thousands of signatures. These petitions were posted as attachments to the electronic docket at *www.regulations.gov.* Whenever relevant to the rulemaking, these submissions and comments were considered in the development of the final rule.

Form of Submission. As detailed in the proposed rule,[366] the Bureau accepted comments through four methods: Email, electronic,[367] regular mail, and hand delivery or courier (including delivery services like FedEx). Approximately 800,000 comments, or roughly 60% of the total, were paper comments received by mail or couriers, while approximately 600,000 (or about 40%) were submitted electronically, either directly to the electronic docket at *www.regulations.gov* or by email. The electronic submissions included

[366] *See* 81 FR 47863 (July 22, 2016).

[367] Electronic submissions were made via *http://www.regulations.gov*.

approximately 100,000 scanned paper comments sent as PDF attachments to thousands of emails.

In addition, the Bureau also processed and considered comments that were received after the comment period had closed, as well as more than 50 ex parte submissions. The ex parte materials were generally presentations and summary memoranda relevant to the rulemaking that were provided to Bureau personnel in the normal course of their work, but outside the procedures for submitting written comments to the rulemaking docket referenced above. They were considered in accordance with the Bureau's established rulemaking procedures governing ex parte materials.

Materials on the record, including ex parte submissions and summaries of ex parte meetings and telephone conferences, are publicly available at *www.regulations.gov.* Other relevant information is discussed below as appropriate. In the end, the Bureau considered all of the comments it received about the proposed rule prior to finalizing the rule.

Stand-Alone Comments. Tens of thousands appear to have been ''stand-alone'' comments—comments that did not appear to have been submitted as part of a mass mail campaign or other organized effort. Nevertheless, many of these stand-alone comments contained language and phrasing that were highly similar to other comments. In addition, pre-printed postcards or other form comments with identical language submitted as part of an organized effort sometimes *also* included additional notations, such as ''we need this product'' or ''don't take this away.'' Some comment submissions also attached material, including copies of news articles, loan applications, loan advertisements, and even personal financial documents.

Many of the comments from lenders, trade associations, consumer advocacy groups, research and advocacy organizations, and government officials included specific discussion about particular provisions of the proposed rule, and the substantive issues raised in those comments are discussed in connection with those provisions. However, as noted above, a high volume of comments were received from individuals, rather than from such entities (or their official representatives). Many of these individual comments focused on personal experiences rather than legal or financial analysis of the details of the provisions of the proposed rule. The discussion below summarizes what the commenters—more than a million in total—had to say to the Bureau about the proposed rule. The comments can be broken into three general categories: (1) Individual comments made about the rule that were more factual in nature regarding the uses and benefits of covered short-term loans; (2) individual comments stating or explaining the grounds on which the commenters opposed the rule, both generally and in more specific respects; and (3) individual comments stating or explaining the grounds on which the commenters supported the rule, again both generally and in more specific respects. The individual comments as so categorized are set forth below, and they have helped inform the Bureau's consideration of the issues involved in deciding whether and how to finalize various aspects of the proposed rule.

Comments Not Specifically Supporting or Opposing the Rule. Many commenters noted, as a factual matter, the uses they make of covered short-term loans. These uses include: Rent, childcare, food, vacation, school supplies, car payments, power/utility bills, cell phone bills, credit card bills, groceries, medical bills, insurance premiums, student educational costs, daily living costs, gaps between paychecks, money to send back to a home country, necessary credit, to ''make ends meet,'' ''hard times,'' and ''bills.'' In considering these types of comments, the Bureau generally interpreted them as critical of the rule for going too far to regulate covered short-term loans.

Some individual commenters talked about how they would cover various costs and expenses if the rule caused previously available payday loans to become less available or unavailable. Among the alternatives they cited were credit cards, borrowing from family or friends, incurring NSF or overdraft charges, or seeking bank loans.

The comments included many suggestions about the consumer financial marketplace that reached beyond the scope of the proposed rule. Some of these comments suggested that the Bureau should regulate interest rates or limit the amounts that could be charged for such loans by imposing a nationwide usury cap.

Comments Opposing the Proposed Rule. The nature of criticism varied substantially. Some commenters were broadly opposed to the rule without further explanation, while others objected to the government's participation in regulating the activity affected by the rule. Some objected to the means by which the rule was being considered or enacted while others objected to various substantive aspects of the rule. Some commenters combined these various types of criticisms. Unexplained opposition included some very brief comments like ''No'' or ''Are you crazy?''

Others based their opposition on general anti-government sentiments. Some objected simply to the fact of the rulemaking. These objections included comments like ''I'm against Washington stopping me from getting a loan.'' More specific comments stated that the government should not be in the business of limiting how much people can borrow and that consumers can manage their own funds. Others contended that similar regulatory efforts in other countries had been unsuccessful. Some were opposed on the ground that the proposed rule was too complicated, with a few objecting simply to its length and complexity or its reliance on dated evidence.

A considerable number of commenters, including some State and local governmental officials, opined that existing State laws and regulations adequately addressed any regulatory need in this area. Some suggested that any regulation of covered short-term loans should be left to the States or that the Bureau should ''work with state governments.'' Some suggested that the Bureau had not adequately consulted with State officials before proposing the rule. And though the specific intent of the comments was not always made clear, some suggested that, either in promulgating or implementing the rule, the Bureau should consult State law and compare different rates and requirements in different States. Some comments were implicitly critical of the proposal, even if not expressly so, when they proposed alternative approaches like the suggestion that the Bureau ''should follow the Florida Model.''

Many comments were from individuals who indicated they were users of payday loans, were able to reliably pay them back, and objected to new restrictions. Some of those comments came with notations that they had been specifically asked by loan providers to submit such comments. Many opposed the rule in whole or in part. Some supported some parts of the rule and opposed other parts.

Hundreds of thousands of individuals submitted comments generally supporting the availability of small-dollar loans that would have been covered by the proposed rule. Many but not all were submitted by consumers of these loans, who mentioned their need for access to small loans to address financial issues they faced with paying bills or dealing with unexpected expenses. Certain consumers stated that

they could not access other forms of credit and favored the convenience and simplicity of these loans. Many expressed their opposition to caps or limits on the number of times they would be able to borrow money on such loans.

As noted above, many commenters simply indicated that they like and use payday loans. The Bureau generally understood these comments as expressions of concerns that the proposed rule might or would restrict their access to covered loans. In contending for greater availability of such loans, commenters specifically noted their use of payday loans for a substantial range of financial needs and reasons. They explained that these loans are used to cover, among other financial needs, overdraft fees, the last piece of tuition rather than losing enrollment, a portion of rent so as not to incur a rent penalty, various bills so as to avoid incurring late fees, utilities so they would not be turned off, college student necessities not covered by student loans, and funds to cover a gap in available resources before the next paycheck. Several commenters specifically noted that payday loan costs were cheaper than bank overdraft fees that would otherwise be incurred. Some indicated they had no alternative to payday products because they lacked credit for credit cards and could not borrow from family or friends or relatives.

Some commenters focused on the favorable environment they experienced in using payday loans, often in juxtaposition to their less welcoming experience with banks. A number of loan providers commented that low-income, non-English speaking immigrants are treated well by those who make these loans to them. Various borrowers related that they have been treated well at payday storefronts and that employees are helpful with their loan applications.

Others indicated that local communities support local payday lenders and the loans they provide and these lenders in turn are leading small businesspersons in their communities. Others noted that payday lenders often provide other services like check cashing, bill paying, and loading of pre-paid cards, sometimes with no fees. Still others echoed that payday lenders do more than other lenders to help their individual customers, and are all about ‘‘finding a solution’’ for the customer. Some commented that payday lenders do not pressure customers to take out loans whereas banks do.

One commenter noted that even with substantial income, payday loans still provided convenience due to a favorable ongoing relationship with the lender. Others commented more generally that the loans are convenient because they require no application and no credit check, they are easy to get and easy to renew, and they are provided at locations where it is convenient to get a check cashed. One expressly noted that despite the recognized expense of such loans, their availability and convenience made them worth it.

Various commenters noted that small loans were difficult or impossible to obtain from banks. Others objected that banks require too much personal information when lending funds, like credit checks and references. Some noted that they had a poor credit history or insufficient credit history and therefore could not get loans from banks or credit cards. Some indicated that small-dollar loans may be necessary for assuring available cash flow at some small businesses. These commenters indicated that payday loans are often critical when bank loans have been denied, the business is awaiting customer payments, and funds are needed to make payroll. Some said that alternatives were unsafe or unable to meet their needs. Others claimed that pawn shops have a bad reputation, that loan sharks might be an available option but for the possible ‘‘outcome,’’ and foreign and ‘‘underground’’ lenders were not viable options.

Some merely signed their name to the contents of printed text. Others sometimes added related messages in filling out such forms. Other forms provided space for and encouraged individualized messages and explanations rather than simply presenting uniform prepared text. Some comments opposing the proposed rule were submitted by lender employees, and those comments also ranged fairly widely in the extent of their individualized content; some referred to their fears of losing their jobs if the proposed rule were to become effective in its current form.

Some of these commenters indicated that payday loan proceeds were used to pay bills for which non-payment would result in penalties or late fees or suspension of vital services; many of them expressed, or seemed implicitly to suggest, concern that the rule would restrict their access to funds for meeting these needs.

Some commenters discussed general or specific concerns about their understanding of the effect the rule would have without expressly indicating support for or opposition to the rule, though a fair reading of their comments showed them to be expressing concern that the proposed rule would, or might restrict their access to covered loans and thus appeared to be critical of the proposed rule. For example, specific concerns about the perceived negative effects of the rule included its potential effect on the cost of covered loans, including fees and interest rates, restrictions on product availability because of re-borrowing limits, and lack of clarity about what products would replace those made unavailable by the rule. A number of comments expressed concern or confusion about the alternative lending options they would have following the enactment of the rule, and whether these alternatives would be acceptable options.

Some had very specific concerns about the potential effects of the rule, including a potential lack of liquidity in the market, and expressed a general concern that the rule might lead to increased consumer fraud. Others were concerned about the security of the personal financial information they would have to provide to get a loan. Some expressed concern that the new requirements would lead to loan denials that would hurt their credit scores. Many employees of the lenders affected by the proposed rule were concerned about their continued employment status if the rule were to be adopted.

Some commenters proposed exclusions from the effects of the rule, either directly or indirectly, indicating, for example, the auto title or credit union loans should be unaffected by the final rule. It was also suggested that there should be a safe harbor if lenders do their own underwriting or engage in income verification. Others suggested that various types of lenders should be excluded from the rule. These included credit unions, on the ground that they make ‘‘responsible’’ loans that use the ability to repay as an eligibility screen already, and ‘‘flex loans’’ because they are like lines of credit. At least one commenter suggested that the Bureau should exempt FDIC-regulated banks from any coverage under the rule.

In addition to more general criticisms of the rule, individual commenters also offered objections and concerns about the substantive provisions of the proposed rule. Some were general, like the suggestion that repayment should be more flexible. Others were more focused on specific features of the rule, including claims that the proposed rule would violate existing laws in unspecified ways.

Many commenters were concerned about the burdens and length of the ‘‘30-day waiting period’’ or cooling-off period, noting that they would be

unable to access such loans during those periods even if they had an urgent need for funds. Others similarly commented that the various requirements and restrictions would result in loan denials and impede their ability to access needed funds easily and quickly. Many specifically noted the need for funds for unexpected emergencies, like car repairs. Some simply declared these limits ''unwarranted,'' saying that they understood the risks associated with these loans and appreciated their availability nonetheless.

Some commenters focused on the procedural difficulties of obtaining covered loans under the rule. They objected to the length and detail of the loan application process when funds were needed quickly and easily to cope with emergencies, with car repairs cited frequently. They stated that the process for getting a small-dollar loan should be short and easy and that otherwise it was not worth the effort. Others felt that the proposed rule would require them to disclose too much information about their income and expenses, which would invade their privacy. Some stated that credit checks should not be required for small-dollar loans. Still others expressed concern that the government should not be able to demand such information or require that borrowers provide it.

A few commenters noted that it would be hard for lenders to comply with the rule, which would impose additional compliance costs. A few specifically suggested that the Bureau should consider having lenders use the State databases that lenders must currently use rather than the approach laid out in the proposed rule.

Finally, though the vast majority of critical comments opposed the proposed rule and the restrictions it would impose, a substantial number of individual commenters were critical because they did not believe the rule went far enough or imposed enough restrictions. These included views that allowing consumers to receive as many as six loans a year or more would sink them into further debt, that ''big banks'' would benefit from the rule, or that the rule should ''go after big banks'' rather than smaller payday lenders. Many critics of the proposed rule stated that it should more directly impose a cap on interest rates, as many States have done and as has proved effective in limiting the making of these kinds of loans. Others suggested that the proposed rule could have ''unintended consequences,'' though without clearly explaining what those consequences might be, and that more should be done to prevent them.

Comments Supporting the Proposed Rule. Many individuals submitted comments that either supported the thrust of the proposed rule or argued that it needed to be strengthened in particular ways to accomplish its purposes. Some were submitted by consumers of these loans, and others were submitted through groups such as nonprofit organizations or coalitions of faith leaders who organized the presentation of their individual stories. Many were submitted as part of campaigns organized by consumer advocacy groups and a variety of nonprofit organizations concerned about the dangers they perceived to flow from these types of loans. These comments tended to dwell on the risks and financial harms that many consumers incur from small-dollar loans. These accounts consistently centered on those borrowers who find themselves ending up in extended loan sequences and bearing the negative collateral consequences of re-borrowing, delinquency, and default, especially the inability to keep up with their other major financial obligations and the loss of control over their budgetary decisions. Many of these commenters cited the special risks posed by loans that are extended without a reasonable determination of the consumer's ability to repay the loan without re-borrowing. Some went further and urged that such loans be outlawed altogether based on their predatory nature and the extremely high costs to consumers of most of these loan products.

Some of these comments described their first-hand experiences with extended loan sequences and the financial harms that had resulted either to themselves or to friends or family members. Some colored their accounts with considerable anger and frustration about these experiences, how they were treated, and the effects that these loans had in undermining or ruining their financial situations.

Many comments were generated or collected by faith leaders and faith groups, with individuals often presenting their views in terms of moral considerations, as well as financial effects. Some of these comments cited scripture and offered religiously based objections to covered loan activity, with particular opposition to the high interest rates associated with covered loans. Others, without necessarily grounding their concerns in a specific religious orientation, noted that current covered loans harm certain financially vulnerable populations, including the elderly, low-income consumers, and single mothers. They also recounted efforts they and others had made to develop so-called ''rescue'' products to extricate members of their congregations from the cumulative harms of extended loan sequences. Some employees of lenders, especially credit unions, offered views in favor of the proposed rule based on what they had seen of the negative experiences that their customers had encountered with these types of loans.

Many commenters who favored the proposed rule dwelled on their concerns about the risks posed by the types of covered loans that are currently available to consumers. Overall, these comments tended to focus on the risks and financial harms that many consumers incur when using short-term small-dollar loans. They expressed concerns about borrowers who find themselves in extended loan sequences and bearing increasingly negative effects as a result. Commenters often stressed that these situations left consumers unable to keep up with other major financial obligations and that they lost control over their personal budgetary decisions.

Like the favorable comments regarding current payday loan activity—which the Bureau understood to be critical of the proposed rule—critics of current covered loan practices did not always specify their views about the proposed rule. Nonetheless, absent specific indications to the contrary, comments that were critical of current payday lending activity were understood to be supportive of the proposed rule as an effective potential response to those concerns.

Some comments simply indicated a general policy view that there was a need to ''stop the debt trap'' or that rollover loans were ''out of hand.'' Others objected to the perception that covered loans are ''geared to people with fixed incomes.'' Many opposed what they viewed as the common situation that these loans were unaffordable and put people in a position in which they are unable to pay off the principal and must roll over the loans to avoid default.

Some comments focused on the specific consumer protective nature of the proposed rule, indicating that the rule was needed because current lenders do not care about people's ability to repay the loans, knowing that they can profit from continuing re-borrowing. A handful of comments from current or former employees of such lenders said they supported the proposed rule because of the negative experiences they had seen their customers encounter with these types of loans. One commenter opined that even NSF fees were less damaging to consumers than

the cumulative effects of these loans, with the fees they imposed and frequency with which they landed many consumers in continued debt traps.

Many others commenting on these types of loans indicated that their ''debt trap'' nature was reinforced in the context of vehicle loans, since repossession of a vehicle could dramatically deepen the downward debt spiral. Still, one commenter argued that even the repossession of the borrower's vehicle might not be as bad as the continuing predicament of self-perpetuating loan sequences with their escalating fees and loan balances.

Some indicated that other loans were better alternatives to payday loans, sometimes citing PAL loans in this regard. And some were concerned about the character of the lenders associated with covered loans, with one comment relating that a recent payday lender had been indicted for illegal conduct associated with payday lending.

Some individual commenters indicated that they were representatives of or otherwise affiliated with national consumer organizations, and other national organizations, and were supportive of the rule. Some commenters noted that they were current payday loan borrowers working to pay off their loans and were supportive of the rule. Others supported the rule based on their own generally negative personal experiences with covered loans, with some specifying that they only supported the rule as applied to lenders that made loans without determining whether borrowers had the ability to repay them.

Many individual commenters indicated support for time limits on these loans and the proposed ''cooling-off period'' because they believed it would ultimately help consumers better manage their funds. Some thought that the rule would have the effect of lowering interest rates.

Some individual commenters who identified themselves as State officials, including individual legislators, commented that the rule would favorably supplement existing statutes that dealt with covered loans in their respective States. Individuals affiliated with some industry groups indicated their general support for the rule, but expressed concern that, in unexplained ways, the rule may go ''too far.'' In contrast, others recommended that the standards in the proposed rule should be applied in the context of all consumer lending rather than just in this market.

The Bureau's Consideration of Individual Comments. Although the specific treatment of discrete issues is addressed more fully in part V below, which presents the section-by-section analysis explaining the components of the final rule, it may be useful here to provide some of the uses that the Bureau made of the individual comments. First, it is a notable and commendable fact that over a million individual commenters would take the time and effort to respond to the Bureau with their thoughts and reactions, both pro and con, to this proposed rule. Public comments are not just an obligatory part of the rulemaking process required by the Administrative Procedure Act, they are welcome as a means of providing insight and perspective in fashioning such rules. Perhaps needless to say, that inviting solicitation was put to the test here.

As noted earlier, many of the individual comments turned out to be duplicative and redundant of one another. In part, that was because both the industry groups, on the one side, and the consumer and community groups, on the other side, employed campaigns to solicit large numbers of individual comments. The Bureau does not view any of those efforts as improper or illegitimate, and it has not discounted any comments on their merits as a result of their apparent origins. It did create challenges, however, for figuring out how to manage this large volume of comments—how to receive and process them, how to handle and organize them, and how to review and consider them. In the end, the Bureau proceeded as laid out in its earlier discussion in this section, and though the process took many months and considerable effort, it was eventually completed in a satisfactory way.

The Bureau also does not view the repetition and redundancy among many of the comments as being immaterial. The Bureau considered not only what views the public has, but how intensely they are felt and maintained. The Bureau has frequently noted, in its handling of consumer complaints, that when the same concern arises more frequently, it may reflect an emerging pattern and be worthy of more attention than if the same concern arises only once or twice and thus appears to reflect a more isolated set of circumstances. The same may be true here, with the caveat that, depending on the circumstances, comments generated primarily through campaigns may or may not truly reflect any widespread or deeply felt convictions, depending on the level of the individual's actual involvement.

Having said that, the processes that Congress has created for Federal administrative rulemaking, both in the Administrative Procedure Act generally and here in the Dodd-Frank Act in particular, were not designed or intended to be governed by some rough assessment of majority vote or even majority sentiment. While rough estimates of pro and con submissions are provided above, the Bureau has simply sought to understand the consumer experiences reported in these comments and address the substance of these comments on their merits.

As a general matter, the individual comments have helped inform the Bureau's understanding of factual matters surrounding the circumstances and use of covered loans. In the sections on Market Concerns—Underwriting and Market Concerns—Payments, they helped add depth and content to the Bureau's description of issues such as borrower characteristics, the circumstances of borrowing, their expectations of and experience with extended loan sequences, including harms they have suffered as a consequence of delinquency, default, and loss of control over budgeting. Many of these concerns were already known at the outset of the rule-writing process, as a result of extensive outreach and feedback the Bureau has received on the subject, as well as through the research that the Bureau and others have performed on millions of covered loans, all of which is discussed above.

Nonetheless, the Bureau's review of large numbers of individual comments has reinforced certain points and prompted further consideration of others. For example, many individuals stated great concern that the proposed rule would make the underwriting process for small-dollar loans too burdensome and complex. They commented positively on the speed and convenience of obtaining such loans, and were concerned that the process described in the proposed rule would lead to fewer such loans being offered or made. This has influenced the Bureau's consideration of the details of the underwriting process addressed in § 1041.5 of the final rule and contributed to the Bureau's decision to modify various aspects of that process. At the same time, many other individual commenters had much to say about the perils of extended loan sequences and how they had harmed either themselves or others, which helped underscore the need for the Bureau to finalize a framework that would be sufficiently protective of consumers. In particular, many commenters supported the general requirement that lenders must reasonably assess the borrower's ability to repay before making a loan according

to specific underwriting criteria, and that limited exceptions to those criteria would be made only where other conditions applied to ensure that lenders would not end up in extended loan sequences. There are also many other places in the Bureau's discussion and explanation of the final rule where individual comments played a role in the Bureau's analysis.

Further Inter-Agency Consultation. In addition to the inter-agency consultation that the Bureau engaged in prior to issuing the notice of proposed rulemaking, pursuant to section 1022(b)(2) of the Dodd-Frank Act, the Bureau has consulted further with the appropriate prudential regulators and the FTC during the comment process. As a result of these consultations, the Bureau has made a number of changes to the rule and has provided additional explanation for various determinations it has made about the provisions of the rule, which have been discussed with the other regulators and agencies during the consultation process.

Ex Parte Submissions. In addition, the Bureau considered the comments it received after the comment period had closed, as well as other input from more than 50 ex parte submissions, meetings, and telephone conferences.[368] All such materials in the record are available to the public at *http://www.regulations.gov.* Relevant information received is discussed below in the section-by-section analysis and subsequent parts of this notice, as applicable. The Bureau considered all the comments it received about the proposal, made certain modifications, and is adopting the final rule as described more fully in part V below.

IV. Legal Authority

The Bureau is issuing this final rule pursuant to its authority under the Dodd-Frank Act. The rule relies on rulemaking and other authorities specifically granted to the Bureau by the Dodd-Frank Act, as discussed below.

A. Section 1031 of the Dodd-Frank Act

Section 1031(b)—The Bureau's Authority To Identify and Prevent UDAAPs

Section 1031(b) of the Dodd-Frank Act provides the Bureau with authority to prescribe rules to identify and prevent unfair, deceptive, or abusive acts or practices, or UDAAPs. Specifically, section 1031(b) of the Act authorizes the Bureau to prescribe rules "applicable to a covered person or service provider identifying as unlawful unfair, deceptive, or abusive acts or practices in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service." Section 1031(b) of the Act further provides that, "Rules under this section may include requirements for the purpose of preventing such acts or practice."

There are notable similarities between the Dodd-Frank Act and the Federal Trade Commission Act (FTC Act) provisions relating to unfair and deceptive acts or practices. Accordingly, these FTC Act provisions, and case law and Federal agency rulemakings relying on them, inform the scope and meaning of the Bureau's rulemaking authority with respect to unfair and deceptive acts or practices under section 1031(b) of the Dodd-Frank Act.[369]

Courts evaluating exercise of agency rulemaking authority under the unfairness and deception standards of the FTC Act have held that there must be a "reasonable relation" between the act or practice identified as unlawful and the remedy chosen by the agency.[370] The Bureau agrees with this approach and therefore maintains it is reasonable to interpret section 1031(b) of the Dodd-Frank Act to permit the imposition of requirements to prevent acts or practices that are identified by the Bureau as unfair or deceptive, as long as the preventive requirements being imposed by the Bureau have a reasonable relation to the identified acts or practices.

The Bureau likewise maintains that it is reasonable to interpret section 1031(b) of the Dodd-Frank Act to provide that same degree of discretion to the Bureau with respect to the imposition of requirements to prevent acts or practices that are identified by the Bureau as abusive. Throughout this rulemaking process, the Bureau has relied on and applied this interpretation in formulating and designing requirements to prevent acts or practices identified as unfair or abusive.

Section 1031(c)—Unfair Acts or Practices

Section 1031(c)(1) of the Dodd-Frank Act provides that the Bureau shall have no authority under section 1031 to declare an act or practice in connection with a transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service, to be unlawful on the grounds that such act or practice is unfair, unless the Bureau "has a reasonable basis" to conclude that: The act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers; and such substantial injury is not outweighed by countervailing benefits to consumers or to competition.[371] Section 1031(c)(2) of the Act provides that, "[i]n determining whether an act or practice is unfair, the Bureau may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination." [372]

In sum, the unfairness standard under section 1031(c) of the Dodd-Frank Act requires primary consideration of three elements: The presence of a substantial injury, the absence of consumers' ability to reasonably avoid the injury, and the countervailing benefits to consumers or to competition associated with the act or practice. The Dodd-Frank Act also permits secondary consideration of public policy objectives.

As noted above, the unfairness provisions of the Dodd-Frank Act are similar to the unfairness standard under the FTC Act.[373] That standard was developed, in part, when in 1994, Section 5(n) of the FTC Act was amended to incorporate the principles set forth in the FTC's December 17, 1980 "Commission Statement of Policy on the

[368] *See also* Bureau of Consumer Fin. Prot., "CFPB Bulletin 11–3, CFPB Policy on Ex Parte Presentations in Rulemaking Proceedings," (Aug. 16, 2011), *available at http://files.consumerfinance.gov/f/2011/08/Bulletin_20110819_ExPartePresentationsRulemakingProceedings.pdf, updated and revised,* Policy on Ex Parte Presentations in Rulemaking Proceedings, 82 FR 18687 (Apr. 21, 2017).

[369] Section 18 of the FTC Act similarly authorizes the FTC to prescribe "rules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce" and provides that such rules "may include requirements prescribed for the purpose of preventing such acts or practices." 15 U.S.C. 57a(a)(1)(B). As discussed below, the Dodd-Frank Act, unlike the FTC Act, also permits the Bureau to prescribe rules identifying and preventing "abusive" acts or practices.

[370] *See Am. Fin. Servs. Ass'n* v. *FTC,* 767 F.2d 957, 988 (D.C. Cir. 1985) (*AFSA*) (holding that the FTC "has wide latitude for judgment and the courts will not interfere except where the remedy selected has no reasonable relation to the unlawful practices found to exist" (*citing Jacob Siegel Co.* v. *FTC,* 327 U.S. 608, 612–13 (1946)).

[371] 12 U.S.C. 5531(c)(1).

[372] 12 U.S.C. 5531(c)(2).

[373] Section 5(n) of the FTC Act, as amended in 1994, provides that, the FTC shall have no authority to declare unlawful an act or practice on the grounds that such act or practice is unfair unless the act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition. In determining whether an act or practice is unfair, the FTC may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination. 15 U.S.C. 45(n).

Scope of Consumer Unfairness Jurisdiction'' (the FTC Policy Statement on Unfairness).[374]

Due to the similarities between unfairness provisions in the Dodd-Frank and FTC Acts, the scope and meaning of the Bureau's authority under section 1031(b) of the Dodd-Frank Act to issue rules that identify and prevent acts or practices that the Bureau determines are unfair pursuant to section 1031(c) of the Dodd-Frank Act are naturally informed by the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings,[375] and related case law. The Bureau believes it is reasonable to interpret section 1031 of the Dodd-Frank Act consistent with the specific positions discussed in this section on Legal Authority. The Bureau's interpretations are based on its expertise with consumer financial products, services, and markets, and its experience with implementing this provision in supervisory and enforcement actions. The Bureau also generally finds persuasive the reasons provided by the authorities supporting these positions as discussed in this section.

Substantial Injury

The first element required for a determination of unfairness under section 1031(c)(1) of the Dodd- Frank Act is that the act or practice causes, or is likely to cause, substantial consumer injury. As noted above, Bureau rulemaking regarding the meaning of the elements of this unfairness standard is informed by the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law.

The FTC noted in the FTC Policy Statement on Unfairness that substantial injury ordinarily involves monetary harm, and that trivial or speculative harms are not cognizable under the test for substantial injury.[376] The FTC also noted that an injury is ''sufficiently substantial'' if it consists of a small amount of harm to a large number of individuals or if it raises a significant risk of harm.[377]

In addition, the FTC has also found that substantial injury may involve a large amount of harm experienced by a small number of individuals.[378] And while the FTC has said that emotional impact and other more subjective types of harm ordinarily will not constitute substantial injury,[379] the D.C. Circuit held that psychological harm can form part of the substantial injury along with financial harm.[380]

Not Reasonably Avoidable

The second element required for a determination of unfairness under section 1031(c)(1) of the Dodd-Frank Act is that the substantial injury is not reasonably avoidable by consumers. Again, the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law inform the meaning of this element of the unfairness standard.

The FTC has noted that knowing the steps for avoiding injury is not enough for the injury to be reasonably avoidable; rather, the consumer must also understand the necessity of taking those steps.[381] As the FTC explained in its Policy Statement on Unfairness, most unfairness matters are brought to ''halt some form of seller behavior that unreasonably creates or takes advantage of an obstacle to the free exercise of consumer decision making.'' [382] The D.C. Circuit held that such behavior can create a ''market failure'' and the agency ''may be required to take corrective action.'' [383] Reasonable avoidability also takes into account the costs of making a choice other than the one made and the availability of alternatives in the marketplace.[384]

Countervailing Benefits to Consumers or Competition

The third element required for a determination of unfairness under section 1031(c)(1) of the Dodd- Frank Act is that the act or practice's countervailing benefits to consumers or to competition do not outweigh the substantial consumer injury. Once again, the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law inform the meaning of this element of the unfairness standard.

In applying the FTC Act's unfairness standard, the FTC has stated that it is important to consider both the costs of imposing a remedy and any benefits that consumers enjoy as a result of the practice.[385] Authorities addressing the FTC Act's unfairness standard indicate that the countervailing benefits test does not require a precise quantitative analysis of benefits and costs, because such an analysis may be unnecessary or, in some cases, impossible. Rather, the agency is expected to gather and

[374] Letter from the FTC to Hon. Wendell Ford and Hon. John Danforth, Committee on Commerce, Science and Transportation, United States Senate, Commission Statement of Policy on the Scope of Consumer Unfairness Jurisdiction (December 17, 1980), *reprinted in In re Int'l Harvester Co.,* 104 F.T.C. 949, 1070 (1984) (*Int'l Harvester*). *See also* S. Rept. 103–130, at 12–13 (1993) (legislative history to FTC Act amendments indicating congressional intent to codify the principles of the FTC Policy Statement on Unfairness).

[375] In addition to the FTC's rulemakings under unfairness authority, certain Federal prudential regulators have prescribed rules prohibiting unfair practices under section 18(f)(1) of the FTC Act and, in doing so, they applied the statutory elements consistent with the standards articulated by the FTC. The Federal Reserve Board, FDIC, and the OCC also issued guidance generally adopting these standards for purposes of enforcing the FTC Act's prohibition on unfair and deceptive acts or practices. *See* 74 FR 5498, 5502 (Jan. 29, 2009) (background discussion of legal authority for interagency Subprime Credit Card Practices rule).

[376] *See* FTC Policy Statement on Unfairness, *Int'l Harvester,* 104 F.T.C. 949, 1073 (1984). For example, in the Higher-Priced Mortgage Loan (HPML) Rule, the Federal Reserve Board concluded that a borrower who cannot afford to make the loan payments as well as payments for property taxes and homeowners insurance because the lender did not adequately assess the borrower's ability to repay suffers substantial injury, due to the various costs associated with missing mortgage payments (*e.g.,* large late fees, impairment of credit records, foreclosure related costs). *See* 73 FR 44522, 44541–42 (July 30, 2008).

[378] *See Int'l Harvester,* 104 F.T.C. at 1064.

[379] *See* FTC Policy Statement on Unfairness, *Int'l Harvester,* 104 F.T.C. at 1073.

[380] *See AFSA,* 767 F.2d at 973–74, n.20 (1985) (discussing the potential psychological harm resulting from lenders' taking of non-possessory security interests in household goods and associated threats of seizure, which was part of the FTC's rationale for intervention in the Credit Practices Rule).

[381] *See Int'l Harvester,* 104 F.T.C. at 1066.

[382] FTC Policy Statement on Unfairness, *Int'l Harvester,* 104 F.T.C. at 1074.

[383] *AFSA,* 767 F.2d at 976. The D.C. Circuit noted that Congress intended for the FTC to develop and refine the criteria for unfairness on a ''progressive, incremental'' basis. *Id.* at 978. The court upheld the FTC's Credit Practices Rule by reasoning in part that ''the fact that the [FTC's] analysis applies predominantly to certain creditors dealing with a certain class of consumers (lower-income, higher-risk borrowers) does not, as the dissent suggests, undercut its validity. [There is] a market failure with respect to a particular category of credit transactions which is being exploited by the creditors involved to the detriment of the consumers involved.'' *Id.* at 982 n.29.

[384] *See* FTC Policy Statement on Unfairness, *Int'l Harvester,* 104 F.T.C. at 1074 n.19 (''In some senses any injury can be avoided—for example, by hiring independent experts to test all products in advance, or by private legal actions for damages—but these courses may be too expensive to be practicable for individual consumers to pursue.''); *AFSA,* 767 F.2d at 976–77 (reasoning that because of factors such as substantial similarity of contracts, ''consumers have little ability or incentive to shop for a better contract'').

[385] *See* FTC Policy Statement on Unfairness, *Int'l Harvester,* 104 F.T.C. at 1073–74 (noting that an unfair practice must be ''injurious in its net effects'' and that ''[t]he Commission also takes account of the various costs that a remedy would entail. These include not only the costs to the parties directly before the agency, but also the burdens on society in general in the form of increased paperwork, increased regulatory burdens on the flow of information, reduced incentives to innovation and capital formation, and similar matters.'').

consider reasonably available evidence.[386]

Public Policy

As noted above, section 1031(c)(2) of the Dodd-Frank Act provides that, ''[i]n determining whether an act or practice is unfair, the Bureau may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination.'' [387]

Section 1031(d)—Abusive Acts or Practices

The Dodd-Frank Act, in section 1031(b), authorizes the Bureau to identify and prevent abusive acts and practices. The Bureau believes that Congress intended for the statutory phrase ''abusive acts or practices'' to encompass conduct by covered persons that is beyond what would be prohibited as unfair or deceptive acts or practices, although such conduct could overlap and thus satisfy the elements for more than one of the standards.[388]

Under section 1031(d) of the Dodd-Frank Act, the Bureau ''shall have no authority . . . to declare an act or practice abusive in connection with the provision of a consumer financial product or service'' unless the act or practice meets at least one of several enumerated conditions. For example, under section 1031(d)(2)(A) of the Act, an act or practice might ''take[ ] unreasonable advantage of'' a consumer's ''lack of understanding . . . of the material risks, costs, or conditions of the [consumer financial] product or service'' (*i.e.,* the lack of understanding prong).[389] Under section 1031(d)(2)(B) of the Act, an act or practice might ''take[ ] unreasonable advantage of'' the ''inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service'' (*i.e.,* the inability to protect prong).[390] The Dodd-Frank Act does not further elaborate on the meaning of these terms, leaving it to the Bureau to interpret and apply these standards.

Although the legislative history on the meaning of the Dodd-Frank Act's abusiveness standard is fairly limited, it suggests that Congress was particularly concerned about the widespread practice of lenders making unaffordable loans to consumers. A primary focus was on unaffordable home mortgages and mortgages made without adequate or responsible underwriting.[391]

However, there is some indication that Congress also intended the Bureau to use the authority under section 1031(d) of the Dodd-Frank Act to address payday lending through the Bureau's rulemaking, supervisory, and enforcement authorities. For example, the Senate Committee on Banking, Housing, and Urban Affairs report on the Senate version of the legislation listed payday loans as one of several categories of consumer financial products and services, other than mortgages, where ''consumers have long faced problems'' because they lack ''adequate Federal rules and enforcement,'' noting further that ''[a]busive lending, high and hidden fees, unfair and deceptive practices, confusing disclosures, and other anti-consumer practices have been a widespread feature in commonly available consumer financial products such as credit cards.'' [392] The same section of the Senate committee report included a description of the basic features of payday loans and the problems associated with them, specifically noting that many consumers are unable to repay the loans while meeting their other obligations and that many of these borrowers re-borrow, which results in a ''perpetual debt treadmill.'' [393] These portions of the legislative history reinforce other indications in the Dodd-Frank Act that Congress consciously intended to confer direct authority upon the Bureau to address issues concerning payday loans.[394]

B. Section 1032 of the Dodd-Frank Act

Section 1032(a) of the Dodd-Frank Act provides that the Bureau may prescribe rules to ensure that the features of any consumer financial product or service, ''both initially and over the term of the product or service,'' are ''fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances.'' [395] This authority is broad, and empowers the Bureau to prescribe rules regarding the disclosure of the ''features'' of consumer financial products and services generally.

Accordingly, the Bureau may prescribe rules containing disclosure requirements even if other Federal

[386] *See* S. Rept. 103–130, at 13 (1994) (legislative history for the 1994 amendments to the FTC Act noting that, ''In determining whether a substantial consumer injury is outweighed by the countervailing benefits of a practice, the Committee does not intend that the FTC quantify the detrimental and beneficial effects of the practice in every case. In many instances, such a numerical benefit-cost analysis would be unnecessary; in other cases, it may be impossible. This section would require, however, that the FTC carefully evaluate the benefits and costs of each exercise of its unfairness authority, gathering and considering reasonably available evidence.''); *Pennsylvania Funeral Directors Ass'n* v. *FTC,* 41 F.3d 81, 91 (3d Cir. 1994) (in upholding the FTC's amendments to the Funeral Industry Practices Rule, the Third Circuit noted that ''much of a cost-benefit analysis requires predictions and speculation''); *Int'l Harvester,* 104 F.T.C. at 1065 n.59 (''In making these calculations we do not strive for an unrealistic degree of precision . . . . We assess the matter in a more general way, giving consumers the benefit of the doubt in close issues . . . . What is important . . . is that we retain an overall sense of the relationship between costs and benefits. We would not want to impose compliance costs of millions of dollars in order to prevent a bruised elbow.'').

[387] 12 U.S.C. 5531(c)(2).

[388] *See, e.g.,* S. Rept. No. 111–176, at 172 (Apr. 30, 2010) (''Current law prohibits unfair or deceptive acts or practices. The addition of 'abusive' will ensure that the Bureau is empowered to cover practices where providers unreasonably take advantage of consumers.''); Public Law 111–203 (listing, in the preamble to the Dodd- Frank Act, one of the purposes of the Act as ''protect[ing] consumers from abusive financial services practices'').

[389] 12 U.S.C. 5531(d)(2)(A).

[390] 12 U.S.C. 5531(d)(2)(B). The Dodd-Frank Act's abusiveness standard also permits the Bureau to intervene under section 1031(d)(1) if the Bureau determines that an act or practice ''materially interferes with the ability of a consumer to understand a term or condition of a consumer financial product or service,'' 12 U.S.C. 5531(d)(1), and under section 1031(d)(2)(C) if an act or practice ''takes unreasonable advantage of'' the consumer's ''reasonable reliance'' on the covered person to act in the consumer's interests, 12 U.S.C. 5531(d)(2)(C).

[391] While Congress sometimes described other products as abusive, it frequently applied the term to unaffordable mortgages and mortgages made without adequate or responsible underwriting. *See, e.g.,* S. Rept. No. 111–176, at 11 (noting that the ''financial crisis was precipitated by the proliferation of poorly underwritten mortgages with abusive terms'').

[392] *See* S. Rept. 111–176, at 17. In addition to credit cards, the Senate committee report listed overdraft, debt collection, payday loans, and auto dealer lending as the consumer financial products and services warranting concern. *Id.* at 17–23.

[393] *See* S. Rept. 111–176, 20–21; *see also* 155 Cong. Rec. 31250 (Dec. 10, 2009) (during a colloquy on the House floor with the one of the authors of the Dodd-Frank Act, Representative Barney Frank, Representative Henry Waxman stated that the ''authority to pursue abusive practices helps ensure that the agency can address payday lending and other practices that can result in pyramiding debt for low income families.'').

