SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC received an application, dated April 23, 2007, from Entergy Nuclear Operations, Inc., (Entergy), filed pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, and part 54 of title 10 of the *Code of Federal Regulations*, (10 CFR part 54), to renew, the operating licenses for IP2 and IP3. The IP2 and IP3 site is located along the Hudson River, approximately 24 miles north of New York, NY. Renewal of the licenses would authorize the applicant to operate the facilities beyond the initial 40-year period specified in the current operating licenses. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

The NRC issued a plant-specific Final Supplemental Environmental Impact Statement (FSEIS) as a supplement to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants (GEIS), NUREG-1437, regarding the renewal of Facility Operating License Nos. DPR-26 and DPR-64 for Indian Point Nuclear Generating Unit Nos. 2 and 3 (IP2 and IP3).

As discussed in Section 8.2 of the FSEIS, the NRC staff determined that the adverse environmental impacts of license renewal for IP2 and IP3 are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Entergy Nuclear Operations, Inc.; (3) consultation with Federal, State, local, and tribal agencies; (4) the NRC staff’s independent review; and (5) NRC staff’s consideration of public comments received during the scoping process and on the draft Supplemental Environmental Impact Statement.

II. Matters Addressed in Supplement 2 to the FSEIS

This supplement includes the NRC staff’s evaluation of revised engineering

project cost information for severe accident mitigation alternatives (SAMAs), a summary of the results of additional sensitivity analyses to address uncertainties in the SAMA cost-benefit conclusions as directed by the Commission, newly available aquatic impact information, and the additional environmental issues associated with license renewal resulting from the June 2013, revision to Table B-1 in Appendix B to Subpart A of 10 CFR part 51 and NUREG-1437. This supplement also incorporates the impact determinations of NUREG-2157, “Generic Environmental Impact Statement for Continued Storage of Spent Nuclear Fuel,” in accordance with the requirements in 10 CFR 51.23(b). Additionally, this supplement describes the reinitiation of consultation under Section 7 of the Endangered Species Act of 1973, as amended (ESA), regarding the northern long-eared bat, the initiation of a conference under Section 7 of the ESA for proposed critical habitat of the Atlantic sturgeon, the staff’s November 2017, request for the National Marine Fisheries Service to amend the 2013 biological opinion’s Incidental Take Statement, and to provide its concurrence with staff’s effect determination with respect to the final designated Atlantic Sturgeon critical habitat. The supplement also provides an update on the status of the operating licenses for IP2 and IP3. In addition, this supplement reflects the closure agreement signed in January 2017, by the parties to legal proceedings related to the renewal of the operating licenses for IP2 and IP3. The closure agreement, among other things, resolves all litigation concerning license renewal and calls for an early shut down of IP2 and IP3.

Dated at Rockville, Maryland, this 16th day of May, 2018.
