The rule requires ISPs to make such disclosure available either via a publicly available, easily accessible website or through transmittal to the Commission, which will make such disclosures available via a publicly available, easily accessible website. The information collection will assist the Commission in its statutory obligation to report to Congress on market entry barriers in the telecommunications market. The Commission anticipates that the revised disclosures will empower consumers and businesses with information about their broadband internet access service, protecting the openness of the internet. Although this collection was bifurcated in 2016 with respect to fixed and mobile ISPs, the Commission seeks to have this collection encompass both fixed and mobile ISPs.

#### A. Purpose

The information relative to the place of performance and owner of plant or facility, if other than the prospective contractor, is a basic requirement when contracting for supplies or services (including construction). A prospective contractor must affirmatively demonstrate its responsibility. Hence, the Government must be apprised of this information prior to award. The contracting officer must know the place of performance and the owner of the plant or facility to (1) determine bidder responsibility; (2) determine price reasonableness; (3) conduct plant or source inspections; and (4) determine whether the prospective contractor is a manufacturer or a regular dealer.

The information is used to determine the prospective contractor's eligibility for awards and to assure proper preparation of the contract. Prospective contractors are only required to submit place of performance information on an exceptional basis; that is, whenever the place of performance for a specific solicitation is different from the address of the prospective contractor as indicated in the proposal. A notice was published in the **Federal Register** at 82

FR 51257 on November 3, 2017. No comments were received.

The 1,960,218 actions will be used as the new basis for total annual responses.