[394] Section 1024(a)(1)(E) of the Dodd-Frank Act also expressly confers authority upon the Bureau to take specific acts concerning ''any covered person who . . . offers or provides to a consumer a payday loan.'' These include the use of supervisory authority to ''conduct examinations'' for the purpose of ''assessing compliance with the requirements of Federal consumer financial law,'' to exercise ''exclusive'' authority to ''enforce Federal consumer financial law,'' and to exercise ''exclusive'' authority to ''issue regulations'' for the purpose of ''assuring compliance with Federal consumer financial law.'' Congress conferred this authority only for a defined and limited universe of consumer financial products—payday loans, mortgage loans, and student loans—and in certain other specified instances, thus indicating its intent to empower the Bureau to consider and carry out broad regulatory and oversight activity with respect to the market for payday loans, in particular.

[395] 12 U.S.C. 5532(a).

consumer financial laws do not specifically require disclosure of such features. Section 1032(c) of the Dodd-Frank Act provides that, in prescribing rules pursuant to section 1032 of the Act, the Bureau ''shall consider available evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services.'' [396]

Section 1032(b)(1) of the Dodd-Frank Act provides that ''any final rule prescribed by the Bureau under this section requiring disclosures may include a model form that may be used at the option of the covered person for provision of the required disclosures.'' [397] Section 1032(b)(2) of the Act provides that such a model form ''shall contain a clear and conspicuous disclosure that, at a minimum—(A) uses plain language comprehensible to consumers; (B) contains a clear format and design, such as an easily readable type font; and (C) succinctly explains the information that must be communicated to the consumer.'' [398]

Section 1032(b)(3) of the Dodd-Frank Act provides that any such model form ''shall be validated through consumer testing.'' [399] And section 1032(d) of the Act provides that, ''Any covered person that uses a model form included with a rule issued under this section shall be deemed to be in compliance with the disclosure requirements of this section with respect to such model form.'' [400]

C. Other Authorities Under the Dodd-Frank Act

Section 1022(b)(1) of the Dodd-Frank Act provides that the Bureau's director ''may prescribe rules and issue orders and guidance, as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof.'' [401] ''Federal consumer financial law'' includes rules prescribed under Title X of the Dodd-Frank Act,[402] including sections 1031(b) to (d) and 1032.

Section 1022(b)(2) of the Dodd-Frank Act prescribes certain standards for rulemaking that the Bureau must follow in exercising its authority under section 1022(b)(1) of the Act.[403] For a discussion of the Bureau's standards for rulemaking under section 1022(b)(2) of the Act, see part VII below.

Section 1022(b)(3)(A) of the Dodd-Frank Act authorizes the Bureau, by rule, to ''conditionally or unconditionally exempt any class of covered persons, service providers, or consumer financial products or services'' from any provision of Title X or from any rule issued under Title X as the Bureau determines ''necessary or appropriate to carry out the purposes and objectives'' of Title X. In doing so, the Bureau must, ''tak[e] into consideration the factors'' set forth in section 1022(b)(3)(B) of the Act,[404] which specifies three factors that the Bureau shall, as appropriate, take into consideration in issuing such an exemption.[405]

Furthermore, §§ 1041.10 and 1041.11 of the final rule are authorized by other Dodd-Frank Act authorities, such as sections 1021(c)(3),[406] 1022(c)(7),[407] 1024(b)(1),[408] and 1024(b)(7) of the Act.[409] A more complete description of the Dodd-Frank Act authorities on which the Bureau is relying for §§ 1041.10 and 1041.11 of the final rule is contained in the section-by-section analysis of those provisions.

D. Section 1041 of the Dodd-Frank Act and Preemption

Section 1041(a)(1) of the Dodd-Frank Act provides that Title X of the Act, other than sections 1044 through 1048, ''may not be construed as annulling, altering, or affecting, or exempting any person subject to the provisions of [Title X] from complying with,'' the statutes, regulations, orders, or interpretations in effect in any State (sometimes hereinafter, State laws), ''except to the extent that any such provision of law is inconsistent with the provisions of [Title X], and then only to the extent of the inconsistency.'' [410] Section 1041(a)(2) of the Act provides that, for purposes of section 1041, ''a statute, regulation, order, or interpretation in effect in any State is not inconsistent with'' the Title X provisions ''if the protection that such statute, regulation, order, or interpretation affords to consumers is greater than the protection provided'' under Title X.[411] This section further provides that a determination regarding whether a statute, regulation, order, or interpretation in effect in any State is inconsistent with the provisions of Title X may be made by the Bureau on its own motion or in response to a nonfrivolous petition initiated by any interested person.[412]

The requirements of the final rule set minimum Federal standards for the regulation of covered loans. They thus accord with the common preemption principle that Federal law provides a floor and not a ceiling on consumer financial protection,[413] as provided in section 1041(a)(2) of the Dodd-Frank Act. The requirements of this rule will thus coexist with State laws that pertain to the making of loans that the rule treats as covered loans (hereinafter, ''applicable State laws''). Consequently, any person subject to the final rule will be required to comply with both the requirements of this rule and all applicable State laws, except to the extent that the applicable State laws are inconsistent with the requirements of the rule.[414] This approach reflects the established framework of cooperative federalism between Federal and State laws in many other substantive areas. Accordingly, the arguments advanced by some commenters that the payday rule would ''occupy the field'' are incorrect. Where Federal law occupies an entire field, ''even complementary State regulation is impermissible'' because field preemption ''foreclose[s] any State regulation in the area, even if it is parallel to Federal standards.'' [415] This rule would not have that effect.

As noted above, section 1041(a)(2) of the Dodd-Frank Act specifies that State

[410] 12 U.S.C. 5551(a)(1). Section 1002(27) of the Dodd-Frank Act defines ''State'' to include any ''Federally recognized Indian Tribe.'' *See* 12 U.S.C. 5481(27).

[411] 12 U.S.C. 5551(a)(2).

[412] 12 U.S.C. 5551(a)(2).

[413] The Bureau received a comment from a group of State Attorneys General asking the Bureau to codify the statement that this is a floor and not a ceiling. The Bureau does not believe this is necessary, and that it would conflict with the regulatory scheme of the rule, which is primarily aimed at obligations on the part of lenders. This section should suffice for purposes of communicating the Bureau's intent with regard to preemption.

[414] The requirements of the final rule will also coexist with applicable laws in cities and other localities, and the Bureau does not intend the rule to annul, alter, affect, or exempt any person from complying with the regulatory frameworks of cities and other localities to the extent those frameworks provide greater consumer protections than the requirements of this rule.

[415] *Arizona* v. *United States,* 567 U.S. 387 (2012).

laws which afford greater consumer protection than is provided under Title X are not inconsistent with the provisions of Title X. Specifically, as discussed in part II, different States have taken different approaches to regulating loans that are treated as covered loans under the final rule, with many States electing to permit the making of such loans according to varying conditions, and other States choosing not to do so by imposing usury caps that effectively render it impractical to make such loans in those States.

Particularly in the States where fixed usury caps effectively prohibit these types of loans, nothing in this rule is intended or should be construed to undermine or cast doubt on whether those provisions are sound public policy. Because Title X does not confer authority on the Bureau to establish usury limits,[416] its policy interventions, as embodied in the final rule, are entirely distinct from such measures as are beyond its statutory authority. Therefore, nothing in this rule should be construed as annulling or even as inconsistent with a regulatory or policy approach to such loans based on usury caps, which are wholly within the prerogative of the States to lawfully impose. Indeed, as described in part II, South Dakota became the most recent State to impose a usury cap on payday loans after conducting a ballot initiative in 2016 in which the public voted to approve the measure by a substantial margin.

The requirements of the final rule will coexist with different approaches and frameworks for the regulation of such covered loans as reflected in applicable State laws.[417] The Bureau is aware of certain applicable State laws that may afford greater protections to consumers than do the requirements of this rule. For example, as described in part II and just discussed above, certain States have fee or interest rate caps (*i.e.,* usury limits) that payday lenders may find are set too low to sustain their business models. The Bureau regards the fee and interest rate caps in these States as providing greater consumer protections than, and thus as not inconsistent with, the requirements of the final rule.

Aside from those provisions of State law just discussed, the Bureau declines to determine definitively in this rulemaking whether any other individual statute, regulation, order, or interpretation in effect in any State is inconsistent with the rule. Comments on the proposal and internal analysis have led the Bureau to conclude that specific questions of preemption should be decided upon application, and the Bureau will respond to nonfrivolous petitions initiated by interested persons in accordance with section 1041(a)(2) of the Dodd-Frank Act. The Bureau believes that in most cases entities can apply the principles articulated above in a straightforward manner to determine their rights and obligations under both the rule and State law. Moreover, in light of the variety of relevant State law provisions and the range of practices that may be covered by those laws, it is impossible for the Bureau to provide a definitive description of all interactions or to anticipate all areas of potential concern.

Some commenters argued that because section 1041 of the Dodd-Frank Act includes only the term ''this title,'' and not ''any rule or order prescribed by the Bureau under this title,'' Congress contemplated only statutory and not regulatory preemption of State law. The Bureau disagrees and believes section 1041 is best interpreted to apply to Title X and rules prescribed by the Bureau under that Title. Section 1041 was modeled in large part on similar provisions from certain enumerated consumer laws. Consistent with longstanding case law holding that State laws can be pre-empted by Federal regulations promulgated in the exercise of delegated authority,[418] those provisions were definitively interpreted to apply to requirements imposed by implementing regulations, even where the statutory provisions include explicit reference only to the statutes themselves.[419] Congress is presumed to have been aware of those applications in enacting Title X, and section 1041 is best interpreted similarly. Moreover, the Bureau's interpretation furthers principles of consistency, uniformity, and manageability in interpreting Title X and legislative rules with the force and effect of law implementing that statute. Finally, while section 1041 of the Act instructs preemption analyses, any actual pre-emptive force derives from the substantive provisions of Title X and its implementing rules, not from section 1041 itself. A reading that section 1041 would apply only to Title X itself could lead to the conclusion that rules prescribed by the Bureau under Title X have broader preemptive effect than does Title X itself. The better interpretation is that the preemptive effect of regulations exercised under delegated authority should be guided by the provisions of section 1041.

Lastly, the Bureau intends this rule to interact in the same manner with laws or regulations at other government levels, like city or locality laws or regulations.

E. General Comments on the Bureau's Legal Authority

In addition to setting out the Bureau's legal authority for this rulemaking and responding to comments directed to specific sources of authority, it is necessary to address several more general comments that challenged or criticized certain aspects of the Bureau's ability to proceed to finalize this rule. They will be addressed here.

Some industry commenters and State Attorneys General have contended that the Bureau lacks the legal authority to adopt this rule because the Bureau itself or its statutory authority is unconstitutional on various grounds, including separation-of-powers, the non-delegation doctrine, and the 10th Amendment. No court has ever held that the Bureau is unable to issue regulations on the basis that it is unconstitutional, and in fact the Bureau has issued dozens of regulations to date, including many major rules that have profoundly affected key consumer markets such as mortgages, prepaid accounts, remittance transfers, and others—a number of which were mandated by Congress. In addition, longstanding precedent has established that a government agency lacks the authority to decide the constitutionality of congressional enactments.[420]

One commenter argued that the timing of the proposed rule prevented the Bureau from using data gathered in Treasury Department Financial Empowerment Studies on small dollar loans conducted under Title XII of the Dodd-Frank Act, and that the

[416] Section 1027(o) of the Dodd-Frank Act provides that ''No provision of this title shall be construed as conferring authority on the Bureau to establish a usury limit applicable to an extension of credit offered or made by a covered person to a consumer, unless explicitly authorized by law.'' 12 U.S.C. 5517(o).

[417] Some State officials expressed concern that the identification of unfair and abusive acts or practices in this rulemaking may be construed to affect or limit provisions in State statutes or State case law. The Bureau has identified unfair and abusive acts or practices under the statutory definitions in section 1031(c) and (d) of the Dodd-Frank Act. The final rule is not intended to limit the further development of State laws protecting consumers from unfair or deceptive acts or practices as defined under State laws, or from similar conduct prohibited by State laws, consistent with the principles set forth in the Dodd-Frank Act as discussed further above.

[418] *See, e.g., Hillsborough County* v. *Automated Med. Laboratories,* 471 U.S. 707, 713 (1985).

[419] *See, e.g.,* 15 U.S.C. 1610(a)(1) & 12 CFR 1026.28 (TILA & Regulation Z); 15 U.S.C. 1691d(f) & 12 CFR 1002.11 (ECOA & Regulation B).

[420] *See, e.g., Johnson* v. *Robison,* 415 U.S. 361, 368 (1974); *Public Utils. Comm'n* v. *United States,* 355 U.S. 534, 539 (1958).

combination of Title XII and section 1022 of the Dodd-Frank Act evidence Congress's intent to not grant the Bureau authority to issue a rule that reduces the availability of payday loans. There is nothing in either the plain language or structure of the Dodd-Frank Act to suggest that Congress intended the Bureau to postpone any regulation of unfair and abusive payday lending practices until after Treasury had established the multiyear grant program that Congress authorized Treasury to establish. Indeed, it is noteworthy that Title XII does not mandate that Treasury create such programs—it merely authorizes Treasury to do so. Moreover, contrary to the commenter's assertions, the final rule will not end payday lending and it will not undermine the rationale for the grants for which Congress provided in Title XII. There is no basis to conclude that the Bureau is under any obligation to wait for such grant programs to play out to prevent UDAAPs.

Some industry commenters have made the claim that the Bureau had impermissibly prejudged the evidence about whether and how to proceed with this rule and failed to comply with its own ex parte policy by engaging in improper communications with special interest groups prior to the publication of the notice of proposed rulemaking. The Bureau does not agree with these claims for several reasons. First, part III of the final rule, which summarizes in detail the Bureau's rulemaking process, shows that these claims are without basis. That discussion reflects the Bureau's considerable experience with these issues and with this market for over five years of steady work. It also includes a description of the Bureau's approach to handling the great volume of public comments received on the proposed rule, as well as a number of ex parte communications, which have been documented and incorporated into the administrative record and are available to the public at *www.regulations.gov.* Second, both the proposed rule and the final rule are based on the Bureau's careful review of the relevant evidence, including evidence generated by the Bureau's own studies, as well as evidence submitted by a broad range of stakeholders, including industry stakeholders. Finally, the numerous changes made in the final rule in response to stakeholder comments, including industry stakeholders, is further evidence that the Bureau has not prejudged any issues.

A number of industry commenters have argued that the rule conflicts with the Bureau's statutory purpose under section 1021(b)(4) of the Dodd-Frank Act, which is to enforce the law consistently for all persons, regardless of their status as depository institutions, because it addresses covered loans but does not address other types of financial products, such as overdraft services or credit card accounts. The Bureau notes in response that each of these products has its own features, characteristics, historical background, and prior regulatory treatment, as discussed further in the section-by-section analysis of § 1041.3(d). Just as it has not been judged to be impermissibly inconsistent for Federal and State authorities (including the Congress) to treat these distinct products differently as a matter of statutory law and regulation, despite certain similarities of product features and uses, even so it is not inconsistent for the Bureau to do so for the purposes of this rule. Further, while it may be true that more nonbanks will be impacted by this rule than banks by virtue of the products that banks and nonbanks are currently providing, that does not mean that this rule conflicts with section 1021(b)(4), but simply reflects the current makeup of this marketplace.

Finally, and more narrowly, some Tribal and industry commenters have averred that the Bureau lacks authority to adopt regulations pursuant to section 1031 of the Dodd-Frank Act that apply to Indian tribes or to any of the entities to which they have delegated Tribal authority. These arguments raised on behalf of Tribal lenders have also been raised in Tribal consultations that the Bureau has held with federally recognized Indian Tribes, as discussed in part III, and in various court cases to date. They rest on what the Bureau believes is a misreading of the Act and of Federal law and precedents governing the scope of Tribal immunity, positions that the Bureau has briefed extensively to the Federal courts in some key cases testing these issues.[421]

[421] *See CFPB* v. *Great Plains Lending,* 846 F.3d 1049 (9th Cir. 2017), *reh'g denied* (Apr. 5, 2017) (Court of Appeals affirmed District Court ruling upholding and enforcing the Bureau's authority to issue civil investigative demands to payday lenders claiming Tribal affiliation and rejecting their claim of ''tribal sovereign immunity''; a petition for certiorari to the Supreme Court is now pending); *see also Otoe-Missouria Tribe of Indians* v. *New York State Dep't of Fin. Servs.,* 769 F.3d 105, 107 (2d Cir. 2014) (upholding the State's claim to be able to be able to pursue an enforcement action against payday lenders claiming Tribal affiliation that ''provide short-term loans over the Internet, all of which have triple-digit interest rates that far exceed the ceiling set by New York law;'' the Bureau filed an amicus curiae brief in support of the State's position).

V. Section-by-Section Analysis

Subpart A—General

Section 1041.1 Authority and Purpose

Proposed § 1041.1 provided that the rule is being issued pursuant to Title X of the Dodd-Frank Wall Street Reform and Consumer Protection Act.[422] It also provided that the purpose of this part is to identify certain unfair and abusive acts or practices in connection with certain consumer credit transactions; to set forth requirements for preventing such acts or practices; and to prescribe requirements to ensure that the features of those consumer credit transactions are fully, accurately, and effectively disclosed to consumers. It also noted that this part prescribes processes and criteria for registration of information systems.

The Bureau did not receive any comments on proposed § 1041.1 and is finalizing this provision as proposed.

Section 1041.2 Definitions

Proposed § 1041.2 set forth definitions for certain terms relevant to the proposal. Additional definitions were set forth in proposed §§ 1041.3, 1041.5, 1041.9, 1041.14, and 1041.17 for further terms used in those respective sections. To the extent those definitions are used in the final rule and have not been moved into § 1041.2, as discussed below, they are addressed in the context of those particular sections (some of which have been renumbered in the final rule).

In general, the Bureau proposed to incorporate a number of defined terms under the Dodd-Frank Act and under other statutes or regulations and related commentary, particularly Regulation Z and Regulation E as they implement the Truth in Lending Act (TILA)[423] and the Electronic Fund Transfer Act (EFTA),[424] respectively. The Bureau believed that basing the proposal's definitions on previously defined terms may minimize regulatory uncertainty and facilitate compliance, especially where the other regulations are likely to apply to the same transactions in their own right. However, as discussed further below, the Bureau proposed, in certain definitions, to expand or modify the existing definitions or the concepts enshrined in such definitions for purposes of the proposal to ensure that the rule had its intended scope of effect, particularly as industry practices may evolve.

[422] Public Law 111–203, 124 Stat. 1376, 1955 (2010).

[423] Public Law 90–321, 82 Stat. 146 (1968).

[424] Public Law 95–630, 92 Stat. 3641 (1978).

The Bureau received numerous comments about these proposed terms and their definitions, as well as some suggestions to define additional concepts left undefined in the proposal. The Bureau is finalizing § 1041.2 with some revisions and deletions from the proposal, as discussed further below, including the addition of a rule of construction as § 1041.2(b) to provide general guidance concerning the incorporation of terms from other statutes and regulations in the context of part 1041.

2(a) Definitions

2(a)(1) Account

Proposed § 1041.2(a)(1) would have defined account by cross-referencing to the definition of that same term in Regulation E, 12 CFR part 1005. Regulation E generally defines account to include demand deposit (checking), savings, or other consumer asset accounts (other than an occasional or incidental credit balance in a credit plan) held directly or indirectly by a financial institution and established primarily for personal, family, or household purposes.[425] The term account was also used in proposed § 1041.3(c), which would provide that a loan is a covered loan if, among other requirements, the lender or service provider obtains repayment directly from a consumer's account. This term was also used in proposed § 1041.14, which would impose certain requirements when a lender seeks to obtain repayment for a covered loan directly from a consumer's account, and in proposed § 1041.15, which would require lenders to provide notices to consumers before attempting to withdraw payments from consumers' accounts. The Bureau stated that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau considered the Regulation E definition to be appropriate because that definition is broad enough to capture the types of transactions that may implicate the concerns addressed by this part. Proposed comment 2(a)(1)–1 also made clear that institutions may rely on 12 CFR 1005.2(b) and its related commentary in determining the meaning of account.

One commenter stated that the definition of account should be expanded to include general-use prepaid cards, regardless of whether they are labeled and marketed as a gift card, as defined in 12 CFR 1005.20(a)(3). The Bureau recently finalized a separate rule creating comprehensive consumer protections for prepaid accounts, and in the process amended the definition of account in 12 CFR 1005.2(b) to include ''a prepaid account,'' so the thrust of the comment is already effectively addressed.[426] The definition of ''prepaid account'' in that rulemaking only excludes gift cards that are both labeled and marketed as a gift card, which are subject to separate rules under Regulation E.[427] The Bureau does not believe that such products are likely to be tendered as a form of leveraged payment mechanism, but will monitor the market for this issue and take appropriate action if it appears that lenders are using such products to evade coverage under the rule. The Bureau did not receive any other comments on this portion of the proposal and is finalizing this definition as proposed. Proposed comment 2(a)(1)–1 has now been incorporated into comment 2(b)(1)–1 to illustrate the broader rule of construction discussed in § 1041.2(b).

2(a)(2) Affiliate

Proposed § 1041.2(a)(2) would have defined affiliate by cross-referencing to the definition of that same term in the Dodd-Frank Act, 12 U.S.C. 5481(1). The Dodd-Frank Act defines affiliate as any person that controls, is controlled by, or is under common control with another person. Proposed §§ 1041.6 and 1041.10 would have imposed certain limitations on lenders making loans to consumers who have outstanding covered loans with an affiliate of the lender, and the Bureau's analyses of those proposed sections discussed in more detail the particular requirements related to affiliates. The Bureau stated that defining this term in the proposal consistently with the Dodd-Frank Act would reduce the risk of confusion among consumers, industry, and regulators. Although the limitations in proposed §§ 1041.6 and 1041.10 are not being finalized, the final rule includes a number of other provisions in which the term affiliate is used, including the conditional exemption in § 1041.3(f). The Bureau did not receive any comments on this portion of the proposal and is finalizing this definition as proposed.

2(a)(3) Closed-End Credit

Proposed § 1041.2(a)(3) would have defined closed-end credit as an extension of credit to a consumer that is not open-end credit under proposed § 1041.2(a)(14). This term is used in various parts of the rule where the Bureau proposed to tailor provisions specifically for closed-end and open-end credit in light of their different structures and durations. Most notably, proposed § 1041.2(a)(18) prescribed slightly different methods of calculating the total cost of credit for closed-end and open-end credit. Proposed § 1041.16(c) also required lenders to furnish information about whether a covered loan is closed-end or open-end credit to registered information systems. Proposed comment 2(a)(3)–1 also made clear that institutions may rely on 12 CFR 1026.2(a)(10) and its related commentary in determining the meaning of closed-end credit, but without regard to whether the credit is consumer credit or is extended to a consumer, as those terms are defined in 12 CFR 1026.2(a).

The Bureau did not receive any comments on the definition of closed-end credit contained in the proposal and is finalizing the definition and commentary as proposed. The Bureau did, however, receive a number of comments on the definition of open-end credit contained in the proposal and made some changes to that definition in light of the comments received, all as discussed below. Because the term closed-end credit is defined in contradistinction to the term open-end credit, the changes made to the latter definition will affect the parameters of this definition as well.

2(a)(4) Consumer

Proposed § 1041.2(a)(4) would have defined consumer by cross-referencing the definition of that term in the Dodd-Frank Act, which defines consumer as an individual or an agent, trustee, or representative acting on behalf of an individual.[428] The term is used in numerous provisions across proposed part 1041 to refer to applicants for and borrowers of covered loans. The Bureau stated that this definition, rather than the arguably narrower Regulation Z definition of consumer—which defines consumer as ''a cardholder or natural person to whom consumer credit is offered or extended''—is appropriate to

[425] Regulation E also specifically includes payroll card accounts and certain government benefit card accounts. As specifically noted in the proposal here, 81 FR 47864, 47904 n.416 (July 22, 2016), the Bureau was considering in a separate rulemaking whether to provide comprehensive consumer protections under Regulation E to a broader category of prepaid accounts. The Bureau later finalized that proposed rule. *See* 81 FR 83934 (Nov. 22, 2016).

[426] *See* 81 FR 83934, 83965–83978, 84325–84326 (Nov. 22, 2016).

[427] *See* 81 FR 83934, 83976–83978 (Nov. 22, 2016) (discussing § 1005.2(b)(3)(ii)(D) and comment 2(b)(3)(ii)–3 of the final prepaid rule.).

[428] 12 U.S.C. 5481(4).

capture the types of transactions that may implicate the concerns addressed by the proposed rule. In particular, the definition of this term found in the Dodd-Frank Act expressly includes agents and representatives of individuals, rather than just individuals themselves. The Bureau believed this definition might more comprehensively foreclose possible evasion of the specific consumer protections imposed by proposed part 1041 than would the definition found in Regulation Z. The Bureau did not receive any comments on this portion of the proposal and is finalizing this definition as proposed.

2(a)(5) Consummation

Proposed § 1041.2(a)(5) would have defined consummation as the time that a consumer becomes contractually obligated on a new loan, which is consistent with the definition of the term in Regulation Z § 1026.2(a)(13), or the time that a consumer becomes contractually obligated on a modification of an existing loan that increases the amount of the loan. The proposal used the term both in defining certain categories of covered loans and in defining the timing of certain proposed requirements. The time of consummation was important both in applying certain proposed definitions for purposes of coverage and in applying certain proposed substantive requirements. For example, under proposed § 1041.3(b)(1), whether a loan is a covered short-term loan would depend on whether the consumer is required to repay substantially all of the loan within 45 days of consummation. Under proposed § 1041.3(b)(2)(i), the determination of whether a loan is subject to a total cost of credit exceeding 36 percent per annum would be made at the time of consummation. Pursuant to proposed §§ 1041.6 and 1041.10, certain limitations would potentially apply to lenders making covered loans based on the consummation dates of those loans. Pursuant to proposed § 1041.15(b), lenders would have to furnish certain disclosures before a loan subject to the requirements of that section is consummated.

In the proposal, the Bureau stated that defining this term consistently with Regulation Z with respect to new loans would reduce the risk of confusion among consumers, industry, and regulators. Proposed comment 2(a)(5)–1 also made clear that the question of when a consumer would become contractually obligated with regard to a new loan is a matter to be determined under applicable law; for example, a contractual commitment agreement that binds the consumer to the loan would be a consummation. However, the comment stated that consummation does not occur merely because the consumer has made some financial investment in the transaction (for example, by paying a non-refundable fee), unless applicable law holds otherwise. The Bureau also provided guidance as to consummation with respect to particular loan modifications, so as to further the intent of proposed §§ 1041.3(b)(1) and (2), 1041.5(b), and 1041.9(b), all of which would impose requirements on lenders as of the time that the loan amount increases on an existing loan. The Bureau concluded that defining these increases in loan amounts as consummations would improve clarity for consumers, industry, and regulators. The above-referenced sections, as proposed, would impose no duties or limitations on lenders when a loan modification decreases the amount of the loan. Accordingly, in addition to incorporating Regulation Z commentary as to the general definition of consummation for new loans, proposed comment 2(a)(5)–2 explained the time at which certain modifications of existing loans would be considered to be a consummation for purposes of the rule. Proposed comment 2(a)(5)–2 explained that a modification would be considered a consummation if the modification increases the amount of the loan. Proposed comment 2(a)(5)–2 also explained that a cost-free repayment plan, or ''off-ramp'' as it is commonly known in the market, would not result in a consummation under proposed § 1041.2(a)(5).

In the proposal, the Bureau stated that it considered expressly defining a new loan in order to clarify when lenders would need to make the ability-to-repay determinations prescribed in proposed §§ 1041.5 and 1041.9. The definition that the Bureau considered would have defined a new loan as a consumer-purpose loan made to a consumer that (a) is made to a consumer who is not indebted on an outstanding loan, (b) replaces an outstanding loan, or (c) modifies an outstanding loan, except when a repayment plan, or ''off-ramp'' extends the term of the loan and imposes no additional fees.

Although some commenters requested more guidance to distinguish a loan modification from an instance of re-borrowing or a loan refinancing, the Bureau has concluded that the examples provided in the commentary sufficiently address all of the relevant scenarios where ambiguity could arise about whether consummation occurs. No other comments were received on any other aspect of this portion of the proposal. The Bureau has reworded parts of comment 2(a)(5)–2 for clarity in describing what types of loan modifications trigger substantive requirements under part 1041, but otherwise is finalizing this definition and the commentary as proposed.

2(a)(6) Cost of Credit

Proposed § 1041.2(a)(18) set forth the method for lenders to calculate the total cost of credit to determine whether a longer-term loan would be covered under proposed § 1041.3(b)(2). Proposed § 1041.2(a)(18) generally would have defined the total cost of credit as the total amount of charges associated with a loan expressed as a per annum rate, including various charges that do not meet the definition of finance charge under Regulation Z. The charges would be included even if they were paid to a party other than the lender. The Bureau proposed to adopt this approach to defining loan costs from the Military Lending Act, and also to have adopted the MLA's 36 percent threshold in defining what covered longer-term loans were subject to part 1041. The effect would have been that a loan with a term of longer than 45 days must have a total cost of credit exceeding a rate of 36 percent per annum in order to be a covered loan. The Bureau thus proposed using an all-in measure of the total cost of credit rather than the definition of annual percentage rate (APR) under Regulation Z because it was concerned that lenders might otherwise shift their fee structures to fall outside traditional Regulation Z concepts. This in turn would lead them to fall outside the proposed underwriting criteria for covered longer-term loans, which they could do, for example, by imposing charges in connection with a loan that are not included in the calculation of APR under Regulation Z.

The Bureau acknowledged that lenders were less familiar with the approach involving the MLA calculations than they are with the more traditional APR approach and calculations under Regulation Z. Therefore, the Bureau specifically sought comment on the compliance burdens of the proposed approach and whether to use the more traditional APR approach instead.

The Bureau received many comments on the definition of the total cost of credit, which reflected its functional position in the proposed rule as the trigger for the additional underwriting criteria applicable to covered longer-term loans. A number of comments addressed what kinds of fees and charges should be included or excluded from the total cost of credit and demanded more technical guidance,

which reflected the increased complexity of using this method. One lender noted a specific loan program that would only be included in the rule because of the inclusion of participation fees in the proposed definition. Various commenters noted the greater simplicity of the APR calculation in Regulation Z, and contended that greater burdens would be imposed and less clarity achieved by applying the proposed definition of total cost of credit. The latter, they suggested, would confuse consumers who are accustomed to Regulation Z's APR definition, would be difficult to administer properly, and would be likely to have unintended consequences, such as causing many lenders to choose not to offer optional ancillary products like credit life and disability insurance, to the detriment of borrowers. Consumer groups, by contrast, generally preferred the proposed definition of total cost of credit, though they offered suggestions to tighten and clarify it in several respects.

As noted earlier, the Bureau is not finalizing the portions of the proposed rule governing underwriting criteria for covered longer-term loans at this time. Given that covered longer-term loans are only subject to the payment requirements in subpart C, and in view of the comments received, the Bureau concludes that the advantages of simplicity and consistency militate in favor of adopting an APR threshold as the measure of the cost of credit, which is widely accepted and built into many State laws, and which is the cost that will be disclosed to consumers under Regulation Z. Moreover, the Bureau believes that the other changes in the rule mean that the basis for concern that lenders would shift their fee structures to fall outside traditional Regulation Z definitions has been reduced. Instead, the cost-of-credit threshold is now relevant only to determine whether the portions of the final rule governing payments apply to longer-term loans, which the Bureau has concluded are much less likely to prompt lenders to seek to modify their fee structures simply to avoid the application of those provisions.

The Bureau notes that in determining here that the Regulation Z definition of cost of credit would be simpler and easier to use for the limited purpose of defining the application of the payment provisions of subpart C of this rule, the Bureau does not intend to decide or endorse this measure of the cost of credit—as contrasted with the total cost of credit adopted under the MLA—for any subsequent rule governing the underwriting of covered longer-term loans without balloons. The stricter and more encompassing measure used for the MLA rule may well be more protective of consumers,[429] and the Bureau will consider the applicability of that measure as it considers how to address longer-term loans in a subsequent rule.

To effectuate this change, the Bureau has adopted as the final rule's defined term ''cost of credit,'' which is an APR threshold rather than a threshold based on the total cost of credit as defined in the proposed rule. The cost of credit is defined to be consistent with Regulation Z and thus includes finance charges associated with the credit as stated in Regulation Z, 12 CFR 1026.4. As discussed further below in connection with § 1041.3(b)(3), for closed-end credit, the total cost of credit must be calculated at consummation and according to the requirements of Regulation Z, 12 CFR 1026.22, but would not have to be recalculated at some future time, even if a leveraged payment mechanism is not obtained until later. For open-end credit, the total cost of credit must be calculated at consummation and, if it does not cross the 36 percent threshold at that time, at the end of each billing cycle thereafter according to the rules for calculating the effective annual percentage rate for a billing cycle as stated in Regulation Z, 12 CFR 1026.14(c) and (d). This is a change from the proposal in order to determine coverage in situations in which there may not be an immediate draw, which was not expressly addressed in the proposal.

The Bureau has concluded that defining the term cost of credit consistently with Regulation Z would reduce the risk of confusion among consumers, industry, and regulators. It also reduces burden and avoids undue complexities, especially now that the Bureau is not finalizing the underwriting criteria that were proposed for covered longer-term loans at this time. For these reasons, the Bureau is finalizing the definition of cost of credit in a manner consistent with the discussion above, as renumbered, and with some minor additional wording revisions from the proposed rule for clarity and consistency. The proposed commentary associated with the term total cost of credit is no longer relevant and has been omitted from the final rule.

[429] In particular, the Bureau notes the statement that the Department of Defense made in the MLA rule that ''unqualified exclusions from the MAPR [military annual percentage rate] for certain fees, or all non-periodic fees, could be exploited by a creditor who would be allowed to preserve a high-cost, open-end credit product by offering a relatively lower periodic rate coupled with an application fee, participation fee, or other fee,'' in declining to adopt any such exclusions, which indicates the more protective nature of a ''total cost of credit'' definition when coupled with such further measures as necessary to protect consumers. 80 FR 43563.

2(a)(7) Covered Longer-Term Balloon-Payment Loan

Proposed § 1041.2(a)(7) would have defined a covered longer-term balloon-payment loan as a covered longer-term loan described in proposed § 1041.3(b)(2)—as further specified in the next definition below—where the consumer is required to repay the loan in a single payment or through at least one payment that is more than twice as large as any other payment(s) under the loan. Proposed § 1041.9(b)(2) contained certain rules that lenders would have to follow when determining whether a consumer has the ability to repay a covered longer-term balloon-payment loan. Moreover, some of the restrictions imposed in proposed § 1041.10 would apply to covered longer-term balloon-payment loans in certain situations.

The term covered longer-term balloon-payment loan would include loans that are repayable in a single payment notwithstanding the fact that a loan with a ''balloon'' payment is often understood in other contexts to mean a loan repayable in multiple payments with one payment substantially larger than the other payments. In the proposal, the Bureau found as a preliminary matter that both structures pose similar risks to consumers, and proposed to treat both types of loans the same way for the purposes of proposed §§ 1041.9 and 1041.10. Accordingly, the Bureau proposed to use a single defined term for both loan types to improve the proposal's readability.

Apart from including single-payment loans within the definition of covered longer-term balloon-payment loans, the proposed term substantially tracked the definition of balloon payment contained in Regulation Z § 1026.32(d)(1), with one additional modification. The Regulation Z definition requires the larger loan payment to be compared to other regular periodic payments, whereas proposed § 1041.2(a)(7) required the larger loan payment to be compared to any other payment(s) under the loan, regardless of whether the payment is a regular periodic payment. Proposed comments 2(a)(7)–2 and 2(a)(7)–3 explained that payment in this context means a payment of principal or interest, and excludes certain charges such as late fees and payments that are accelerated upon the consumer's default. Proposed comment 2(a)(7)–1 would have specified that a

loan described in proposed § 1041.3(b)(2) is considered to be a covered longer-term balloon-payment loan if the consumer must repay the entire amount of the loan in a single payment.

A coalition of consumer advocacy groups commented that this proposed definition is under-inclusive because it fails to include other loans that create risk that consumers will need to re-borrow because larger payments inflict payment shock on the borrowers. The commenter suggested that a more appropriate definition would be the one found in the North Carolina Retail Installment Sales Act, which defines a balloon payment as a payment that is more than 10 percent greater than other payments, except for the final payment, which is a balloon payment if it is more than 25 percent greater than other payments. In light of this comparison, the commenter recommended that any payment that is 10 percent greater than any other payment should be considered a balloon payment.

The Bureau recognizes these concerns, but notes that the proposed definition is generally consistent with how balloon-payment loans are defined and treated under Regulation Z, and therefore believes that adopting that definition for purposes of this rule would promote consistency and reduce the risk of confusion among consumers, industry, and regulators. The Bureau will be alert to the risk that smaller irregular payments that are not as large as twice the amount of the other payments could still cause expense shock for some consumers and lead to the kinds of problems addressed here, and thus could trigger a finding of unfairness or abusiveness in particular circumstances. In addition, the Bureau has experience with the rules adopted to implement the Military Lending Act, where loan products and lending practices adopted by some lenders in this industry evolved to circumvent the provisions of those rules. In particular, as noted in the proposal, lenders began offering payday loans greater than 91 days in duration and vehicle title loans greater than 181 days in duration, along with open-end products, in a direct response intended to evade the MLA rules—a development that prompted further Congressional and regulatory intervention. If problems begin to appear in this market from practices that are intended to circumvent the provisions of this rule, the Bureau and other regulators would be able to address any unfair or abusive practices with respect to such loan products through supervision or enforcement authority, or by amending this rule to broaden the definition.

Some industry commenters contended that the Bureau's concerns about re-borrowing for covered longer-term loans were most applicable to loans with balloon-payment structures, and they therefore argued that any ability-to-repay restrictions and underwriting criteria should be limited to longer-term balloon-payment loans. The Bureau agrees that many of its concerns about covered longer-term balloon-payment loans are similar to its concerns about covered short-term loans. Yet the Bureau also has considerable concerns about certain lending practices with respect to other covered longer-term loans, and will continue to scrutinize those practices under its supervision and enforcement authority and in a future rulemaking. At this time, however, as described more fully below in the section on Market Concerns—Underwriting, the Bureau has observed longer-term loans involving balloon payments where the lender does not reasonably assess the borrower's ability to repay before making the loan, and in those circumstances it has observed many of the same types of consumer harms that it has observed when lenders fail to reasonably assess the borrower's ability to repay before making covered short-term loans.

As noted in part I, for a number of reasons the Bureau has decided not to address the underwriting of all covered longer-term loans at this time. Nonetheless, as just mentioned and as discussed more fully below in Market Concerns—Underwriting, the Bureau is concerned that if subpart B is not applied to covered longer-term balloon-payment loans, then lenders would simply extend the terms of their current short-term products beyond 45 days, without changing the payment structures of those loans or their current inadequate underwriting practices, as a way to circumvent the underwriting criteria for covered short-term loans. As stated above, the balloon-payment structure of these loans tend to pose very similar risks and harms to consumers as for covered short-term loans, including likely poses similar forecasting problems for consumers in repaying such loans. Therefore, in § 1041.5 of the final rule, the specific underwriting criteria that apply to covered short-term loans are made applicable to covered longer-term balloon-payment loans also. The Bureau has also modified the definition of covered longer-term balloon-payment loan so that it applies to all loans with the payment structures described in the proposal. This represents an expansion in scope as compared to the proposal, as longer-term balloon-payment loans are now being covered without regard to the cost of credit or whether the lender has taken a leveraged payment mechanism in connection with the loan. In the proposal, the Bureau specifically sought comment on this potential modification, and the reasons for it are set out more extensively below in Market Concerns—Underwriting. And along with other covered longer-term loans, these particular loans remain covered by the sections of the final rule on payments as well.

In light of the decision to treat covered longer-term balloon-payment loans differently from other covered longer-term loans, the Bureau decided to shift the primary description of the requirements for covered longer-term balloon-payment loans to § 1041.3(b)(2). Accordingly, the language of § 1041.2(a)(7) of the final rule has been revised to mirror the language of § 1041.2(a)(8) and (10), which simply cross-reference the descriptions of the various types of covered loans specified in proposed § 1041.3(b). As a housekeeping matter, therefore, the substantive definition for longer-term balloon-payment loans is now omitted from this definition and is addressed instead in a comprehensive manner in § 1041.3(b)(2) of this final rule, where it has been expanded to address in more detail various loan structures that constitute covered longer-term balloon-payment loans. For the same reason, proposed comments 2(a)(7)–1 to 2(a)(7)–3 are omitted from the final rule and those matters are addressed in comments 3(b)(2)–1 to 3(b)(2)–4 of the final rule, as discussed below.

The term covered longer-term balloon-payment loan is therefore defined in the final rule as a loan described in § 1041.3(b)(2).

