SUPPLEMENTARY INFORMATION: SJVUAPCD Rule 2201 affords the EPA a 45-day period to review and object to, as appropriate, a proposed permit. Rule 2201 § 5.9.1. If the EPA does not object, Rule 2201 allows any person to petition the EPA, within 60 days, to object to the proposed permit. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period, or the grounds for the issue arose after this period.  

The EPA received the Petition dated December 16, 2014, requesting that the EPA object to the Permit because the emissions baseline and the assumptions used to calculate project emissions were allegedly inaccurate.  

On August 8, 2017, pursuant to the settlement agreement, the Petitioners withdrew Parts I and IV of the Petition. See https://www.epa.gov/sites/production/files/2017-06/documents/alon_withdrawal2014.pdf.
