[EPA-HQ-SFUND-1989-0011; FRL-9975-74-Region 9]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the Pacific Coast Pipe Lines Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) Region 9 announces the deletion of the surface soil portion of the Pacific Coast Pipe Lines (PCPL) Superfund Site (Site) located in Fillmore, California, from the National Priorities List (NPL). The NPL, promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This partial deletion pertains only to the surface soil at the Site. The groundwater will remain on the NPL and is not being considered for deletion as part of this action. EPA and the State of California, through the Department of Toxic Substances Control, have determined that all appropriate response actions under CERCLA, other than maintenance, monitoring and five-year reviews, have

been completed. However, the deletion of the soil portion of the Site does not preclude future actions under Superfund.

DATES: This action is effective March 22, 2018.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA-HQ-SFUND-1989-0011. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information and other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through <http://www.regulations.gov> or in hard copy at the site information repositories. Locations, contacts, phone numbers and viewing hours are:

Superfund Records Center, 75 Hawthorne Street, Room 3110, San Francisco, California, Hours: 8:00 a.m.-4:00 p.m.; (415) 947-8717.

Site Repository: Fillmore Library, 502 2nd Street, Fillmore, California. Call (805) 524-3355 for hours of operation.

FOR FURTHER INFORMATION CONTACT: Holly Hadlock, Remedial Project Manager, U.S. EPA, Region 9 (SFD-7-3), 75 Hawthorne Street, San Francisco, CA 94105, (415) 972-3171, email: hadlock.holly@epa.gov.

SUPPLEMENTARY INFORMATION: The portion of the Site to be deleted from the NPL is the surface soils at the Pacific Coast Pipe Lines Superfund Site,

Fillmore, California. A Notice of Intent for Partial Deletion for this Site was published in the **Federal Register** (82 FR 60943-60946) on December 26, 2017. The closing date for comments on the Notice of Intent for Partial Deletion was January 25, 2018.

Eight public comments were received: Five supported EPA's decision to delete the surface soil from the NPL, two opposed, and one was not related to the proposed partial deletion. The commenters who opposed the action want the soil portion of the Site to remain on the NPL. EPA believes the partial deletion action is appropriate because the NPL deletion criterion established by the NCP has been met; the responsible party, Texaco, Inc., has implemented all appropriate response actions for surface soil set forth in the 2011 ROD Amendment, which selected the remedy for contaminated soils at the Site. Based on available data, EPA has determined that no further response action for soil at the Site is necessary. EPA will conduct five-year reviews to determine if the cleanup remains protective of human health and the environment. A responsiveness summary was prepared and placed in both the docket, EPA-HQ-SFUND-1989-0011, on www.regulations.gov, and in the local repositories listed above.

EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Deletion of a site from the NPL does not preclude further remedial action at the site. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system. Deletion

of portions of a site from the NPL does not affect responsible party liability, in the unlikely event that future conditions warrant further actions.

RIN 0648–XF987

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Adjustment of Southern New England/Mid-Atlantic Yellowtail Flounder Catch Limits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment of annual catch limits.

SUMMARY: This action transfers unused quota of Southern New England/Mid-Atlantic yellowtail flounder from the Atlantic sea scallop fishery to the Northeast multispecies fishery for the remainder of the 2017 fishing year. This

transfer implements an inseason adjustment of annual catch limits authorized by regulations implementing the Northeast Multispecies Fishery Management Plan (FMP) that apply when the scallop fishery is not expected to catch its entire allocation of yellowtail flounder. The transfer is intended to achieve optimum yield for both fisheries while ensuring the total annual catch limit is not exceeded.

DATES: Effective March 21, 2018, through April 30, 2018.

FOR FURTHER INFORMATION CONTACT: Claire Fitz-Gerald, Fishery Management Specialist, (978) 281–9255.

SUPPLEMENTARY INFORMATION: NMFS is required to estimate the total amount of yellowtail flounder bycatch in the scallop fishery by January 15 each year. NMFS must determine if the scallop fishery is expected to catch less than 90 percent of its Georges Bank (GB) or Southern New England/Mid-Atlantic (SNE/MA) yellowtail flounder sub-annual catch limit (sub-ACL) (50 CFR 648.90(a)(4)(iii)(C)). If so, the Regional Administrator (RA) may reduce the scallop fishery sub-ACL for these stocks to the amount projected to be caught, and increase the groundfish fishery sub-ACL for these stocks up to the same

amount. This adjustment is intended to help achieve optimum yield for both fisheries while ensuring the total ACLs are not exceeded.

Based on the most recent catch information available, we project that the scallop fishery will have unused quota in the 2017 fishing year for the SNE/MA yellowtail flounder stock. Because the scallop fishery is not expected to catch its entire allocation of SNE/MA yellowtail flounder, this rule reduces the scallop sub-ACL for this stock to the upper limit projected to be caught, and increases the groundfish sub-ACL for this stock by the same amount, effective March 21, 2018, through April 30, 2018. This transfer is based on the upper limit of expected SNE/MA yellowtail flounder catch by the scallop fishery, which is expected to minimize any risk of an ACL overage by the scallop fishery while still providing additional fishing opportunities for groundfish vessels.

Table 1 summarizes the revisions to the 2017 fishing year sub-ACLs, and Table 2 shows the revised allocations for the groundfish fishery as allocated between the sectors and common pool based on final sector membership for fishing year 2017.

Stock	Fishery	Initial sub-ACL (mt)	Change (mt)	Revised sub-ACL (mt)	Percent change
SNE/MA Yellowtail Flounder	Groundfish	187.5	+29.9	217.4	+16
