proposed rule change would have any significant impact on inter-market competition as the Exchange's affiliated exchanges already allow after hours trading until 8:00 p.m. ET, and other markets are free to provide similar trading hours. Furthermore, the Exchange does not believe that the proposed rule change would have any significant impact on intra-market competition as all Members would be able to enter orders later in the day due to the extended After Hours Trading Session.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become effective for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative for 30 days after the date of its filing. However, pursuant to Rule 19b–4(f)(6)(iii), the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the proposed rule change become effective immediately upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed action is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (http://www.sec.gov/rules/sro.shtml);
- Send an email to rule-comments@sec.gov. Please include File Number SR-ChoeBZX-2018-057 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to File Number SR-ChoeBZX-2018-057 on the subject line.

The Commission will post all comments on the Commission's internet website (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-ChoeBZX-2018-057 and should be submitted on or before September 5, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.

Eduardo A. Aleman,
Assistant Secretary.

[FR Doc. 2018–17490 Filed 8–14–18; 8:45 am]

BILLING CODE 8011–01–P
comment in the Federal Register on June 13, 2018.3 The Commission received three comment letters regarding the proposed rule change.4 On July 26, 2018, the Commission extended until September 11, 2018, the time period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.5 FINRA submitted a response to the comments on August 6, 2018.6 This order approves the proposed rule change.

II. Description of Proposed Rule Change

As described in further detail below, FINRA has proposed to add Supplementary Material.07 to existing FINRA Rule 6730 to require an ATS, as defined in Rule 300(a) of Regulation ATS,7 that effects transactions in U.S. Treasury Securities above a certain volume threshold to identify in its TRACE reports any counterparty to a Treasury transaction that is a non-FINRA member, using a market participant identifier ("MPID") assigned by FINRA.6

A. Background

On October 18, 2016, the Commission approved a proposed rule change that required FINRA members to report secondary market transactions in U.S. Treasury Securities to TRACE.9 FINRA members began reporting such transactions to TRACE on July 10, 2017.10 Information in TRACE regarding transactions in U.S. Treasury Securities is for regulatory purposes only and is not disseminated publicly.11 Under FINRA’s rules, each FINRA member that is a Party to a Transaction in a TRACE-Eligible Security must report the transaction.12 A TRACE transaction report must include, among other things, the contra-party’s identifier (i.e., MPID, customer, or a non-member affiliate, as applicable).13 Transactions in U.S. Treasury Securities that occur on an ATS generally must be reported to TRACE by the counterparties, if they are FINRA members, and by the ATS itself.14 On a TRACE report, an ATS must identify a FINRA member counterparty by that counterparty’s MPID.15 However, for a transaction involving a non-FINRA member customer, the ATS must report the trade utilizing a generic customer identifier ("C").16

A significant amount of trading activity in U.S. Treasury Securities on ATSs involves price-sensitive orders that are not registered as broker-dealers or are not FINRA members, including hedge funds, banks, and principal trading firms ("PTFs").17 The Department of the Treasury stated in its October 2017 Capital Markets Report that “[t]rading activity [in U.S. Treasury Securities] on the major electronic interdealer platforms is dominated by PTFs, . . . and collectively they account for over half of all transaction volumes in the interdealer broker segment of the [cash Treasury] market.”18 The Capital Markets Report stated that “a significant portion of PTF activity is anonymized in the TRACE data.”19 The Treasury Department recommended requiring ATSs that facilitate transactions in U.S. Treasury Securities to identify customers in their trade reports.20 FINRA believes that requiring additional counterparty information in ATS TRACE reports for transactions in U.S. Treasury Securities would improve the effectiveness of FINRA’s surveillance patterns and help FINRA to identify potentially manipulative activity, including wash sales and prearranged trading activity.21 FINRA further believes that such information would facilitate a better understanding of Treasury market structure and liquidity.22

