

Existing authorization holders raised concerns to FE that the release of their LNG price data at the cargo level may cause competitive harm to them. To address this issue, FE proposes to align price data reporting for natural gas imports and exports by vessel—including LNG—with current data release policies for pipeline import and export movements. Specifically, FE proposes to publish only volume-weighted average import and export prices for LNG and other modes of natural gas transportation by point of entry or exit, as is currently the practice for pipeline imports and exports. Thus, instead of a price being published for each LNG cargo imported or exported, a monthly volume-weighted average price will be published for each point of LNG import or export.

FE proposes the following change in the confidentiality policy for Form FE-746. The current statement “*Information reported on Form FE-746R will be considered public information and may be publicly released in company identifiable form*” will be replaced with the new data confidentiality statement that will read: “*The following information that is reported on Form FE-746R will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. 552, as amended, and the Department of Energy (DOE) regulations, 10 CFR 1004.11, implementing the FOIA.*

- *The Price at Import or Export Point.*
- *In the case of natural gas imports and exports for all modes of transportation except pipeline, The name of the Specific Purchaser/End User.”*

Questions pertaining to Specific Purchaser/End User do not appear on the version of Form FE-746R required for pipeline imports and exports.

*All other information reported on Form FE-746R will be considered public information and may be publicly released in company identifiable form.*

*Data protection methods will not be applied to the aggregate statistical data published from submissions on Form FE-746R. There may be some statistics that are based on data from fewer than three import or export transactions. In these cases, it may be possible for a knowledgeable person to closely estimate the information reported by a specific respondent.*

Transaction-level price information for natural gas and LNG imports and exports, including prices for individual LNG import and export cargos, and the name of the Specific Purchaser/End User, will not be publicly released. No information related to natural gas

specific customers/end users is currently published. Natural gas import and export price information, including prices for LNG imports and exports, will be aggregated and published by point of entry or exit in FE's and EIA's data publications featuring natural gas import/export information, including the Office of Fossil Energy's *LNG Monthly* and EIA's *Natural Gas Monthly*.

FE also proposes to collect heat content in Btu per cubic foot for LNG imports and exports to account for variations in the heat content of gas being imported from and exported to various countries, so that import and export volume data may be analyzed according to objective standardized units of measurement. The heat content information reported for LNG imports and exports on Form FE-746R will not be protected and may be publicly released in company identifiable form.

(5) *Annual Estimated Number of Respondents:* 371;

(6) *Annual Estimated Number of Total Responses:* 4,452;

(7) *Annual Estimated Number of Burden Hours:* 13,356;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* The cost of the burden hours is estimated to be \$1,010,916 (13,356 burden hours times \$75.69 per hour). FE estimates that respondents will have no additional costs associated with the surveys other than burden hours.

Comments are invited on whether: (a) The proposed collection of information is necessary for the proper performance of agency functions, including whether the information shall have practical utility; (b) FE's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, is accurate; (c) FE can improve quality, utility, and clarity of the information it will collect; and (d) FE can minimize the burden of the collection of information on respondents, such as automated collection techniques or other forms of information technology.

**Abstract:** This Information Collection Request (ICR) seeks authorization for tribes to demonstrate their eligibility to be treated in the same manner as states under the Clean Air Act (CAA) and to submit applications to implement a CAA program. This ICR extends the collection period of information for determining eligibility, which expires December 31, 2018. The ICR maintains the estimates of burden costs for tribes in completing a CAA application.

The program regulation provides for Indian tribes, if they choose, to assume responsibility for the development and implementation of CAA programs. The regulation, Indian Tribes: Air Quality Planning and Management (Tribal Authority Rule [TAR] 40 CFR parts 9, 35, 49, 50, and 81) sets forth how tribes may seek authority to implement their own air quality planning and management programs. This rule establishes: (1) Which CAA provisions Indian tribes may seek authority to implement; (2) What requirements the tribes must meet when seeking such authorization; and (3) What federal financial assistance may be available to help tribes establish and manage their air quality programs. The TAR provides tribes the authority to administer air quality programs over all air resources, including non-Indian owned fee lands, whining the exterior boundaries of a reservation and other areas over which the tribe can demonstrate jurisdiction. An Indian tribe that takes responsibility for a CAA program would essentially be treated in the same way as a state would be treated for that program.

**Form Numbers:** None.

**Respondents/Affected Entities:** States, locals, Indian tribes.

**Respondent's Obligation to Respond:** Voluntary, required to obtain or retain a benefit Tribal Authority Rule [TAR] 40 CFR parts 9, 35, 49, 50 and 81).

**Estimated Number of Respondents:** 8 (total).

**Frequency of Response:** One-time applications.

**Total Estimated Burden:** 320 hours (per year). Burden is defined at 5 CFR 1320.03(b).

**Total Estimated Cost:** \$18,896.00 (per year), includes \$0 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Dated: August 15, 2018.

**Abstract:** The Clean Water Act Section 305(b) reports contain information on whether waters assessed by a state meet the state's water quality standards, and, when waters are impaired, the pollutants and potential sources affecting water quality. This information helps State's and the public track progress in addressing water pollution. Section 303(d) of the Clean Water Act requires States to identify and
