An MCP must be consistent with the Council’s fishery ecosystem plans, must identify conservation and management objectives (including criteria for determining when such objectives are met), and must prioritize planned marine conservation projects.

The Council reviewed and concurred with the American Samoa MCP in June 2018. On July 9, 2018, the Governor of American Samoa submitted the MCP to NMFS for review and approval. The following briefly describes the objectives of the MCP. Please refer to the MCP for planned projects and activities designed to meet each objective, the evaluative criteria, and priority ranking. The MCP contains six conservation and management objectives, listed below.

1. Maximize social and economic benefits through sustainable fisheries;
2. Support quality scientific research to assess and manage fisheries;
3. Promote an ecosystem approach in fisheries management;
4. Recognize the importance of island culture and traditional fishing in managing fishery resources and foster opportunities for participation;
5. Promote education and outreach activities and regional collaboration regarding fisheries conservation;
6. Encourage development of technologies and methods to achieve the most effective level of enforcement and to ensure safety at sea.

This notice announces that NMFS has reviewed the MCP, and has determined that it satisfies the requirements of the Magnuson-Stevens Act. Accordingly, NMFS has approved the MCP for the 3-year period from July 25, 2018, through July 24, 2021. This MCP supersedes the MCP previously approved for the period April 1, 2015, through March 31, 2018 (80 FR 18820, April 8, 2015).

Dated: August 17, 2018.