B. Proposed Changes to ATS Reporting Obligations

FINRA has proposed to add Supplementary Material.07 to existing FINRA Rule 6730 to require each "covered ATS," as described below, to provide FINRA with a list of all of its non-FINRA-member subscribers and to obtain from FINRA an MPID for each such subscriber. Each covered ATS would then be required to identify a non-FINRA-member subscriber in the contra-party field of a TRACE report of a U.S. Treasury Security transaction using the MPID assigned by FINRA. A covered ATS would no longer be permitted to identify a contra-party to such a transaction using the "customer" or "non-member affiliate" identifier. Based on the list of non-FINRA-member subscribers that a covered ATS provides to FINRA, FINRA will assign each non-FINRA-member subscriber a unique MPID (to be used consistently across ATSs) and provide a list of those MPIDs to the ATS.23 This approach is designed to preserve the confidentiality of an individual ATS’s subscriber list, because FINRA will provide a covered ATS with a list of MPIDs only for its own subscribers.24

Proposed Supplementary Material .07(b) of FINRA Rule 6730 defines a "covered ATS" as an ATS, as that term is defined in Rule 300 of Regulation

See Notice, 83 FR at 27644; FINRA Rule 6730(c)(6).

ATS, that executed transactions in U.S. Treasury Securities against non-FINRA-member subscribers of $10 billion or more in monthly par value, computed by aggregating buy and sell transactions, for any two months in the preceding calendar quarter. FINRA has stated that, based on a review of U.S. Treasury Security transaction data reported to FINRA during a sample period, six ATSs would currently be considered covered ATSs. According to FINRA, these ATSs currently account for over 99% of the trade reports submitted by ATSs to TRACE for transactions in U.S. Treasury Securities. FINRA believes that limiting the proposed counterparty identification requirement in this manner balances the burdens associated with complying with the proposed rule (i.e., providing FINRA a list of all non-FINRA-member subscribers, obtaining MPIDs, and using the assigned MPIDs in TRACE reporting) with the benefits sought to be achieved (i.e., obtaining additional granularity that will enhance the quality of U.S. Treasury Security transaction data). FINRA further believes that the proposal would improve the completeness of the information on U.S. Treasury Security transactions available to FINRA and the official sector, and that the absence of more detailed counterparty information from ATSs with activity levels below the proposed threshold would not materially affect the completeness of the audit trail.

FINRA believes that the proposed rule change would result in an improvement to the effectiveness of FINRA’s surveillance patterns from the standpoint of greater granularity and thus more accurate pattern detection, to the effectiveness of FINRA’s surveillance program for U.S. Treasury Securities. FINRA has stated that it will announce the effective date of the proposed rule change in a Regulatory Notice to be published no later than 60 days following Commission approval of the proposal, and that the effective date will be no later than 180 days following publication of that Regulatory Notice. Covered ATSs will be required to submit a list of their non-FINRA-member subscribers to FINRA at least 60 days in advance of the effective date. An ATS that becomes a covered ATS in the future would be required to begin complying with the requirements of Supplementary Material .07 of FINRA Rule 6730 within 60 calendar days of the end of the calendar quarter in which it becomes a covered ATS. This 60-day period is designed to provide sufficient time for a newly covered ATS to provide FINRA with a list of, and obtain MPIDs for, its non-FINRA-member subscribers, and perform any necessary programming changes. Once an ATS is deemed a covered ATS, it must continue complying with the new counterparty reporting requirements even if its volume of executed transactions in U.S. Treasury Securities against non-FINRA-member subscribers falls below the threshold.

III. Summary of Comments and FINRA’s Response

The Commission received three comment letters regarding the proposal. Two commenters strongly supported the proposal. One of these commenters noted that making more Treasury market data readily available to the official sector would improve general monitoring and surveillance capabilities, including those designed to detect prohibited trading practices and potential risks to market stability. Similarly, the second commenter noted that the absence of information regarding the identity of non-FINRA-member counterparties is “a significant limitation for effective surveillance and oversight.”

