

Form Number: FCC Form 854.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households, business or other for-profit entities, not-for-profit institutions, and State, local, or Tribal governments.

Number of Respondents and Responses: 2,400 respondents; 57,100 responses.

Estimated Time per Response: .33 hours to 2.5 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement and third party disclosure reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1, 2, 4(i), 303, and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 303, and 309(j), section 102(C) of the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4332(C), and section 1506.6 of the regulations of the Council on Environmental Quality, 40 CFR 1506.6.

Total Annual Burden: 25,682 hours.

Total Annual Cost: \$1,176,813.

Privacy Act Impact Assessment: Yes. This information collection contains personally identifiable information on individuals which is subject to the Privacy Act of 1974. Information on the FCC Form 854 is maintained in the Commission's System of Records, FCC/WTB-1, "Wireless Services Licensing Records." These licensee records are publicly available and routinely used in accordance of subsection b of the Privacy Act, 5 U.S.C. 552a(b), as amended. Taxpayer Identification Numbers (TINs) and materials that are afforded confidential treatment pursuant to a request made under 47 CFR 0.459 of the Commission's rules will not be available for public inspection.

Nature and Extent of Confidentiality: Respondents may request materials or information submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of the Commission's rules. The Commission has in place the following policy and procedures for records retention and disposal: Records will be actively maintained as long as the entity remains a tower owner. Paper records will be archived after being keyed or scanned into the Antenna Structure Registration (ASR) database and destroyed when twelve (12) years old.

Needs and Uses: The purpose of FCC Form 854 (Form 854) is to register antenna structures that are used for radio communication services which are regulated by the Commission; to make

changes to existing antenna structure registrations or pending applications for registration; or to notify the Commission of the completion of construction or dismantlement of such structures, as required by Title 47 of the Code of Federal Regulations, Chapter 1, Sections 1.923, 1.1307, 1.1311, 17.1, 17.2, 17.4, 17.5, 17.6, 17.7, 17.57 and 17.58.

Any person or entity proposing to construct or alter an antenna structure that is more than 60.96 meters (200 feet) in height, or that may interfere with the approach or departure space of a nearby airport runway, must notify the Federal Aviation Administration (FAA) of proposed construction. The FAA determines whether the antenna structure constitutes a potential hazard and may recommend appropriate painting and lighting for the structure. The Commission then uses the FAA's recommendation to impose specific painting and/or lighting requirements on radio tower owners and subject licensees. When an antenna structure owner for one reason or another does not register its structure, it then becomes the responsibility of the tenant licensees to ensure that the structure is registered with the Commission.

Section 303(q) of the Communications Act of 1934, as amended, gives the Commission authority to require painting and/or illumination of radio towers in cases where there is a reasonable possibility that an antenna structure may cause a hazard to air navigation. In 1992, Congress amended Sections 303(q) and 503(b)(5) of the Communications Act to make radio tower owners, as well as Commission licensees and permittees responsible for the painting and lighting of radio tower structures, and to provide that non-licensee radio tower owners may be subject to forfeiture for violations of painting or lighting requirements specified by the Commission.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer, Office of the Secretary.

BILLING CODE 6712-01-P

FEDERAL MARITIME COMMISSION

Notice of Request for Additional Information

The Commission gives notice that it has formally requested that the parties to the below listed agreements provide additional information pursuant to 46 U.S.C. 40304(d). This action prevents the agreements from becoming effective

as originally scheduled. Interested parties may file comments within fifteen (15) days after publication of this notice appears in the **Federal Register**.

Agreement No.: 201143-017.

Title: West Coast MTO Agreement.

Parties: APM Terminals Pacific, Ltd.; Eagle Marine Services, Ltd.; Everport Terminal Services Inc.; International Transportation Service, Inc.; LBCT LLC; Pacific Maritime Services, L.L.C.; SSA Terminals (Pier A), LLC; SSA Terminals, LLC; Total Terminals International, LLC; TraPac Inc.; West Basin Container Terminal LLC; and Yusen Terminals LLC.

By Order of the Federal Maritime Commission.

Dated: June 29, 2018.

Rachel E. Dickon,

Secretary.

BILLING CODE 6731-AA-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than July 19, 2018.

A. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001:

1. *Tyler J. Bachman, Shawnee, Kansas;* to acquire voting shares of First Centralia Bancshares, Inc., and to become a member of the Bachman family group which controls First Centralia Bancshares, Inc., and thereby indirectly controls First Heritage Bank, both in Centralia, Kansas.

