

SUPPLEMENTARY INFORMATION:

Summary of Change in Control

On July 10, 2018, Delfin LNG filed a Notice of Change in Control Through Indirect Equity Ownership Changes in the above-referenced docket.¹ In the Notice, Delfin LNG states that it has recently undergone changes in its corporate structure and ownership. Specifically, Delfin LNG was a wholly-owned subsidiary of Fairwood Peninsula Energy (Fairwood Peninsula). An intermediary holding company, Delfin Midstream, LLC (Delfin Midstream) was subsequently established, with Fairwood Peninsula owning 100% of Delfin Midstream and Delfin Midstream owning 100% of Delfin LNG. Thereafter, Delfin Midstream was converted from a limited liability company to a corporation. In June 2018, equity shares in Delfin Midstream were sold to a variety of investors to raise additional capital. Effective June 12, 2018, Fairwood Peninsula's ownership of Delfin Midstream had been reduced from 100% to 30.7%. Two other entities (Talisman Global Alternative Master, L.P. and Talisman Global Capital Master, L.P.) also own or control 10% or more of the voting securities of Delfin Midstream. Delfin Midstream continues to own 100% of Delfin LNG.²

Additional details can be found in Delfin LNG's Notice, posted on the DOE/FE website at: https://fossil.energy.gov/ng_regulation/sites/default/files/programs/Delfin_CIC_07_11_18.pdf.

DOE/FE Evaluation

DOE/FE will review Delfin LNG's Notice in accordance with its Procedures for Changes in Control Affecting Applications and Authorizations to Import or Export Natural Gas (CIC Procedures).³ Consistent with the CIC Procedures, this Notice addresses only the authorization granted to Delfin LNG to export liquefied natural gas (LNG) to non-free trade agreement (non-FTA) countries in DOE/FE Order No. 4028 (FE Docket No. 13-147-LNG).⁴ If no interested person protests the change in control and DOE takes no action on its own motion, the change in control will be deemed

granted 30 days after publication in the **Federal Register**. If one or more protests are submitted, DOE will review any motions to intervene, protests, and answers, and will issue a determination as to whether the proposed changes in control have been demonstrated to render the underlying authorization inconsistent with the public interest.

Public Comment Procedures

Interested persons will be provided 15 days from the date of publication of this notice in the **Federal Register** in order to move to intervene, protest, and answer Delfin LNG's Notice. Protests, motions to intervene, notices of intervention, and written comments are invited in response to this notice only as to the change in control described in Delfin LNG's Notice, and only with respect to Delfin LNG's non-FTA authorization in DOE/FE Order No. 4028. All protests, comments, motions to intervene, or notices of intervention must meet the requirements specified by DOE's regulations in 10 CFR part 590.

Filings may be submitted using one of the following methods: (1) Preferred method: Emailing the filing to fergas@hq.doe.gov, with the individual FE Docket Number in the title line, or Delfin LNG Change in Control in the title line to include the applicable docket in this notice; (2) mailing an original and three paper copies of the filing to the Office of Regulation and International Engagement at the address listed in **ADDRESSES**; or (3) hand delivering an original and three paper copies of the filing to the Office of Regulation and International Engagement at the address listed in **ADDRESSES**. All filings must include a reference to the individual FE Docket Number(s) in the title line, or Delfin LNG Change in Control in the title line to include all applicable docket in this notice. **Please Note:** If submitting a filing via email, please include all related documents and attachments (e.g., exhibits) in the original email correspondence. Please do not include any active hyperlinks or password protection in any of the documents or attachments related to the filing. All electronic filings submitted to DOE must follow these guidelines to ensure that all documents are filed in a timely manner. Any hardcopy filing submitted greater in length than 50 pages must also include, at the time of the filing, a digital copy on disk of the entire submission.

Delfin LNG's Notice and any filed protests, motions to intervene, notices of intervention, and comments are available for inspection and copying in the Office of Regulation and

International Engagement docket room, Room 3E-042, 1000 Independence Avenue SW, Washington, DC 20585. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The Notice and any filed protests, motions to intervene, notices of interventions, and comments will also be available electronically by going to the following DOE/FE Web address: <http://www.fe.doe.gov/programs/gasregulation/index.html>.

Signed in Washington, DC, on August 23, 2018.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

[OE Docket No. EA-460]

Application to Export Electric Energy; Enel Trading North America, LLC

AGENCY: Office of Electricity, DOE.

ACTION: Notice of application.

SUMMARY: Enel Trading North America, LLC (ETNA or Applicant) has applied for authority to transmit electric energy from the United States to Mexico pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before September 28, 2018.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity, Mail Code: OE-

20, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585-0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to Electricity.Exports@hq.doe.gov, or by facsimile to 202-586-8008.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the United States Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On August 3, 2018, DOE received an application from ETNA for authority to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities.

In its application, the Applicant states that it “is not a franchised public utility with a transmission or distribution system, and does not have captive customers.” The electric energy that ETNA proposes to export to Mexico would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission’s