The third commenter generally supported the goal of increased transparency in the U.S. Treasury market but did not think that the proposal “is sufficient or even necessarily an appropriate means of facilitating transparency among non-FINRA member participants in the Treasury market.” This commenter warned that the proposal “may actually result in reduced transparency” because it might cause non-FINRA members to shift their trading in U.S. Treasury Securities “from FINRA member firms to non-FINRA member bank affiliates that have no reporting responsibilities.” The commenter concluded that “Congress or the SEC should consider requiring PTFs to register as broker-dealers such that FINRA, in turn, may require them to centrally clear their transactions and report their transactions to TRACE. Until such a requirement exists, the problem of market opacity will persist.”

In its response letter, FINRA acknowledged that reporting by non-FINRA members would provide a more complete picture of Treasury market activity, but believes that the proposal represents an appropriate next step to improve the usefulness of the Treasury transaction data currently reported through TRACE, given the limits of its jurisdictional authority. FINRA further noted that the Department of the Treasury, the Commission, the Federal Reserve Bank of New York, and the CFTC have stated that they are assessing effective means to ensure the collection of data regarding Treasury cash securities market transactions is comprehensive and includes information from institutions that are...
imposed on member firms, and sought to narrowly tailor the proposal by establishing a minimum volume threshold below which the identification requirements would not apply. FINRA also noted that, because firms currently must populate the counterparty field in their TRACE reports, the proposal will not require ATSs to undertake programming related to populating a new field, but rather will require them to use a FINRA-assigned MPID in place of the current generic contra-party identifiers for "customer" or "non-member affiliate." FINRA further noted that it intends to set an effective date for the proposal of approximately 180 days from the date of the Regulatory Notice announcing a Commission approval of the proposal, which is designed to provide ATSs with enough time to determine whether they are covered and, if so, to obtain MPIDs for non-FINRA-member subscribers and make any necessary programming changes.

Finally, one of the commenters who brought attention to the proposal suggested that FINRA ultimately should require identification using the legal entity identifiers ("LEIs") rather than MPIDs. FINRA responded that, at this time, MPIDs are the most appropriate identifier for TRACE reports because MPIDs are established and widely used by its members for purposes of reporting trade and counterparty information to FINRA.

IV. Discussion and Commission Findings

After carefully considering the proposal, the comments submitted, and FINRA’s response to the comments, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association. In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Act, which requires, among other things, that FINRA’s rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission called FINRA’s 2016 proposal to expand TRACE reporting to include member transactions in U.S. Treasury Securities “an important first step in providing the official sector with more comprehensive data about the Treasury cash market.” Currently, TRACE reports require specific identification only of FINRA member counterparties; non-FINRA-member counterparties are reported only as “C” for customer or “A” if the counterparty is an ATS affiliate. FINRA has now proposed to require covered ATSs to specifically identify all non-FINRA-member counterparties in their TRACE reports of U.S. Treasury Security transactions. The Commission concurs with FINRA’s assessment that “the additional detail that would be added to transaction reports by identifying non-FINRA member counterparties would enhance FINRA’s surveillance program for U.S. Treasury Securities.”

The Commission concludes, therefore, that expanding TRACE reporting of Treasury transactions in the manner described in the proposal is reasonably designed to help FINRA fulfill its mandate in Section 15A(b)(6) of the Act to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission further believes that expanded reporting of counterparty identities in the manner described in the proposal will help to establish a more complete audit trail for transactions in U.S. Treasury Securities, thereby assisting regulators in detecting and deterring improper trading activity. More complete information regarding counterparty identity also will provide the official sector with a better understanding of the structure and characteristics of the U.S. Treasury cash market. The Commission notes that the proposal is consistent with the Treasury Department’s recommendation in the Capital Markets Report that FINRA members that facilitate transactions in U.S. Treasury Securities be required to identify customers in their reports of transactions in U.S. Treasury Securities. The Commission acknowledges the concerns of one commenter who argued that the proposal “does not do enough to achieve full transparency in the Treasury Market and may actually result in reduced transparency” and that some non-FINRA-member market participants...
might elect not to trade on covered ATSs “to maintain anonymity and avoid regulatory oversight.” 65 The Commission believes, nevertheless, that this comment does not preclude approval of the proposal at this time. Although some Treasury transactions will continue to be outside the scope of the new requirements, the new counterparty information reported by covered ATSs should greatly enhance surveillance capabilities and provide additional insights into the Treasury cash market. The Commission notes that other public sector authorities have expressed their intention to continue to assess effective means to ensure that reported data regarding the Treasury cash market is comprehensive and includes information from institutions that are not FINRA members. 66 Furthermore, although theoretically possible, it might not be practical for non-FINRA members to shift their trading activity away from covered ATSs if covered ATSs continue to serve as significant pools of liquidity for U.S. Treasury Securities. The Commission notes that FINRA “intends to monitor . . . for any potential negative impacts or changes in ATS or non-member subscriber behavior.” 67