Board of Governors of the Federal Reserve System, June 29, 2018.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

[Docket Number OP-1613]

New Message Format for the Fedwire® Funds Service

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of proposed service enhancement; request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is requesting comment on a proposal to adopt the ISO® 20022 message format for the Fedwire® Funds Service. ISO 20022 is an international standard that would replace the Fedwire Funds Service's current, proprietary message format. The migration to ISO 20022 would take place in three phases beginning in 2020 and ending in 2023.

DATES: *Comment due date:* September 4, 2018.

ADDRESSES: You may submit comments, identified by Docket No. OP-1613, by any of the following methods:

- *Agency Website:* <http://www.federalreserve.gov>. Follow the instructions for submitting comments at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

- *Email:* regs.comments@federalreserve.gov. Include the docket number in the subject line of the message.

- *Fax:* (202) 452-3819 or (202) 452-3102.

- *Mail:* Address to Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments will be made available on the Board's website at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm> as submitted, unless modified for technical

reasons or to remove personal information at the commenter's request. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room 3515, 1801 K Street NW (between 18th and 19th Streets NW), between 9:00 a.m. and 5:00 p.m. on weekdays.

FOR FURTHER INFORMATION CONTACT:

Evan Winerman, Counsel (202-872-7578), Legal Division; or Melissa Leistra, Manager (202-530-6285), Renuka Lakshmanan, Senior Financial Services Analyst (202-475-6633), Division of Reserve Bank Operations and Payment Systems. For users of Telecommunications Device for the Deaf (TDD) only, contact (202-263-4869).

SUPPLEMENTARY INFORMATION:

I. Background

The Fedwire Funds Service is a real-time gross settlement system owned and operated by the Federal Reserve Banks (Reserve Banks) that enables participants to make final payments using their balances held at Reserve Banks or intraday credit provided by the Reserve Banks. The Fedwire Funds Service and the CHIPS® funds-transfer system, which is owned and operated by The Clearing House Payments Company, L.L.C. (TCH), are the main large-value payment systems in the United States.¹

A. Current Fedwire Funds Service Message Format

The Fedwire Funds Service uses a proprietary message format that supports multiple types of communications. Specifically, Fedwire Funds Service participants can send "value" messages that order the movement of funds and "nonvalue" messages that do not result in the movement of funds but rather communicate information or requests to other participants.² The Fedwire Funds Service also includes messages that enable Fedwire participants to request account balance information and the processing status of payment orders.

Although the Fedwire Funds Service message format is proprietary, it can be mapped to—and is interoperable with—the CHIPS message format and the message type (MT) format of the SWIFT® messaging network.³ As a result, multi-step domestic and international funds transfers can involve payment orders sent over the Fedwire Funds Service, CHIPS, and the SWIFT Financial Message Service network.

B. ISO 20022

The International Organization for Standardization (ISO) is an independent, non-governmental organization comprised of 161 national standards bodies. ISO "brings together experts to share knowledge and develop voluntary, consensus-based, market relevant International Standards that support innovation and provide solutions to global challenges."⁴ ISO publishes standards for a broad range of industries.

The ISO 20022 standard includes a suite of messages for the financial industry, including messages for payments, securities, trade services, cards, and foreign exchange. ISO 20022 messages use extensible markup language (XML) syntax and have a common data dictionary that can support end-to-end payment message flow, including payment initiation (*i.e.*, customer to bank messages), interbank settlement (*i.e.*, bank to bank messages), and cash management (*i.e.*, bank to customer messages).

ISO 20022 messages include structured data elements that provide for potentially richer payment message data than the current Fedwire Funds Service message format. For example, ISO 20022 messages contain fields for three intermediary financial institutions while the current Fedwire Funds message format contains a field for only one intermediary financial institution. Similarly, ISO 20022 messages can include more structured and detailed information than the current Fedwire Funds message format (see example in Table 1).

TABLE 1

Current Fedwire Funds Service format	ISO 20022 format
Free-text lines for address information:	Discrete fields for specific address information:

¹ In 2017, the Fedwire Funds Service processed 152,649,633 payments with a total value of approximately \$740 trillion and CHIPS processed 112,597,088 payments with a total value of approximately \$393 trillion.

² Value messages can be used for multiple types of funds transfers, *e.g.*, "bank transfers" in which

the originator and beneficiary are both banks and "customer transfers" in which the originator and/or beneficiary is not a bank. Nonvalue messages include, *e.g.*, "requests for reversal" in which a Fedwire participant requests that another Fedwire participant send a funds transfer that would return the amount of a previously accepted payment order.

³ SWIFT is a member-owned cooperative headquartered in Belgium that provides its users (including banking and securities organizations, market infrastructures, and corporate customers) a global service for financial messages, such as payments and securities transactions.
