

information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the Service; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Service enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Service minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee), as amended by the National Wildlife Refuge System Improvement Act of 1997, and the Refuge Recreation Act of 1962 (16 U.S.C. 460k–460k–4) govern the administration and uses of national wildlife refuges and wetland management districts. The Administration Act authorizes us to permit public uses, including hunting and fishing, on lands of the Refuge System when we find that the activity is compatible and appropriate with the purpose for which the refuge was established. The Recreation Act allows the use of refuges for public recreation when the use is not inconsistent or does not interfere with the primary purpose(s) of the refuge.

We use FWS Form 3–2405 (Self-Clearing Check-In Permit) to collect user information on hunting and fishing on refuges. This form offers a self-check-in feature not found on other similar forms, reducing the number of staffed check-in stations. We found this method increases game harvest reporting and

provides better estimates of total numbers of game harvested. This form also requests users to report other species observed, data then used by refuge staff and state agencies for managing wildlife populations. Not all refuges will use this form and some refuges may collect the identical information in a nonform format (meaning there is no designated form associated with the collection of information). The currently approved form is available online at: <https://www.fws.gov/forms/3-2405.pdf>. We collect:

- Information on the visitor (name, address, and contact information). We use this information to identify the visitor or driver/passengers of a vehicle while on the refuge. Having this information readily available is critical in a search and rescue situation. We do not maintain or record this information.
- Information on whether or not hunters/anglers were successful (number and type of harvest/caught).
- Purpose of visit (hunting, fishing, wildlife observation, wildlife photography, auto touring, birding, hiking, boating/canoeing, visitor center, special event, environmental education class, volunteering, other recreation).

The above information is a vital tool in meeting refuge objectives and maintaining quality visitor experiences. It helps us:

- Administer and monitor the quality of visitor programs and facilities on refuges.
- Minimize resource disturbance, manage healthy game populations, and ensure the protection of fish and wildlife species through the check-in/out process.
- Assist in Statewide wildlife management and enforcement and develop reliable estimates of the number of key game fish and wildlife, like the Louisiana black bear (a recently delisted species).
- Determine facility and program needs and budgets based on user demand for resources.

Abstract: The Secretary of the United States Department of the Interior is responsible for collecting royalties from lessees who produce minerals from Federal and Indian lands and the Outer-Continental Shelf (OCS). Under various laws, the Secretary is responsible to manage mineral resources from Federal and Indian lands and the OCS. One of the mineral responsibilities that ONRR performs on behalf of the Secretary is to collect the royalties and other mineral revenues due, which obligations are accounted for as accounts receivables with ONRR’s Financial Management group. We have posted those laws pertaining to mineral leases on Federal and Indian lands and the OCS at http://www.onrr.gov/Laws_R_D/PubLaws/default.htm.

General Information

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal and Indian lands and the OCS, that company or individual agrees to pay the lessor a share in an amount or value of production from the leased lands. For oil, gas, and solid minerals, the lessee is required to report various types of information to ONRR relative to the disposition of the leased minerals. Specifically, companies submit financial information to ONRR on a monthly basis by submitting form ONRR–2014 [Report of Sales and Royalty Remittance for oil and gas reported in OMB Control Number 1012–0004], and form ONRR–4430 [Solid Minerals Production and Royalty Report reported in OMB Control Number 1012–
