

business applicants for the Business Loan Programs. *See*, 13 CFR 123.300(b). Although the temporary statutory alternative size standard established by the Jobs Act does not apply to the EIDL Program, SBA is considering applying the new permanent alternative size standard established for the Business Loan Programs to the EIDL Program as an alternative to industry based size standards.

Request for Comments

Against the above backdrop, in this ANPRM, SBA seeks comment on the following issues.

1. SBA seeks comment on whether or not the level of the temporary statutory alternative size standard under the Interim Rule (*i.e.*, \$15 million in tangible net worth and \$5 million in average net income) is appropriate under the current credit environment and as a new permanent alternative size standard. Commenters in support of the level in the Interim Rule should provide justification, along with supporting data and analysis to support their position. Similarly, commenters who believe the level established in the Interim Rule is not appropriate as a permanent alternative size standard should suggest, along with supporting data and analysis, a different alternative size standard which they believe would be more appropriate. The suggested alternative size standard must be based on tangible net worth and average net income as required by section 3(a)(5) of the Small Business Act, 15 U.S.C. 632(a)(5).

2. SBA seeks comment on the impact of using an alternative size standard on small businesses seeking loans through its Business Loan Programs. Specifically, SBA welcomes information on industries/sectors where small businesses benefit the most or do not benefit at all from the use of an alternative size standard. Similarly, SBA is also looking for data on the number of businesses approved for SBA's Business Loans under the temporary statutory alternative size standard that otherwise could not have been approved under their industry based size standards.

3. SBA invites suggestions on sources of relevant data and information, especially tangible net worth and average net income of applicants to SBA's Business Loan Programs, that SBA can evaluate to assess the impact of the Interim Rule on small businesses and use in developing a new permanent alternative size standard and in estimating the impact of the new permanent alternative size standard.

4. SBA invites comments from interested parties on the proposal to

apply the same new permanent alternative size standard established for the Business Loan Programs to the EIDL Program as an alternative to industry based size standards.

5. SBA also seeks comment on how the Interim Rule has affected the processes used by lenders participating in the Business Loan Programs and what effects a permanent alternative size standard would have on application processes and processing times.

6. SBA invites comment on the effects of the Interim Rule on conventional small business lending. Specifically, SBA welcomes input on whether, and to what extent, if any, SBA Business Loans approved under the Interim Rule have substituted for or displaced directly or indirectly conventional small business lending, or whether such SBA Business Loans played more of a supplementary role in conventional small business lending activity.

Dated: March 14, 2018.

Linda E. McMahon,
Administrator.

BILLING CODE 8025-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2018-0166; Product Identifier 2017-NM-169-AD]

RIN 2120-AA64

Airworthiness Directives; ATR-GIE Avions de Transport Régional Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all ATR-GIE Avions de Transport Régional Model ATR72 airplanes. This proposed AD was prompted by a determination that more restrictive maintenance instructions and airworthiness limitations are necessary. This proposed AD would require revising the maintenance or inspection program, as applicable, to incorporate new or revised maintenance instructions and airworthiness limitations. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by May 7, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR

11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact ATR-GIE Avions de Transport Régional, 1, Allée Pierre Nadot, 31712 Blagnac Cedex, France; telephone +33 (0) 5 62 21 62 21; fax +33 (0) 5 62 21 67 18; email continued.airworthiness@atr-aircraft.com. You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

Examining the AD Docket

You may examine the AD docket on the internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2018-0166; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone and fax 206-231-3220.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2018-0166; Product Identifier 2017-NM-169-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. We will consider all comments received by the closing date and may amend this NPRM based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this NPRM.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2017-0223R1, dated December 15, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all ATR-GIE Avions de Transport Régional Model ATR72 airplanes. The MCAI states:

The airworthiness limitations and certification maintenance requirements (CMR) for ATR aeroplanes, which are approved by EASA, are currently defined and published in the ATR72-101/-201/-102/-202/-211/-212/-212A Time Limits (TL) document. These instructions have been identified as mandatory actions for continued airworthiness.

Failure to accomplish these instructions could result in an unsafe condition.