2(a)(8) Covered Longer-Term Loan

Proposed § 1041.2(a)(8) would have defined a covered longer-term loan to be a loan described in proposed § 1041.3(b)(2). That proposed section, in turn, described a covered loan as one made to a consumer primarily for personal, family, or household purposes that is not subject to any exclusions or exemptions, and which can be either: (1) Closed-end credit that does not provide for multiple advances to consumers, where the consumer is not required to repay substantially the entire amount due under the loan within 45 days of consummation; or (2) all other loans (whether open-end credit or closed-end credit), where the consumer is not required to repay

substantially the entire amount of the advance within 45 days of the advance under the loan and, in either case, two other conditions are satisfied—the total cost of credit for the loan exceeds an annual rate of 36 percent, as measured at specified times; and the lender or service provider obtains a leveraged payment mechanism, including but not limited to vehicle security, at specified times.

Some restrictions in proposed part 1041 would have applied only to covered longer-term loans described in proposed § 1041.3(b)(2). For example, proposed § 1041.9 would have prescribed the ability-to-repay determination that lenders are required to perform when making covered longer-term loans. Proposed § 1041.10 would have imposed limitations on lenders making covered longer-term loans to consumers in certain circumstances that may indicate the consumer lacks the ability to repay. The Bureau proposed to use a defined term for the loans described in proposed § 1041.3(b)(2) for clarity.

The Bureau received many comments on this definition that focused primarily on whether the definition was appropriate for purposes of the proposed underwriting requirements or for inclusion in the rulemaking generally, rather than with regard to the payment interventions in particular. A law firm representing a traditional installment lending client commented that the definition of covered longer-term loan in the proposed rule would include traditional installment loans to a greater extent than the Bureau anticipated, with a correspondingly larger impact on credit availability as installment lenders would be forced to replace their proven underwriting techniques with burdensome and untried approaches. Others contended that the Bureau had presented no evidence indicating that the practices associated with traditional installment loans are unfair or abusive.

Several commenters noted that a number of traditional installment loan products may exceed a total cost of credit of 36 percent, and some may even exceed a 36 percent annual percentage rate under TILA as well. A trade association said that such a stringent all-in annual percentage rate could encompass many bank loan products. More broadly, some commenters criticized the use of any form of interest rate threshold to determine the legal status of any loans as potentially violating the prohibition in section 1027(o) of the Dodd-Frank Act against imposing usury limits on extensions of consumer credit.

Many commenters offered their views on the prong of the definition that focused on the taking of a leveraged payment mechanism or vehicle security, again often in the context of application of the underwriting requirements rather than the payment requirements. Those concerns have largely been addressed or mooted by the Bureau's decisions to apply only the payment requirements to covered longer-term loans and to narrow the definition of such loans to focus only on those types of leveraged payment mechanisms that involve the ability to pull money from consumers' accounts, rather than vehicle security. Comments focusing on that narrower definition of leveraged payment mechanism are addressed in more depth in connection with § 1041.3(c) below.

Therefore, in light of these comments and the considerations discussed above and in connection with § 1041.3(b)(3) below, the Bureau is finalizing the definition of covered longer-term loan in § 1041.2(a)(8) as discussed, with the cross-reference to proposed § 1041.3(b)(2) now edited and renumbered as § 1041.3(b)(3). As for the latter section now referenced in this definition, it too has been edited to clarify that covered longer-term loans no longer encompass covered longer-term balloon-payment loans, which are now treated separately, as the former are no longer subject to specific underwriting criteria whereas the latter are subject to the same specific underwriting criteria as covered short-term loans, which are set out in § 1041.5 of the final rule.

The term covered longer-term loan is therefore defined in the final rule, as described in § 1041.3(b)(3), as one made to a consumer primarily for personal, family, or household purposes that is not subject to any exclusions or exemptions, and which can be neither a covered short-term loan nor a covered longer-term balloon-payment loan—and thus constitutes a covered longer-term loan without a balloon-payment structure—and which meets both of the following conditions: The cost of credit for the loan exceeds a rate of 36 percent per annum; and the lender or service provider obtains a leveraged payment mechanism as defined in § 1041.3(c) of the final rule.

The details of that description, and how it varies from the original proposed description of a covered longer-term loan, are provided and explained more fully in the section-by-section analysis of § 1041.3(b)(3) of the final rule.

2(a)(9) Covered Person

The Bureau has decided to include in the final rule a definition of the term covered person, which the final rule defines by cross-referencing the definition of that same term in the Dodd-Frank Act, 12 U.S.C. 5481(6). In general, the Dodd-Frank Act defines covered person as any person that engages in offering or providing a consumer financial product or service and any affiliate of such person if the affiliate acts as a service provider to such person. The Bureau concludes that defining the term covered person consistently with the Dodd-Frank Act is a mere clarification that reduces the risk of confusion among consumers, industry, and regulators, since this term is used throughout the final rule. The Bureau therefore is including this definition in the final rule as § 1041.2(a)(9).

2(a)(10) Covered Short-Term Loan

Proposed § 1041.2(a)(6) would have defined a covered short-term loan to be a loan described in proposed § 1041.3(b)(1). That proposed section, in turn, described a covered loan as one made to a consumer primarily for personal, family, or household purposes that is not subject to any exclusions or exemptions, and which can be either: Closed-end credit that does not provide for multiple advances to consumers, where the consumer is required to repay substantially the entire amount due under the loan within 45 days of consummation, or all other loans (whether open-end credit or closed-end credit), where the consumer is required to repay substantially the entire amount of the advance within 45 days of the advance under the loan. Some provisions in proposed part 1041 would apply only to covered short-term loans as described in proposed § 1041.3(b)(1). For example, proposed § 1041.5 would prescribe the ability-to-repay determination that lenders are required to perform when making covered short-term loans. Proposed § 1041.6 would impose limitations on lenders making sequential covered short-term loans to consumers. And proposed § 1041.16 would impose the payment provisions on covered short-term loans as well. The Bureau proposed to use a defined term for the loans described in § 1041.3(b)(1) for clarity.

Various commenters stated that this definition is extraordinarily broad and sweeps in many different types of short-term loans, and institutions and trade associations both argued for exempting the types of loans they or their members commonly make. For example, one credit union commenter argued that the Bureau should exclude loans with total cost of credit under 36 percent. Consumer advocates argued, to the contrary, that broad coverage under the

proposed rule is necessary to capture the relevant market, which can differ legally and functionally from one State to another. The Bureau finds that covered short-term loans pose substantial risks and harms for consumers, as it has detailed more thoroughly below in Market Concerns—Underwriting and the section-by-section analysis for § 1041.4 of the final rule. At the same time, the Bureau is adopting various exclusions and exemptions from coverage under the rule in § 1041.3(d), (e), and (f) below, and has discussed commenters' requests for exclusions of various categories of loans and lenders in connection with those provisions. The Bureau has expanded the alternative loan exclusion, which now triggers off of cost of credit as defined under Regulation Z, and thus, it appears likely that the products of the credit union noted above are excluded. In light of the aggregate effect of this broad definition coupled with those exclusions and exemptions, the Bureau concludes that its definition of covered short-term loan is specific, yet necessarily broad in its coverage, in order to effectuate protections for consumers against practices that the Bureau has found to be unfair and abusive in the market for these loans. The Bureau is finalizing as proposed other than renumbering. Likewise, the provision referenced in this definition—proposed § 1041.3(b)(1)—is being finalized with only non-substantive language changes, though additional commentary on that provision has been added in the final rule and will be addressed below in the discussion of that portion of the rule.

2(a)(11) Credit

Proposed § 1041.2(a)(9) would have defined credit by cross-referencing the definition of credit in Regulation Z, 12 CFR part 1026. Regulation Z defines credit as the right to defer payment of debt or to incur debt and defer its payment. This term was used in numerous places throughout the proposal to refer generically to the types of consumer financial products that would be subject to the requirements of proposed part 1041. The Bureau stated that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau also stated that the definition in Regulation Z is appropriately broad so as to capture the various types of transaction structures that implicate the concerns addressed by proposed part 1041. Proposed comment 2(a)(9) further made clear that institutions may rely on 12 CFR 1026.2(a)(14) and its related commentary in determining the meaning of credit.

One consumer group commented that the definition of credit did not include a definition of loan and that these commonly related terms should be clarified to avoid the potential for confusion—a point that is addressed in §§ 1041.2(a)(13) and 1041.3(a) of the final rule. The Bureau did not receive any other comments on this portion of the proposal and is finalizing this definition and the commentary as proposed.

2(a)(12) Electronic Fund Transfer

Proposed § 1041.2(a)(10) would have defined electronic fund transfer by cross-referencing the definition of that same term in Regulation E, 12 CFR part 1005. Proposed § 1041.3(c) would provide that a loan may be a covered longer-term loan if the lender or service provider obtains a leveraged payment mechanism, which can include the ability to withdraw payments from a consumer's account through an electronic fund transfer. Proposed § 1041.14 would impose limitations on how lenders use various payment methods, including electronic fund transfers. Proposed comment 2(a)(10)–1 also made clear that institutions may rely on 12 CFR 1005.3(b) and its related commentary in determining the meaning of electronic fund transfer. The Bureau stated that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau did not receive any comments on this portion of the proposal and is finalizing this definition as renumbered and the commentary as proposed.

2(a)(13) Lender

Proposed § 1041.2(a)(11) would have defined lender as a person who regularly makes loans to consumers primarily for personal, family, or household purposes. This term was used throughout the proposal to refer to parties that are subject to the requirements of proposed part 1041. This proposed definition is broader than the general definition of creditor under Regulation Z in that, under this proposed definition, the credit that the lender extends need not be subject to a finance charge as that term is defined by Regulation Z, nor must it be payable by written agreement in more than four installments.

The Bureau proposed a broader definition than in Regulation Z for many of the same reasons that it proposed using the total cost of credit as a threshold for covering longer-term loans rather than the traditional definition of annual percentage rate as defined by Regulation Z, which was discussed in the analyses of §§ 1041.2(a)(11) and 1041.3(b)(2)(i) of the proposed rule. In both instances, the Bureau was concerned that lenders might otherwise shift their fee structures to fall outside of traditional Regulation Z concepts and thus outside the coverage of proposed part 1041. For example, the Bureau stated that some loans that otherwise would meet the requirements for coverage under proposed § 1041.3(b) could potentially be made without being subject to a finance charge as that term is defined by Regulation Z. If the Bureau adopted that particular Regulation Z requirement in the definition of lender, a person who regularly extended closed-end credit subject only to an application fee, or open-end credit subject only to a participation fee, would not be deemed to have imposed a finance charge. In addition, many of the loans that would be subject to coverage under proposed § 1041.3(b)(1) are repayable in a single payment, so those same lenders might also fall outside the Regulation Z trigger for loans payable in fewer than four installments. Thus, the Bureau proposed to use a definition that is broader than the one contained in Regulation Z to ensure that the provisions proposed in part 1041 would apply as intended.

The Bureau proposed to carry over from the Regulation Z definition of creditor the requirement that a person ''regularly'' makes loans to a consumer primarily for personal, family, or household purposes in order to be considered a lender under proposed part 1041. Proposed comment 2(a)(11)–1 explained that the test for determining whether a person regularly makes loans is the same as in Regulation Z, as explained in 12 CFR 1026.2(a)(17)(v), and depends on the overall number of loans made to a consumer for personal, family, or household purposes, not just covered loans. The Bureau stated in the proposal that it would be appropriate to exclude from the definition of lender those persons who make loans for personal, family, or household purposes on an infrequent basis so that persons who only occasionally make loans would not be subject to the requirements of proposed part 1041. Such persons could include charitable, religious, or other community institutions that make loans very infrequently or individuals who occasionally make loans to family members.

Consumer groups noted in commenting on the definition of lender that the proposed rule did not explicitly

define what a loan is and urged the Bureau to include a definition of this term as well, as it is used frequently throughout the rule. They also commented that the definition of lender should be broadened to encompass service providers as well.

For the reasons explained above in the section-by-section analysis of § 1041.2(a)(6), with respect to the definition of the term cost of credit, the Bureau has now narrowed the coverage of longer-term loans by using a threshold that is based on finance charges under Regulation Z rather than the broader range of items included in the proposed definition of total cost of credit. At the same time, it has decided to maintain the broader definition of lender, which includes parties that extend credit even if it is not subject to a finance charge as defined in Regulation Z, nor payable by written agreement in more than four installments. With regard to covered short-term and longer-term balloon-payment loans, the Bureau has concluded that it is important to maintain broad coverage over such products, even if the companies that provide them may try to structure them so as to avoid qualifying as a ''creditor'' under Regulation Z. The reasons for revising the definition of cost of credit, again as explained further below, were driven in large part by the Bureau's decision not to address the underwriting of other covered longer-term loans in this rule at this time, given the benefits of alignment with Regulation Z and greater simplicity. The broader definition of lender remains germane, however, to the types of loans that are subject to the underwriting provisions of the final rule.

In addition, the Bureau does not find it necessary to supplement these definitions further by adding a new definition of loan in addition to the modified definitions of credit and lender. Instead, the Bureau is addressing the commenters' point by modifying the definition of lender in § 1041.2(a)(13) to refer to a person who regularly ''extends credit'' rather than making loans, and has revised § 1041.3(a) to refer to a lender who ''extends credit by making covered loans.'' The loans covered by the final rule are credit as defined in the rule and are made by lenders as defined in the rule. In addition, key subsets of the broader universe of loans—including covered short-term loans, covered longer-term loans, and covered longer-term balloon-payment loans—are also defined explicitly in the final rule. And these definitions are premised in turn on the explication of what is a covered loan in proposed § 1041.3(b).

As for the relationship between the terms lender and service provider, the Bureau is satisfied that these relationships and their effects are addressed in a satisfactory manner by defining lender as set forth here and by including separate definitions of covered person and service provider in conformity to the Dodd-Frank Act, as discussed in § 1041.2(a)(9) and (18) of the final rule. The relationship between lender and service provider is discussed further below in the section-by-section analysis of § 1041.2(a)(18), which concerns the definition of service provider.

One other segment of commenters sought to be excluded or exempted from coverage under this rule, raising many of the same points that they had raised during Bureau outreach prior to release of the proposal.

As stated in the proposal, some stakeholders had suggested to the Bureau that the definition of lender should be narrowed so as to exempt financial institutions that predominantly make loans that would not be covered loans under the proposed rule. They stated that some financial institutions only make loans that would be covered loans as an accommodation to existing customers, and that providing such loans is such a small part of the overall business that it would not be practical for the institutions to develop the required procedures for making covered loans. The Bureau solicited comment on whether it should narrow the definition of lender based on the quantity of covered loans an entity offers, and, if so, how to define such a *de minimis* test. Similarly, during the comment period many commenters, including but not limited to smaller depository institutions, presented their views that this kind of accommodation lending is longstanding and widespread and so should not be subject to coverage under the rule.

At the same time, stakeholders had urged and the Bureau recognized at the time it issued the proposed rule that some newly formed companies are providing services that, in effect, allow consumers to draw on money they have earned but not yet been paid. Certain of these services do not require the consumer to pay any fees or finance charges, relying instead on voluntary ''tips'' to sustain the business, while others are compensated through electronic fund transfers from the consumer's account. Some current or future services may use other business models. The Bureau also noted the existence of some newly formed companies providing financial management services to low- and moderate-income consumers that include features to smooth income. The Bureau solicited comment on whether such entities should be considered lenders under the regulation.

During the public comment period, a coalition of consumer groups, some ''fintech'' firms, and others expressed concern about how the definition of lender would apply to new businesses that are creating services to consumers to access earned income for a fee—thereby jeopardizing certain promising innovations by making them subject to the constraining provisions of this rule—and others offered views on that set of issues as well. Commenters also offered their thoughts on other innovative income-smoothing and financial-management initiatives.

The Bureau has decided to address the issues raised by commenters that were seeking an exclusion or exemption from this rule not by altering the definition of lender but instead by fashioning specific exclusions and conditional exemptions as addressed below in § 1041.3(d), (e), and (f) of the final rule.

Therefore in light of the comments and responses, the Bureau is finalizing this definition as renumbered and the commentary as proposed, with the one modification—use of the phrase ''extends credit''—as discussed above.

2(a)(14) Loan Sequence or Sequence

Proposed § 1041.2(a)(12) generally would have defined a loan sequence or sequence as a series of consecutive or concurrent covered short-term loans in which each of the loans (other than the first loan) is made while the consumer currently has an outstanding covered short-term loan or within 30 days thereafter. It would define both loan sequence and sequence the same way because the terms are used interchangeably in various places throughout the proposal. Furthermore, it also specified how to determine a given loan's place within a sequence (for example, whether a loan constitutes the first, second, or third loan in a sequence), which would implicate other provisions of the proposed rule.

The Bureau's rationale for proposing to define loan sequence in this manner was discussed in more detail in the section-by-section analysis of proposed §§ 1041.4 and 1041.6. The Bureau also sought comment on whether alternative definitions of loan sequence may better address its concerns about how a consumer's inability to repay a covered loan may cause the need for a successive covered loan.

Some consumer advocates commented that this definition would be clarified by including language from local ordinances or State laws that have the same effective meaning so as to avoid any confusion in compliance and enforcement. Consumer groups commented that the rule should treat a loan made within 60 days of another loan, rather than 30 days, as part of the same loan sequence in order to better effectuate its purpose of addressing the flipping of both short-term and longer-term loans and to include late fees as rollover fees. Some industry commenters argued for a shorter period.

The Bureau has considered a number of ways to specify and clarify the definition of loan sequences in order to minimize or avoid evasions of the final rule. Adopting local or State definitions would not appear to clarify the issues, as they are inconsistent from one jurisdiction to another. However, as discussed in greater detail below in Market Concerns—Underwriting and in §§ 1041.4 and 1041.5(d) of the final rule, the Bureau has decided to incorporate covered longer-term balloon-payment loans into this definition, reflecting concerns about the harms that can occur to consumers who take out a series of covered longer-term balloon-payment loans in quick succession as well as the Bureau's concerns about potential evasions of the underwriting criteria.

As discussed in the proposal, the Bureau also has considered various time frames for the definition of loan sequence, including 14 days as well as 30 days and 60 days, and decided in finalizing the rule to adhere to 30 days as a reasonable and appropriate frequency for use in this definition, to align with consumer expense cycles, which often involve recurring expenses that are typically a month in length. This is designed to account for the fact that where repaying a loan causes a shortfall, the consumer may seek to return during the same expense cycle to get funds to cover downstream expenses. In addition, a number of consumers receive income on a monthly basis. The various considerations involved in resolving these issues are discussed more fully in the section-by-section analysis of § 1041.5(d) of the final rule.

In light of the discussion above, the Bureau otherwise is finalizing this renumbered definition as modified. In addition, wherever the proposed definition had referred to a covered short-term loan, the definition in the final rule refers instead to a covered short-term loan or a covered longer-term balloon-payment loan—or, where pluralized, the definition in the final rule refers instead to covered short-term loans or covered longer-term balloon-payment loans, or a combination thereof.

2(a)(15) Motor Vehicle

In connection with proposing to subject certain longer-term loans with vehicle security to part 1041, in proposed § 1041.3(d) the Bureau would have defined vehicle security to refer to the term motor vehicle as defined in section 1029(f)(1) of the Dodd-Frank Act. That definition encompasses not only vehicles primarily used for on-road transportation, but also recreational boats, motor homes, and other categories. As described below, the Bureau has now decided to narrow the definition of covered-longer term loan to focus only on loans that meet a certain rate threshold and involve the taking of a leveraged payment mechanism as defined in § 1041.3(c) of the final rule, without regard to whether vehicle security is taken on the loan. However, the definitions of vehicle security and motor vehicle are still relevant to § 1041.6(b)(3), which prohibits lenders from making covered short-term loans under § 1041.6 if they take vehicle security in connection with such a loan, for the reasons explained in the section-by-section analysis of that provision.

Upon further consideration in light of this context and its experience from other related rulemakings, the Bureau has decided to narrow the definition of motor vehicle in the final rule to focus on any self-propelled vehicle primarily used for on-road transportation, but not including motor homes, recreational vehicles, golf carts, and motor scooters. Some commenters did suggest that vehicle title loans should encompass boats, motorcycles, and manufactured homes. Nonetheless, the Bureau has concluded that it is more appropriate to use a narrower definition because the term motor vehicle is germane to the vehicle title loans addressed in the final rule, which involve the prospect of repossession of the vehicle for failing to repay the loan. The impact to consumers from default or repossession likely operates differently for basic on-road transportation used to get to work or manage everyday affairs, thus creating different pressures to repay loans based on these kinds of vehicles as compared to loans based on other forms of transportation.

Moreover, from the Bureau's prior experience of writing rules with respect to vehicles, most notably in the Bureau's larger participant rule authorizing its supervision authority over certain entities in the market for auto loans, it is aware that treatment of this category of items requires clarification in light of what can be some difficult and unexpected boundary issues. The definition included here in § 1041.2(a)(15) of the final rule is thus similar to the language used in the Bureau's larger participant rule for the auto loan market,[430] which generally encompasses the kinds of vehicles—specifically cars and trucks and motorcycles—that consumers primarily use for on-road transportation rather than for housing or recreation. The Bureau also notes that it had proposed to exclude loans secured by manufactured homes under § 1041.3(e)(2), and has finalized that provision in § 1041.3(d)(2) as discussed below.

2(a)(16) Open-End Credit

Proposed § 1041.2(a)(14) would have defined open-end credit by cross-referencing the definition of that same term in Regulation Z, 12 CFR part 1026, but without regard to whether the credit is consumer credit, as that term is defined in Regulation Z § 1026.2(a)(12), is extended by a creditor, as that term is defined in Regulation Z § 1026.2(a)(17), or is extended to a consumer, as that term is defined in Regulation Z § 1026.2(a)(11). In general, Regulation Z § 1026.2(a)(20) provides that open-end credit is consumer credit in which the creditor reasonably contemplates repeated transactions, the creditor may impose a finance charge from time to time on an outstanding unpaid balance, and the amount of credit that may be extended to the consumer during the term of the plan (up to any limit set by the creditor) is generally made available to the extent that any outstanding balance is repaid. For the purposes of defining open-end credit under proposed part 1041, the term credit, as defined in proposed § 1041.2(a)(9), was substituted for the term consumer credit in the Regulation Z definition of open-end credit; the term lender, as defined in proposed § 1041.2(a)(11), was substituted for the term creditor in the same Regulation Z definition; and the term consumer, as defined in proposed § 1041.2(a)(4), was substituted for the term consumer in the Regulation Z definition of open-end credit.

The term open-end credit was used in various parts of the proposal where the Bureau tailored requirements separately for closed-end and open-end credit in light of their different structures and durations. Most notably, proposed § 1041.2(a)(18) would require lenders to employ slightly different methods when

[430] 80 FR 37496 (June 30, 2015).

calculating the total cost of credit of closed-end versus open-end loans. Proposed § 1041.16(c) also would require lenders to report whether a covered loan is a closed-end or open-end loan.

In the proposal, the Bureau stated that generally defining this term consistently across regulations would reduce the risk of confusion among consumers, industry, and regulators. With regard to the definition of consumer, however, the Bureau proposed that, for the reasons discussed in connection with proposed § 1041.2(a)(4), it would be more appropriate to incorporate the definition from the Dodd-Frank Act rather than the definition from Regulation Z, which is arguably narrower. Similarly, the Bureau indicated that it would be more appropriate to use the broader definition of lender contained in proposed § 1041.2(a)(11) than the Regulation Z definition of creditor.

One commenter recommended that the Bureau defer action on lines of credit entirely (not just overdraft lines of credit as would be excluded in proposed § 1041.3) and address these loan products in a future rulemaking. A number of commenters stated that the underwriting criteria for such products should be aligned with the provisions of the Credit CARD Act and the Bureau's rule on prepaid accounts, and raised questions about the timing calculations on line-of-credit payments.

In response, the Bureau continues to judge it to be important to address open-end lines of credit in this rule in order to achieve more comprehensive coverage, outside of those lines of credit that are excluded under final § 1041.3(d)(6) as discussed below. In response to many comments, including those urging closer alignment with other standards for assessing ability to repay under other statutory schemes, the Bureau has also modified the underwriting criteria in § 1041.5 of the final rule in a number of respects, as explained further below.

The Bureau is therefore finalizing § 1041.2(a)(16) largely as proposed, with one substantive clarification that credit products that otherwise meet the definition of open-end credit under Regulation Z should not be excluded from the definition of open-end credit under § 1041.2(a)(16) because they do not involve a finance charge. This change will assure that products are appropriately classified as open-end credit under part 1041, rather than as closed-end credit. The Bureau has also revised comment 2(a)(16)–1 to reflect this change and to streamline guidance clarifying that for the purposes of defining open-end credit under part 1041, the term credit, as defined in § 1041.2(a)(11), is substituted for the term consumer credit, as defined in 12 CFR 1026.2(a)(12); the term lender, as defined in § 1041.2(a)(13), is substituted for the term creditor, as defined in 12 CFR 1026.2(a)(17); and the term consumer, as defined in § 1041.2(a)(4), is substituted for the term consumer, as defined in 12 CFR 1026.2(a)(11).

For all the reasons discussed above, the Bureau is finalizing this definition and the commentary as renumbered and revised.

2(a)(17) Outstanding Loan

Proposed § 1041.2(a)(15) would have generally defined outstanding loan as a loan that the consumer is legally obligated to repay, except that a loan ceases to be outstanding if the consumer has not made any payments on the loan within the previous 180 days. Under this definition, a loan is an outstanding loan regardless of whether the loan is delinquent or subject to a repayment plan or other workout arrangement if the other elements of the definition are met. Under proposed § 1041.2(a)(12), a covered short-term loan would be considered to be within the same loan sequence as a previous such loan if it is made within 30 days of the consumer having the previous outstanding loan. Proposed §§ 1041.6 and 1041.7 would impose certain limitations on lenders making covered short-term loans within loan sequences, including a prohibition on making additional covered short-term loans for 30 days after the third loan in a sequence.

In the proposal, the Bureau stated that if the consumer has not made any payment on the loan for an extended period of time, it may be appropriate to stop considering the loan to be an outstanding loan for the purposes of various provisions of the proposed rule. Because outstanding loans are counted as major financial obligations for purposes of underwriting and because treating a loan as outstanding would trigger certain restrictions on further borrowing by the consumer under the proposed rule, the Bureau attempted to balance several considerations in crafting the proposed definition. One is whether it would be appropriate for very stale and effectively inactive debt to prevent the consumer from accessing credit, even if so much time has passed that it seems relatively unlikely that the new loan is a direct consequence of the unaffordability of the previous loan. Another is how to define such stale and inactive debt for purposes of any cut-off, and to account for the risk that collections might later be revived or that lenders would intentionally exploit a cut-off in an attempt to encourage new borrowing by consumers.

The Bureau proposed a 180-day threshold as striking an appropriate balance, and noted that this approach would generally align with the policy position taken by the Federal Financial Institutions Examination Council (FFIEC), which generally requires depository institutions to charge off open-end credit at 180 days of delinquency. Although that policy also requires that closed-end loans be charged off after 120 days, the Bureau found as a preliminary matter that a uniform 180-day rule for both closed-end and open-end loans may be more appropriate, given the underlying policy considerations discussed above, as well as for simplicity.

Proposed comment 2(a)(15)–1 would clarify that the status of a loan that otherwise meets the definition of outstanding loan does not change based on whether the consumer is required to pay a lender, affiliate, or service provider or whether the lender sells the loan or servicing rights to a third party. Proposed comment 2(a)(15)–2 would clarify that a loan ceases to be an outstanding loan as of the earliest of the date the consumer repays the loan in full, the date the consumer is released from the legal obligation to repay, the date the loan is otherwise legally discharged, or the date that is 180 days following the last payment that the consumer made on the loan. Additionally, proposed comment 2(a)(15)–2 would explain that any payment the consumer makes restarts the 180-day period, regardless of whether the payment is a scheduled payment or in a scheduled amount. Proposed comment 2(a)(15)–2 would further clarify that once a loan is no longer an outstanding loan, subsequent events cannot make the loan an outstanding loan. The Bureau proposed this one-way valve to ease compliance burden on lenders and to reduce the risk of consumer confusion.

One consumer group commented that, with respect to loans that could include more than one payment, it would be helpful for the definition to refer to an installment in order to ensure its alignment with terms used in State and local laws. Other consumer groups suggested various other changes to clarify details of timing addressed in this definition, as well as urging that the 180-day period should be changed to 365 days so that more loans would be considered as outstanding. Several commented that the definition should be changed so that the 180-day period should run from either the date of the

last payment by the consumer or from the date of the last debt collection activity by the collector, in order to more accurately determine what is truly stale debt and to broaden the scope of what loans are outstanding to ensure that older loans are not being used by lenders to encourage consumers to re-borrow. To support compliance under the modified definition, they also urged that lenders be required to report collection activity to the registered information systems.

The Bureau has concluded that language in final comment 2(a)(17)–2 emphasizing that any payment restarts the 180-day clock is sufficient to address the commenter's concern without having to incorporate new terminology to align the term with its use in State and local laws. With respect to the comments about the time frame, and 365 days in particular, the Bureau was not persuaded of the reasoning or need to broaden the scope of outstanding loans to this extent. The Bureau's proposed 180-day period was already aligned to the longer end of the FFIEC treatment of these issues, by adopting the 180 days that the FFIEC has applied to open-end credit rather than the 120 days that it has applied to closed-end credit. In addition, the Bureau's experience with these markets suggests that these types of lenders typically write off their debts even sooner than 180 days.

The Bureau concludes that the various suggested changes that were offered to tighten the proposed standard are not necessary to be adopted at this time, though such matters could be revisited over time as supervision and enforcement of the final rule proceed in the future. In particular, the comment that lenders should be required to report collection activity to the registered information systems would have broadened the requirements of the rule and the burdens imposed in significant and unexpected ways that did not seem warranted at this juncture.

The Bureau also carefully considered the comments made about extending the period of an outstanding loan, which suggested that it should run not just 180 days from the date of the last payment made on the loan but also 180 days from the date of the last debt collection activity on the loan. The Bureau declines to adopt this proposed change, for several reasons. It would add a great deal of complexity that would encumber the rule, not only in terms of ensuring compliance but in terms of carrying out supervision and enforcement responsibilities as well. For example, this modification would appear not to be operational unless debt collection activities were reported to the registered information systems, which as noted above would add significant and unexpected burdens to the existing framework. Moreover, timing the cooling-off period to any debt collection activity could greatly extend how long a consumer would have to wait to re-borrow after walking away from a debt, thereby disrupting the balance the Bureau was seeking to strike in the proposal between these competing objectives. The Bureau also judged that if the comment was aimed at addressing and discouraging certain types of debt collection activities, it would be better addressed in the rulemaking process that the Bureau has initiated separately to govern debt collection issues. Finally, this suggestion seems inconsistent with the Bureau's experience, which indicates that lenders in this market typically cease their own collection efforts within 180 days.

For these reasons, the Bureau is finalizing this definition as renumbered and the commentary as proposed with minor changes for clarity. The Bureau has also added a sentence to comment 2(a)(17)–2 to expressly state that a loan is outstanding for 180 days after consummation if the consumer does not make any payments on it, the consumer is not otherwise released from the legal obligation to pay, and the loan is not otherwise legally discharged.

2(a)(18) Service Provider

Proposed § 1041.2(a)(17) would have defined service provider by cross-referencing the definition of that same term in the Dodd-Frank Act, 12 U.S.C. 5481(26). In general, the Dodd-Frank Act defines service provider as any person that provides a material service to a covered person in connection with the offering or provision of a consumer financial product or service, including one that participates in designing, operating, or maintaining the consumer financial product or service or one that processes transactions relating to the consumer financial product or service. Moreover, the Act specifies that the Bureau's authority to identify and prevent unfair, deceptive, or abusive acts or practices through its rulemaking authority applies not only to covered persons, but also to service providers.[431] Proposed § 1041.3(c) and (d) would provide that a loan is covered under proposed part 1041 if a service provider obtains a leveraged payment mechanism or vehicle title and the other coverage criteria are otherwise met.

The definition of service provider and the provisions in proposed § 1041.3(c) and (d) were designed to reflect the fact that in some States, covered loans are extended to consumers through a multi-party transaction. In these transactions, one entity will fund the loan, while a separate entity, often called a credit access business or a credit services organization, will interact directly with, and obtain a fee or fees from, the consumer. This separate entity will often service the loan and guarantee the loan's performance to the party funding the loan. The credit access business or credit services organization, and not the party funding the loan, will in many cases obtain the leveraged payment mechanism or vehicle security. In these cases, the credit access business or credit services organization is performing the responsibilities normally performed by a party funding the loan in jurisdictions where this particular business arrangement is not used. Despite the formal division of functions between the nominal lender and the credit access business, the loans produced by such arrangement are functionally the same as those covered loans issued by a single entity and appear to present the same set of consumer protection concerns. Accordingly, the Bureau stated in the proposal that it is appropriate to bring loans made under these arrangements within the scope of coverage of proposed part 1041. Proposed comment 2(a)(17)–1 further made clear that persons who provide a material service to lenders in connection with the lenders' offering or provision of covered loans during the course of obtaining for consumers, or assisting consumers in obtaining, loans from lenders are service providers, subject to the specific limitations in section 1002(26) of the Dodd-Frank Act.

The Bureau stated that defining the term service provider consistently with the Dodd-Frank Act reduces the risk of confusion among consumers, industry, and regulators. Consumer groups commented that the rule should apply to service providers, including credit service organizations and their affiliates, whenever it applies to lenders and their affiliates. The Bureau concludes that the definitions of and references to lender and service provider, including incorporation of the statutory definitions of covered person and service provider into the regulatory definitions, throughout the regulation text and commentary are sufficiently well articulated to make these points clear as to the applicability and scope of coverage of part 1041. Both section 1031(a) and section 1036(a) of the Dodd-Frank Act specify that a service provider

[431] 12 U.S.C. 5531(a) and (b).

can be held liable on the same terms as a covered person—which includes a lender as defined by § 1041.2(13)—to the extent that a service provider engages in conduct that violates this rule on behalf of a lender, or entities such as credit access businesses and credit service organizations that provide a material service to a lender in making these kinds of covered loans.[432] The Bureau did not receive any other comments on this portion of the proposal and is finalizing this definition and the commentary as just discussed and as renumbered.

2(a)(19) Vehicle Security

The Bureau has decided to make ''vehicle security'' a defined term, incorporating language that described the practice of taking vehicle security from proposed § 1041.3(d). Its role is now more limited, however, due to other changes in the rule, which no longer governs the underwriting of covered longer-term loans (other than balloon-payment loans), which instead are now subject only to the payment provisions. Nonetheless, the Bureau is preserving the language explaining vehicle security and moving it here for purposes of defining the exclusion of vehicle title loans from coverage under § 1041.6 of the final rule, which provides for conditionally exempted loans.

As to the definition itself, the proposal would have stated that for purposes of defining a covered loan, a lender or service provider obtains vehicle security if it obtains an interest in a consumer's motor vehicle (as defined in section 1029(f)(1) of the Dodd-Frank Act) as a condition of the credit, regardless of how the transaction is characterized by State law, including: (1) Any security interest in the motor vehicle, motor vehicle title, or motor vehicle registration whether or not the security interest is perfected or recorded; or (2) a pawn transaction in which the consumer's motor vehicle is the pledged good and the consumer retains use of the motor vehicle during the period of the pawn agreement. Under the proposal, the lender or service provider would obtain vehicle security if the consumer is required, under the terms of an agreement with the lender or service provider, to grant an interest in the consumer's vehicle to the lender in the event that the consumer does not repay the loan.

As noted in the proposal, because of exclusions contained in proposed § 1041.3(e)(1) and (5), the term vehicle security would have excluded loans made solely and expressly for the purpose of financing a consumer's initial purchase of a motor vehicle in which the lender takes a security interest as a condition of the credit, as well as non-recourse pawn loans in which the lender has sole physical possession and use of the property for the entire term of the loan. Proposed comment 3(d)(1)–1 also would have clarified that mechanic liens and other situations in which a party obtains a security interest in a consumer's motor vehicle for a reason that is unrelated to an extension of credit do not trigger coverage.

The Bureau proposed that the security interest would not need to be perfected or recorded in order to trigger coverage under proposed § 1041.3(d)(1). The Bureau reasoned that consumers may not be aware that the security interest is not perfected or recorded, nor would it matter in many cases. Perfection or recordation protects the lender's interest in the vehicle against claims asserted by other creditors, but does not necessarily affect whether the consumer's interest in the vehicle is at risk if the consumer does not have the ability to repay the loan. Even if the lender or service provider does not perfect or record its security interest, the security interest can still change a lender's incentives to determine the consumer's ability to repay the loan and exacerbate the harms the consumer experiences if the consumer does not have the ability to repay the loan.

The Bureau received many comments on the prong of the definition that focused on the taking of a leveraged payment mechanism or vehicle security, again often in the context of application of the underwriting requirements rather than the payment requirements. Those concerns have largely been addressed or mooted by the Bureau's decisions to apply only the payment requirements to covered longer-term loans and to narrow the definition of such loans to focus only on those types of leveraged payment mechanisms that involve the ability to pull money from consumers' accounts, rather than vehicle security. Comments focusing on that narrower definition of leveraged payment mechanism are addressed in more depth in connection with § 1041.3(c) below.

Importantly, the term vehicle security as defined in proposed § 1041.3(d) was further limited in its effect by the provisions of proposed § 1041.3(b)(3)(ii), which had stated that a lender or service provider did not become subject to the proposed underwriting criteria merely by obtaining vehicle security at any time, but instead had to obtain vehicle security before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan. Many commenters criticized the 72-hour requirement as undermining consumer protections and fostering evasion of the rule. Because of various changes that have occurred in revising the coverage of the underwriting criteria and reordering certain provisions in the final rule, this limitation is no longer necessary to effectuate any of those purposes of the rule. The definition of vehicle security remains relevant to the provisions of § 1041.6 of the final rule, but it is unclear how a 72-hour limitation is germane to establishing the scope of coverage under that section, and so it has been eliminated from the final rule.

One consumer group suggested that a vehicle title loan should be covered under the rule regardless of whether the title was a condition of the loan. The Bureau does not find it necessary to alter the definition in this manner in order to accomplish the purpose of covering vehicle title loans, particularly in light of the language in comment 2(a)(19)–1, which indicates that vehicle security will attach to the vehicle for reasons that are related to the extension of credit.

With respect to comments on the details of the definition of vehicle security, one commenter had suggested that the final rule should make clear that the proposed restrictions on this form of security interest do not interfere with or prohibit any statutory liens that have been authorized by Congress. Because nothing in the language of the final rule purports to create any such interference or prohibition, the Bureau does not find it necessary to modify its definition of vehicle security in this regard. Other commenters made various points about the meaning and coverage of the term motor vehicle in the Bureau's treatment of the term vehicle security. Those comments are addressed separately in the discussion of the definition of motor vehicle in § 1041.2(a)(15) of the final rule.

The Bureau has moved the discussion of vehicle security from proposed § 1041.3(d) to § 1041.2(a)(19) in the

[432] *See* 12 U.S.C. 5531(a) (providing that the Bureau may take any action authorized under subtitle E of the Act (*i.e.,* Enforcement powers) to prevent a covered person or service provider from committing or engaging in an unfair, deceptive, or abusive act or practice under Federal law in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service); 12 U.S.C. 5536(a) (equating covered persons and service providers for purposes of prohibited acts in violation of Federal consumer financial law, including liability for violations for engaging in ''any unfair, deceptive, or abusive act or practice'').

general definitions section, and has narrowed the definition of motor vehicle contained in section 1029(f)(1) of the Dodd-Frank Act, replacing it with the somewhat narrower definition of motor vehicle contained in § 1041.2(a)(15) of the final rule as described above. The definition of vehicle security still includes the other elements of the proposal, as slightly rewritten for clarity to focus on this term itself rather than on the actions of a lender or service provider.

Accordingly, the term vehicle security is defined in the final rule as an interest in a consumer's motor vehicle obtained by the lender or service provider as a condition of the credit, regardless of how the transaction is characterized by State law, including: (1) Any security interest in the motor vehicle, motor vehicle title, or motor vehicle registration whether or not the security interest is perfected or recorded; or (2) a pawn transaction in which the consumer's motor vehicle is the pledged good and the consumer retains use of the motor vehicle during the period of the pawn agreement. This definition also carries with it proposed comment 3(d)(1)–1, now finalized as comment 2(a)(19)–1, which explains that an interest in a consumer's motor vehicle is a condition of credit only to the extent the security interest is obtained in connection with the credit, and not for a reason that is unrelated to an extension of credit, such as the attachment of a mechanic's lien. This comment is finalized with the language unchanged.[433]

2(b) Rule of Construction

After reserving this provision in the proposal, the Bureau has determined to add a rule of construction for purposes of part 1041, which states that where definitions are incorporated from other statutes or regulations, the terms have the meaning and incorporate the embedded definitions, appendices, and commentary from those other laws except to the extent that part 1041 provides a different definition for a parallel term. The Bureau had included versions of this basic principle in the regulation text and commentary for certain individual provisions of the proposed rule, but has concluded that it would be helpful to memorialize it as a general rule of construction. Accordingly, the Bureau moved certain proposed commentary for individual definitions to comment 2(b)–1 of the final rule in order to provide examples of the rule of construction, and streamlined certain other proposed commentary as described above.

