SUPPLEMENTARY INFORMATION: After receiving Renewed License No. SNM-2506, the NSPM staff began to review it and prepare procedures to implement new requirements. NSPM submitted an email on February 9, 2016 (ADAMS Accession No. ML17324B332), requesting the NRC to, among other things, address an apparent error in License Condition 22(a) of Renewed License No. SNM-2506 so that NSPM could establish procedures containing the correct inspection intervals acceptance criteria for Renewed License No. SNM-2506. License Condition 22(a)

set inspection intervals to be "not less than" those in the American Concrete Institute (ACI) Code; however, NRC-issued documents demonstrated the NRC had intended the intervals "not to exceed" those in the ACI Code.

As a result of its review, the NRC staff determined that License Condition 22(a) should read "not to exceed" instead of "not less than" and has amended the license to correct this error. When the NRC staff evaluated visual inspection intervals in its Safety Evaluation Report (SER) dated December 2015 (ADAMS Accession No. ML15336A230) for Renewed License No. SNM-2506, Section 3.5.1.3 of the SER clearly articulated the staff's expectation that accessible areas of the concrete pads would be visually inspected at intervals "not to exceed" 5 years. Further, the SER states the staff determined that the specific inspection intervals and areas of inspection coverage in the Aging Management Program (AMP) for concrete pads are appropriate based upon the technical references pertinent to age-related degradation of concrete in similar environments, including American Concrete Institute guides (ACI) 349.3R-02 (ACI, 2002), ACI 201.1R-08 (ACI, 2008), American National Standards Institute/American Society of Civil Engineers guidelines (ANSI/ASCE) 11-99 (ASCE, 2000), and reactor renewal guidance provided in NRC NUREG-1801 (NRC, 2010b). The "not less than" language included in error is inconsistent with the NRC staff's SER and has the unintended consequence of preventing NSPM from conducting more frequent inspections.

Accordingly, based on the staff's findings, the NRC made the necessary change and issued Amendment No. 10 to License No. SNM-2506 to correct License Condition 22(a). Amendment No. 10 was effective as of its date of issuance. The NRC staff's findings are documented in a SER dated March 6, 2018 (ADAMS Accession No. ML18057A284), which determined that the amendment complies with the Atomic Energy Act of 1954, as amended, and NRC regulations. The issuance of Amendment No. 10 satisfies the criteria specified in § 51.22(c)(11) of title 10 of the *Code of Federal Regulations* (10 CFR) for a categorical exclusion. Therefore, the preparation of an environmental assessment or an environmental impact statement is not required.

In accordance with 10 CFR 72.46(b)(2), the NRC has determined that Amendment No. 10 does not present a genuine issue as to whether the public health and safety will be significantly affected. Therefore, the

publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted. Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified.

Dated at Rockville, Maryland, this 4th day of April, 2018.

For the Nuclear Regulatory Commission.

John McKirgan,

Chief, Spent Fuel Licensing Branch, Division of Spent Fuel Management, Office of Nuclear Material Safety and Safeguards.

B. Submitting Comments

Please include Docket ID NRC-2017-0209 in the subject line of your comment submission in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comments submissions are posted at <http://www.regulations.gov> and entered into ADAMS. Comment submissions are not

routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* 10 CFR part 31, "General Domestic Licenses for Byproduct Material."
2. *OMB approval number:* 3150-0016.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* N/A.
5. *How often the collection is required or requested:* Reports are submitted as events occur. General license registration requests may be submitted at any time. Changes to the information on the registration may be submitted as they occur.
6. *Who will be required or asked to respond:* Persons receiving, possessing, using, or transferring devices containing byproduct material.
7. *The estimated number of annual responses:* 140,281 (10,681 responses + 129,600 recordkeepers).
8. *The estimated number of annual respondents:* 10,681 (993 NRC licensee respondents + 9,688 Agreement State respondents).
9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 36,638 hours (4,926 hours for NRC licensees + 31,712 hours for Agreement State licensees).
10. *Abstract:* Part 31 of title 10 of the *Code of Federal Regulations* (10 CFR) establishes general licenses for the possession and use of byproduct material in certain devices. General licensees are required to keep testing records and submit event reports identified in 10 CFR part 31, which assist the NRC in determining, with reasonable assurance, that devices are operated safely and without radiological hazard to users or the public.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 5th day of April, 2018.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
