Michelle D. Trout,
Program Analyst, Office of Federal Advisory Committee Policy.

For further information contact: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Mary Anne Bright, Supervisory Public Health Advisor, CCPIB/OCPL, 9609 Medical Center Drive, Rockville, MD 20850, or call non-toll-free number 240–276–6647 or Email your request, including your address to: brightma@mail.nih.gov. Formal requests for additional plans and instruments must be requested in writing.

Supplementary information: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Collection of Customer Service, Demographic, and Smoking/Tobacco Use Information from the National Cancer Institute’s Contact Center (CC) Clients (NCI). 0925–0208 Expiration Date 04/30/2019, REVISION, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: The National Cancer Institute (NCI) currently collects: (1) Customer service and demographic information from clients of the Contact Center (CC) in order to properly plan, implement, and evaluate cancer education efforts, including assessing the extent by which the CC reaches and impacts underserved populations; (2) smoking/tobacco use behavior of individuals seeking NCI’s smoking cessation assistance through the CC in order to provide smoking cessation services tailored to the individual client’s needs and track their smoking behavior at follow up. This is a request for OMB to approve a revised submission for an additional three years to provide ongoing customer service collection of demographic information, and collection of brief customer satisfaction questions from NCI Contact Center Clients for the purpose of program planning and evaluation.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 1,674.

Coast Guard

[Docket No. USCG–2016–1061]

Proposed Termination of U.S. Coast Guard Rebroadcast of HYDROLANT and HYDROPAC Information

ACTION: Notice and request for comments.

SUMMARY: The United States Coast Guard may cease rebroadcasting HYDROLANT and HYDROPAC (defined below) navigational warnings from the National Geospatial-Intelligence Agency (NGA) over HF SITOR (defined below). There is not a requirement for the Coast Guard to rebroadcast this information, although the Coast Guard has been voluntarily doing so for a number of years, and doing so is duplicative of NGA’s broadcast. The information would continue to be disseminated by the NGA. This notice requests public comment on the possibility of terminating the rebroadcast over HF SITOR.

DATES: Comments must be submitted to the online docket via http://www.regulations.gov, on or before July 13, 2018.

ADDITIONAL INFORMATION:

Summary

The United States Coast Guard may cease rebroadcasting HYDROLANT and HYDROPAC (defined below) navigational warnings from the National Geospatial-Intelligence Agency (NGA) over HF SITOR (defined below). There is not a requirement for the Coast Guard to rebroadcast this information, although the Coast Guard has been voluntarily doing so for a number of years, and doing so is duplicative of NGA’s broadcast. The information would continue to be disseminated by the NGA. This notice requests public comment on the possibility of terminating the rebroadcast over HF SITOR.

Action

Notice and request for comments.

Dated: May 1, 2018.

Karla C. Bailey,
Project Clearance Liaison, National Cancer Institute, National Institutes of Health.

SUPPLEMENTARY INFORMATION:

FOR FURTHER INFORMATION CONTACT:

We encourage you to submit comments (or related material) on the possible termination of the USCG’s rebroadcast of HYDROLANT and HYDROPAC information. We will consider all submissions received before the comment period closes. If you submit a comment, please include the docket number for this notice, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at http://www.regulations.gov. If your material cannot be submitted using http://www.regulations.gov, contact the person in the FOR FURTHER INFORMATION CONTACT section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at http://www.regulations.gov and can be viewed by following that website’s instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

We accept anonymous comments. All comments received will be posted without change to http://www.regulations.gov and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the Federal Register (70 FR 15086).

Discussion

In support of the Global Maritime Distress and Safety System (GMDSS), Broadcast Warnings are promulgated by the Worldwide Navigational Warnings Service (WWNWS) to provide rapid dissemination of information critical to navigation and the safety of life at sea. Broadcast Warnings are issued regularly by the WWNWS and contain information about persons in distress, or objects and events that pose an immediate hazard to navigation. The four types of Navigational Warnings—NAVAREA IV, HYDROLANT, NAVAREA XII, and HYDROPAC—are categorized by their location. In addition, warnings are issued for the Arctic region not covered by HYDROLANT and HYDROPAC messages. A graphic showing the locations of the Navigational Warning areas is available on NGA’s website at http://msi.nga.mil/MSISiteContent/StaticFiles/Images/nawarnings.jpg. Additional information regarding this program is available at the following NGA website: http://msi.nga.mil/NGAPortal/MSI.portal?nfpb=true&_pageLabel=msi_portal_page_63.

NGA currently provides, and will continue to provide, global broadcast through HYDROLANT, HYDROPAC, and HYDROARC messages over INMARSAT maritime satellite telecommunications services which are principally directed to the U.S. Navy (USN) and National Geospatial Intelligence Agency (NGA) partners. NGA also is charged with promulgation of the U.S. Notice to Mariners (NTM) and it satisfies this via the NGA website and email subscription, which can be monitored via INMARSAT–C maritime satellite telecommunications services. In accordance with the International Hydrographic Organization’s (IHO) World-Wide Navigational Warning Service (WWNWS), the United States is solely responsible for Broadcast Warnings to the NAVAREA IV and XII geographic locations. Broadcast Warning messages are also available at Google Earth.

Other notices, Special Warnings and Maritime Administration (MARAD) Advisories, are issued infrequently and contain information about potential hazards caused by the global political climate.

In addition, a Daily Memorandum is issued each week day by NGA, excluding federal holidays, and contains a summary of all Broadcast Warnings and Special Warnings promulgated during the past 24–72 hours. The Atlantic Edition includes HYDROLANT and NAVAREA IV Warnings, while the Pacific Edition includes HYDROPAC and NAVAREA XII Warnings. Both editions include Special Warnings and HYDROARC Warnings issued during the same period.

In light of all of the foregoing ways in which this weather-related information is available to mariners, the Coast Guard’s rebroadcasting of these warnings has become unnecessary. Rebroadcasting this information has become very time consuming for the Coast Guard, and it takes limited resources away from other safety
