Agricultural Marketing Service

Title: Cranberries Grown in Multiple States.

OMB Control Number: 0581–0304.

Summary of Collection: The Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601 *et seq.*; Act), the U.S. Department of Agriculture (USDA) has authority to promulgate and oversee marketing orders to regulate the handling of an agricultural commodity placed in interstate or foreign commerce. Marketing orders are proposed and voted in by producers, and apply to handlers who place the product in commercial channels. Handlers are those companies that typically purchase products from producers for packaging, processing, and transporting the product for commercial or retail sales. Section 608d(1) of the Act provides that information necessary to determine the extent to which a marketing order has effectuated the declared policy of the Act shall be furnished at the request of the Secretary of Agriculture. The Agricultural Marketing Service (AMS) oversees the marketing order through the Committee made up of industry-nominated and USDA-appointed members, and any administrative rules and regulations issued under the proposed program.

Need and Use of the Information: AMS will collect information using five forms. The rule and regulations in 7 CFR part 929 authorize USDA and the Committee to collect certain information from handlers on the volume of cranberries withheld, certification of the proper disposal outlets, and any appeals made by a handler regarding withholdings. This information is necessary for the Secretary and the Committee to monitor adherence to the marketing order regulations, specifically for the handler withholding program. If this information was not collected, the Committee would have no way to carry out the volume control regulations.

Description of Respondents: Business or other for-profit.

Number of Respondents: 10.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 37.

SUPPLEMENTARY INFORMATION:**Introduction**

On April 20, 2010, the mobile offshore drilling unit, *Deepwater Horizon*, which was being used to drill a well for BP Exploration and Production Inc. (BP), in the Macondo prospect (Mississippi Canyon 252-MC252), exploded, caught fire, and subsequently sank in the Gulf of Mexico, resulting in an unprecedented volume of oil and other discharges from the rig and from the wellhead on the seabed. The *Deepwater Horizon* Oil Spill is the largest oil spill in United States history, discharging millions of barrels of oil over a period of 87 days.