The Commission believes that the proposal is reasonably designed to minimize burdens on ATSs while still fulfilling the important policy objectives discussed above. The new non-FINRA-member identification requirements will apply only to ATSs that exceed the $10 billion threshold. These ATS currently account for the vast majority of ATS transaction reports for transactions in U.S. Treasury Securities against non-FINRA-member subscribers. 68 Furthermore, the proposal does not appear likely to require covered ATSs to undertake significant programming work because new reporting fields will not be necessary. All ATSs that report to TRACE already utilize fields for counterparty identifiers and are familiar with the use of MPIDs for FINRA member counterparties. For Treasury transactions on covered ATSs, the proposal eliminates use of the generic “C” and “A” identifiers and instead requires the ATS to populate the counterparty identifier field with an MPID in all cases, regardless of whether a particular counterparty is a FINRA member. Under the new rule, FINRA will assign MPIDs to all non-FINRA-member subscribers of covered ATSs who engage in Treasury transactions without employing a de minimis cut-off. The Commission believes that this is a reasonable means of simplifying compliance with the rule because covered ATSs will not have to analyze the transaction volume of non-FINRA-member subscribers to ascertain whether any of them become subject to or subsequently fall outside the scope of the rule. In addition, an ATS that reaches the $10 billion threshold will remain a covered ATS even if its volume of executed transactions in U.S. Treasury Securities subsequently falls below the $10 billion threshold. 69 The Commission believes that this will simplify compliance with the new rule because an ATS will not be required to continue monitoring its volume of executions in U.S. Treasury Securities against non-FINRA-member subscribers once it has reached the $10 billion threshold. Finally, the Commission notes that the new rule will impose duties only on covered ATSs and not on any of their subscribers.

Pursuant to Section 19(b)(5) of the Act, 70 the Commission consulted with and considered the views of the Treasury Department in determining to approve the proposed rule change. The Treasury Department supports FINRA’s proposal to require covered ATSs to identify non-FINRA-member counterparties in their TRACE reports of Treasury transactions. 71 Pursuant to Section 19(b)(6) of the Act, 72 the Commission has considered the sufficiency and appropriateness of existing laws and rules applicable to government securities brokers, government securities dealers, and their associated persons in approving the proposal. As discussed above, ATSs currently report Treasury transactions using generic identifiers that do not specifically identify non-FINRA-member counterparties. By requiring covered ATSs to identify non-FINRA-member counterparties in their TRACE reports of Treasury transactions, the new rule will enhance FINRA’s surveillance program for U.S. Treasury Securities and provide the official sector with important additional information concerning activity in the U.S. Treasury cash market.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, 73 that the proposed rule change (SR–FINRA–2018–023) is approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. 74

Eduardo A. Aleman, Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations: Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by MIAX PEARL, LLC To Amend the MIAX PEARL Fee Schedule

August 9, 2018.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") 1 and Rule 19b–4 thereunder, 2 notice is hereby given that on August 1, 2018, MIAX PEARL, LLC ("MIAX PEARL" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX PEARL Fee Schedule (the “Fee Schedule”).

The text of the proposed rule change is available on the Exchange’s website at http://www.miaxoptions.com/rule-filings/pearl at MIAX PEARL’s principal office, and at the Commission’s Public Reference Room.