Section 1041.3 Scope of Coverage; Exclusions; Exemptions

The primary purpose of proposed part 1041 was to identify and adopt rules to prevent unfair and abusive practices as defined in section 1031 of the Dodd-Frank Act in connection with certain consumer credit transactions. Based upon its research, outreach, and analysis of available data, the Bureau proposed to identify such practices with respect to two categories of loans to which it proposed to apply this rule: (1) Consumer loans with a duration of 45 days or less; and (2) consumer loans with a duration of more than 45 days that have a total cost of credit above a certain threshold and that are either repayable directly from the consumer's income stream, as set forth in proposed § 1041.3(c), or are secured by the consumer's motor vehicle, as set forth in proposed § 1041.3(d).

In the proposal, the Bureau tentatively concluded that it is an unfair and abusive practice for a lender to make a covered short-term loan without determining that the consumer has the ability to repay the loan. The Bureau likewise tentatively concluded that it is an unfair and abusive practice for a lender to make a covered longer-term loan without determining the consumer's ability to repay the loan. Accordingly, the Bureau proposed to apply the protections of proposed part 1041 to both categories of loans.

In particular, proposed §§ 1041.5 and 1041.9 would have required that, before making a covered loan, a lender must determine that the consumer has the ability to repay the loan. Proposed §§ 1041.6 and 1041.10 would have imposed certain limitations on repeat borrowing, depending on the type of covered loan. Proposed §§ 1041.7, 1041.11, and 1041.12 would have provided for alternative requirements that would allow lenders to make covered loans, in certain limited situations, without first determining that the consumer has the ability to repay the loan. Proposed § 1041.14 would have imposed consumer protections related to repeated lender-initiated attempts to withdraw payments from consumers' accounts in connection with covered loans. Proposed § 1041.15 would have required lenders to provide notices to consumers before attempting to withdraw payments on covered loans from consumers' accounts. Proposed §§ 1041.16 and 1041.17 would have required lenders to check and report borrowing history and loan information to certain information systems with respect to most covered loans. Proposed § 1041.18 would have required lenders to keep certain records on the covered loans that they make. And proposed § 1041.19 would have prohibited actions taken to evade the requirements of proposed part 1041.

The Bureau did not propose to extend coverage to several other types of loans and specifically proposed excluding, to the extent they would otherwise be covered under proposed § 1041.3, certain purchase money security interest loans, certain loans secured by real estate, credit cards, student loans, non-recourse pawn loans, and overdraft services and lines of credit. The Bureau likewise proposed not to cover loans that have a term of longer than 45 days if they are not secured by a leveraged payment mechanism or vehicle security or if they have a total cost of credit below a rate of 36 percent per annum.

By finalizing application of the underwriting requirements with respect to certain categories of loans as described above, and excluding certain other types of loans from the reach of the rule, the Bureau does not mean to signal any definitive conclusion that it could not be an unfair or abusive practice to make any other types of loans, such as loans that are not covered by part 1041, without reasonably assessing a consumer's ability to repay. Moreover, this rule does not supersede or limit any protections imposed by other laws, such as the Military Lending Act and implementing regulations. The coverage limits in the rule simply reflect the fact that these are the types of loans the Bureau has studied in depth to date and has chosen to address within the scope of the proposal. Indeed, the Bureau issued, concurrently with the proposal, a Request for Information (RFI), which solicited information and evidence to help assess whether there are other categories of loans for which lenders do not determine the consumer's ability to repay that may pose risks to consumers. The Bureau also sought comment in response to the RFI as to whether other lender practices associated with covered loans may warrant further action by the Bureau.

The Bureau thus is reinforcing the point that all covered persons within the meaning of the Dodd-Frank Act have

[433] Two definitions in the proposal are no longer operative and so have been omitted from the final rule. First, proposed § 1041.2(a)(13) would have defined the term non-covered bridge loan. Second, proposed § 1041.2(a)(16) would have defined the term prepayment penalty. Because the Bureau is not finalizing the portions of the proposed rule on underwriting of covered longer-term loans at this time, along with other changes made in §§ 1041.5 and 1041.6 of the final rule governing the underwriting and provision of covered short-term loans, these two definitions and the related commentary are being omitted from the final rule.

a legal duty not to engage in unfair, deceptive, or abusive acts or practices. The Bureau is explicitly authorized to consider, on a case-by-case basis, through its supervisory or enforcement activities, whether practices akin to those addressed here are unfair, deceptive, or abusive in connection with loans not covered by the rule. The Bureau also is emphasizing that it may decide to engage in future rulemaking with respect to other types of loans or other types of practices associated with covered loans at a later date.

3(a) General

In proposed § 1041.3(a), the Bureau provided that proposed part 1041 would apply to a lender that makes covered loans. The Bureau received no specific comments on proposed § 1041.3(a), and is finalizing this provision as proposed except that it has adopted language as discussed above in connection with the definition of lender in § 1041.2(a)(13) to refer to a person who ''extends credit by making covered loans.''

3(b) Covered Loan

In the proposal, the Bureau noted that section 1031(b) of the Dodd-Frank Act empowers it to prescribe rules to identify and prevent unfair, deceptive, or abusive acts or practices associated with consumer financial products or services. Section 1002(5) of the Dodd-Frank Act defines such products or services as those offered or provided for use by consumers primarily for personal, family, or household purposes or, in certain circumstances, those delivered, offered, or provided in connection with another such consumer financial product or service. Proposed § 1041.3(b) would have provided, generally, that a covered loan means closed-end or open-end credit that is extended to a consumer primarily for personal, family, or household purposes that is not excluded by § 1041.3(e).

By proposing to apply the rule only to loans that are extended to consumers primarily for personal, family, or household purposes, the Bureau intended it not to apply to loans that are made primarily for a business, commercial, or agricultural purpose. But the proposal explained that a lender would violate proposed part 1041 if it extended a loan ostensibly for a business purpose and failed to comply with the requirements of proposed part 1041 for a loan that is, in fact, primarily for personal, family, or household purposes. In this regard, the Bureau referenced the section-by-section analysis of proposed § 1041.19, which provided further discussion of evasion issues.

Proposed comment 3(b)–1 would have clarified that whether a loan is covered is generally based on the loan terms at the time of consummation. Proposed comment 3(b)–2 would have clarified that a loan could be a covered loan regardless of whether it is structured as open-end or closed-end credit. Proposed comment 3(b)–3 would have explained that the test for determining the primary purpose of a loan is the same as the test prescribed by Regulation Z § 1026.3(a) and clarified by the related commentary in supplement I to part 1026. The Bureau stated that lenders are already familiar with the Regulation Z test and that it would be appropriate to apply that same test here to maintain consistency in interpretation across credit markets, though the Bureau also requested comment on whether more tailored guidance would be useful here as the related commentary in supplement I to part 1026, on which lenders would be permitted to rely in interpreting proposed § 1041.3(b), did not discuss particular situations that may arise in the markets that would be covered by proposed part 1041.

One commenter noted that while business loans are outside the scope of the rule, many small business owners use their personal vehicles to secure title loans for their businesses, and asserted that it will be difficult for lenders to differentiate the purposes of a loan in such instances. Another commenter suggested that provisions should be added to ensure that loans are made for personal use only. More generally, one commenter stated that the breadth of the definition of covered loan would enhance the burden that the proposed rule would impose on credit unions.

In response, the Bureau notes that its experience with these markets has made it aware that the distinction between business and household purposes is necessarily fact-specific, yet the basic distinction is embedded as a jurisdictional matter in many consumer financial laws and has long been regarded as a sensible line to draw. Further, the concern about the breadth of this definition as affecting credit unions is addressed substantially by the measures adopted in the final rule to reduce burdens for lenders, along with the exclusions and exemptions that have been adopted, including the conditional exemption for alternative loans.

The Bureau is finalizing § 1041.3(b) as proposed. The commentary is finalized as proposed, except proposed comment 3(b)–1, which the Bureau is not finalizing. That comment had proposed that whether a loan is covered is generally determined based on the loan terms at the time of consummation. As noted below, final comment 3(b)(3)–3 makes clear that a loan may become a covered longer-term loan at any such time as both requirements of § 1041.3(b)(3)(i) and (ii) are met, even if they were not met when the loan was initially made.

3(b)(1)

Proposed § 1041.3(b)(1) would have brought within the scope of proposed part 1041 those loans in which the consumer is required to repay substantially the entire amount due under the loan within 45 days of either consummation or the advance of loan proceeds. Loans of this type, as they exist in the market today, typically take the form of single-payment loans, including payday loans, vehicle title loans, and deposit advance products. However, coverage under proposed § 1041.3(b)(1) was not limited to single-payment products, but rather included any single-advance loan with a term of 45 days or less and any multi-advance loan where repayment is required within 45 days of a credit draw.[434] Under proposed § 1041.2(a)(6), this type of covered loan was defined as a covered short-term loan.

Specifically, proposed § 1041.3(b)(1) prescribed different tests for determining whether a loan is a covered short-term loan based on whether or not the loan is closed-end credit that does not provide for multiple advances to consumers. For this type of credit, a loan would be a covered short-term loan if the consumer is required to repay substantially the entire amount of the loan within 45 days of consummation. For all other types of loans, a loan would be a covered short-term loan if the consumer is required to repay substantially the entire amount of an advance within 45 days of the advance.

As proposed comment 3(b)(1)–1 explained, a loan does not provide for multiple advances to a consumer if the loan provides for full disbursement of the loan proceeds only through disbursement on a single specific date. The Bureau stated that a different test to determine whether a loan is a covered short-term loan is appropriate for loans that provide for multiple advances to consumers, because open-end credit and closed-end credit providing for multiple advances may be consummated long

[434] While application of the 45-day duration limit for covered short-term loans varies based on whether the loan is a single- or multiple-advance loan, the Bureau often used the phrase ''within 45 days of consummation'' throughout the proposal and in the final rule as a shorthand way of referring to coverage criteria of both types of loans.

before the consumer incurs debt that must be repaid. If, for example, the consumer waited more than 45 days after consummation to draw on an open-end line, but the loan agreement required the consumer to repay the full amount of the draw within 45 days of the draw, the loan would not be practically different than a closed-end loan repayable within 45 days of consummation. The Bureau preliminarily found that it is appropriate to treat the loans the same for the purposes of proposed § 1041.3(b)(1).

As the Bureau described in part II of the proposal, the terms of short-term loans are often tied to the date the consumer receives his or her paycheck or benefits payment. While pay periods typically vary from one week to one month, and expense cycles are typically one month, the Bureau proposed 45 days as the upper bound for covered short-term loans in order to accommodate loans that are made shortly before a consumer's monthly income is received and that extend beyond the immediate income payment to the next income payment. These circumstances could result in loans that are somewhat longer than a month in duration, but the Bureau believed that they nonetheless pose similar risks of harm to consumers as loans with durations of a month or less.

The Bureau also considered proposing to define covered short-term loans as loans that are substantially repayable within either 30 days of consummation or advance, 60 days of consummation or advance, or 90 days of consummation or advance. The Bureau, nonetheless, did not propose the 30-day period because, as described above, some loans for some consumers who are paid on a monthly basis can be slightly longer than 30 days, yet still would essentially constitute a one-pay-cycle, one-expense-cycle loan. The Bureau stated that it did not propose either the 60-day or 90-day period because loans with those terms encompass multiple income and expense cycles, and thus may present somewhat different risks to consumers, though such loans would have been covered longer-term loans if they met the criteria set forth in proposed § 1041.3(b)(2).

As discussed in the proposal, the Bureau proposed to treat longer-term loans, as defined in proposed § 1041.3(b)(2), as covered loans only if the total cost of credit exceeds a rate of 36 percent per annum and if the lender or service provider obtains a leveraged payment mechanism or vehicle security as defined in proposed § 1041.3(c) and (d). The Bureau did not propose similar limitations with respect to the definition of covered short-term loans because the evidence available to the Bureau seemed to suggest that the structure and short-term nature of these loans give rise to consumer harm even in the absence of costs above the 36 percent threshold or particular means of repayment.

Proposed comment 3(b)(1)–2 noted that both open-end credit and closed-end credit may provide for multiple advances to consumers. The comment explained that open-end credit is self-replenishing even though the plan itself has a fixed expiration date, as long as during the plan's existence the consumer may use the line, repay, and reuse the credit. Likewise, closed-end credit may consist of a series of advances. For example, under a closed-end commitment, the lender might agree to lend a fixed total amount in a series of advances as needed by the consumer, and once the consumer has borrowed the maximum, no more is advanced under that particular agreement, even if there has been repayment of a portion of the debt.

Proposed comment 3(b)(1)–3 explained that a determination of whether a loan is substantially repayable within 45 days requires assessment of the specific facts and circumstances of the loan. Proposed comment 3(b)(1)–4 provided guidance on determining whether loans that have alternative, ambiguous, or unusual payment schedules would fall within the definition. The comment explained that the key principle in determining whether a loan would be a covered short-term loan or a covered longer-term loan is whether, under applicable law, the consumer would be considered to be in breach of the terms of the loan agreement if the consumer failed to repay substantially the entire amount of the loan within 45 days of consummation.

As noted above, § 1041.3(b)(1) provides the substance of the definition of covered short-term loan as referenced in § 1041.2(a)(10) of the final rule. The limited comments on this provision are presented and addressed in the section-by-section analysis of that definition. For the reasons stated there, the Bureau is finalizing § 1041.3(b)(1) as proposed, with only non-substantive language changes. One modification has been made in the commentary, however, to address comments received about deposit advance products. New comment 3(b)(1)–4 in the final rule states that a loan or advance is substantially repayable within 45 days of consummation or advance if the lender has the right to be repaid through a sweep or withdrawal of any qualifying electronic deposit made into the consumer's account within 45 days of consummation or advance. A loan or advance described in this paragraph is substantially repayable within 45 days of consummation or advance even if no qualifying electronic deposit is actually made into or withdrawn by the lender from the consumer's account. This comment was added to address more explicitly a deposit advance product in which the lender can claim all the income coming in to the account, as it comes in, for the purpose of repaying the loan, regardless of whether income in fact comes in during the first 45 days after a particular advance. Proposed comment 3(b)(1)–4 thus has been renumbered as comment 3(b)(1)–5 of the final rule.

3(b)(2)

Proposed § 1041.3(b)(2) would have brought within the scope of proposed part 1041 several types of loans for which, in contrast to loans covered under proposed § 1041.3(b)(1), the consumer is not required to repay substantially the entire amount of the loan or advance within 45 days of consummation or advance. Specifically, proposed § 1041.3(b)(2) extended coverage to longer-term loans with a total cost of credit exceeding a rate of 36 percent per annum if the lender or service provider also obtains a leveraged payment mechanism as defined in proposed § 1041.3(c) or vehicle security as defined in proposed § 1041.3(d) in connection with the loan before, at the same time, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive. Under proposed § 1041.2(a)(8), this type of covered loan would be defined as a covered longer-term loan.

As discussed above in connection with § 1041.2(a)(7), the Bureau defined a sub-category of covered longer-term loans that would be subject to certain tailored provisions in proposed §§ 1041.6, 1041.9, and 1041.10 because they involved balloon-payment structures that the Bureau believed posed particular risks to consumers. The Bureau proposed to cover such longer-term balloon-payment loans only if they exceeded the general rate threshold and involved leveraged payment mechanisms or vehicle security, but specifically sought comment on whether such products should be subject to the rule more generally in light of the particular concerns about balloon payment structures.

In light of the Bureau's decision to differentiate which parts of the rule apply to longer-term balloon-payment loans and more generally to longer-term

loans, the Bureau has decided to make the two categories mutually exclusive and to describe them separately in § 1041.3(b)(2) and (3) of the final rule, respectively. Accordingly, the Bureau is finalizing § 1041.3(b)(2) to define longer-term balloon-payment loans, incorporating the language of proposed § 1041.2(a)(7) as further revised in various respects.

First, for purposes of greater clarity in ordering § 1041.3(b) of the final rule, the Bureau is separating out its treatment of covered longer-term balloon-payment loans (in § 1041.3(b)(2)) from its treatment of all other covered longer-term loans (in § 1041.3(b)(3)). As described in greater detail below in Market Concerns—Underwriting and in the section-by-section analysis of § 1041.4, the Bureau has decided to restructure these provisions in this way because it has decided in the final rule to subject covered longer-term balloon-payment loans both to the underwriting criteria and the payment requirements of the final rule, but to apply only the payment requirements to other types of covered longer-term loans.

This organization reflects in part the comments received from industry and trade groups who contended that the Bureau's concerns about re-borrowing for covered longer-term loans were most applicable to loans with balloon-payment structures. They therefore argued that any ability-to-repay restrictions and underwriting criteria should be limited to longer-term balloon-payment loans. These comments reinforced the Bureau's preliminary view that concerns about the re-borrowing of covered longer-term balloon-payment loans were most similar to the concerns it had about the re-borrowing of covered short-term loans. As described more fully below in the section on Market Concerns—Underwriting, the Bureau has observed longer-term loans involving balloon payments where the lender does not reasonably assess the borrower's ability to repay before making the loan, and has observed in these circumstances the same types of consumer harms that it has observed when lenders fail to make a reasonable assessment of the borrower's ability to repay before making covered short-term loans. Nonetheless, the Bureau also maintains its concerns about lender practices in the market for other covered longer-term loans, and emphasizes that it retains supervision and enforcement authority to oversee such lenders for unfair, deceptive, or abusive acts or practices.

As discussed further below, for a number of reasons the Bureau has decided not to address the underwriting of all covered longer-term loans at this time. Nonetheless, as discussed above in the section-by-section analysis of § 1041.2(a)(7) of the final rule, the Bureau is concerned that covered longer-term balloon-payment loans have a loan structure that poses many of the same risks and harms to consumers as with covered short-term loans, and could be adapted in some manner as a loan product intended to circumvent the underwriting criteria for covered short-term loans. Therefore, in § 1041.5 of the final rule, the specific underwriting criteria that apply to covered short-term loans are, with certain modifications, made applicable to covered longer-term balloon-payment loans also (without regard to interest rate or the taking of a leveraged payment mechanism). And along with other covered longer-term loans, these loans remain covered by the sections of the final rule on payment practices as well.

Given this resolution of the considerations raised by the comments and based on the Bureau's further consideration and analysis of the market, the Bureau is finalizing § 1041.3(b)(2) in parallel with § 1041.3(b)(1), since both types of loans—covered short-term loans and covered longer-term balloon loans—are subject to the same underwriting criteria and payment requirements as prescribed in the final rule.

As noted above in the discussion of § 1041.2(a)(7), in conjunction with making the definition of covered longer-term balloon-payment loan into a separate category in its own right rather than a subcategory of the general definition of covered longer-term loan, the Bureau has decided to subject such loans to an expansion in scope as compared to the proposal, since longer-term balloon-payment loans are now being covered by both the underwriting and payment provisions of the final rule without regard to whether the loans exceed a particular threshold for the cost of credit or involve the taking of a leveraged payment mechanism or vehicle security. The Bureau had specifically sought comment as to whether to cover longer-term balloon-payment loans regardless of these two conditions, and has concluded that it is appropriate to do so in light of concerns about the risks and harms that balloon-payment structures pose to consumers and of potential industry evolution to circumvent the rule, as set out more extensively below in Market Concerns—Underwriting.

The Bureau has also revised the definition of covered longer-term balloon-payment loan to address different types of loan structures in more detail. As discussed above in connection with § 1041.2(a)(7), the proposal would generally have defined the term to include loans that require repayment in a single payment or that require at least one payment that is more than twice as large as any other payment(s) under the loan. The Bureau based the twice-as-large threshold on the definition of balloon payment under Regulation Z, but with some modification in details. However, the Bureau did not expressly address whether covered longer-term balloon-payment loans could be both closed-end and open-end credit.

After further consideration of the policy concerns that prompted the Bureau to apply the underwriting requirements in subpart B to covered longer-term balloon-payment loans, the Bureau has concluded that it is appropriate to define that term to include both closed-end and open-end loans that involve the kinds of large irregular payments that were described in the proposed definition. In light of the fact that such loans could be structured a number of ways, the Bureau finds it helpful for purposes of implementation and compliance to build out the definition to more expressly address different types of structures. The Bureau has done this by structuring § 1041.3(b)(2) to be similar to the covered-short-term definition in § 1041.3(b)(1), but with longer time frames and descriptions of additional potential payment structures.

Specifically, the revised definition for covered longer-term balloon-payment loans separately addresses closed-end loans that do not provide for multiple advances from other loans (both closed-end and open-end) that do involve multiple advances. With regard to the former set of loans, § 1041.3(b)(2)(i) defines a covered longer-term balloon-payment loan to include those where the consumer is required to repay the entire balance of the loan more than 45 days after consummation in a single payment or to repay such loan through at least one payment that is more than twice as large as any other payment(s). With regard to multiple-advance loans, the revised definition focuses on either of two types of payment structures. Under the first structure, the consumer is required to repay substantially the entire amount of an advance more than 45 days after the advance is made or is required to make at least one payment on the advance that is more than twice as large as any other payment(s). Under the second structure, the consumer is paying the required minimum payments but may not fully amortize the outstanding balance by a specified date

or time, and the amount of the final payment to repay the outstanding balance at such time could be more than twice the amount of other minimum payments under the plan.

The contours of this definition are thus very similar to those for covered short-term loans, which pose the same kinds of risks and harms for consumers, and its focus on payments that are more than twice as large as other payments is generally consistent with how balloon-payment loans are defined and treated under Regulation Z. The Bureau believes retaining that payment size threshold will promote consistency and reduce the risk of confusion among consumers, industry, and regulators.

Along with finalizing § 1041.3(b)(2) as just stated, the Bureau has also built out the related commentary to incorporate the original commentary to proposed § 1041.2(a)(7) and concepts that were already used in the definition of covered short-term loan, as well as to elaborate further on language that has been added to the final rule. As now adopted, comment 3(b)(2)–1 specifies that a closed-end loan is considered to be a covered longer-term balloon-payment loan if the consumer must repay the entire amount of the loan in a single payment which is due more than 45 days after the loan was consummated, or to repay substantially the entire amount of any advance in a single payment more than 45 days after the funds on the loan were advanced, or is required to pay at least one payment that is more than twice as large as any other payment(s). Comment 3(b)(2)–2 states that for purposes of § 1041.3(b)(2)(i) and (ii), all required payments of principal and any charges (or charges only, depending on the loan features) due under the loan are used to determine whether a particular payment is more than twice as large as another payment, regardless of whether the payments have changed during the loan term due to rate adjustments or other payment changes permitted or required under the loan. Comment 3(b)(2)–3 discusses charges for actual unanticipated late payments, for exceeding a credit limit, or for delinquency, default, or a similar occurrence that may be added to a payment, and notes that they are excluded from the determination of whether the loan is repayable in a single payment or a particular payment is more than twice as large as another payment. Likewise, sums that are accelerated and due upon default are excluded from the determination of whether the loan is repayable in a single payment or a particular payment is more than twice as large as another payment. These three comments are based on prior comments to proposed § 1041.2(a)(7), with certain revisions made for consistency and form.

Comment 3(b)(2)–4 is new and provides that open-end loans are considered to be covered longer-term balloon-payment loans under § 1041.3(b)(2)(ii) if: either the loan has a billing cycle with more than 45 days and the full balance is due in each billing period, or the credit plan is structured such that paying the required minimum payment may not fully amortize the outstanding balance by a specified date or time, and the amount of the final payment to repay the outstanding balance at such time could be more than twice the amount of other minimum payments under the plan. An example is provided to show how this works for an open-end loan, in light of particular credit limits, monthly billing cycles, minimum payments due, fees or interest, and payments made, to determine whether the credit plan is a covered loan and why.

3(b)(3)

As noted above, proposed § 1041.3(b)(2) encompassed both covered longer-term balloon-payment loans and certain other covered longer-term loans. Because the Bureau is finalizing a separate definition of covered longer-term balloon-payment loans in § 1041.3(b)(2), new § 1041.3(b)(3) of the final rule addresses covered loans that are neither covered short-term loans nor covered longer-term balloon-payment loans, but rather are covered longer-term loans that are only subject to provisions of the rule relating to payment practices.

Specifically, proposed § 1041.3(b)(2) would have extended coverage to longer-term loans with a total cost of credit exceeding a rate of 36 percent per annum if the lender or service provider also obtains a leveraged payment mechanism as defined in proposed § 1041.3(c) or vehicle security as defined in proposed § 1041.3(d) in connection with the loan before, at the same time, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive. Under proposed § 1041.2(a)(8), this type of covered loan would have been defined as a covered longer-term loan.

The Bureau received extensive comments on covered longer-term loans, but key changes in the final rule mitigate most of the points made in those comments. As discussed above in connection with § 1041.2(a)(8), many commenters offered views on the prongs of the definition of covered longer-term loan as triggers for whether such loans should be subject not only to the payment requirements of part 1041 but also its underwriting requirements. As just discussed above and discussed more fully in part I and in Market Concerns—Underwriting, the Bureau has decided not to apply these underwriting requirements to longer-term loans unless they involve balloon payments as defined in §§ 1041.2(a)(7) and 1041.3(b)(2). However, the Bureau believes that such longer-term loans may still pose substantial risk to consumers with regard to certain lender payment practices, and therefore is finalizing subpart C of the rule to apply to covered longer-term loans. It thus remains relevant to describe the parameters of such loans in § 1041.3(b)(3) of the final rule, which continues to provide the substantive content for the parallel definition of covered longer-term loans in § 1041.2(a)(8) of the final rule.

In light of this decision about the policy interventions, the Bureau has also decided to narrow the definition of covered longer-term loans relative to the proposal both by relaxing the rate threshold and narrowing the focus to only loans involving the taking of a leveraged payment mechanism. Thus, § 1041.3(b)(3) of the final rule defines covered longer-term loans as loans that do not meet the definition of covered short-term loans under § 1041.3(b)(1) or of covered longer-term balloon-payment loans under § 1401.3(b)(2); for all remaining covered loans, two further limitations that were contained in the proposed rule apply, so that a loan only becomes a covered longer-term loan if both of the following conditions are also satisfied: The cost of credit for the loan exceeds a rate of 36 percent per annum, as measured in specified ways; and the lender or service provider obtains a leveraged payment mechanism as defined in § 1041.3(c) of the final rule.

As described above in connection with the definition of cost of credit in § 1041.2(a)(6), the Bureau has decided to relax the rate threshold in the final rule by basing the threshold on the annual percentage rate as defined in Regulation Z rather than the total cost of credit concept used in the Military Lending Act. The final rule retains the numeric threshold of 36 percent, however, since, as the proposal explained more fully, that annual rate is grounded in many established precedents of Federal and State law.

With regard to the taking of leveraged payment mechanisms or vehicle security as part of the definition of covered longer-term loan, as discussed in more detail below in connection with

§ 1041.3(c), the Bureau has narrowed the definition to focus solely on loans that involve types of leveraged payment mechanisms that enable a lender to pull funds directly from a consumer's account. Accordingly, a loan that involves vehicle security may be a covered longer-term loan if it involves a leveraged payment mechanism under § 1041.3(c), but not because it involves vehicle security in its own right.

The final rule also modifies and clarifies certain details of timing about when status as a covered longer-term loan is determined, in light of the fact that such loans are only subject to the payment requirements under the final rule. With regard to the rate threshold, it is measured at the time of consummation for closed-end credit. For open-end credit, it is measured at consummation and, if the cost of credit at consummation is not more than 36 percent per annum, again at the end of each billing cycle for open-end credit. Once open-end credit meets the threshold, it is treated as doing so for the duration of the plan. The rule also provides a rule for calculating the cost of credit in any billing cycle in which a lender imposes a charge included in the cost of credit where the principal balance is $0. The definition of leveraged payment mechanisms is also truncated, as mechanisms based on access to employer payments or payroll deduction repayments are no longer germane to a policy intervention that is limited solely to the payment practices in § 1041.8 of the final rule. Also, vehicle security is no longer relevant to determining coverage of longer-term loans. The Bureau has also omitted language providing a 72-hour window for determining coverage as a longer-term loan from the final rule, as that was driven largely by the need for certainty on underwriting. In short, the two major modifications to this provision as it had been set forth in the proposal are further clarification of how the 36 percent rate is measured for open-end credit and the removal of any references to vehicle security and other employment-based sources of repayment.

The commentary to proposed § 1041.3(b)(2) has been extensively revised in light of the other restructuring that has occurred in § 1041.3(b) of the final rule. To summarize briefly, comments 3(b)(3)–1 to 3(b)(3)–3 and 3(b)(3)(ii)–1 to 3(b)(3)(ii)–2 largely recapitulate the provisions of § 1041.3(b)(3) of the final rule in greater detail, as well as clarifying their practical application through a series of examples. Two key points of clarification, however, concern timing. First, comment 3(b)(3)–3 makes clear that a loan may become a covered longer-term loan at any such time as both requirements of § 1041.3(b)(3)(i) and (ii) are met, even if they were not met when the loan was initially made. Second, comment 3(b)(3)(ii)–1 states that the condition in § 1041.3(b)(3)(ii) is satisfied if a lender or service provider obtains a leveraged payment mechanism before, at the same time as, or after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan, regardless of the means by which the lender or service provider obtains a leveraged payment mechanism.

For the reasons stated in view of the comments, the Bureau is finalizing § 1041.3(b)(3) and the commentary as described above.

3(c) Leveraged Payment Mechanism

Proposed § 1041.3(c) would have set forth three ways that a lender or a service provider could obtain a leveraged payment mechanism that, if other conditions were met under proposed § 1041.3(b)(2), would bring a longer-term loan within the proposed coverage of proposed part 1041. Specifically, the proposal would have treated a lender as having obtained a leveraged payment mechanism if the lender or service provider had the right to initiate a transfer of money from the consumer's account to repay the loan, the contractual right to obtain payment from the consumer's employer or other payor of expected income, or required the consumer to repay the loan through payroll deduction or deduction from another source of income. In all three cases, the consumer would be required, under the terms of an agreement with the lender or service provider, to cede autonomy over the consumer's account or income stream in a way that the Bureau believed, as stated in the proposal, would change incentives to determine the consumer's ability to repay the loan and can exacerbate the harms the consumer experiences if the consumer does not have the ability to repay the loan and still meet the consumer's basic living expenses and major financial obligations. As explained in the section-by-section analysis of proposed §§ 1041.8 and 1041.9, the Bureau preliminarily found that it is an unfair and abusive practice for a lender to make such a loan without determining that the consumer has the ability to repay.

Proposed § 1041.3(c)(1) generally would have provided that a lender or a service provider obtains a leveraged payment mechanism if it has the right to initiate a transfer of money, through any means, from a consumer's account (as defined in proposed § 1041.2(a)(1)) to satisfy an obligation on a loan. For example, this would occur with a post-dated check or preauthorization for recurring electronic fund transfers. However, the proposed regulation did not define leveraged payment mechanism to include situations in which the lender or service provider initiates a one-time electronic fund transfer immediately after the consumer authorizes such transfer.

In the proposal, the functionality of this determination was that it served as one of three preconditions to the underwriting of such covered longer-term loans, along with the provisions of proposed § 1041.3(c)(2) and (3). In light of other changes to the proposed rule, however, the final rule is no longer covering the underwriting of covered longer-term loans (other than balloon-payment loans), but simply determining whether they are subject to the intervention for payment practices in § 1041.8 of the final rule. As described above, as a result of the decision to apply only the rule's payment requirements to covered-longer term loans, the Bureau is not finalizing the provisions of proposed § 1041.3(c)(2) and (3), which covered payment directly from the employer and repayment through payroll deduction, respectively, as they are no longer germane to the purpose of this policy intervention. With the elimination of those two provisions, § 1041.3(c)(1) is being reorganized more simply as just part of § 1041.3(c) of the final rule to focus on forms of leveraged payment mechanism that involve direct access to consumers' transaction accounts.

Proposed § 1041.3(c)(1) generally would have provided that a lender or a service provider obtains a leveraged payment mechanism if it has the right to initiate a transfer of money, through any means, from a consumer's account (as defined in proposed § 1041.2(a)(1)) to satisfy an obligation on a loan. For example, this would occur with a post-dated check or preauthorization for recurring electronic fund transfers. However, the proposed regulation did not define leveraged payment mechanism to include situations in which the lender or service provider initiates a one-time electronic fund transfer immediately after the consumer authorizes such transfer.

As proposed comment 3(c)(1)–1 explained, the key principle that makes a payment mechanism leveraged is whether the lender has the ability to ''pull'' funds from a consumer's account without any intervening action or further assent by the consumer. In those cases, the lender's ability to pull

payments from the consumer's account gives the lender the ability to time and initiate is to coincide with expected income flows into the consumer's account. This means that the lender may be able to continue to obtain payment (as long as the consumer receives income and maintains the account) even if the consumer does not have the ability to repay the loan while meeting his or her major financial obligations and basic living expenses. In contrast, the Bureau stated in the section-by-section analysis of proposed § 1041.3(c)(1) that a payment mechanism in which the consumer ''pushes'' funds from his or her account to the lender does not provide the lender leverage over the account in a way that changes the lender's incentives to determine the consumer's ability to repay the loan or exacerbates the harms the consumer experiences if the consumer does not have the ability to repay the loan.

Proposed comment 3(c)(1)–2 provided examples of the types of authorizations for lender-initiated transfers that constitute leveraged payment mechanisms. These include checks written by the consumer, authorizations for electronic fund transfers (other than immediate one-time transfers as discussed further below), authorizations to create or present remotely created checks, and authorizations for certain transfers by account-holding institutions (including a right of set-off). Proposed comment 3(c)(1)–4 explained that a lender does not obtain a leveraged payment mechanism if a consumer authorizes a third party to transfer money from the consumer's account to a lender as long as the transfer is not made pursuant to an incentive or instruction from, or duty to, a lender or service provider. Proposed comment 3(c)(1)–3 contained similar language.

As noted above, proposed § 1041.3(c)(1) provided that a lender or service provider does not obtain a leveraged payment mechanism by initiating a one-time electronic fund transfer immediately after the consumer authorizes the transfer. This provision is similar to what the Bureau proposed in § 1041.15(b), which exempts lenders from providing the payment notice when initiating a single immediate payment transfer at the consumer's request, as that term is defined in proposed § 1041.14(a)(2), and is also similar to what the Bureau proposed in § 1041.14(d), which permits lenders to initiate a single immediate payment transfer at the consumer's request even after the prohibition in proposed § 1041.14(b) on initiating further payment transfers has been triggered.

Accordingly, proposed comment 3(c)(1)–3 clarified that if the loan agreement between the parties does not otherwise provide for the lender or service provider to initiate a transfer without further consumer action, the consumer may authorize a one-time transfer without causing the loan to be a covered loan. Proposed comment 3(c)(1)–3 further clarified that the term ''immediately'' means that the lender initiates the transfer after the authorization with as little delay as possible, which in most circumstances will be within a few minutes. Proposed comment 3(c)(1)–4 took the opposite perspective, noting that a lender or service provider does not initiate a transfer of money from a consumer's account if the consumer authorizes a third party, such as a bank's automatic bill pay service, to initiate a transfer of money from the consumer's account to a lender or service provider as long as the third party does not transfer the money pursuant to an incentive or instruction from, or duty to, a lender or service provider.

In the proposal, the Bureau noted that it anticipated that scenarios involving authorizations for immediate one-time transfers would only arise in certain discrete situations. For closed-end loans, a lender would be permitted to obtain a leveraged payment mechanism more than 72 hours after the consumer has received the entirety of the loan proceeds without the loan becoming a covered loan. Thus, in the closed-end context, this exception would only be relevant if the consumer was required to make a payment within 72 hours of receiving the loan proceeds—a situation which is unlikely to occur. However, the Bureau acknowledged that the situation may be more likely to occur with open-end credit. According to the proposal, longer-term open-end loans could be covered loans if the lender obtained a leveraged payment mechanism within 72 hours of the consumer receiving the full amount of the funds which the consumer is entitled to receive under the loan. Thus, if a consumer only partially drew down the credit plan, but the consumer was required to make a payment, a one-time electronic fund transfer could trigger coverage without the one-time immediate transfer exception.

The Bureau received a few comments on § 1041.3(c)(1) of the proposed rule and the related commentary. One commenter contended that the definition of leveraged payment mechanism is overly broad as between different types of push and pull transactions. Another commenter claimed that the Bureau was improperly attributing motive to the practices of different types of lenders that were using the same leveraged payment mechanisms, that its treatment of leveraged payment mechanisms would have more than a minimal effect on lenders that were already engaged in substantial underwriting, and that the proposed rule and commentary were misaligned with respect to transactions that push or pull money from the consumer's account.

In response to these comments, the Bureau concludes that, in general, its definition is reasonably calibrated to address the core practice at issue here, which is a lender or service provider establishing a right to initiate payment directly from the consumer without any intervening action or further assent from the consumer, subject to certain narrow limitations. The definition of leveraged payment mechanism thus is not overbroad for the purposes served by the rule. As for the final set of comments, the Bureau did not undertake any inquiry or determine any of these issues based on speculation about the motivations of particular lenders; rather, it presumed that lenders that secure leveraged payment mechanisms do so for a mix of reasons. The Bureau also acknowledges at least some tension between the proposed rule and the related commentary in their treatment of push and pull transactions from a consumer's account. On further consideration, however, the Bureau has concluded that with the focus now solely on payment practices, push transactions are no longer germane to the analysis and thus has revised proposed comments 3(c)(1)–1 and 3(c)(1)–4 accordingly.

In light of these comments received and the responses, the Bureau is finalizing proposed § 1041.3(c)(1) as part of § 1041.3(c), and is revising the definition of leveraged payment mechanism to align more closely with the rule's payment provisions. Specifically, the Bureau is revising the proposed language that would have excluded a one-time immediate transfer from the definition. Under the definition as finalized, the exception applies if the lender initiates a single immediate payment transfer at the consumer's request, as defined in § 1041.8(a)(2). As discussed in the section-by-section analysis of §§ 1041.8 and 1041.9, transfers meeting the definition of a single immediate payment transfer at the consumer's request are excluded from the cap on failed payment attempts and the payment notice requirements. The Bureau has concluded that using the same definition for purposes of

excluding certain transfers from the definition of leveraged payment mechanism is important for the consistency of the rule.

One practical result of this revision is that, whereas the proposed exclusion from the definition of leveraged payment mechanism would have applied only to a one-time electronic fund transfer, the exclusion as finalized permits the lender to initiate an electronic fund transfer or process a signature check without triggering coverage under § 1041.3(b)(3), provided that the lender initiates the transfer or processes the signature check in accordance with the timing and other conditions in § 1041.8(a)(2). The Bureau notes, however, that the definition of single immediate payment transfer at the consumer's request applies only to the first time that a lender initiates the electronic fund transfer or processes the signature check pursuant to the exception. It does not apply to the re-presentment or re-submission of a transfer or signature check that is returned for nonsufficient funds. If a transfer or signature check is returned, the lender could still work with the consumer to obtain payment in cash or to set up another transfer meeting the definition of single immediate payment transfer at the consumer's request.

The Bureau is finalizing the remainder of the commentary to this provision, which is reordered as comments 3(c)–1 to 3(c)–4 of the final rule, with revisions to the language consistent with the revisions made to the definition of leverage payment mechanism in § 1041.3(c).

3(d) Exclusions for Certain Credit Transactions

As discussed above, the Bureau decided to narrow how part 1041 applies to covered longer-term loans to focus only on payment practices. Accordingly, the detailed discussion of vehicle security that appeared in proposed § 1041.3(d) in connection with the definition of covered longer-term loan under proposed § 1041.3(b)(2) is no longer germane to the final rule. As noted in the section-by-section analysis of § 1041.2(a)(19) of the final rule, the Bureau has now moved certain language from proposed § 1041.3(d) describing vehicle security to § 1041.2(a)(19) of the final rule, since vehicle security is relevant to application to § 1041.6 of the final rule. Thus the remainder of § 1041.3 is being renumbered, and all references to the provisions of proposed § 1041.3(e) have now been finalized as § 1041.3(d), with further revisions and additions as described below.

