Final Environmental Impact Statement and Draft Record of Decision on the Barton Springs/Edwards Aquifer Conservation District Habitat Conservation Plan for Two Salamander Species in Travis and Hays Counties, Texas

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service, under the National Environmental Policy Act, make available the final environmental impact statement and draft record of decision analyzing the impacts of issuance of an incidental take permit for implementation of the Barton Springs/Edwards Aquifer Conservation District (BSEACD) Habitat Conservation Plan (HCP). Our decision is to issue a 20-year incidental take permit for implementation of the BSEACD HCP,

which authorizes incidental take of two listed salamanders under the Endangered Species Act.

DATES: We will finalize the record of decision and issue a permit no sooner than August 13, 2018.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of several documents related to an incidental take permit (ITP) application under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The final environmental impact statement (EIS) and draft record of decision (ROD) were developed in compliance with the agency decision-making requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), and are based on the habitat conservation plan (HCP) as submitted by the Barton Springs/Edwards Aquifer Conservation District (BSEACD, or applicants). We described all four alternatives in detail, which were fully evaluated and analyzed in our 2018 final EIS. The draft ROD documents the rationale for our decision.

Our proposed action is to issue an ITP to the applicants under section 10(a)(1)(B) of the ESA that authorizes incidental take of the Barton Springs salamander (*Eurycea sosorum*) and Austin blind salamander (*Eurycea waterlooensis*) during management of the Barton Springs segment of the

Edwards Aquifer. The aquifer is the primary water supply for more than 70,000 people in the region and the source water for the Barton Springs complex. The applicants requested a term of 20 years from the date of issuance. The applicants will fully implement minimization and mitigation measures to offset impacts to the covered species according to their HCP.

The minimization measures include: Providing the most efficient use of groundwater, controlling and preventing waste of groundwater, addressing conjunctive surface water management issues, addressing natural resource management issues, addressing drought conditions, addressing demand reduction through conservation, addressing supply through structural enhancement, and quantitatively addressing established desired future conditions.

The mitigation measures include a commitment to:

- Support the operations of an existing refugium through in-kind, contracted support, cash provision, or other appropriate means;
- conduct a feasibility study of dissolved oxygen augmentation and, if warranted, implement a pilot project at Main Spring at Barton Springs;
- maintain and operate the Antioch Recharge Enhancement Facility for the permit term;
- establish a new reserve fund for closing abandoned wells to eliminate high-risk abandoned wells as potential conduits for contaminants from the surface or adjacent formations into the aquifer, with priority given to problematic wells close to the Barton Springs outlets or those associated with water chemistry concerns under severe drought conditions; and
- provide leadership and technical assistance to other government entities, organizations, and individuals when prospective land-use and groundwater management activities in those entities' purview will, in the District's assessment, significantly affect the quantity or quality of groundwater in the Aquifer.

In addition to this notice, the Environmental Protection Agency (EPA) published a notice announcing the EIS on July 13, 2018, as required under the Clean Air Act, section 309 (42 U.S.C. 7401 *et seq.*; see EPA's Role in the EIS Process below).

Background

The applicants have applied for an ITP (TE10607C-0) under the ESA that would authorize incidental take of two covered species and would be in effect for a period of 20 years. The proposed
