

seek verification from the requester that the request is in furtherance of scholarly research.

Exempt means the record in question, or a portion thereof, is not subject to disclosure due to one or more of the nine statutory FOIA exemptions, found at 5 U.S.C. 552(b)(1) through (9).

Exemption refers to one or more of the FOIA's nine statutory exemptions, found at 5 U.S.C. 552(b)(1) through (9).

FOIA Requester Service Center is the office that oversees FOIA requests for all of GSA.

Interim response is when the agency releases the records on a rolling basis, as the records are located and verified.

Noncommercial scientific institution is an institution that is not operated on a "commercial" basis, as defined in this section and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. A requester in this category must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are sought to further scientific research and are not for a commercial use. GSA shall advise requesters of their placement in this category.

Perfected FOIA Request. A perfected FOIA request is a FOIA request for records which adequately describes the records sought, is made in accordance with GSA's regulations, which has been received by the GSA FOIA Requester Service center the FOIA office of the agency or agency component in possession of the records, and for which there is no remaining question about the payment or amount of applicable fees.

Referral. When an agency locates a record that originated with, or is of otherwise primary interest to another agency, it will forward that record to the other agency to process the record and to provide the final determination directly to the requester. This process is called a "referral."

Representative of the news media. Any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work and distributes that work to an audience. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast "news" to the public at large and publishers of periodicals that disseminate "news" and make their products available through a variety of means to the general public, including news

organizations that disseminate solely on the internet. A request for records supporting the news-dissemination function of the requester shall not be considered to be for a commercial use.

"Freelance" journalists who demonstrate a solid basis for expecting publication through a news media entity shall be considered as a representative of the news media. A publishing contract would provide the clearest evidence that publication is expected; however, GSA can also consider a requester's past publication record in making this determination. GSA shall advise requesters of their placement in this category.

Review. Examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. Review time includes processing any record for disclosure, such as doing all that is necessary to prepare the record for disclosure, including the process of redacting the record and marking the appropriate exemptions. Review costs are properly charged even if a record ultimately is not disclosed. Review time also includes time spent both obtaining and considering any formal objection to disclosure made by a confidential commercial information submitter under § 7 of this subpart, but it does not include time spent resolving general legal or policy issues regarding the application of exemptions.

Review Fees. Costs which may be charged to commercial-use requesters that consist of direct costs incurred during the initial examination of a document for the purposes of determining whether the records must be disclosed under the FOIA. Review time includes processing the documents for disclosure.

Search. The process of looking for and retrieving records or information responsive to a request. Search time includes page-by-page/or line-by-line identification of information within records and the reasonable efforts expended to locate and retrieve information from electronic records.

Search Fees. Charges for document "search" that include all the time spent looking for responsive material, including page-by-page or line-by-line identification of material within documents. GSA may charge for search time even when it fails to locate records responsive to request or even if the records located are subsequently determined to be exempt from disclosure.

Simple request. A FOIA request that an agency using multi-track processing places in its fastest (non-expedited)

track based on the volume and/or simplicity of records requested.

Submitter means any person or entity, including a corporation, State, or foreign government, but not including another Federal Government entity, that provides confidential commercial information, either directly or indirectly to the Federal Government.

SUPPLEMENTARY INFORMATION:**I. Background**

In FR Doc. 2018–08705 of May 7, 2018 (83 FR 20164) there were a number of technical and typographical errors that are identified and corrected by the Correction of Errors section of this correcting document.

II. Summary of Errors in the Preamble

On page 20165, in the **FOR FURTHER INFORMATION CONTACT** section, we inadvertently omitted the contact for the Medicaid Promoting Interoperability Program.

On pages 20384, 20385, and 20401, we made errors that describe the notice announcing the extension of changes to the payment adjustment for low-volume hospitals and the Medicare-dependent hospital (MDH) program for fiscal year (FY) 2018 (CMS–1677–N) as appearing in the May 7, 2018 issue of the **Federal Register** in which the proposed rule appeared. This notice appeared in the April 26, 2018 issue of the **Federal Register** (83 FR 18301).

On pages 20483, 20484, and 20492, in our discussion of the Hospital Inpatient Quality Reporting (IQR) Program, we made technical and typographical errors in two website links and in referencing the payment determination year corresponding with the CY 2020 reporting period.

On page 20533, in our discussion of the proposed new measure for the Promoting Interoperability Programs, Support Electronic Referral Loops by Receiving and Incorporating Health Information, we made a technical error in our citation to the CEHRT capabilities and standards that eligible hospitals and CAHs must use. We erroneously cited 45 CFR 170.315(g)(1) and (2) instead of 45 CFR 170.315(b)(1) and (2).

On page 20557, in our discussion of the information collection requirements for the Hospital IQR Program, we made a technical error by referring to an outdated name of a form in our description of burden estimates for proposed removal of two structural measures.

On page 20563, in our discussion of the information collection burden estimates for the Promoting Interoperability Programs, we made a technical error by incorrectly referring to Title 45 instead of Title 42 of the Code of Federal Regulations (CFR) when describing proposed amendments to the prior approval policy applicable in the Medicaid Promoting Interoperability Program.