Proposed § 1041.3(e) would have excluded specific types of credit from part 1041, specifically purchase money security interest loans extended solely for the purchase of a good, real estate secured loans, certain credit cards, student loans, non-recourse pawn loans in which the consumer does not possess the pledged collateral, and overdraft services and overdraft lines of credit. The Bureau found as a preliminary matter that notwithstanding the potential term, cost of credit, repayment structure, or security of these loans, they arise in distinct markets that may pose a somewhat different set of concerns for consumers. At the same time, the Bureau was concerned about the risk that these exclusions could create avenues for evasion of the proposed rule. In the Accompanying RFI, the Bureau also solicited information and additional evidence to support further assessment of whether other categories of loans may pose risks to consumers where lenders do not determine the consumer's ability to repay. The Bureau also emphasized that it may determine in a particular supervisory or enforcement matter or in a later rulemaking, in light of evidence available at the time, that the failure to assess ability to repay when making a loan excluded from coverage here may nonetheless be an unfair or abusive act or practice.

The Bureau did not receive any comments on the brief opening language in § 1041.3(e) of the proposed rule, and is finalizing the language which notes that the exclusions listed in § 1041.3(d) of the final rule apply to certain transactions, with slight modifications for clarity.

The Bureau did, however, receive some general comments about the topic of exclusions from the scope of coverage of the proposed rule. First, various consumer groups argued that there should be no exclusions or exemptions from coverage under the rule, which would weaken its effectiveness.

A ''fintech'' company urged the Bureau to develop a ''sandbox'' type of model to allow innovation and to encourage the development of alternative loan models. Another such company offered a more complicated and prescriptive regulatory scheme establishing a safe harbor, lifting income verification requirements for loans with low loss rates and loans with amortizing payment plans, and full relief from cooling-off periods if borrowers repay their loans on time with their own money. One commenter during the SBREFA process argued for a broad exemption from the rule for payday lenders in States that permit such loans pursuant to existing regulatory frameworks governing payday lending. Another sought an exemption for Tribal lenders, asserting that the Bureau lacked statutory authority to treat them as covered by the rule. Many finance companies, and others commenting on their behalf, offered reasons why the Bureau should omit traditional installment loans from coverage under the rule; they also presented different formulations of how this result could be achieved.

The Bureau does not agree that the exclusions listed in the proposal should be eliminated, for all the reasons set out in the discussion of those specific exclusions below (and notes that a further exclusion and two conditional exemptions have been added to or revised from the proposed rule). As for the notion of a ''sandbox'' approach to financial innovation, the Bureau has developed its own approach to these issues, having created and operated its Project Catalyst for several years now as a means of carrying out the Bureau's statutory objective to ensure that ''markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation.'' [435] The suggestion that a distinct and highly prescriptive regulatory approach should be adopted in preference to the framework actually set out in the proposal is not supported by any data or analysis of this market.

The arguments for an exemption of payday lender in those States where they are permitted to make such loans are directly contrary to all of the data and analysis contained in the extended discussions above in part II and below in Market Concerns—Underwriting. All of the risks and harms that the Bureau has identified from covered loans occur, by definition, in those States that authorize such lending, rather than in the 15 States and the District of Columbia that have effectively banned such lending under their State laws. The arguments raised on behalf of Tribal lenders have also been raised in Tribal consultations that the Bureau has held with federally recognized Indian tribes, as discussed in part III, and rest on what the Bureau believes is a misreading of the statutes and of governing Federal law and precedents governing the scope of Tribal immunity.[436]

Continued

As for the points raised by finance companies and others about traditional installment loans, they are largely being addressed by various modifications to the proposed rule, including by not imposing underwriting requirements for covered longer-term loans (other than covered longer-term balloon-payment loans), by adopting the exclusions and conditional exemptions, and, as some commenters suggested, by adopting the definition of cost of credit under TILA in place of the definition of total cost of credit in the proposed rule.

3(d)(1) Certain Purchase Money Security Interest Loans

Proposed § 1041.3(e)(1) would have excluded from coverage under proposed part 1041 loans extended for the sole and express purpose of financing a consumer's initial purchase of a good when the good being purchased secures the loan. Accordingly, loans made solely to finance the purchase of, for example, motor vehicles, televisions, household appliances, or furniture would not be subject to the consumer protections imposed by proposed part 1041 to the extent the loans are secured by the good being purchased. Proposed comment 3(e)(1)–1 explained the test for determining whether a loan is made solely for the purpose of financing a consumer's initial purchase of a good. If the item financed is not a good or if the amount financed is greater than the cost of acquiring the good, the loan is not solely for the purpose of financing the initial purchase of the good. Proposed comment 3(e)(1)–1 further explained that refinances of credit extended for the purchase of a good do not fall within this exclusion and may be subject to the requirements of proposed part 1041.

Purchase money loans are typically treated differently than non-purchase money loans under the law. The FTC's Credit Practices Rule generally prohibits consumer credit in which a lender takes a nonpossessory security interest in household goods but makes an exception for purchase money security interests.[437] The Federal Bankruptcy Code, the UCC, and some other State laws also apply different standards to purchase money security interests. This differential treatment facilitates the financing of the initial purchase of relatively expensive goods, which many consumers would not be able to afford without a purchase money loan. In the proposal, the Bureau stated that it had not yet determined whether purchase money loans pose similar risks to consumers as the loans covered by proposed part 1041. Accordingly, the Bureau proposed not to cover such loans at this time.

A number of commenters expressed concern about the proposal's use of a sole purpose test for determining when a loan made to finance the consumer's initial purchase of a good gives rise to a purchase money security interest. Other alternatives were suggested, including a primary purpose test or perhaps the definition used in the UCC adopted in many States. Some commenters expressed concerns about motor vehicle purchases, in particular, noting that where the amount financed includes not simply the vehicle itself, but also the costs of ancillary products such as an extended service contract or a warranty, or other related costs such as taxes, tags, and title, it may be unclear whether the loan would lose its status as a purchase money security interest loan and become a covered loan instead. Others contended that covering the refinancing of credit that was extended for the purchase of a good could seem inconsistent with the terms of the exclusion itself, and could also bring back within the proposed rule's scope of coverage many motor vehicle loans where the total cost of credit would exceed a rate of 36 percent per annum. These commenters again were particularly concerned about motor vehicle loans, which they noted often exceed a 100 percent lien-to-value ratio because additional products, such as add-on products like extended warranties, are often financed along with the price of the vehicle.

In response to these comments, the Bureau streamlined and added language to proposed comment 3(e)(1)–1 to specify that a loan qualifies for this exclusion even if the amount financed under the loan includes Federal, State, or local taxes or amounts required to be paid under applicable State and Federal licensing and registration requirements. The Bureau recognized that these mandatory and largely unavoidable items should not cause a loan to lose its excluded status. Yet the same considerations do not apply to ancillary products that are being sold along with a vehicle or other household good, but are not themselves the good in which the lender takes a security interest as a condition of the credit. As to the concern about refinances of credit extended for the purchase of a good, and especially the concern that this provision could bring back within the proposed rule's scope of coverage many motor vehicle loans where the total cost of credit would exceed a rate of 36 percent per annum, the Bureau concluded that other changes made elsewhere in the final rule largely mitigate these concerns. In particular, the Bureau notes that the definition of total cost of credit in § 1041.2(a)(18) of the proposed rule has now been replaced with the definition of cost of credit in § 1041.2(a)(6) of the final rule, which aligns this term with Regulation Z. The Bureau also notes that these concerns about refinancing are most applicable to covered longer-term loans, which are no longer subject to underwriting criteria in the final rule (with the exception of covered longer-term balloon-payment loans). And though they are subject to the payment provisions, other changes in the coverage and the scope of the exceptions for certain payment transfers mitigate the effects for credit unions, in particular, that were the source of many of the comments on this issue.

For these reasons, the Bureau is finalizing the regulation text as proposed, and the revised commentary as explained above as § 1041.3(d)(1) in the final rule.

3(d)(2) Real Estate Secured Credit

Proposed § 1041.3(e)(2) would have excluded from coverage under proposed part 1041 loans that are secured by real property, or by personal property used as a dwelling, and in which the lender records or perfects the security interest. The Bureau stated that even without this exclusion, very few real estate secured loans would meet the coverage criteria set forth in proposed § 1041.3(b). Nonetheless, the Bureau preliminarily found that a categorical exclusion would be appropriate. For the most part, these loans are already subject to Federal consumer protection laws, including, for most closed-end loans, ability-to-repay requirements under Regulation Z § 1026.43. The proposed requirement that the security interest in the real estate be recorded or perfected also strongly discourages attempts to use this exclusion for sham or evasive purposes. Recording or perfecting a security interest in real estate is not a cursory exercise for a lender—recording fees are often charged and documentation is required. As proposed comment 3(e)(2)–1 explained, if the lender does not record or otherwise perfect the security interest in the property during the term of the loan, the loan does not fall under this exclusion and may be subject to the requirements of proposed part 1041. The Bureau did not receive any comments on this portion of the proposed rule, and is

that Tribal Lending Entities must comply with civil investigative demands issued by the CFPB); *see also Otoe-Missouria Tribe of Indians* v. *New York State Dep't of Fin. Servs.,* 769 F.3d 105, 107 (2d Cir. 2014); *Donovan* v. *Coeur d'Alene Tribal Farms,* 751 F.2d 1113, 1115 (9th Cir. 1985).

[437] 16 CFR 444.2(a)(4).

finalizing this exclusion and the commentary as proposed, with formatting changes only.

3(d)(3) Credit Cards

Proposed § 1041.3(e)(3) would have excluded from coverage under proposed part 1041 credit card accounts meeting the definition of credit card account under an open-end (not home-secured) consumer credit plan in Regulation Z § 1026.2(a)(15)(ii), rather than products meeting the more general definition of credit card accounts under Regulation Z § 1026.2(a)(15). By focusing on the narrower category, the exclusion would apply only to credit card accounts that are subject to the Credit CARD Act of 2009,[438] which provides various heightened safeguards for consumers. These protections include a limitation that card issuers cannot open a credit card account or increase a credit line on a card account unless the card issuer first considers the consumer's ability to repay the required payments under the terms of the account, as well as other protections such as limitations on fees during the first year after account opening, late fee restrictions, and a requirement that card issuers give consumers a reasonable amount of time to pay their bill.[439]

The Bureau preliminarily found that potential consumer harms related to credit card accounts are more appropriately addressed by the CARD Act, its implementing regulations, and other applicable law. At the same time, if the Bureau were to craft a broad exclusion for all credit cards as generally defined under Regulation Z, the Bureau would be concerned that a lender seeking to evade the requirements of the rule might seek to structure a product in a way that is designed to take advantage of this exclusion. The Bureau therefore proposed a narrower definition, focusing only on those credit card accounts that are subject to the full range of protections under the CARD Act and its implementing regulations. Among other requirements, the regulations imposing the CARD Act prescribe a different ability-to-repay standard that lenders must follow, and the Bureau found as a preliminary matter that the combined consumer protections governing credit card accounts subject to the CARD Act are sufficient for that type of credit.

One commenter stated that all credit cards should be excluded from coverage under the rule, not just those subject to the CARD Act. Another industry commenter found it noteworthy that credit cards are not covered under the rule even though they can result in a cycle of debt. Consumer groups argued that this exclusion should be narrowed to lower-cost mainstream credit cards in harmony with the provisions of the Military Lending Act and implementing regulations. Other narrowing categories were also suggested in that comment.

For all the reasons stated in the proposal, the Bureau does not find it sensible to expand coverage in this exclusion beyond those credit cards that are subject to the various heightened safeguards and protections for consumers in the CARD Act. At the same time, the reasons for drawing the boundaries of this exclusion around that particular universe of credit cards also militate against narrowing the scope of the exclusion further. Accordingly, the Bureau is finalizing this exclusion as proposed, with formatting changes only. The Bureau notes that ''hybrid prepaid-credit card'' products, which are treated as open-end (not home-secured) consumer credit plans under the final prepaid accounts rule, will be excluded from the scope of this final rule under § 1041.3(d)(3).[440]

3(d)(4) Student Loans

Proposed § 1041.3(e)(4) would have excluded from coverage under proposed part 1041 loans made, insured, or guaranteed pursuant to a Federal student loan program, and private education loans. The Bureau stated that even without this exclusion, very few student loans would meet the coverage criteria set forth in proposed § 1041.3(b). Nonetheless, the Bureau preliminarily determined that a categorical exclusion is appropriate. Federal student loans are provided to students or parents meeting eligibility criteria established by Federal law and regulations, such that the protections afforded by this proposed rule would be unnecessary. Private student loans are sometimes made to students based on their future potential ability to repay (as distinguished from their current ability), but they are typically co-signed by a party with financial capacity. These loans raise discrete issues that may warrant further attention in the future, but the Bureau found as a preliminary matter that they were not appropriately considered along with the types of loans at issue in this rulemaking. The Bureau stated in the proposal that it would continue to monitor the student loan servicing market for trends and developments; for unfair, deceptive, or abusive practices; and to evaluate possible policy responses, including potential rulemaking.

Consumer groups contended that student loans should not be excluded from coverage under the rule. They noted that the effect of deleting this exclusion would likely be limited to private education loans, since the total cost of credit for Federal student loans in the proposed rule would likely not exceed a rate of 36 percent per annum. The Bureau continues to judge that student loans are specialized in nature, are subject to certain other regulatory constraints more specifically contoured to the loan product, and are generally not appropriately considered among the types of loans at issue here. The Bureau did not receive any other comments on this portion of the proposed rule, and is finalizing this exclusion as proposed, with formatting changes only.

3(d)(5) Non-Recourse Pawn Loans

Proposed § 1041.3(e)(5) generally would have excluded from coverage, under proposed part 1041, loans secured by pawned property in which the lender has sole physical possession and use of the pawned property for the entire term of loan, and for which the lender's sole recourse if the consumer does not redeem the pawned property is the retention and disposal of the property. Proposed comment 3(e)(5)–1 explained that if any consumer, including a co-signor or guarantor, is personally liable for the difference between the outstanding loan balance and the value of the pawned property, then the loan does not fall under this exclusion and may be subject to the requirements of proposed part 1041.

The Bureau preliminarily found that bona fide, non-recourse pawn loans generally pose somewhat different risks to consumers than loans covered under proposed part 1041. As described in part II, non-recourse pawn loans involve the consumer physically relinquishing control of the item that secures the loan during the term of the loan. The Bureau stated that consumers may be more likely to understand and appreciate the risks associated with physically turning over an item to the lender when they are required to do so at consummation. Moreover, in most situations, the loss of a non-recourse pawned item over which the lender has sole physical possession during the term of the loan is less likely to affect the rest of the consumer's finances than is either a leveraged payment mechanism or vehicle security. For instance, a pawned item of this nature may be valuable to the consumer, but the consumer most likely does not rely on the pawned item for

---

[439] 15 U.S.C. 1665e; *see also* 12 CFR 1026.51(a); supplement I to 12 CFR part 1026.

[440] 81 FR 83934 (Nov. 22, 2016).

transportation to work or to pay basic living expenses or major financial obligations. Otherwise, the consumer likely would not have pawned the item under those terms. Finally, because the loans are non-recourse, in the event that a consumer is unable to repay the loan, the lender must accept the pawned item as fully satisfying the debt, without further collection activity on any remaining debt obligations. In all of these ways, the Bureau stated in the proposal that pawn transactions appear to differ significantly from the secured loans that would be covered under proposed part 1041.

One commenter claimed that the same reasons for excluding non-recourse pawn loans applies to vehicle title loans, and that vehicle title loans may even be preferred by consumers as the consumer retains the use of the vehicle and they can be less costly. Another similarly argued that the Bureau ignored the principle of a level playing field among different financial products by excluding high-cost alternatives like pawn loans, which can be even more costly at times than payday loans. Consumer groups suggested that the exclusion should be narrowed only to pawn loans where the loan does not exceed the fair market value of the good.

Another commenter representing pawnbrokers argued that the exclusion for pawn loans is justified because pawn transactions function as marketed, they are less likely than other loan products to affect the rest of the consumer's finances, consumers do not experience very high default rates or aggressive collection efforts, certain other harms identified in the proposal do not occur in the pawn market, State and local government regulation is working well, consumers are given clear disclosures on their pawn ticket, and loan terms are longer than the typical 14-day payday loan.

The Bureau does not find that these comments justify any modifications to this provision, and therefore finalizes the exclusion and the commentary as proposed, with formatting changes only. The first two comments do not provide any tangible support for eliminating the rationale for the exclusion of non-recourse pawn loans, and issues involving vehicle title loans are addressed elsewhere, as in Market Concerns—Underwriting, which describes the special risks and harms to consumers of repossession of their vehicle, which would potentially cause them to lose their basic transportation to work and to manage their everyday affairs. The suggestion that certain pawn loans should be covered loans depending on the relationship between the amount of the loan and the fair market value of the good would introduce needless complexity into the rule without discernible benefits. The Bureau notes that non-recourse pawn loans had previously been referenced in the definition of non-covered bridge loan in proposed § 1041.2(a)(13), which has now been omitted from the final rule. To the extent that provision would have restricted the making of such loans in connection with the underwriting criteria for covered longer-term loans, those provisions are not being included in the final rule. To the extent that provision would have restricted the making of such loans in connection with the requirements in the rule for making covered short-term or longer-term balloon-payment loans, the Bureau concludes that various other changes made in §§ 1041.5 and 1041.6 address the subject of those restrictions in ways that obviate the need for defining the term non-covered bridge loan. However, note that any type of loan, including pawn loans, if used to bridge between multiple covered short-term loans or covered longer-term balloon-payment loans, are factors which could indicate that a lender's ability-to-repay determinations are unreasonable. *See* comment 5(b)–2.

3(d)(6) Overdraft Services and Lines of Credit

Proposed § 1041.3(e)(6) would have excluded from coverage under proposed part 1041 overdraft services on deposit accounts as defined in 12 CFR 1005.17(a), as well as payments of overdrafts pursuant to a line of credit subject to Regulation Z, 12 CFR part 1026. Proposed comment 3(e)(6)–1 noted that institutions could rely on the commentary to 12 CFR 1005.17(a) in determining whether credit is an overdraft service or an overdraft line of credit that is excluded from the requirements of part 1041. Overdraft services generally operate on a consumer's deposit account as a negative balance, where the consumer's bank processes and pays certain payment transactions for which the consumer lacks sufficient funds in the account and imposes a fee for the service as an alternative to either refusing to authorize the payment (in the case of most debit and ATM transactions and ACH payments initiated from the consumer's account) or rejecting the payment and charging a non-sufficient funds fee (in the case of other ACH payments as well as paper checks). Overdraft services have been treated separately from the provisions of Regulation Z in certain circumstances, and are subject to specific rules under EFTA and the Truth in Savings Act (TISA) and their respective implementing regulations.[441] In contrast, overdraft lines of credit are separate open-end lines of credit under Regulation Z that have been linked to a consumer's deposit account to provide automatic credit draws to cover the processing of payments for which the funds in the deposit account are insufficient.

As discussed above in part II, the Bureau is engaged in research and other activity in anticipation of a separate rulemaking on overdraft products and practices.[442] Given that overdraft services and overdraft lines of credit involve complex overlays with rules about payment processing, deposit accounts, set-off rights, and other forms of depository account access, the Bureau preliminarily found that any discussion of whether additional regulatory protections are warranted for those two products should be reserved for that rulemaking. Accordingly, the Bureau proposed excluding both types of overdraft products from the scope of this rule, using definitional language from Regulation E to distinguish both overdraft services and overdraft lines of credit from other types of depository credit products.

One industry commenter argued that the Bureau ignored the principle of a level playing field among different financial products by excluding high-cost alternatives like overdraft, which can be even more costly at times than payday loans. Consumer groups argued that the Bureau should eliminate this exclusion or limit it in various ways. The Bureau maintains the analysis presented in the proposed rule to conclude that overdraft services and lines of credit are unique products with a distinct regulatory history and treatment, which should be excluded from this rule and addressed on their own as a matter of supervision, enforcement, and regulation. The Bureau also did not find persuasive the suggestion that overdraft services and lines of credit should be covered in some partial manner, which would introduce needless complexity into the rule without discernible benefits. Having received no other comments on this portion of the proposed rule, the Bureau is finalizing this exclusion and the commentary as proposed, with formatting changes only.

[442] CFPB Study of Overdraft Programs White Paper; Checking Account Overdraft.

3(d)(7) Wage Advance Programs

Based on prior discussions with various stakeholders, the Bureau solicited and received comments in the proposal in connection with the definition of lender under proposed § 1041.2(a)(11) about some newly formed companies that are seeking to develop programs that provide innovative access to consumers' wages in ways that do not seem to pose the kinds of risks and harms presented by covered loans. Certain of these companies, but by no means all of them, are part of the ''fintech'' wave. Some are developing new products as an outgrowth of businesses focusing mainly on payroll processing, for example, whereas others are not associated with consumers' employers but rather are focused primarily on devising new means of advising consumers about how to improve their approach to cash management. The Bureau has consistently expressed interest in encouraging more experimentation in this space.

In particular, a number of these innovative financial products are seeking to assist consumers in finding ways to draw on the accrued cash value of wages they have earned but not yet been paid. Some of these products are doing so without imposing any fees or finance charges, other than a charge for participating in the program that is designed to cover processing costs. Others are developing different models that may involve fees or advances on wages not yet earned.

The Bureau notes that some efforts to give consumers access to accrued wages may not be credit at all. For instance, when an employer allows an employee to draw accrued wages ahead of a scheduled payday and then later reduces the employee's paycheck by the amount drawn, there is a quite plausible argument that the transaction does not involve ''credit'' because the employee may not be incurring a debt at all. This is especially likely where the employer does not reserve any recourse upon the payment made to the employee other than the corresponding reduction in the employee's paycheck.

Other initiatives are structured in more complicated ways that are more likely to constitute ''credit'' under the definition set forth in § 1041.2(a)(11) and Regulation Z. For example, if an employer cannot simply reduce the amount of an employee's paycheck because payroll processing has already begun, there may be a need for a mechanism for the consumer to repay the funds after they are deposited in the consumer's account.

The Bureau has decided in new § 1041.3(d)(7) to exclude such wage advance programs—to the extent they constitute credit—from coverage under the rule if they meet certain additional conditions. The Bureau notes that the payment of accrued wages on a periodic basis, such as bi-weekly or monthly, appears to be largely driven by efficiency concerns with payroll processing and employers' cash management. In addition, the Bureau believes that the kinds of risks and harms that the Bureau has identified with making covered loans, which are often unaffordable as a result of the identified unfair and abusive practice, may not be present where these types of innovative financial products are subject to appropriate safeguards. Accordingly, where advances of wages constitute credit, the Bureau is adopting § 1041.3(d)(7) to exclude them from part 1041 if the advances are made by an employer, as defined in the Fair Labor Standards Act, 29 U.S.C. 203(d), or by the employer's business partner, to the employer's employees, provided that the following conditions apply:

- The employee is not required to pay any charges or fees in connection with such an advance from the employer or the employer's business partner, other than a charge for participating in the program; and
- The entity advancing the funds warrants that it has no legal or contractual claim or remedy against the employee based on the employee's failure to repay in the event the amount advanced is not repaid in full; will not engage in any debt collection activities if the advance is not deducted directly from wages or otherwise repaid on the scheduled date; will not place the amount advanced as a debt with or sell the debt to a third party; and will not report the debt to a consumer reporting agency concerning the amount advanced.

The Bureau has considered the comments as well as its own analysis of this evolving marketplace and has concluded that new and innovative financial products that meet these conditions will tend not to produce the kinds of risks and harms that the Bureau's final rule is seeking to address with respect to covered loans. At the same time, nothing prevents the Bureau from reconsidering these assumptions in a future rulemaking if there is evidence that such products are harming consumers.

The Bureau has also adopted new commentary. Comment 3(d)(7)–1 notes that wage advance programs must be offered by the employee's employer or the employer's business partner, and examples are provided of such business partners, which could include companies that are involved in providing payroll processing, accounting services, or benefits programs to the employer. Comment 3(d)(7)(i)–1 specifies that the advance must be made only against accrued wages and must not exceed the amount of the employee's accrued wages, and provides further definition around the meaning of accrued wages. Comment 3(d)(7)(ii)(B)–1 clarifies that though the entity advancing the funds is required to warrant that it has no legal or contractual claim or remedy against the consumer based on the consumer's failure to repay in the event the amount advanced is not repaid in full, this provision does not prevent the entity from obtaining a one-time authorization to seek repayment from the consumer's transaction account.

For these reasons, the Bureau is adopting the exclusion for wage advance programs as described in § 1041.3(d)(7) of the final rule and the related commentary.

3(d)(8) No-Cost Advances

As discussed above in connection with § 1041.3(d)(7), the Bureau noted in the proposal, in connection with its discussion of the definition of lender in proposed § 1041.2(a)(11), that some newly formed companies are providing products or services that allow consumers to draw on wages they have earned but not yet been paid. Some of these companies are providing advances of funds and are doing so without charging any fees or finance charges, for instance by relying on voluntary tips. The proposal noted that others were seeking repayment and compensation through electronic transfers from the consumer's account. The Bureau sought comment on whether to exclude such entities and similar products from coverage under the rule.

The Bureau received limited comments on this issue, perhaps reflecting that it represents a fairly new business model in the marketplace, with some championing the potential benefits for consumers and others maintaining that no exclusions—or at least no additional exclusions—should be created to the rule as it was proposed. Some comments described in more detail how the evolution of these products was unfolding, how they operate, and how they may affect the marketplace and consumers. The Bureau has also had discussions with stakeholders in connection with its other functions, such as market monitoring, supervision, and general outreach, that have informed its views and understanding of these new products and methods of providing access to funds for more consumers. As discussed above in connection with

§ 1041.3(d)(7), the Bureau is aware that some of these products provide access to the consumer's own funds in the form of earned wages already accrued but not yet paid out because of administrative and payroll processes historically developed by employers, whereas other products rely on estimates of wages likely to be accrued, or accrued on average, and may make advances against expected wages that are not already earned and accrued.

The Bureau has carefully considered the comments it has received on these issues, as well as other information about the market that it has gleaned from the course of its regular activities. The Bureau has addressed certain wage advance programs offered by employers or their business partners in § 1041.3(d)(7), as discussed above. In addition, after further weighing the potential benefits to consumers of this relatively new approach, the Bureau has decided to create a specific exclusion in § 1041.3(d)(8) of the final rule to apply to no-cost advances, regardless of whether they are offered by an employer or its business partner. The exclusion contains similar conditions to § 1041.3(d)(7), except that it applies to advances of funds where the consumer is not required to pay *any* charge or fee (even a fee for participating in the program), and it is not limited to the accrued cash value of the employee's wages. Like § 1041.3(d)(7), the exclusion is further limited to situations in which the entity advancing the funds warrants to the consumer as part of the contract between the parties (i) that it has no legal or contractual claim or remedy against the consumer based on the consumer's failure to repay in the event the amount advanced is not repaid in full; and (ii) that with respect to the amount advanced to the consumer, the entity advancing the funds will not engage in any debt collection activities, place the debt with or sell the debt to a third party, or report the debt to a consumer reporting agency if the advance is not repaid on the scheduled date.

The exclusion in § 1041.3(d)(8) is thus designed to apply to programs relying solely on a ''tips'' model or otherwise providing emergency assistance at no cost to consumers. The Bureau estimates, based on its experience with the marketplace for different types of small-dollar loans, that products meeting the conditions of § 1041.3(d)(8) are likely to benefit consumers and unlikely to lead to the risks and harms described below in Market Concerns—Underwriting. Unlike the proposal, the Bureau has decided not to confine such no-fee advances solely to the employee context, as the very specific features of their product structure makes an exclusion from the rule for them likely to be beneficial for consumers across the spectrum. At the same time, nothing prevents the Bureau from reconsidering these assumptions in a future rulemaking if there is evidence that such products are harming consumers.

New comment 3(d)(8)–1 further provides that though an entity advancing the funds is required to warrant that it has no legal or contractual claim or remedy against the consumer based on the consumer's failure to repay in the event the amount advanced is not repaid in full, this provision does not prevent the entity from obtaining a one-time authorization to seek repayment from the consumer's transaction account.

For these reasons, the Bureau is adopting the exclusion for no-cost advances as described in § 1041.3(d)(8) of the final rule and the related commentary.

3(e) Conditional Exemption for Alternative Loans

In § 1041.11 of the proposed rule, the Bureau set forth a conditional exemption for loans with a term of between 46 days and 180 days, if they satisfied a set of conditions that generally followed those established by the NCUA under the Payday Alternative Loan (PAL) Program as described above in part II. The proposal did not, however, contain a comparable exemption for PAL loans with durations between 30 and 45 days, with 30 days being the minimum duration permitted for a PAL loan. Loans that met the conditions of the proposed conditional exemption would have been exempted from the proposed underwriting criteria applicable to covered longer-term loans, but still would have been subject to the requirements on payment practices and the notice requirements.

The Bureau received many general comments on the proposed exemption for PAL loans offered by credit unions and for comparable loan products if offered by other lenders. Some commenters argued that credit unions, as a class of entity, should be entirely exempted from all coverage under the rule. Others asked for more tailored exemptions for certain credit unions, such as for those with assets totaling less than $10 billion. Still others requested that credit unions be relieved of specific obligations under the rule, such as from compliance and record retention provisions (because their prudential regulators already address those matters); or from payment regulations for internal collections that do not incur fees; or from underwriting requirements for Community Development Financial Institutions (CDFIs) that provide beneficial credit and financial services to underserved markets and populations. By contrast, other commenters did not think the Bureau could or should create any special provisions for credit unions in particular. But some consumer and legal aid groups were supportive of the PAL program, which they viewed as beneficial to consumers and not easily subject to manipulation.

Some asserted that the PAL program was too constrained to support any broad provision of such loans, which were unlikely to yield a reasonable rate of return and thus not likely to generate a substantial volume of loans or to be sustainable for other lenders that are not depository institutions. Others argued that the proposed rule contained provisions that would go beyond the terms of the PAL program and increase complexity, and these additional provisions should be scaled back to mirror the PAL program more closely. Some commenters contended that the PAL program itself imposed a usury limit, which would be improper if adopted by the Bureau.

As discussed earlier, the Bureau has decided not to finalize the specific underwriting criteria with respect to covered longer-term loans (other than covered longer-term balloon-payment loans) at this time. However, the Bureau has decided, for the reasons explained below, to create a conditional exemption to the rule that applies to any alternative loan, which is a term that is defined more specifically below. In brief, an alternative loan is a covered loan that meets certain conditions and requirements that are generally consistent with the provisions of the PAL program as authorized and administered by the NCUA, including any such loan made by a Federal credit union that is in compliance with that program. The conditions and requirements of the exemption are modified in certain respects relative to the proposal to reflect that the conditional exemption now also encompasses loans of less than 45 days in duration to create a more comprehensive lending framework, unlike the coverage initially described in the proposed rule. In creating this exception, the Bureau agrees with the commenters that concluded, after observing the PAL program over time, that program is generally beneficial to consumers and not easily subject to manipulation in ways that would create risks and harms to consumers.

At the same time, the Bureau recognizes that one of the objectives set forth in the Dodd-Frank Act is for Federal consumer financial law to be enforced consistently without regard to the status of a person as a depository institution.[443] Consistent with that objective, the Bureau has set forth the elements of alternative loans in general form, so that lenders other than Federal credit unions—including both banks and other types of financial institutions—can offer comparable loans in accordance with essentially the same conditions and requirements. By doing so, the Bureau is making it possible for more lenders to offer this product, which will offer the opportunity to test the prediction made by some commenters that these loans would not scale if offered by lenders that are not depository institutions—a point on which the Bureau is not yet convinced either way.

The conditional exemption for alternative loans contained in § 1041.3(e) of the final rule is adopted pursuant to the Bureau's exemption authority in section 1022(b)(3) of the Dodd-Frank Act to ''conditionally or unconditionally exempt any class of covered persons, service providers, or consumer financial products or services, from any . . . rule issued under this title.'' [444] In this respect, Congress gave the Bureau broad latitude, simply stating that it should do so ''as [it] deems necessary or appropriate to carry out the purposes and objectives of this title.'' [445] The statutory language thus indicates that the Bureau should evaluate the case for creating such an exemption in light of its general purposes and objectives as Congress articulated them in section 1021 of the Dodd-Frank Act. In addition, when the Bureau exercises its exemption authority under section 1022(b)(3) of the Dodd-Frank Act, it is further required to take into consideration, as appropriate, three additional statutory factors: (i) The total assets of the class of covered persons; (ii) the volume of transactions involving consumer financial products or services in which the class of covered persons engages; and (iii) existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.[446]

Here, the Bureau perceives tangible benefit for consumers and for lenders by preserving the framework of the PAL program, which as discussed in part II has had some success in generating approximately $134.7 million in originations in 2016—up 9.7 percent from the 2015 levels—with relatively low costs of credit and relatively low levels of charge-offs for this particular market. In particular, the Bureau agrees with those commenters that noted the distinct elements of the PAL program, including the specified product features, are not configured to give rise to the kinds of risks and harms that are more evident with covered short-term loans or covered longer-term balloon-payment loans. In short, the PAL product thus far seems to be beneficial for consumers, and a conditional exemption to make such loans more broadly available to the public appears consistent with the Bureau's purpose ''of ensuring that all consumers have access to markets for consumer financial products and services.'' [447] Likewise, it seems consistent also with the Bureau's objective of ensuring that ''markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation,'' and the competition that alternative loans could provide to other types of covered loans may be helpful in protecting consumers ''from unfair . . . or abusive acts and practices.'' [448]

Turning to the statutory factors set out in section 1022(b)(3), the assets of the expected class of lenders is likely to remain relatively small in light of the thousands of smaller credit unions, as also is the volume of transactions, which many commenters did not seem to expect would scale into much larger loan programs, though the Bureau is not yet convinced on this point either way. In addition, the PAL program itself is regulated and overseen by NCUA with respect to the credit unions who offer it, which means that ''existing provisions of law . . . are applicable to [it]'' and it is reasonable at this time to judge that ''such provisions provide consumers with adequate protection'' in using this loan product, as Congress indicated was germane to determining the justifications for an exemption.[449] Moreover, under the general terms of § 1041.3(e), which allows all lenders to make alternative loans regardless of whether they are credit unions, the Bureau and other regulators, including State regulators, stand well-positioned to monitor the development of this loan product over time, and to make adjustments if the current experience of these loans as generally beneficial for consumers were perceived to be changing in ways that created greater consumer risks and harms.

The Bureau decided to create this conditional exemption in order to recognize that the NCUA is currently operating and supervising this established loan program for credit unions and to avoid duplicative overlap of requirements that could foster confusion and create undue burdens for certain lenders, in light of the Bureau's conclusion that loans made on terms that are generally consistent with the PAL program do not pose the same kinds of risks and harms for consumers as the types of covered loans addressed by this rule.[450] It also judges this approach to be superior to the broader scope of exemptions urged by various commenters, such as a complete exemption from the rule for all loans of all types made by credit unions (rather than just PAL loans), or even a conditional exemption from certain portions of the rule for all loans of all types made by credit unions. As for the comment that these loans impose a usury cap, the Bureau has explained elsewhere that an actual usury cap would flatly prohibit certain loans from being made based directly on the interest rate being charged, whereas the exemption provided here would merely allow such loans to avoid triggering certain conditions of making such loans—most notably, the requirement that the lender reasonably assess the borrower's ability to repay the loan according to its terms but also the provisions concerning payment practices.

For all of these reasons, the Bureau is finalizing this provision and the related commentary with several modifications. First, in response to comments suggesting that various conditions for alternative loans as stated in the proposed rule would render this loan product too burdensome and complex, the Bureau has eliminated certain conditions for such loans in the final rule. In particular, among the conditions added in the proposal that now are dropped are: required monthly payments; rules on charging fees; required checking of affiliate records; certain additional requirements, such as prohibitions on prepayment penalties

and sweeping of accounts in certain circumstances, as well as required information furnishing. Second, certain changes have been made to take account of the fact that proposed § 1041.11 had applied only to covered longer-term loans, whereas § 1041.3(e) of the final rule applies to covered loans more generally. The language of each prong of § 1041.3(e)(1) through (4) of the final rule is set out below, and immediately thereafter any changes made from the proposed language to the text of the final rule are specified and explained. Again, as a prefatory matter, an alternative loan is a covered loan that meets all four of these sets of conditions and requirements.

3(e)(1) Loan Term Conditions

- Loan term conditions. An alternative loan must satisfy the following conditions:
  - The loan is not structured as open-end credit, as defined in § 1041.2(a)(16);
  - The loan has a term of not less than one month and not more than six months;
  - The principal of the loan is not less than $200 and not more than $1,000;
  - The loan is repayable in two or more payments, all of which payments are substantially equal in amount and fall due in substantially equal intervals, and the loan amortizes completely during the term of the loan; and
  - The loan carries a cost of credit (excluding any application fees) of not more than the interest rate permissible for Federal credit unions to charge under regulations issued by the National Credit Union Administration at 12 CFR 701.21(c)(7)(iii), and any application fees charged to the consumer reflect the actual costs associated with processing the application and do not exceed the application fees permissible for Federal credit unions to charge under regulations issued by the National Credit Union Administration at 12 CFR 701.21(c)(7)(iii).

The language of the final rule originated in § 1041.11(a) of the proposed rule. The name of the exemption has been revised from a conditional exemption for certain covered longer-term loans up to six months in duration to a conditional exemption for alternative loans. The term of the loan is modified from ''not more than six months'' to ''not less than one month *and* no more than six months,'' again to reflect the change made in this exemption to encompass the broader set of all covered loans, rather than just covered longer-term loans. The other conditions, including the $200 floor and the $1,000 cap, are maintained because they are consistent with the requirements of the PAL program. The prior condition that the loan be repayable in two or more payments ''due no less frequently than monthly'' is now changed to omit the quoted language because the term of these loans may now be shorter than was the case in the proposal. The amortization provision is broken out and simplified to provide more flexibility around the payment schedule and allocation, which again reflects the fact that many of these loans may now be covered short-term loans. Finally, the prior language around total cost of credit is now replaced with cost of credit, which is consistent with TILA and Regulation Z and is responsive to suggestions made by several commenters; the permissible interest rate on such products is that set by the NCUA for the PAL program; any application fees charged to the consumer must reflect the actual associated costs and comply with the provisions of any NCUA regulations; and the lender does not impose any charges other than the rate and application fees permitted by the NCUA for the PAL program.

3(e)(2) Borrowing History Condition

Section 1041.3(e)(2) provides that prior to making an alternative loan under § 1041.3(e), the lender must determine from its records that the loan would not result in the consumer being indebted on more than three outstanding loans made under this section from the lender within a period of 180 days. Section 1041.3(e)(2) also provides that the lender must also make no more than one alternative loan under § 1041.3(e) at a time to a consumer.

Aside from conforming language changes, the only substantive revision here is to excise references to affiliates of the lenders, consistent with the NCUA's practice in administering the PAL program.

3(e)(3) Income Documentation Condition

Section 1041.3(e)(3) provides that in making an alternative loan under § 1041.3(e), the lender must maintain and comply with policies and procedures for documenting proof of recurring income.

This prong contains minor conforming language changes only.

3(e)(4) Safe Harbor

Section 1041.3(e)(4) provides that loans made by Federal credit unions in compliance with the conditions set forth by the National Credit Union Administration at 12 CFR 701.21(c)(7)(iii) for a Payday Alternative Loan are deemed to be in compliance with the requirements and conditions of § 1041.3(e)(1), (2), and (3).

This prong contains entirely new language, replacing what had been ''additional requirements'' in § 1041.11(e) of the proposed rule. Those additional requirements tailored by the NCUA for credit unions and included in the original proposal would be cumbersome in various respects for all lenders to adopt, including provisions on additional information furnishing, restrictions on sweeps and set-offs as means of a depository institution collecting on the loan, and prepayment penalties. The safe harbor provided for Federal credit unions in compliance with NCUA's requirements for the PAL program, however, reflects the fact that to qualify for the safe harbor, a credit union would be obligated to comply with all of the additional requirements of the PAL program.

Having considered the comments received, the Bureau concludes that it is appropriate to finalize § 1041.3(e) for all the reasons discussed above. The Bureau also is finalizing proposed comment 3(d)(8)–1 as comment 3(e)–1 of the final rule, which notes that this provision does not confer on the lenders of such loans any exemption from the requirements of other applicable laws, including State laws. This comment also clarifies that all lenders, including Federal credit unions and persons that are not Federal credit unions, are permitted to make loans under the specific terms in § 1041.3(e), provided that such loans are permissible under other applicable laws, including State laws. The remainder of the commentary is being carried forward from the proposed rule with revisions, all made to align them with the modified language in § 1041.3(e) of the final rule. The proposed comments previously designated as 11(a)–1 to (11)(e)(1)(ii)–2 are now renumbered as comments 3(e)(1)–1 to 3(e)(3)–1 in the final rule.

