**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

In accordance with the Executive Order 12862, the National Institute of Standards and Technology (NIST), a non-regulatory agency of the Department of Commerce, proposes to conduct a number of data collection efforts—both quantitative and qualitative. The data collections will be designed to determine requirements and evaluate the usability and utility of NIST research for measurement and standardization work. These data collections efforts may include, but may not be limited to electronic methodologies, empirical studies, video and audio collections, interviews, and questionnaires. For example, data collection efforts may include the cryptography software survey and the password generation study. NIST will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. NIST will not conduct individual data collections under this generic clearance that are mandatory, required, or regulated. The data collected will be used to guide NIST research. NIST will take steps to ensure anonymity of respondents in each activity covered under this request.

**II. Method of Collection**

NIST will collect this information by electronic means when possible, as well as by mail, fax, telephone and person-to-person interviews. If an information collection is conducted in person, NIST will provide the respondent with a paper copy of the collection instrument that displays the “notwithstanding statement”, OMB Control # and current Expiration date.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.
