

account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of our regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On July 31, 2018, and August 1, 2018, in accordance with 19 CFR 351.210(b)(2)(ii), Liang Hah Heng and U. Yong requested to postpone the final determination for a maximum of 135 days after the date of publication of the preliminary determination in the **Federal Register**, in the event that we issued an affirmative preliminary determination.¹³ Liang Hah Heng and U. Yong, pursuant to 19 CFR 351.210(e)(2), also requested an extension of provisional measures from a four-month period to a period not more than six months in duration.¹⁴ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will make our final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, we will notify the International Trade Commission (ITC) of our preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Appendix I

Scope of the Investigation

The products subject to this investigation are bands made of vulcanized rubber, with a flat length, as actually measured end-to-end by the band lying flat, no less than ½ inch and no greater than 10 inches; with a width, which measures the dimension perpendicular to the length, actually of at least 3/64 inch and no greater than 2 inches; and a wall thickness actually from 0.020 inch to 0.125 inch. Vulcanized rubber has been chemically processed into a more durable material by the addition of sulfur or other equivalent curatives or accelerators. Subject products are included regardless of color or inclusion of printed material on the rubber band's surface, including but not limited to, rubber bands with printing on them, such as a product name, advertising, or slogan, and printed material (e.g., a tag) fastened to the rubber band by an adhesive or another temporary type of connection. The scope includes vulcanized rubber bands which are contained or otherwise exist in various forms and packages, such as, without limitation, vulcanized rubber bands included within a desk accessory set or other type of set or package, and vulcanized rubber band balls. The scope excludes products that consist of an elastomer loop and durable tag all-in-one, and bands that are being used at the time of import to fasten an imported product.

Excluded from the scope of this investigation are vulcanized rubber bands of various sizes with arrow shaped rubber protrusions from the outer diameter that exceeds at the anchor point a wall thickness of 0.125 inches and where the protrusion is used to loop around, secure and lock in place.

Excluded from the scope of this investigation are yarn/fabric-covered vulcanized rubber hair bands, regardless of size.

Merchandise covered by this investigation is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under subheading 4016.99.3510.

Merchandise covered by the scope may also enter under HTSUS subheading 4016.99.6050. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the investigation is dispositive.

SUPPLEMENTARY INFORMATION: Three natural coho stocks (Queets coho, Strait of Juan de Fuca coho, and Snohomish coho) and two Chinook stocks (Sacramento River fall Chinook and Klamath River fall Chinook) were found to meet the criteria for being classified as overfished in the PFM Review of 2017 Ocean Salmon Fisheries. Under the tenets of the Salmon Fishery

Management Plan, the STT is required to develop a salmon rebuilding plan for each of these stocks and propose them to the Council within one year.

The STT, tribal, state, Federal, and other management entities are working together to develop the salmon rebuilding plans. These meetings are the third of a series of meetings, and will focus on the development of potential recommendations to be included in each rebuilding plan. Additional topics for discussion may include, but are not limited to, outstanding data needs, data analysis, and economic aspects to be included in each plan. One meeting will occur for each of the five stocks; additional meetings will be scheduled as needed. These meetings are open to the public. All meetings will have the same webinar ID and access code.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting.
