formations, acquisitions, mergers, and nonbanking activities. The Federal Reserve uses this information to evaluate each individual transaction with respect to financial and managerial factors, permissibility, competitive effects, net public benefits, financial stability, and the impact on the convenience and needs of affected communities.

The applicant or notificant also is required to publish a notice in a newspaper of general circulation in the community where the head office of the bank to be acquired is located. The notice must state the name and address of the applicant and its proposed subsidiary, and it must invite the public to submit written comments to the appropriate Federal Reserve Bank.

Legal authorization and confidentiality: The FR Y–3 application and FR Y–3N notification are mandatory and submitted pursuant to section 3(a) of the BHC Act, which requires Board approval for formations, acquisitions, and mergers of bank holding companies (12 U.S.C. 1842(a)), and section 5(b) of the BHC Act, which authorizes the Board to issue regulations and orders to carry out these functions (12 U.S.C. 1844(b)). The FR Y–4 notification is mandatory and submitted pursuant to section 4(j) of the BHC Act, which requires BHCS to give advance written notice to the Board of any nonbanking activities (12 U.S.C. 1843(j)), and section 5(b) of the BHC Act (12 U.S.C. 1844(b)), described above.

The information submitted in the FR Y–3, Y–3N, and Y–4 is considered to be public unless an institution requests confidential treatment for portions of the particular application or notification. Applicants may rely on any Freedom of Information Act exemption, and such requests for confidentiality must contain detailed justifications corresponding to the claimed exemption. Requests for confidentiality will be evaluated on a case-by-case basis.

Effective date: July 31, 2018.

Current actions: On March 23, 2018, the Board published a notice in the Federal Register (83 FR 12758) requesting public comment for 60 days on the extension, with revision, of the FR Y–3, FR Y–3N, and FR Y–4. The Board proposes to revise the FR Y–3, FR Y–3N, and FR Y–4 forms and instructions in order to improve the clarity of the requests; reflect the impact of new laws, regulations, capital requirements and accounting rules; delete items that are not typically useful for the analysis of the proposal; and add transparency for filers regarding the information that is required to consider a proposal. The revisions are intended to make initial filings better reflect and include the information that Board staff requires to evaluate a transaction and thereby reduce the need for subsequent information requests, which may delay the Board’s consideration of a filing and create additional burden for filers. The comment period for this notice expired on May 22, 2018. The Board did not receive any comments. Accordingly, the revisions will be implemented as proposed.

Michele Taylor Fennell, Assistant Secretary of the Board.

SUPPLEMENTARY INFORMATION:

Background: CDC is dedicated to protecting health and promoting quality of life through the prevention and control of disease, injury, and disability. NIOSH, one of CDC’s Centers, Institutes, and Offices, was established by the Occupational Safety and Health Act of 1970. NIOSH plans, directs, and coordinates a national program to develop and establish recommended occupational safety and health standards; conduct research and training; provide technical assistance; and perform related activities to assure safe and healthful working conditions for every working person in the United States.

Currently, three NIOSH research facilities—the Robert A. Taft Campus, Taft North Campus, and the Alice Hamilton Laboratory Campus—are located in Cincinnati, Ohio. These facilities no longer meet the research needs required to support occupational safety and health in the modern workplace. The facilities’ deficiencies adversely affect NIOSH’s ability to conduct occupational safety and health research in Cincinnati. It is not possible to renovate the facilities located on the three campuses to meet current standards and requirements. Additionally, the current distribution of NIOSH activities across separate campuses in Cincinnati results in inefficiencies in scientific collaboration and the duplication of operational support activities. Therefore, CDC is
