SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the National Compensation Survey (NCS). Under the NCS, the BLS conducts ongoing surveys of compensation and job characteristics. Data collected by the NCS are used to produce Employment Cost Trends, including the Employment Cost Index and Employer Costs for Employee Compensation, employee benefits data, and data used by the President’s Pay Agent. This information collection has been classified as a revision, because the BLS is implementing a sample design change. The BLS is also removing subsidized commuting and stock options from the “Other Benefits” collection and adding student loan repayments and flexible work schedules to it. The Ethics Reform Act of 1989, the Federal Employees Pay Comparability Act of 1990, and the BLS Authorizing Statute authorize this information collection. See 2 U.S.C. 4501; 5 U.S.C. 5304(d)(1)(A), 5 U.S.C. 5318(a); and 29 U.S.C. 2b.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The OMB obtains OMB approval for this information collection under Control Number 1220–0164. The current approval is scheduled to expire on April 30, 2018; however, the OMB notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the Federal Register on November 21, 2017 (82 FR 55399).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the ADDRESSES section within thirty (30) days of publication of this notice in the Federal Register. • Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Training Plan Regulations and Certificate of Training Information collection requirements codified at regulations 30 CFR 48.3, 48.9, 48.23, and 48.29. Federal Mine Safety and Health Act (Mine Act) section 115(a) states, “each operator of a coal or other mine shall have a health and safety training program which shall be approved by the Secretary.” The MSHA requires training plans to be submitted for approval to the MSHA District Manager for the area in which the mine is located. Plans must contain the company name, mine name, and MSHA identification number of the mine; the name and position of the person designated by the operator who is responsible for health and safety training at the mine; a list of MSHA-approved instructors with whom the operator proposes to make arrangements to teach the courses and the courses each instructor is qualified to teach; the location where training will be given for each course; a description of teaching methods and course materials to be used in training; the approximate number of miners employed at the mine and the maximum number who will attend each training session; the predicted time or periods of time when regularly scheduled refresher training will be given including the titles of courses to be taught, the total number of instruction hours for each course, and the predicted time and length of each training session; and for new task training, a complete list of task assignments, the titles of personnel conducting the training, the outline of training procedures used, and the evaluation procedures used to determine the effectiveness of the training. Upon completion of each training program, the mine operator certifies on Form MSHA 5000–23, Certificate of Training, that the miner has received the specified training in each subject area of the approved health and safety training plan. The Certificate of Training forms are to be maintained by the operator for a period of two years for current employees and for sixty (60) days after termination of a miner’s employment, and must be available for inspection at the mine site. In addition, the miner is entitled to a copy of the certificate upon completion of the training and when he/she leaves the operator’s employment. Mine Act sections 101 and 103 authorize this information collection. See 30 U.S.C. 811, 813.

A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

The DOL obtains OMB approval for this information collection under Control Number 1219–0009, and the agency seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.
