SUPPLEMENTARY INFORMATION:

Communities participating in the National Flood Insurance Program (NFIP) are required to adopt a floodplain management ordinance that meets or exceeds the minimum floodplain management requirements of the NFIP. In accordance with FEMA's minimum floodplain management criteria, communities must require that all new construction and substantial improvement of residential structures and non-residential structures have the lowest floor (including basement) elevated to above the base flood elevation, unless, for residential structures, the community is granted an exception by FEMA for the allowance of basements under 44 CFR 60.6(b) or (c). 44 CFR 60.3(c)(2) and (3)(i). New construction and substantial improvement of non-residential structures, together with attendant utility and sanitary facilities, can also be designed and floodproofed so that below the base flood level, the structure is watertight with walls substantially impermeable to the passage of water and with structural components having the capability to resist hydrostatic and hydrodynamic loads and effects of buoyancy. 44 CFR 60.3(c)(3)(ii). Use of the Elevation Certificate and Floodproofing Certificate is one convenient way for a community to document building compliance. Title 44 CFR 61.7 and 61.8 require proper investigation to estimate the risk premium rates necessary to provide flood insurance.
