

The Bureau has received feedback from industry indicating that the Bureau's use of disclaimers on its materials causes confusion as to the utility and reliability of the guidance and otherwise diminishes the usefulness of the guidance provided. The Bureau has also received feedback urging the Bureau to modify existing disclaimers.

Bureau disclaimers are printed on, for example, rule summaries, compliance guides, quick reference materials, and other compliance aids. These disclaimers are given orally to industry stakeholders when Bureau staff present in webinars or at industry conferences or respond to questions through the Regulatory Inquiries Function. The particular language used in disclaimers is tailored to the type of guidance being provided. For example, the disclaimers provided within the Bureau's regulatory implementation and compliance aids generally indicate that the explanation or summary of a regulatory requirement does not apply to all possible circumstances and is not legal advice. Oral disclaimers given through the Bureau's Regulatory Inquiries Function generally explain that Bureau staff only provide informal responses to regulatory inquiries and that the responses are not intended to serve as legal advice or considered to be an official interpretation of a regulation.

The Bureau has developed different disclaimers for different types of materials as its guidance function has evolved over time, and stakeholders have indicated that some historical

formulations are particularly likely to cause confusion. For example, industry stakeholders point to language stating that webinar materials do not bind the Bureau, or create any rights, benefits, or defenses that are enforceable by other parties, as raising questions about whether material presented can be relied upon. They question whether the Bureau would change its interpretation without notice or take action against a party acting in conformity with an interpretation stated in a webinar.

The Bureau is seeking feedback on all aspects of its disclaimers, including the following areas of interest:

20. Taking into consideration the Bureau's purposes for providing guidance as well as APA requirements discussed above, whether disclaimers are transparent, understandable, and appropriate to the type of guidance being provided.

21. Desired changes to the Bureau's disclaimer language or approach to disclaimers generally, and whether other Federal agencies have adopted disclaimer language or approaches to disclaimers that would be useful to the Bureau.

22. The variety of Bureau disclaimers currently provided, and whether the Bureau should adopt a single, more generic disclaimer to be used in most instances.

23. Other feedback or suggestions related to the Bureau's disclaimers.

#### *POLICY JUSTIFICATION*

*Kingdom of Saudi Arabia—Continuation of Maintenance Support Services (MSS)*

The Kingdom of Saudi Arabia has requested the continuation of the Maintenance Support Services (MSS) contract that supports the Royal Saudi Land Forces Aviation Command's (RSLFAC) fleet of AH–64D/E, UH–60L, Schweizer 333 and Bell 406CS helicopters. The MSS contract services includes management and installation of engineering change proposals and modification work orders; Repair and Return (R&R) management services and component repairs; aircraft simulator logistics, maintenance and technical support; training; and maintenance management support for the RSLFAC Headquarters staff; and other related elements of logistics and program support. The estimated total case value is \$106.8 million.

This proposed sale will support U.S. foreign policy and national security objectives by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic growth in the Middle East. This potential sale is a continuation of current support. Saudi Arabia will have no difficulty absorbing this equipment and support into its armed forces.

The continuation of MSS services will aid in the maintenance support of Saudi Arabia's rotary wing aircraft fleet, engines, avionics, weapons, and missile components.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be DynCorps International, Mclean, VA.

There are no known offset agreements in connection with this potential sale.

Implementation of this proposed sale will require the assignment of one (1) U.S. Government and up to three hundred twenty (320) contractor representatives to travel to Saudi Arabia for a period of two (2) years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
