\*As defined in Section 47(6) of the Arms Export Control Act.

### POLICY JUSTIFICATION

# Government of Kuwait—Fast Patrol Boats

The Government of Kuwait has requested to purchase fifteen (15) fast patrol boats outfitted with thirty-six (36) .50 caliber machine guns (thirty (30) installed, two (2) per boat and six (6) spares). This request also includes support equipment, personnel training and training equipment, U.S. Government and contractor engineering, technical and logistics support services, and other related elements of logistical and program support. The estimated total case value is \$100 million.

This proposed sale will contribute to the foreign and national security of the United States by improving the security of a friendly country. Kuwait plays a key role in U.S. efforts to advance stability in the Middle East, providing basing, access, and transit of U.S. forces in the region.

Kuwait intends to use the boats for patrol, interdiction, and maritime protection. These boats will help Kuwait develop and maintain a strong and ready self-defense capability. Kuwait will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Kvichak (a Vigor Company), Kent, Washington. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require multiple trips by U.S. Government and contractor representatives to participate in program and technical reviews plus training and maintenance support in country, on a temporary basis, for a period of twentyfour (24) months. It will also require three (3) contractor representatives to reside in country for a period of two (2) years to support this program.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17–56

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

## Annex

#### Item No. vii

(vii) Sensitivity of Technology:1. The following components and technical documentation for the program are classified as listed below:

a. The Browning M2 .50 caliber machine gun is an automatic, recoil operated, air-cooled machine gun which has been modified for shipboard use. Its classification level is UNCLASSIFIED.

b. The Fast Patrol Boat is a 13.6 meter (45-foot) utility boat used by the United States Coast Guard as a Response Boat Medium (RB–M). The boats are built by Kvichak Marine Industries of Kent, Washington and Marinette Marine

Corporation of Marinette, Wisconsin. While primarily designed as a Search and Rescue (SAR) asset the RB-M is also used to perform Recreational Boating Safety (RBS), Marine Environmental Protection (MEP), **Enforcement of Laws and Treaties** (ELT), Ports, Waterways, and Coastal Security (PWCS) and Defense Operations (DO), including those traditional missions associated with Border Protection. The RB-M is powered by two MTU Detroit Diesel turbocharged Series 60 engines (825 hp) and two Rolls-Royce FF-Series waterjets with a top speed of 42.5 knots and a range of 250nm. The RB-Ms classification level is UNCLASSIFIED.

2. All defense articles and services listed in this transmittal are authorized for release and export to the Government of the Kuwait. [FR Doc. 2018–04784 Filed 3–8–18; 8:45 am] BILLING CODE 5001–06–P

# POLICY JUSTIFICATION

Finland—Mk 41 Vertical Launching Systems

The Government of Finland has requested a possible sale of four (4) Mk 41 Baseline VII Strike-Length Vertical Launching Systems. Also included are spares, handling equipment, test equipment, operator manuals and technical documentation, U.S. Government and contractor engineering, training, technical, and logistical support services, and other related elements of logistical support. The estimated total case value is \$70 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a partner nation that has been, and continues to be, an important force for political stability and economic progress in Europe.

Finland intends to use the vertical launching systems on four new construction corvettes that will make up the Finnish Navy's Squadron 2020. The vertical launching systems will enable Finland to acquire missiles that will significantly enhance the Finnish Navy's area defense capabilities over critical air-and-sea-lines of trade and communication. The proposed sale of the Mk 41 will increase the Finnish Navy's maritime partnership, interoperability, and regional security capability. Finland has not purchased the Mk 41 previously, but will have no difficulty incorporating this capability into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Corporation, Bethesda, MD. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require up to 12 U.S. Government personnel and up to five contractor representatives to travel to Finland providing support over a period of ten years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

### Transmittal No. 17–75

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

### Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The Mk 41 Vertical Launching System (VLS) is a fixed, vertical, multimissile launching system with the capability to store and launch multiple missile variants depending on the warfighting mission, including the Evolved Sea Sparrow Missile (ESSM) and Standard Missile 2 (SM-2). This proposed sale would provide tactical VLS capability for the ESSM. Mk 41 VLS is a modular below-deck configuration with each module consisting of 8 missile cells with an associated gas management and deluge system. The highest classification of the hardware in the proposed sale is UNCLASSIFIED. The highest classification of the technical

documentation in the proposed sale is UNCLASSIFIED. The highest classification of the software to be exported is CONFIDENTIAL.

2. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Finland can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

4. All defense articles and services listed on this transmittal are authorized for release and export to the Government of Finland.