3(f) Conditional Exemption for Accommodation Loans

In the proposal, in connection with the discussion of the proposed definition of lender in § 1041.2(a)(11), the Bureau noted that some stakeholders had suggested narrowing the definition of lender to avoid covering lenders that are primarily focused on other types of lending or other types of financial services, but on occasion make covered loans as a means of accommodating their existing customers. The stakeholders posited that such loans would be likely to operate differently from loans made as a primary line of business, for instance because the lenders who make them have information about consumers' financial situations from their primary lines of business and because their incentives in making the loans is to preserve their

customer relationships, and thus may not pose the same risks and harms as other types of covered loans. The Bureau solicited comments on this suggestion.

The Bureau had also proposed a more detailed provision, in proposed § 1041.12, in order to provide a conditional exemption for certain covered longer-term loans that would be made through accommodation lending programs and would be underwritten to achieve an annual portfolio default rate of not more than five percent. The proposal would have allowed a lender to make such loans without meeting the specific underwriting criteria contained in the proposed rule, though proposed § 1041.12 laid out its own detailed provisions applicable to the making of such loans. Notably, the Bureau found that the feedback it received on this provision overlapped considerably with the comments submitted in response to the question the Bureau had asked with respect to the definition of lender about providing an exception based on *de minimis* lending.

Many commenters expressed their views favoring a *de minimis* exemption. Several of them urged that the Bureau should set parameters for the exemption based both on loan volume and the percentage of revenue derived from such loans. More specific suggestions ranged from caps of 100 to several thousand loans per year; one commenter suggested 2,000 loans per year that yield no more than five percent of revenue; others urged a cap of 2,500 loans per year that yield no more than 10 percent of revenue.

The Bureau also received a number of comments on proposed § 1041.12 and proposed comments 12(a)–1 to (12)(f)(1)(ii)–2. Banking organizations argued that the Bureau should exempt types of institutions rather than types of loans, and that because community banks are responsible providers of small loans, they should be conditionally exempted from coverage.

Many commenters were also critical of the provisions of proposed § 1041.12, which they viewed as so cumbersome as to discourage many institutions from engaging in this type of lending. These comments focused particularly on the back-end requirements and calculations included in the proposal. Some commenters noted the guidance already in place from other banking regulators that had suppressed such lending at the banks, and predicted that the proposal would exacerbate those difficulties. State bank regulators, in particular, advocated in favor of a *de minimis* threshold to preserve such lending by smaller community banks as beneficial to consumers, especially in rural areas and as a way to provide alternatives if the effect of the rule would be to cause consolidation in the small-dollar lending market. Consumer groups generally opposed exemptions to the rule but acknowledged that a properly structured *de minimis* provision would be unlikely to create much if any harm to consumers.

As stated earlier, the Bureau has decided not to finalize the ability-to-repay requirements with respect to covered longer-term loans (other than covered longer-term balloon-payment loans) at this time. However, as a result of reviewing and analyzing the public input on the issue of accommodation lending more generally, the Bureau has determined to create a conditional exemption that is applicable to accommodation loans that have been traditionally made primarily by community banks and credit unions. At the same time, in line with the Dodd-Frank Act's goal of enforcing Federal consumer financial law without regard to a financial company's status as a depository institution,[451] the Bureau has set forth the elements of accommodation loans in general form such that any lender whose covered loan originations fall below the thresholds set in final § 1041.3(f) can qualify for the conditional exemption. In part, the Bureau is reaching this conclusion based on its review of the comments received, which indicated that lenders would find the approach taken in proposed § 1041.12 to be cumbersome or even unworkable for lenders. Whether or not this was objectively demonstrable for most lenders, it was clear that the proposed approach would have been taken as a discouraging factor for those deciding whether or not to make such loans. Moreover, the Bureau concluded that loans made as an occasional accommodation to existing customers were not likely to pose the same risks and harms as other types of covered loans, because such loans would be likely to operate differently and carry different incentives for the lender as compared to loans made as a primary line of business.

As discussed in the preceding section on alternative loans, when the Bureau exercises its exemption authority under section 1022(b)(3) of the Dodd-Frank Act to create an exemption for ''any class of covered persons, service providers, or consumer financial products or services, from any * * * rule issued under this title,'' it has broad latitude that Congress conferred upon it to do so.[452] Again, Congress simply said that the Bureau should exercise this authority ''as [it] deems necessary or appropriate to carry out the purposes and objectives of this title,'' [453] and the Bureau's general purposes and objectives are stated in section 1021 of the Dodd-Frank Act. In addition, when the Bureau exercises its exemption authority under section 1022(b)(3) of the Dodd-Frank Act, it is further required, as appropriate, to take into consideration three statutory factors: The total assets of the class of covered persons; the volume of transactions involving consumer financial products or services in which the class of covered persons engages; and existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.[454] Here, too, it appears that Congress intended the Bureau to do so in view of its purposes and objectives as set forth in the Dodd-Frank Act.

Here, the Bureau perceives tangible benefit for consumers and for lenders to be able to maintain access to individualized loans of the kind permitted by this provision and in line with the traditions and experience of community banks over many years, which have generally underwritten these loans as an accommodation on an individualized basis in light of their existing customer relationships. In this manner, the conditional exemption would help ensure ''that all consumers have access to markets for consumer financial products and services,'' [455] which is a principal purpose of the Dodd-Frank Act, and would not be restricted in their existing access to such traditional loan products. At the same time, this conditional exemption would enable the Bureau ''to reduce unwarranted regulatory burdens'' [456] on these longstanding loan products made to existing bank customers on an individualized basis in light of their existing customer relationships, without posing any of the kinds of risks and harms to consumers that exist with the types of covered loans addressed by this rule.

And though the provisions of § 1041.3(f) are written in general terms to be applicable to lenders that are not themselves depository institutions, it does not appear likely that these

[451] *See* 12 U.S.C. 5511(b)(4) (''Federal consumer financial law is enforced consistently, without regard to the status of a person as a depository institution, in order to promote fair competition.'').

[452] 12 U.S.C. 5512 (b)(3)(A).

[453] 12 U.S.C. 5512(b)(3)(A).

[454] 12 U.S.C. 5512(b)(3)(B)(i)–(iii).

[455] 12 U.S.C. 5511(a).

[456] 12 U.S.C. 5511(b)(3).

provisions would be open to wide-scale abuse, precisely because the loan and revenue restrictions are set at a *de minimis* level that would tend to limit the scope of any predatory behavior. Assessing the matter against the three additional statutory factors as well, then, the assets of these lenders availing themselves of this provision would likely be limited; the volume of transactions would be small, by definition and design; and Federal consumer financial law, as implemented through the Bureau's continuing supervisory and enforcement authorities and by other means as provided in the statute, would maintain consumer protections in the broader market despite this slight restriction on coverage under the rule.

Therefore, as stated in § 1041.3(f), this provision will conditionally exempt any accommodation loan from coverage under the final rule. That category is defined to apply to a covered loan made by any lender where the lender and its affiliates collectively have made 2,500 or fewer covered loans in the current calendar year and also made 2,500 or fewer covered loans in the preceding calendar year; and during the most recent completed tax year in which the lender was in operation, if applicable, the lender and any affiliates that were in operation and used the same tax year derived no more than 10 percent of their receipts from covered short-term and longer-term balloon-payment loans, or if the lender was not in operation in a prior tax year, the lender reasonably anticipates that the lender and any of its affiliates that use the same tax year will, during the current tax year, derive no more than 10 percent of their receipts from covered short-term loans and covered longer-term balloon-payment loans. Comment 3(f)–1 of the final rule provides an example of the application of this provision to a sample lender.

Although, in general, all covered loans and the receipts from those loans would count toward the thresholds in § 1041.3(f) for the number of loans per year and for receipts, § 1041.3(f) allows lenders not to count toward either threshold covered longer-term loans for which the conditional exclusion for transfers in § 1041.8(a)(1)(ii) applies to all transfers for payments made under the loan. As explained in the section-by-section discussion of § 1041.8(a)(1)(ii), when the lender is the account-holder, that provision excludes certain transfers from the definition of payment transfer if, pursuant to the terms of the loan agreement or account agreement, the lender (1) does not charge the consumer any fee, other than a late fee under the loan agreement, in the event that the lender initiates a transfer of funds from the consumer's account in connection with the covered loan for an amount that the account lacks sufficient funds to cover; and (2) does not close the consumer's account in response to a negative balance that results from a transfer of funds initiated in connection with the covered loan. These conditions provide substantial protection against the harms targeted by the provisions in §§ 1041.8 and 1041.9. As a result, loans for which all payment transfers are excluded under § 1041.8(a)(1)(ii) from the definition of payment transfer are not subject to either the prohibition in § 1041.8(b) on initiating more than two consecutive failed payment transfers or the requirement in § 1041.9(b) to provide payment notices prior to initiating certain payment withdrawals. Since those loans carry with them substantial protection against the harms targeted in subpart C and would not be subject to those provisions, the Bureau believes that it is simpler not to count them for purposes of § 1041.3(f) either.

The Bureau had sought comment about the appropriate parameters of this conditional exemption, which is designed to be a *de minimis* provision to allow only a certain amount of lending of this kind to accommodate customers as a distinct sidelight to the institution's main lines of business. Once again, the purpose of this provision is to accommodate existing customers through what traditionally have been loans that were underwritten on an individualized basis for existing customers. It was not proposed, and is not being adopted, to stimulate the development of a model for loans that are offered in high volumes. As for the parameters that the Bureau decided on, they closely reflect the submissions received in the comment process, with both the overall loan limit (2,500 per year) and the revenue limit (no more than 10 percent of receipts) intended to keep loans made pursuant to this exemption to a very limited part of the lender's overall business. Each of the two provisions operates together to achieve that joint objective, which would not necessarily be achieved by either component operating in isolation.

The Bureau decided to create this conditional exemption in order to respond to the persuasive points made by the commenters about the benefits that would flow from preserving this modest amount of latitude to be able to contour specialized loans as an accommodation to individual customers. That is especially so in view of the unlikelihood that this practice would pose the same kinds of risks and harms that the Bureau recognized with covered short-term loans and covered longer-term balloon-payment loans as described below in Market Concerns—Underwriting. The adoption of this conditional exemption also evinces the Bureau's recognition of the input it has heard from many stakeholders over the years, particularly from depository institutions, who have regularly supplied the Bureau with details about their perspective that smaller depository lenders such as community banks and credit unions have a long history and tradition of making loans to accommodate their existing customers for various personal reasons, such as minor expenses related to some type of family event. These loans are typically underwritten, customized, made for small amounts and at reasonable cost, and generate low levels of defaults. Although this type of accommodation lending is often quite specialized and individualized, it could be construed to overlap in certain ways with the covered loans encompassed by the rule. The conditional exemption that is now finalized in § 1041.3(f) provides an effective method of addressing legitimate concerns about the potentially detrimental consequences of that overlap for consumers.

3(g) Receipts

The Bureau has added a new definition of the term receipts, which § 1041.3(g) of the final rule defines to mean total income (or, in the case of a sole proprietorship, gross income) plus cost of goods sold as these terms are defined and reported on Internal Revenue Service (IRS) tax return forms (such as Form 1120 for corporations; Form 1120S and Schedule K for S corporations; Form 1120, Form 1065, or Form 1040 for LLCs; Form 1065 and Schedule K for partnerships; and Form 1040, Schedule C for sole proprietorships). Receipts do not include net capital gains or losses; taxes collected for and remitted to a taxing authority if included in gross or total income, such as sales or other taxes collected from customers but excluding taxes levied on the entity or its employees; or amounts collected for another (but fees earned in connection with such collections are receipts). Items such as subcontractor costs, reimbursements for purchases a contractor makes at a customer's request, and employee-based costs such as payroll taxes are included in receipts. This definition of receipts is modeled on the definitions of the same term in the Bureau's larger participant rulemakings for the consumer

reporting [457] and debt collection markets,[458] which in turn were based in part on the Small Business Administration's definition of receipts at 13 CFR 121.104.

The Bureau is adding this definition to clarify how the term is used in § 1041.3(f) in the course of describing accommodation loans, and to reduce the risk of confusion among consumers, industry, and regulators.

3(h) Tax Year

The Bureau has added a new definition of the term tax year, which § 1041.3(h) of the final rule defines to have the same meaning attributed to this term by the IRS as set forth in IRS Publication 538, which provides that a tax year is an annual accounting period for keeping records and reporting income and expenses. The Bureau is adding this definition to clarify how the term is used in § 1041.3(f) in the course of describing accommodation loans, and to reduce the risk of confusion among consumers, industry, and regulators.

Subpart B—Underwriting

Overview of the Bureau's Approach in the Proposal and in the Final Rule

The Bureau proposed to identify an unfair and abusive practice with respect to the making of covered short-term loans pursuant to its authority to ''prescribe rules * * * identifying as unlawful unfair, deceptive, or abusive acts or practices.'' [459] The proposal explained the Bureau's preliminary view that it is both an unfair and abusive practice for a lender to make such a loan without reasonably determining that the consumer will have the ability to repay the loan. To avoid committing this unfair and abusive practice, the Bureau stated that a lender would have to make a reasonable assessment that the consumer has the ability to repay the loan. The proposal would have established a set of requirements to prevent the unlawful practice by requiring lenders to follow certain specified underwriting practices in assessing whether the consumer has the ability to repay the loan, as well as imposing certain limitations on rapid re-borrowing. The Bureau proposed the ability-to-repay requirements under its authority to prescribe rules for ''the purpose of preventing unfair and abusive acts or practices.'' [460]

[457] 77 FR 42874 (July 20, 2012).

[458] 77 FR 65775 (Oct. 31. 2012).

[459] Public Law 111–203, section 1031(b), 124 Stat. 1376 (2010).

[460] 12 U.S.C. 5531(b).

The proposal would have further relied on section 1022(b)(3) of the Dodd-Frank Act [461] to exempt certain covered short-term loans from the ability-to-repay requirements if the loans satisfied a set of conditions designed to avoid the harms that can result from unaffordable loans, including the harms that can flow from extended sequences of multiple loans in rapid succession. Accordingly, lenders seeking to make covered short-term loans would have the choice, on a case-by-case basis, either to comply with the ability-to-repay requirements according to the specified underwriting criteria or to make loans that meet the conditions set forth in the proposed exemption—conditions that are specifically designed as an alternative means to protect consumers against the harms that can result from unaffordable loans.

As detailed further below, the Bureau has carefully considered its own research, analysis performed by others, and the public comments received with respect to this rulemaking and is now finalizing its finding that failing to reasonably determine whether consumers have the ability to repay covered short-term loans according to their terms is an unfair and abusive practice. These sources establish that unaffordable covered short-term loans generate severe harms for a substantial population of consumers. The Bureau has made the judgment that the harms and risks of such loans can be addressed most effectively by requiring lenders to underwrite such loans in accordance with specific criteria and thus not to make such a loan without reasonably determining that the consumer has the ability to repay the loan according to its terms. The Bureau has also retained the conditional exemption, while noting that the conditions on such loans, which are specifically designed as an alternative means to protect consumers against the harms that can result from unaffordable loans, will likely prompt lenders to consider more carefully their criteria for making such loans as well, given that defaults and delinquencies can no longer be offset by the revenues from repeated re-borrowing. The Bureau has modified various details of the proposed rule with respect to the underwriting criteria for the ability-to-repay requirement and the conditional exemption to strike a better balance among compliance burdens and other concerns, but has maintained the basic framework that was initially set forth in the proposed rule.

The Bureau also proposed to identify the same unfair and abusive practice

[461] 12 U.S.C. 5512(b)(3).

with respect to the failure to assess consumers' ability to repay certain longer-term loans, including both installment and balloon-payment structures, as long as the loans exceeded certain price thresholds and involved the taking of either a leveraged payment mechanism or vehicle security. The Bureau proposed to subject these covered longer-term loans to underwriting requirements similar to those for covered short-term loans, as well as proposing two exemptions for loans that satisfied different sets of conditions designed to avoid the risks and harms that can result from unaffordable loans.

As detailed further below, the Bureau has carefully considered its own research, analysis performed by others, and the public comments received with respect to the proposed treatment of covered longer-term loans, and has decided to take a bifurcated approach at this time to concerns about unfair or abusive underwriting of longer-term loans. With regard to balloon payment structures, the Bureau finds that failing to reasonably assess whether consumers have the ability to repay covered longer-term balloon-payment loans according to specific underwriting criteria is an unfair and abusive practice. Because they require large lump-sum or irregular payments, these loans impose financial hardships and payment shocks on consumers that are similar to those posed by short-term loans over just one or two income cycles. Indeed, the Bureau's analysis of longer-term balloon-payment loans in the market for vehicle title loans found that borrowers experienced high default rates—notably higher than for similar loans with amortizing installment payments. The Bureau also has concluded that the outcomes between a single-payment loan with a term of 46 or more days is unlikely to be much different for consumers than an identical loan with a term of 45 days, and is concerned that failing to cover longer-term balloon-payment loans would induce lenders to slightly extend the terms of their existing short-term lump-sum loans in an effort to evade coverage under the final rule, as occurred in this market in response to regulations adopted under the Military Lending Act.

For these reasons, the Bureau is finalizing its finding that failing to reasonably assess whether consumers have the ability to repay covered longer-term balloon-payment loans is an unfair and abusive practice. The Bureau has made the judgment that these risks and harms can be addressed most effectively—as with covered short-term loans—by requiring lenders to

underwrite such loans in accordance with specified criteria and thus not to make such a loan without reasonably determining that the consumer has the ability to repay the loan according to its terms. After having sought comment on the issue of whether longer-term balloon-payment loans should be covered regardless of price or the taking of a leveraged payment mechanism or vehicle security, the Bureau has decided, in light of the risks to consumers, to apply the rule to all such loans, aside from certain exclusions and exemptions described above in § 1041.3 of the final rule.

The Bureau has decided, however, not to move forward with its primary finding that it is an unfair and abusive practice to make certain higher-cost longer-term installment loans without making a reasonable determination that the consumer will have the ability to repay the loan, and, accordingly, its prescription of underwriting requirements designed to prevent that practice. The Bureau has decided to defer this aspect of the proposal for further consideration in a later rulemaking. After consideration of the research and the public comments, the Bureau has concluded that further analysis and outreach are warranted with respect to such loans, as well as other types of credit products on which the Bureau sought comment as part of the Request for Information. While such loans differ in certain ways from the loans covered in this final rule, the Bureau remains concerned that failing to underwrite such products may nonetheless pose substantial risk for consumers. The Bureau will continue to gather evidence about the risks and harms of such products for consideration as a general matter in a later rulemaking, and will continue in the meantime to scrutinize such lending for potential unfair, deceptive, or abusive acts or practices pursuant to its supervisory and enforcement authority.

And, as detailed in subpart C below, the Bureau has concluded that it is appropriate to apply certain limitations and disclosure requirements concerning payment practices (and related recordkeeping requirements) to longer-term installment loans with a cost of credit above 36 percent that involve the taking of a leveraged payment mechanism.

The predicate for the identification of an unfair and abusive practice in the Bureau's proposal—and thus for the preventive ability-to-repay requirements—was a set of preliminary findings about the consumers who use storefront and online payday loans, single-payment vehicle title loans, and other covered short-term loans, and the impact on those consumers of the practice of making such loans without assessing the consumers' ability to repay. The preliminary findings as set forth in the proposal, the comments that the Bureau received on them, and the Bureau's responses to those comments as the foundation of its final rule are all discussed below in the following section referred to as Market Concerns—Underwriting. Further in the discussion below, the Bureau also addresses the same issues with respect to covered longer-term balloon-payment loans.

Market Concerns—Underwriting

Short-Term Loans

In the proposal, the Bureau stated its concern that lending practices in the markets for storefront and online payday lending, single-payment vehicle title loans, and other covered short-term loans are causing harm to many consumers who use these products. Those harms include default, delinquency, and re-borrowing, as well as various collateral harms from making unaffordable payments. This section reviews the available evidence with respect to the consumers who use covered short-term loans, their reasons for doing so, and the outcomes they experience. It also reviews the lender practices that contribute to these outcomes. The discussion begins with the main points presented in this section of the proposal, stated in summary form, and provides a high-level overview of the general responses offered by the commenters. More specific issues and comments are then treated in more detail in the succeeding subsections. In the proposal, the Bureau's preliminary views were stated in summary form as follows:

- *Lower-income, lower-savings consumers.* Consumers who use these products tend to come from lower- or moderate-income households. They generally do not have any savings to fall back on, and they have very limited access to other sources of credit; indeed, typically they have sought unsuccessfully to obtain other, lower cost, credit before turning to a short-term loan. The commenters generally validated these factual points, though many disputed the inferences and conclusions to be drawn from these points, whereas others agreed with them. Individual commenters generally validated the factual descriptions of these characteristics of borrowers as well.
- *Consumers in financial difficulty.* Some consumers turn to these products because they have experienced a sudden drop in income (''income shock'') or a large unexpected expense (''expense shock''). Other borrowers are in circumstances in which their expenses consistently outstrip their income. A sizable percentage of users report that they would have taken a loan on almost any terms offered. Again, the commenters generally validated these points as a factual matter, but disputed the inferences and conclusions to be drawn therefrom.
- *Loans do not function as marketed.* Lenders market single-payment products as short-term loans designed to provide a bridge to the consumer's next payday or other income receipt. In practice, however, the amounts due on these loans consume such a large portion of the consumer's paycheck or other periodic income source as to be unaffordable for most consumers seeking to recover from an income or expense shock, and even more so for consumers with a chronic income shortfall. Lenders actively encourage consumers either simply to pay the finance charges due and roll over the loan instead of repaying the loan in full (or effectively roll over the loan by engaging in back-to-back transactions or returning to re-borrow in no more than a few days after repaying the loan). Indeed, lenders are dependent upon such re-borrowing for a substantial portion of their revenue and would lose money if each borrower repaid the loan when it was due without re-borrowing. The commenters tended to recharacterize these points rather than disputing them as a factual matter, though many industry commenters disagreed that these loans should be considered ''unaffordable'' for ''most'' consumers if many consumers manage to repay them after borrowing once or twice. Others contended that these loans should not be considered ''unaffordable'' if they are repaid eventually, even after re-borrowing multiple times in extended loan sequences. The commenters on all sides generally did not dispute the nature of the underlying business model as resting on repeat re-borrowing that lenders actively encourage, though they sharply disputed whether this model benefited or harmed consumers.
- *Very high re-borrowing rates.* Most borrowers find it necessary to re-borrow when their loan comes due or shortly after repaying their loan, as other expenses come due. This re-borrowing occurs both with payday loans and with single-payment vehicle title loans. The Bureau found that 56 percent of payday loans are borrowed on the same day and 85 percent of these loans are re-borrowed within a month. Fifty percent

of all new storefront payday loans are followed by at least three more loans and 33 percent are followed by six more loans. While single-payment vehicle title loans are often for somewhat longer durations than payday loans, typically with terms of one month, re-borrowing tends to occur sooner and longer sequences of loans are more common. The Bureau found that 83 percent of single-payment vehicle title loans are re-borrowed on the same day and 85 percent of them are re-borrowed within a month. Over half (56 percent) of all new single-payment vehicle title loans are followed by at least three more loans, and more than a third (36 percent) are followed by six or more loans. Of the payday loans made to borrowers paid weekly, bi-weekly, or semi-monthly, over 20 percent are in loan sequences of 20 loans or more and over 40 percent of loans made to borrowers paid monthly are in loan sequences of comparable durations (*i.e.,* 10 or more monthly loans). The commenters did not challenge the thrust of these points as demonstrating a high incidence of re-borrowing, which is a point that was reinforced by consumer groups and was illustrated by many individual commenters as well.

• *Consumers do not expect lengthy loan sequences.* Many consumers who take out a payday loan do not expect to re-borrow to the extent that they do. This is especially true of those consumers who end up in extended cycles of indebtedness. Research shows that many consumers who take out loans are able to accurately predict how long it will take them to get out of debt, especially if they repay immediately or re-borrow only once, but a substantial population of consumers is not able to do so, and for those consumers who end up in extended loan sequences, there is little correlation between predictions and behavior. A study on this topic found that as many as 43 percent of borrowers may have underestimated the length of time to repayment by two weeks or more.[462] The study found that consumers who have borrowed heavily in the recent past are even more likely to underestimate how long it will take to repay the loan.[463] Consumers' difficulty in this regard may be exacerbated by the fact that such loans involve a basic mismatch between how they are marketed as short-term credit and appear designed to function as long sequences of re-borrowing, which regularly occurs for a number of consumers. This disparity can create difficulties for consumers in being able to estimate accurately how long they will remain in debt and how much they will ultimately pay for the initial extension of credit. Research into consumer decision-making also helps explain why consumers may re-borrow more than they expect. For example, people under stress, including consumers in financial crisis, tend to become very focused on their immediate problems and think less about the future. Consumers also tend to underestimate their future expenses, and may be overly optimistic about their ability to recover from the shock they have experienced or to bring their expenses in line with their incomes. These points were sharply disputed by the commenters, and will be discussed further below.

• *Very high default rates and collateral harms.* Some consumers do succeed in repaying short-term loans without re-borrowing, and others eventually repay the loan after re-borrowing multiple times. But research shows that approximately 20 percent of payday loan sequences and 33 percent of single-payment vehicle title loan sequences end up with the consumer defaulting. Consumers who default can become subject to often aggressive and psychologically harmful debt collection efforts. While delinquent, they may also seek to avoid default in ways that lead to a loss of control over budgeting for their other needs and expenses. In addition, 20 percent of single-payment vehicle title loan sequences end with borrowers losing their cars or trucks to repossession. Even borrowers who have not yet defaulted may incur penalty fees, late fees, or overdraft fees along the way and may find themselves struggling to pay other bills or meet their basic living expenses. Commenters generally did not dispute that consumers may feel the effects of these negative collateral consequences of such loans and of delinquency and default, though industry commenters tended to downplay them and some argued that any such harms were outweighed by the economic benefits of such loans. Individual commenters validated this account of the negative collateral consequences of such loans as reflecting their own experiences. Many others countered that they had successful experiences with these loans and that they were benefited more than they were harmed by these experiences.

• *Harms occur despite existing regulation.* The research indicates that in the States that have authorized payday and other short-term loans, these harms persist despite existing regulatory frameworks. Indeed, payday loans do not legally exist in many States, so by definition the harms identified by the Bureau's research flow from such loans in those States where they are offered pursuant to existing regulatory frameworks. Even in those States where such loans are offered pursuant to somewhat different conditions, these distinctions do not appear to eliminate the harms that flow from the structure of such loans. In particular, the Bureau is concerned that existing caps on the amount that a consumer can borrow, rollover limitations, and short cooling-off periods still appear to leave many consumers vulnerable to the specific harms discussed above relating to default, delinquency, re-borrowing, and other collateral harms from attempting to avoid the other injuries by making unaffordable payments. Industry commenters took issue with these concerns and disputed this characterization of the effects of such loans.

In the proposal, the Bureau also reviewed the available evidence underlying each of these preliminary views. The Bureau sought and received comments on its review of the evidence, and those comments are reviewed and addressed in the discussion below. Based on the reasons set forth in each of the segments in this part, which respond to the comments and present further analysis that the Bureau has engaged in to consider these matters further, the Bureau now adopts as its findings underlying the final rule its views as stated in this initial summary overview, with certain modifications as set forth below.

a. Borrower Characteristics and Circumstances of Borrowing

As the Bureau laid out in the proposal, borrowers who take out payday, single-payment vehicle title, and other covered short-term loans are typically low-to-moderate income consumers who are looking for quick access to cash, who have little to no savings, who often have poor credit histories, and who have limited access to other forms of credit. Comments received from industry participants, trade associations, and individual users of these loans noted that this description of the borrower population does not describe all of the people who use these loans. That is so, of course, but the Bureau's discussion in the proposal was not intended as an exhaustive account of the entire universe of borrowers. Instead, it merely represented many of the recurring borrower characteristics that the Bureau

[462] *See* Ronald Mann, ''Assessing the Optimism of Payday Loan Borrowers,'' 21 Sup. Ct. Econ. Rev. 105 (2013).

[463] *See id.*

found based on its experience with such loans over the past several years and based on data from a number of studies as discussed further below.

In the proposal, the Bureau had found preliminarily that the desire borrowers have for immediate cash may be the result of an emergency expense or an unanticipated drop in income. The comments received from industry participants, trade associations, and individual users of these loans strongly reinforce the basis for this finding. Many comments describe the function that these loans perform as coping with income and expense shocks—that is, with unexpected, temporary expenses or shortfalls in income. These comments cited surveys and studies to bolster this point, including one survey that noted 86 percent of borrowers strongly or somewhat agreed that their use of a payday loan was to cope with an unexpected expense. Many other comments, including comments from individual users of these loans, offered anecdotal accounts of the personal reasons many borrowers have for taking out these loans, including a wide variety of circumstances that can create such income or expense shocks. Comments received from consumer groups were also in agreement on these points and further underscored a shared understanding that this impetus drives much of the demand for such loans.

The comments received from industry participants, trade associations, and individual users of these loans made a different point as well. One trade association, for example, noted that many consumers use such loans for ''income smoothing'' or to create a better match between income and expenses in the face of income and expense volatility—that is, where the consumer's income or expenses fluctuate over the course of the year, such that credit is needed during times of lower income or higher expenses to tide the consumer over until times of higher income or lower expenses. Many reasons were given by commenters, including a high volume of individual commenters, for such income and expense volatility, and the following examples are merely illustrative of the broader and more widespread phenomenon: People who work on commission; people scheduled to receive one-time or intermittent income supplements, such as holiday bonuses; people who work irregular hours, including many contractor or part-time workers; people who have seasonal opportunities to earn extra income by working additional hours; or circumstances that may arise that create the need or the opportunity to satisfy in full some other outstanding debt that is pressing. Comments from consumer groups echoed these accounts of how these economic situations drive a certain amount of the demand for such loans. The nature and weight of these comments thus lend further support to the preliminary findings that the Bureau had made on these issues.

In the proposal, the Bureau also noted that many borrowers who take out payday or single-payment vehicle title loans are consumers whose living expenses routinely exceed their income. This category of borrowers may consistently experience negative residual income, or to use a common phrase, find that they routinely have ''too much month at the end of the money'' and take out such loans in an effort to bolster their income—an effort that often proves to be unsuccessful when they are later unable to repay the loan according to its terms. Various commenters agreed with this account of some borrowers, and some of the individual commenters likewise described their own experiences in this vein.

In addition, some commenters noted that certain borrowers may use these kinds of loans to manage accumulated debt, preferring to use the proceeds of the loan to pay down other debt for which nonpayment or default would be more costly alternatives. This was not frequently cited as a reason why many borrowers decide to take out such loans, but it may explain occasional instances.

1. Borrower Characteristics

In the proposal, the Bureau noted that a number of studies have focused on the characteristics of payday borrowers. For instance, the FDIC and the U.S. Census Bureau have undertaken several special supplements to the Current Population Survey (CPS Supplement); the proposal cited the most recent available data from 2013, which found that 46 percent of payday borrowers (including storefront and online borrowers) have a family income of under $30,000.[464] The latest edition of the Survey has more recent data from 2015, which finds that the updated figure is 49 percent.[465] A study covering a mix of storefront and online payday borrowers similarly found that 49 percent had income of $25,000 or less.[466] Other analyses of administrative data that include the income borrowers reported to lenders show similar results.[467]

A 2012 survey administered by the Center for Financial Services Innovation (CFSI) to learn more about users of small-dollar credit products including payday loans, pawn loans, direct deposit advances, installment loans, and auto title loans found that 43 percent of small-dollar credit consumers had a household income between $0 and $25,000, compared to 26 percent of non-small-dollar credit consumers.[468] The mean annual household income for those making use of such products was $32,000, compared to $40,000 for those not using such products. Other studies and survey evidence presented by commenters were broadly consistent with the data and analysis contained in the studies that the Bureau had cited on this point.

Additionally, the Bureau found in its analysis of confidential supervisory data that 18 percent of storefront borrowers relied on Social Security or some other form of government benefits or public assistance.[469] The FDIC study further found that payday borrowers are disproportionately Hispanic or African-

[469] CFPB Payday Loans and Deposit Advance Products White Paper, at 18.

American (with borrowing rates two to three times higher respectively than for non-Hispanic whites) and that unmarried female-headed families are more than twice as likely as married couples to be payday borrowers.[470] The CFSI study discussed above upheld this general assessment with regard to race, with African-American and Hispanic borrowers over-represented among such borrowers.[471] The commenters did not take issue with these points, and various submissions across the broad spectrum of stakeholders, including both industry participants and consumer groups, consistently reinforced the point that these loans disproportionately go to minority borrowers.

The demographic profiles of single-payment vehicle title borrowers appear to be roughly comparable to the demographics of payday borrowers.[472] Calculations from the CPS Supplement indicate that 44 percent of title borrowers have annual family incomes under $30,000.[473] Another survey likewise found that 54 percent of title borrowers reported incomes below $30,000, compared with 60 percent for payday borrowers.[474] Commenters presented some data to suggest that various borrowers are more educated and that many are middle-aged, but these results did not alter the great weight of the overall survey data on this point.

And as with payday borrowers, data from the CPS Supplement show vehicle title borrowers to be disproportionately African-American or Hispanic, and more likely to live in unmarried female-headed families.[475] Similarly, a survey of borrowers in three States conducted by academic researchers found that title borrowers were disproportionately female and minority. Over 58 percent of title borrowers were female. African-Americans were over-represented among borrowers compared to their share of their States' population at large. Hispanic borrowers were over-represented in two of the three States; however, these borrowers were under-represented in Texas, the State with the highest proportion of Hispanic residents in the study.[476] Commenters generally did not take issue with these points, and various submissions from both industry participants and consumer groups support the view that they are an accurate reflection of the borrower population. One commenter contended that the data did not show vehicle title borrowers to be disproportionately minority consumers, though this view did not seem to take into account the composition of the total population in the States that were surveyed.

As noted in the proposal, studies of payday borrowers' credit histories show both poor credit histories and recent credit-seeking activity. One academic paper that matched administrative data from one storefront payday lender to credit bureau data found that the median credit score for a payday applicant was in the bottom 15 percent of credit scores overall.[477] The median applicant had one open credit card, but 80 percent of applicants had either no credit card or no credit available on a card. The average borrower had 5.2 credit inquiries on her credit report over the preceding 12 months before her initial application for a payday loan (three times the number for the general population), but obtained only 1.4 accounts on average. This suggests that borrowers made repeated but generally unsuccessful efforts to obtain additional other forms of credit prior to initiating a payday loan. While typical payday borrowers may have one or more credit cards, they are unlikely to have unused credit; in fact, they are often delinquent on one or more cards, and have often experienced multiple overdrafts and/or NSFs on their checking accounts.[478] A recent report analyzing credit scores of borrowers from five large storefront payday lenders provides corroborative support, finding that the average borrower had a VantageScore 3.0[479] score of 532 and that over 85 percent of borrowers had a score below 600, indicating high credit risk.[480] By way of comparison, the national average VantageScore is 669 and only 30 percent of consumers have a VantageScore below 600.[481]

The proposal also cited reports using data from a specialty consumer reporting agency, which indicate that online borrowers have comparable credit scores to storefront borrowers (a mean VantageScore 3.0 score of 525 versus 532 for storefront).[482] Another study based on the data from the same specialty consumer reporting agency and an accompanying survey of online small-dollar credit borrowers reported that 79 percent of those surveyed had been denied traditional credit in the past year due to having a low or no credit score, 62 percent had already sought assistance from family and friends, and 24 percent reported having negotiated with a creditor to whom they owed money.[483] Moreover, heavy use of online payday loans seems to be correlated with more strenuous credit-seeking: compared to light (bottom quartile) users of online loans, heavy (top quartile) users were more likely to

have been denied credit in the past year (87 percent of heavy users compared to 68 percent of light users).[484]

In the proposal, the Bureau also noted that other surveys of payday borrowers added to the picture of consumers in financial distress. For example, in a survey of payday borrowers published in 2009, fewer than half reported having any savings or reserve funds.[485] Almost a third of borrowers (31.8 percent) reported monthly debt-to-income payments of 30 percent or higher, and more than a third (36.4 percent) of borrowers reported that they regularly spend all the income they receive. Similarly, a 2010 survey found that over 80 percent of payday borrowers reported making at least one late payment on a bill in the preceding three months, and approximately one quarter reported frequently paying bills late. Approximately half reported bouncing at least one check in the previous three months, and 30 percent reported doing so more than once.[486] Furthermore, a 2012 survey found that 58 percent of payday borrowers report that they struggled to pay their bills on time. More than a third (37 percent) said they would have taken out a loan on almost any terms offered. This figure rises to 46 percent when the respondent rated his or her financial situation as particularly poor.[487]

A large number of comments received from industry participants, trade associations, consumer groups, academics, and individual users of these loans extensively reinforced this picture of the financial situation for many storefront and online borrowers. Industry participants and trade associations presented their understanding of the characteristics of the borrower population as being marked by poor credit histories, an acute need for credit, aggressive efforts to seek credit, and general unavailability of other means of credit for many of these borrowers. In many of the comments, these characteristics were described in particular detail and emphasized as making the case to show the need for the availability of such loans. Many individual users of these loans also related their own personal stories and situations, which were typically marked by these same features of their financial histories that demonstrated their need for credit products.

Despite these points of general agreement, many industry participants, trade associations, individual users of such loans, and some academics submitted comments that vigorously disagreed with what they regarded as assumptions the Bureau had made in the proposal about payday and vehicle title borrowers. In their view, the Bureau was wrongly portraying these consumers as financially unsophisticated and incapable of acting in their own best interests. On the contrary, many of these commenters stated, such borrowers are often very knowledgeable about the costs and terms of such loans. Their decision to take out a payday or vehicle title loan was represented, in many instances, as being based on a rational judgment that access to this form of credit is far more valuable than reducing the risks and costs associated with their indebtedness.

The Bureau recognizes that the characteristics of individual users of payday and single-payment vehicle title loans are differentiated in many and various ways. Much of the debate here represents different characterizations and opinions about potential conclusions drawn from the facts, rather than direct disagreements about the facts themselves. These issues are important and they are considered further in the discussions of unfairness and abusiveness under final § 1041.4.

2. Circumstances of Borrowing

The proposal discussed several surveys that have asked borrowers why they took out their loans or for what purpose they used the loan proceeds, and noted that these are challenging questions to study. Any survey that asks about past behavior or events runs some risk of recall errors.[488] In addition, the fact that money is fungible makes this question more complicated. For example, a consumer who has an unexpected expense may not feel the effect fully until weeks later, depending on the timing of the unexpected expense relative to other expenses and to the receipt of income. In that circumstance, a borrower may say either that she took out the loan because of the unexpected expense, or that she took out the loan to cover regular expenses. Perhaps because of this difficulty, results across surveys are somewhat inconsistent, with one finding high levels of unexpected expenses, while others find that payday loans are used primarily to pay for regular expenses.

In the first survey discussed in the proposal, a 2007 survey of payday borrowers, the most common reason cited for taking out a loan was ''an unexpected expense that could not be postponed,'' with 71 percent of respondents strongly agreeing with this reason and 16 percent somewhat agreeing.[489] A 2012 survey of payday loan borrowers, by contrast, found that 69 percent of respondents took their first payday loan to cover a recurring expense, such as utilities, rent, or credit card bills, and only 16 percent took their first loan for an unexpected expense.[490]

The 2012 CFSI survey of alternative small-dollar credit products, discussed earlier in this section asked separate questions about what borrowers used the loan proceeds for and what precipitated the loan.[491] Responses were reported for ''very short term'' and ''short term'' credit; ''very short term'' referred to payday, pawn, and deposit advance products. Respondents could report up to three reasons for what precipitated the loan; the most common reason given for very-short-term borrowing (approximately 37 percent of respondents) was ''I had a bill or payment due before my paycheck arrived,'' which the authors of the report on the survey results interpreted as a mismatch in the timing of income and expenses. Unexpected expenses were cited by 30 percent of very-short-term borrowers, and approximately 27

percent reported unexpected drops in income. Approximately 34 percent reported that their general living expenses were consistently more than their income. Respondents could also report up to three uses for the funds; the most common answers related to paying for routine expenses, with about 40 percent reporting the funds were used to "pay utility bills," about 40 percent reporting the funds were used to pay "general living expenses," and about 20 percent saying the funds were used to pay rent. Of all the reasons for borrowing, consistent shortfalls in income relative to expenses was the response most highly correlated with consumers who reported repeated usage or rollovers.

