SUPPLEMENTARY INFORMATION:

Title: Importation of Gypsy Moth Host Materials From Canada.

OMB Control Number: 0579-0142.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to prohibit or restrict the importation, entry, exportation, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA. Regulations governing the importation of gypsy moth host material into the United States from Canada are contained in 7 CFR 319.77-1 through 319.77-5.

The regulations are intended to prevent the introduction of gypsy moth into noninfested areas of the United States by placing certain inspection and documentation requirements on gypsy moth host material (*i.e.*, regulated articles) imported from Canada. Under the regulations, depending on the place of origin of the regulated articles and their destination in the United States, certain information collection activities are required such as a phytosanitary certificate, certificate of origin, compliance agreement, written statement, and emergency action notification.

We are asking the Office of Management and Budget (OMB) to approve our use of these information

collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.08 hours per response.

Respondents: Canadian plant health authorities; growers, exporters, or shippers of Christmas trees, shrubs, logs, pulpwood, and other articles from gypsy moth-infested provinces in Canada; and private individuals entering the United States with mobile homes or outdoor household articles.

Estimated annual number of respondents: 2,127.

Estimated annual number of responses per respondent: 1.19.

Estimated annual number of responses: 2,526.

Estimated total annual burden on respondents: 212 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of March 2018.

Michael Watson,

Acting Administrator, Animal and Plant Health Inspection Service.
