Synopsis

1. On March 23, 2018, the President signed into law the Consolidated Appropriations Act of 2018, which included the Repack Airwaves Yielding Better Access for Users of Modern Services Act of 2018 (RAY BAUM’S Act of 2018). Title IV of RAY BAUM’S Act of 2018 amends Section 13 of the Communications Act (the Act) of 1934, and requires that the Commission publish a Communications Marketplace Report in the last quarter of every even numbered year. Among other things, the biennial Communications Marketplace Report requires that the Commission assess the state of competition in the communications marketplace, including competition to deliver audio service among broadcast stations, satellite radio, and entities that provide audio content via the internet and to mobile devices. Accordingly, this Public Notice seeks input on the state of competition in the marketplace for the delivery of audio programming as it would relate to the overall goal of providing the required Communications Marketplace Report to Congress.

2. This Public Notice requests comment on the criteria or metrics that could be used to evaluate the state of competition in the audio programming marketplace, as well as comment and information on industry data, competitive dynamics, and trending factors. For example, commenters are invited to submit the following data and information related to participants in the marketplace for the delivery of audio programming, including, but not limited to, terrestrial radio broadcasters (i.e., AM and FM radio stations), satellite radio providers, and entities that provide audio programming over the internet and to mobile devices (collectively, Audio Marketplace Participants):

• Identification and ownership of key Audio Marketplace Participants, as well as the business models and competitive strategies they use;

• Trends in service offerings, pricing, and consumer behavior;

• The extent of competition among Audio Marketplace Participants, including intramodal competition (i.e., competition among providers of the same type, such as terrestrial radio broadcast stations) and intermodal competition (i.e., competition among providers of different types, such as terrestrial radio broadcast stations and satellite radio providers);

• Ratings, subscriptions, and revenue information, for the marketplace as a whole and for individual Audio Marketplace Participants;

• Capital investment, innovation, and the deployment of advanced technology;

• Requirements for entry into the marketplace; and

• Recent entry into and exit from the marketplace.

It is requested that commenters submit information, data, and statistics for 2016 and 2017, as well as information on any notable trends and developments that have occurred during 2018 to date. Industry stakeholders, the public, and other interested parties are encouraged to submit information, comments, and analyses. In order to facilitate analysis of competitive trends, parties should submit current and historic data that are comparable over time. Commenters seeking confidential treatment of their submissions should request that their submission, or a...
specific part thereof, be withheld from public inspection.
3. In addition, this document requests comment on whether laws, regulations, regulatory practices or demonstrated marketplace practices pose a barrier to competitive entry into the marketplace for the delivery of audio programming or to the competitive expansion of existing providers. Further, this document seeks input concerning the extent to which any such laws, regulations or marketplace practices affect entry barriers for entrepreneurs and other small businesses in the marketplace for the delivery of audio programming.
