SUPPLEMENTARY INFORMATION: Regulatory Guide 8.23 was published in January 1981 to provide guidance on the types and frequencies of surveys that are acceptable to the NRC staff for use in medical institutions to comply with part 20 of title 10 of the *Code of Federal Regulations* (10 CFR), "Standards for Protection Against Radiation."

The regulations in 10 CFR part 20 were revised after 1981 and became less prescriptive. As part of amending its regulations in 10 CFR part 20, several of the prescriptive survey requirements applicable to radiation protection programs were deleted. Therefore, the prescriptive guidance in RG 8.23 is no longer needed, and RG 8.23 is being withdrawn.

The NRC is withdrawing RG 8.23 because it is no longer needed. Withdrawal of a RG means that the guide no longer provides useful information or has been superseded by other guidance, technological innovations, congressional actions, or other events. The withdrawal of RG 8.23 does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments to RG 8.23. Although RG 8.23 is withdrawn, current licensees may continue to use it, and withdrawal does not affect any existing licenses or agreements. However, RG 8.23 should not be used in future

requests or applications for NRC licensing actions.

Dated at Rockville, Maryland, this 1st day of August 2018.
