

procedures specified in paragraph (k)(1) of this AD.

**(i) Inspection and Corrective Action**

Within 1,600 flight hours or 12 months after the effective date of this AD, whichever occurs first, do a general visual inspection of the moisture seal on the left and right windshields for signs of cracks, erosion, wear, and other deterioration (including discoloration, warping, or missing material). If any crack, erosion, wear, or other deterioration is found, before further flight, repair the moisture seal in accordance with a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

**Note 1 to paragraph (i) of this AD:**

Additional guidance for inspection of the moisture seal can be found in Bombardier Q400 Dash 8 Maintenance Review Board (MRB) Task 561001E201, "General Visual Inspection of the Windshield Moisture Seal," (Task 56-10-01-210-801, of the Bombardier Q400 Dash 8 Airplane Maintenance Manual).

**Note 2 to paragraph (i) of this AD:**

Additional guidance for repair of the moisture seal can be found in PPG Aerospace Transparencies Abbreviated Component Maintenance Manual, Part Number NP-157901, Revision 6, dated June 16, 2015; and PPG Sierracin Component Maintenance Manual, 56-10-12, Part Number 802600, Revision D, dated April 6, 2017.

**(j) Re-Torquing and Sealing Screws**

Within 8,000 flight hours or 60 months after the effective date of this AD, whichever occurs first: Re-torque the windshield heater terminal lug screws for the left and right windshields and apply Humiseal to the screw heads of the windshield heaters, in accordance with paragraph 3.B., "Procedure," of the Accomplishment Instructions of Bombardier Service Bulletin 84-30-16, Revision A, dated September 27, 2017.

**Establishment and Modification of Area Navigation Routes, Florida Metroplex Project; Southeastern United States**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action establishes 16 high altitude area navigation (RNAV) routes (Q-routes), and modifies 7 existing Q-routes, in support of the Florida Metroplex Project. The routes were developed to improve the efficiency of the National Airspace System (NAS) and reduce dependency on ground-based navigational systems that cause system inefficiencies due to their limitations. This action also makes minor corrections to the waypoint names and geographic coordinates of certain Q-routes.

**DATES:** Effective date 0901 UTC, November 8, 2018. The Director of the Federal Register approves this incorporation by reference action under Title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA, Order 7400.11 and publication of conforming amendments.

**ADDRESSES:** FAA Order 7400.11B, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at [http://www.faa.gov/air\\_traffic/publications/](http://www.faa.gov/air_traffic/publications/). For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11B at NARA, call (202) 741-6030, or go to <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

**SUPPLEMENTARY INFORMATION:****Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it supports the air traffic service route structure in the southeastern United States to maintain the efficient flow of air traffic.

**History**

The FAA published a notice of proposed rulemaking in the **Federal Register** for Docket No. FAA-2018-0437 (83 FR 26612; June 8, 2018) to establish 16 high altitude area navigation (RNAV) routes (Q-routes), and modify 7 existing Q-routes in support of the Florida Metroplex Project. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. One comment was received.

Area navigation routes are published in paragraph 2006, of FAA Order 7400.11B dated August 3, 2017, and effective September 15, 2017, which is incorporated by reference in 14 CFR 71.1. The area navigation routes listed in this document will be subsequently published in the Order.

**Discussion of Comment**

The commenter did not present an objection to the proposal, but posed questions regarding the benefits of the stated reduction in air traffic control sector complexity; reduced pilot-to-air traffic controller communications; and details of the expected increases in NAS capacity that were noted in the NPRM.

The implementation of these routes will reduce sector complexity and air traffic controller workload by reducing the need for offset radar vectors when climbing and descending air traffic. The routes will deconflict dedicated route options when transitioning departures and arrivals from the overhead streams. Additionally, the routes will create parallel, de-conflicted routes to achieve higher throughput, more optimal altitudes, and increased routing options, particularly in constricted airspace along the mid-Atlantic U.S. coast. These

initiatives are expected to reduce air traffic controller and pilot workload as well as enhance NAS efficiency.

Regarding NAS capacity improvements, the implementation of the routes will contribute to the integration of recent Metroplex work along the East Coast into the high altitude enroute structure. Capacity will be enhanced through more efficient routings, reduced delays, and increased flexibility for users. Further, the routes will eliminate reliance on the ground-based navigation aid (NAVAID) structure and will enable the VOR Minimum Operational Network (VOR MON) Program to achieve its cost reduction objectives associated with the decommissioning of designated NAVAIDs. The FAA monitors a number of NAS performance metrics on a daily basis. Additionally, various forecasts are available, such as the FAA Aerospace Forecast, which projects future aviation activity and demand for FAA services. Based on analysis of these data, adjustments can be made where necessary.

**Availability and Summary of Documents for Incorporation by Reference**

This document amends FAA Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017, and effective September 15, 2017. **Regulatory Notices and Analyses**

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**Environmental Review**

The FAA has determined that this action of establishing 16 high altitude area navigation (RNAV) routes (Q-routes), and modifying 7 existing Q-routes, in support of the Florida Metroplex Project qualifies for categorical exclusion under the National Environmental Policy Act and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F—Environmental Impacts: Policies and Procedures, paragraph 5–6.5i—Establishment of new or revised

air traffic control procedures conducted at 3,000 feet or more above ground level (AGL), procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas, modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. As such, this action is not expected to cause any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5–2 regarding Extraordinary Circumstances, this action has been reviewed for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis, and it is determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment.