Consequently, ATR published Revision 15 of the ATR72-101/-201/-102/-202/-211/-212/-212A TL document, which contains new and/or more restrictive CMRs and airworthiness limitation tasks.

For the reasons described above, this [EASA] AD requires accomplishment of the actions specified in the ATR72-101/-201/-102/-202/-211/-212/-212A TL document Revision 15, hereafter referred to as ‘the TLD’ in this [EASA] AD.

This [EASA] AD, in conjunction with two other [EASA] ADs related to ATR42-200/-300/-320 (EASA AD 2017-0221) and ATR42-400/-500 (EASA AD 2017-0222) aeroplanes, retains the requirements of EASA AD 2009-0241 and EASA AD 2012-0193. Once all these three ADs are effective, EASA will cancel EASA AD 2009-0242 and EASA AD 2012-0193.

This [EASA] AD is revised to provide the correct issue date (02 May 2017) of the TLD.

The original [EASA] AD inadvertently referenced the EASA approval date for that document.

This NPRM would require revising the maintenance or inspection program to incorporate certain maintenance instructions and airworthiness limitations. The unsafe condition is fatigue cracking, damage, and corrosion in principal structural elements, which could result in reduced structural integrity of the airplane. You may examine the MCAI in the AD docket on the internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2018-0166.

Related Service Information Under 1 CFR Part 51

ATR-GIE Avions de Transport Régional has issued the ATR72 Time Limits document, Revision 15, dated May 2, 2017. The service information describes preventive maintenance requirements and includes updated limitations, tasks, thresholds and intervals to be incorporated into the maintenance or inspection program. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

FAA’s Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or

develop on other products of the same type design.

This AD requires revisions to certain operator maintenance documents to include new actions (e.g., inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (k)(1) of this proposed AD. The request should include a description of changes to the required actions that will ensure the continued damage tolerance of the affected structure.

Similar to the MCAI, this proposed AD would not supersede AD 2000-23-26, Amendment 39-11999 (65 FR 70775, November 28, 2000) (“AD 2000-23-26”), or AD 2008-04-19 R1, Amendment 39-16069 (74 FR 56713, November 3, 2009) (“AD 2008-04-19 R1”). Rather, we have determined that a stand-alone AD would be more appropriate to address the changes in the MCAI. This proposed AD would require revising the maintenance or inspection program, as applicable, to incorporate maintenance requirements and/or airworthiness limitations that are new or more restrictive than those required by AD 2000-23-26 and AD 2008-04-19 R1. Accomplishment of the proposed actions would then terminate all the requirements of AD 2000-23-26 and AD 2008-04-19 R1.

Costs of Compliance

We estimate that this proposed AD affects 26 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost ¹	Parts cost	Cost per product	Cost on U.S. operators
Maintenance or inspection program revision	90 work-hours × \$85 per hour = \$7,650	None	\$7,650	\$198,900

¹ In the past, we have used 1 work-hour for revisions of the maintenance or inspection program. We have determined that incorporating the entire airworthiness limitation document specified in this proposed AD would take significantly longer than 1 work-hour.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more

detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations

for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes to the Director of the System Oversight Division.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

ATR—GIE Avions de Transport Régional:
Docket No. FAA–2018–0166; Product Identifier 2017–NM–169–AD.

(a) Comments Due Date

We must receive comments by May 7, 2018.

(b) Affected ADs

This AD affects AD 2000–23–26, Amendment 39–11999 (65 FR 70775) (“AD 2000–23–26”), and AD 2008–04–19 R1, Amendment 39–16069 (74 FR 56713) (“AD 2008–04–19 R1”).

(c) Applicability

This AD applies to ATR—GIE Avions de Transport Régional Model ATR72–101, –201, –102, –202, –211, –212, and –212A airplanes, certificated in any category; with an original certificate of airworthiness or original export certificate of airworthiness issued on or before September 29, 2017.

(d) Subject

Air Transport Association (ATA) of America Code 05.

