

descriptive information for the Study of Coaching Practices in Early Care and Education Settings (SCOPE) project. The goal of this information collection is to identify how professional development coaching practices for early care and education (ECE) providers are implemented and vary in ECE classrooms serving children supported by Child Care and Development Fund (CCDF) subsidies or Head Start grants. This study will focus primarily on coaching used for delivering professional development services to

ECE teachers and caregivers to improve knowledge and practice in center-based classrooms and family child care (FCC) homes serving preschool-age children. This study aims to advance understanding of how core features of coaching are implemented in ECE classrooms, how the features may vary by key contextual factors and implementation drivers, and which are ripe for more rigorous evaluation. The study tasks will include gathering information to inform selection of states in which to conduct the study,

designing and conducting a descriptive study to examine the occurrence and variability of coaching features in ECE classrooms, and conducting case studies to examine program or systems-level drivers of coaching and the features being implemented.

Respondents: State administrators knowledgeable about coaching and coaching funders or providers, ECE center directors, coaches, teachers, and FCC providers.
