Estimated Time per Response: 0.10–0.50 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. Statutory authority for this collection of information is contained in 47 U.S.C. 154(i), 218, 303(r) and 47 CFR Section 0.181(h).

Total Annual Burden: 6,950 hours.

Total Annual Cost: No Cost.

presumptively confidential. However, DIRS filings will be shared with the Department of Homeland Security and the other Federal agencies authorized to participate in the National Response Framework Emergency Support Function-2 (ESF-2)(Communications). The Commission may publish or otherwise share anonymized summaries of DIRS filings at its discretion.

Needs and Uses: In response to the events of September 11, 2001, the Federal Communications Commission (Commission or FCC) created an Emergency Contact Information System to assist the Commission in ensuring rapid restoration of communications capabilities after disruption by a terrorist threat or attack, and to ensure that public safety, public health, and other emergency and defense personnel have effective communications services available to them in the immediate aftermath of any terrorist attack within the United States. The Commission submitted, and OMB approved, a collection through which key communications providers could voluntarily provide contact information.

The Commission's Public Safety and Homeland Security Bureau (PSHSB) developed the Disaster Information Reporting System (DIRS) that uses electronic forms to collect Emergency Contact Information forms and through which participants may inform the Commission of damage to communications infrastructure and facilities due to major emergencies and may request resources for restoration. The Commission updated the process by increasing the number of reporting entities to ensure inclusion of wireless, wireline, broadcast, cable, VoIP, and broadband internet access communications providers. The Commission is requesting a renewal of the currently approved collection. It is imperative that the Disaster Information Reporting System be in place so that the Commission has an accurate picture of the communications landscape during disasters.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: In 2011, the Commission released the USF/ICC Transformation Order and Further Notice of Proposed Rulemaking, WC Docket No. 10-90 et al., FCC 11-161 (USF/ICC Transformation Order and/or FNPRM), which comprehensively reformed and modernized the high-cost program within the universal service fund to focus support on networks capable of providing voice and broadband services. Among other things, the Commission created the Connect America Fund (CAF) and concluded that support in price cap areas would be provided through a combination of "a new forward-looking model of the cost of constructing modern multi-purpose networks" and a competitive bidding process (the Connect America Fund Phase II auction or Phase II auction or Auction 903). The Commission also sought comment in the accompanying USF/ICC Transformation FNPRM on proposed rules governing the Phase II auction, including basic auction design and the application process.

In the Phase II auction, service providers will compete to receive support of up to \$1.98 billion over 10 years to offer voice and broadband service in unserved high-cost areas. The information collection requirements reported under this new collection are the result of several Commission decisions to implement reform adopted in the USF/ICC Transformation Order and move forward with conducting the Phase II auction. In the April 2014 Connect America Order, WC Docket No. 10-90 et al., FCC 14-54, the Commission adopted various rules regarding participation in the Phase II auction, the term of support, and the eligible telecommunications carrier (ETC) designation process. In the Phase II Auction Order, WC Docket No. 10-90 et al., FCC 16-64, the Commission adopted rules to govern the Phase II auction, including the adoption of a two-stage application process, which includes a pre-auction short-form application to be submitted by parties interested in bidding in the Phase II auction and a post-auction long-form application that must be submitted by winning bidders seeking to become authorized to receive Phase II auction support. The Commission concluded, based on its experience with auctions and consistent with the record, that this two-stage application process balances the need to collect information essential to conducting a successful auction and authorizing Phase II support with administrative efficiency.

On January 30, 2018, the Commission adopted a public notice that established the final procedures for the Phase II auction, including the long-form application disclosure and certification requirements for winning bidders seeking to become authorized to receive Phase II auction support. See Phase II Auction Procedures Public Notice, WC Docket No. 17-182 et al., FCC 18-6. The Commission also adopted the Phase II Auction Order on Reconsideration, WC Docket No. 10-90 et al., FCC 18-5, which modified the Commission's letter of credit rules to provide some additional relief for Phase II auction support recipients by reducing the costs of maintaining a letter of credit.

Under this information collection, the Commission will collect information from winning bidders to determine the recipients of Phase II auction support. To aid in collecting this information, the Commission has created FCC Form 683, which the public will use to provide the disclosures and certifications that must be made by Phase II auction winning bidders in the Connect America Fund Phase II auction seeking to become authorized for Phase II support.