A survey of 768 online payday users conducted in 2015 and drawn from a large administrative database of payday borrowers looked at similar questions, and compared the answers of heavy and light users of online loans.[492] Based on consumers' self-reported borrowing history, they were segmented into heavy users (users with borrowing frequency in the top quartile of the dataset) and light users (bottom quartile). Heavy users were much more likely to report that they "[i]n past three months, often or always ran out of money before the end of the month" (60 percent versus 34 percent). In addition, heavy users were nearly twice as likely as light users to state their primary reason for seeking their most recent payday loan as being to pay for "regular expenses such as utilities, car payment, credit card bill, or prescriptions" (49 percent versus 28 percent). Heavy users were less than half as likely as light users to state their reason as being to pay for an "unexpected expense or emergency" (21 percent versus 43 percent). Notably, 18 percent of heavy users stated that their primary reason for seeking a payday loan online was that they "had a storefront loan, needed another [loan]" as compared to just over one percent of light users.

One industry commenter asserted that a significant share of vehicle title loan borrowers were small business owners who use these loans for business, rather than personal uses. The commenter pointed to one study that cited anonymous "industry sources" who claimed that 25–30 percent of title borrowers were small businesses[493] and another study that cited an unpublished lender survey which found that about 20 percent of borrowers were self-employed.[494] Evidence was not provided by the commenter to document the share of vehicle title loan borrowers who are either self-employed or small business owners; however, the Bureau notes that it is important to distinguish between borrowers who may be small business owners but may not necessarily use a title loan for a business purpose. For example, one survey of title loan borrowers found that while 16 percent of title loan borrowers were self-employed, only 6 percent of title loan borrowers state that they took the loan for a business expense.[495] The study's authors concluded that ". . . it seems like business credit is not a significant portion of the loans."[496] Another survey found that 20 percent of title loan borrowers are self-employed, and an additional 3 percent were both self-employed and worked for an employer. In that survey, 3 percent of title loan borrowers reported the loan was for a business expense and 2 percent reported the loan was for a mix of personal and business use.[497]

Some commenters agreed with the Bureau that the results across surveys are somewhat inconsistent, perhaps because of methodological issues. Industry commenters predictably chose to place more emphasis on the results that accorded with their arguments that these loans help consumers cope with financial shocks or allow smoothing of income. By contrast, consumer groups predictably took the opposite perspective. They contended that these loans do present special risks and harms for consumers that outweigh the benefits of access to such loans without being subject to any underwriting, especially for those consumers who experience chronic shortfalls of income. Both groups of commenters chose to downplay the results that tended to undermine their arguments. On the whole, these comments do not call into question the Bureau's treatment of the factual issues here, but go more to the potential characterization of those facts or the inferences to be drawn from them. Those issues are discussed further in the section-by-section analysis for § 1041.4 below.

A number of comments from industry participants and trade associations faulted the Bureau for not undertaking to conduct its own surveys of borrowers to gauge the circumstances that lead them to use payday, title, or other covered short-term loans. Although the Bureau had reviewed and analyzed at least four different surveys of such borrowers conducted over the past decade, as discussed above, these commenters stated that the Bureau would have furthered its understanding by speaking with and hearing directly from such borrowers. Nonetheless, many of these commenters offered further non-survey information of this kind by referencing the consumer narratives in thousands of individual consumer complaints about payday, title, and other covered loans that have been filed with the Bureau (which also include a substantial number of debt collection complaints stemming from such loans). They also pointed to individual responses that have been filed about such loans on the Bureau's online "Tell Your Story" function, where some number of individual borrowers have explained how they use such loans, often describing the benefits and challenges they have experienced as a result.

In addition, a large volume of comments—totaling well over a million comments about the proposal, both pro and con—were filed with the Bureau by individual users of payday and vehicle title loans. Many of these commenters described their own personal experiences with these loans, and others offered their perspectives. The Bureau has reviewed these comments and has carefully considered the stories they told. These comments include a large number of positive accounts of how people successfully used such loans to address shortfalls or cope with emergencies and concerns about the possibility of access to such loans being removed. The comments included fewer but still a very sizable number of other accounts, much more negative in tone, of how consumers who took out such loans became trapped in long cycles of repeated re-borrowing that led to financial distress, marked by problems such as budgetary distortions, high collateral costs, the loss of depository accounts and other services, ultimate default on the loans, and the loss of other assets such as people's homes and their vehicles. Some of these comments

came from the individual consumers themselves, while many came from friends, family members, clergy, legal aid attorneys, neighbors, or others who were concerned about the impact the loans had on consumers whom they knew, and in some cases whom they had helped to mitigate the negative experience through financial assistance, counseling, or legal assistance. The enormous volume of such individual comments itself helps to provide considerably more information about borrowers that helps to supplement the prior survey data discussed in the proposal. It appears that various parties on both sides of these issues went to great lengths to solicit such a large number of comment submissions by and about individual users of such loans.

The substantial volume and variation of individual comments have further added to the Bureau's understanding of the wide variety of circumstances in which such borrowing occurs. They underscore the Bureau's recognition that not only the personal characteristics, but also the particularized circumstances, of individual users of payday and single-payment vehicle title loans can be quite differentiated from one another across the market. Nonetheless, the focus of this rule is on how the identified lender practice of making such loans without reasonably assessing the borrower's ability to repay the loan according to its terms affects this broad and diverse universe of consumers.

b. Lender Practices

As described in the proposal, the business model of lenders who make payday and single-payment vehicle title loans is predicated on the lenders' ability to secure extensive re-borrowing. As recounted in the Background section, the typical storefront payday loan has a principal amount of $350, and the consumer pays a typical fee of 15 percent of the principal amount. For a consumer who takes out such a loan and repays it when it is due without re-borrowing, this means the typical loan would produce roughly $50 in revenue to the lender. Lenders would thus require a large number of ''one-and-done'' consumers to cover their overhead and acquisition costs and generate profits. However, because lenders are able to induce a large percentage of borrowers to repeatedly re-borrow, lenders have built a model in which the typical storefront lender, as discussed in part II above, has two or three employees serving around 500 customers per year. Online lenders do not have the same overhead costs, but they have been willing to pay substantial acquisition costs to lead generators and to incur substantial fraud losses, all of which can only be sufficiently offset by their ability to secure more than a single fee—and often many repeated fees—from their borrowers.

In the proposal, the Bureau used the term ''re-borrow'' to refer to situations in which consumers either roll over a loan (which means they pay a fee to defer payment of the principal for an additional period of time), or take out a new loan within a short period time following a previous loan. Re-borrowing can occur concurrently with repayment in back-to-back transactions or can occur shortly thereafter. In the proposal, the Bureau stated its reasons for concluding that re-borrowing often indicates that the previous loan was beyond the consumer's ability to repay while meeting the consumer's other major financial obligations and basic living expenses. As discussed in more detail in the section-by-section analysis of § 1041.6, the Bureau proposed and now concludes that it is appropriate to consider loans to be re-borrowings when the second loan is taken out within 30 days of the consumer being indebted on a previous loan. While the Bureau's 2014 Data Point used a 14-day period and the Small Business Review Panel Outline used a 60-day period, the Bureau used a 30-day period in its proposal to align the time frame with consumer expense cycles, which are typically a month in length. This duration was designed to account for the fact that where repaying a loan causes a shortfall, the effect is most likely to be experienced within a 30-day period in which monthly expenses for matters such as housing and other debts come due. The Bureau recognizes that some re-borrowing that occurs after a 30-day period may be attributable to the spillover effects of an unaffordable loan and that some re-borrowing that occurs within the 30-day period may be attributable to a new need that arises unrelated to the impact of repaying the short-term loan. Thus, while other periods could plausibly be used to determine when a follow-on loan constitutes re-borrowing, the Bureau believes that the 30-day period provides the most appropriate period for these purposes. In fact, the evidence presented below suggests that for any of these three potential time frames, though the percentage varies somewhat, the number of loans that occur as part of extended loan sequences of 10 loans or more is around half of all payday loans. Accordingly, this section, Market Concerns—Underwriting, uses a 30-day period to determine whether a loan is part of a loan sequence.

The proposal noted that the majority of lending revenue earned by storefront payday lenders and lenders that make single-payment vehicle title loans comes from borrowers who re-borrow multiple times and become enmeshed in long loan sequences. Based on the Bureau's data analysis, approximately half of all payday loans are in sequences that contain 10 loans or more, depending on the time frame that is used to define the sequence.[498] Looking just at loans made to borrowers who are paid weekly, bi-weekly, or semi-monthly, more than 20 percent of loans are in sequences that are 20 loans or longer. Similarly, the Bureau found that about half of all single-payment vehicle title loans are in sequences of 10 loans or more, and over two-thirds of them are in sequences of at least seven loans.[499] The commenters did not take serious issue with this data analysis, and the Bureau finds these particular facts to be of great significance in assessing the justifications for regulatory measures that would address the consequent harms experienced by consumers.

Commenters on all sides of the proposal did not seriously take issue with the account presented in the proposal of the basic business model in the marketplace for payday and single-payment vehicle title loans. They did have widely divergent views about whether they would characterize these facts as beneficial or pernicious, or what consequences they perceive as resulting from this business model. One credit union trade association stated its view that such lending takes advantage of consumers and exacerbates bad financial situations and thus it favored curbs on payday lending. Consumer groups and numerous individual borrowers echoed this view. Industry participants, other trade associations, and many other individual borrowers took the position, explicitly or implicitly, that the benefits experienced by successful users of these loans outweighed the costs incurred by those who engaged in repeat re-borrowing with consequent negative outcomes and collateral consequences.

As discussed below, the Bureau has considered the comments submitted on

[498] This is true regardless of whether sequence is defined using either a 14-day, 30-day, or 60-day period to determine whether loans are within the same loan sequence. Using the 14-day period, just under half of these loans (47 percent) are in sequences that contain 10 loans or more. Using a longer period, more than half of these loans (30 days, 53 percent; 60 days, 59 percent) are in sequences that contain 10 loans or more.

[499] CFPB Single-Payment Vehicle Title Lending, at 14.

the proposal and continues to believe that both the short term and the single-payment structure of these loans contributes to the long loan sequences that borrowers take out. Various lender practices exacerbate the problem by marketing to borrowers who are particularly likely to wind up in long sequences of loans, by failing to screen out borrowers who are likely to wind up in long-term debt or to establish guardrails to avoid long-term indebtedness, and by actively encouraging borrowers to continue to re-borrow when their single-payment loans come due.

1. Loan Structure

The proposal described how the single-payment structure and short duration of these loans makes them difficult to repay. Within the space of a single income or expense cycle, a consumer with little to no savings cushion and who has borrowed to meet an unexpected expense or income shortfall, or who chronically runs short of funds, is unlikely to have the available cash needed to repay the full amount borrowed plus the finance charge on the loan when it is due and to cover other ongoing expenses. This is true for loans of a very short duration regardless of how the loan may be categorized. Loans of this type, as they exist in the market today, typically take the form of single-payment loans, including payday loans and vehicle title loans, though other types of credit products are possible.[500] Because the focus of the Bureau's research has been on payday and vehicle title loans, the discussion in Market Concerns—Underwriting centers on those types of products.

The size of single-payment loan repayment amounts (measured as loan principal plus finance charges owed) relative to the borrower's next paycheck gives some sense of how difficult repayment may be. The Bureau's storefront payday loan data shows that the average borrower being paid on a bi-weekly basis would need to devote 37 percent of her bi-weekly paycheck to repaying the loan. Single-payment vehicle title borrowers face an even greater challenge. In the data analyzed by the Bureau, the median borrower's payment on a 30-day loan is equal to 49 percent of monthly income,[501] and the Bureau finds it especially significant as indicating the severe challenges and potential for negative outcomes associated with these loans.

The commenters did not offer any data that disagreed with this analysis of how the loan structure works in practice. Industry commenters did assert, however, that the structure of these loans is not intended or designed as a means of exploiting consumers, but rather has evolved as needed to comply with the directives of State law and State regulation of this lending market. As a historical matter, this appears to be incorrect; indeed, another commenter is the founder of the company who helped to initiate the payday lending industry, W. Allan Jones. The comment notes that the ''traditional 'payday loan' product'' was first developed by his company in 1993 in Tennessee and then became the basis for legislation and regulation that has spread to a majority of States, with various modifications and refinements. As noted above in part II.A, however, another large payday lender—QC Financial—began making payday loans in Kansas in 1992 under an existing provision of that state's existing consumer lending structure and that same year at least one State regulator formally held that deferred presentment activities constituted consumer lending subject to the State's consumer credit laws.[502] Other accounts of the history of payday lending generally tend to reinforce these historical accounts that modern payday lending began emerging in the early 1990s as a variant of check-cashing stores whereby the check casher would cash and hold consumers' personal checks for a fee for several days—until payday—before cashing them.[503] The laws of States, particularly those that had adopted the Uniform Consumer Credit Code (UCCC) including Kansas and Colorado, permitted lenders to retain a minimum finance charge on loans ranging in the 1990's from about $15 to $25 per loan regardless of State rate caps, and payday lenders used those provisions to make payday loans. In other States, and later in UCCC States, more specific statutes were enacted to authorize and regulate what had become payday lending. No doubt the structure of such loan products over time is affected by and tends to conform to State laws and regulations, but the point here is that the key features of the loan structure, which tend to make these loans difficult to repay for a significant population of borrowers, are core to this financial product and are fairly consistent across time and geography.

Regardless of the historical background, however, one implication of the suggestion put forward by these commenters appears to be that the intended consequence of this loan product is to produce cycles of re-borrowing or extended loan sequences for many consumers that exceed the permissible short-term loan periods adopted under State law. The explanation seems to be that the actual borrowing needs of consumers extend beyond the permissible loan periods permitted by State law. If that is so, then the inherent nature of this mismatched product imposes large forecasting risks on the consumer, which may often lead to unexpected harms. And even if the claim instead is that the loan structure manages to co-exist with the formal constraints imposed by State law, this justification does little to minimize the risks and harms to the substantial population of consumers who find themselves trapped in extended loan sequences.

2. Marketing

The proposal also noted that the general positioning of short-term products in marketing and advertising materials as a solution to an immediate liquidity challenge attracts consumers facing these problems, encouraging them to focus on short-term relief rather than the likelihood that they are taking on a new longer-term debt. Lenders position the purpose of the loan as being for use ''until next payday'' or to ''tide over'' the consumer until she receives her next paycheck.[504] These types of

[500] In the past, a number of depository institutions have also offered deposit advance products. A small number of institutions still offer similar products. Like payday loans, deposit advances are typically structured as short-term loans. However, deposit advances do not have a pre-determined repayment date. Instead, deposit advance agreements typically stipulate that repayment will automatically be taken out of the borrower's next qualifying electronic deposit. Deposit advances are typically requested through online banking or over the phone, although at some institutions they may be requested at a branch. As described in more detail in the CFPB Payday Loans and Deposit Advance Products White Paper, the Bureau's research demonstrated similar borrowing patterns in both deposit advance products and payday loans. *See* CFPB Payday Loans and Deposit Advance Products White Paper, at 32–42.

[501] The data used for this calculation is described in CFPB Data Point: Payday Lending, at 10–15 and in CFPB Report on Supplemental Findings.

product characterizations can encourage consumers to think of these loans as easy to repay, a fast solution to a temporary cash shortfall, and a short-term obligation, all of which lessen the risk in the consumer's mind that the loan will become a long-term debt cycle. Indeed, one study reporting consumer focus group feedback noted that some participants reported that the marketing made it seem like payday loans were ''a way to get a cash infusion without creating an additional bill.'' [505]

As discussed in the proposal, in addition to presenting loans as short-term solutions, rather than potentially long-term obligations, lender advertising often focuses on how quickly and easily consumers can obtain a loan. An academic paper reviewing the advertisements of Texas storefront and online payday and vehicle title lenders found that the speed of getting a loan is the most frequently advertised feature in both online (100 percent) and storefront (50 percent) payday and title loans.[506] Advertising that is focused on immediacy and speed capitalizes on the sense of urgency borrowers feel when facing a cash shortfall. Indeed, the names of many payday and vehicle title lenders include the words (in different spellings) ''speedy,'' ''cash,'' ''easy,'' and ''quick,'' thus emphasizing their rapid and simple loan funding.

All of the commenters generally agreed as a factual matter that the marketing and offering of such loans is typically marked by ease, speed, and convenience, which are touted as positive attributes of such loans that make them desirable credit products from the standpoint of potential borrowers. Yet industry participants and trade associations broadly disputed what they viewed as the Bureau's perspective on the potential implications of this marketing analysis, as suggesting that many borrowers lack knowledge or awareness about the nature, costs, and overall effects of these loans. Consumer advocates, on the other hand, contended that the manner in which these loans are being marketed affects the likelihood that borrowers will tend to view them as short-term obligations that will not have long-term effects on their overall financial position, which often leads consumers to experience the negative outcomes associated with unexpectedly ending up in extended loan sequences.

3. Failure To Assess Ability To Repay

As discussed in the proposal, the typical loan process for storefront payday, online payday, and single-payment vehicle title lenders generally involves gathering some basic information about borrowers before making a loan. Lenders normally do collect income information, although the information they collect may just be self-reported or ''stated'' income. Payday lenders collect information to ensure the borrower has a checking account, and title lenders need information about the vehicle that will provide the security for the loan. Some lenders access consumer reports prepared by specialty consumer reporting agencies and engage in sophisticated screening of applicants, and at least some lenders turn down the majority of applicants to whom they have not previously made loans.

One of the primary purposes of this screening, however, is to avoid fraud and other ''first payment defaults,'' not to make any kind of determination that borrowers will be able to repay the loan without re-borrowing. These lenders generally do not obtain any information about the borrower's existing obligations or living expenses, which means that they cannot and do not prevent those with expenses chronically exceeding income, or those who have suffered from an income or expense shock from which they need substantially more time to recover than the term of the loan, from taking on additional obligations in the form of payday or similar loans. Thus, lenders' failure to assess the borrower's ability to repay the loan permits those consumers who are least able to repay the loans, and consequently are most likely to re-borrow, to obtain them.

Lending to borrowers who cannot repay their loans would generally not be profitable in a traditional lending market, but as described elsewhere in this section, the factors that funnel consumers into cycles of repeat re-borrowing turn the traditional model on its head by creating incentives for lenders to actually want to make loans to borrowers who cannot afford to repay them when due if instead the consequence is that these borrowers are likely to find themselves re-borrowing repeatedly. Although industry stakeholders have argued that lenders making short-term loans already take steps to assess ''ability to repay'' and will always do so out of economic self-interest, the Bureau believes that this refers narrowly to whether the consumer will default up front on the loan, rather than whether the consumer has the capacity to repay the loan without having to re-borrow and while meeting other financial obligations and basic living expenses. The fact that lenders often do not perform additional underwriting when borrowers are rolling over a loan, or are returning to borrow again soon after repaying a prior loan, further shows that lenders do not see re-borrowing as a sign of borrowers' financial distress or as an outcome to be avoided. Rather, repeated re-borrowing may be perceived as a preferred outcome for the lender or even as an outcome that is a crucial underpinning to the business model in this loan market.

For the most part, commenters did not take issue with the tenets of this factual description of the typical underwriting process for such loans, though some lenders contended that they do not intentionally seek out potential customers who are likely to have to re-borrow multiple times. As noted, however, this approach is consistent with the basic business model for such loans as described above. Industry

loan may be a solution to help keep you afloat until your next pay day.''); Check Into Cash, ''Our Loan Process,'' *https://checkintocash.com/payday-loans/* (last visited Sept. 24, 2017) (''A payday loan is a small dollar short-term advance used as an option to help a person with small, often unexpected expenses.''); Cash America, ''Cash Advance/Short-term Loans,'' *http://www.cashamerica.com/LoanOptions/CashAdvances.aspx* (last visited May 18, 2016) (noting that ''a short-term loan, payday advance or a deferred deposit transaction—can help tide you over until your next payday'' and that ''A single payday advance is typically for two to four weeks. They were already in debt and struggling with regular expenses, and a payday loan seemed like a way to get a cash infusion without creating an additional bill.'').

[506] Jim Hawkins, ''Using Advertisements to Diagnose Behavioral Market Failure in Payday Lending Markets,'' 51 Wake Forest L. Rev. 57, at 71 (2016). The next most advertised features in online content are simple application process and no credit check/bad credit OK (both at 97 percent). For storefront lenders, the ability to get a high loan amount was the second most highly advertised content.

participants and trade associations did dispute one perceived implication of this discussion by asserting that long loan sequences, at least standing alone, cannot simply be assumed to be harmful or to demonstrate a consumer's inability to repay these loans, as many factors may bear on those outcomes. This point is discussed further below.

4. Encouraging Long Loan Sequences

In the proposal, the Bureau recounted its assessment of the market by noting that lenders attract borrowers in financial crisis, encourage them to think of the loans as a short-term solution, and fail to screen out those for whom the loans are likely to become a long-term debt cycle. After that, lenders then actively encourage borrowers to re-borrow and continue to be indebted rather than pay down or pay off their loans. Although storefront payday lenders typically take a post-dated check, which could be presented in a manner timed to coincide with deposit of the borrower's paycheck or government benefits, lenders usually encourage or even require borrowers to come back to the store to redeem the check and pay in cash.[507] When the borrowers return, they are typically presented by lender employees with two salient options: Repay the loan in full, or simply pay a fee to roll over the loan (where permitted under State law). If the consumer does not return, some lenders may reach out to the customer but ultimately the lender will proceed to attempt to collect by cashing the check. On a $300 loan at a typical charge of $15 per $100 borrowed, the cost to defer the due date for another 14 days until the next payday is $45, while repaying in full would cost $345, which may leave the borrower with insufficient remaining income to cover expenses over the ensuing month and therefore tends to prompt re-borrowing. Requiring repayment in person gives staff at the stores the opportunity to frame for borrowers a choice between repaying in full or just paying the finance charge, which may be coupled with encouragement guiding them to choose the less immediately painful option of paying just the finance charge and rolling the loan over for another term. Based on its experience from supervising payday lenders over the past several years, the Bureau has observed that storefront employees are generally incentivized to maximize the store's loan volume and the data suggest that re-borrowing is a crucial means of achieving this goal.[508]

As laid out in the proposal, the Bureau's research shows that payday borrowers rarely re-borrow a smaller amount than the initial loan. Doing so would effectively amortize their loans by reducing the principal amount owed over time, thereby reducing their costs and the expected length of their loan sequences. Rather than encouraging borrowers to make amortizing payments that would reduce their financial exposure over time, lenders encourage borrowers to pay the minimum amount and re-borrow the full amount of the earlier loan, thereby contributing to this outcome. In fact, as discussed in the proposal, some online payday loans automatically roll the loan over at the end of its term unless the consumer takes affirmative action in advance of the due date, such as notifying the lender in writing at least three days before the due date. As some industry commenters noted, single-payment vehicle title borrowers who take out multiple loans in a sequence are more likely than payday borrowers who taken out multiple loans in a sequence to reduce the loan amount from the beginning to end of that sequence. After excluding for single loan sequences for which this analysis is not applicable, 37 percent of single-payment vehicle title loan sequences have declining loan amounts compared to just 15 percent of payday loan sequences. This greater likelihood of declining loan amounts for single-payment vehicle title loans compared to payday loans may also be influenced by the larger median size of title loans, which is $694, as compared to the median size of payday loans, which is $350. However, this still indicates that a large majority of single payment vehicle title loan borrowers have constant or increasing loan amounts over the course of a sequence. In addition, the Bureau's analysis shows that those single payment vehicle title loan borrowers who do reduce their loan amounts during a sequence only do so for a median of about $200, which is less than a third of the median loan amount of about $700.[509] This may reflect the effects of certain State laws regulating vehicle title loans that require some reduction in loan size across a loan sequence.

Lenders also actively encourage borrowers who they know are struggling to repay their loans to roll over and continue to borrow. In the Bureau's work over the past several years to monitor the operations and compliance of such lenders, including supervisory examinations and enforcement actions, the Bureau has found evidence that lenders maintain training materials that promote borrowing by struggling borrowers.[510] In one enforcement action, the Bureau found that if a borrower did not repay in full or pay to roll over the loan on time, personnel would initiate collections. Store personnel or collectors would then offer new loans as a source of relief from the collections activities. This approach, which was understood to create a ''cycle of debt,'' was depicted graphically as part of the standard ''loan process'' in the company's new hire training manual. The Bureau is aware of similar practices in the single-payment vehicle title lending market, where store employees offer borrowers additional cash during courtesy calls and when calling about past-due accounts, and company training materials instruct employees to ''turn collections calls into sales calls'' and encourage delinquent borrowers to refinance to avoid default and repossession of their vehicles.

It also appears that lenders do little to affirmatively promote the use of ''off ramps'' or other alternative repayment options, even when those are required by law to be made available to borrowers. Such alternative repayment plans could help at least some borrowers avoid lengthy cycles of re-borrowing. Lenders that belong to one of the two national trade associations for storefront payday lenders have agreed to offer an extended payment plan to borrowers, but only if the borrower makes a request at least one day prior to the date on which the loan is due.[511]

[507] The Bureau believes from its experience in conducting examinations of storefront payday lenders and its outreach that cash repayments on payday and vehicle title loans are prevalent, even when borrowers provide post-dated checks or ACH authorizations for repayment. The Bureau has developed evidence from reviewing a number of payday lenders subject to supervisory examination in 2014 that the majority of them call each borrower a few days before payment is due to remind them to come to the store and pay the loan in cash. As an example, one storefront lender requires borrowers to come in to the store to repay. Its Web site states: ''All payday loans must be repaid with either cash or money order. Upon payment, we will return your original check to you.'' Others give borrowers ''appointment'' or ''reminder'' cards to return to make a payment in cash. In addition, vehicle title loans do not require a bank account as a condition of the loan, and borrowers without a checking account must return to storefront title locations to make payments.

[508] Most storefront lenders examined by the Bureau employ simple incentives that reward employees and store managers for loan volumes.

Continued

(The second national trade association reports that its members provide an extended payment plan option, but details on that option are not available.) In addition, about 18 States require payday lenders to offer repayment plans to borrowers who encounter difficulty in repaying payday loans. The usage rate of these repayment plans varies widely, but in all cases it is relatively low.[512] One explanation for the low take-up rate on these repayment plans may be that certain lenders disparage the plans or fail to promote their availability.[513] By discouraging the use of repayment plans, lenders make it more likely that such consumers will instead re-borrow. The Bureau's supervisory examinations uncovered evidence that one or more payday lenders train their employees not to mention repayment plans until after the employees have offered renewals, and then only to mention repayment plans if borrowers specifically ask about them.

In general, most of the commenters did not take issue with this factual account of the mechanics or incentives that lead to a high incidence of rolling over such loans, and much of what they said tended to confirm it. In particular, industry commenters acknowledged that incentive programs for their employees based on net revenue are widespread in the industry. Such programs are not illegal, of course, but given the structure of these loans as described above, this suggests that employees are being incentivized to encourage re-borrowing and extended loan sequences by having borrowers roll their loans over repeatedly.

Industry participants, trade associations, and some individual users of such loans did argue, however, about the implications of this analysis. One of their claims is that many consumers have an actual borrowing need that extends beyond the loan period permitted under State law, and thus repeated re-borrowing may be a means of synchronizing the consumer's borrowing needs to the specific contours of the loan product. In particular, they contended that re-borrowing may be beneficial to consumers as part of longer-term strategies around income smoothing or debt management, a point that is discussed further below.

5. Payment Mechanisms and Vehicle Title

The proposal noted that where lenders can collect payments through post-dated checks or ACH authorizations, or obtain security interests in borrowers' vehicles, these mechanisms also can be used to encourage borrowers to re-borrow, as a way to avoid what otherwise could be negative consequences if the lender were to cash the check or repossess the vehicle. For example, consumers may feel significantly increased pressure to return to a storefront to roll over a payday or vehicle title loan that includes such features. They may do so rather than risk incurring new fees in connection with an attempt to deposit the consumer's post-dated check, such as an overdraft or NSF fee from the bank and a returned-item fee from the lender if the check were to bounce or risk suffering the repossession of their vehicle. The pressure can be especially acute when the lender obtains security in the borrower's vehicle.

The proposal also noted that in cases where consumers do ultimately default on their loans, and these mechanisms are at last effectuated, they often magnify the total harm that consumers suffer from losing their access to essential transportation. Consumers often will have additional account and lender fees assessed against them, and some will end up having their bank accounts closed. When this occurs, they will have to bear the many attendant costs of becoming stranded outside the banking system, which include greater inconvenience, higher costs, reduced safety of their funds, and the loss of the other advantages of a standard banking relationship.

These harms are very real for many consumers. For example, as discussed in more detail below in Market Concerns—Payments, the Bureau's research has found that 36 percent of borrowers who took out online payday or payday installment loans and had at least one failed payment during an eighteen-month period had their checking accounts closed by the bank by the end of that period, a rate that is four times greater than the closure rate for accounts that only had NSFs from non-payday transactions.[514] For accounts with failed online payday loan transactions, account closures typically occur within 90 days of the last observed online payday loan transaction; in fact, 74 percent of account closures in these situations occur within 90 days of the first NSF return triggered by an online payday or payday installment lender.[515] This suggests that the online loan played a role in the closure of the account, or that payment attempts failed because the account was already headed towards closure, or both.[516]

In general, the commenters did not challenge the Bureau's factual account of how these payment mechanisms can lead to these collateral consequences that harm consumers. Industry commenters did disagree, however, with the premise that these harms were caused by the use of covered short-term loans. Some disagreed about the overall magnitude of these harms, stating that there is no evidence that covered short-term loans actually cause account closures or NSF fees, as stated in the proposal, and arguing that the Bureau overstated the extent to which consumers who default are subjected to NSF fees or fees resulting from bounced checks. But they did not present any convincing data to refute what the Bureau had observed from its own research and experience, and the assertion that online loans may have performed more poorly than storefront loans in these respects was not persuasive. Although the Bureau did not purport to find that the evidence in its data was determinative as to causation, the relationship between the consumer experience on such loans and the borrower outcomes was strongly reinforced by the data and logical as to the connection between them.

c. Patterns of Lending and Extended Loan Sequences

The Bureau's proposal described how borrower characteristics, the circumstances of borrowing, the structure of the short-term loans, and the practices of the lenders together lead to dramatic negative outcomes for many payday and single-payment vehicle title borrowers. There is strong evidence that a meaningful share of borrowers who take out payday and single-payment vehicle title loans end up with very long sequences of loans, and the loans made to borrowers with these negative outcomes make up a majority of all the loans made by these lenders.[517]

Long loan sequences lead to very high total costs of borrowing. Each single-payment loan carries the same cost as the initial loan that the borrower took out. For a storefront borrower who takes out the average-sized payday loan of $350 with a typical fee of $15 per $100, each re-borrowing by rolling over the loan means paying additional fees of $52.50. After just three re-borrowings, the borrower will have paid more than $150 simply to defer payment of the original principal amount by an additional period ranging from six weeks to three months.

As noted in the proposal, the cost of re-borrowing for title borrowers is even more dramatic, given the higher price and larger size of those loans. The Bureau's data indicates that the median loan size for single-payment vehicle title loans is $694. One study found that the most common rate charged on the typical 30-day title loan is $25 per $100 borrowed, which is a common State limit and equates to an APR of 300 percent.[518] A typical instance of re-borrowing thus means that the consumer pays a fee of around $175. After just three re-borrowings, a consumer will typically have paid about $525 simply to defer payment of the original principal amount by three months.

The proposal cited evidence for the prevalence of long sequences of payday and title loans, which comes from the Bureau's own work, from analysis by independent researchers and analysts commissioned by industry, and from statements by industry stakeholders. The Bureau has published several analyses of storefront payday loan borrowing.[519] Two of these have focused on the length of loan sequences that borrowers take out. In these publications, the Bureau defined a loan sequence as a series of loans where each loan was taken out either on the day the prior loan was repaid or within some number of days from when the loan was repaid. The Bureau's 2014 Data Point used a 14-day window to define a sequence of loans. Those data have been further refined in the CFPB Report on Supplemental Findings and shows that when a borrower who is not currently in a loan sequence takes out a payday loan, borrowers wind up taking out at least four loans in a row before repaying 43 percent of the time, take out at least seven loans in a row before repaying 27 percent of the time, and take out at least 10 loans in a row before repaying 19 percent of the time.[520] In the CFPB Report on Supplemental Findings, the Bureau re-analyzed the data using 30-day and 60-day definitions of sequences. The results are similar, although using longer windows leads to longer sequences of more loans. Using the 30-day definition of a sequence, 50 percent of new loan sequences contain at least four loans, 33 percent of sequences contain at least seven loans, and 24 percent of sequences contain at least 10 loans.[521] Borrowers who take out a fourth loan in a sequence have a 66 percent likelihood of taking out at least three more loans, for a total sequence length of seven loans. And such borrowers have a 48 percent likelihood of taking out at least six more loans, for a total sequence length of 10 loans.[522]

These findings are mirrored in other analyses. During the SBREFA process, one participant submitted an analysis prepared by Charles River Associates (CRA) of loan data from several small storefront payday lenders.[523] Using a 60-day sequence as its definition, CRA found patterns of borrowing very similar to those that the Bureau had found. Compared to the Bureau's results using a 60-day sequence definition, in the

negative ChexSystems report stemming from the account closure).

[517] In addition to the array of empirical evidence demonstrating this finding, industry stakeholders themselves have expressly or implicitly acknowledged the dependency of most storefront payday lenders' business models on repeat borrowing. A June 20, 2013 letter to the Bureau from an attorney for a national trade association representing storefront payday lenders asserted that, ''[i]n any large, mature payday loan portfolio, loans to repeat borrowers generally constitute between 70 and 90 percent of the portfolio, and for some lenders, even more,'' and that ''[t]he borrowers most likely to roll over a payday loan are, first, those who have already done so, and second, those who have had un-rolled-over loans in the immediately preceding loan period.'' Letter from Hilary B. Miller to Bureau of Consumer Fin. Prot. (June 20, 2013), *available at http://files.consumerfinance.gov/f/201308_cfpb_cfsa-information-quality-act-petition-to-CFPB.pdf*. The letter asserted challenges under the Information Quality Act to the Bureau's published White Paper (2013); *see also* Letter from Ron Borzekowski & B. Corey Stone, Jr., Bureau of Consumer Fin. Prot., to Hilary B. Miller (Aug. 19, 2013), *available at https://encrypted.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=3&ved=0ahUKEwjEzu_EuMDWAhUGYiYKHY00ASEQFggvMAI&url=http%3A%2F%2Ffiles.consumerfinance.gov%2Ff%2F201308_cfpb_cfsa-response.pdf&usg=AFQjCNF8PpFfXq_pt-lFOJtot1tRX_Or6A* (Bureau's response to the challenge).

[521] CFPB Report on Supplemental Findings. In proposed § 1041.6 the Bureau proposed some limitations on loans made within a sequence, and in proposed § 1041.2(a)(12), the Bureau proposed to define a sequence to include loans made within 30 days of one another. The Bureau believes that this is a more appropriate definition of sequence than using either a shorter or longer time horizon for the reasons set forth in the section-by-section analyses of proposed §§ 1041.2(a)(12) and 1041.6. For these same reasons, the Bureau believes that the findings contained in the CFPB Report on Supplemental Findings and cited in text provide the most accurate quantification of the degree of harm resulting from cycles of indebtedness.

[522] These figures are calculated simply by taking the share of sequences that are at least seven (or ten) loans long and diving by the share of sequences that are at least four loans long.

[523] Arthur Baines et al., ''Economic Impact on Small Lenders of the Payday Lending Rules Under Consideration by the CFPB,'' Charles River Associates, (2015), *available at http://www.crai.com/publication/economic-impact-small-lenders-payday-lending-rules-under-consideration-cfpb*. The CRA analysis states that it used the same methodology as the Bureau.

CRA analysis there were more loans where the borrower defaulted on the first loan or repaid without re-borrowing (roughly 44 percent versus 25 percent), and fewer loans that had 11 or more loans in the sequence, but otherwise the patterns were nearly identical.[524]

Similarly, in an analysis funded by an industry research organization, researchers found a mean sequence length, using a 30-day sequence definition, of nearly seven loans.[525] This is slightly higher than the mean 30-day sequence length in the Bureau's analysis (5.9 loans).

Analysis of a multi-lender, multi-year dataset by a research group affiliated with a specialty consumer reporting agency found that over a period of approximately four years the average borrower had at least one sequence of nine loans; that 25 percent of borrowers had at least one loan sequence of 11 loans; and that 10 percent of borrowers had at least one loan sequence of 22 loans.[526] Looking at these same borrowers for a period of 11 months—one month longer than the duration analyzed by the Bureau—the researchers found that on average the longest sequence these borrowers experienced over the 11 months was 5.3 loans, that 25 percent of borrowers had a sequence of at least seven loans, and that 10 percent of borrowers had a sequence of at least 12 loans.[527] This research group also identified a core of users with extremely persistent borrowing, and found that 30 percent of borrowers who took out a loan in the first month of the four-year period also took out a loan in the last month.[528] The median time in debt for this group of extremely persistent borrowers was over 1,000 days, which is more than half of the four-year period. The median borrower in this group of extremely persistent borrowers had at least one loan sequence of 23 loans long or longer (which was nearly two years for borrowers who were paid monthly). Perhaps most notable, almost one out of ten members of this research group (nine percent) borrowed continuously for the *entire* four-year period.[529]

In the proposal, the Bureau also presented its analysis of single-payment vehicle title loans according to the same basic methodology.[530] Using a 30-day definition of loan sequences, the Bureau found that short-term single-payment vehicle title loans had loan sequences that were similar to payday loans. More than half (56 percent) of these sequences contained at least four loans; 36 percent contained seven or more loans; and 23 percent had 10 or more loans. The Bureau's analysis found that title borrowers were less likely than those using payday loans to repay a loan without re-borrowing or defaulting. Only 12 percent of single-payment vehicle title loan sequences consisted of a single loan that was repaid without subsequent re-borrowing, compared to 22 percent of payday loan sequences.[531] Other sources on title lending are more limited than for payday lending, but are generally consistent. For instance, the Tennessee Department of Financial Institutions publishes a biennial report on 30-day single-payment vehicle title loans. The most recent report shows very similar results to those the Bureau found in its research, with 66 percent of borrowers taking out four or more loans in row, 40 percent taking out more than seven loans in a row, and 24 percent taking out more than 10 loans in a row.[532]

Some commenters noted data showing that vehicle title borrowers use re-borrowing to self-amortize their principal balance to a greater extent than payday borrowers do, which they suggested is evidence that title re-borrowing is not injurious. As noted previously, while it is true that more title borrowers in multi-loan sequences have declining loan balances than do payday borrowers in multi-loan sequences, this is likely the result of title loans starting out at much larger amounts. More salient is the fact that 63 percent of multi-loan sequences of title loans are for principal amounts that either remain unchanged or actually increase during the sequence, and that even those title loan sequences that do have a decline in loan amount over time only have a median decline of about $200 from beginning to end of the sequence, which is less than one-third of the average total amount of these loans. And the default rate remains high even for amortizing multi-loan sequences of title loans, at 22 percent, which is slightly higher than the default rate for payday loans (20 percent), even though the latter amortize less often. All of this suggests that even if title borrowers can somewhat reduce the larger principal amount of their loans over time, it remains difficult to succeed in digging themselves out of the debts they have incurred with these loans.

