Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at http://www.regulations.gov, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) Type of Information Collection: Revision of a Currently Approved Collection.

(2) Title of the Form/Collection: Document Verification Request and Supplement.

(3) Agency form number, if any, and the applicable component of the DHS sponsoring the collection: Form G–485; USCIS.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: State, local or Tribal Government.

In the verification process, a participating agency validates an applicant’s immigration status by inputting identifying information into the Verification Information System (VIS), which executes immigration status queries against a range of data sources. If VIS returns an immigration status and the benefit-issuing agency does not find a material discrepancy with the response and the documents provided by the applicant, the verification process is complete. Then, the agency may use that immigration status information to determine whether to issue the benefit.
If VIS does not locate a record pertaining to the applicant during an electronic initial verification, a second step additional verification must be requested by the agency, so that a Status Verifier can manually check the records. If the Status Verifier cannot determine status during the second step additional verification, they will request the agency to submit a copy of the applicant’s immigration document. The immigration document can be submitted using scan and upload or by attaching it to a Form G–845 and mailing it to the Status Verifier.

Applicants may check on the processing of additional verification through the SAVE Case Check web portal, found at http://www.uscis.gov/save/save-case-check. SAVE Case Check permits applicants to use the SAVE verification numbers associated with their benefit applications or the immigration identification numbers and dates of birth provided to those benefit granting agencies to access this information.

In limited cases, agencies may query USCIS by filing Form G–845 by mail. Although the Form G–845 does not require it, if needed, certain agencies may also file the Form G–845 along with copies of immigration documents to receive additional information necessary to make their benefit determinations. These forms were developed to facilitate communication between all benefit-granting agencies and USCIS to ensure that basic information required to assess status verification requests is provided.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: The estimated total number of respondents for the information collection G–845 Verification Request is 162,106 and the estimated hour burden per response is 0.083 hours; for the information collection VIS Query the estimated total number of respondents is 23,293,981 and the estimated hour burden per response is 0.17 hours; for the information collection G–845 Verification Request Supplement the estimated total number of respondents is 7,122 and the estimated hour burden per response is 0.083 hours.

(6) An estimate of the total public burden (in hours) associated with the collection: The estimated total annual hour burden associated with this collection is 3,874,623 hours.

(7) An estimate of the total public burden (in cost) associated with the collection: The estimated total annual cost burden associated with this collection of information is $141,236,767.