(e) Reason

This AD was prompted by a determination that more restrictive maintenance instructions and airworthiness limitations are necessary. We are issuing this AD to prevent fatigue cracking, damage, and corrosion in principal structural elements, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revision of Maintenance or Inspection Program

Within 3 months after the effective date of this AD: Revise the maintenance or inspection program, as applicable, to incorporate the limitations and tasks at the applicable thresholds and intervals specified in the Airworthiness Limitations Section (ALS), of the ATR72 Time Limits document, Revision 15, dated May 2, 2017. The initial compliance time for accomplishing the tasks specified in the ALS of the ATR72 Time Limits document, Revision 15, dated May 2, 2017, is at the applicable time specified in the ALS, or within 3 months after the effective date of this AD, whichever occurs later, except for the tasks identified in paragraph (h) of this AD.

(h) Initial Compliance Times for Certain Tasks

For accomplishing certification maintenance requirement (CMR) tasks identified in table 1 and table 2 to paragraph (h) of this AD, the initial compliance time is at the applicable time specified in the ALS of the ATR72 Time Limits document, Revision 15, dated May 2, 2017, or at the applicable compliance time in table 1 or table 2 to paragraph (h) of this AD, whichever occurs later.

Table 1 to paragraph (h) of this AD – Grace period for structurally significant item (SSI) task

Airworthiness Limitation (AWL) Task	Compliance Time
572401-1	Within 5,000 flight hours after the most recent inspection done as specified in Maintenance Review Board Report (MRBR) tasks ZL-520-01-1 and ZL-620-01-1

Table 2 to paragraph (h) of this AD – Grace period for CMR/maintenance significant item (MSI) tasks

CMR/MSI Tasks	Compliance Time
213100-1	Within 550 flight hours or 3 months after the effective date of this AD, whichever occurs first
213100-2	
213100-3	

(i) No Alternative Actions, and Intervals

After the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections), or intervals, may be used unless the actions and/or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (k)(1) of this AD.

(j) Terminating Action

Accomplishing paragraph (g) of this AD terminates all requirements of AD 2000–23–26 and AD 2008–04–19 R1.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Branch, send it to the attention of the person identified in paragraph (l)(2) of this AD. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Section, Transport Standards Branch, FAA; or the European Aviation Safety Agency (EASA); or EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2017–0223R1, dated December 15, 2017, for related information. This MCAI may be found in the AD docket on the internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2018–0166.

(2) For more information about this AD, contact Shahram Daneshmandi, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th

Street, Des Moines, WA 98198; telephone and fax 206–231–3220.

(3) For service information identified in this AD, contact ATR—GIE Avions de Transport Régional, 1, Allée Pierre Nadot, 31712 Blagnac Cedex, France; telephone +33 (0) 5 62 21 62 21; fax +33 (0) 5 62 21 67 18; email continued.airworthiness@atr-aircraft.com. You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued in Des Moines, Washington, on March 7, 2018.

Michael Kaszycki,

Acting Director, System Oversight Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2017–1188; Airspace Docket No. 17–AEA–23]

Proposed Amendment of Class D Airspace and Class E Airspace; Wrightstown, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class D airspace, Class E airspace designated as an extension to a Class D surface area, and Class E airspace extending upward from 700 feet above the surface in Wrightstown, NJ, by updating the name of McGuire Field (Joint Base McGuire-Dix-Lakehurst). This action also proposes to amend Class E airspace extending upward from 700 feet above the surface in Wrightstown, NJ, by updating the name and geographic coordinates of Ocean County Airport. Also, an editorial change would be made where necessary removing the city from the airport name in the airspace designation. Controlled

airspace is necessary for the safety and management of instrument flight rules (IFR) operations at the airport. This action also would update the geographic coordinates of Lakehurst (Navy) TACAN and Colts Neck VOR/DME.

DATES: Comments must be received on or before May 7, 2018.

ADDRESSES: Send comments on this proposal to: U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; Telephone: (800) 647–5527, or (202) 366–9826. You must identify the Docket No. FAA–2017–1188; Airspace Docket No. 17–AEA–23, at the beginning of your comments. You may also submit comments through the internet at <http://www.regulations.gov>.

FAA Order 7400.11B, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone; (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11B at NARA, call (202) 741–6030, or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Ave., College Park, GA 30337; telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code.