In addition to direct measures of the length of loan sequences, the cumulative number of loans that borrowers take out provides ample indirect evidence that they are often getting stuck in a long-term debt cycle. The Bureau has measured total borrowing by payday borrowers in two ways. In one study, the Bureau took a snapshot of borrowers in lenders' portfolios at a point in time (measured as borrowing in a particular month) and tracked them for an additional 11 months (for a total of 12 months) to assess overall loan use. This study

[532] Letter from Greg Gonzales, Comm'r, Tennessee Dep't of Fin. Insts., to Hon. Bill Haslam, Governor and Hon. Members of the 109th General Assembly, at 8 (Apr. 12, 2016) (Report on the Title Pledge Industry), *available at http://www.tennessee.gov/assets/entities/tdfi/attachments/Title_Pledge_Report_2016_Final_Draft_Apr_6_2016.pdf*.

found that the median borrowing level was 10 loans over the course of a year, and more than half of the borrowers had loans outstanding for more than half of the year.[533] In another study, the Bureau measured the total number of loans taken out by borrowers beginning new loan sequences. It found that these borrowers had lower total borrowing than borrowers who may have been mid-sequence at the beginning of the period, but the median number of loans for the new borrowers was six loans over a slightly shorter (11-month) period.[534] Research by others finds similar results, with average or median borrowing, using various data sources and various samples, of six to 13 loans per year.[535]

One commenter provided further data on the length of time consumers use payday loans, which gave more particulars about multi-year indebtedness in States with payday lending, such as South Carolina and Florida. The Florida data showed that over 40 percent of all consumers who took out one or more payday loans in 2012 continued to use the product three years later, and about a third of all consumers who took one or more payday loans in 2012 continued to use the product five years later. The South Carolina data provided similar information, but reported findings for consumers by borrowing intensity. It tended to show that those with the greatest intensity of borrowing were the least likely to end the borrowing relationship over a three-year period. Separately, a report on payday lending market trends by a specialty consumer reporting agency finds that over half of all loans are made to existing customers rather than consumers who have not used payday loans before.[536] This report concludes that ''even though new customers are critical, existing customers are the most productive.'' [537]

The proposal also noted that, given differences in the regulatory context and the overall nature of the market, less information is available about online lending than storefront lending. Borrowers who take out payday loans online are likely to change lenders more frequently than storefront borrowers, so that absent comprehensive data that allows borrowing patterns to be tracked across all lenders, measuring the duration of loan sequences becomes much more challenging. The limited information that is available suggests that online borrowers take out fewer loans than storefront borrowers, but that borrowing is highly likely to be under-counted. A report commissioned by an online lender trade association, using data from three online lenders making single-payment payday loans, reported an average loan length of 20 days and an average of 73 days in debt per year.[538] The report averages the medians of the three lenders' data, which makes interpretation of these values difficult; still, these findings indicate that borrowers take out three to four loans per year at these lenders.

Additional analysis is available based on the records of a specialty consumer reporting agency. The records show similar loans per borrower, 2.9, but over a multi-year period.[539] These loans, however, are not primarily single-payment payday loans. A small number are installment loans, while most are ''hybrid'' loans with a typical duration of roughly four pay cycles. In addition, this statistic likely understates usage because online lenders may not report all of the loans they make, and some may only report the first loan they make to a borrower. Borrowers may also be more likely to change lenders online and, as many lenders do not report to the specialty consumer reporting agency that provided the data for the analysis, when borrowers change lenders their subsequent loans often may not be in the data analyzed.

Although many industry commenters disputed the significance of these findings, they offered little evidence that was inconsistent with the data presented by the Bureau. One commenter disputed the accuracy of the Bureau's statement that 69 percent of payday loan sequences which end in default are multi-loan sequences and offered its own analysis based on its own customer data, which presented somewhat lower numbers but was largely consistent with the data presented by the Bureau. Still other commenters cited a petition that purported to show data errors relating to the Bureau's White Paper on payday loans and deposit advance products that was used to draw conclusions about the prevalence of re-borrowing, which they argued was based on an unrepresentative sample weighted heavily toward repeat users. The Bureau has addressed this criticism previously, and explained that the methodology used in the White Paper, which took a snapshot of borrowers at the beginning of a twelve-month observation period and followed those borrowers over the ensuing eleven months, is an appropriate method of assessing borrowing intensity even though it is true that any such snapshot will be disproportionately composed of repeat borrowers because they comprise the bulk of payday lenders' business. At the same time, the Bureau has conducted an alternative analysis which tracks the borrowing experience of fresh borrowers and it is that analysis on which the Bureau is principally relying here for covered short-term loans.

Another study was cited to suggest that cost does not drive the cycle of debt because it found that borrowers who were given no-fee loans had re-borrowing rates that were comparable to those who were given loans with normal fees.[540] The upshot of this study, however, tended to show that the single-payment loan structure was instead a sufficient driver of the debt cycle, even without regard to the size of the fees that were charged. In fact, this study actually tends to refute the claim made elsewhere by industry commenters that the Bureau is trying to evade the statutory prohibition on imposing a usury cap by addressing price, since price alone does not seem to drive the cycle of debt that is a primary source of the harms resulting from these loans—

rather, it is the single-payment loan structure that does so.

Many industry participants and trade associations contended that, standing alone, multiple loan sequences cannot be presumed to be harmful to consumers. In particular, one trade association stated that where an income or expense shock cannot be resolved at once, re-borrowing in extended loan sequences can be an effective longer-term strategy of income smoothing or debt management until the consumer's financial situation improves. Thus re-borrowing cannot be presumed to be necessarily irrational or harmful, depending on the circumstances. This commenter also cited studies that examined the credit scores of payday borrowers and reported finding better outcomes for longer-term borrowers than for those who are limited to shorter loan durations, and also that reported finding better outcomes for consumers in States with less restrictive payday lending laws than for those in States with more restrictive laws. These issues are important and they are discussed further in § 1041.4 below.

A coalition of consumer groups was in agreement as a factual matter that many consumers of payday and single-payment vehicle title loans end up in extended loan sequences, and many individual commenters described their own personal experiences and perspectives on this point. They observed that borrowers in these situations do in fact suffer many if not all of the harmful collateral consequences described in the proposal, which merely compound their existing financial difficulties and leave them worse off than they were before they took out such loans. Once again, however, putting aside the starkly different conclusions that commenters were drawing from the data, the basic accuracy of the data presented in the proposal on the patterns of lending and extended loan sequences was generally acknowledged. The arguments for and against the validity of their respective conclusions are considered further in the section-by-section analysis for § 1041.4 below.

d. Consumer Expectations and Understanding of Loan Sequences

As discussed in the proposal, extended sequences of loans raise tangible concerns about the market for short-term loans. These concerns are exacerbated by the empirical evidence on consumer understanding of such loans. The available evidence indicates that many of the borrowers who take out long sequences of payday loans and single-payment vehicle title loans do not anticipate at the outset that they will end up experiencing those long sequences.

Measuring consumers' expectations about re-borrowing is inherently challenging. When answering survey questions about loan repayment, there is the risk that borrowers may conflate repaying an individual loan with completing an extended sequence of borrowing. Asking borrowers retrospective questions about their expectations at the time they started borrowing is likely to suffer from recall problems, as people have difficulty remembering what they expected at some time in the past. The recall problem is likely to be compounded by respondents tending to want to avoid admitting that they have made a mistake. Asking about expectations for future borrowing may also be imperfect, as some consumers may not be thinking explicitly about how many times they will roll a loan over when taking out their first loan. Merely asking the question may cause people to think about it and focus on it more than they otherwise would have.

Two studies discussed in the proposal have asked payday and vehicle title borrowers at the time they took out their loans about their expectations about re-borrowing, either the behavior of the average borrower or their own borrowing, and compared their responses with actual repayment behavior of the overall borrower population.[541] One 2009 survey of payday borrowers found that over 40 percent of borrowers thought that the average borrower would have a loan outstanding for only two weeks, and another 25 percent said four weeks. Translating weeks into loans, the four-week response likely reflects borrowers who believe the average number of loans that a borrower will take out before repaying is either one loan or two loans, depending on how many respondents were paid bi-weekly as opposed to monthly. The report did not provide data on actual re-borrowing, but based on analysis performed by the Bureau and others, these results suggest that respondents were, on average, somewhat optimistic about re-borrowing behavior.[542] However, it is difficult to be certain that some survey respondents did not conflate the time during which the loans are outstanding with the contract term of individual loans. This may be so because the researchers asked borrowers, ''What's your best guess of how long it takes the average person to pay back in full a $300 payday loan?'' Some borrowers may have interpreted this question to refer to the specific loan being taken out, rather than subsequent rollovers. People's beliefs about their own re-borrowing behavior could also vary from their beliefs about average borrowing behavior by others. This study also did not specifically distinguish other borrowers from the subset of borrowers who end up in extended loan sequences.

Another study discussed in the proposal was a study of single-payment vehicle title borrowers, where researchers surveyed borrowers about their expectations about how long it would take to repay the loan.[543] The report did not have data on borrowing, but compared the responses with the distribution of repayment times reported by the Tennessee Department of Financial Institutions. The report found that the entire population of borrowers was slightly optimistic, on average, in their predictions.[544]

The two studies just described compared borrowers' predictions of average borrowing with overall average borrowing levels, which is only informative about how accurate borrowers' predictions are about the average. By contrast, a 2014 study by Professor Ronald Mann,[545] which was discussed in the proposal, did attempt to survey borrowers at the point at which they were borrowing. This survey asked them about their expectations for repaying their loans and compared their responses with their subsequent actual borrowing behavior, using loan records to measure how accurate their predictions were. The results described

[541] Kathryn Fritzdixon et al., ''Dude, Where's My Car Title?: The Law Behavior and Economics of Title Lending Markets,'' 2014 U. IL L. Rev. 1013 (2014); Marianne Bertrand and Adair Morse, ''Information Disclosure, Cognitive Biases and Payday Borrowing,'' 66 J. of Fin. 1865 (2011).

[542] Marianne Bertrand and Adair Morse, ''Information Disclosure, Cognitive Biases and Payday Borrowing,'' 66 J. of Fin. 1865 (2011). Based on the Bureau's analysis, approximately 50–55 percent of loan sequences, measured using a 14-day sequence definition, end after one or two loans, including sequences that end in default. *See also* CFPB Data Point: Payday Lending, at 11; CFPB Report on Supplemental Findings, at chapter 5. Using a relatively short re-borrowing period seems more likely to match how respondents interpret the survey question, but that is speculative. Translating loans to weeks is complicated by the fact that loan terms vary depending on borrowers' pay frequency; four weeks is two loans for a borrower paid bi-weekly, but only one loan for a borrower paid monthly.

[543] Kathryn Fritzdixon et al., ''Dude, Where's My Car Title?: The Law Behavior and Economics of Title Lending Markets,'' 2014 U. IL L. Rev. 1013, at 1029–1030 (2014).

[544] As noted above, the Bureau found that the re-borrowing patterns in data analyzed by the Bureau are very similar to those reported by the Tennessee Department of Financial Institutions.

[545] Ronald Mann, ''Assessing the Optimism of Payday Loan Borrowers,'' 21 Supreme Court Econ. Rev. 105 (2013).

in the report, combined with subsequent analysis that Professor Mann shared with Bureau staff, show the following:[546]

First, and most significant, many fewer borrowers expected to experience long sequences of loans than actually did experience long sequences. Focusing on the borrowers who ended up borrowing for more than 150 days, it is notable that none predicted they would be in debt for even 100 days.[547] And of those who ended up borrowing for more than 100 days, only a very small fraction predicted that outcome.[548] Indeed, the vast majority of those who borrowed for more than 100 days actually expected to borrow for less than 50 days.[549] Borrowers who experienced long sequences of loans do not appear to have expected those long sequences when they made their initial borrowing decision; in fact they had not predicted that their sequences would be longer than the average predicted by borrowers overall. And while some borrowers did expect long sequences, those borrowers were more likely to err in their predictions; as Mann noted, ''both the likelihood of unexpectedly late payment and the proportionate size of the error increase substantially with the length of the borrower's prediction.'' [550]

Second, Mann's analysis suggests that past borrowing experience is not indicative of increased understanding of product use. In fact, those who had borrowed the most in the past did not do a better job of predicting their future use; they were actually more likely to underestimate how long it would take them to repay fully. As Mann noted in his paper, ''heavy users of the product tend to be those that understand least what is likely to happen to them.'' [551]

Finally, Mann's research also indicated that about as many consumers underestimated how long they would need to re-borrow as those who overestimated it, which suggested they have difficulty predicting the extent to which they will need to re-borrow. In particular, the Bureau's analysis of the data underlying Mann's paper determined that there was not a correlation between borrowers' predicted length of re-borrowing and their actual length of re-borrowing.[552] Professor Mann, in an email to the Bureau, confirmed that his data showed no significant relationship between the predicted number of days and the days to clearance.[553] This point was reinforced in his survey results by the fact that fully 20 percent of the borrowers who responded were not even able to offer any prediction at all about their expected duration of indebtedness.[554]

Professor Mann submitted a comment about his paper, which took issue with the Bureau's analysis of its findings. He contended his research shows instead that most payday borrowers expected some repeated sequences of loans, most of them accurately predicted the length of the sequence that they would borrow, and they did not systematically err on the optimistic side. The Bureau acknowledges these findings, and does not believe they are inconsistent with the interpretation provided here. Mann also noted that the Bureau placed its main emphasis not on the entire universe of borrowers, but on the group of borrowers who continued borrowing over the period for which he had access to the loan data, where his research showed that many of those borrowers did not anticipate that they would end up in such extended loan sequences. He further acknowledged that ''the absolute size of the errors is largest for those with the longest sequences.'' [555] He went on to state that this finding suggests ''that the borrowers who have borrowed the most are those who are in the most dire financial distress, and consequently least able to predict their future liquidity.'' [556] He also noted that the errors of estimation these borrowers tend to make are unsystematic and do not consist either of regular underestimation or regular overestimation of their subsequent duration of borrowing.[557]

The discussion of these survey findings thus seems to reflect more of a difference in emphasis than a disagreement over the facts. Professor Mann's interpretation appears most applicable to those borrowers who remain in debt for a relatively short period, who constitute a majority of all borrowers, and who do not appear to systematically fail to appreciate what will happen to them when they re-borrow. The Bureau does not disagree with this point. Instead, it emphasizes the subset of borrowers who are its principal concern, which consists of those longer-term borrowers who find themselves in extended loan sequences and thereby experience the various harms that are associated with a longer cycle of indebtedness. For *those* borrowers, the picture is quite different, and their ability to estimate accurately what will happen to them when they take out a payday loan is more limited, as Mann noted in his paper and in the comment he submitted.[558] For example, of the borrowers who remained in debt at least 140 days (10 biweekly loans), it appears that all (100 percent) underestimated their times in debt, with the average borrower in this group spending 119 more days in debt than anticipated (equivalent to 8.5 unanticipated rollovers). Of those borrowers who spent 90 or more days in debt (*i.e.,* those most directly affected by the rule's limits on re-borrowing under the § 1041.6), it appears that more than

[546] The Bureau notes that Professor Mann draws different interpretations from his analysis than does the Bureau in certain instances, as explained below, and industry stakeholders, including SERs, have cited Mann's study as support for their criticism of the Small Business Review Panel Outline. Much of this criticism is based on Professor Mann's finding that ''about 60 percent of borrowers accurately predict how long it will take them finally to repay their payday loans.'' Ronald Mann, ''Assessing the Optimism of Payday Loan Borrowers,'' 21 Supreme Court Econ. Rev. 105, at 105 (2013). The Bureau notes, however, that this was largely driven by the fact that many borrowers predicted that they would not remain in debt for longer than one or two loans, and in fact this prediction was accurate for many such borrowers. But it did not address the much larger forecasting problems experienced by other borrowers, particularly those who ended up in extended loan sequences.

[547] *See* Attachment to Email from Ronald Mann, Professor, Columbia Law School, to Jialan Wang & Jesse Leary, Bureau of Consumer Fin. Prot. (Sept. 24, 2013, 1:32 EDT), at 17. Correspondence between Bureau staff and Professor Mann was included as related material in the public docket supporting the proposed rule as published in the **Federal Register** on July 22, 2016.

The same point can be made from another angle as well. Only 10 percent of borrowers expected to be in debt for more than 70 days (five two-week loans), and only 5 percent expected to be in debt for more than 110 days (roughly eight two-week loans), yet the actual numbers were substantially higher. *See* Ronald Mann, ''Assessing the Optimism of Payday Loan Borrowers,'' 21 Supreme Court Econ. Rev. 105, at 122 (2013) Indeed, approximately 12 percent of borrowers still remained in debt after 200 days (14 two-week loans). *See* comment letter submitted by Prof. Ronald Mann, at 2.

95 percent underestimated their time in debt, spending an average of 92 more days in debt than anticipated (equivalent to 6.5 unanticipated rollovers). Additionally, a line of ''best fit'' provided by Professor Mann describing the relationship between a borrower's expected time in debt and the actual time in debt experienced by that borrower shows effectively zero slope (indicating no correlation between a borrower's expectations and outcomes). In other words, while many individuals appear to have anticipated short durations of use with reasonable accuracy (highlighted by Mann's interpretation), virtually none properly anticipated long durations (which is the market failure described here).[559] For further discussion on the Mann data, see the Section 1022(b)(2) Analysis in part VII below.

Professor Mann's comment also referred to two other surveys of payday borrowers that the Bureau discussed in its proposal. A trade association commissioned the two surveys, which suggest that consumers are able to predict their borrowing patterns.[560] Both studies, as the Bureau had noted and as Professor Mann acknowledged, are less reliable in their design than the original Mann study because they focus only on borrowers who had successfully repaid a recent loan, which clearly would have biased the results of those surveys, because that approach would tend to under-sample borrowers who are in extended loan sequences. In addition, by entirely omitting borrowers whose loan sequences ended in default, these studies would have skewed the sample in other respects as well. At a minimum, the majority of borrowers who are light users of payday loans are likely to experience such loans very differently from the significant subset of borrowers (who are a minority of all borrowers, though the loans made to them constitute an overall majority of these loans) who find that they end up in extended loan sequences and suffer the various negative consequences of that predicament.

These surveys, which were very similar to each other, were conducted in 2013 and 2016 of storefront payday borrowers who had recently repaid a loan and had not taken another loan within a specified period of time. Of these borrowers, 94 to 96 percent reported that when they took out the loan they understood well or very well ''how long it would take to completely repay the loan'' and a similar percentage reported that they, in fact, were able to repay their loan in the amount of time they expected. These surveys suffer from the challenge of asking people to describe their expectations about borrowing at some time in the past, which may lead to recall problems, as described earlier. In light of the sampling bias discussed above and the challenge inherent in the survey design, the Bureau concludes that these studies do not undermine the evidence above indicating that especially those consumers who engage in long-term re-borrowing through extended loan sequences are generally not able to predict accurately the number of times that they will need to re-borrow.

As discussed in the proposal, several factors may contribute to consumers' lack of understanding of the risk of re-borrowing that will result from loans that prove unaffordable. As explained above in the section on lender practices, there is a mismatch between how these products are marketed and described by industry and how they actually operate in practice. Although lenders present the loans as a temporary bridge option, only a minority of payday loans are repaid without any re-borrowing. These loans often produce lengthy cycles of rollovers or new loans taken out shortly after the prior loans are repaid. Not surprisingly, many borrowers (especially those who end up in extended loan sequences) are not able to tell when they take out the first loan how long their cycles will last and how much they will ultimately pay for the initial disbursement of cash. Even borrowers who believe they will be unable to repay the loan immediately—and therefore expect some amount of re-borrowing—are generally unable to predict accurately how many times they will re-borrow and at what cost, unless they manage to repay the loan fairly quickly. And, as noted above, borrowers who end up re-borrowing many times are especially susceptible to inaccurate predictions.

Moreover, as noted in the proposal, research suggests that financial distress can be one of the factors in borrowers' decision-making. As discussed above, payday and single-payment vehicle title loan borrowers are often in financial distress at the time they take out the loans. Their long-term financial condition is typically very poor. For example, as described above, studies find that both storefront and online payday borrowers have little to no savings and very low credit scores, which is a sign of overall distressed financial condition. They may have credit cards but likely do not have unused credit, are often delinquent on one or more cards, and have often experienced multiple overdrafts and/or NSFs on their checking accounts.[561] They typically have tried and failed to obtain other forms of credit before turning to a payday lender, or they otherwise may perceive that such other options would not be available to them and there is no time to comparison shop when facing an imminent liquidity crisis.

Research has shown that when people are under pressure they tend to focus on the immediate problem they are confronting and discount other considerations, including the longer-term implications of their actions. Researchers sometimes refer to this phenomenon as ''tunneling,'' evoking the tunnel-vision decision-making that people may tend to engage in as they confront such situations. Consumers experiencing a financial crisis, as they often are when they are deciding whether or not to take out these kinds of loans, can be prime examples of this behavior.[562] Even when consumers are not facing a crisis, research shows that they tend to underestimate their near-term expenditures [563] and, when

[559] It should be noted that Professor Mann did not provide his data to the Bureau, either prior to the proposal, or in his comment in response to the proposal. In place of these data, the Bureau is relying on the charts and graphs he provided in his correspondence with and presentation to the Bureau. Amongst other things, these graphs depict the distribution of borrowers' expectations and outcomes, but as they are scatterplots, counting the number of observations in areas of heavy mass (*e.g.,* expecting no rollovers) is difficult. As such the analysis provided here may be somewhat imprecise.

Bull. 1579 (2009);

estimating how much financial ''slack'' they will have in the future, tend to discount even the expenditures they do expect to incur.[564] Finally, regardless of their financial situation, research suggests that consumers may generally have unrealistic expectations about their future earnings, their future expenses, and their ability to save money to repay future obligations. Much research has documented that consumers in many contexts demonstrate optimism bias about future events and their own future performance. Without attempting to specify how frequently these considerations may affect individual borrower behavior, it is enough here to note that they are supported in the academic literature and are consistent with the observed behavior of those who use covered short-term loans.[565]

As discussed in the proposal, each of these behavioral biases is exacerbated when facing a financial crisis, and taken together they can contribute to affecting the decision-making of consumers who are considering taking out a payday loan, a single-payment vehicle title loan, or some other covered short-term loan. The effect of these behavioral biases may cause consumers to fail to make an accurate assessment of the likely duration of indebtedness, and, consequently, the total costs they will pay as a result of taking out the loan. Tunneling also may cause consumers not to focus sufficiently on the future implications of taking out a loan. To the extent consumers do comprehend what will happen when the loan comes due—or when future loans come due in extended loan sequences—underestimation of future expenditures and optimism bias can cause them to misunderstand the likelihood of repeated re-borrowing. These effects could be attributable to their belief that they are more likely to be able to repay the loan without defaulting or re-borrowing than they actually are. And consumers who recognize at origination that they will have difficulty paying back the loan and that they may need to roll the loan over or re-borrow once or twice may still underestimate the likelihood that they will wind up rolling over or re-borrowing multiple times and the increasingly high costs of doing so.

Regardless of the underlying explanation, the empirical evidence indicates that many borrowers who find themselves ending up in extended loan sequences did not expect that outcome—with their predictive abilities diminishing as the loan sequences become more extended. In this regard, it is notable that one survey found that payday and vehicle title borrowers were more likely to underestimate the cost and amount of time in debt than borrowers of other products examined in the survey, including pawn loans, deposit advance products, and installment loans.[566]

The commenters on this discussion in the proposal expressed sharply divergent views. Some industry commenters stated their belief that consumers make rational decisions and many of them do expect to re-borrow when they take out covered short-term loans. Others noted that this argument fails to come to grips with the key problem that the Bureau has focused on in its analysis—known to economists as a ''right tail'' problem—which rests on the fact that a subset constituting a substantial population of payday borrowers are the ones who do not seem to expect but yet experience the most extreme negative outcomes with these loans.

Other industry participants and trade associations criticized the Bureau for not conducting its own surveys of payday and title borrowers, and contended that such surveys would have shown that borrowers are generally well informed about their decisions to obtain such loans. And a large number of comments from individual users of these loans were in accord with these views, presenting their own experiences with such loans as positive and as having benefited their financial situations.

Other industry commenters pointed out what they regarded as a low volume of consumer complaints about this product, which they viewed as inconsistent with the notion that many borrowers are surprised by experiencing unexpected negative outcomes with these loans. Yet it is equally plausible that those borrowers who find themselves in extended loan sequences may be embarrassed and therefore may be less likely to submit complaints about their situation. This is consistent with survey results that show many confirmed borrowers nonetheless deny having taken out a payday loan.[567] Borrowers may also blame themselves for having gotten themselves caught up in a cycle of debt authorized by State law, which may also explain why they would be unlikely to file a complaint with a government agency or a government official.

In addition, the Bureau has noted previously that a relatively high proportion of debt collection complaints it receives are about payday loans—a much higher proportion, for example, than for mortgages or auto loans or student loans.[568] From its consumer complaint data, the Bureau observed that from November 2013 through December 2016 more than 31,000 debt collection complaints cited payday loans as the underlying debt. More than 11 percent of the complaints that the Bureau has handled about debt collection stem directly from payday loans.[569] And in any event, it is not at all clear that the Bureau receives a low number of consumer complaints about payday loans once they are normalized in comparison to other credit products. For example, in 2016, the Bureau received approximately 4,400 complaints in which consumers reported ''payday loan'' as the complaint product and about 26,600 complaints about credit cards.[570] Yet there are only about 12 million payday loan borrowers annually, and approximately 156 million consumers

[565] The foundational works on optimism bias come from the behavioral economics literature on forecasting. *See, e.g.,* Daniel Kahneman & Amos Tversky, ''Intuitive Prediction: Biases and Corrective Procedures,'' 12 TIMS Studies in Mgmt. Science 313 (1979); Roger Buehler et al., ''Exploring the ''Planning Fallacy'': Why People Underestimate their Task Completion Times,'' 67 J. Personality & Soc. Psychol. 366 (1994); Roger Buehler et al., ''Inside the Planning Fallacy: The Causes and Consequences of Optimistic Time Prediction, in Heuristics and Biases: The Psychology of Intuitive Judgment,'' at 250–70 (Thomas Gilovich, Dale Griffin, & Daniel Kahneman eds., 2002). Nonetheless, it is worth noting that many of the same behaviors and outcomes can be derived from other economic models based on the premise that consumers in similar situations behave rationally in light of their circumstances.

have one or more credit cards.[571] Therefore, by way of comparison, for every 10,000 payday loan borrowers, the Bureau received about 3.7 complaints, while for every 10,000 credit cardholders, the Bureau received about 1.7 complaints.

In addition, some faith leaders and faith groups of many denominations from around the country collected and submitted comments, which underscored the point that many borrowers may direct their personal complaints or dissatisfactions with their experiences elsewhere than to government officials. Indeed, some of the faith leaders who commented on the proposal mentioned their intentions or efforts to develop their own safer loan products in response to the crises related to them by such borrowers.

Various commenters, including some academics such as Professor Mann whose views are discussed above, also cited research that they viewed as showing that such borrowers understand the nature of the product, including the fact that they may remain indebted beyond the initial term of the loan, with many able to predict accurately (within two weeks) how long it will take to repay their loan or loans. They cited various studies to make the point that consumers are in a better position to understand and act in their own interests than are policymakers who are more removed from the conditions of their daily lives. Some of these commenters were particularly critical of what they viewed as the erroneous assumptions and, even more broadly, the misguided general approach taken by behavioral economists. They argued that any such approach to policymaking is not well grounded and runs counter to their preferred view that consumer behavior instead is marked by rational expectations and clear insight into decision-making about financial choices.

By contrast, many consumer groups and some researchers took a very different view. They tended to agree with the points presented in the proposal about how behavioral characteristics can undermine decision-making for borrowers of these loans, especially for those in financial distress. In their view, these factors can and often do lead to misjudgments by many consumers of the likelihood that they may find themselves caught up in extended loan sequences and experiencing many of the harmful collateral consequences that were described in the proposal. They suggested that both the research and the personal experiences of many borrowers suggest that this picture of a substantial number of consumers is generally accurate, especially for those consumers who find that they have ended up in extended loan sequences.

As the Bureau had noted in the proposal, the patterns of behavior and outcomes in this market are broadly consistent with a number of cognitive biases that are described and documented in the academic literature on behavioral economics. Yet it is important to note that the Bureau's intervention is motivated by the observed pattern of outcomes in the market, and not by any settled viewpoint on the varying theories about the underlying rationality of the decisions that may lead to them. That is, the Bureau does not and need not take a position here on the types of behavioral motivations that may drive the observed outcomes, for it is the outcomes themselves that are problematic, regardless of how economists may attempt to explain them. In fact, both the rational agent models generally favored by industry comments and the more behavioral models favored by consumer groups and some researchers could very well lead to these same observed outcomes.

The Bureau has weighed these conflicting comments and concludes that the discussion of these issues in the proposal remains generally accurate and is supported by considerable research and data on how payday and title loans operate in actual practice and how these loans are experienced by consumers. The data do seem to indicate that a significant group of consumers do not accurately predict the duration of their borrowing. This is particularly true, notably, for the subset of consumers who do in fact end up in extended loan sequences. These findings, and not any definitive judgment about the validity of behavioral economics or other theories of consumer behavior, provide the foundation on which this rule is based. Finally, though certain commenters have expressed concern that the Bureau had not heard sufficiently from individual users of these loans, the Bureau has now received and reviewed a high volume of individual comments that were submitted as part of this rulemaking process.

e. Delinquency and Default

The proposal also addressed the specific topics of delinquency and default on payday and single-payment vehicle title loans. In addition to the various harms caused by unanticipated loan sequences, the Bureau was concerned that many borrowers suffer other harms from unaffordable loans in the form of the collateral costs that come from being delinquent or defaulting on the loans. Many borrowers, when faced with unaffordable payments, will be late in making loan payments, and may ultimately cease making payments altogether and default on their loans.[572] They may take out multiple loans before defaulting, either because they are simply delaying the inevitable or because their financial situation deteriorates over time to the point where they become delinquent and eventually default rather than continuing to pay additional re-borrowing fees. For example, the evidence from the CFPB Report on Supplemental Findings shows that approximately two-thirds of payday loan sequences ending in default are multi-loan sequences in which the borrower has rolled over or re-borrowed at least once before defaulting. And nearly half of the consumers who experienced either a default or a 30-day delinquency already had monthly fees exceeding $60 before their first default or 30-day delinquency occurred.

While the Bureau noted in the proposal that it is not aware of any data directly measuring the number of late payments across the industry, studies of what happens when payments are so late that the lenders deposit the consumers' original post-dated checks

[571] Bureau staff estimate based on finding that 63 percent of American adults hold an open credit card and Census population estimates. Bureau of Consumer Fin. Prot., ''The Consumer Credit Card Market Report,'' at 36 (Dec. 2015), *available at http://files.consumerfinance.gov/f/201512_cfpb_report-the-consumer-credit-card-market.pdf*; U.S. Census Bureau, ''Annual Estimates of Resident Population for Selected Age Groups by Sex for the United States, States, Counties, and Puerto Rico Commonwealth and Municipios: April 1, 2010 to July 1, 2016,'' (June 2017), *available at https://factfinder.census.gov/bkmk/table/1.0/en/PEP/2016/PEPAGESEX.* Other estimates of the number of credit card holders have been higher, meaning that 1.7 complaints per 10,000 credit card holders would be a high estimate. The U.S. Census Bureau estimated there were 160 million credit card holders in 2012, and researchers at the Federal Reserve Bank of Boston estimated that 72.1 percent of U.S. consumers held at least one credit card in 2014. U.S. Census Bureau, ''Statistical Abstract of the United States: 2012,'' at 740 tbl.1188 (Aug. 2011), *available at https://www.census.gov/library/publications/2011/compendia/statab/131ed.html*; Claire Greene et al., ''The 2014 Survey of Consumer Payment Choice: Summary Results,'' at 18 (Fed. Reserve Bank of Boston, No. 16–3, 2016), *available at https://www.bostonfed.org/-/media/Documents/researchdatareport/pdf/rdr1603.pdf*. And as noted above in the text, additional complaints related to both payday loans and credit cards are submitted as debt collection complaints with ''payday loan'' or ''credit card'' listed as the type of debt.

[572] This discussion uses the term ''default'' to refer to borrowers who do not repay their loans. Precise definitions will vary across analyses, depending on specific circumstances and data availability.

suggest that late payment rates are relatively high. For example, one study of payday borrowers in Texas found that in 10 percent of all loans, the post-dated checks were deposited and bounced.[573] Looking at the borrower level, the study found that half of all borrowers had a check that was deposited and bounced over the course of the year following their first payday loan.[574] An analysis of data collected in North Dakota showed a lower, but still high, rate of lenders depositing checks that later bounced or trying to collect loan payment via an ACH payment request that failed. It showed that 39 percent of new borrowers experienced a failed loan payment of this type within a year after their first payday loan, and 44 percent did so within the first two years after their first payday loan.[575] In a public filing, one large storefront payday lender reported a lower rate (6.5 percent) of depositing checks, of which nearly two-thirds were returned for insufficient funds.[576] In the Bureau's analysis of ACH payments initiated by online payday and payday installment lenders, half of online borrowers had at least one overdraft or NSF transaction related to their loans over 18 months. These borrowers' depository accounts incurred an average total of $185 in fees.[577]

As the Bureau noted in the proposal, bounced checks and failed ACH payments can be quite costly for borrowers. The median bank fee for an NSF transaction is $34.00, which is equivalent to the cost of a rollover on a $300 storefront loan.[578] If the lender makes repeated attempts to collect using these methods, this leads to repeated fees being incurred by the borrower. The Bureau's research indicates that when one attempt fails, online payday lenders make a second attempt to collect 75 percent of the time but are unsuccessful in 70 percent of those cases. The failure rate increases with each subsequent attempt.[579]

In addition to incurring NSF fees from a bank, in many cases when a check bounces the consumer can be charged a returned check fee by the lender. This means the borrower would be incurring duplicative and additional fees for the same failed transaction. In this connection, it should be noted that lender-imposed late fees are subject to certain restrictions in some but not all States.[580]

The proposal also noted that default can also be quite costly for borrowers. These costs vary with the type of loan and the channel through which the borrower took out the loan. As discussed above, default may come after a lender has already made repeated and expensive attempts to collect from the borrower's deposit account, such that a borrower may ultimately find it necessary to close the account. In other instances, the borrower's bank or credit union may close the account if the balance is driven negative and the borrower is unable for an extended period of time to return the balance to positive. And borrowers of single-payment vehicle title loans stand to suffer even greater harms from default, as it may lead to the repossession of their vehicle. In addition to the direct costs of the loss of an asset, the deprivation of their vehicle can seriously disrupt people's lives and put at risk their ability to remain employed or to manage their ordinary affairs as a practical matter. Yet another consequence of these setbacks could be personal bankruptcy in some cases.

Default rates on individual payday loans appear at first glance to be fairly low. This figure is three percent in the data the Bureau has analyzed, and the commenters are in accord about this figure.[581] But because so many borrowers respond to the unaffordability of these loans by re-borrowing in sequences of loans rather than by defaulting immediately, a more meaningful measure of default is the share of loan sequences that end in default. The Bureau's data show that, using a 30-day definition of a loan sequence, fully 20 percent of loan sequences end in default. A recent report based on a multi-lender dataset showed similar results, with a three percent loan-level default rate and a 16 percent sequence-level default rate.[582]

Other researchers have found similarly high levels of default. One study of Texas borrowers found that 4.7 percent of loans were charged off, while 30 percent of borrowers had a loan charged off in their first year of borrowing.[583] Default rates on single-payment vehicle title loans are higher than those on storefront payday loans; in addition, initial single-payment vehicle title loans are more likely than storefront payday loans to result in a default. In the data analyzed by the Bureau, the default rate on all title loans is six percent, and the sequence-level default rate is 33 percent.[584] Over half of all defaults occur in single-payment vehicle title loan sequences that consist of three or fewer loans. Nine percent of single-payment vehicle title loan sequences consist of single loans that end in default, compared to six percent of payday loan sequences.[585] The Bureau's research suggests that title lenders repossess a vehicle slightly more than half the time when a borrower defaults on a loan. In the data the Bureau has analyzed, three percent of all single-payment vehicle title loans lead to repossession, which represents approximately 50 percent of loans on which the borrower defaulted. At the sequence level, 20 percent of sequences end up with the borrower's vehicle

[580] Most States limit returned item fees on payday loans to a single fee of $15–$40; $25 is the most common returned-item fee limit. Most States do not permit lenders to charge a late fee on a payday loan, although Delaware permits a late fee of five percent and several States' laws are silent on the question of late fees.

[581] Default here is defined as a loan not being repaid as of the end of the period covered by the data or 30 days after the maturity date of the loan, whichever was later. The default rate was slightly higher [four percent] for new loans that are not part of an existing loan sequence, which could reflect an intention by some borrowers to take out a loan and not repay, or the mechanical fact that borrowers with a high probability of defaulting for some other reason are less likely to have a long sequence of loans.

[582] nonprime101, ''Report 3: Measure of Reduced Form Relationship between the Payment-Income Ratio and the Default Probability,'' at 6 (2015), *available at https://www.nonprime101.com/wp-content/uploads/2015/02/Clarity-Services-Measure-of-Reduced-Form-Relationship-Final-21715rev.pdf*. This analysis defines sequences based on the pay frequency of the borrower, so some loans that would be considered part of the same sequence using a 30-day definition are not considered part of the same sequence in this analysis.

being repossessed. In other words, one in five borrowers is unable to escape their debt on these loans without losing their car or truck.

Some industry and trade association commenters posited that the Bureau had overstated the default and repossession rates on vehicle title loans. Companies argued that the Bureau had erroneously stated a higher repossession rate than their own data showed, with one commenter estimating its own short-term title loan sequence repossession rate at 8.4 percent. Others contended that the Bureau's repossession rates were much higher than those reported through other sources, such as regulator reports in States like Idaho and Texas. In arguing that the Bureau had overstated the default and repossession rates, one trade group also cited a study which had concluded that the rates were lower. The study relied on a handful of State regulator reports in addition to ''industry sources.'' Yet the difference seems to trace to the fact that default and repossession rates are typically reported at the loan level rather than the sequence level. The Bureau's loan-level data is actually fairly similar to the figures cited by these commenters. But the Bureau believes that sequence level is a more appropriate indicator, since it captures experience at the level of the borrower. Put differently, sequence level more appropriately indicates outcomes for particular consumers, rather than for particular lenders; from this standpoint, a loan that is rolled over three times before defaulting should not be miscounted as three ''successfully'' repaid loans and one default. As noted previously, over 80 percent of single-payment vehicle title loans were re-borrowed on the same day as a previous loan was repaid. Regardless, to the extent any one company has lower repossession rates than the average, that fact does not put in question the averages that the Bureau used, because inevitably there will be companies that are both above and below the average. The Bureau also notes that the study discussed above cited by a trade group, which relies on undefined ''industry sources'' and a handful of State regulator reports to criticize the Bureau's data on default and repossession rates, relied on far less robust loan level data than the Bureau used to arrive at the figures it cited in the Bureau's supplemental research report and in the proposal.

One commenter noted that because the vehicles put up for collateral on these loans are usually old and heavily used, lenders often do not repossess the vehicle because it is not worth the trouble. This commenter also argued that the impact of repossession is not significant, based on a study indicating that less than 15 percent of consumers whose vehicles are repossessed would not find alternative means of transportation, which again is at odds with the information presented in other studies that have been cited.[586] Another commenter asserted that the stress created by the threat of vehicle repossession is no worse than other stresses felt by consumers in financial difficulties, though it is difficult to know how much to credit this claim.

The proposal further noted that borrowers of all types of covered loans are also likely to be subject to collection efforts, which can take aggressive forms. From its consumer complaint data, the Bureau observed that from November 2013 through December 2016 more than 31,000 debt collection complaints cited payday loans as the underlying debt. More than 11 percent of the complaints that the Bureau has handled about debt collection stem directly from payday loans.[587] These collections efforts can include harmful and harassing conduct, such as repeated phone calls from collectors to the borrower's home or place of work, the harassment of family and friends, and in-person visits to consumers' homes and worksites. Some of this conduct, depending on the facts and circumstances, may be illegal. Aggressive calling to the borrower's workplace can put at risk the borrower's employment and jeopardize future earnings. Many of these practices can cause psychological distress and anxiety for borrowers who are already under the strain of financial pressure.

In fact, the Bureau's enforcement and supervisory examination processes have uncovered evidence of numerous illegal collection practices by payday lenders, including practices of the kinds just described. These have included: Illegal third-party calls, illegal home visits for collection purposes, false threats to add new fees, false threats of legal action or referral to a non-existent in-house ''collections department,'' and deceptive messages regarding non-existent ''special promotions'' to induce borrowers to return calls.[588]

In addition, lenders and trade associations contended that the Bureau had overstated the extent of harm, noting that they do not typically report nonpayment of these kinds of loans to consumer reporting agencies, which can interfere with the consumer's access to credit, and that this lack of reporting would obviate any harm that the borrower would suffer on that front. Nonetheless, debt collectors can and do report unpaid debts to the consumer reporting companies even when the original creditors do not, and the aggressive collection tactics that the Bureau has identified with respect to unpaid payday loans through its investigations and numerous enforcement actions suggest that this may be a common collateral consequence of default on these loans as well.[589]

The potential consequences of the loss of a vehicle depend on the transportation needs of the borrower's household and the available transportation alternatives. According to two surveys of title loan borrowers, 15 percent of all borrowers report that they would have no way to get to work or school if they lost their vehicle to repossession.[590] Using an 8 percent repossession rate, one industry commenter asserted that only about one percent of title loan borrowers would thus lose critical transportation, by multiplying 15 percent times 8 percent. However, the survey author specifically warns against doing this, noting that ''a borrower whose car is repossessed probably has lower wealth and income than a borrower whose car is not repossessed, and is therefore probably more likely to lack another way of getting to work.'' [591] More than one-third (35 percent) of borrowers pledge the title to the only working vehicle in the household.[592] Even those with a
