

of the nuclear reactor for use as fuel in operation of the nuclear reactor after issuance of an operating license for the reactor. The general form of indemnity agreement to be entered into by the NRC with FPL is contained in 10 CFR 140.92, "Appendix B—Form of indemnity agreement with licensees furnishing insurance policies as proof of financial protection."

II. Request/Action

Pursuant to 10 CFR 140.9, the NRC is publishing notice of its intent to enter into an indemnity agreement that contains provisions different from the general form found in 10 CFR 140.92. Modifications to the general indemnity agreement are addressed in the following discussion.

III. Discussion

The provisions of the general form of indemnity agreement in 10 CFR 140.92 address insurance and indemnity for a licensee that is authorized to operate as soon as an operating license is issued pursuant to 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities." FPL, however, has requested a COL pursuant to 10 CFR part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants," to construct and operate Turkey Point Units 6 and 7. Unlike an operating license, which authorizes operation of the facility as soon as the license is issued, a COL authorizes the construction and operation of the facility, and also includes a condition that bars operation until the Commission makes a finding pursuant to 10 CFR 52.103(g) that the acceptance criteria in the COL are met (also called a "§ 52.103(g) finding"). The COL holders are not required to maintain financial protection in the amount specified in 10 CFR 140.11(a)(4) before the § 52.103(g) finding is made, but must maintain financial protection in the amount specified by 10 CFR 140.13 upon receipt of a COL because the COL includes a license issued pursuant to 10 CFR part 70. Therefore, the provisions in the general form of indemnity agreement must be modified to address the timing differences applicable to COLs.

Modifications to the general form of indemnity agreement will reflect the timing distinctions applicable to COLs. In addition, other modifications and their intent are described below:

(1) References to Mutual Atomic Energy Liability Underwriters have been removed because this entity no longer exists.

(2) Monetary amounts have been updated to reflect changes that have been made to Section 170,

"Indemnification and Limitation of Liability," of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2210).

IV. Conclusions

Accordingly, for the reasons discussed in this notice, and in accordance with 10 CFR 140.9, the NRC hereby provides notice of its intent to enter into an agreement of indemnity with FPL for Turkey Point Units 6 and 7 with the described modifications to the general form of indemnity.

Dated at Rockville, Maryland, this 19th day of April 2018.

SUPPLEMENTARY INFORMATION:

I. Introduction

Under section 2.106 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is providing notice of the issuance of COL Nos. NPF-104 and NPF-105 to FPL. Under 10 CFR 50.102(c), the NRC is providing notice of the Commission's Memorandum and Order documenting its final decision on the uncontested hearing, which serves as the ROD in this proceeding. With respect to the application for COLs filed by FPL, the NRC finds that the applicable standards and requirements of the Atomic Energy Act of 1954, as amended (AEA), and the Commission's regulations have been met. The NRC finds that any required notifications to other agencies or bodies have been duly made and that there is reasonable assurance that the facilities will be constructed and will operate in conformity with the license, the provisions of the AEA, and the Commission's regulations. Furthermore, the NRC finds that FPL is technically and financially qualified to engage in the activities authorized, and that issuance of the licenses will not be inimical to the common defense and security or to the health and safety of the public. Finally, the NRC has determined that the findings required by subpart A of 10 CFR part 51 have been made.

Accordingly, the COLs were issued on April 12, 2018, and became effective immediately.

II. Further Information

The NRC has prepared a Final Safety Evaluation Report (FSER) and Final Environmental Impact Statement (FEIS) that document the information reviewed and the NRC's conclusion. The Commission has also issued its Memorandum and Order documenting its final decision on the uncontested hearing held on December 12, 2017, which serves as the ROD in this

proceeding. The NRC also prepared a document summarizing the ROD to accompany its actions on the COL application; this "Summary ROD" incorporates by reference materials contained in the FEIS. The FSER, FEIS, Summary ROD, and accompanying documentation included in the COL package, as well as the Commission's hearing decision and ROD, are available online in the ADAMS Public Document collection at <http://www.nrc.gov/reading-rm/adams.html>.
