

**FOR FURTHER INFORMATION CONTACT:** Julia Byrd, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571-4366; email: [julia.byrd@safmc.net](mailto:julia.byrd@safmc.net).

**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the Data Scoping webinar are as follows:

1. Participants will review SEDAR 58 stock identification recommendations.
2. Participants will identify potential data sources and discuss data needs and treatments in order to prepare for the Data Workshop.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically

identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

#### Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SAFMC office (see **ADDRESSES**) at least 5 business days prior to the meeting.

*Note:* The times and sequence specified in this agenda are subject to change.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: July 31, 2018.

**Tracey L. Thompson,**

*Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.*

#### Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; request for comments.

**SUMMARY:** The Acting Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an Exempted Fishing Permit application contains all of the required information and warrants further consideration. This Exempted Fishing Permit would allow four commercial fishing vessels, directed by Coonamessett Farm Foundation, to be exempt from Atlantic sea scallop regulations for the purpose of bycatch reduction research.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed Exempted Fishing Permits.

**DATES:** Comments must be received on or before August 21, 2018.

**ADDRESSES:** You may submit written comments by any of the following methods:

- *Email:* [NMFS.GAR.EFP@noaa.gov](mailto:NMFS.GAR.EFP@noaa.gov).

Include in the subject line “Comments on CFF Extended Link Apron EFP.”

- *Mail:* Michael Pentony, Regional Administrator, NMFS, NE Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope “Comments on CFF Extended Link Apron EFP.”

**FOR FURTHER INFORMATION CONTACT:** Shannah Jaburek, Fishery Management Specialist, 978-282-8456.

#### SUPPLEMENTARY INFORMATION:

Coonamessett Farm Foundation (CFF) submitted a complete application for an Exempted Fishing Permit (EFP) on July 10, 2018, to conduct commercial fishing activities that the regulations would otherwise restrict. The EFP would authorize vessels to test the efficacy of an extended link scallop dredge apron at reducing the capture of yellowtail and windowpane flounder and small scallops over the duration of four directed research cruises. The EFP would support research associated with a project titled “Development of an Extended Link Apron: A Broad Range Tool for Bycatch Reduction,” that has been funded under the 2017 Atlantic Sea Scallop Research Set-Aside (RSA) Program.

CFF is requesting exemptions that would exempt four commercial fishing vessels from the following regulations:

- Atlantic sea scallop days-at-sea (DAS) allocations at 50 CFR 648.53(b);
- Crew size restrictions at § 648.51(c);
- Dredge gear restrictions for minimum mesh size at § 648.51(b)(2) and gear obstructions at § 648.51(b)(4)(iii);
- Atlantic sea scallop observer program requirements at § 648.11(g);
- Access area program requirements at § 648.59(a)(1)–(3), (b)(2), (b)(4);
- Rotational closed area exemptions for Closed Area I Access Area at § 648.60(c), Closed Area II Access Area at § 648.60(d), and all four of the Nantucket Lightship areas at § 648.60(e)–(h); and
- Possession limits and minimum size requirements specified in 50 CFR part 648, subpart B and subparts D through O, to allow temporary possession for biological sampling.

Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

The project would consist of conduct four, 7-day research trips for a total of 28 days-at-sea on limited access (LA) vessels fishing on Georges Bank. All trips will take place from September

2018 through June 2019. Vessels would complete approximately 55 paired, 30-minute tows per trip at a standard vessel speed of 4.8 knots. In addition to open areas, tows could occur in Closed Area I, Closed Area II, or the four Nantucket Lightship Scallop Rotational Areas. The four research trips would be centralized around areas with high yellowtail and winter flounder bycatch and in areas with a high abundance of harvestable size scallops mixed with pre-recruit scallops.

Vessels would fish two, 15-foot (4.57-m) Turtle Deflector Dredges; one dredge

would be rigged with a standard apron while the other would be rigged with an extended vertical link apron. The project will alternate tows with and without the dredge over net over both dredges. Standard linking is defined as a single link between ring spaces, and the extended link is defined as two links linked together between rings. Both dredges would use 4-inch (10.16-cm) rings and a 10-inch (25.40-cm) twine top.

For all tows, the sea scallop catch would be counted into baskets and weighed. One basket from each dredge

would be randomly selected and the scallops would be measured in 5 mm increments to determine size selectivity. Finfish catch would be sorted by species and then counted, weighed, and measured in 1 mm increments.

Depending on the volume of scallops and finfish captured, the catch would be subsampled as necessary. No catch would be retained for longer than needed to conduct sampling and no finfish or scallop catch would be landed for sale. Table 1 contains an estimate of the finfish catch anticipated for the project.

TABLE 1—CFF EXTENDED LINK APRON PROJECT CATCH ESTIMATES

Species	Weight (lbs)	Weight (kg)
Sea Scallop .....	16,552	7,508
Yellowtail Flounder .....	549	249
Winter Flounder .....	803	364
Windowpane Flounder .....	2,828	1,283
Summer Flounder .....	943	428
Fourspot Flounder .....	74	34
American Plaice Flounder .....	90	41
Witch Flounder .....	12	5
Haddock .....	58	26
Atlantic Cod .....	100	45
Monkfish .....	8,420	3,819
Spiny Dogfish .....	87	39
Barndoor Skate .....	1,109	503
NE Skate Complex (excluding barndoor skate) .....	63,528	28,816

CFF needs these exemptions to allow them to conduct experimental dredge towing without being charged DAS, and to deploy gear in closed access areas where concentrations of primary bycatch species are sufficiently high to provide statistically robust results. Researchers also need mesh size and gear obstruction exemptions in order to use the dredge net cover. Utilizing the dredge net cover will allow researchers to quantify fish that would normally escape through the gear during normal fishing operations. Participating vessels need crew size waivers to accommodate science personnel, and possession waivers will enable researchers to conduct finfish sampling activities. The project would be exempt from the sea scallop observer program requirements because activities conducted on the trip are not consistent with normal fishing operations.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any

fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

#### Marine Mammals; File No. 21217

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; receipt of application for permit amendment.

**SUMMARY:** Notice is hereby given that Aaron Roberts, Ph.D., University of North Texas, Biological Sciences, 1155 Union Circle, #310559, Denton, TX 76203, has applied for an amendment to Scientific Research Permit No. 21217.

**DATES:** Written, telefaxed, or email comments must be received on or before September 5, 2018.

**ADDRESSES:** The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 21217 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713–0376, or by email to [NMFS.Pr1Comments@noaa.gov](mailto:NMFS.Pr1Comments@noaa.gov). Please include the File No. 21217 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific
