Abstract: EPA is renewing an ICR for the Cross-State Air Pollution Rule (CSAPR) trading programs to allow for continued implementation of the programs. The information collection requirements under all five CSAPR trading programs are reflected in the existing ICR as most recently revised in 2016. In 2017, Texas sources were removed from two CSAPR trading programs and EPA promulgated the Texas SO₂ Trading Program using the CSAPR trading programs as a model. This ICR renewal reflects the 2017 termination of information collection requirements for Texas sources under the two CSAPR trading programs and the 2019 re-establishment of some of the same requirements for some of the same sources under the Texas trading program. Most affected sources under the CSAPR and Texas trading programs are also subject to the Acid Rain Program (ARP). The information collection requirements under the CSAPR and Texas trading programs, which consist primarily of requirements to monitor and report emissions data in accordance with 40 CFR part 75, substantially overlap and are fully integrated with ARP information collection requirements. The burden and costs of overlapping requirements are accounted for in the ARP ICR (OMB Control Number 2060-0258). This ICR accounts for information collection burden and costs under the CSAPR and Texas trading programs that are incremental to the burden and costs already accounted for in the ARP ICR. All data received by EPA will be treated as public information.

Form Numbers: Agent Notice of Delegation #5900-172, Certificate of Representation #7610-1, General Account Form #7610-5, Allowance Transfer Form #7610-6, Retired Unit

Exemption #7610-20, Allowance Deduction #7620-4.

Respondents/affected entities: Industry respondents are stationary, fossil fuel-fired boilers and combustion turbines serving electricity generators subject to the CSAPR and Texas trading programs, as well as non-source entities voluntarily participating in allowance trading activities. Potential state respondents are states that can elect to submit state-determined allowance allocations for sources located in their states.

Respondents’ obligation to respond: Industry respondents: voluntary and mandatory (Sections 110(a) and 301(a) of the Clean Air Act). State respondents: voluntary.

Estimated number of respondents: 1,028 industry respondents, including 978 affected sources and 50 non-source entities participating in allowance trading activities, and 27 potential state respondents.

Frequency of response: On occasion, quarterly, and annually.

Total estimated burden: 134,423 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$18,563,878 (per year), which includes \$8,207,545 annualized capital or operation & maintenance costs.

Changes in Estimates: There is decrease of 40,699 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due almost entirely to adjustments in the estimated numbers of respondents and transactions and the time required to complete certain activities. Changes in programs—*i.e.*, the removal of Texas units from two CSAPR trading programs and the start of the Texas SO₂ Trading Program—together are responsible for approximately 574 hours of the overall decrease.

Director, Regulatory Support Division.
