SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Box and Butterfly Spread Protections

June 19, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) and Rule 19b–4 thereunder, notice is hereby given that on June 7, 2018, Nasdaq ISE, LLC (“ISE” or the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt new order type protections, Butterfly and Box Spread protections, for Complex Orders 3 strategy trades.

The text of the proposed rule change is available on the Exchange’s website at http://ise.cchwallstreet.com/, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to: (i) Adopt Complex Order protections for Butterfly and Box Spread protections for Complex Order strategies; and (ii) reorganize and amend the existing Complex Order protections currently contained within .07 of Supplementary Material to Rule 722 and Rule 714. These amendments will be described in greater detail below. This rule change is similar to protections, which exist today on Nasdaq Phlx LLC (“Phlx”).4

Adopt Butterfly and Box Spread Protections

Today, ISE members may submit Butterfly and Box spreads into the System. ISE proposes to define a Butterfly spread as a three legged Complex Order with certain characteristics. 5 The Exchange is proposing to reject Butterfly spreads which are outside of certain parameters to avoid potential executions at prices that exceed the minimum and maximum possible intrinsic value of the spread by a specified amount. Today, the Exchange offers similar order protection features for Complex Orders such as Vertical and Calendar Spread Protections 7 to avoid erroneous trades.

Butterfly Spread Protection

As noted above, the Exchange proposes to adopt a Butterfly Spread Protection. A Butterfly Spread is a three legged Complex Order with the following: (1) Two legs to buy (sell) the same number of calls (puts); (2) one leg to sell (buy) twice the number of calls (puts) with a strike price at mid-point of the two legs to buy (sell); (3) all legs have the same expiration; and (4) each leg strike price is equidistant from the next sequential strike price. With this protection, a Butterfly Spread Limit Order that is priced higher than the Maximum Value (defined below) or lower than the Minimum Value (defined below) will be rejected. A Butterfly Spread Market Order (or Butterfly Spread Limit Order entered with a net price inside the Butterfly Spread Protection Range) to Buy (Sell) will be restricted from executing by legging into the single leg market with a net price higher (lower) than the Maximum (Minimum) Value. The Butterfly Spread Protection Range is the absolute difference between the Minimum Value and the Maximum Value.

ISE’s proposal continues to protect Butterfly Spreads from legging into the single leg market(s), similar to Phlx Rule 1098(i), at a price higher than the Maximum Value for buy orders and lower than the Minimum Value for sell orders. ISE’s proposal differs from Phlx in that ISE allows legging below the Minimum Value for buys and above the Maximum Value for sells at a price made available by the synthetic (cIBBO) market outside of the Butterfly Spread Protection Range.8

The Exchange believes that these limitations, which exist today for ISE Vertical and Calendar Spreads, 9 are consistent with the Act because the limits permit buying below the minimum and selling above the maximum thereby allowing buyers and sellers to achieve better prices without taking on additional risk. The intrinsic value for the Butterfly Spread that could be achieved when closing the position would not be negatively impacted in

---

3 A complex order is any order involving the simultaneous purchase and/or sale of two or more different options series in the same underlying security, for the same account, in a ratio that is equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) and for the purpose of executing a particular investment strategy. See ISE Rule 722(a)(1).
4 This rule change is similar to Phlx Rule 1098(i) and (j).
5 This strategy utilizes a combination of either all calls or all puts of the same expiration date in the same underlying to limit risk.
6 This strategy utilizes a combination of put/call pairs of options with the same expiration date in the same underlying to limit risk.
7 See Supplementary Material .07(c) to ISE Rule 722.
8 Allowing sell orders to trade by legging into the simple market if prices above the Maximum Value or below the Minimum Value offers an opportunity for buyers/buyers to receive a premium beyond the potential intrinsic value of the spread without creating risk for the Complex Order Book.
