DEPARTMENT OF ENERGY
[OE Docket No. EA–336–B]

Application To Export Electric Energy; ConocoPhillips Company

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of application.

SUMMARY: ConocoPhillips Company (COP or Applicant) has applied to renew its authority to transmit electric energy from the United States to Mexico pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before April 23, 2018.

ADDRESSES: Comments, protests, or motions to intervene should be sent to the Office of Electricity Delivery and Energy Reliability, Mail Code: OE–20, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585–0350. An additional copy is to be provided directly to both Casey P. McFaden and Robert F. Bonner, ConocoPhillips Company, 600 North Dairy Ashford, Houston, TX 77079.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authority under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On April 16, 2013, DOE issued Order No. EA–336–A to COP which authorized the Applicant to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. That authority expires on April 16, 2018. On February 13, 2018, COP filed an application with DOE for renewal of the export authority contained in Order No. EA–336–A for an additional five-year term.

In its application, COP states that it does not own or operate any electric generation or transmission facilities. The electric energy that COP proposes to export to Mexico would be purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by COP have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Comments should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission’s (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning COP’s application to export electric energy to Mexico should be clearly marked with OE Docket No. EA–336–B. An additional copy is to be provided directly to both Casey P. McFaden and Robert F. Bonner, ConocoPhillips Company, 600 North Dairy Ashford, Houston, TX 77079.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE’s National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at http://energy.gov/node/11845, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Issued in Washington, DC, on March 15, 2018.

[Docket No. CP17–463–000]

Florida Southeast Connection, LLC; Notice of Availability of the Environmental Assessment for the Proposed Okeechobee Lateral Pipeline Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Okeechobee Lateral Pipeline Project (Project), proposed by Florida Southeast Connection, LLC (FSC) in the above-referenced docket. FSC requests authorization to construct and operate approximately 5.2 miles of 20-inch-diameter natural gas transmission pipeline and associated facilities in Okeechobee County, Florida.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. In addition, the EA is available for public viewing on the FERC’s website (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE, Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential
